[2/5/2004 8:54:05 AM] [hotto] G7 Meeting tomorrow...

[2/5/2004 8:54:12 AM] [hotto] The Dollar is slightly lower versus the Euro (1.2584) ahead of tomorrow's G7 meeting. It is speculated the US will maintain its stance on "flexible exchange rates" and will not intervene with the Dollar's weakness nor support the ECB's concerns about "volatility." Most analysts expect further Dollar weakness as the US supports its recovering economy

[2/5/2004 8:54:27 AM] [hotto] that is from Briefing.com

[2/5/2004 8:56:26 AM] [hotto] That would agree with the 'Re-elect "W"' project.. Weak Dollar.. a form of protectionism.. Strength to US Manufacturing

[2/5/2004 8:57:15 AM] [hotto] Should result in more US jobs... at some time this year. Votes for "W"

[2/5/2004 8:57:43 AM] [hotto] We can pay the price in 2005.

[2/5/2004 8:58:14 AM] [hotto] MOre fun times for traders....)

[2/5/2004 8:59:31 AM] [BWill] can you have all the hotties up to speed on shorting by 2005? =D

[2/5/2004 9:00:13 AM] [hotto] For today... The Initial Claims report - is not good news for "W".. Perhaps our idea of a "Political weekend" will come to pass.

[2/5/2004 9:00:45 AM] [hotto] This may be John Kerry's best weekend... ever..

[2/5/2004 9:01:24 AM] [hotto] After next week.. probably the "W" machine will push Kerry back down..

[2/5/2004 9:01:46 AM] [hotto] But.. this weekend.. Talk shows will be filled with Kerry...

[2/5/2004 9:02:06 AM] [hotto] AND No Superbowl...to distract from Politics..

[2/5/2004 11:40:57 AM] [DataMiner] Look at WEBX. The price percent change-RT

says it's up 21% but it's clearly down a lot from the open.

[2/5/2004 11:42:58 AM] [Luigistock] Data isnt PPC from the previous days close?

[2/5/2004 11:43:31 AM] [DataMiner] Yes, but look at WEBX

[2/5/2004 11:43:35 AM] [TCNut] did you update last night dataminer?

[2/5/2004 11:43:43 AM] [DataMiner] Yes

[2/5/2004 11:43:58 AM] [TCNut] I have -2.45%

[2/5/2004 11:44:34 AM] [DataMiner] I'll update again now, see if that fixes it.

[2/5/2004 11:44:46 AM] [Luigistock] kick it too that always helps

[2/5/2004 11:45:12 AM] [TCNut] update shouldn't matter though....it's realtime...and think that data comes from the server

[2/5/2004 11:47:15 AM] [Kuf] dataminer, %change is from the close previous day, not since the open

[2/5/2004 11:47:37 AM] [Kuf] if you want %change from the open you can do a custom sort and use the number of bars to do the %change with

[2/5/2004 11:48:18 AM] [DataMiner] Well, I updated again and that seems to have fixed it, even though I did update last night.

[2/5/2004 11:49:11 AM] [Kuf] dataminer, see my reply above RE %change since the open

[2/5/2004 11:49:34 AM] [payck] kuf, you should do a saturday class and show us all the things tcnet will do, I know I'm not using half of them

[2/5/2004 11:49:57 AM] [Kuf] here's a neat trick, i'll post it up in the tips and ticks section later.....

[2/5/2004 11:50:08 AM] [Kuf] Say you want to know what stocks have rallied the most in the last hour....

[2/5/2004 11:50:09 AM] [Luigistock] Jus t what Kuf wants to do ..spend yet more time with us loonies

[2/5/2004 11:50:19 AM] [payck] :D

[2/5/2004 11:51:17 AM] [Kuf] right click on your price, select sort by, Select %change, change the timeframe to 1 hour, leave the %change period to 1, click sort

[2/5/2004 11:51:39 AM] [Kuf] if you want to know the %change for the last 3 hours do the same thing only select 3 for the %change period

[2/5/2004 11:52:03 AM] [Kuf] you can apply that to any timeframe. Biggest change in the last 3 minutes, do the same thing only select minute instead of hour and type 3 on the period

[2/5/2004 11:53:02 AM] [Kuf] want to know %change since the open? select hour (or half hour, or 15 minutes) and count the number of bars back to the open, then set that as the %change period, voila

[2/5/2004 11:53:13 AM] [TraderGeorge] What do you mean by "right click on your

price"?

