[4/13/2004 12:00:55 AM] <Investortrader> what showed the major accumulation is how the OBV was moving up very nicely from end of Feb thru-out March while the price was still drifting lower

[4/13/2004 12:01:29 AM] <Investortrader> That was a sign to start looking for a bottom, or a BO

[4/13/2004 12:01:45 AM] <mace> okay Im getting it

[4/13/2004 12:02:14 AM] <Investortrader> Then on 4/5, 4/6, and 4/7 when it had those very large vol days, with very small price range ... a good signal it was ready to go

[4/13/2004 12:02:22 AM] <mace> this doesnt mean it should head back to DEC hi does it

[4/13/2004 12:02:53 AM] <Investortrader> I've pointed out the same things at tops before, large volume small price range days usually mean trend change

[4/13/2004 12:03:30 AM] <Investortrader> It could mace, it may ride the upper BB here once it gets past the 50sma for awhile

[4/13/2004 12:05:06 AM] <Investortrader> It's had a good correction, nice accumulation, rounded bottom

[4/13/2004 12:05:48 AM] <Investortrader> I'm long this one, bot the BO day

[4/13/2004 12:05:58 AM] <Investortrader> Any questions on MAPX?

[4/13/2004 12:06:08 AM] <mace> me too but at 8.20

[4/13/2004 12:06:09 AM] <bbmd> IT ,in the past MAPX has gone tru ma50 without much hesitation.

[4/13/2004 12:06:30 AM] <Investortrader> you got a bit better price than I did mace!

[4/13/2004 12:06:38 AM] <Tilt> target \$10?

[4/13/2004 12:06:43 AM] <Investortrader> Good point bbmd, it may not hold it here long either

[4/13/2004 12:07:09 AM] <streetwalker> IT - bedtime; thanx for sharing your insights, GN.

[4/13/2004 12:07:22 AM] <Investortrader> Tilt, I was thinking that 10 to 10.50 range may pause it for a bit ... see where it traded there in early Feb after the big vol down day on 1/30

[4/13/2004 12:07:28 AM] <Investortrader> Night streetwalker :)

[4/13/2004 12:08:05 AM] <mace> IT do you use FA and TA on stock buys or just TA

[4/13/2004 12:08:27 AM] <Investortrader> So there may be a few people who bot in early Feb who will be "Even and leavin" when it gets back to around 10

[4/13/2004 12:09:01 AM] <Investortrader> Mostly all TA mace, though I do prefer to trade the G+ stocks, I can take bigger bites out of them

[4/13/2004 12:09:29 AM] <Investortrader> I want to go back to APCC for a minute

[4/13/2004 12:09:43 AM] <Investortrader> mace, was it APCC you said you missed the last top on?

[4/13/2004 12:09:53 AM] <mace> yes

[4/13/2004 12:10:03 AM] <Investortrader> Ok, lets look at that top and see what we could have done then

[4/13/2004 12:10:38 AM] <Investortrader> If anything

[4/13/2004 12:10:54 AM] <Golfermary> Nite IT - long day tomorrow TY

[4/13/2004 12:11:00 AM] <Investortrader> Night mary :)

