[1/20/2004 12:02:06 AM] [AlanD] Just some stats for you stat lovers. MDR have been up 8 out of 9 years between 18 JAN and 18FEB of each year with a avg profit of 15.03%.

[1/20/2004 12:04:39 AM] [AlanD] NSC was up 4.8% 8 of 9 years for the same time period.

[1/20/2004 12:06:20 AM] [AlanD] MBRS has been up an avg of 31.9% for the same period every year for the last 7 yrs. Even during the bear market.

[1/20/2004 12:07:45 AM] [AlanD] MBRS was slightly skewed by the 129% gain in 2000. Other than that, performance is closer to 18%. Still not bad.

[1/20/2004 12:24:57 AM] [pastry] aland, what software do you use to find price increase 18jan-19feb?

[1/20/2004 12:26:58 AM] [AlanD] I wrote it myself in WealthLab Developer. Writing the short version now as we chat.

[1/20/2004 12:27:19 AM] [AlanD] I can put in any date range.

[1/20/2004 12:29:02 AM] [pastry] I'm figured it wasn't a tcnet feature, and too tedious to do manually. thanks for posting.

[1/20/2004 12:31:02 AM] [AlanD] Yes you are right. It would be too tedious to do by hand. Just got done coding the short version and have it running now. I figure that one will produce a few winners given the overbought state of the market right now.

[1/20/2004 12:31:21 AM] [AlanD] Scanning 2000 stocks takes about 2 mins.

[1/20/2004 12:33:05 AM] [pastry] I just found wealth lab dvlpr website. looks interesting. seems you are finding it profitable?

[1/20/2004 12:35:14 AM] [AlanD] Yes I do find it profitable. Especially with backtesting ideas and trading strategies. No other program as comprehensive in that area.

[1/20/2004 12:36:35 AM] [pastry] I want a rigorous way to generate trade signals. I'm exporting price data to SPSS where I'm building a regression model to predict price move over next 20 days.

[1/20/2004 12:37:52 AM] [AlanD] Sounds interesting. Working with Nueral network model?

[1/20/2004 12:38:34 AM] [pastry] It will take more work, but inital results are

## ClubHome

encouraging. Around 80% accuracy in training data set and 67% in future data.

[1/20/2004 12:40:37 AM] [AlanD] Yes I have found the training set to almost always be more profitable. Just nature of the beast. Short scanning model just completed. FNF has fallen an average of 5.10% from 18JAN to 18FEB every year for the past 9 yrs. 100% win rate for short positions.

[1/20/2004 12:43:09 AM] [pastry] I didn't buy the neural net package and don't think it necessary. I like to start with dummy variable regression, then refine useful variables.

[1/20/2004 12:46:00 AM] [AlanD] Yes, whatever works best. I don't use nueral networks although one of the programs I own uses it as part of its overall buy/sell analysis.

[1/20/2004 12:46:32 AM] [pastry] I found moving avg crossovers not too useful. # of consecutive days higer(or lower) and a day with large range both indicate higher likelihood of reversal.

[1/20/2004 12:46:57 AM] [Lindahg] Alan and pastry how do those of us who are not computer literate and evrn worse proگرامing dummies do this type of thing?

[1/20/2004 12:50:27 AM] [AlanD] Here's another high probaility short; IWOV currently at 14.75 has been down every year for the past 4 yrs with an average of 26.75%!!

[1/20/2004 12:50:46 AM] [pastry] I build predictive models for direct marketing as a full time job, so for me it's easy to transfer my work to the markets.

[1/20/2004 12:52:01 AM] [AlanD] For me Lindahg, I learned the hard way. Looked at existing code, studied it, and learned on my own. No special classes or others to teach me.

[1/20/2004 12:54:13 AM] [Lindahg] I think you are the persona that is so good with elliott wave also Alan. I am pretty new to the TC net but your name came to me as someone who knows Ewave. Re your answer I don't even know where to look at code or what it is.

[1/20/2004 12:54:42 AM] [AlanD] Just a minor observation about IWOV as a short but notice that on Friday, the pullback candle was slightly bearish with the sell side volume being higher. Doesn't look like accumulation to me. Could always be wrong of course.

[1/20/2004 12:56:15 AM] [really] IWOV - came public at the end of 99. so the only data you have is in a bear market. I would be careful of the data

[1/20/2004 12:56:37 AM] [AlanD] I'm alright with Ewave. I use it on occasion but not all the time. It is often quite accurate but don't take it as gospel. Regarding code, Wealth Lab has an extension library section and very good help file. The discussion board is also very good. Many folks learning how to code. Some very experienced coders also willing to lend a hand.

[1/20/2004 12:57:25 AM] [really] alan - what is the url for weatlh lab?

## ClubHome

[1/20/2004 12:58:21 AM] [Lindahg] Where is it I just went to wealthlab.com but not correct as it is under construction.

[1/20/2004 12:58:26 AM] [AlanD] Really, that is true about IWOV. Many stocks have only been public for the past 10yrs which doesn't leave a lot of history to work with. Take it as an interesting statistic. Could this year prove me wrong? Of course. Statistical probability of a stock continuing to do what it has done is only as good so long as the trend remains the same.

[1/20/2004 12:58:51 AM] [AlanD] www.wealth-lab.com

[1/20/2004 12:59:03 AM] [AlanD] An excellent program IMO.