[2/5/2004 11:53:30 AM] [Kuf] right click on the price indicator (either the label or the actual price bars)

[2/5/2004 11:53:32 AM] [dgraham42] kuf, sort by is grayed out on last RT price

[2/5/2004 11:53:46 AM] [Kuf] no no no, on your chart, right click the label

[2/5/2004 11:53:50 AM] [Kuf] or

[2/5/2004 11:54:00 AM] [Kuf] on the sort drop down, select indicator and then select price

[2/5/2004 11:54:50 AM] [Luigistock] Kuf sorry to be dense but where am i supposed to right click?

[2/5/2004 11:55:08 AM] [Kuf] on the chart, on the price label, or directly on the price bar chart.

[2/5/2004 11:55:18 AM] [Kuf] where it says price chart, right click there

[2/5/2004 11:55:21 AM] [gary12] Kuf i want to know the stock that will rally in the next hour? ;)

[2/5/2004 11:55:46 AM] [Kuf] all this stuff is shown in the Chart Readers Playground CD

[2/5/2004 11:55:58 AM] [payck] I watched half of it

[2/5/2004 11:55:58 AM] [Luigistock] when i right click on a candle it doesnt give me the sort option

[2/5/2004 11:56:02 AM] [bmwrider] Yea RTFM

[2/5/2004 11:56:18 AM] [bmwrider] On the actual price box Loog

[2/5/2004 11:56:21 AM] [payck] luigi, upper left right under the date

[2/5/2004 11:56:35 AM] [Kuf] yeah, candles are a bit harder to find the anchor points, just right click on the label that says price chart

[2/5/2004 11:56:36 AM] [Kuf] or

[2/5/2004 11:56:44 AM] [gabman] I'm w/ you gary...why can't the Wordens figure that one ou;)

[2/5/2004 11:56:46 AM] [Kuf] select the sort drop down, select indicator, select price : bar chart

[2/5/2004 11:56:54 AM] [Luigistock] now i get it thanx everyone a sad moment for my brain

[2/5/2004 11:57:35 AM] [payck] not alone loogy

[2/5/2004 11:58:08 AM] [Kuf] did everyone figure out how to do %change of price (for those trying?)

[2/5/2004 11:58:11 AM] [SeattleSteve] Kuf, thanks. This is fantastic. It is just what a number of us have been asking you to provide us with. Great job!!!

[2/5/2004 11:58:27 AM] [General] got it thnx Kuf

[2/5/2004 11:58:29 AM] [Kuf] yeah, it's essentially a poor-mans custom date range in real time
[2/5/2004 11:58:31 AM] [TraderGeorge] What is the Chart Readers Playground CD?
[2/5/2004 11:58:34 AM] [Luigistock] yes thanx Kuf - should do a daily segment "Kuftrickery"
[2/5/2004 11:58:48 AM] [Kuf] you have to do the "math" to figure out how many bars back to use for the %change
[2/5/2004 11:59:05 AM] [payck] and it sorts what's in the watchlist?
[2/5/2004 11:59:10 AM] [Kuf] yes, the top 200
[2/5/2004 11:59:14 AM] [LeelaHula] Thanks Kuf ... works well:)
[2/5/2004 11:59:56 AM] [payck] see, I know there's a ton of things i don't know how to work here
[2/5/2004 12:00:25 PM] [Luigistock] Yep agree pay, need a lunch time daily tip session
[2/5/2004 12:00:42 PM] [payck] yes, hear that Kuf???
[2/5/2004 12:00:57 PM] [Luigistock] we'll rotate buying his lunch
[2/5/2004 12:01:02 PM] [Kuf] lol
[2/5/2004 12:01:04 PM] [payck] :D
[2/5/2004 12:01:31 PM] [Kuf] Now, apply that to longer time frames, or specific "points" on a chart and you can sort by the %change since lunchtime yesterday
[2/5/2004 12:01:43 PM] [Kuf] Very cool, very pow
[2/5/2004 12:02:38 PM] [Kuf] I know most people love the Custom INdicators, but I think the new sorts are the bread and butter of 2.3
[2/5/2004 12:03:04 PM] [ButterflySpread] really cool Kuf-just got my CD and haven't looked at it yet. So now really motivated!
[2/5/2004 12:03:24 PM] [Luigistock] treu plenty of indicators in the world sorting the garbage lists i generate is the most important to me

[2/5/2004 1:15:01 PM] [hotto] +42 1777 / 1361.. we got out of those OEX PUTs.. just about right...B)

[2/5/2004 1:18:55 PM] [hotto] brb

[2/5/2004 1:21:58 PM] [Coregonus] HOTTO would you let all PVN scalp out or just part of it? Because it happened to mee too often that they scalpt out and kept going without looking back. How should ? handle this?

