 [4/16/2004 7:59:19 AM] <DMut> Caris upgrades SSTI to Buy from Above Avg and raises their target to \$25 from \$15, citing the following factors: 1) improving mkt pricing for low-mid density NOR Flash, 2) rising confidence that worldwide economic growth is accelerating and sustainable through 2005, 3) rising adoption of communications, computing, and consumer electronics end products utilizing low-mid density NOR Flash, and 4) faster than expected ramp in royalty payments from licensed foundries to SSTI for NOR Flash embedded in semi products produced for those foundries' other customers.

[4/16/2004 8:37:55 AM] <dagwood> :)
[4/16/2004 8:38:07 AM] <AlanD> Closed out my position on IPIX just minutes before the close yesterday. Had no idea it would do the gap down business for this morning.
[4/16/2004 8:38:24 AM] <AlanD> Just lucky.
[4/16/2004 8:38:34 AM] <payck> I'd rather be lucky than smart
[4/16/2004 8:38:35 AM] <malealltrash> u are a saint
[4/16/2004 8:38:51 AM] <Johnster> Alan, OBV on KRON is sky-high...does that bother you re: shorting it?
[4/16/2004 8:39:13 AM] <malealltrash> Ipix Upix Mypix badpix lol
[4/16/2004 8:39:24 AM] <Oregongeordie> Hello AlanD, long time no see.

[4/16/2004 8:40:00 AM] <Johnster> Hourly stochs turning up on KRON as well...maybe wait for late day short?
[4/16/2004 8:40:34 AM] <acmetrader> how do you get pre-market stochastics?
[4/16/2004 8:40:47 AM] <Brooks5> Maybe we will have a sell off at the open on IPIX and then a slow recovery
[4/16/2004 8:41:00 AM] <nemsca> anyone know the symbol for VXO in tradestation??
[4/16/2004 8:41:02 AM] <malealltrash> check out charts on these stocks from a master chartist, BUT NOT AS GOOD AS HOTTO LOL AMX ATVI CECO
[4/16/2004 8:41:26 AM] <malealltrash> COF GP SYMC TSN VIP
[4/16/2004 8:41:29 AM] <AlanD> Just saying that KRON is a potential short setup. Trend is still down and if sector remains weak it is a likely candidate as it is overbought in its downtrend. I do see what appears as a minor double bottom which could be seen as bullish. Just putting it out as a potential play.
[4/16/2004 8:42:32 AM] <AlanD> Candle stick on KRON is also a bearish engulfing.
[4/16/2004 8:42:56 AM] <AlanD> EW type ABC short setup also.
[4/16/2004 8:43:24 AM] <AlanD> Not conclusive, just pointing out the bearish points.
[4/16/2004 8:43:31 AM] <Johnster> And it's a good one, Alan...just suggesting that the timing is important...should keep an eye on. Thanks for pointing it out...
[4/16/2004 8:43:42 AM] <malealltrash> thanks Alan I have my own "kronies" lol

[4/16/2004 8:45:36 AM] <malealltrash> be careful SEC investigating TASR ABIX IPIX

[4/16/2004 8:45:51 AM] <AlanD> No problem Johnster, I could be wrong. OBV is useful but only one indicator.
[4/16/2004 8:46:08 AM] <AlanD> Male its good to have some Kronies.
[4/16/2004 8:46:15 AM] <gordo> AlanD who are you using for source of WINPHI SOFTWARE

[4/16/2004 10:33:28 AM] <Investortrader> NGEN still in a low vol pb, holding the 4/1 BO day lod ... I took a stab at it a few days ago on the 3-day pb but got stopped out
[4/16/2004 10:33:46 AM] <Investortrader> I don't like how it lost the middle BB, but the vol is pretty low
[4/16/2004 10:34:19 AM] <Jwerner> The low volume is what I'm positively holding onto. Appreciate it.
[4/16/2004 10:34:55 AM] <Investortrader> I couldn't hold on, had to admit my timing was wrong ...
[4/16/2004 10:35:34 AM] <Jwerner> I've averaged down bad me . . . holding alot of May calls at this time.
[4/16/2004 10:36:30 AM] <Investortrader> I always have a line drawn in the sand when I put on a trade, for where I will get out and admit defeat usually it ends up falling further from there but I do get whipsawed once in awhile
[4/16/2004 10:37:04 AM] <malealltrash> line drawn in the sand jeez high tide could take that away lol
[4/16/2004 10:37:52 AM] <Investortrader> Good thing there is no ocean front property in Arizona male! lol
[4/16/2004 10:37:53 AM] <Jwerner> That's been my problem. haven't drawn that line enough . . . BKHM and now NGEN. I like both companies and got wrapped up in averaging down. Always learning.
[4/16/2004 10:38:19 AM] <Investortrader> Jwerner, there is a big difference between a good company, and it's stock ... good companies go thru corrections too
[4/16/2004 10:38:36 AM] <Jwerner> Very True

