[1/2/2004 2:14:01 PM] [Mikon] Sorry to burst you UNIX and LINUX lovers bubble, but when I consultined for Sun Microsystems a couple of years back, their internal UNIX system crashed an average of twice a day for over three months. [1/2/2004 3:32:09 PM] [Mulrod] thx, male...
[1/2/2004 3:32:23 PM] [rsi77] NGEN....I thought I was smart when I sold....Oh well
[1/2/2004 3:32:29 PM] [Brooks5] ALTI here we go
[1/2/2004 3:32:38 PM] [malealltrash] Rsi never look back
[1/2/2004 3:32:40 PM] [REB2186] Hotto, It often appears to me that some traders are buying into a stock because it is going up in price. Not because it has an especially promising pattern. On the other hand, no matter what the pattern used to be, if it is now going up, that is a breakout and so qualifies for purchasing. So one could just watch for stocks that are moving up. Is this argument correct?
[1/2/2004 3:33:11 PM] [atexpal] NGEN...sold at 8.59...bot back higher...couldn't live without it
[1/2/2004 3:33:58 PM] [malealltrash] I can't live without my wife ! she has the cash

[1/2/2004 3:34:27 PM] [SeattleSteve] Nano stocks back on the upswing
[1/2/2004 3:34:45 PM] [rsi77] REB, don't think so...some patterns have better % follow through...a stock going up on low volume after a high volume decline...more often will go back down again (not always)
[1/2/2004 3:34:49 PM] [ProfitTrader] Hotto, FCI - any possibility of rebound (up) towards close and/or tomorrow morning?
[1/2/2004 3:35:22 PM] [kellam] AH good industry,pb to ma20 daily, worth watching IMO

[1/2/2004 4:14:45 PM] [hotto] We have this idea... of a website all Traders can afford.. But.. too low right now..

[1/2/2004 4:15:10 PM] [hotto] yw gary.:)

[1/2/2004 4:15:44 PM] [jasp] Naples, - poor service - food not exceptional - tours overpriced - they don't know the difference between cattle and people.

[1/2/2004 4:16:02 PM] [hotto] toby.. good work..

[1/2/2004 4:16:20 PM] [Luigistock] From Insdiars moves in case anyone else wants to beat the Linux thing to death with me : You'd think investors would have learned their lesson. With great fanfare Wall Street unveiled many ways to play the "open source" revolution in the late 90s, Red Hat being one. Surely one of these companies would crush Microsoft. Few asked how they could profit enough to rationalize lofty valuations selling software that is essentially free. Investors lost billions, while crafty insiders sold hundreds of millions in company stock before prices collapsed. This year Red Hat shares are up sharply as speculation crazed investors are impressed by signs of revenue and profit growth at the company. While the company certainly has a future, it may not be one with a \$3.3 billion market cap. Last week EVP/Chief Operations Officer Timothy Buckley exercised 1.87M stock options with a strike price of about \$.80 cents a share, which he promptly sold at over \$18 per share, netting about \$33M dollars, or about 8

[1/2/2004 4:16:25 PM] [napleschip] also heard norwegian is not the best..we live and learn.

[1/2/2004 4:16:39 PM] [cobralso] Is that before or after pay pal works?

[1/2/2004 4:16:50 PM] [hotto] tp.....D:D

[1/2/2004 4:16:59 PM] [ken2k] tours typically overpriced... operators of tours have to price to pay cruise lines approx 50% commission

[1/2/2004 4:17:14 PM] [w2jc] i'm alive still... only up for a little while tho... re Norwegian ... worst part is that they make the tips automatic as part of your charge, so the crew doesnt give a dam about service

[1/2/2004 4:17:49 PM] [Luigistock]times the companies profit for the last quarter. Wall Street is scrambling to upgrade Red Hat shares, but insiders are downgrading like it's 2000 again.

[1/2/2004 4:17:57 PM] [turningpoint] Have though about it Luigi?...

[1/2/2004 4:18:32 PM] [Luigistock] once or twice

[1/2/2004 6:18:09 PM] [hotto] bye for now
[1/2/2004 6:18:17 PM] [Investortrader] See ya Hotto!
[1/2/2004 6:18:57 PM] [Investortrader] This one had a nice long base
[1/2/2004 6:19:30 PM] [Investortrader] In the decline in mid Nov ... it had a washout day on 11/17
[1/2/2004 6:20:10 PM] [Investortrader] And came down to test those lows on lower volume on 11/20 and 11/21
[1/2/2004 6:20:45 PM] [Investortrader] The run-up after that was on a bit low volume and then settled down into this nice base it formed since then
[1/2/2004 6:21:38 PM] [Investortrader] The test on 11/20 and 21 was at 3.50 and 3.51 ...
[1/2/2004 6:22:02 PM] [Investortrader] Then in the latter part of this new base it also came down to test those prices
[1/2/2004 6:22:31 PM] [Investortrader] 12/22 and 12/23 lows were 3.54
[1/2/2004 6:22:53 PM] [Investortrader] Then again on 12/29 and 12/30 forming a small dbl btm
[1/2/2004 6:23:19 PM] [Investortrader] 3.55 and 3.53 were the lows on those two days
[1/2/2004 6:23:59 PM] [Investortrader] I don't know why my chart keeps flipping to A ... ignore that
[1/2/2004 6:24:45 PM] [Investortrader] Then on 12/31 it had a BTBO on a bit increased volume ... we're still in holiday weeks so weaker volume on lots of stocks
[1/2/2004 6:25:13 PM] [Investortrader] So I discount the weaker volume and just look at the increased volume over the normal holiday sessions
[1/2/2004 6:25:50 PM] [Investortrader] Yesterday I discussed NEXM a bit with someone, and liked what I saw ...
[1/2/2004 6:26:07 PM] [Investortrader] Switching to the 10 minute chart
[1/2/2004 6:27:45 PM] [Investortrader] It had a big sell-off quickly in the morning today, maybe a lot of people took profits on the open
[1/2/2004 6:28:10 PM] [Investortrader] I had an order in and got filled at 3.81, posted this morning
[1/2/2004 6:28:55 PM] [Investortrader] I am not worried about the large volume sell-off at the open as I think it was just people selling to take profits this year instead of last year
[1/2/2004 6:29:39 PM] [Investortrader] I need to talk to tech support and see why my chart keeps changing to A lol
[1/2/2004 6:30:04 PM] [HOTTO] Photogram has joined the club. Please welcome your new member.

[1/2/2004 6:30:24 PM] [Investortrader] during the day I saw a large buyer at 3.75, you'll notice mid-day it came down to around there and held before moving back up end of day

[1/2/2004 6:31:07 PM] [Investortrader] And it closed right at the high

[1/2/2004 6:32:04 PM] [Investortrader] I liked this one because of the big BTBO on Wed, and like it more that it tested the lower BB on the daily and closed up near the high ... that big buyer started to move up his price near the end of the day to get some shares I saw

[1/2/2004 6:32:28 PM] [Investortrader] When I see a breakout, I always try to buy a pullback the next morning, worked well on this one today

[1/2/2004 6:33:38 PM] [rensop] It question

[1/2/2004 6:33:45 PM] [Investortrader] Yes?

[1/2/2004 6:34:28 PM] [rensop] How did you pick your by @3.81 & how did you know it was one big buyer

[1/2/2004 6:34:38 PM] [Investortrader] Volume should come back in to normal next week as the traders all come back from the holidays

[1/2/2004 6:35:45 PM] [Investortrader] Looking at the daily, from 12/22 on it couldn't get above 3.80

[1/2/2004 6:36:07 PM] [Investortrader] Until it broke out on 12/31

[1/2/2004 6:36:23 PM] [Investortrader] The range on 12/31 was 3.61 to 4

[1/2/2004 6:36:38 PM] [Investortrader] So I looked for it to pullback halfway back to 3.81

[1/2/2004 6:36:52 PM] [Investortrader] Half of the 12/31 range

[1/2/2004 6:37:30 PM] [Investortrader] It ended up pulling back more, but many times that's where the next days pullback stops, with a halfway retracement

[1/2/2004 6:38:03 PM] [Investortrader] And if you weren't really quick (I already had an order in) you didn't get those lower prices

[1/2/2004 6:38:21 PM] [Investortrader] I placed my order about 2 minutes before the open as I was running late this morning

[1/2/2004 6:38:36 PM] [Investortrader] As for the big buyer, if you have level II quotes you could see him

[1/2/2004 6:39:00 PM] [rensop] OK, thank you

[1/2/2004 6:39:20 PM] [Investortrader] It did give another chance mid-day at the 3.80 level, but sometimes stocks don't give you a second chance, I was happy with where I got it

[1/2/2004 6:39:22 PM] [Investortrader] Welcome :)

[1/2/2004 6:40:15 PM] [Investortrader] With volume coming back to normal next week and it closing at the highs today, I expect it to push through the upper BB and at least

challenge the 50sma

[1/2/2004 6:40:44 PM] [Investortrader] It pushed thru the 50sma in early Dec but got turned right back

[1/2/2004 6:41:30 PM] [Investortrader] Second time might be a better chance, I'll be wathcing and ready to take some profits if it doesn't, but I like this chart set-up here

[1/2/2004 6:42:15 PM] [Investortrader] The 50sma looks to be right around 4.20, maybe a few cents less by tomorrow

[1/2/2004 6:43:13 PM] [Investortrader] We'll find out if it only hesitates there or gets turned back again, I'm expecting only hesitation with the increased volume, and the good chart ... but I have a plan for both

[1/2/2004 6:43:40 PM] [Investortrader] Next target would be the 4.83 high on 12/1

[1/2/2004 6:44:19 PM] [Investortrader] Notice that corresponds well with the 11/5, 11/6, and 11/7 lows

[1/2/2004 6:44:45 PM] [Investortrader] Those were 4.84, 4.83, and 4.85

[1/2/2004 6:45:15 PM] [Investortrader] I will take some profits there at least, if it gets there

[1/2/2004 6:45:32 PM] [Investortrader] Should be easy once it breaks thru the 50sma

[1/2/2004 6:45:56 PM] [Investortrader] I'll probably be adding on a break up thru the 50sma also

[1/2/2004 6:46:58 PM] [Investortrader] The minor support in early nov around the 4.83 level became resistance on 12/1, which is why I expect that to be harder to get thru and will take profits then

[1/2/2004 6:47:24 PM] [Investortrader] Any other questions on NEXM before I move on?