[4/13/2004 12:11:05 AM] <Investortrader> I'm going to back the chart up some

## ClubHome

[4/13/2004 12:11:44 AM] <Investortrader> I wanted to see the extent of the rally leading up to that top  
[4/13/2004 12:12:24 AM] <Investortrader> This one looks a bit tough  
[4/13/2004 12:12:27 AM] <Investortrader> Back then  
[4/13/2004 12:13:24 AM] <Investortrader> I know near the end of Jan I called for the correction and even stated I was only looking to short stocks there for awhile and sold out of all longs  
[4/13/2004 12:13:52 AM] <Investortrader> There wasn't much in this chart to get you out, just the overall market call  
[4/13/2004 12:14:16 AM] <Investortrader> Maybe when it broke the middle BB in late Jan as that had held the entire rally  
[4/13/2004 12:14:29 AM] <Investortrader> So some weakness was showing, along with the overall market weakness  
[4/13/2004 12:14:45 AM] <Investortrader> Going back to a current chart  
[4/13/2004 12:15:38 AM] <Investortrader> Then in early Feb it looked like it might be getting healthy again, with a nice move on 2/5 .. but that gap down on 2/6 killed everything  
[4/13/2004 12:16:34 AM] <Investortrader> After that, it ran up to test the 50sma and failed there, could have used those few days where it couldn't make it over the 50sma, knowing that usually fails on a first attempt ... though that was a ways under the Jan highs  
[4/13/2004 12:16:58 AM] <Investortrader> Which was from 2/11 to 2/19  
[4/13/2004 12:17:55 AM] <Investortrader> Wouldn't have gotten you out at the top on this chart (unless just selling longs on the beginning of the IT correction did it), but it would have saved you a lot off the bottom  
[4/13/2004 12:19:14 AM] <Investortrader> Not too many stocks covered tonight, I saw Hotto covering quite a few earlier and figured it might be a light night so went into a bit of theory (which I bungled at first!)  
[4/13/2004 12:20:42 AM] <mace> thanks for the explanations, Im learning  
[4/13/2004 12:20:55 AM] <mace> IMOS  
[4/13/2004 12:20:58 AM] <Investortrader> Welcome mace :)  
[4/13/2004 12:21:02 AM] <Investortrader> IMOS ...  
[4/13/2004 12:21:37 AM] <Investortrader> This one looks ok, I'd like to see a bit better OBV on it  
[4/13/2004 12:21:48 AM] <Investortrader> It did BO on better vol today  
[4/13/2004 12:22:03 AM] <Investortrader> Which helped OBV a lot  
[4/13/2004 12:22:06 AM] <mace> IT closed @ 12.30 AH  
[4/13/2004 12:24:10 AM] <Investortrader> Nice!  
[4/13/2004 12:24:34 AM] <Investortrader> Looks like the Feb swing high of 14.50 is coming  
[4/13/2004 12:24:38 AM] <FirstWave> a kicker over the 50 sma , they don't get any better  
[4/13/2004 12:24:52 AM] <Investortrader> Hi FW :)  
[4/13/2004 12:25:27 AM] <FirstWave> hi  
[4/13/2004 12:26:03 AM] <Investortrader> So it could ride the upper BB from here to the Feb highs, we'll see  
[4/13/2004 12:29:34 AM] <Tilt> .  
[4/13/2004 12:30:18 AM] <Investortrader> Must be time for a glass of wine!  
[4/13/2004 12:30:23 AM] <mace> thanks IT got go sleep

[4/13/2004 8:09:43 AM] <Dragon1> re sync, what surprises me the very most about hotto: I can understand, though I don't know how he does it to such a fine point is pick prices by charts, but how does he pick stocks by charts that suddenly have news, eght, fvcx, and now sync??? that is only a few  
[4/13/2004 8:09:44 AM] <payck> gm kellam  
[4/13/2004 8:09:55 AM] <Investortrader> I added a puny 600 more shares of SYNC in AH yesterday at 3.09, luckily I still own my core position

[4/13/2004 8:14:55 AM] <Investortrader> I'm happy when my account goes up, I don't try to catch the tops, though once in awhile my work gets me in pretty near the bottom  
[4/13/2004 8:15:18 AM] <acmetrader> periods of greed and insanity like this usually precede a big fall  
[4/13/2004 8:16:04 AM] <hotto> on SYNC.. I had no knowledge of any news coming.. .. Just the usual.. Chartist idea that unusual gains.. on no news.. are fortelling Some Good news to come...  
[4/13/2004 8:16:56 AM] <mstrader> AMCC to acquire some IBM assets for \$227M  
[4/13/2004 8:17:03 AM] <Dragon1> these are small stocks, and they are volitile at economic turns, but I have always been behind the moves not ahead of them, like a novice surfer, always behind the wave, it is a wild feeling to catch them, more accurately having them brought to my attention  
[4/13/2004 8:17:23 AM] <hotto> We can discuss that sometime - in some detail.. not today...  
[4/13/2004 8:17:32 AM] <Investortrader> SYNC, one of those SWGC .... nice how the down days are on low vol and the up days are on better vol .... I point that out in class, it's something to watch for ... accumulation  
[4/13/2004 8:17:56 AM] <mace> I had order in for SYNC before open @3.70 and went to 3.77 and did not fill my order damn