[4/16/2004 10:46:31 AM] <Investortrader> Harley, I don't use trailing stops if you mean trail by a certain %-age

[4/16/2004 10:47:51 AM] <Investortrader> The market doesn't know where your %-age stop is but it does know where support and resistance is ... I use just under support for stop-losses and just under resistance for sell-stops above the market

[4/16/2004 10:48:20 AM] <Rgille> No audio on classes, please - faster to review written logs

[4/16/2004 3:45:50 PM] <SusanM> Trash must be shorting FVCX to be so vocal in his negativity...
[4/16/2004 3:45:53 PM] <Jwerner> most viewed, most cursed, and most hoped
[4/16/2004 3:46:07 PM] <BossFan> u mean MSGI trash? getting close to LR30 as well. That bounce off the LR30 has been a grat play with these high fliers
[4/16/2004 3:46:10 PM] <Fannye> Corvette where do you find info like that?

[4/16/2004 3:46:28 PM] <rleslie66> How can you tell that it is the 4th most viewed?
[4/16/2004 3:46:57 PM] <CFurgie> it is a tcnet sort criteria
[4/16/2004 3:46:59 PM] <SusanM> YOu can sort by "# of Users Viewing..."
[4/16/2004 3:46:59 PM] <corvette68> To see # viewing chart, you can modify the

ClubHome

tabs that have the symbol and last price etc. R-click and you will see that you can edit

[4/16/2004 5:59:38 PM] <Investortrader> Hi everyone :)
[4/16/2004 5:59:51 PM] <daniel329> hi
[4/16/2004 6:00:12 PM] <Investortrader> Hello daniel
[4/16/2004 6:00:33 PM] <daniel329> Hi IT.. getting ready for your trip?
[4/16/2004 6:00:43 PM] <Investortrader> My first Friday class, not sure how many will be here .. but here we go!
[4/16/2004 6:00:49 PM] <Investortrader> I'll be doing that this weekend
[4/16/2004 6:01:15 PM] <Investortrader> And leaving Monday early most likely
[4/16/2004 6:01:29 PM] <daniel329> nice...
[4/16/2004 6:01:46 PM] <Investortrader> The first one I'd like to talk about is LEXR ...
[4/16/2004 6:02:04 PM] <Tilt> Hello IT I'm here
[4/16/2004 6:02:13 PM] <Investortrader> Hi Tilt
[4/16/2004 6:02:29 PM] <Investortrader> LEXR was brought to class a couple of weeks ago I think, when it began to ride the upper BB
[4/16/2004 6:02:57 PM] <Investortrader> Late March or early April I believe, was asked about it
[4/16/2004 6:03:15 PM] <Investortrader> I said still looks good as it's riding the upper BB, and it continued upwards
[4/16/2004 6:04:03 PM] <Investortrader> I've covered upper BB riding a few times in class, and wanted to point out a few things again for those newer people who haven't been here for the other times
[4/16/2004 6:04:33 PM] <Investortrader> Zooming in on the chart so it will be easier to see something
[4/16/2004 6:05:00 PM] <Investortrader> When a stock is riding the upper BB, like this was ... as long as it's stays in contact with it it's ok
[4/16/2004 6:05:14 PM] <Investortrader> When it falls out of contact, it's time to start watching it
[4/16/2004 6:05:28 PM] <Investortrader> on 4/6 it lost contact with the upper BB
[4/16/2004 6:05:45 PM] <Investortrader> First day out of contact, never worries me ... neither does two days in a row out of contact

