 [4/15/2004 12:01:05 AM] <tobydad> targets?
 [4/15/2004 12:01:35 AM] <Investortrader> Looks pretty clear on the weekly
 [4/15/2004 12:01:57 AM] <tobydad> clear as in blue sky?
 [4/15/2004 12:01:57 AM] <Investortrader> Gotta go to the monthly to find any chart points
 [4/15/2004 12:01:59 AM] <parkwaypet> ty IT
 [4/15/2004 12:02:10 AM] <AllWeOwn> I; quick question on AVCI if you have a second between charts
 [4/15/2004 12:02:19 AM] <Investortrader> Welcome parkwaypet :)
 [4/15/2004 12:02:33 AM] <Investortrader> Go for it AllWeOwn
 [4/15/2004 12:02:56 AM] <AllWeOwn> just noticed on the news to the side that it was upgraded today by Lehman w/ a target of 16\$; hate that; so obvious; any comment on that?
 [4/15/2004 12:03:21 AM] <Investortrader> Not much of a tarket
 [4/15/2004 12:03:25 AM] <Investortrader> Target
 [4/15/2004 12:03:56 AM] <AllWeOwn> yes but almost contrived or something; jsut get frustrated when see the analysts comments; so often they....
 [4/15/2004 12:03:56 AM] <Investortrader> I would have thought an upgrade would bring a higher target, at least the 50sma
 [4/15/2004 12:04:25 AM] <AllWeOwn> will downgrade jsut prior to a pop, and the opposite of course too. upgrade prior to sell off
 [4/15/2004 12:04:42 AM] <AllWeOwn> so why are they being so conservative?
 [4/15/2004 12:04:49 AM] <Investortrader> NAVR no targets, I'd just let it ride the upper BB here for a bit ... maybe 9 or 10
 [4/15/2004 12:05:06 AM] <Investortrader> I don't know
 [4/15/2004 12:05:20 AM] <AllWeOwn> ok ty :)
 [4/15/2004 12:05:21 AM] <tobydad> navr targets...ty.
 [4/15/2004 12:05:53 AM] <AllWeOwn> does that mean you ignore analyst comments ? lol
 [4/15/2004 12:06:01 AM] <Investortrader> Around 9 would be a measured move off the bottom
 [4/15/2004 12:06:14 AM] <bbmd> May be the gap in march!!,on avci.
 [4/15/2004 12:06:27 AM] <Investortrader> Pretty much AllWeOwn lol As Hotto says, on valuation downgrades give them the first day, maybe two
 [4/15/2004 12:06:39 AM] <Tilt> IT, I got to go, been thinking too much today, thanks
 [4/15/2004 12:06:41 AM] <AllWeOwn> ty
 [4/15/2004 12:06:58 AM] <Investortrader> Other than that I would say their signal to noise ratio is pretty low ;)
 [4/15/2004 12:07:03 AM] <Investortrader> Welcome Tilt :)
 [4/15/2004 12:07:31 AM] <tobydad> s/n ratio.....D
 [4/15/2004 12:07:44 AM] <Investortrader> On to OCA ...
 [4/15/2004 12:08:23 AM] <Investortrader> This one I covered almost two weeks ago in class
 [4/15/2004 12:08:36 AM] <Investortrader> Saying ride the upper BB!
 [4/15/2004 12:08:45 AM] <bravotrader> IT are you an EE?
 [4/15/2004 12:08:46 AM] <cobralso> Ya wore me out! GN IT Thanks