[2/5/2004 1:24:08 PM] [hotto] PVN.. after an ABC.. I usually take 1 scalp at "B"...

But... if things get hot.. PVN.. could surge right over the top.. in 1 day..

[2/5/2004 1:24:49 PM] [hotto] We did 4 trades so far on PVN.. got them mostly right.. ever since 11.80 I think

[2/5/2004 1:25:19 PM] [hotto] AND.. the Big play.. is the Gap fill to 18... in this merger candidate..

[2/5/2004 1:25:23 PM] [Coregonus] Thank you.HOTTO...missed too many good ones..hope I get a handle on this one!!!

[2/5/2004 1:25:52 PM] [hotto] yw Coreg... tricky - these TO plays

[2/5/2004 1:26:24 PM] [Coregonus] but wasn't there a JP Morgan downgrade on PVN?

[2/5/2004 1:26:27 PM] [hotto] But.. has a Good chart... and making very nice patterns.. in the Hotto style..

[2/5/2004 1:26:46 PM] [hotto] yes.. JPM helped us make our "C"... with the DOV

[2/5/2004 1:27:03 PM] [hotto] Thank you JPM..)

[2/5/2004 1:27:21 PM] [Coregonus] I see I have to learn a lot yet

[2/5/2004 1:27:42 PM] [hotto] It could dip lower... Never "sure"... BUt..

[2/5/2004 1:28:15 PM] [hotto] PVN has done all that was necessary.. on the ABC PB...

[2/5/2004 1:29:03 PM] [hotto] Have you read the "Downgrade on Valuation"

Presentation from last Feb. March?

[2/5/2004 1:29:15 PM] [hotto] was in a Saturday Chat..

[2/5/2004 1:31:30 PM] [Coregonus] No I never have enough time do read all you Infos ..total info overload and therefore I miss out on a lot

[2/5/2004 1:32:39 PM] [Coregonus] plus I still have to learn so much and don't always know wether I understoo it properly

[2/5/2004 1:34:10 PM] [Dragon1] jpv n

[2/5/2004 1:34:30 PM] [Dragon1] oops

[2/5/2004 1:34:44 PM] [Coregonus] I am still in LOUD and SCKT and I am not sure if I shoud have gotten out of them a while ago , because they never scalped out.do you think they'll be coming back to life again?

[2/5/2004 1:36:32 PM] [HOTTO] billb has joined the club. Please welcome your new member.

[2/5/2004 1:39:52 PM] [jbrad] sckt failed the 50MA 6 days ago - at the open today it attempted to go thru the 1/2 hr 50MA - tried again a couple hrs later and bounced back again - SCKT is trying again now and so far the volume is not there on the up side - still more vol on dn side for SCKT

[2/5/2004 1:43:13 PM] [jbrad] LOUD came down to the 1hr MA400 and is on a tiny bounce - big volume on the Down side indicating more down to follow possibly for LOUD

[2/5/2004 1:44:30 PM] [Coregonus] I better bite the bullet an sell them

[2/5/2004 1:45:03 PM] [jbrad] I would. Now's not the time to be long in these two

[2/5/2004 1:45:45 PM] [jbrad] I'd wait and see where this bounce on loud tops out

[2/5/2004 1:47:54 PM] [powdershot] i'd love to build a position in ALVR on fundamentals alone , great last mile prospects with INTc support...looking for a reversal sign

[2/5/2004 1:48:44 PM] [jbrad] on the one min chart for LOUD, there was 14000 shares traded causing a pop in Money Stream at 2.00 - now 2.02 - no volume to speak of to keep this up move alive

[2/5/2004 1:49:35 PM] [jbrad] OBV is up on LOUD right now - I'd let it ride until OBV turns down

[2/5/2004 1:49:55 PM] [jbrad] that's on the 1min chart

[2/5/2004 1:51:34 PM] [jbrad] SCKT up against the 200MA on the 1 min chart - OBV is turning down