[1/20/2004 1:00:29 AM] [really] IWOV - was \$200 in 1999 also. made a double bottom in Oct 02 Apr 03. I have no opinion of stock . just an observation.

[1/20/2004 1:02:03 AM] [AlanD] With IWOV the short to intermediate term state can be overbought with the longer term (being the bottom in Oct 02) can still be intact.

[1/20/2004 1:04:21 AM] [pastry] I believe a person could rely on a more intuitive approach by looking at charts on tcnet. My analysis is confirming some swing trading ideas I heard. Basically, several days run followed by wide range day into support(resistance), followed by a day in the opposite direction, often signals a reversal.

[1/20/2004 1:04:31 AM] [really] Stochastic 12,3,3 daily point to being overbought. but the same stoch for weekly point to being oversold. maybe I am using the stochs incorrectly for a weekly chart

[1/20/2004 1:04:43 AM] [AlanD] Just brought up an Autowave chart of IWOV. Looks like support is in the \$13 area. Barring any breakout to the upside, looks like next target area is lower.

[1/20/2004 1:05:28 AM] [AlanD] LOL, I laugh at myself as I just said that if it doesn't go up, its going to go down. LOL

[1/20/2004 1:07:19 AM] [really] IWOV - a 26% drop would take it to near the 50 sma. that is interesting

[1/20/2004 1:08:35 AM] [AlanD] Yes that is interesting.

[1/20/2004 1:13:53 AM] [AlanD] just did a time cycle analysis on IWOV. Also showing that the next wave should be down.

[1/20/2004 1:17:37 AM] [AlanD] Now, having said all that. The candlestick pattern suggest a break to the upside so take it or leave it. Guess we'll find out soon enough.

[1/20/2004 1:20:24 AM] [AlanD] Onto another stock. FST has been down 8 out of 9 times or 77.78% for the past 9yrs by an average of 12.18% during the next 4 weeks.

[1/20/2004 1:21:25 AM] [Redeyez] One question regarding Hotto's site. How useful would it be to someone not much into daytrading? More into swing or position trading?

## ClubHome

[1/20/2004 1:22:07 AM] [AlanD] I don't subscribe to it. I think someone else we'll have to answer that question.

[1/20/2004 1:22:34 AM] [Redeyez] Thanks anyhow.

[1/20/2004 1:23:47 AM] [AlanD] He has over 700 subscribers so I guess that must mean something.

[1/20/2004 1:24:02 AM] [TuscanaGold] Hello

[1/20/2004 1:24:12 AM] [RkyMtnFool] Redeyez, most of the positions disussed here are swing trades. Hotto sometimes enhances his return with some DTs on top of the swings.

[1/20/2004 1:24:17 AM] [honus99] Redeyez, hotto has many stocks for longer term trades, but he is very good with intraday scalping.

[1/20/2004 1:24:36 AM] [Redeyez] Thanks

[1/20/2004 1:24:44 AM] [AlanD] Hello TG

[1/20/2004 1:24:59 AM] [RkyMtnFool] Read through a few recent trading day logs and get a feel for what happens here.

[1/20/2004 1:25:05 AM] [honus99] actually very good would be an understatement

[1/20/2004 1:25:34 AM] [TuscanaGold] Redeyez-If you do your homework based on Hotto's suggestions, you can do well with swing trades.

[1/20/2004 1:25:48 AM] [Redeyez] I missed on the intro suscription in part because of that question. I do monitor daytime chat here.

[1/20/2004 1:26:02 AM] [Redeyez] Thanks Tuscan

[1/20/2004 1:26:41 AM] [RkyMtnFool] The subscription site enhances and organizes the theory that he has shared for the last 15 or so months.

[1/20/2004 1:26:56 AM] [Redeyez] ok

[1/20/2004 1:27:12 AM] [TuscanaGold] If you use his site as a "blackbox" you will probably not do well with it.

[1/20/2004 1:28:00 AM] [Redeyez] Tuscan, that wouldn't be my style anyhow.

[1/20/2004 1:28:14 AM] [Redeyez] Color me addicted to backtesting.

[1/20/2004 1:36:14 AM] [Lindahg] Alan are all these shorts and longs from something you share on wealth-lab?

[1/20/2004 1:38:07 AM] [AlanD] No, only because I just wrote the code an hour ago.

[1/20/2004 1:38:24 AM] [AlanD] Still needs some fine tuning.

[1/20/2004 1:38:54 AM] [Lindahg] Your are as good as I have been told. Some people have been paying attention to you for a long time.

[1/20/2004 1:39:34 AM] [Redeyez] Wealth-Lab is your place then, Alan?

[1/20/2004 1:40:38 AM] [AlanD] Is my place? Meaning that I own it or hang out there?

No, just a user who frequently goes to the site for new information.

[1/20/2004 1:41:00 AM] [Redeyez] :) OK, thanks.

## ClubHome

[1/20/2004 1:42:37 AM] [AlanD] I know I'm saying good things about the program but thats only because I've used it for over 2yrs now and for those who know that I'm a software trading junkie, I've seen alot of different packages and there is still nothing that beats it for its system development and backtesting capabilities. Oh and you can also have it do autotrading for you.

[1/20/2004 1:43:27 AM] [AlanD] It does have some drawbacks especially if you don't like complex trading programs.

[1/20/2004 1:43:48 AM] [Redeyez] Steep learning curve innitially?