[4/15/2004 12:08:57 AM] <Investortrader> Night cobralso :)
[4/15/2004 12:09:09 AM] <Investortrader> No bravotrader .. but I did go to an engineering college
[4/15/2004 12:09:44 AM] <Investortrader> OCA still looks good here, barely made it out of my stall rule
[4/15/2004 12:09:55 AM] <Investortrader> Now back in contact with the upper BB
[4/15/2004 12:10:10 AM] <Investortrader> nice vol BO again today, with good price range ... so not many sellers yet
[4/15/2004 12:10:38 AM] <Investortrader> OBV confirming the BO
[4/15/2004 12:11:46 AM] <Investortrader> While it may do a pb to around today's low, like it did on 4/6 after the higher vol BO on 4/5 ... if you weren't nimble you missed getting back in
[4/15/2004 12:12:19 AM] <Investortrader> That's the risk you take on these that are riding the upper BB
[4/15/2004 12:12:28 AM] <Investortrader> And it may not pb much
[4/15/2004 12:12:56 AM] <OddBodkin> Okay! Thanx for the input, IT. :)
[4/15/2004 12:13:13 AM] <Investortrader> So depending on your time frame, and since you are still in it from last time (The one who asked about it), I'd still be holding here ... unless you want to try for that scalp
[4/15/2004 12:13:18 AM] <Investortrader> Welcome OddBodkin :)
[4/15/2004 12:13:55 AM] <Investortrader> Or it could go parabolic tomorrow ... we'll see
[4/15/2004 12:14:07 AM] <Investortrader> Any questions on OCA?
[4/15/2004 12:14:45 AM] <Investortrader> If you get a gap up, and very big vol, and very small price range .. I'd be selling it
[4/15/2004 12:15:18 AM] <Investortrader> On to ALSK ...
[4/15/2004 12:15:23 AM] <toptrader99> any comments on ADSXD ?
[4/15/2004 12:15:52 AM] <Hitman> another great chart class IT ... sure appreciate your time and effort ... time for the hay pile.
[4/15/2004 12:16:00 AM] <Investortrader> Thank you Hitman :)
[4/15/2004 12:16:23 AM] <Investortrader> This one is a higher risk one again ... nice vol BO's and low vol pb's so still looks good
[4/15/2004 12:16:47 AM] <tobydad> very blessed to have gotten in at 4.60...wondering about adding to on this pb
[4/15/2004 12:16:54 AM] <gnpiii> Hello ITany comments on TWAV? thanks in advance.....
[4/15/2004 12:17:00 AM] <Investortrader> It's come down about half way now on the big BO day candle
[4/15/2004 12:17:41 AM] <Investortrader> Half way down sometimes a good place for that
[4/15/2004 12:17:49 AM] <Investortrader> Still in contact with the upper BB here
[4/15/2004 12:18:08 AM] <Investortrader> There is always the risk on these big BO's of a pb to the LR30 too
[4/15/2004 12:18:59 AM] <Investortrader> Remember also we could be heading into a weak time in the markets here
[4/15/2004 12:19:35 AM] <Investortrader> OBV looks great on it .. but it will be volatile
[4/15/2004 12:19:42 AM] <Investortrader> Any questions on ALSK?
[4/15/2004 12:20:02 AM] <tobydad> ty IT, you're very generous with your time and knowledge.
[4/15/2004 12:20:07 AM] <Investortrader> The one thing that I almost never do on charts like this ...
[4/15/2004 12:20:24 AM] <Investortrader> The big BO day on 4/12 .. I never buy the close on those days
[4/15/2004 12:20:31 AM] <rsi77> Hi IT....how about ASKJ...do you have any time

left?

[4/15/2004 12:20:39 AM] <Investortrader> Sometimes it will continue it's run, but many times you get the big pb

[4/15/2004 12:21:07 AM] <Investortrader> Probably not rsi, sorry

[4/15/2004 12:21:10 AM] <tobydad> fortunately, i jumped off around 6.95.

[4/15/2004 12:21:14 AM] <Investortrader> On to BABY

[4/15/2004 12:21:54 AM] <Investortrader> I wanted to be over 20 minutes ago ... if I wake up early tomorrow I'll do it

[4/15/2004 12:22:24 AM] <tobydad> Sorry, IT, we do appreciate it.

[4/15/2004 12:22:49 AM] <parkwaypet> IT very much appreciated

[4/15/2004 12:22:54 AM] <Investortrader> :)

[4/15/2004 12:23:01 AM] <Investortrader> This one looks good here now

[4/15/2004 12:23:10 AM] <Investortrader> A bit of an increase in vol on this BO

[4/15/2004 12:23:18 AM] <Investortrader> And could be starting to ride the upper BB

[4/15/2004 12:23:31 AM] <Investortrader> OBV confirming too

[4/15/2004 12:24:00 AM] <Investortrader> One point on the huge vol BO day back in early March

[4/15/2004 12:24:19 AM] <Investortrader> Big gap open, ran way up, came all the way down, and fell a lot lower than the open

[4/15/2004 12:25:01 AM] <Investortrader> If you buy big BO's, it's usually best to put in a stop below the days open, so you don't get caught in a nasty reversal like this one if you end up not getting out near the highs

[4/15/2004 12:25:34 AM] <bravotrader> What is the story behind BABY, other than that they started to run it after MAMA's BO?

[4/15/2004 12:25:42 AM] <toptrader99> i got caught in adsxd by not getting out below the open, good point

[4/15/2004 12:25:52 AM] <Investortrader> Sometimes greed can take over on big BO days, you buy, see it running up and up, where do you sell? So if you do get caught, at least with the stop you get out and don't lose too much

[4/15/2004 12:26:04 AM] <Investortrader> I have no idea bravotrader, I never traded it

[4/15/2004 12:26:58 AM] <Investortrader> Any questions on BABY?

[4/15/2004 12:27:30 AM] <daniel329> what would be a good entry? high of previous day?

[4/15/2004 12:28:07 AM] <Investortrader> It's early and not too much big vol has come in yet .. might try to look for a pb to just above the 50sma here

[4/15/2004 12:28:29 AM] <Investortrader> Especially with it closing in the lower end of today's range

[4/15/2004 12:29:34 AM] <Investortrader> Or if you see it moving up on vol could just buy it, and use just under the 50sma as a stop

[4/15/2004 12:30:15 AM] <Investortrader> Now that it's over the 50sma, I would get out if that failed by much

[4/15/2004 12:30:30 AM] <Investortrader> On to DCEL ...