[2/5/2004 1:51:41 PM] [Kasa] cant borrow ngen from ameretrade

[2/5/2004 1:52:10 PM] [Kasa] boss short me some i send you cheque

[2/5/2004 5:37:56 PM] [TraderGeorge] T support and they would not recommend any, although they did state that some will interfere with TCNET

ClubHome

[2/5/2004 5:39:13 PM] [Stitch] George, i use Ad-Aware, you run it off line, and it will keep ads off for days to weeks

[2/5/2004 5:39:15 PM] [tiga] I never get pop ups but I run ad-aware often and delete all the spyware.....not sure if that is what does it for me or not.

[2/5/2004 5:39:21 PM] [jrhoust] tradergeorge I bot nortons internetsecurity and norton systemworks and I have no more popups period

[2/5/2004 5:39:33 PM] [wildbill] I currently use SBC yahoo, it has a pop up blocker-does not interfere with TCNet-also have norton internet security-

[2/5/2004 5:39:34 PM] [Stitch] and I run iclean realtime, doesn't interfere with TCNET

[2/5/2004 5:39:44 PM] [tiga] google ad-aware and you can down load it free

[2/5/2004 5:40:19 PM] [Stitch] tiga, do you delete all the stuff ad-aware finds? i do

[2/5/2004 5:40:56 PM] [TraderGeorge] Thank you for the recommendations!

[2/5/2004 5:41:21 PM] [tiga] Every bit of it

[2/5/2004 5:41:25 PM] [Stitch] yw, george, what a nightmare those popup adds can be, and Yahoo is the worst!

[2/5/2004 5:41:37 PM] [Stitch] lol tiga

[2/5/2004 5:41:59 PM] [Stitch] Also I utilize Microsoft XP's internet security options in the control pannel

[2/5/2004 5:42:41 PM] [Stitch] Georgy, look at the URL that the popups originate from and go into control panet internet options, security, and flag it as restricted! works!

[2/5/2004 5:43:27 PM] [Stitch] I have such tight security options now, that I must add the sites to "trusted sites" in order to use them like banking sites and amazon.com, etc.

[2/5/2004 5:46:32 PM] [PAL2] no payment ...no sound

[2/5/2004 5:59:57 PM] [PAL2] INTC please

[2/5/2004 6:09:53 PM] [Aktony] Thanks FW

[2/5/2004 6:17:09 PM] [TraderGeorge] tiga and others, i just went to the security dialog and found the following listed as "trusted sites": ad.searchsquire.com, search.searchsquire.com, update. searchsquire.com, *.searchsquire.com. this seems very suspiciious. do u agree?

[2/5/2004 6:18:24 PM] [Stitch] George, is Require server verification checked off?

[2/5/2004 6:20:33 PM] [TraderGeorge] yes it's checked

[2/5/2004 6:21:10 PM] [Stitch] for them to be valid they should start with https://

[2/5/2004 6:21:28 PM] [Stitch] i'd delete them if i were you

[2/5/2004 6:21:31 PM] [TraderGeorge] nope! http:// only no s

[2/5/2004 6:22:20 PM] [Stitch] i'd delete them anyway, click on each line, hit remove

[2/5/2004 6:22:31 PM] [TraderGeorge] so the problem can be handled at this level without downloading the google program?

[2/5/2004 6:23:19 PM] [Stitch] well, ad-aware finds many more than you could ever program to the Restricted sites yourself

[2/5/2004 6:24:13 PM] [TraderGeorge] and ad-aware will not interfere with my Ameritrade streamer or with TCNRT?

[2/5/2004 6:24:32 PM] [Stitch] ad-aware doesn't run in background, so no, i run it about once a week

[2/5/2004 6:24:59 PM] [Stitch] it removes cookies that sites have placed on your computer w/out your permission

[2/5/2004 6:25:04 PM] [w2jc] i run ad-aware every night, just before defrag ... only takes a couple of minutes

[2/5/2004 6:25:12 PM] [dgraham42] Re: http vs https, the "s" indicates a secure site, like those used for financial transactions or where other sensitive information is accessed

[2/5/2004 6:25:25 PM] [Stitch] true, makes mean noise though, ha w2?