[1/20/2004 1:44:42 AM] [AlanD] To use the program? I don't think so. The learning curve is in the programming. But it also comes with over 700 prebuilt trading systems developed by its user base. Some models are really good, some not so good.

[1/20/2004 1:44:55 AM] [Redeyez] OK

[1/20/2004 1:45:20 AM] [Redeyez] Looks like I need to spend some time there.

Thanks Alan.

[1/20/2004 1:46:33 AM] [AlanD] I think its easy to become hooked once you get a feel for it.

[1/20/2004 1:47:05 AM] [Redeyez] lol Well, I already am hooked on TCCompanion.

[1/20/2004 1:47:06 AM] [AlanD] Once you learn to code, you can then determine if any of the systems discussed here in TCnet have any merit. I'm still working on that one.

[1/20/2004 1:47:33 AM] [AlanD] TC Companion is pretty good for TCnet specific trading ideas.

[1/20/2004 1:47:59 AM] [AlanD] I like to use it to test PCF's

[1/20/2004 1:48:32 AM] [Redeyez] Well, that's been about my universe thus far. It may be awhile before I set at something like Tradestation.

[1/20/2004 1:49:31 AM] [AlanD] Hey gotta run. Wife is calling. Regarding TS, if your serious about system development and backtesting, WLD is much better. Also the WLD community isnt so tight lipped lick the TS community.

[1/20/2004 1:49:43 AM] [AlanD] sorry lick = liked.

[1/20/2004 1:49:53 AM] [Redeyez] OK. Thanks and nite then!

[1/20/2004 1:50:20 AM] [AlanD] See ya.

[1/20/2004 1:50:34 AM] [Redeyez] Later.

[1/20/2004 6:47:15 AM] [mace] .

[1/20/2004 6:27:58 PM] [hotto] ok guys.. I'll look at website

[1/20/2004 6:28:23 PM] [BossFan] BFUN also making a nice move up. Clear ride up to 1.60?

[1/20/2004 6:30:36 PM] [Investortrader] I'll start in 5 minutes ...

[1/20/2004 6:31:49 PM] [beach] Hotto AMCC had in line earnings, why go long?

[1/20/2004 6:35:59 PM] [Investortrader] Ok, first stock I want to cover is FNSR, was requested earlier today

[1/20/2004 6:37:23 PM] [Investortrader] There was a downgrade today from buy to hold on FNSR

[1/20/2004 6:37:57 PM] [Investortrader] Knocked it down to the LR30

[1/20/2004 6:38:31 PM] [Investortrader] Friday's trading looked a bit topy to me because ...

[1/20/2004 6:38:59 PM] [Investortrader] Gap up on BIG volume, but small trading range, after a nice run

[1/20/2004 6:39:03 PM] [Investortrader] nice run

[1/20/2004 6:39:42 PM] [Investortrader] That shows there were plenty of sellers up here, the Fri high was the same as the 11/7 high too

[1/20/2004 6:40:20 PM] [Investortrader] So maybe whoever downgraded it saw that and decided now is a good time to put out the change from buy to hold

[1/20/2004 6:41:00 PM] [Investortrader] I've covered this pattern before, in the in-depth ITIG discussion

[1/20/2004 6:41:34 PM] [Investortrader] And today we had a bearish engulfing candle ... though it did come back pretty well off the LR30

[1/20/2004 6:42:14 PM] [Investortrader] This is one of Hotto's last mile buildout stocks

too

[1/20/2004 6:43:35 PM] [Investortrader] I wouldn't be surprised if it chopped some or tested the 50sma

[1/20/2004 6:44:07 PM] [Investortrader] The 50sma and the middle BB are converging, should be good support there

[1/20/2004 6:45:34 PM] [Investortrader] Going to look at the 5's on it as I missed the last 90 minutes of trading due to a power outage here (gotta love country life, when you aren't hating it!)

[1/20/2004 6:47:13 PM] [Investortrader] 5's look ok on it, went down to test the mid-day lows and came back pretty good eod

[1/20/2004 6:48:30 PM] [Investortrader] I don't really expect anything more than a test of the 50sma, we'll see how it unfolds

[1/20/2004 6:48:49 PM] [pope39c] TXCC Please

[1/20/2004 6:49:09 PM] [Investortrader] Any questions on FNSR?

[1/20/2004 6:50:01 PM] [Investortrader] Looks like it weakened a bit in AH down to 3.92

[1/20/2004 6:50:16 PM] [Investortrader] On to TXCC ...

[1/20/2004 6:51:33 PM] [Investortrader] This one has been quite strong, riding the upper BB

[1/20/2004 6:52:16 PM] [Investortrader] Volume increased on 1/5, followed by a big gap up on big volume

[1/20/2004 6:53:08 PM] [Investortrader] It consolidated some, lost contact with the upper BB, but within a few days of losing contact more volume came in to give it another push up to the upper BB

[1/20/2004 6:53:22 PM] [Investortrader] OBV has been confirming the new highs too

[1/20/2004 6:54:49 PM] [Investortrader] Had another gap up on 1/16, good volume

[1/20/2004 6:55:57 PM] [Investortrader] Today shows a little bit of concern, buyers gapped it up again, then the sellers started to bring it back

[1/20/2004 6:56:29 PM] [Investortrader] I would expect that second gap up to get filled from that

[1/20/2004 6:57:18 PM] [Investortrader] Let me check what the news was on it today