[4/15/2004 12:30:46 AM] <Investortrader> Very nice chart

[4/15/2004 12:31:17 AM] <Investortrader> See how the volume dried up and the price range was very small the days before the BO

[4/15/2004 12:31:49 AM] <Investortrader> Now it's moving up on good vol, OBV confirming the BO

[4/15/2004 12:32:28 AM] <Investortrader> Looks like it could ride the upper BB to the 50sma

[4/15/2004 12:32:57 AM] <Investortrader> Won't take much to get in contact with the upper BB and being the ride

[4/15/2004 12:33:08 AM] <rsi77> So now I have a scan in my arsenal called "Malkovich"....if I make a million bucks I'll write a book about it...and give seminars...etc.

ClubHome

[4/15/2004 12:33:15 AM] <Investortrader> begin the ride
[4/15/2004 12:33:27 AM] <rsi77> oops...was private...sorry
[4/15/2004 12:33:28 AM] <Investortrader> Hehehe rsi
[4/15/2004 12:33:34 AM] <malkovich> sure bud I definitely help u
[4/15/2004 12:33:42 AM] <malkovich> thanks for helping me to run it
[4/15/2004 12:33:48 AM] <Investortrader> Any questions on DCEL?
[4/15/2004 12:33:59 AM] <daniel329> possible stop?
[4/15/2004 12:35:08 AM] <Investortrader> Hopefully you've got some profits in it, I saw some people were buying it early today
[4/15/2004 12:35:36 AM] <daniel329> i did not get in... saw it late.. but consdiering for tomorrow
[4/15/2004 12:35:50 AM] <Investortrader> Let's look at the 5's
[4/15/2004 12:36:22 AM] <Investortrader> Would be nice to get a small pb in the morning to lower the risk of an entry
[4/15/2004 12:36:27 AM] <toptrader99> where can i get a copy of the settings you use ?
[4/15/2004 12:36:45 AM] <Investortrader> Might get one to the 50sma on the 5minute chart
[4/15/2004 12:37:03 AM] <Investortrader> Or even down to close to 3 where it fell to around 2:30
[4/15/2004 12:37:17 AM] <Investortrader> toptrader, you can copy my template if you want
[4/15/2004 12:37:48 AM] <toptrader99> how to do that, a lil new to this here, but a quick learner
[4/15/2004 12:37:51 AM] <Investortrader> I wouldn't want to see DCEL fall below todays lows
[4/15/2004 12:37:59 AM] <Investortrader> Hmmm,it's easy to do
[4/15/2004 12:38:06 AM] <Investortrader> Click on Edit up top
[4/15/2004 12:38:17 AM] <toptrader99> aha
[4/15/2004 12:38:19 AM] <toptrader99> thanx
[4/15/2004 12:38:28 AM] <Investortrader> Save as, and call it Investortraders KISS template :)
[4/15/2004 12:38:45 AM] <Investortrader> Keep It Simple Somehow ;)
[4/15/2004 12:38:48 AM] <Bobtrader> TY IT, really good n helpful but gotta go
[4/15/2004 12:38:56 AM] <Investortrader> Welcome Bobtrader :)
[4/15/2004 12:39:19 AM] <Investortrader> So I'd use a bit under todays low for a stop if I could get in on a pb
[4/15/2004 12:39:52 AM] <Investortrader> If it didn't pb and started to run, I might use a bit under tomorrow open for a stop, so no nasty reversals
[4/15/2004 12:40:02 AM] <Investortrader> At least for tomorrow
[4/15/2004 12:40:11 AM] <Investortrader> Gotta look at your charts every day
[4/15/2004 12:40:36 AM] <Investortrader> And make any adjustments necessary in your strategy
[4/15/2004 12:40:54 AM] <Investortrader> On to ADSXD
[4/15/2004 12:41:49 AM] <Investortrader> This one is tough, had a nice vol BO, but couldn't hold over the 50sma and is closing lower than where it opens
[4/15/2004 12:42:09 AM] <Investortrader> First test of the 50sma usually fails
[4/15/2004 12:42:28 AM] <Investortrader> Probably pb here to the middle BB, maybe fill the gap
[4/15/2004 12:42:39 AM] <Investortrader> Both are right in around the same area
[4/15/2004 12:43:21 AM] <toptrader99> do you use these charts with 5 minute periods too ?
[4/15/2004 12:43:39 AM] <Kuf> man you guys are die hards
[4/15/2004 12:43:40 AM] <Investortrader> Sometimes I do toptrader
[4/15/2004 12:43:47 AM] <Investortrader> Hey there kuf :)

ClubHome

[4/15/2004 12:44:17 AM] <Kuf> I hope you're either on the west coast, in hawaii or in japan, it's late!