[2/5/2004 6:25:39 PM] [Stitch] makes sense dgr, thanks

[2/5/2004 6:25:40 PM] [Bobtrader] stitch ... when you are in security in XP PRO how do you add site to restricted ...ty in advance

[2/5/2004 6:26:28 PM] [Stitch] you click on the red circle for restricted then click on "sites"

[2/5/2004 6:26:50 PM] [Stitch] should say "add this Web site to the zone"

[2/5/2004 6:27:48 PM] [Stitch] I used the restricted sites function for the following pesky little sites that infiltrated Ad-aware and iclean

[2/5/2004 6:28:01 PM] [Stitch] <http://www.adsrve.com>

[2/5/2004 6:28:07 PM] [Stitch] <http://www.doubleclick.com>

[2/5/2004 6:28:15 PM] [Stitch] <http://www.fi.com>

[2/5/2004 6:28:27 PM] [Stitch] <http://www.javacoolsoftware.com>

[2/5/2004 6:28:33 PM] [Stitch] <http://www.spyblast.com>

[2/5/2004 6:28:38 PM] [Stitch] that's all i have ther

[2/5/2004 6:28:40 PM] [RJMGroup] Ad-Aware doesn't find everything. I combine it with www.spybot.com and www.pestscan.com.

[2/5/2004 6:28:59 PM] [Bobtrader] ha.. ok ..got it ...TY ... and copying your sites to restricted

[2/5/2004 6:29:39 PM] [Stitch] yw

[2/5/2004 6:30:09 PM] [Stitch] RJM, do spybot or pestscan run in background or are they off-line like Ad-aware?

[2/5/2004 6:30:43 PM] [RJMGroup] Off-line but version of Ad-Aware (paid) are background processes.

[2/5/2004 6:31:02 PM] [Stitch] ok, thanks, i use the free ad-aware

ClubHome

[2/5/2004 6:31:23 PM] [Stitch] the only popup ad getting thru now is when I start Yahoo messenger, a popup ad comes

[2/5/2004 6:31:32 PM] [RJMGroup] Technically, www.pestscan.com is on-line since it's run through a website. Oh, and SpyBot is at: <http://www.safer-networking.org/> (not www.spybot.com)

[2/5/2004 6:31:48 PM] [Stitch] i need to follow it to it's site and add the url to my restricted site, pain in the you know what

[2/5/2004 6:31:57 PM] [Barnabus] does pestscan find things that ad-aware doesn't?

[2/5/2004 6:32:36 PM] [RJMGroup] Yes, I use all three at clients because I have never found one that found them all. I have secretaries constantly screwing up their PC's with spyware. Always clicking "yes" to everyone.

[2/5/2004 6:32:48 PM] [Bobtrader] stich... was empty when i started... put your first one in ..hit add and got a whole list of sites in there includeing dell and OZ's web site

[2/5/2004 6:33:30 PM] [Stitch] bob from adding adsrve.com only?

[2/5/2004 6:34:24 PM] [Stitch] interesting you are using XP-pro? mine's regular XP, maybe your's is more details

[2/5/2004 6:35:42 PM] [Bobtrader] yes... they came up when i started to write second site .. but maybe it was a list for me to pick from that is already on my system

[2/5/2004 6:36:08 PM] [Stitch] possibly, what happened next?

[2/5/2004 6:36:40 PM] [Stitch] oh, that was probably just your auto fill feature, alphabetically all the a's came up

[2/5/2004 6:37:08 PM] [Stitch] just stick with typing out whole line, and the rest should disappear

[2/5/2004 6:37:57 PM] [RJMGroup] #1 reason to have Windows XP Professional over Windows XP Home is Remote Desktop (IMO).

[2/5/2004 6:38:38 PM] [Stitch] what's a remote desktop?

[2/5/2004 6:38:42 PM] [starbucks] What is remote desktop?

[2/5/2004 6:38:47 PM] [Stitch] lol

[2/5/2004 6:39:00 PM] [RJMGroup] Similar to pcAnywhere.

[2/5/2004 6:39:16 PM] [starbucks] okay.....

[2/5/2004 6:40:06 PM] [RJMGroup] Translation: You can remotely access your PC from anywhere on the Internet with the free client software.

[2/5/2004 6:40:08 PM] [Stitch] wow you can look at your desktop from another location? is there an upgrade from XP home to XP pro, expensive?