[4/13/2004 8:19:38 AM] <hotto> =D  
[4/13/2004 8:20:09 AM] <Dragon1> what has cost me most is trying to maintain a job and missing both buying, and the worst, selling opportunities

[4/13/2004 8:26:58 AM] <hotto> NVLS will have both cheerleaders.. and skeptics... That is the continuing beauty of the deep cyclical... The waves are volatile  
[4/13/2004 8:28:21 AM] <croy> One funny way of putting it Hotto ..... then surf the waves ....

[4/13/2004 8:37:58 AM] <hotto> Just yesterday... we got the min PB we asked for.. Now.. all clear for a few days of upside..

[4/13/2004 8:38:20 AM] <mace> sync wheres the add to it went past 2nd scalp 3.73 this am

[4/13/2004 8:38:25 AM] <tiga> been patient for a while with this one.....would like to see some "crazy" gains on this one....we need it to bounce UP from the daily 50 now

[4/13/2004 8:38:27 AM] <hotto> Look at the gains we have seen in others.. Now.. SYNC is connected to TASR...

[4/13/2004 8:39:12 AM] <hotto> Not cheerleading. I don't know how high it can go.. BUT.. we have examples...

[4/13/2004 8:39:24 AM] <croy> Hotto ... connected to RIMM ... what is the connection to TASR ?

[4/13/2004 8:39:36 AM] <hotto> RIMM.. yes... sorry...

[4/13/2004 8:39:46 AM] <croy> Ok thanks

[4/13/2004 8:39:59 AM] <VJnet> gm hotto...great info from last night...thanks

[4/13/2004 8:40:02 AM] <hotto> too little sleep.... they all run together..

[4/13/2004 8:40:04 AM] <croy> for a minute felt out of sync .... LOL

[4/13/2004 8:40:28 AM] <Investortrader> SYNC ... 3.50 is the 50sma, might end up riding the upper BB here

[4/13/2004 8:40:59 AM] <edberg> MACE headed back above 10.:o

[4/13/2004 8:41:00 AM] <hotto> oh.. IT.... that is pretty Small...

[4/13/2004 8:41:05 AM] <hotto> goodness.

[4/13/2004 8:41:24 AM] <Investortrader> Small? riding the upper BB could lead quite aways :)

[4/13/2004 8:41:25 AM] <hotto> we have MACE up from 2 to 11.80 in 3 days...

[4/13/2004 8:41:42 AM] <acmetrader> gotta look at the floats

[4/13/2004 8:42:06 AM] <Investortrader> I wasn't saying the 50sma is the goal ;)

[4/13/2004 8:42:24 AM] <hotto> :)

[4/13/2004 8:42:48 AM] <Pucker> IDNX...8.63

[4/13/2004 8:43:20 AM] <CodyCare> hotto, I went to the website to look up targets on SYNC, and I didnt see them. I have written in my notes 3.50 ?

[4/13/2004 8:43:25 AM] <mace> LRCX nice this am

[4/13/2004 8:43:25 AM] <mace> LRCX nice this am

[4/13/2004 8:43:25 AM] <hotto> This wave of security stocks may be over by tomorrow.. Bush speaks tonight.. maybe the "craziness" will burn out soon..

[4/13/2004 8:43:25 AM] <acmetrader> IDNX is heading to 10.48, maybe not today, but soon, im oh so H opinion

[4/13/2004 8:43:40 AM] <payck> cody, i posted them for someone, scroll up

[4/13/2004 8:43:52 AM] <CodyCare> OK, will do, thanks.