[1/2/2004 6:47:42 PM] [rsi77] Are you taking requests for other stocks?

[1/2/2004 6:47:54 PM] [rensop] I thk I got it all ok

[1/2/2004 6:47:55 PM] [Investortrader] Yes rsi, as soon as I cover my other purchase today :)

[1/2/2004 6:48:06 PM] [Investortrader] Which was .. BBA

[1/2/2004 6:48:15 PM] [rsi77] ...listening...

[1/2/2004 6:48:41 PM] [Investortrader] This one has fallen pretty far since early Nov

[1/2/2004 6:49:02 PM] [Investortrader] And had a couple gap down days in Nov

[1/2/2004 6:49:22 PM] [Investortrader] Where it tried to base, but then fell more

[1/2/2004 6:49:41 PM] [Investortrader] Those are called "ledges"

[1/2/2004 6:49:58 PM] [Investortrader] You fall off a ledge, and the price did just that (thus the name for them)

[1/2/2004 6:50:26 PM] [Investortrader] The late Nov to early Dec ledge, notice how OBV was reacting there

ClubHome

[1/2/2004 6:50:40 PM] [Investortrader] Price was going sideways, while OBV deteriorated

[1/2/2004 6:50:51 PM] [Investortrader] Not a good sign

[1/2/2004 6:50:57 PM] [Investortrader] And the price continued down

[1/2/2004 6:51:29 PM] [Investortrader] Rode the lower BB a few days, then started basing, at that time you don't know yet if it's a base or another ledge

[1/2/2004 6:52:05 PM] [Investortrader] The ledge in late Nov the OBV was falling and tagged the lower BB

[1/2/2004 6:52:47 PM] [Investortrader] Now in early-mid Dec starting 12/10, the OBV stopped falling

[1/2/2004 6:52:58 PM] [Investortrader] And didn't tag the lower BB again

[1/2/2004 6:53:23 PM] [Investortrader] Price fell a bit more into 12/18 while the OBV held

[1/2/2004 6:53:58 PM] [Investortrader] On 12/18, important day, price made a new low on bigger volume but came back nicely and OBV started to rise

[1/2/2004 6:54:38 PM] [Investortrader] Then the holiday weeks with low volume and price range dried up and went sideways, with OBV still holding at the higher levels

[1/2/2004 6:55:16 PM] [Investortrader] 12/30 we had another BTBO on the price and OBV went above the middle BB, that got my interest

[1/2/2004 6:56:08 PM] [Investortrader] the price action on 12/31 told me it would pullback a bit more most likely today

[1/2/2004 6:56:28 PM] [Investortrader] See how it tried to go up, but came back down that day, but it was a small range

[1/2/2004 6:56:38 PM] [Investortrader] So I had it on my watchlist for today

[1/2/2004 6:57:15 PM] [Investortrader] Today it did fall more, but on lower volume than 12/31 .. low volume pullbacks are usually good

[1/2/2004 6:57:42 PM] [Investortrader] I may be a bit early on this one as it may base a bit more here

[1/2/2004 6:57:53 PM] [Investortrader] But it may not, so I wanted in

[1/2/2004 6:58:20 PM] [Fern] on the hourly chart it is just about to touch ma50

[1/2/2004 6:58:43 PM] [Investortrader] Good point Fern, it may touch that and bounce back up

[1/2/2004 6:58:53 PM] [Investortrader] To start the leg up

[1/2/2004 6:59:00 PM] [Investortrader] That I am looking for

[1/2/2004 6:59:21 PM] [Investortrader] Notice on 12/26 and 12/29, the highs those days are 7.95

[1/2/2004 6:59:42 PM] [Investortrader] That is the high price in the recent base

[1/2/2004 6:59:52 PM] [Investortrader] Today, the low is 7.95

ClubHome

[1/2/2004 7:00:29 PM] [Fern] at what level did you buy
[1/2/2004 7:00:57 PM] [Investortrader] I switched to the hourly to see that 50sma, the lower BB is converging with it, so more price points for support there, along with the base top price
[1/2/2004 7:01:33 PM] [Investortrader] I put in an order with less than ten minutes to go in the day when I saw a big buyer at 7.97, I put it just in front of him at 7.98
[1/2/2004 7:02:00 PM] [Dwaine] Question IT, where would you place a stop loss on this?
[1/2/2004 7:02:04 PM] [Investortrader] Didn't post the buy as "officially" I only got a partial fill
[1/2/2004 7:02:20 PM] [acmetrader] Many times big buyers are hidden on Level II..what did you see that told you he was there?
[1/2/2004 7:02:21 PM] [HOTTO] Etap has joined the club. Please welcome your new member.
[1/2/2004 7:02:52 PM] [Investortrader] But plenty of shares crossed the tape at 7.98 after my partial fill, so I had to call broker as soon as market closed telling them ... I think I am due a bigger fill on this
[1/2/2004 7:03:44 PM] [Investortrader] I'll get to your question in a second Dwaine ... acme, that is true, but I could see someone with over a 10,000 share buy order in at 7.97 this time
[1/2/2004 7:03:58 PM] [Investortrader] So I snuck in ahead of him ;)
[1/2/2004 7:04:50 PM] [acmetrader] oh yeah, nyse...easier to see that too
[1/2/2004 7:04:59 PM] [Investortrader] For my stop, I'm going a few cents under the low of 12/30, the BTBO day
[1/2/2004 7:05:16 PM] [Investortrader] That low is 7.81
[1/2/2004 7:06:07 PM] [Investortrader] Also with the convergence of the 50sma and the lower BB on the hourly up around 7.90, I think that should be enough to go under the BTBO day's low
[1/2/2004 7:06:41 PM] [Investortrader] If that low fails, then it isn't a real breakout, and means at least more basing is needed, so may as well put the money to use somewhere else
[1/2/2004 7:07:28 PM] [Investortrader] So I'm looking at around a 3% loss if I get taken out, quite manageable ... because I bought it near support
[1/2/2004 7:07:29 PM] [Dwaine] with 50sma at around 10 looks like good risk/reward
[1/2/2004 7:08:11 PM] [Investortrader] Good point Dwaine, though there are scalp points before that
[1/2/2004 7:08:19 PM] [Investortrader] It does have plenty of headroom to run
[1/2/2004 7:08:36 PM] [acmetrader] Does it concern you what made it drop early

ClubHome

December?

[1/2/2004 7:09:20 PM] [Fern] all retailers dropped after turkey day

[1/2/2004 7:09:32 PM] [Investortrader] No, because it is Dec, could be early tax loss selling after those two gaps down, it was a very weak looking chart then

[1/2/2004 7:09:54 PM] [Investortrader] Good observation Fern, lots of retailers fell then

[1/2/2004 7:10:46 PM] [Investortrader] My first scalp target is around 8.50-60, the upper BB will be there soon

[1/2/2004 7:11:20 PM] [Investortrader] And around there is the low on 12/5, the small range on 12/8, and the high on 12/9

[1/2/2004 7:11:49 PM] [Investortrader] With good volume I may not scalp any, always watch the volume as resistance levels are approached

[1/2/2004 7:12:08 PM] [Investortrader] But the 50sma I will sell all if it gets up there

[1/2/2004 7:12:33 PM] [Investortrader] First attempt at the 50sma after a decline is usually turned back

[1/2/2004 7:13:05 PM] [Investortrader] At that point I'll decide whether to get back in on the pullback off the 50sma, or move on to another stock

[1/2/2004 7:13:06 PM] [Fern] would you go short then

[1/2/2004 7:13:38 PM] [Investortrader] No, because in my view it would be a counter-trend move, the trend would be up, and I won't short a move against the trend

[1/2/2004 7:13:53 PM] [Investortrader] Too much risk with not enough reward

[1/2/2004 7:14:14 PM] [Aktony] What kind of volume do you look for when deciding whether or not to scalp?

[1/2/2004 7:14:55 PM] [Investortrader] Aktony, if I see a huge volume day that doesn't get thru the resistance, it could be a turning point, so huge volume would get me out

[1/2/2004 7:15:21 PM] [Investortrader] Sometimes lots of volume is good, sometimes it's bad, depends on where on the chart it shows up and how price reacts to it

[1/2/2004 7:15:54 PM] [Investortrader] If it's a small range on huge volume then, another reason to get out, that shows sellers are taking charge

[1/2/2004 7:16:25 PM] [Investortrader] I can watch all day, so I can see if the volume is the bid being hit by sellers or the ask being hit by buyers, another clue

[1/2/2004 7:17:23 PM] [Investortrader] And when a stock I own nears resistance, since I don't trade that many positions, I watch it like a hawk

[1/2/2004 7:17:54 PM] [Alibi] Anyone know of a scan for nanotech stocks?

[1/2/2004 7:18:39 PM] [acmetrader] I have a list built over a couple of years, when done with IT chat will post it here

[1/2/2004 7:18:41 PM] [Investortrader] Might be able to google that Alibi, or search a

ClubHome

database somewhere else on the net for nanotech

[1/2/2004 7:18:59 PM] [Investortrader] Even better, acme has a list! :)

[1/2/2004 7:19:26 PM] [Fern] bba still could be purchased either pre market or when it opens

[1/2/2004 7:19:28 PM] [Investortrader] I love this group for how helpful everyone is!

[1/2/2004 7:19:45 PM] [Investortrader] Yes Fern, someone was trying to buy it at 7.98 in AH today

[1/2/2004 7:19:45 PM] [rsi77] Maybe acme could post his list....though I'm finding plenty of action with just the few Nanotechs I know.

[1/2/2004 7:19:47 PM] [Alibi] yep

[1/2/2004 7:20:06 PM] [mstrader] so right.

[1/2/2004 7:21:03 PM] [rsi77] NGEN hitting \$12 AH

[1/2/2004 7:21:11 PM] [Investortrader] Be careful with any of them that have run up already

[1/2/2004 7:21:54 PM] [Investortrader] Any other questions on BBA?

[1/2/2004 7:22:49 PM] [Aktony] no

[1/2/2004 7:23:01 PM] [Investortrader] Ok, the floor is open for other stocks you want me to look at :)

[1/2/2004 7:23:05 PM] [acmetrader] NANX, TMO, TGAL, NANO, NABI, SKYE, TINY, FLML, NVEC, ALTI, NGEN, ACO all nano stocks

[1/2/2004 7:23:37 PM] [acmetrader] IVAN, could you look at it please?

[1/2/2004 7:23:49 PM] [lavenderangel] JUST JOined. is BBA bollinger bank analysis?