[2/5/2004 6:40:37 PM] [StockStalker] u can do that on the RIMM blackberry too with another type of software

[2/5/2004 6:40:45 PM] [Bobtrader] must be a pick list because ameritrade is on ther to ... it is a scroll screen...must be thinking for me...duh... when i start typing site to

[2/5/2004 6:42:13 PM] [starbucks] RJ, what is that adware site?

[2/5/2004 6:42:23 PM] [StockStalker] RJM... what sevice/software are u referring to for remot access

[2/5/2004 6:42:41 PM] [RJMGroup] Remote Desktop included in Windows XP Pro.

[2/5/2004 6:42:49 PM] [StockStalker] fresh install

[2/5/2004 6:43:00 PM] [RJMGroup] Ad-Aware website is www.lavasoftusa.com.

[2/5/2004 6:43:30 PM] [RJMGroup] You can also use Remote Desktop Web Connection from any PC with Internet Explorer 5.0 or better to access your PC.

[2/5/2004 6:43:36 PM] [StockStalker] I ahve friends that are very happy with <https://www.gotomypc.com/>

[2/5/2004 6:44:03 PM] [RJMGroup] But GotoMyPC costs money. Remote Desktop is free.

[2/5/2004 6:44:32 PM] [Stitch] IE 5.0 has a free access?

[2/5/2004 6:44:40 PM] [Stitch] with XP home?

[2/5/2004 6:45:04 PM] [RJMGroup] No, Remote Desktop is only in Windows XP Pro but the client can be running anything with IE 5.0 or better.

[2/5/2004 6:45:37 PM] [RJMGroup] Well, the only charge is Internet access. The software is part of the operating system in Windows XP Pro.

[2/5/2004 6:45:40 PM] [Stitch] oh so like if I go to friends house, he has IE5.0 but doesn't have XP pro, it will still work?

[2/5/2004 6:45:41 PM] [Bobtrader] stich ..thanks

[2/5/2004 6:45:59 PM] [Stitch] sure thing Bob

[2/5/2004 6:46:27 PM] [RJMGroup] Yup, Stitch. You can find out more about Remote Desktop Web Connection @

[2/5/2004 6:47:38 PM] [Stitch] bob if you use retrictions on IE options, just beware when you go to use secure sites, you may go around in circles

[2/5/2004 6:48:05 PM] [Stitch] you'll get locked out of sites that require cookies, and you'll have to add them to your secure sites list

[2/5/2004 6:48:22 PM] [Stitch] it's easy, you just have to remember to do it when it happens

[2/5/2004 6:48:52 PM] [starbucks] RJM, I use spybot. Are adware and petscan free? no?

[2/5/2004 6:49:33 PM] [Bobtrader] the way it is today I would rather add than get virus

[2/5/2004 7:04:24 PM] [TCNut] Zone Alarm is great for protecting you from all the bad stuff and pop-ups too....they have a free version, plus, and pro. It is especially great for my laptop when I am out of town and don't have a hardware router to protect me on my laptop.

http://www.zonelabs.com/store/content/catalog/products/sku_list_zs.jsp?lid=pdb_zs1

[2/5/2004 7:06:00 PM] [TCNut] I use ad-aware once in awhile....but if you have your computer configured properly when you scan with it, nothing ever comes up....for me at least.

[2/5/2004 7:07:08 PM] [TCNut] oh....yeah....and if you don't install lame prgrams without researching them first :;)

[2/5/2004 7:29:01 PM] [TraderGeorge] ZoneAlarm prevents me from uising Ameritrade's streamers even after i have given permission for the site

[2/5/2004 7:29:33 PM] [RJMGroup] Maybe ZoneAlarm requies client and server privileges for Ameritrade.

[2/5/2004 7:36:23 PM] [TCNut] I had that problem with island.com's java orderflow charts...can't remember what I adjusted to make them work.

[2/5/2004 7:36:43 PM] [TCNut] and too lazy to look into it now

[2/5/2004 7:36:57 PM] [TCNut] there is a way around that, though

[2/5/2004 7:38:38 PM] [RJMGroup] I've seen references to Java applet streamers in ZoneAlarm support on-line. You might want to check there.

[2/5/2004 7:43:06 PM] [TraderGeorge] Thank you all!

[2/5/2004 7:49:11 PM] [TCNut] think it was.....In Zonealarm.....Privacy\Main Tab\Mobile Code Control.....Off