[4/15/2004 12:44:26 AM] <toptrader99> NYC here

[4/15/2004 12:44:29 AM] <Investortrader> Arizona

[4/15/2004 12:44:42 AM] <Kuf> =o

[4/15/2004 12:44:58 AM] <Investortrader> Just finishing up my chart class ...

[4/15/2004 12:45:07 AM] <Investortrader> Any questions on ADSXD?

[4/15/2004 12:45:32 AM] <Investortrader> On to TWAV

[4/15/2004 12:45:40 AM] <toptrader99> i like TWAV, good one

[4/15/2004 12:45:58 AM] <Investortrader> Looks like it's bottoming here, nice vol BO today

[4/15/2004 12:46:22 AM] <Investortrader> OBV looks good on it here also

[4/15/2004 12:46:35 AM] <Investortrader> Got some overhead resistance fairly close

[4/15/2004 12:46:44 AM] <Investortrader> With the 50sma and the upper BB about to converge

[4/15/2004 12:47:02 AM] <Investortrader> Right around the peak between the two btms too

[4/15/2004 12:48:13 AM] <Investortrader> If it can clear that should run close to 5 for a first target

[4/15/2004 12:48:39 AM] <toptrader99> that was my gues, \$5

[4/15/2004 12:48:42 AM] <Investortrader> Might get a slight pause around the 4.75 3/1 high

[4/15/2004 12:48:54 AM] <Investortrader> Probably not much of one

[4/15/2004 12:49:10 AM] <Investortrader> this one looks good especially once that resistance is cleared

[4/15/2004 12:49:33 AM] <Investortrader> It's so close to it now I would wait to buy it for BTBO over the resistance

[4/15/2004 12:49:59 AM] <Investortrader> Or if we get a low vol pb maybe halfway down todays candle

[4/15/2004 12:50:16 AM] <Investortrader> Any questions on TWAV?

[4/15/2004 12:50:40 AM] <streetwalker> IT, will u have time to review IDNX?

[4/15/2004 12:51:11 AM] <Investortrader> Real quick for ASKJ and then IDNX and that's it

[4/15/2004 12:51:25 AM] <streetwalker> thanx

[4/15/2004 12:52:23 AM] <Investortrader> ASKJ is at a crossroads right here and needs to go up tomorrow in my opinion

[4/15/2004 12:52:51 AM] <Investortrader> Had a nice low vol pb last couple of days, and a better vol up day today

[4/15/2004 12:53:12 AM] <Investortrader> And OBV still looks good on it

[4/15/2004 12:53:33 AM] <Investortrader> But it was riding the upper BB, and has been out of contact too long here, needs to go up on vol

[4/15/2004 12:53:57 AM] <Investortrader> If it doesn't I'd be selling it tomorrow if I owned it

[4/15/2004 12:54:33 AM] <Investortrader> But you all know how ruthless I am on selling when a stock starts to go against me =D

[4/15/2004 12:54:47 AM] <Investortrader> Any questions on ASKJ?

[4/15/2004 12:55:03 AM] <Investortrader> On to IDNX last one

[4/15/2004 12:55:39 AM] <Investortrader> First day we haven't made a higher high and a higher low since the big vol BO

[4/15/2004 12:56:25 AM] <Investortrader> It is having a lower vol pb so far .. and anytime a stock is riding the upper BB, it can always pb to the LR30

[4/15/2004 12:56:39 AM] <Investortrader> Those can be swift pb's though

[4/15/2004 12:56:58 AM] <Investortrader> Depends if you want to try to scalp that or not, I usually don't

[4/15/2004 12:57:31 AM] <Investortrader> First day out of contact with the upper BB,

ClubHome

lower vol pb, still is ok according to my rules

[4/15/2004 12:58:03 AM] <Investortrader> It can drift down next two days to the LR30 and still be ok according to my rules ... as long as it's on lower vol

[4/15/2004 12:58:46 AM] <Investortrader> Really depends on your trading timeframe ... I wouldn't be selling it yet if I was in on the BO but I don't daytrade

[4/15/2004 12:59:15 AM] <Investortrader> Any questions on IDNX?

[4/15/2004 12:59:19 AM] <streetwalker> any concern re: declining vol while price was rising prior to today's pullback?

[4/15/2004 12:59:34 AM] <Investortrader> No

[4/15/2004 12:59:48 AM] <Investortrader> Can't keep up the fever pitch in vol every day, it had a very big BO day

[4/15/2004 12:59:58 AM] <Investortrader> very big vol

[4/15/2004 1:00:26 AM] <bmweyrauch> IT - thanks so much for the extra time and effort you give to us folks here...it's really appreciated

[4/15/2004 1:00:32 AM] <Investortrader> As long as the vol increases again from the pb vol when it goes up, it's fine

[4/15/2004 1:00:32 AM] <streetwalker> ok by me, thanx for help, as usual!