[1/2/2004 7:23:51 PM] [Investortrader] IVAN ... (I have never played IVAN)

[1/2/2004 7:23:55 PM] [rsi77] OK, ALTI....do you ever play a "running" stock that isn't near support if it's just done a BTBO out of a substantial base?

[1/2/2004 7:24:00 PM] [lavenderangel] band, sorry

[1/2/2004 7:24:07 PM] [Investortrader] Hi lavender :) BBA is one of the stocks I bought today

[1/2/2004 7:24:16 PM] [lavenderangel] oh, ok, thanks

[1/2/2004 7:24:54 PM] [acmetrader] .

[1/2/2004 7:25:02 PM] [rsi77] Thanks for the list acme

[1/2/2004 7:25:31 PM] [Alibi] Yes - I'e waited for a PB on NGEN while it continues to explode

[1/2/2004 7:25:31 PM] [Investortrader] Got dumped when I changed to IVAN ...

[1/2/2004 7:25:39 PM] [acmetrader] it will do that to you

[1/2/2004 7:25:45 PM] [rensop] thx acme

[1/2/2004 7:25:55 PM] [Alibi] Thanx, acme!

[1/2/2004 7:26:05 PM] [whalestail] Investortrader would you share your settings on

ClubHome

you charts. thanks.

[1/2/2004 7:26:06 PM] [acmetrader] sure, no one else needs to thank me...just let IT talk..;-0

[1/2/2004 7:26:23 PM] [Investortrader] IVAN looks good here, BTBO on increased volume today

[1/2/2004 7:26:56 PM] [Investortrader] The middle BB and the LR30 have been holding it as support the last two weeks also

[1/2/2004 7:27:29 PM] [Investortrader] Notice however, the upper BB and the 50sma have converged, and it's just overhead

[1/2/2004 7:27:38 PM] [HOTTO] Saroj has posted a new topic to General Discussion: Nanotechnology stocks

[1/2/2004 7:28:07 PM] [Investortrader] Unless you want to try daytrading it, I would wait for it to break over those

[1/2/2004 7:28:27 PM] [Investortrader] Another good volume day on Monday should do it,

[1/2/2004 7:28:54 PM] [acmetrader] there is also a downtrend line from the top in November that it has to break through, unlike BBA which has already done that

[1/2/2004 7:29:05 PM] [Investortrader] The 12/22 high is 4.55, right around that level also

[1/2/2004 7:29:56 PM] [Investortrader] I just drew that line in acme, good point .. and it's also right around that level!

[1/2/2004 7:30:04 PM] [acmetrader] How much weight do you put into the fact that the OBV still held the uptrend MA during the dip?

[1/2/2004 7:30:40 PM] [Investortrader] I use OBV heavily, so in my work it's always important

[1/2/2004 7:30:46 PM] [acmetrader] i.e it is still trending up

[1/2/2004 7:31:04 PM] [Investortrader] 12/10 was a key day in IVAN, very good volume as it reversed back up

[1/2/2004 7:31:47 PM] [Investortrader] That day and the next popped the OBV back over the middle BB and the 50sma on the OBV

[1/2/2004 7:32:25 PM] [acmetrader] the BBs are pinched as well, look like speculators speculating again it will break all that resistance?

[1/2/2004 7:32:41 PM] [Investortrader] This one does look ready to go again, good volume on Mon should clear that resistance

[1/2/2004 7:33:25 PM] [Investortrader] Pinched BB's, means an upcoming move, but in and of itself doesn't say which direction for that move ... the other indicators here look like the move will be up

[1/2/2004 7:35:05 PM] [acmetrader] this is fun IT, glad you are doing this

ClubHome

[1/2/2004 7:35:21 PM] [Investortrader] If we get big volume on Mon and it doesn't break thru, that would be a warning sign, would be a small range day too (or a big reversal day)

[1/2/2004 7:35:34 PM] [Investortrader] I think it's fun too acme! :)

[1/2/2004 7:35:46 PM] [rensop] IT I have added ledge to my copy of hotto dictionary

[1/2/2004 7:36:04 PM] [Investortrader] rensop :)

[1/2/2004 7:36:27 PM] [Investortrader] Just remember to use more than price to decide if it's a base or a ledge

[1/2/2004 7:36:43 PM] [rensop] ok tx

[1/2/2004 7:36:52 PM] [Investortrader] You jump up from a base, and you fall off a ledge

[1/2/2004 7:37:36 PM] [Investortrader] If no more questions on IVAN I'll move on to ALTI

[1/2/2004 7:37:52 PM] [Aktony] Where would you enter IVAN?

[1/2/2004 7:38:12 PM] [Investortrader] If I were going to play IVAN, I would wait for it to break over the resistance

[1/2/2004 7:38:25 PM] [Aktony] Thanks

[1/2/2004 7:38:34 PM] [Fern] with ivan does it concern you that obv shows - divergence

[1/2/2004 7:38:37 PM] [acmetrader] it could be a sideways player too

[1/2/2004 7:38:59 PM] [Investortrader] Resistance many times becomes support once it breaks thru, if it falls back thru that point, you know you were wrong and can get out with a small loss

[1/2/2004 7:39:55 PM] [Investortrader] OBV held the middle BB and the 50sma on it, with volume coming back to normal next week, that divergence could easily disappear if the resistance is taken out

[1/2/2004 7:40:12 PM] [Investortrader] So no concern .. yet

[1/2/2004 7:40:43 PM] [Investortrader] Right acme, may just go sideways here under the resistance, which is why I wouldn't buy it until that resistance is taken out

[1/2/2004 7:41:11 PM] [Investortrader] If you already own it, watch how it reacts when it approaches that resistance, you can always sell just under it and buy back just over it too

[1/2/2004 7:42:09 PM] [Fern] EGHT?

[1/2/2004 7:42:24 PM] [Investortrader] ALTI first :)

[1/2/2004 7:42:35 PM] [Fern] ty

[1/2/2004 7:43:49 PM] [Investortrader] I think the question was would I play a running stock that isn't near support, like ALTI

[1/2/2004 7:44:17 PM] [Investortrader] The smaller priced ones are harder, as they

ClubHome

can move much bigger %'s, in both directions

[1/2/2004 7:44:19 PM] [Aktony] IT, please post chart. Connection was lost. Thanks

[1/2/2004 7:44:55 PM] [whalestail] thank you

[1/2/2004 7:45:00 PM] [Investortrader] ALTI had a nice long base Oct and Nov

[1/2/2004 7:45:03 PM] [Investortrader] Welcome :)

[1/2/2004 7:45:08 PM] [Investortrader] Then powered up

[1/2/2004 7:45:18 PM] [Investortrader] Big volume came in

[1/2/2004 7:45:35 PM] [whalestail] ;)B)=D

[1/2/2004 7:45:35 PM] [Investortrader] Then based thru-out Dec on lower volume

[1/2/2004 7:46:03 PM] [Investortrader] now it looks like the next leg is starting, on good volume today, with OBV confirming

[1/2/2004 7:46:11 PM] [kellam] It thx for chart

[1/2/2004 7:46:38 PM] [Investortrader] I lost connection too, thought I was sharing it but wasn't when I lost connection .. sorry :)

[1/2/2004 7:46:47 PM] [acmetrader] what do you look for to see if OBV is peaking?

[1/2/2004 7:47:07 PM] [Investortrader] Welcome kellam :)

[1/2/2004 7:47:28 PM] [kellam] hi IT,good info thx much

[1/2/2004 7:47:28 PM] [Investortrader] One thing I look for acme, is a huge volume day with a small range in price (or of course a reversal day in price)

[1/2/2004 7:47:50 PM] [Investortrader] That would be after a runup

[1/2/2004 7:48:00 PM] [Investortrader] An exhaustion day

[1/2/2004 7:48:13 PM] [Investortrader] Even if it

[1/2/2004 7:48:36 PM] [Investortrader] Even if it's a gap up day, if it's huge volume and small price range, that is telling us there are plenty of sellers to match the newer buyers

[1/2/2004 7:48:59 PM] [Investortrader] With huge volume you should get huge price move

[1/2/2004 7:49:04 PM] [acmetrader] good point, thanks

[1/2/2004 7:49:04 PM] [kellam] It how do you project a target for ALTI,from last Bo point to top of move, then apply to current BO point?

[1/2/2004 7:49:18 PM] [kellam] IT

[1/2/2004 7:49:30 PM] [Investortrader] There are a few ways to calculate targets, that's why Hotto gives us a few targets :)

[1/2/2004 7:50:10 PM] [Investortrader] It could be an old chart point high or swing high ... or it could be a "measured" move for the target, which sounds like what you said

[1/2/2004 7:50:22 PM] [wildbill] hey IT not around much this time of day - but have taken in some of your analysis lately - very insightful - imo - thank you for sharing -

ClubHome

and I am sure hotto appreciates it as well:)

[1/2/2004 7:50:33 PM] [Investortrader] Or you could measure from the bottom of the new base

[1/2/2004 7:50:49 PM] [Investortrader] Thank you wildbill :)

[1/2/2004 7:51:36 PM] [Investortrader] On ALTI, notice on 12/2 the high was 2.85

[1/2/2004 7:51:49 PM] [Investortrader] The high of that first thrust up

[1/2/2004 7:52:10 PM] [Investortrader] The high on 12/29 was 2.90, around the same place

[1/2/2004 7:52:15 PM] [Africana] jngen

[1/2/2004 7:53:14 PM] [Investortrader] One way to measure a target would be take the low from the base

[1/2/2004 7:53:34 PM] [Investortrader] That was on 12/11 at 1.83

[1/2/2004 7:53:59 PM] [Investortrader] This is how Hotto gets his FOP targets

[1/2/2004 7:54:22 PM] [Investortrader] The difference between the high and low, added back to the high

[1/2/2004 7:54:42 PM] [Investortrader] So we're looking at around 4 for the bigger FOP

[1/2/2004 7:54:49 PM] [kellam] got ot IT thx much on target help

[1/2/2004 7:55:13 PM] [Investortrader] That won't be the first target, that's a bigger one I think ... but Hotto is better at targets than I am usually :)

[1/2/2004 7:55:38 PM] [Investortrader] At least the shorter smaller targets

[1/2/2004 7:56:10 PM] [Investortrader] Let's look at the 5 minute chart on this one

[1/2/2004 7:58:13 PM] [Investortrader] When I look at a 5' chart on a stock like this, I'm looking for a pullback area to buy, may not pullback at all, but if it does, should be prepared if you want to buy it

[1/2/2004 7:58:35 PM] [Investortrader] The early pullback in the 10 o'clock hour

[1/2/2004 7:58:58 PM] [Investortrader] The high on that pb was around 3.05 area

[1/2/2004 7:59:39 PM] [Investortrader] The late 12 o'clock hour and early 1 o'clock hour, that 3.05 area heald it

[1/2/2004 7:59:59 PM] [mstrader] low?