[1/20/2004 6:58:11 PM] [Investortrader] Reported earnings today, or more correctly, reported losses

[1/20/2004 6:58:57 PM] [Investortrader] Down to 3.36 in AH trading ... another good example of why I don't hold a stock thru earnings (not that I owned this one)

[1/20/2004 6:59:18 PM] [Investortrader] And that does fill the second gap up

[1/20/2004 6:59:36 PM] [Investortrader] I don't know what was expected, but looks like they didn't make it

## ClubHome

[1/20/2004 7:00:40 PM] [Investortrader] Looks like it will be a gap down tomorrow, which leaves an island reversal, very bearish pattern

[1/20/2004 7:01:17 PM] [Investortrader] We'll see how they treat it tomorrow, if they bring it back like FNSR or if they take it out and shoot it

[1/20/2004 7:01:37 PM] [Investortrader] But for now it doesn't look good

[1/20/2004 7:02:38 PM] [Investortrader] Any questions on TXCC?

[1/20/2004 7:03:07 PM] [acmetrader] acec news coming

[1/20/2004 7:04:15 PM] [Investortrader] We've seen a few companies miss earnings and get beaten up, it's very important to know when your stocks will report earnings

[1/20/2004 7:05:01 PM] [Investortrader] Then it's up to you if you want to gamble on them and throw the dice, I prefer to do my gambling in Vegas, not on wall street

[1/20/2004 7:06:41 PM] [Investortrader] I also wanted to cover BLDP here ...

[1/20/2004 7:07:37 PM] [Investortrader] BLDP I bot right at the close on Thur, maybe a minute or 30 seconds before the close

[1/20/2004 7:07:54 PM] [Investortrader] At 12.25

[1/20/2004 7:08:23 PM] [Investortrader] you can see how it was in a downtrend from Oct to Dec

[1/20/2004 7:08:46 PM] [Investortrader] I just drew the dt line on it

[1/20/2004 7:09:05 PM] [Investortrader] Broke out of it at the end of Dec

[1/20/2004 7:09:29 PM] [Investortrader] Nice orderly upmove from there with OBV confirming

[1/20/2004 7:09:51 PM] [Investortrader] Broke over the 50sma and rode the upper BB a bit

[1/20/2004 7:11:12 PM] [Investortrader] Then it went into a correction, which was held by the middle BB

[1/20/2004 7:12:07 PM] [Investortrader] On Thur, you'll notice volume came in, opened at the low of the day and went up fom there

[1/20/2004 7:12:53 PM] [Investortrader] The Thur low was also higher than the 1/13 low, with all these factors combined it looked to me like the correction was over

[1/20/2004 7:13:10 PM] [Investortrader] Which was why I bought it

[1/20/2004 7:13:42 PM] [Investortrader] As soon as it broke above the 50sma on volume it was safe to buy

[1/20/2004 7:15:23 PM] [Investortrader] Notice the 13.60 area in late Nov early Dec was resistance

[1/20/2004 7:16:08 PM] [Investortrader] Where it fell thru the 50sma and couldn't get back above it ... could easily be some resistance here also

[1/20/2004 7:16:41 PM] [Investortrader] It's up another 25 cents in AH

[1/20/2004 7:17:17 PM] [Investortrader] I'll be watching it tomorrow to see how it

handles that area again, might take some profits in it there

[1/20/2004 7:18:11 PM] [Investortrader] Any questions on BLDP?

[1/20/2004 7:19:25 PM] [sggin1] what where your feelings on bldp fri ?

[1/20/2004 7:19:58 PM] [Investortrader] Fri I liked it still, they gapped it up a tiny bit and it broke above the LR30

[1/20/2004 7:20:00 PM] [sggin1] at the 1/6 high, was that a concern?

[1/20/2004 7:20:04 PM] [kjssorc] Any information about SONS?

[1/20/2004 7:20:12 PM] [Rondon] ITIG this PB

[1/20/2004 7:20:16 PM] [rockin] RIMM - been riding this shooting star

[1/20/2004 7:20:39 PM] [Investortrader] SONS reported today kjssorc, Hotto covered it some in Hottoworks earlier, he bot and sclaped it in AH

[1/20/2004 7:20:56 PM] [kjssorc] ok

[1/20/2004 7:21:25 PM] [Investortrader] sggin, it wasn't really a concern as it closed up near the hod on Fri, and good volume had come into it on this new leg up

[1/20/2004 7:21:31 PM] [lavenderangel] IT, want to look at SLNK?

[1/20/2004 7:21:58 PM] [sggin1] thanks :)

[1/20/2004 7:22:17 PM] [Investortrader] Welcome, the volume and price pattern told me it was ok :)

[1/20/2004 7:22:35 PM] [Investortrader] On to ITIG ...