[4/13/2004 8:44:44 AM] <streetwalker> FVCX...4.50

[4/13/2004 8:45:04 AM] <acmetrader> interest rates aren't up yet BUT, coffee, sugar, steel, lumber and oil and gas all up big

[4/13/2004 8:45:12 AM] <Investortrader> Cody, the 3/18 swing high of 3.50 was the first scalp point, but that was without news, and we have news now

[4/13/2004 8:46:30 AM] <VJnet> JNJ .83 vs .80 estimates

[4/13/2004 8:47:24 AM] <hotto> This new amazing level of volatility.. may be transferred from the Security stocks.. over to other groups... Be prepared for more "craziness" in other groups over the next few months..

[4/13/2004 8:47:28 AM] <CodyCare> I just looked at SYNC chart with the targets listed and I can see where they come from. Swing highs and gap points. Thanks IT.

[4/13/2004 8:47:47 AM] <Investortrader> Welcome Cody :)

[4/13/2004 8:48:13 AM] <Investortrader> Hotto, I'm looking at the 2/20 swing high of 4.75 if we get a little crazy today on it like we saw in your other picks recently

[4/13/2004 8:48:16 AM] <wildbill> Free Gap Play 04/13/04 IPAR -- gap up - SHORT - 23.66 to 24.05 - stop @24.49 ----- gap down - LONG - 22.80 to 22.38 - stop @21.94

[4/13/2004 8:48:16 AM] <payck> cody, 3.73 is the gap lip, 3.99 is the gap close, 4.75 is the SH

[4/13/2004 8:48:20 AM] <hotto> Think back.. to when we went from group to group in 1999 / 2000... ramping the volatility as we went.

[4/13/2004 8:48:41 AM] <VJnet> hi bill

[4/13/2004 8:49:03 AM] <adcum> gm all

[4/13/2004 8:49:09 AM] <VJnet> hey ad

[4/13/2004 8:49:15 AM] <hotto> ty IT.. 4.75 would be a nice place to PT part.. :8

[4/13/2004 8:49:32 AM] <gary12> :8

[4/13/2004 8:49:33 AM] <Investortrader> =D

[4/13/2004 8:49:46 AM] <VJnet> TYH and IT

[4/13/2004 8:49:46 AM] <Investortrader> I like how you said ... "part"

[4/13/2004 8:49:48 AM] <croy> Thanks WildBill

[4/13/2004 8:49:56 AM] <adcum> ty hotto for the review of the market j sync 9k

[4/13/2004 8:50:04 AM] <Investortrader> Hi adcum

[4/13/2004 8:50:36 AM] <adcum> hi it..vj

[4/13/2004 8:52:14 AM] <Investortrader> Not many stocks were covered in class last night as Hotto covered a bunch earlier ... but we got a little in-depth on the few we did ... NGEN (positive), SINA (positive), BWEB (positive), and FNSR (neutral to positive)

[4/13/2004 8:52:21 AM] <hotto> IDNX.. channel on recent Uptrend has upper line over 10 today..

[4/13/2004 8:52:50 AM] <adcum> it is woth for changing my day ritme from europe 9 to 5 to usa 9 to 5 or 15.00 to 22.00 hours =D

[4/13/2004 8:55:35 AM] <hotto> FVCX 4.51.. hang onto a few shares.. for the possible trip to 5.50... 6.10...

[4/13/2004 8:56:33 AM] <hotto> If you grab the nice little profits here... and give up the whole posn... No chance for the bigger gains.. ( which may or may not come )

[4/13/2004 8:57:35 AM] <Nexttrade> SYNC gapping up .50

[4/13/2004 8:58:21 AM] <gary12> hotto i'll take my money and let the profits ride ;)

[4/13/2004 8:58:24 AM] <hotto> So... use the standard approach... "PT as we go"...

Take part PT.. at each Target.. Unless you have an insight to keep you Long full..

[4/13/2004 8:58:58 AM] <hotto> gary... tht is one that works.. thanks.

[4/13/2004 9:00:34 AM] <hotto> SYNC.. today will be FDU.. And.. BTBO ... And... BO50 !!!