[1/2/2004 8:00:29 PM] [Investortrader] Then the late 2 early 3 o'clock hour, pulled back to around 3 with the highs those 5 minute bars around the 3.05 area

[1/2/2004 8:01:19 PM] [Investortrader] The low on that early 10 hour pb was 2.96 for one bar, and 3 the other three bars

[1/2/2004 8:01:37 PM] [Investortrader] So now we have a pb target, if it pulls back

[1/2/2004 8:02:19 PM] [Investortrader] If you want to buy it and it pulls back some, you could place your order 15-20 cents lower than todays close

[1/2/2004 8:03:25 PM] [Investortrader] Nano stocks are pretty hot, so it may just open

ClubHome

around 3.20 and go up from there

[1/2/2004 8:05:16 PM] [Investortrader] Lots of risk even if you buy the pb, as it looks like a logical stop would be just under the 2.50 area

[1/2/2004 8:05:16 PM] [Aktony] If it does open at 3.2 or higher and continue on, how would you then decide targets? On hourly, daily...?

[1/2/2004 8:06:15 PM] [Investortrader] If it opens up and goes higher, then targets are a happy decision to make if you own it :)

[1/2/2004 8:06:45 PM] [Investortrader] I always try to find the stop-loss point first, get the worry point out of the way

[1/2/2004 8:07:01 PM] [kellam] love those kind of problems IT:)

[1/2/2004 8:07:13 PM] [Investortrader] Me too kellam! :D

[1/2/2004 8:07:35 PM] [Fern] already 3.23 ah

[1/2/2004 8:07:55 PM] [ron643] IT could you go over the monthly chart of nexm

[1/2/2004 8:08:22 PM] [Investortrader] Will do ron when done with ALTI, then I'll move on to EGHT

[1/2/2004 8:08:40 PM] [ron643] tx

[1/2/2004 8:08:47 PM] [Investortrader] Let's say ALTI opens at 3.20 and begins to move up on good volume

[1/2/2004 8:09:21 PM] [Investortrader] If you want to chase, buy it quick, and put your stop a few cents under today's close of 3.19, maybe 3.16 or so

[1/2/2004 8:09:38 PM] [Investortrader] That way you don't have too much risk, and if it keeps running you are in

[1/2/2004 8:10:57 PM] [Investortrader] It's already tripled in 3 months, so it is a bit risky here, but it's also in a hot sector

[1/2/2004 8:13:17 PM] [Investortrader] Any other questions on ALTI?

[1/2/2004 8:13:32 PM] [Aktony] no

[1/2/2004 8:14:10 PM] [Investortrader] Quick look at the monthly on NEXM ... I don't look at monthly charts as my trading time frame is too short, so this will be new to me

[1/2/2004 8:16:54 PM] [Investortrader] 5.30 looks like it will be stiff resistance, upper BB is there and that was around the high for the months of 4/4/02, 5/3/02, 7/3/03, 10/31/03, and 12/2/03, from just eyeballing the chart

[1/2/2004 8:17:25 PM] [Investortrader] The last two got a bit higher than that but in general, lots of chart points in that area to hold it back

[1/2/2004 8:19:24 PM] [Investortrader] OBV on the monthly is doing good with the down months not having as much volume as most of the up months recently

[1/2/2004 8:19:58 PM] [Investortrader] Not really much else to say on it

[1/2/2004 8:20:56 PM] [Investortrader] I don't trade long term to not used to looking longterm :8

[1/2/2004 8:21:09 PM] [Investortrader] On to EGHT ...
[1/2/2004 8:21:18 PM] [acmetrader] what is your average time frame IT?
[1/2/2004 8:22:04 PM] [Investortrader] A few days to a couple weeks usually acme
[1/2/2004 8:22:16 PM] [acmetrader] swing trader, thanks
[1/2/2004 8:22:20 PM] [Investortrader] Yes :)
[1/2/2004 8:23:05 PM] [Investortrader] EGHT still basing here, I like how the OBV is holding up over the middle BB while the price fell under it, positive OBV divergence with price in relation to the BB's
[1/2/2004 8:23:35 PM] [acmetrader] chart not refreshing...what time frame are you in?
[1/2/2004 8:23:53 PM] [Investortrader] I spoke on EGHT some the other night too
[1/2/2004 8:23:59 PM] [Investortrader] Daily chart
[1/2/2004 8:24:19 PM] [mstrader] yes IT, you did it for me.
[1/2/2004 8:24:40 PM] [kellam] filling gap EGHT
[1/2/2004 8:24:55 PM] [Investortrader] Pretty much same comments apply here, gap fill, good OBV still, lower volume basing
[1/2/2004 8:25:14 PM] [Investortrader] Though the holiday weeks could be reason for lower volume [--- caveat
[1/2/2004 8:25:46 PM] [Investortrader] Middle BB and LR30 have converged
[1/2/2004 8:25:58 PM] [Investortrader] While the lower BB and 50sma have also converged
[1/2/2004 8:26:13 PM] [Investortrader] And BB's beginning to pinch in
[1/2/2004 8:26:19 PM] [Investortrader] On price
[1/2/2004 8:26:29 PM] [kellam] It would you wait for BO above ma20 on EGHT
[1/2/2004 8:27:01 PM] [Investortrader] I was just typing that in kellam!
[1/2/2004 8:27:19 PM] [Investortrader] A good volume BO over the middle BB would be the buy signal :)
[1/2/2004 8:27:57 PM] [kellam] IT:)
[1/2/2004 8:28:21 PM] [Investortrader] It would also be a BO over the last 6 days of trading
[1/2/2004 8:28:30 PM] [loftyB] NANX looks like an ascending wedge to me which is bearish. What do you make of it IT?
[1/2/2004 8:28:54 PM] [Investortrader] Any other questions on EGHT before I look at NANX?
[1/2/2004 8:29:11 PM] [Fern] in a few more days the 20 and 50ma's will be touching
[1/2/2004 8:30:00 PM] [Investortrader] Could be Fern, and with the BB's pinching in, it should make a move ... but which way? OBV says most likely up so far
[1/2/2004 8:30:00 PM] [kellam] EGHT looks like SOAP buy on daily
[1/2/2004 8:30:33 PM] [Fern] 50 and 20 touched in mid oct before last bid move up

ClubHome

[1/2/2004 8:30:41 PM] [Fern] big
[1/2/2004 8:31:25 PM] [Investortrader] Good point Fern, and price held the 50 thru-out .. if 50 holds the price here too could be a good indication the move will be to the upside
[1/2/2004 8:31:49 PM] [Investortrader] And notice how skinny the BB's got in Oct
[1/2/2004 8:32:14 PM] [kellam] EGHT good MACD and stoc on daily also,one concern is high vol down in early Dec,
[1/2/2004 8:32:21 PM] [Fern] it's made big moves every time 20 and 50's converge, three times now since may
[1/2/2004 8:34:11 PM] [Fern] lost shared chart connection
[1/2/2004 8:34:30 PM] [Investortrader] Oops, I'll reshare it
[1/2/2004 8:34:32 PM] [acmetrader] and it isn't there yet, so might be a sideways mover until they converge
[1/2/2004 8:35:04 PM] [Investortrader] Could be acme, thus wait for the BO, no need to have dead money for awhile when it could be making money elsewhere
[1/2/2004 8:35:10 PM] [acmetrader] interesting how LR30 is sideways as well.
[1/2/2004 8:35:28 PM] [bluesman] IT LR30=?
[1/2/2004 8:35:34 PM] [Investortrader] That's called "Opportunity cost"
[1/2/2004 8:35:53 PM] [Investortrader] Linear Regression, Hotto does pretty well using that
[1/2/2004 8:36:18 PM] [bluesman] Thought so, just wanted to be sure, thanks
[1/2/2004 8:36:23 PM] [Aktony] This chart is remarkably like that of ALTI which I have up on another computer.
[1/2/2004 8:36:56 PM] [acmetrader] the speculative players are back in vogue...we could be near a market top
[1/2/2004 8:37:07 PM] [kellam] brb
[1/2/2004 8:37:18 PM] [Aktony] Spoke too soon. The L30 on ALTI is going up.
[1/2/2004 8:41:24 PM] [Investortrader] I think Hotto mentioned he is looking for a pullback in the market in a few weeks after earnings season
[1/2/2004 8:41:31 PM] [RickW] Hi IT, if your still there can you give me a read on LEXR, ty.
[1/2/2004 8:41:39 PM] [Investortrader] Sure Rick
[1/2/2004 8:43:01 PM] [Investortrader] This one is at a decision point here
[1/2/2004 8:43:16 PM] [Investortrader] It had a nice double bottom in Dec
[1/2/2004 8:43:31 PM] [Investortrader] With the first btm being outside the lower BB and the second within the bands
[1/2/2004 8:43:47 PM] [Investortrader] Also the OBV was much better on that second bottom