[4/15/2004 1:00:38 AM] <Investortrader> Welcome bmw :)

[4/15/2004 1:00:43 AM] <Investortrader> Welcome streetwalker :)

[4/15/2004 1:01:07 AM] <bravotrader> gn IT and tnx :)

[4/15/2004 1:01:26 AM] <Investortrader> When you see an indicator pop up on my shared chart for a few seconds, it's a mistake, I'm trying to type something and didn't hit enter first so it does some kind of indicator lol

[4/15/2004 1:01:33 AM] <Investortrader> Night bravotrader :)

[4/15/2004 1:01:56 AM] <Investortrader> Time for bed here too, good trading tomorrow everyone! I'm gone *poof*

[4/15/2004 1:02:11 AM] <rsi77> Great stuff IT...thanks

[4/15/2004 1:02:22 AM] <AllWeOwn> ty inv; have a good trip if I dont; talk to you before you go...

[4/15/2004 1:03:23 AM] <TedM> ty IT

[4/15/2004 1:03:25 AM] <croy> IT ... I have been lurking all night at your stuff but felt it was appropriate to breake silence and say thanks

[4/15/2004 1:03:32 AM] <toptrader99> lata all

[4/15/2004 1:04:52 AM] <daniel329> thanks a lot IT

[4/15/2004 1:43:11 AM] <CashMan> Need an opinion on ECGI any one game, ;)

[4/15/2004 1:50:00 AM] <Sharon1555> well vol was beyond the norm!

[4/15/2004 1:50:20 AM] <Sharon1555> have no hint as to why

[4/15/2004 1:51:43 AM] <Sharon1555> hopefully something crosses the wire tomorrow.. if not, just an anomaly

[4/15/2004 1:52:13 AM] <CashMan> I couldn't find out either that is what caught my eye. There is a nice possibility of it maybe going higher. I'm just going to watch it to see what happens. Thanks

[4/15/2004 2:34:56 PM] <StockStalker> Love the way u can get an extension filing done on the phone now... takes minutes....
[4/15/2004 2:35:13 PM] <Luigistock> would hate to do your taxes oz
[4/15/2004 2:35:13 PM] <america> corvette, just stay away from me. i have my own problems.=D
[4/15/2004 2:35:17 PM] <AllWeOwn> put on your tennies and go sit in your vette; sunglasses on etc....
[4/15/2004 2:35:34 PM] <Brooks5> Will they give you a 50 year extension ? lol
[4/15/2004 2:35:36 PM] <corvette68> That will work
[4/15/2004 2:35:53 PM] <AllWeOwn> dont' look over the edge tho; you'll see red
[4/15/2004 2:36:07 PM] <america> only problem with extensions is that you have to pay extra, and usually lots extra.
[4/15/2004 2:36:44 PM] <corvette68> Getting money back, paid too much just like the stocks today :o
[4/15/2004 2:37:49 PM] <ProfitTrader> america, how come? You are suppose to send in your estimated tax by Apr 15, even if you file extension...No penalty if you don't owe more than permitted for penalty calculations...
[4/15/2004 2:37:53 PM] <StockStalker> depends if ur extending the payment or just the paperwork
[4/15/2004 2:38:11 PM] <CFurgie> only pay extra if you dont send money with extension. I do guesstimate of what I owe and send ck w extension
[4/15/2004 2:39:07 PM] <ChuckR> I do mine ahead of time (early).....:8
[4/15/2004 2:39:13 PM] <mac27> can get a penalty if you end up owing more later than you paid as the estimate...had that happen one year
[4/15/2004 2:39:27 PM] <CFurgie> me too. bummer
[4/15/2004 2:39:30 PM] <Luigistock> thats why you make them the "BIG" loan
[4/15/2004 2:40:08 PM] <StockStalker> the longer one holds their own money the better... not sure what being so early is good for unless u are owed a big return and that is not such a good thing actuall.. a free laon to the gov
[4/15/2004 2:40:27 PM] <ProfitTrader> Biggest penalty I ever paid was \$32 - that is because I got lazy justifying quaterly income vs. quaterly taxes...
[4/15/2004 2:40:37 PM] <ChuckR> early= 2 weeks....hehe
[4/15/2004 2:40:41 PM] <america> PT, thought you were talking about cy2003 taxes you owe the irs that r due 4/15/04. if you file for extension on those, you will pay interest at minimum. at least, that's what i've been told. for sending in estimated tax, i don't think you will pay penalty if within certain timeframe.
[4/15/2004 2:40:43 PM] <StockStalker> i paid a 700 penalty one year
[4/15/2004 2:40:46 PM] <Luigistock> xactly oz-
[4/15/2004 2:40:57 PM] <StockStalker> and was happy to do so

[4/15/2004 2:41:39 PM] <StockStalker> i found better ways to utilize it in the interim and paid on the 15th instead of qtrly

[4/15/2004 2:42:13 PM] <StockStalker> very Pikerish to be proud of getting a big return

[4/15/2004 2:42:27 PM] <ProfitTrader> america, you don't pay interest if you pay your taxes by apr 15, even if you file extension. You would pay taxes anyway by Apr 15 if you don't file extension. Like oz. said if you are extending just the paperwork not payment...