[4/13/2004 9:00:45 AM] <alan996> U.S. retail sales rose 1.8 percent in March, the fastest growth in a year

[4/13/2004 9:01:05 AM] <mace> so where is add on SYNC I am long full position

[4/13/2004 9:01:29 AM] <hotto> with the new contract... expect test of SMA200 very soon

[4/13/2004 9:01:39 AM] <tiga> SYNC so does the news negate the scalp points in your opinion?

[4/13/2004 9:01:59 AM] <hotto> SYNC.. I will skip the 3.50 s= point.. yes..

[4/13/2004 9:02:14 AM] <kellam> :8

[4/13/2004 9:02:33 AM] <hotto> may take off a bit.. on gap fill.. not sure as yet

[4/13/2004 9:02:48 AM] <FibTrader> SYNC, a gap open above 4(seems unlikely) would be an island reversal as well

[4/13/2004 9:02:49 AM] <Investortrader> Hotto, does the 3.50 scalp point being skipped .. suggest a pb to that area for an add-to? .... I'm thinking along those lines here

[4/13/2004 9:03:04 AM] <hotto> gap - fill = 3.99..

[4/13/2004 9:03:09 AM] <mace> NGEN up .22 pm

[4/13/2004 9:03:28 AM] <Investortrader> I mean, suggest an add-to IF we see a pb to that area

[4/13/2004 9:03:46 AM] <hotto> IT.. ??? flip a coin.. If this one gets Hot.. could see big numbers..

[4/13/2004 9:04:13 AM] <Jwerner> There's going to be a bunch of people wishing they had bought NGEN on that little downturn yesterday.

[4/13/2004 9:04:13 AM] <Investortrader> Yeah, I mis-worded that question at first :o

[4/13/2004 9:04:14 AM] <hotto> SYNC Nov 2003 High was 7.64 !.... a reminder

[4/13/2004 9:04:30 AM] <kellam> TER a semi looks well positioned today

[4/13/2004 9:04:32 AM] <hotto> 7.71.. oops

[4/13/2004 9:05:03 AM] <Investortrader> I got in yesterday on NGEN Jwerner :)

[4/13/2004 9:05:09 AM] <hotto> Can SYNC get to 7.71 ??? we will see..

[4/13/2004 9:05:22 AM] <hotto> maybe by tomorrow...=D

[4/13/2004 9:05:35 AM] <adcum> =D

[4/13/2004 9:05:46 AM] <Investortrader> We have to wait all the way until tomorrow? Geeez ;)

[4/13/2004 9:05:50 AM] <Jwerner> Good job IT, I added more calls yesterday as well :)

[4/13/2004 9:05:53 AM] <hotto> If so... I may take off a day ...:D

[4/13/2004 9:06:02 AM] <mace> MTSN looks good this am too

[4/13/2004 9:06:46 AM] <bravotrader> considering MIKR, SSPI, VISG ... I would not be surprised with SYNC 8.0

[4/13/2004 9:07:17 AM] <acmetrader> LOUD nice gap

[4/13/2004 9:08:13 AM] <adcum> hotto if you have time what is the connection between SYNC and TASR?

[4/13/2004 9:08:31 AM] <payck> there isn't one ad, he meant RIMM

[4/13/2004 9:08:49 AM] <Fannye> SYNC I got tired of waiting on sync and sold it yesterday and put my money and some more in VISG. That is what you call pure luck!

[4/13/2004 9:08:52 AM] <acmetrader> ARTX has the link to TASR...they have exclusivity to training

[4/13/2004 9:09:08 AM] <adcum> oh i read wrong then ty pay

[4/13/2004 2:49:23 PM] <syatt> INTC is scheduled to report Q1 (Mar) results today after the market closes. The analyst community in general is not expecting fireworks with Reuters consensus EPS at \$0.27 and revs at \$8.17 bln (guidance is for revs in the range of \$8.0-\$8.2 bln and for gross margin of 60% +/-1). In general, analysts expect the co to report Q1 results in-line with mgmt's guidance and guide conservatively for Q2. Several firms have been taking down their numbers over the past few weeks making it easier for the co to come in line or even exceed. More negative firms like JP Morgan expect Intel to guide for a 2-4% q/q decrease in revenue. Also, they expect gross margin guidance for Q2 to be lowered to 59%. All in all, it seems the expectations for Q1 and Q2 guidance are low. Earnings Volatility History:In the past 3 qtrs, on Jan 14th the co beat by 2 cents, guided in line (stock down 1% the following day); on Oct 14th the co beat by 2 cents, guided in line (stock +2%); on July 15th co beat by a penny,