[1/20/2004 7:22:39 PM] [sggin1] Ir30 , i missed , it makes more sence now

[1/20/2004 7:23:19 PM] [Investortrader] This is another one that has had a good run

[1/20/2004 7:23:38 PM] [Investortrader] Almost a double already this year

[1/20/2004 7:24:22 PM] [Investortrader] It made a new high yesterday, but OBV didn't confirm

[1/20/2004 7:24:28 PM] [Rondon] seems like todays PB was more than just PT

[1/20/2004 7:24:56 PM] [Investortrader] It does look like the start of a correction Rondon

[1/20/2004 7:25:16 PM] [Investortrader] Volume picked up a little today over yesterday, nothing alarming but did pick up some

[1/20/2004 7:25:38 PM] [Investortrader] Last two days it also the open was close to the hod

[1/20/2004 7:25:48 PM] [Investortrader] And the close was closer to the lod

[1/20/2004 7:26:16 PM] [Investortrader] And with the big runup, not surprising that some people are selling here

[1/20/2004 7:27:16 PM] [Investortrader] Had news today, but it's old news, good but old

## ClubHome

[1/20/2004 7:27:38 PM] [Investortrader] About how many new clients they took on last year

[1/20/2004 7:28:02 PM] [Rondon] do U see possible correction to 5.50 6.00 area

[1/20/2004 7:28:22 PM] [Investortrader] Not sure if it will come down that far

[1/20/2004 7:28:34 PM] [Investortrader] 5.50 would wipe out the entire runup

[1/20/2004 7:29:07 PM] [Investortrader] But 7 or so around the middle BB looks possible

[1/20/2004 7:30:49 PM] [Investortrader] May not even get that far as it's been a hot stock, could drop a bit then chop, time will tell ... but it does look like it's in correction mode here to me

[1/20/2004 7:31:07 PM] [Investortrader] And needs to build a new base now

[1/20/2004 7:31:29 PM] [Investortrader] Any questions on ITIG?

[1/20/2004 7:31:31 PM] [Rondon] \$10. still eventual likely target

[1/20/2004 7:31:33 PM] [cperkins] it do you use candles

[1/20/2004 7:31:59 PM] [Investortrader] Yes, I do cperkins

[1/20/2004 7:32:19 PM] [cperkins] siri hammer

[1/20/2004 7:33:20 PM] [Investortrader] Got up over 9.50, I think now it needs to base or test to make it much higher

[1/20/2004 7:34:03 PM] [Investortrader] Especially with OBV not confirming here

[1/20/2004 7:34:07 PM] [Investortrader] RIMM ...

[1/20/2004 7:34:16 PM] [Rondon] ThankYou Investortrader insightful,,, as always

[1/20/2004 7:35:10 PM] [Investortrader] Welcome Rondon :)

[1/20/2004 7:35:24 PM] [acmetrader] glad to read your info IT

[1/20/2004 7:35:37 PM] [Investortrader] RIMM has been strong, good OBV confirming the uptrend too

[1/20/2004 7:35:43 PM] [Investortrader] Thanks acme :)

[1/20/2004 7:36:30 PM] [lavenderangel] how about SLNK?

[1/20/2004 7:36:30 PM] [Investortrader] Had that big gap up in late Dec and low volume base that held up very nicely after that, could barely move it down then

[1/20/2004 7:36:40 PM] [Investortrader] That's next Lavender :)

[1/20/2004 7:36:45 PM] [lavenderangel] ok

[1/20/2004 7:36:58 PM] [cperkins] it do you think siri will bounce off of hammer

[1/20/2004 7:37:05 PM] [Investortrader] And it's been riding the LR30 here for days now

[1/20/2004 7:37:17 PM] [Investortrader] SIRI is next after SLNK

[1/20/2004 7:38:10 PM] [Investortrader] I don't see any evidence yet that the RIMM move is over

[1/20/2004 7:38:28 PM] [Investortrader] Steady uptrend, with rising OBV

[1/20/2004 7:38:37 PM] [Rondon] like TASR  
[1/20/2004 7:38:38 PM] [Investortrader] And good price action today  
[1/20/2004 7:38:52 PM] [acmetrader] RIMM is parabolic (more than 45 degree angle ascent) it has to digest at some point  
[1/20/2004 7:39:23 PM] [Investortrader] Not parabolic, and looks about 45 to me, maybe a bit more ...  
[1/20/2004 7:39:52 PM] [Investortrader] Don't have my protractor handy at the moment ;)  
[1/20/2004 7:40:01 PM] [cperkins] rimm vol down last 2 days

[1/20/2004 7:41:01 PM] [Investortrader] The lower volume last couple of days ... might lead to some sideways action, but it's still above most of the recent days volume  
[1/20/2004 7:41:27 PM] [cperkins] true  
[1/20/2004 7:41:38 PM] [Investortrader] I'd watch for a bearish engulfing to get out  
[1/20/2004 7:42:09 PM] [Investortrader] Any questions on RIMM?  
[1/20/2004 7:42:33 PM] [cperkins] hanging man yesterday had no effect on rimm  
[1/20/2004 7:43:02 PM] [Investortrader] Not yet, but could be pointing to a pb soon  
[1/20/2004 7:43:23 PM] [cperkins] pb would be normal  
[1/20/2004 7:43:31 PM] [Investortrader] Yes ...  
[1/20/2004 7:43:38 PM] [Investortrader] It is down in AH also, but not that much  
[1/20/2004 7:43:55 PM] [Investortrader] On to SLNK ...  
[1/20/2004 7:43:55 PM] [sggin1] just a comment on rimm; wow, what a crazy gap up!  
[1/20/2004 7:44:00 PM] [cperkins] good discusion  
[1/20/2004 7:44:02 PM] [Rondon] Why did I sell and lose interest last May RIMM :(  
[1/20/2004 7:44:08 PM] [Investortrader] Must have been some big news sggin!  
[1/20/2004 7:45:13 PM] [cperkins] slnk res at 28  
[1/20/2004 7:45:47 PM] [cperkins] oops 26  
[1/20/2004 7:46:02 PM] [Investortrader] This one has been in a steady uptrend, and today the uptrend accelerated on good volume  
[1/20/2004 7:46:22 PM] [Investortrader] open was almost the lod, close enough, and closed at the hod  
[1/20/2004 7:46:34 PM] [Investortrader] And a nice big trading range to go with the big volume  
[1/20/2004 7:46:52 PM] [Investortrader] With OBV confirming the new highs  
[1/20/2004 7:47:19 PM] [cperkins] if 26 taken out be long  
[1/20/2004 7:47:25 PM] [Investortrader] Lost contact with the upper BB for a couple days on the lower volume basing, but pushed right up thru it today