ClubHome

[1/2/2004 8:44:08 PM] [Investortrader] OBV is still looking good here
[1/2/2004 8:44:27 PM] [Investortrader] Price is right around the peak between those two bottoms
[1/2/2004 8:44:40 PM] [Investortrader] And challenging the upper BB
[1/2/2004 8:45:24 PM] [Investortrader] I do like the price and OBV action, I would expect it to break up from here if any volume comes in
[1/2/2004 8:45:44 PM] [Investortrader] Notice the low in late Oct, is right around this price also
[1/2/2004 8:46:12 PM] [RickW] If you bought today, where would you place your stop?
[1/2/2004 8:47:41 PM] [Investortrader] I probably would have waited for it to break out over that 18.10 level so I could use just under that for a stop ... as for buying it today and using a stop
[1/2/2004 8:48:13 PM] [Investortrader] you've got a riskier trade, let me look a minute
[1/2/2004 8:49:15 PM] [Investortrader] Really, it could retest the 12/22-23 lows and still be in an uptrend
[1/2/2004 8:50:14 PM] [Investortrader] If you bought the close today that's a buck and a half away
[1/2/2004 8:50:50 PM] [RickW] A bit to far for my taste.
[1/2/2004 8:50:55 PM] [Investortrader] Some people don't mind using a stop 8-10% away, I prefer 3-4%
[1/2/2004 8:50:58 PM] [Investortrader] Mine too
[1/2/2004 8:51:21 PM] [kellam] IT I show some near term downside potential on LEXR from macd and stoc daily
[1/2/2004 8:52:13 PM] [Fern] most likely will bounce off 20ma
[1/2/2004 8:52:15 PM] [kellam] agree with your stop % IT
[1/2/2004 8:52:24 PM] [RickW] OK, so wait for a better setup then?
[1/2/2004 8:52:47 PM] [Investortrader] MACD Histogram (that I use) is turning down, and RSI peeked over the 80 line and turned back under it
[1/2/2004 8:52:54 PM] [Investortrader] Did you buy today Rick?
[1/2/2004 8:53:12 PM] [RickW] ya
[1/2/2004 8:53:27 PM] [Mapmanin] IT, could you take a look at OSTE?
[1/2/2004 8:53:42 PM] [Investortrader] The positives are the OBV, and it did close in the top of todays range
[1/2/2004 8:54:01 PM] [Investortrader] Sure Mapmanin, after we find a stop for Rick here
[1/2/2004 8:54:25 PM] [Mapmanin] ty
[1/2/2004 8:54:27 PM] [Investortrader] The point of stops is not only to save you

money, but they should be placed at a point where you know you are "wrong" about the trade

[1/2/2004 8:55:26 PM] [Investortrader] And really ... "wrong" here would be those lower points ... you could go a few cents under the recent lows of the last 3 days

[1/2/2004 8:55:44 PM] [Investortrader] Maybe 17.18 or so

[1/2/2004 8:55:47 PM] [Gigantus] Sorry about butting in but, that's a perfect way to say what you just said. Thx

[1/2/2004 8:56:06 PM] [Investortrader] Thanks Gigantus, don't worry about butting in :)

[1/2/2004 8:56:34 PM] [w2jc] on 60min lexr chart, i see the 50ma at just about 17.10 and nothing under it

[1/2/2004 8:57:03 PM] [RickW] Thanks IT, bought on the potential, but couldn't see the stop. This helps.

[1/2/2004 8:57:20 PM] [RickW] potential

[1/2/2004 8:58:09 PM] [Investortrader] Good point w2jc, maybe lower than 17.18 to 17.08 .. one of those two

[1/2/2004 8:58:25 PM] [Investortrader] Maybe you'll get bailed out on Monday with a BO :)

[1/2/2004 8:58:43 PM] [RickW] That would be nice!

[1/2/2004 8:58:53 PM] [acmetrader] it has a W formation which is good, but sure has a lot of overhead resistance

[1/2/2004 8:59:16 PM] [Fern] looks like setting for soap buy on hourly

[1/2/2004 8:59:25 PM] [Investortrader] Always look for a good stop point before putting on a trade, to assess the risk, don't just look at targets for rewards ... I always look for the stop first, then the targets

[1/2/2004 8:59:28 PM] [acmetrader] what is SOAP?

[1/2/2004 8:59:43 PM] [Investortrader] SOAP is used in another club

[1/2/2004 8:59:56 PM] [RickW] Yes, good point.

[1/2/2004 9:00:24 PM] [Investortrader] Ok, on to OSTE ...

[1/2/2004 9:01:13 PM] [Investortrader] Did you already buy this one Mapmanin?

[1/2/2004 9:01:54 PM] [Mapmanin] I bought it earlier - got frustrated holding and sold around 8.15..

[1/2/2004 9:02:11 PM] [Investortrader] It's had a very long base and is now breaking out

[1/2/2004 9:02:16 PM] [Mapmanin] but thought it might not be a bad one to get back in

[1/2/2004 9:02:19 PM] [Investortrader] Riding the upper BB

[1/2/2004 9:02:42 PM] [Investortrader] With OBV confirming the price move

ClubHome

[1/2/2004 9:03:30 PM] [Mapmanin] Do the tight BB's on the OBV give you reason for even greater BO potential?

[1/2/2004 9:03:44 PM] [Investortrader] The low of the huge volume washout day in early Oct has held the entire base as support

[1/2/2004 9:04:41 PM] [Investortrader] That may just be a function of the long sideways basing pattern

[1/2/2004 9:05:38 PM] [Investortrader] They've stayed skinny on the OBV for awhile now

[1/2/2004 9:06:10 PM] [Investortrader] Last couple of days have been on increasing volume too

[1/2/2004 9:06:37 PM] [w2jc] OSTE is now above the 200day ma, which was resistance in late october and several times in early december - ought to be good support now

[1/2/2004 9:06:38 PM] [Mapmanin] The nearest resistance I can see is 9.39 for 200ema and 10.42 sma

[1/2/2004 9:08:03 PM] [w2jc] sorry, thats the 500 day ma

[1/2/2004 9:08:48 PM] [Mapmanin] seems to be sitting on the 100sma of 9.04

[1/2/2004 9:08:50 PM] [Investortrader] I'm going to switch to the ten minute real quick

[1/2/2004 9:10:13 PM] [Investortrader] Just looking for a possible pb point for buying there

[1/2/2004 9:11:00 PM] [Investortrader] Maybe down 10-15 cents

[1/2/2004 9:11:26 PM] [Mapmanin] The 3:30 low?

[1/2/2004 9:11:29 PM] [Investortrader] Where is the 500 now w2jc?

[1/2/2004 9:12:20 PM] [Investortrader] Right Mapmanin, plus last couple days price has come down close to the prior days open, but not all the way

[1/2/2004 9:12:24 PM] [Mapmanin] on the 10 min I see the 500 at 9.13..

[1/2/2004 9:12:34 PM] [w2jc] 8.60

[1/2/2004 9:13:11 PM] [w2jc] on daily

[1/2/2004 9:13:27 PM] [lavenderangel] IT, have another question on LEXR when your doen with OSTE, please

[1/2/2004 9:13:39 PM] [Investortrader] That's also right around the open on 12/31

[1/2/2004 9:13:46 PM] [Investortrader] Ok lavender

[1/2/2004 9:14:21 PM] [lavenderangel] you mean now?

[1/2/2004 9:14:35 PM] [Mapmanin] IT, thanks for your insights:)

[1/2/2004 9:14:36 PM] [Investortrader] LR30 is converging with that 500 also

[1/2/2004 9:14:51 PM] [Investortrader] When done with OSTE lavender :)

[1/2/2004 9:15:17 PM] [lavenderangel] got it

[1/2/2004 9:15:35 PM] [Mapmanin] right, hadn't paid attention to the LR30

ClubHome

[1/2/2004 9:15:45 PM] [Investortrader] So we have a buy point on a pullback, and we could have a stop within reason using a few cents under the 500 or LR30

[1/2/2004 9:16:33 PM] [Investortrader] I'd rather use the LR30 but both are pretty close together

[1/2/2004 9:16:51 PM] [w2jc] on daily, looks like good support under here on oste ...50d ema at 8.40 20d sma at 8.35 50day sma at 8

[1/2/2004 9:16:51 PM] [Noname] OSTE-increasing volume last 3 days-daily-weekly have room to move-monthly hasn't quit come around-this could move pretty good for awhile

[1/2/2004 9:17:22 PM] [Mapmanin] Plus, has a \$15 target on it head by First Albany

[1/2/2004 9:17:47 PM] [Mapmanin] I like it

[1/2/2004 9:18:07 PM] [Investortrader] Right NoName it looks good to me, usually pulls back a bit for entry, fairly safe stop placement too

[1/2/2004 9:18:24 PM] [Investortrader] Increasing volume and some good headroom

[1/2/2004 9:19:21 PM] [Noname] be nice to have a little pullback-but I wouldn't be afraid of it here either

[1/2/2004 9:20:04 PM] [Noname] you could go with todays low with a stop

[1/2/2004 9:20:06 PM] [Investortrader] Looks like it's still in slow movement phase, and has pulled back some each day for entry ... would be nice to get a small pb

[1/2/2004 9:20:22 PM] [Mapmanin] Question: the OBV reads as a negative, albeit a decreasing negative. Does this bother you or do you simply look at the trend? MS is also negative

[1/2/2004 9:20:57 PM] [Investortrader] OBV is positive, breaking out along with price

[1/2/2004 9:21:28 PM] [Fern] on the weekly the ma 200 and ma 50 offer resistance and where pullback likely to occur

[1/2/2004 9:21:36 PM] [Investortrader] If you mean an absolute value on OBV, I don't use that

[1/2/2004 9:21:54 PM] [Mapmanin] That is what I meant, IT

[1/2/2004 9:21:58 PM] [Investortrader] Ok

[1/2/2004 9:22:07 PM] [Investortrader] Lets look at weekly for a minute

[1/2/2004 9:23:33 PM] [Investortrader] Fern, you mean the 50 and the 500? It's over the 200 on teh weekly

[1/2/2004 9:24:00 PM] [Fern] must be esp 200

[1/2/2004 9:24:07 PM] [Fern] exp

[1/2/2004 9:24:11 PM] [Investortrader] Those are around 9.55

[1/2/2004 9:24:21 PM] [Investortrader] Ok, I don't use ema's, only sma's

[1/2/2004 9:24:52 PM] [w2jc] todays range looks like it is exactly between 200sma and 20sma (top) weekly