[4/13/2004 2:56:00 PM] <swan> Hotto, YHOO is filling the gap, and likely to hit LR30  
tomorrow. Is it not likely to be playable like MAGS because the OBV did not confirm

[4/13/2004 2:57:03 PM] <hotto> YHOO will be playable at least one time on this PB..  
the trick is picking the entry..  
[4/13/2004 2:58:13 PM] <swan> But my question is, will it be DIFFERENT, related to  
the OBV non-confirm, Is that a point worth noticing?  
[4/13/2004 3:01:14 PM] <hotto> swan yes.. the OBV is a concern. The rally will likely

[4/13/2004 3:37:10 PM] <Quintus> a comment regarding "lessons" -- as a new trader (~ 1 yr), i am mildly appalled at how often today's type of events have repeated themselves.. Gap & crap on indices -- happend on Saddaam day, several Employment days, Yahoo day last Thurs, and again today. yet i still find myself not doing the right things enough -- like selling gaps. doubt i'm the only one feeling this way, but still just as Frustrating ! [4/13/2004 4:10:09 PM] <Quintus> CBMX -- the definition of pattern failure. it scared me a little how many were long recently (in many Clubs). turned out "no one left to buy"

[4/13/2004 4:10:29 PM] <hotto> good one Quint..

[4/13/2004 4:10:33 PM] <Quintus> i had itchy trigger finger like everyone else

[4/13/2004 4:11:54 PM] <Quintus> Ok -- FVCX could still be big -- but 10% down from scalp point not insignificant either

[4/13/2004 4:12:52 PM] <Quintus> 10% in 5 minutes that is. only Hotto catches those turns so well.

[4/13/2004 4:13:36 PM] <mace> IPAR beats and ups guidance

[4/13/2004 4:14:44 PM] <Okbill> Still would like to know what caused the turn?..

[4/13/2004 4:14:48 PM] <hotto> IEIB... suprised even me... Hotto Clubbers useed good patience... else would not have reached 12.18..

[4/13/2004 4:15:40 PM] <Quintus> a stock that still looks great thru the carnage is AXYS -- just consolidating big Thurs -- + range contraction -- stock "inhaling" -- likely "exhale" up on next COMPQX turnup.. mkt liked accretive acquisition it just made

[4/13/2004 4:15:49 PM] <daniel329> intc coming down

[4/13/2004 4:16:03 PM] <MarcoPolo> I wonder where the antagonist went?

[4/13/2004 4:16:44 PM] <StockEng> INTC missed revs. dropping AH

[4/13/2004 8:55:28 PM] <Quintus> with no new thoughts/info tonight, is there a plausible reason for even holding this press conference ? seems Bush would be better off laying low.

[4/13/2004 8:59:19 PM] <RkyMtnFool> Q, it's an election year. Barring a major mistake, tonight's press conference/speech relieves some pressure.

[4/13/2004 9:45:44 PM] <Quintus> Rky, guess i'm trying to understand how repeating this (very tiring) set of catch-phrases and mantras would relieve anything for him. i can't be the only avg joe who is sick to death of iraq/terrorists/wmd talk.

[4/13/2004 9:46:06 PM] <Quintus> no matter who its coming from.

[4/13/2004 9:51:41 PM] <rockin> been doing some more research - LWAY, TSAI daily look realinteresting

[4/13/2004 9:59:14 PM] <RkyMtnFool> I imagine that his advisors wanted to take the stage back from the 9/11 Commission that tried to nail Condi Rice last week. I'm tired of the politics, and it's only April!