[1/20/2004 7:48:00 PM] [Investortrader] From late Sept, good eyes cperkins  
[1/20/2004 7:48:01 PM] [cperkins] here him  
[1/20/2004 7:48:46 PM] [Investortrader] This one looks like it should easily continue upwards from here  
[1/20/2004 7:49:01 PM] [lavenderangel] so i should keep my last shares and ride it out  
[1/20/2004 7:49:17 PM] [cperkins] buy slnk 26.25 stop  
[1/20/2004 7:49:47 PM] [Investortrader] I would lavenderangel, though I would also sell as it approached 26 in case that resistance stops it like last time  
[1/20/2004 7:49:47 PM] [lavenderangel] I bot SLNK at 18.70  
[1/20/2004 7:50:01 PM] [lavenderangel] sold half at 20.90  
[1/20/2004 7:50:46 PM] [Investortrader] Good buy!  
[1/20/2004 7:51:17 PM] [lavenderangel] maybe but i rode it down some befroe it finally took off  
[1/20/2004 7:51:37 PM] [Rondon] nice trade L angel  
[1/20/2004 7:51:42 PM] [Investortrader] Any questions on SLNK?  
[1/20/2004 7:51:46 PM] [cperkins] la did you buy 12/16 hammer  
[1/20/2004 7:53:00 PM] [Investortrader] she must have bought before that if she rode it down some  
[1/20/2004 7:53:17 PM] [cperkins] yes  
[1/20/2004 7:53:22 PM] [Investortrader] On to SIRI ...  
[1/20/2004 7:53:37 PM] [lavenderangel] no, cp, didn't add ot and wish i had  
[1/20/2004 7:53:39 PM] [sggin1] on 1/9/4 it looks like obv is held at the 50sma, is that something you look at with this chart setup?  
[1/20/2004 7:54:01 PM] [cperkins] good trade la  
[1/20/2004 7:54:28 PM] [lavenderangel] you ready for this? i bot in Oct  
[1/20/2004 7:54:28 PM] [Investortrader] sggin, on SLNK?  
[1/20/2004 7:54:42 PM] [sggin1] yes, sorry slow typing  
[1/20/2004 7:54:45 PM] [Investortrader] Back to SLNK for a minute  
[1/20/2004 7:56:10 PM] [Investortrader] Yes sggin, had a small pb then, but the OBV was held by the 50sma, which gives confidence that it is just minor pt  
[1/20/2004 7:56:12 PM] [lavenderangel] why are we back on SLNK? to see how stubborn I am  
[1/20/2004 7:56:23 PM] [Investortrader] sggin had a ? on it :)

[1/20/2004 7:57:55 PM] [cperkins] siri hammer today  
[1/20/2004 7:58:39 PM] [Investortrader] Let's look at the 5's real quick and check out that hammer  
[1/20/2004 7:58:41 PM] [lavenderangel] where is this hammer you talk about ? idont' see it  
[1/20/2004 7:59:21 PM] [Investortrader] 5's look indecisive to me, back to the daily  
[1/20/2004 7:59:40 PM] [cperkins] hammer on daily  
[1/20/2004 8:00:12 PM] [Investortrader] The hammer is todays price action, though not sure if it's technically a hammer, isn't tail supposed to be twice as big as body for a hammer?  
[1/20/2004 8:00:30 PM] [cperkins] yes  
[1/20/2004 8:00:48 PM] [Investortrader] body is 14 cents, tail is 16 cents, not quite there  
[1/20/2004 8:01:13 PM] [lavenderangel] ohhhhhhhhhh, ty  
[1/20/2004 8:01:23 PM] [Investortrader] This one doesn't look as good, with OBV under the 50 and not able to get above it last few days, and also confirming the new lows  
[1/20/2004 8:01:53 PM] [Investortrader] Plus the down days have had bigger volume than the up days  
[1/20/2004 8:02:43 PM] [Investortrader] The middle BB did hold the close, but that's about the only positive thing I can see on it here  
[1/20/2004 8:03:06 PM] [cperkins] hes right  
[1/20/2004 8:03:28 PM] [cperkins] good forum  
[1/20/2004 8:03:56 PM] [parkwaypet] IT do you have a pcf for middle BB I've seen 1 before and is it useful or how would you use it ?  
[1/20/2004 8:04:04 PM] [Investortrader] Found one other possible positive, the low of today is about a 2/3 retracement of the big upmove  
[1/20/2004 8:04:20 PM] [Investortrader] parkwaypet, the middle BB by definition is the 20sma  
[1/20/2004 8:04:38 PM] [Investortrader] Should be easy to write a PCF for price crossing the 20sma  
[1/20/2004 8:05:09 PM] [Investortrader] If that is what you wanted to do  
[1/20/2004 8:05:25 PM] [cperkins] support for siri at 2.68 from oct  
[1/20/2004 8:05:25 PM] [parkwaypet] ty have that in pcf and do you use BB 30 spread  
[1/20/2004 8:05:36 PM] [Investortrader] I still don't see a reason for this one to start up again yet ... could always get one tomorrow, which is why it's important to check your charts every day!