[4/15/2004 2:42:43 PM] <corvette68> Wish i could pay \$50,000 in taxes

[4/15/2004 2:43:00 PM] <corvette68> No - make that \$100,000

[4/15/2004 2:44:11 PM] <toptrader99> not

[4/15/2004 2:44:12 PM] <america> PT, you are correct. if you pay your taxes by april 15, you don't pay interest. i never said you did. i said if you filed for extension to pay your taxes, etc....

[4/15/2004 2:44:16 PM] <ProfitTrader> Mkt goes up if you don't pay attention to it and chat instead...

[4/15/2004 2:44:32 PM] <neofighter> then keep chatting

[4/15/2004 2:44:57 PM] <StockStalker> touchy

[4/15/2004 2:45:20 PM] <gabman> I think you have to pay at least 90% of owed money (estimate) to avoid a penalty w/ extension

[4/15/2004 2:45:50 PM] <america> pt, kewl here also honey.B)

[4/15/2004 2:46:09 PM] <ProfitTrader> B)

[4/15/2004 2:47:42 PM] <payck> now you've gone and made me hungry

[4/15/2004 2:47:45 PM] <StockStalker> The penalty is usually 1/2 to 1% of any tax not paid... it is charged each month... up to 25%

[4/15/2004 5:25:59 PM] <toptrader99> sure, anytime

[4/15/2004 5:26:09 PM] <toptrader99> i dont really trade that group, but I watch them

[4/15/2004 5:36:15 PM] <toptrader99> INTC on the hourly chart has an interesting rev H&S followed by a regular (and violated) H&S

[4/15/2004 5:36:35 PM] <toptrader99> altho falling to the bottom of support that prev was resistance

[4/15/2004 5:37:00 PM] <toptrader99> the stoch looks over sold too

[4/15/2004 5:37:10 PM] <toptrader99> can you see my chart ?

[4/15/2004 5:38:09 PM] <BossFan> yes, i see it...updating TCNet now, so hold on

[4/15/2004 5:38:21 PM] <toptrader99> k

[4/15/2004 5:38:49 PM] <toptrader99> 1 thing tho' TSV looks terrible, probably a selloff to wash out weak holders

[4/15/2004 5:40:40 PM] <BossFan> A couple things happened today with INTC...we filled the gap from 4/2 and are now firmly below 50MA. I think we go lower here

[4/15/2004 5:42:22 PM] <lavenderangel> toptrader, can you explain that? if there is a selloff to wash out weak hands, dont' the sellers lose money, too? that confuses me

[4/15/2004 5:42:34 PM] <toptrader99> the short sellers dont

[4/15/2004 5:43:02 PM] <toptrader99> if you look at the chart i have up now, there are 2 trendlines....

[4/15/2004 5:43:14 PM] <lavenderangel> oh. so you're saying big money is shorting the stocks to flush out weak hands

[4/15/2004 5:43:27 PM] <toptrader99> in about a month they will connect at around 25 or so

[4/15/2004 5:43:46 PM] <toptrader99> i never talk about "big \$" or any other "they or them" group

[4/15/2004 5:43:47 PM] <toptrader99> ;-)

[4/15/2004 5:43:55 PM] <lavenderangel> ok

[4/15/2004 5:43:59 PM] <toptrader99> its just something that happens IMHO

[4/15/2004 5:44:09 PM] <toptrader99> "the market" does it

[4/15/2004 5:44:36 PM] <lavenderangel> ok, I'll think of it as th 1000th monkey theory

[4/15/2004 5:44:41 PM] <toptrader99> and even tho my name is toptrader, it doesnt make me any wiser than anyone else

[4/15/2004 5:45:07 PM] <lavenderangel> I understand but I've liked the analysis from you that I've seen so far.

[4/15/2004 5:45:24 PM] <toptrader99> I find that quite often, trendlines are a good way to buy and sell off of, altho it can be quite painful when the stocks reach those areas

[4/15/2004 5:45:31 PM] <lavenderangel> it's logical and some of seems to jive with some instincts I have

[4/15/2004 5:46:23 PM] <toptrader99> I actually have been on the sidelines the past few days, just wary of the market and earnings season, it almost seems like a "surreal season" for earnings
[4/15/2004 5:46:50 PM] <toptrader99> no clear cut direction, and many surprises and stocks moving in varying ways as a result
[4/15/2004 5:47:01 PM] <lavenderangel> sounds like a good idea. and surreal is a good word for it

[4/15/2004 7:16:18 PM] <honus99> Roly, 5k a day, you were making 10k last month.;)

[4/15/2004 7:16:48 PM] <honus99> 1k a day will keep the bill collectors away

[4/15/2004 7:17:02 PM] <AlanD> Roly, only 5K a day? Your losing your touch.