ClubHome

[4/16/2004 6:05:59 PM] <Investortrader> 4/7 still out of contact, still no worries
[4/16/2004 6:06:30 PM] <Investortrader> Back to my usual chart view, needed to zoom there so it was easier to see where it lost contact with the upper BB
[4/16/2004 6:06:44 PM] <Investortrader> 4/8, still out of contact, 3rd day now
[4/16/2004 6:06:47 PM] <daniel329> when u mean in contact is any place on the candle (body/tails)?
[4/16/2004 6:06:59 PM] <Investortrader> As I've said before, the 3rd day out of contact I get worried
[4/16/2004 6:07:08 PM] <Investortrader> Yes daniel, any part of the days price range
[4/16/2004 6:07:31 PM] <Investortrader> Even if it's just the high of the day barely touching it, that counts
[4/16/2004 6:08:06 PM] <Investortrader> Now, after a stock has rode the upper BB, and then lost contact with it, that 3rd day in a row I get very worried
[4/16/2004 6:08:39 PM] <Investortrader> Many times I will sell that 3rd day .. sometimes I give it one more day .. this one I would have given it another day as it was making new highs
[4/16/2004 6:09:21 PM] <Investortrader> Uh-oh, next day and still out of contact ... 4/12 the 4th day in a row, I would be out no questions asked
[4/16/2004 6:09:44 PM] <Investortrader> When a stock is riding the upper BB, it is a momentum play
[4/16/2004 6:09:58 PM] <Investortrader> If it loses that momentum for too long, the mo-mo players move on
[4/16/2004 6:10:41 PM] <leon> mo-mo players?
[4/16/2004 6:10:46 PM] <Investortrader> So I always sell that 4th day out of contact, if I hadn't already sold the end of the 3rd day out of contact ... and many times I just sell that third day
[4/16/2004 6:10:52 PM] <Investortrader> momentum players
[4/16/2004 6:11:35 PM] <Investortrader> The ones who buy the new highs and are quick to sell on any weakness
[4/16/2004 6:12:05 PM] <Investortrader> I usually say a stock needs to gt back up to the upper BB by that third day or sell it .. once in awhile I give it one extra day but never anymore than that
[4/16/2004 6:12:18 PM] <CodyCare> Wouldnt you go by how far it was from the upper BB, rather than number of days apart from it?
[4/16/2004 6:12:23 PM] <Investortrader> And it gets up there on vol, which makes the pattern ok again to hold
[4/16/2004 6:12:52 PM] <Investortrader> Sometimes Cody ... but no matter how far away it is, if it's lost its' momentum, it loses me too
[4/16/2004 6:13:43 PM] <Investortrader> The person who brought this to class two weeks ago, got out near the highs when it stalled for those 3 or 4 days in a row, just like he learned to in class!
[4/16/2004 6:13:56 PM] <Jwerner> Hey IT . . . could you share the chart, so I can view your settings?
[4/16/2004 6:13:58 PM] <daniel329> do you enter when it touches UBB on first day? preferably?
[4/16/2004 6:14:19 PM] <SkyDragon> SGR please.
[4/16/2004 6:14:24 PM] <Investortrader> It's shared Jwerner, gotta go to view another user I guess
[4/16/2004 6:15:19 PM] <Investortrader> re-sharing it
[4/16/2004 6:15:40 PM] <Jwerner> There, I see it now. Thanks
[4/16/2004 6:15:55 PM] <Investortrader> So no matter that it was making new highs on that 4th day, I would have been out since it didn't make it up to the upper BB on vol
[4/16/2004 6:16:15 PM] <Investortrader> Probably would have been selling near the close

ClubHome

[4/16/2004 6:16:45 PM] <Investortrader> Then on 4/13, it got ugly, those who were still hanging on ...

[4/16/2004 6:16:58 PM] <Investortrader> Should have sold when it broke the 4/12 lows

[4/16/2004 6:17:22 PM] <Investortrader> But anyone who has been in class would have already been out :)

[4/16/2004 6:18:01 PM] <Investortrader> So that's how and why I sell on a stall of 3 days (sometimes 4) after an upper BB ride

[4/16/2004 6:18:28 PM] <Investortrader> Sometimes I'll sell before that, but this is a great example of the 3-4 day stall and fail

[4/16/2004 6:18:37 PM] <Investortrader> Getting in was asked

[4/16/2004 6:19:08 PM] <Jwerner> Are we looking at the same problem with NGEN?

[4/16/2004 6:19:40 PM] <Investortrader> Notice thru the decline in Jan and Feb ... OBV made lower and lower lows

[4/16/2004 6:20:24 PM] <Investortrader> Then in March it finally made a positive divergence between the 3/10 btm and the 3/22 btm

[4/16/2004 6:21:00 PM] <Oviedojo> what chart cell?