[1/20/2004 8:06:03 PM] [Investortrader] I use 2 standard deviations, which is 20 in TCNet ... the standard standard deviation lol

[1/20/2004 8:06:52 PM] [Investortrader] My best guess on SIRI would be sideways to down with a retest of todays lows, and see how it handles that area

[1/20/2004 8:07:15 PM] [Investortrader] Any questions on SIRI?

[1/20/2004 8:08:21 PM] [Rondon] would U look at XYBR?

[1/20/2004 8:08:32 PM] [Investortrader] Onelast thing to note on SIRI, on 1/9

[1/20/2004 8:08:52 PM] [Investortrader] Where it tried to rally, and failed

[1/20/2004 8:09:25 PM] [Investortrader] Couldn't get above the 1/7 black candle day, and also the OBV on that day barely got above the middle BB, suggestion further downside

[1/20/2004 8:09:41 PM] [Investortrader] Will do XYBR after PQUE, got a pm request for PQUE ....

[1/20/2004 8:09:46 PM] [Investortrader] Oops, Hotto is here

[1/20/2004 8:09:53 PM] [cperkins] on 1/9 ?

[1/20/2004 8:10:11 PM] [Investortrader] Yes, 1/9 on SIRI

[1/20/2004 8:10:39 PM] [cperkins] could be b of abc

[1/20/2004 8:10:44 PM] [parkwaypet] IT thought on BB squeeze on CVTX

[1/20/2004 8:10:51 PM] [Investortrader] Last 2, PQUE and XYBR

[1/20/2004 8:11:14 PM] [Investortrader] PQUE ...

[1/20/2004 8:11:33 PM] [cperkins] now thats a hammer

[1/20/2004 8:11:39 PM] [Investortrader] Yes!

[1/20/2004 8:11:49 PM] [Investortrader] And on bigger volume as a good hammer shoould be

[1/20/2004 8:12:05 PM] [cperkins] yep

[1/20/2004 8:12:11 PM] [Investortrader] Followed by todays nice volume runup confirming it

[1/20/2004 8:12:20 PM] [Investortrader] This one looks good to me

[1/20/2004 8:12:34 PM] [Investortrader] Gotta discount the OBV some as the big volume hammer day was a down close

[1/20/2004 8:12:44 PM] [Investortrader] That's aprt of the art of reading the OBV

[1/20/2004 8:12:47 PM] [StockStalker] always make sure the bigger volume on a daily hammer was made on the way up and not the way down

[1/20/2004 8:12:50 PM] [Investortrader] part of the art

[1/20/2004 8:13:15 PM] [cperkins] here him

[1/20/2004 8:13:19 PM] [Investortrader] Good point StockStalker, lets take a look at the 10 minute chart to see ...

[1/20/2004 8:13:33 PM] [StockStalker] usually is but good to know

[1/20/2004 8:13:49 PM] [Investortrader] Looks like a lot of it came in near the lows  
[1/20/2004 8:13:53 PM] [Zathrus] SWN in same sector - also looks interesting  
[1/20/2004 8:14:16 PM] [Investortrader] Not too much on the way up, but todays price action does confirm it  
[1/20/2004 8:15:03 PM] [Investortrader] This one should at least test the recent highs I think  
[1/20/2004 8:15:21 PM] [cperkins] 3.68 high  
[1/20/2004 8:15:29 PM] [StockStalker] about even... so is good nuff... but u dont want to see big vol down and up in a vacuum  
[1/20/2004 8:15:57 PM] [Investortrader] I never did like to vacuum ;)  
[1/20/2004 8:16:34 PM] [Investortrader] Powered right up thru the middle BB too, I wouldn't be surprised to see it go thru the LR30 tomorrow  
[1/20/2004 8:16:37 PM] [Zathrus] KMI also looks fiesty - several BTBOs or close to it in the GAS sector  
[1/20/2004 8:17:03 PM] [Investortrader] Any questions on PQUE?  
[1/20/2004 8:18:00 PM] [Investortrader] On to XYBR ...  
[1/20/2004 8:18:14 PM] [cperkins] swn made doji yesterday and bounced today  
[1/20/2004 8:19:08 PM] [Investortrader] News today on XYBR, will be entering the China market  
[1/20/2004 8:19:25 PM] [Investortrader] Nice volume upmove on that news  
[1/20/2004 8:19:40 PM] [Investortrader] Will restrict my comments on this one as it's a bit low priced  
[1/20/2004 8:20:06 PM] [Investortrader] But does look ok to me here  
[1/20/2004 8:20:25 PM] [Investortrader] CVTX ....  
[1/20/2004 8:21:23 PM] [Investortrader] The BB squeeze, usually means a move is coming soon, just doesn't tell direction  
[1/20/2004 8:21:46 PM] [Investortrader] It broke out today over the upper BB and the 50sma on good volume  
[1/20/2004 8:22:20 PM] [DaveG] What time frame do you view the hammer on?  
[1/20/2004 8:22:25 PM] [Investortrader] Still hasn't quite filled the Dec gap down  
[1/20/2004 8:22:36 PM] [Investortrader] Dave, that was on a daily chart  
[1/20/2004 8:22:48 PM] [DaveG] thanks  
[1/20/2004 8:23:21 PM] [cperkins] cvtx looks like a cup and handle  
[1/20/2004 8:23:24 PM] [Investortrader] The news today must have been good on it  
[1/20/2004 8:23:37 PM] [Investortrader] I don't see a cup+handle  
[1/20/2004 8:24:00 PM] [cperkins] long handle  
[1/20/2004 8:25:10 PM] [cperkins] cup starts 12/08 ends 12/23  
[1/20/2004 8:25:12 PM] [Investortrader] This one should be ok, make sure you read