ClubHome

[1/2/2004 9:25:17 PM] [Mapmanin] I see the weekly 50sma at 9.69
[1/2/2004 9:25:36 PM] [Investortrader] This one looks good to me
[1/2/2004 9:25:40 PM] [Mapmanin] ..but blue skies after that..
[1/2/2004 9:25:48 PM] [w2jc] 50 week above here at just below 10 and then several supports from july/august around 10.50 now resistance
[1/2/2004 9:26:38 PM] [Investortrader] Good point w2jc, I almost pointed out after 9.50 then 10.50 (rough numbers)
[1/2/2004 9:26:51 PM] [Investortrader] On the weekly
[1/2/2004 9:27:24 PM] [w2jc] also a caution, the volume seems a bit low
[1/2/2004 9:28:20 PM] [Investortrader] Besides the holiday weeks, volume is enough for me, over 100,000 most all days (a few under it)
[1/2/2004 9:28:46 PM] [Investortrader] I'll add this one to my ... investigate it more this weekend ... list :)
[1/2/2004 9:29:04 PM] [w2jc] i've been burned too many times with volumes under 500k!! when PT hits they drop like a rock
[1/2/2004 9:29:26 PM] [Investortrader] Can you watch all day w2jc?
[1/2/2004 9:29:41 PM] [w2jc] when i'm not sick in bed !!
[1/2/2004 9:29:46 PM] [Investortrader] Ooops
[1/2/2004 9:30:05 PM] [w2jc] like the last three days :(
[1/2/2004 9:30:10 PM] [HOTTO] MyAngel has posted a new topic to General Discussion: DW 1/2/04 report
[1/2/2004 9:30:13 PM] [Investortrader] I can, and don't carry many positions, I prefer over 200,000 but over 100,000 is ok for me
[1/2/2004 9:30:13 PM] [RickW] does anyone know the earnings date for OSTE.
[1/2/2004 9:30:36 PM] [Investortrader] That's one of the things I'll be investigating Rick :)
[1/2/2004 9:31:12 PM] [Investortrader] Ok, back to LEXR for a question from lavender
[1/2/2004 9:31:13 PM] [RickW] What other things will you look at, IT?
[1/2/2004 9:31:47 PM] [Mapmanin] On the 10-Q they reported through 9/30, so should be 12/31
[1/2/2004 9:31:48 PM] [lavenderangel] my question is where to set stop in order to conserve profit. after reading your comments i may need to up my stop. i bot it at 15.90
[1/2/2004 9:31:49 PM] [Investortrader] I couple other chart templates, how it reacted during other earnings dates
[1/2/2004 9:32:05 PM] [Investortrader] The overall sector it's in
[1/2/2004 9:32:11 PM] [Investortrader] Other stocks within that sector
[1/2/2004 9:32:35 PM] [lavenderangel] i set stop at 16.85 but am wondering if i

ClubHome

should set it at 17.08 or 17.18

[1/2/2004 9:34:02 PM] [Investortrader] Why did you use 16.85?

[1/2/2004 9:35:04 PM] [lavenderangel] went back 4 days to lod and set it below that. picked a number. i'm not very good with targets or stop points.

[1/2/2004 9:35:13 PM] [Investortrader] Ok :)

[1/2/2004 9:35:22 PM] [Investortrader] you're in a much different situation than Rick is

[1/2/2004 9:35:34 PM] [lavenderangel] also looked at what profit i'd like to take if it turned down. im hoping it will go up more

[1/2/2004 9:36:08 PM] [lavenderangel] if i put stop too close i could get knocked out and it turns around for run to blue sky. happens to me

[1/2/2004 9:37:06 PM] [Investortrader] From how it closed today, it looks like it will probably go up at least a bit on Monday, since it closed nearer the hod

[1/2/2004 9:37:45 PM] [Investortrader] The way I see this chart, unless it takes out 16.10 the uptrend is still intact .. but then most of your profit is gone by then too

[1/2/2004 9:38:13 PM] [Investortrader] So I would use a different strategy in your different situation

[1/2/2004 9:38:17 PM] [lavenderangel] where do you get 16.10?

[1/2/2004 9:39:10 PM] [Investortrader] The minor swing lows of 12/22 and 12/23, were 16.09 and 16.10, and a stop should be a few cents under those

[1/2/2004 9:39:38 PM] [Investortrader] We improvised for Rick because that's too far down from his purchase price

[1/2/2004 9:40:25 PM] [lavenderangel] ok, i see that. so i take the gamble that it will go higher by allowing more movement. Do you see a big correction coming soon in DOW?

[1/2/2004 9:40:42 PM] [Investortrader] I don't really follow the DOW

[1/2/2004 9:40:48 PM] [Investortrader] Not closely anyway

[1/2/2004 9:41:23 PM] [Investortrader] Since it looks like it could go up Monday morning (barring any bad news on it or the whole market) ... I might think about doing this ...

[1/2/2004 9:41:26 PM] [lavenderangel] just individual stocks based on charts

[1/2/2004 9:41:30 PM] [Investortrader] Yes

[1/2/2004 9:42:01 PM] [lavenderangel] ok, i can do that. I see a big triangle with the prices rising each day as well

[1/2/2004 9:42:17 PM] [Investortrader] If you get a small pop in it, sell into it, especially if it looks like it is stalling ... and if it then pops over that 18.10 resistance by a nickel or a dime buy it back

[1/2/2004 9:42:36 PM] [lavenderangel] ok. thanks will make a note on that.

[1/2/2004 9:42:39 PM] [Investortrader] Then you can use a stop just under 18

ClubHome

[1/2/2004 9:43:16 PM] [Investortrader] Because that 18.10 should hold as new support, if it doesn't it could easily go down

[1/2/2004 9:44:13 PM] [lavenderangel] I see. thank you so much. I had wanted to buy this stock in Mar when it was 6 but my hubby talked me out of it.

[1/2/2004 9:44:42 PM] [Investortrader] I do that many times, sell as resistance is approaching, and if it gets thru buy it back a bit higher ... you've probably noticed Hotto sometimes doing that too, selling early in the day, only to buy it back a bit higher later that day ... there is a good reason for that at times!

[1/2/2004 9:44:43 PM] [lavenderangel] or maybe it was June last year

[1/2/2004 9:45:08 PM] [Investortrader] Welcome :)

[1/2/2004 9:45:35 PM] [lavenderangel] ok, i'm seeing the light now. sell at resistance to get profit then buy back if it continues up with stop a few cents below what should be new support level.

[1/2/2004 9:46:41 PM] [atexpal] IT any guidance on how to ride this wild horse NGEN from here????

[1/2/2004 9:46:44 PM] [Investortrader] Exactly, that allows you to grab profits in case it goes back down, as there is a bigger chance at resistance that it will go back down, and if it breaks thru buy it back as what was resistance often becomes new support, and if that new support fails, sell out as it will probably keep heading down

[1/2/2004 9:46:46 PM] [lavenderangel] what resistance is the 18.10 represent. don't see it

[1/2/2004 9:47:08 PM] [Investortrader] NGEN in a second, after showing the resistance on LEXR

[1/2/2004 9:47:33 PM] [Investortrader] The 12/15 high, the peak between the two bottoms in the recent dbl btm is 18

[1/2/2004 9:47:52 PM] [lavenderangel] ok

[1/2/2004 9:47:59 PM] [Investortrader] The 10/23 swing low is 18.10

[1/2/2004 9:48:14 PM] [Investortrader] The 12/31 high is 18.10

[1/2/2004 9:48:43 PM] [Investortrader] Now, NGEN

[1/2/2004 9:48:48 PM] [lavenderangel] and it's hit it in last day of year but didn't go above. hitting its head and will it break thru?

[1/2/2004 9:48:54 PM] [w2jc] happens that the 50day ema is also at 18.17 !!

[1/2/2004 9:49:05 PM] [lavenderangel] ok, thanks guys, on to NGEN

[1/2/2004 9:49:22 PM] [Investortrader] Nice catch w2jc!

[1/2/2004 9:49:51 PM] [Investortrader] atexpal, are you already in NGEN? if so where?

[1/2/2004 9:50:31 PM] [atexpal] I got in and out...back in at 9.11

[1/2/2004 9:51:10 PM] [Investortrader] This is a wild one!

ClubHome

[1/2/2004 9:51:51 PM] [Investortrader] I got in at 6.01, out at 8.25 ... you probably did better :) I didn't expect this!

[1/2/2004 9:52:25 PM] [atexpal] got in 6.40 our 8.59 and back in at 9.11

[1/2/2004 9:52:38 PM] [atexpal] out not our

[1/2/2004 9:53:28 PM] [Investortrader] OBV is confirming the new highs

[1/2/2004 9:54:17 PM] [lavenderangel] did you or were you going to discuss NANX?

[1/2/2004 9:54:29 PM] [Investortrader] I held it for 2 or 3 days, would have to check the log to make sure which, 2 or 3 ... and happy with my over 33% in that time ... of course would be happier if I held it lol

[1/2/2004 9:54:46 PM] [Investortrader] Did I skip NANX? Ooops

[1/2/2004 9:56:17 PM] [Investortrader] NGEN now, if it runs Monday I would sell it, seems to run for 1 or 2 days then pullback some, and it's gone up HUGE

[1/2/2004 9:56:18 PM] [lavenderangel] i guess that's my answer!!! :D

[1/2/2004 9:56:53 PM] [Investortrader] Wild ones like this are hard to play

[1/2/2004 9:57:51 PM] [Investortrader] Very extended and I wouldn't be buying it here, good thing you own it from 9.11!

[1/2/2004 9:59:06 PM] [atexpal] thanks...it bothers me that it is moving sustantially higher on decreasing volume

[1/2/2004 9:59:18 PM] [Investortrader] Well it had good volume today

[1/2/2004 10:00:38 PM] [atexpal] okay...I'm looking for trouble I suppose just noticed volume less than on two prior breakouts

[1/2/2004 10:02:36 PM] [Investortrader] Well if it doesn't gap up Monday like it did after the last BO day, might want to take some profits

[1/2/2004 10:02:48 PM] [atexpal] thanks...will do

[1/2/2004 10:03:53 PM] [Investortrader] And if it does and turns back down, take them too, and if it's a really HUGE volume day, also take some, would most likely indicate exhaustion

[1/2/2004 10:05:33 PM] [Investortrader] Looks like pretty much what happens I seem to be saying sell some lol

[1/2/2004 10:06:00 PM] [atexpal] i need to...made out like bandit twice

[1/2/2004 10:06:23 PM] [Investortrader] Hehehe

[1/2/2004 10:06:29 PM] [Investortrader] Ok, finally ... NANX!

[1/2/2004 10:08:48 PM] [lavenderangel] YEAH!!!!