[4/15/2004 7:17:09 PM] <AlanD> ;)

[4/15/2004 7:17:24 PM] <AlanD> It's all about percentages.

[4/15/2004 7:17:31 PM] <AlanD> and probability

[4/15/2004 7:18:12 PM] <honus99> well off to the gym to teach the youngsters how to play hoops, see ya all later.

[4/15/2004 7:18:18 PM] <Roly> well last month was very good, but wait for next week, I think we explode to the upside, remeber, I am a long term player, about 2-10 minutes!

[4/15/2004 7:19:19 PM] <AlanD> So your bullish Roly. I think upside is possible but my numbers still pointing down intermediate term.

[4/15/2004 7:19:24 PM] <imjim> Welllll ! I think that if you can just manage 5% a day that you double your money every 20 days.

[4/15/2004 7:20:02 PM] <Roly> just watch, I will post, you guys are sharp!

[4/15/2004 7:20:13 PM] <AlanD> If 5% a day on total equity were possible, I think we would all be in a different place.

[4/15/2004 7:20:48 PM] <honus99> if I made 5% on my account every day, I would not be here right now.

[4/15/2004 7:20:50 PM] <Roly> not possible, just take what the market gives you and GET OUT!

[4/15/2004 7:21:31 PM] <AlanD> Agreed Roly, Just figuring out how much the market is willing to give is the tricky part.

[4/15/2004 7:22:18 PM] <Noname> agreed Roly

[4/15/2004 7:22:31 PM] <Roly> I never buy over 10k on the initial purchase, but I have been known to double down, for the run

[4/15/2004 7:22:52 PM] <imjim> OK If 5% a day isn't possible how about 5% a week.
:8

[4/15/2004 7:23:30 PM] <AlanD> 5%/week is possible if the losses are minimalized. Being consistent is the tricky part.

[4/15/2004 7:23:43 PM] <AlanD> Everyone has losses, just some more than others.

[4/15/2004 7:23:49 PM] <Roly> Then you have to do the toughest part, as I always say, SELL INTO STRENGTH!!!!!!!!!!!!!!

[4/15/2004 7:24:29 PM] <imjim> Roly -- Thats the hardest part for me to learn.

[4/15/2004 7:24:48 PM] <Roly> You see that ohrase often in my room!

[4/15/2004 7:24:55 PM] <Roly> phrase

[4/15/2004 7:25:11 PM] <AlanD> Yes selling into strength is a good way to lock in a profit. I think what gets some folks is that they expect to ride out a pullback that ends up being more than that.

[4/15/2004 7:25:58 PM] <AlanD> I use fib clusters to get me out intraday if I'm looking at selling into strength.

[4/15/2004 7:26:15 PM] <imjim> AlanD -- Thats the case for more often than I'd like to admit.

[4/15/2004 7:26:21 PM] <Roly> that is the problem, you just have to SCALP, and get out!

[4/15/2004 7:26:47 PM] <AlanD> Nothing wrong with scalping so long as you time it right.

[4/15/2004 7:27:05 PM] <Roly> =D

[4/15/2004 7:27:30 PM] <AlanD> Roly, do you use a separate scanner for your intraday scalps?

[4/15/2004 7:27:35 PM] <Roly> look at this chart, I told everyone to SELL!!!!!!!!!!!!!!!!!!!!!!

[4/15/2004 7:28:40 PM] <Roly> We will buy back next week and make a small fortune!

ClubHome

[4/15/2004 7:28:52 PM] <AlanD> Looking at your chart Roly, I had an EWA sell signal at 36.40.

[4/15/2004 7:29:48 PM] <Roly> I have to use another program for ticks, TCNET is not there yet! But they tell me they are working on it!

[4/15/2004 7:30:06 PM] <AlanD> Fib cluster sell occurred earlier at the peak near 36.47.

[4/15/2004 7:31:05 PM] <AlanD> I use Elliottwave for price targets and automated fibonacci cluster signals for exact resistance within those target areas. Works quite well most of the time.

[4/15/2004 7:31:15 PM] <Roly> but see what I am saying about never staying around to long

[4/15/2004 7:31:29 PM] <AlanD> I generally only use it for the NDX though I do for stocks on occasion.

[4/15/2004 7:32:00 PM] <AlanD> Yes true, but it would have been nearly impossible for anyone to call that big drop in the last minute.

[4/15/2004 7:33:06 PM] <Roly> Option expiration, they will keep the rule the same 90% of all options expire worthless!

[4/15/2004 7:33:56 PM] <Roly> Trust me, it works!, That is why we are publishing an E-Book!