the news and understand it if you plan on buying it, as it might only fill the gap and get turned down, but so far looks good here

[1/20/2004 8:25:38 PM] [Investortrader] That doesn't really look like a cup to me

[1/20/2004 8:25:47 PM] [cperkins] ok

[1/20/2004 8:26:00 PM] [parkwaypet] ty IT

[1/20/2004 8:26:06 PM] [Investortrader] Not with 12/8 being the low, usually low is in the middle of the cup somewhere, rounded bottom type thing

[1/20/2004 8:26:15 PM] [Investortrader] Welcome parkwaypet :)

[1/20/2004 8:26:45 PM] [Investortrader] Any questions on CVTX?

[1/20/2004 8:27:40 PM] [Investortrader] Up pretty nice in AH too

[1/20/2004 8:27:52 PM] [Investortrader] To 16.15

[1/20/2004 8:28:10 PM] [Investortrader] Which does close the gap

[1/20/2004 8:28:18 PM] [parkwaypet] WOW was going to buy tomorrow

[1/20/2004 8:28:45 PM] [Investortrader] Might get an early morning dip to test teh 50sma or close

[1/20/2004 8:29:18 PM] [Investortrader] SWN was mentioned ....

[1/20/2004 8:29:53 PM] [cperkins] doji friday pop today

[1/20/2004 8:30:20 PM] [Investortrader] Yes, and the doji bottomed at the lower BB, while the OBV was held by the 50sma

[1/20/2004 8:30:51 PM] [lavenderangel] I was going to buy CVTX today and missed it. I thought it would break up today. at least I know i was right!!!

[1/20/2004 8:30:52 PM] [cperkins] up vol on pop

[1/20/2004 8:31:05 PM] [Investortrader] And today, very good volume and the price opened at the low and closed at the high

[1/20/2004 8:31:22 PM] [Investortrader] That always helps in the confidence area lavender :)

[1/20/2004 8:31:22 PM] [StockStalker] if it broke down you would have been right too

[1/20/2004 8:31:36 PM] [lavenderangel] true!! but I was betting up!

[1/20/2004 8:32:00 PM] [Investortrader] This one should continue up to test the upper BB

[1/20/2004 8:32:18 PM] [cperkins] at 25

[1/20/2004 8:32:23 PM] [StockStalker] oh yeah.. i remember u mentioned it now

[1/20/2004 8:32:57 PM] [StockStalker] seem to have a touch for the lavender squeeze play

[1/20/2004 8:33:15 PM] [lavenderangel] I did. glad you remembered. I also mentioned CECO and it broke up today too

[1/20/2004 8:33:34 PM] [StockStalker] i covered ceco short today

[1/20/2004 8:33:36 PM] [Investortrader] Any questions on SWN?

[1/20/2004 8:45:27 PM] [acmetrader] any comments on appx?

[1/20/2004 8:45:36 PM] [Investortrader] APPX got FDA approval for something today

[1/20/2004 8:46:14 PM] [acmetrader] probably a drug, lol

[1/20/2004 8:46:38 PM] [Investortrader] Some injection lol

[1/20/2004 8:47:23 PM] [acmetrader] IT what is your \*feel\* for the overall market right now

[1/20/2004 8:48:18 PM] [Investortrader] I missed watching the last 90 minutes ...

[1/20/2004 8:48:30 PM] [Investortrader] So far earnings season is going well, which always helps

[1/20/2004 8:48:42 PM] [Investortrader] A few bombs, but that is to be expected

[1/20/2004 8:49:21 PM] [Investortrader] However it does feel like they are holding it up, maybe to bring it down after earnings season is over

[1/20/2004 8:50:01 PM] [Investortrader] As Hotto says, the stocks with good charts are still reacting well, so can't complain

[1/20/2004 8:50:05 PM] [gr8stok] jxybr

[1/20/2004 8:50:22 PM] [Investortrader] Unlike in early Dec when good set-ups failed a lot

[1/20/2004 8:52:02 PM] [Investortrader] Cautiously optimistic I guess, I'm still seeing more longs than short in my generic scans

[1/20/2004 8:52:57 PM] [acmetrader] I know...I just don't trust it

[1/20/2004 8:53:19 PM] [Investortrader] I don't either at this point, the holding up part I mentioned

[1/20/2004 8:53:44 PM] [acmetrader] what tells you it is being held up...the fed money supply is so big?

[1/20/2004 8:53:48 PM] [da2rth] pullback needed to fill a lot of "gap ups"