[1/2/2004 10:09:15 PM] [whalestail] B)

[1/2/2004 10:09:44 PM] [Investortrader] This looks like a good cup and handle formation

[1/2/2004 10:10:57 PM] [Investortrader] With nice low volume at the bottom of the handle .. this is a bullish pattern

ClubHome

[1/2/2004 10:12:13 PM] [Investortrader] And nice volume coming back in on the BO
[1/2/2004 10:14:23 PM] [Investortrader] IF looking to buy this one ...
[1/2/2004 10:14:46 PM] [Investortrader] you can use a stop a bit under the low of today and Wed
[1/2/2004 10:14:59 PM] [lavenderangel] what about adding to?
[1/2/2004 10:15:16 PM] [w2jc] where do you consider to be the cup part? november or december?
[1/2/2004 10:15:39 PM] [lavenderangel] December
[1/2/2004 10:15:45 PM] [Investortrader] Add-to point was Wed on the lower volume pullback, but we can check the 5's or 10's in a minute too
[1/2/2004 10:16:02 PM] [Investortrader] Cup is Nov, handle is Dec
[1/2/2004 10:16:11 PM] [w2jc] thanks
[1/2/2004 10:16:23 PM] [Investortrader] Cup starts late Oct
[1/2/2004 10:16:24 PM] [lavenderangel] ahhh , big cup. i see a littler cup in Dec
[1/2/2004 10:17:56 PM] [lavenderangel] IT, what happend to shared chart?
[1/2/2004 10:18:02 PM] [Investortrader] Just got dumped again
[1/2/2004 10:21:03 PM] [Investortrader] Going to look at the 10 minute now
[1/2/2004 10:22:22 PM] [Investortrader] Looks like 8.75-8.85 might be a good add-to on a pb
[1/2/2004 10:25:39 PM] [Investortrader] I'd like to see a smaller pullback than the one we just had, still some risk if the pattern should fail here .. but
[1/2/2004 10:26:13 PM] [lavenderangel] you talking about Wed's pullback?
[1/2/2004 10:26:17 PM] [Investortrader] If it gets above 9.50 on good volume, you could buy the BO and set your stop just under the recent highs
[1/2/2004 10:26:23 PM] [Aktony] IT, are the 8.75-8.85 pb points the previous swing highs?
[1/2/2004 10:27:24 PM] [Investortrader] The 8.75-85 I got off teh ten minute chart, will switch back to show it
[1/2/2004 10:27:39 PM] [decdog] Investor...Hi could you tell me what hotto means by FCI..TY...How are you?
[1/2/2004 10:28:28 PM] [Investortrader] Hi decdog, FCI is Four Chart Indicator, how Hotto measures the breadth (health) of the markets intraday
[1/2/2004 10:28:41 PM] [lavenderangel] IT, is that the basing area in the NANX 10 min chart?
[1/2/2004 10:29:00 PM] [lavenderangel] from 11am to 1pm
[1/2/2004 10:29:20 PM] [Investortrader] lavender, the correction last two days before today ... came all teh way back down to the bottom of the breakout day, reason I want to see a smaller pb is ...

ClubHome

[1/2/2004 10:29:35 PM] [Investortrader] For a less risky trade, to place a stop under that instead of all the way down under todays low

[1/2/2004 10:30:38 PM] [decdog] How do you build that...I see that you busy..can I talk about it tomorrow? TY

[1/2/2004 10:30:39 PM] [Investortrader] Yes lavender, the 3 hour today

[1/2/2004 10:31:00 PM] [Investortrader] Can't using TCNet as it includes %A/D

[1/2/2004 10:31:20 PM] [lavenderangel] why do you choose that and not the area btwn 9 and 11am?

[1/2/2004 10:31:50 PM] [lavenderangel] because it formed a base?

[1/2/2004 10:33:19 PM] [Investortrader] Yes, loking at the ten minute late on 12/30 the top of that base was 8.75

[1/2/2004 10:34:03 PM] [decdog] Ok will touch base w/them Thanks...did you make money today?

[1/2/2004 10:34:26 PM] [lavenderangel] i see. thanks

[1/2/2004 10:34:48 PM] [Investortrader] And on the 5's the 10-1 hours based around there bottoming around the 8.75 area

[1/2/2004 10:34:56 PM] [lavenderangel] and it came back to that area late today as well

[1/2/2004 10:35:05 PM] [Investortrader] Right

[1/2/2004 10:35:24 PM] [lavenderangel] forming a new support line

[1/2/2004 10:35:34 PM] [Investortrader] Made some decdog, I hold ADCT which did ok today, and bought NEXM which closed nicely

[1/2/2004 10:36:57 PM] [decdog] I made some \$ ADCT the other day and sold to soon ...hit ngen and few today...I'm happy.

[1/2/2004 10:37:48 PM] [Investortrader] Can't catch them all, I sold NGEN too soon, but have ADCT ;)

[1/2/2004 10:39:02 PM] [decdog] Help

[1/2/2004 10:39:21 PM] [Investortrader] But I'm not complaining about NGEN, made good bank on it so I'm happy :)

[1/2/2004 10:39:24 PM] [decdog] :)

[1/2/2004 10:42:53 PM] [lavenderangel] any more on NANX or are we done?

[1/2/2004 10:43:17 PM] [Investortrader] One of two things for NANX

[1/2/2004 10:43:39 PM] [Investortrader] I wouldn't mind a pb about half of todays range, for a lower risk stop placement

[1/2/2004 10:44:05 PM] [Investortrader] Or a breakout so stop can be placed just under the high of the last 4 days

[1/2/2004 10:44:19 PM] [Investortrader] Notice how much I stress safe entries with closer stop placement

ClubHome

[1/2/2004 10:45:35 PM] [Investortrader] If you bought the close today in NANX, if it doesn't breakout ...

[1/2/2004 10:45:54 PM] [Investortrader] you need to use a bit under yesterdays low for a stop

[1/2/2004 10:46:22 PM] [lavenderangel] do you use stop markets or stop limits?

[1/2/2004 10:46:24 PM] [Investortrader] And that's just too much risk for me

[1/2/2004 10:47:02 PM] [Investortrader] I use mental stops but sometimes sell before they are hit if it looks like they will get hit anyway

[1/2/2004 10:47:16 PM] [lavenderangel] ok

[1/2/2004 10:47:30 PM] [Investortrader] That takes some experience to tell that

[1/2/2004 10:47:49 PM] [lavenderangel] i figured that

[1/2/2004 10:50:43 PM] [Investortrader] Just like when price hits an outer band .. will it bounce off it or ride it for awhile? But hopefully I'm showing a little on when which one will happen

[1/2/2004 10:55:59 PM] [aaanalyst] Good evening, IT et al

[1/2/2004 10:56:09 PM] [Investortrader] Hi aaanalyst

[1/2/2004 10:56:43 PM] [aaanalyst] My compliments on the patient way you explain things

[1/2/2004 10:57:03 PM] [Investortrader] Thank you :) We all had to start somewhere!

[1/2/2004 10:57:21 PM] [aaanalyst] And most of us have the scars to show for it

[1/2/2004 10:57:26 PM] [bluesman] hi aaanalyst

[1/2/2004 10:57:37 PM] [aaanalyst] hi, blue

[1/2/2004 10:57:51 PM] [Investortrader] I started by trading futures, so had to learn fast or die lol

[1/2/2004 10:57:58 PM] [REB2186] IT, can you explain the procedure you used to find NEXM, BBA, promising stocks? Watch list how big? etc.

[1/2/2004 10:58:29 PM] [aaanalyst] I did futures, too.y favorite was porkbellies

[1/2/2004 10:58:40 PM] [aaanalyst] my

[1/2/2004 10:58:41 PM] [Investortrader] REB, lots of ways I find stocks ... sometimes people in the class bring up something I like and add to my watchlist

[1/2/2004 10:59:05 PM] [Investortrader] Sometimes it's a Hotto stock or some stock someone else somewhere mentions

[1/2/2004 10:59:12 PM] [Investortrader] Sometimes it's off a scan I run

[1/2/2004 10:59:21 PM] [aaanalyst] Good topic. I've been trolling the charts myself thise evening

[1/2/2004 10:59:36 PM] [Investortrader] I have volume surge scans because volume precedes price

[1/2/2004 10:59:40 PM] [Investortrader] And breakout scans

[1/2/2004 11:01:12 PM] [aaanalyst] Nice to see you Jim

[1/2/2004 11:01:35 PM] [Investortrader] Back then I did charts by hand lol

[1/2/2004 11:02:02 PM] [Investortrader] You can really learn about charting that way!

[1/2/2004 11:02:53 PM] [Investortrader] REB, I also look at every chart of every stock mentioned all day long

[1/2/2004 11:03:00 PM] [REB2186] Do you spend several hours reviewing hundreds of stocks to pick a few most promising ones each night and weekend?

[1/2/2004 11:03:07 PM] [Investortrader] I probably look at thousands of charts every week

[1/2/2004 11:03:28 PM] [FirstWave] ths sign of a good trader

[1/2/2004 11:03:38 PM] [Investortrader] I do look at hundreds of charts every day

[1/2/2004 11:03:42 PM] [REB2186] IT, you've helped me tremendously this evening. TY

[1/2/2004 11:03:42 PM] [Investortrader] Thanks FW :)

[1/2/2004 11:03:55 PM] [Investortrader] Thank you REB :)

[1/2/2004 11:04:03 PM] [aaanalyst] Tonite I've been looking for stocks around their 20D ma's with positive 3D % changes

[1/2/2004 11:04:25 PM] [Investortrader] After awhile you can look at charts and pretty quickly decide if you want to investigate it more or flip to the next chart

[1/2/2004 11:05:03 PM] [Investortrader] I've probably looked at over a million charts!

[1/2/2004 11:05:10 PM] [Investortrader] No exaggeration

[1/2/2004 11:05:11 PM] [aaanalyst] One of the best things about TCnet is its ability to scan for stocks ready to move up

[1/2/2004 11:05:28 PM] [Investortrader] But I love this stuff :)

[1/2/2004 11:06:00 PM] [aaanalyst] Of course then there are the ones you hear about that you didn't spot for yourself

[1/2/2004 11:06:49 PM] [Investortrader] I hear about lots I missed, but I catch some too so no biggie to me, can't try to catch them all

[1/2/2004 11:07:12 PM] [Investortrader] Plus I couldn't if I wanted to, too many stocks and not enough money lol

[1/2/2004 11:07:51 PM] [aaanalyst] Reminds me of a kid in the candy store with 2 cents to spend back in the '30's

[1/2/2004 11:08:32 PM] [Investortrader] lol

[1/2/2004 11:08:46 PM] [aaanalyst] Don't laugh. That was me

[1/2/2004 11:10:30 PM] [Aktony] :)

[1/2/2004 11:10:35 PM] [Investortrader] Wow, cool :)

[1/2/2004 11:11:34 PM] [aaanalyst] That pop in NANX looks like a candy with a purple center to me

[1/2/2004 11:11:35 PM] [Investortrader] Many times I just see too many good charts to play, hard to pick sometimes

[1/2/2004 11:12:30 PM] [Aktony] Chart connection lost again...present chart on screen NTES

[1/2/2004 11:12:41 PM] [aaanalyst] Part of the game is filtering them down to the few you want to watch today

[1/2/2004 11:12:47 PM] [REB2186] IT, with your buying fewer stocks and holding longer, how do you think your profits compare with others who trade many more stocks & sell by day's end?