[4/15/2004 7:34:41 PM] <AlanD> Ok, so you do part of your trading around expected movements with optionable stocks? I believe you as I have not traded around that concept.

[4/15/2004 7:35:01 PM] <AlanD> When is your E-book due out?

[4/15/2004 7:35:32 PM] <Roly> I have been telling everyone for days that the Market/qqq is going to confirm 36

[4/15/2004 7:36:18 PM] <Roly> I TRADE NO OPTIONS, I JUST SCALP THE QQQ

[4/15/2004 7:36:19 PM] <AlanD> I agree. I caught the pivot point this morning on the NDX at 1450. I stated that in the chatroom I hang out in.

[4/15/2004 7:37:09 PM] <babue> Hi AlanD Did you mention a while ago that it was Q-charts that does the automated fib clusters? Is that on all different time frames or just daily?

[4/15/2004 7:37:23 PM] <AlanD> Used Fibs clusters and EWA. 1450 was the completion of an EW Ending Diagonal which has a 96% probability of being correct when forecasted. Fib clusters convergence just confirmed it.

[4/15/2004 7:37:27 PM] <Roly> we might see 35.50, but you can still make 500 a day!

[4/15/2004 7:37:50 PM] <AlanD> Hello Babue, Yes any timeframe. Weekly signals are extremely powerful.

[4/15/2004 7:38:28 PM] <Roly> look at mine, we are going higher!

[4/15/2004 7:39:06 PM] <babue> I am using GET but only get end of day for the time frames are the hourly or shorter time frames very worth while to have?

[4/15/2004 7:39:10 PM] <AlanD> I don't have quite the bullishness you have on the QQQ's for next week but cycles do point to a low in second half of April so it may just be it.

[4/15/2004 7:40:14 PM] <Roly> but, I cannot afford to put 360,000 on the line for to long, or 720,000 for that matter, get's really close to my Daytrading Power!

[4/15/2004 7:41:27 PM] <AlanD> Babue, when I daytrade high momentum players like IPIX, MACE or MAGS, 1min Fib cluster convergences are extremely important. I always find it interesting when a fast moving stock hits one of those points and you see the tick by tick activity ask activity comes to a dead stop. Its almost screaming sell.

[4/15/2004 7:42:27 PM] <babue> Thanks for the insight

[4/15/2004 7:42:43 PM] <Roly> Once we are safely over 39, I will scalp individual issues as I used to! You guys are good at that!

[4/15/2004 7:42:43 PM] <AlanD> I hear you Roly. Its hard to keep large amounts on

the table. I almost seems like there is an inverse relationship between the amount of money put on the table and the amount of time its left there.

[4/15/2004 7:43:27 PM] <Roly> got to go, hope I have helped!

[4/15/2004 7:43:29 PM] <AlanD> 5 min fib convergences only confirm what the 1 min is telling me.

[4/15/2004 7:43:45 PM] <AlanD> Thanks Roly, nice talking with you.

[4/15/2004 7:44:46 PM] <ces> AlanD do you use Qcharts or

[4/15/2004 7:45:02 PM] <AlanD> Yes CES.

[4/15/2004 7:45:23 PM] <ces> thanks

[4/15/2004 7:48:53 PM] <YahooMike> Yeh, I took a hit today because I didn't exit stuff early this morning when the market turned and rode the pony off the cliff

[4/15/2004 7:51:00 PM] <enzo> good evenig hotto club

[4/15/2004 7:51:36 PM] <AlanD> CES, I use AutoFibs tools and the parabolic tool in Qcharts. I find the Autofibs tools to be extremely accurate as it as a built in table function that draws lines in realtime, automatically and in any timeframe to highly probably pivots points just as they get ready to form. Not after the fact. It amazed me in the beginning when I first used the tool at how all the lines representing fib values off different past highs and lows were all pointing to a specific price bar. Then at that point, the trend would change and head in the other direction. Using this tool as well as using EWA3 to get forecasted target prices is as close to the Holy Grail as I'm going to get. Its not perfect and does take time to learn how to use the two together but once you've got that down, it really takes the guess work out of where you think an index or stock is going to go.

[4/15/2004 7:52:22 PM] <AlanD> Pardon the grammar typos. I was typing fast.

[4/15/2004 7:53:08 PM] <babue> what ever you say and how ever you say it is appreciated AlanD

[4/15/2004 7:53:15 PM] <enzo> hi alan thanks for the info i was looking at q chart also

[4/15/2004 7:54:54 PM] <ces> thanks for the info AlanD

[4/15/2004 7:55:09 PM] <AlanD> Qcharts is also good for the hotlists it produces in realtime. Lets you zoom in instantly where the action is. As far as reliability goes, it is nearly as good as Esignal but easier to use, IMO. Your also not limited with the number of tickers you can use like Esignal is. And yes, I also have Esignal.

[4/15/2004 7:55:56 PM] <AlanD> Gotta run guys. Going to a Padres baseball game tonight.