[1/2/2004 11:13:05 PM] [Investortrader] I turned it off Aktony

[1/2/2004 11:13:36 PM] [Investortrader] I don't hold that long REB, but not a daytrader .. as for how we compare ... I have no idea

[1/2/2004 11:13:51 PM] [Investortrader] But I do know this

[1/2/2004 11:14:04 PM] [Investortrader] I'm still around, while most all of the daytraders aren't :)

[1/2/2004 11:14:09 PM] [REB2186] Your approach sounds best to me.

[1/2/2004 11:14:25 PM] [Investortrader] There's a saying on wall street ...

[1/2/2004 11:14:25 PM] [bluesman] daytrading to hyper for me

[1/2/2004 11:14:38 PM] [Investortrader] There are old traders, and there are bold traders ... but there are no old bold traders

[1/2/2004 11:15:20 PM] [aaanalyst] That originally referred to pilots... but the risks are similar

[1/2/2004 11:15:23 PM] [REB2186] Thanks again. Time for me to hit the sack.

[1/2/2004 11:15:40 PM] [Investortrader] Night REB, sleep well :)

[1/2/2004 11:15:44 PM] [techlord61] yes they are.....P

[1/2/2004 11:19:45 PM] [Investortrader] True aaanalyst, but lots of people focus on their returns in trading, or how much money they made ... or how much they can make
[1/2/2004 11:20:59 PM] [aaanalyst] I know guys who worked their portfolios up to a million or more, but who lost it all for one simple reason -- they wouldn't listen
[1/2/2004 11:21:18 PM] [Investortrader] Did the bear market eat them up?
[1/2/2004 11:21:20 PM] [long351] thats probably how they made it
[1/2/2004 11:21:51 PM] [aaanalyst] Yep
[1/2/2004 11:22:04 PM] [Investortrader] There were alot of people who confused brains with a bull market
[1/2/2004 11:22:13 PM] [Investortrader] Then the bear came growling
[1/2/2004 11:22:57 PM] [Investortrader] I knew one guy who told me once, in the bull market heyday ... Why sell anything at a loss, it always comes back
[1/2/2004 11:23:18 PM] [Investortrader] Haven't seen him in awhile ;)
[1/2/2004 11:24:05 PM] [aaanalyst] I kept telling one guy to add a few puts to protect a position that made me nervous just to look at, and he finally gave in and bought enough to cover half his position. And then sold them for 1/16 ea a month before they expired. Then his stock collapsed from 42 to 6 3/4 in a week
[1/2/2004 11:24:30 PM] [Investortrader] Ouch!
[1/2/2004 11:24:49 PM] [aaanalyst] So I said to him, "Well at least you have those puts!" That's when he told me he sold them a week before
[1/2/2004 11:24:51 PM] [Investortrader] For 1/16, may as well hold then to expiry
[1/2/2004 11:26:10 PM] [aaanalyst] Obviously. Two weeks later they were worth \$24 or so
[1/2/2004 11:27:17 PM] [aaanalyst] A smart trader is someone who knows how to learn not just from his own mistakes, but other people's mistakes, too
[1/2/2004 11:27:43 PM] [aaanalyst] We're all human, so we all make 'em. Just don't make any big ones
[1/2/2004 11:27:45 PM] [Investortrader] Well put! that saves some the dreaded tuition cost

[1/2/2004 11:28:30 PM] [webs4all] aaa, I give you credit for you simple 5dma selling rule, ibm is down today beyond what I can expect and the stock price was below its 5 dma Wednesday

[1/2/2004 11:29:45 PM] [Investortrader] Is that sell a stock that drops below it's 5sma?

[1/2/2004 11:30:29 PM] [webs4all] yes. I thought his rule was too simple because IBM would not go down even the price was below its 5 dma

[1/2/2004 11:30:57 PM] [webs4all] Perhaps, it still is a coincidence

[1/2/2004 11:30:59 PM] [aaanalyst] For short term swing or day trading, that rule works. IBM was a sell at 92.98 on 12/30

[1/2/2004 11:31:31 PM] [Investortrader] Any stock can go down!

[1/2/2004 11:31:41 PM] [webs4all] IT, I sold my ACO too quick this morning after learning all those flats from you

[1/2/2004 11:31:51 PM] [aaanalyst] Today it closed at 91.55 - down a buck and change

[1/2/2004 11:32:20 PM] [webs4all] I know, aaa, that is why I give you the credit for being right on your 5dma selling rule

[1/2/2004 11:32:29 PM] [Investortrader] The time to sell ACO was 12/30 ... when they showed up

[1/2/2004 11:32:40 PM] [webs4all] I still made money, no sweat

[1/2/2004 11:32:45 PM] [Investortrader] Had a fair pullback after that

[1/2/2004 11:33:00 PM] [webs4all] are you guys own siri?

[1/2/2004 11:33:27 PM] [Investortrader] I don't, but did say if it gapped down today to sell it

[1/2/2004 11:33:37 PM] [Investortrader] And I see it didn't

[1/2/2004 11:34:11 PM] [aaanalyst] If we have a rally on Monday, IBM may be a buy again as it gets ready to cross its 3dma again. It's 3dma I use more often than 5 - but 5 is fine for longer swings

[1/2/2004 11:34:18 PM] [webs4all] My girl friend finally broke down and bought at \$3.7 and I am still waiting for it to go down below \$3

[1/2/2004 11:34:58 PM] [Investortrader] 3.70? ouch

[1/2/2004 11:35:19 PM] [Investortrader] I can't buy it up here, way too extended

[1/2/2004 11:35:34 PM] [webs4all] Not worried about my IBM, I always will own some IBM for sentimental reason.

[1/2/2004 11:35:54 PM] [Investortrader] Don't marry your stocks webs :)

[1/2/2004 11:35:54 PM] [webs4all] as for siri, look all those green bars

[1/2/2004 11:36:15 PM] [webs4all] It got me tempted, might buy some tomorrow

[1/2/2004 11:36:29 PM] [Investortrader] I remember when IBM fell from about 175 to

ClubHome

50 or less .. why hold for sentimental reasons?

[1/2/2004 11:36:43 PM] [webs4all] I used to work for them

[1/2/2004 11:36:57 PM] [webs4all] only 100 shares

[1/2/2004 11:37:09 PM] [bluesman] I lost my shirt in Biotech's trying to hold for the long haul, becomes supper important what you pay for them

[1/2/2004 11:37:26 PM] [bluesman] supper=super

[1/2/2004 11:37:33 PM] [aaanalyst] Siri still looks ok short term, but I'd keep my finger on the sell button if it shows signs of topping out intraday

[1/2/2004 11:38:01 PM] [webs4all] I think it will go up tomorrow - siri, too much momentum for it to go down

[1/2/2004 11:38:20 PM] [aaanalyst] Problem with 100 shares is that you're paying way too much commission as a % of your trade

[1/2/2004 11:38:32 PM] [Investortrader] Night everyone, off to watch the end of the fiesta bowl :)

[1/2/2004 11:38:33 PM] [Steven57] won't do you much good if it goes up tomorrow webs

[1/2/2004 11:38:43 PM] [bluesman] nite IT and thanks

[1/2/2004 11:38:44 PM] [aaanalyst] GN, IT

[1/2/2004 11:39:34 PM] [webs4all] IT, I bought MTON at 2.5 today, those chat room conversation starts to impact my trading

[1/2/2004 11:40:28 PM] [webs4all] I guess IT is gone

[1/2/2004 11:42:37 PM] [webs4all] GN, ready to watch NBR show

[1/2/2004 11:43:05 PM] [aaanalyst] MTON looks like it's headed down from here. If you get a pop on Monday, that could chenge things Web

[1/2/2004 11:44:42 PM] [aaanalyst] NANX looks good. First Wave pointed out that a gap up on Monday would be a buy signal. But it already seems to have crossed its pivot point

[1/2/2004 11:45:58 PM] [aaanalyst] Nanx crossed its 3dma first thing this morning. Closing volume looked good too

[1/2/2004 11:46:39 PM] [webs4all] Thanks. will watch MANX monday

[1/2/2004 11:46:55 PM] [aaanalyst] In other words, it was a buy right out of the box this a.m. I'm sorry I didn't spot it

[1/2/2004 11:47:36 PM] [bluesman] AAA are you talking about price piercing the 3dma from below for short term buy?

[1/2/2004 11:47:42 PM] [webs4all] You can't catch everything

[1/2/2004 11:47:58 PM] [aaanalyst] Yes and Yes

[1/2/2004 11:48:50 PM] [webs4all] I give you a good stock to buy - ALTI

[1/2/2004 11:49:36 PM] [webs4all] unfortunately, I put my order too low today and did

ClubHome

not get filled

[1/2/2004 11:49:39 PM] [aaanalyst] Basically you have to watch for stocks that are setting themselves up for a BO above the 3dma. Then stay with them until they cross again to the downside

[1/2/2004 11:50:21 PM] [aaanalyst] Sometimes, you'll get another bite at the apple when they retest the 3 dma and bounce off of it

[1/2/2004 11:51:39 PM] [webs4all] what you think of NVI, I bought some today

[1/2/2004 11:51:57 PM] [webs4all] above 3dma, 5dma

[1/2/2004 11:52:02 PM] [aaanalyst] Most of the time, you have to be watching the stock. Look at NANX on a 15 minute chart. The buy window lasted about an hour and a half

[1/2/2004 11:54:14 PM] [webs4all] NANX went below 3 sma and then came back up on 15 min. chart

[1/2/2004 11:55:18 PM] [webs4all] aaa, what you mean by "buy window" on the 15-min. chart

[1/2/2004 11:55:21 PM] [aaanalyst] I probably wouldn't touch NVI. Volume was only 53600. I like to see at least 300000, so you can exit quickly when you want to.

[1/2/2004 11:55:32 PM] [bluesman] begining to use your 15 min template; one I like and already own is amswa, and template looks like good hold with brake out .

[1/2/2004 11:56:01 PM] [bluesman] possible

[1/2/2004 11:58:00 PM] [aaanalyst] By buy window I mean the time before you're passing up most of the day's gain. Buying at a discount is where a big chunk of the profit is. Chasing rallies can be dangerous -- you can get caught in a hi % PB especially with a low price stock