[4/16/2004 6:21:25 PM] <Investortrader> If you had been following this one (I wasn't at the time), seeing that OBV divergence, would have gotten one to pay attention, then the 3/25 BO on higher vol could have been bot

[4/16/2004 6:21:34 PM] <Investortrader> WE're on LEXR now Ovie

[4/16/2004 6:22:47 PM] <Investortrader> Any questions on LEXR?

[4/16/2004 6:23:22 PM] <daniel329> would you consider going short anytime after that big drop?

[4/16/2004 6:23:33 PM] <Investortrader> That higher vol BO also BO above the 50sma too

[4/16/2004 6:23:57 PM] <Investortrader> you mean today's drop? I'm going on vacation :)

[4/16/2004 6:24:07 PM] <Investortrader> But ... no

[4/16/2004 6:24:14 PM] <daniel329> no, on 04/13

[4/16/2004 6:24:38 PM] <Investortrader> I don't short much personally

[4/16/2004 6:24:46 PM] <Investortrader> Sometimes but not often

[4/16/2004 6:25:22 PM] <Investortrader> I don't think I would have

[4/16/2004 6:25:57 PM] <Investortrader> I look for other set-ups for shorting when I look to short

[4/16/2004 6:26:44 PM] <Investortrader> If you check the classes back in late Jan at the start of the IT correction, I said something about only looking for shorts, and one class I went over all the shorts I was looking at that day and which ones I traded and which ones I didn't ... and why

[4/16/2004 6:27:06 PM] <Investortrader> Ok, on to SGR

[4/16/2004 6:27:09 PM] <daniel329> thanks will look at those logs later..

[4/16/2004 6:27:51 PM] <Investortrader> I covered this one with a nice positive review a couple of days ago!

[4/16/2004 6:28:20 PM] <Investortrader> Broke out over the Feb and March highs on nice vol today

[4/16/2004 6:28:42 PM] <Investortrader> Still looks good to me

[4/16/2004 6:29:29 PM] <Investortrader> I would have thought some kind of small pb would have happened around 12.50 at those Feb and March highs, this one is strong to have not done that

[4/16/2004 6:30:18 PM] <Investortrader> Looks like the 1/16 swing high of 13.40 will be easy

[4/16/2004 6:30:48 PM] <Investortrader> After that comes the 12/31 high of 14.45

[4/16/2004 6:30:52 PM] <Investortrader> For targets

[4/16/2004 6:31:39 PM] <Investortrader> A stock riding the upper BB can have a small pb at any time ... remember the lesson just taught ... don't let it stall for too long

if it does

[4/16/2004 6:31:55 PM] <Investortrader> Any questions on SGR?
[4/16/2004 6:32:02 PM] <bravotrader> just broke above a longterm downtrend line (at approx 12) going from Spring 2001
[4/16/2004 6:32:16 PM] <Investortrader> Thanks bravotrader ... more good news!
[4/16/2004 6:33:03 PM] <Investortrader> On to NGEN ...
[4/16/2004 6:33:32 PM] <Investortrader> We've got a near doji on it
[4/16/2004 6:34:05 PM] <Investortrader> Plus the low vol pb it's been in
[4/16/2004 6:34:41 PM] <Investortrader> Means it could be ready to reverse back up ... Monday will be key as doji's need some kind of confirmation
[4/16/2004 6:34:59 PM] <DMut> does the 3 day UBB rule apply here
[4/16/2004 6:35:25 PM] <Investortrader> Not really DMut as it hadn't really made much of a run yet on the upper BB
[4/16/2004 6:35:48 PM] <Investortrader> That's more for after a nice run
[4/16/2004 6:36:12 PM] <CodyCare> Could you use the LOD on the large BO candle of 4/1 as your stop loss?
[4/16/2004 6:36:13 PM] <Investortrader> Let's go back to LEXR for a minute to compare
[4/16/2004 6:36:37 PM] <Investortrader> See how LEXR had run for a bit up the upper BB, where NGEN hasn't
[4/16/2004 6:37:14 PM] <Investortrader> The upper BB for LEXR was at an inclined slope for many days
[4/16/2004 6:37:39 PM] <Investortrader> Looking at NGEN, the upper BB didn't keep rising much at all, and the price didn't ride it much yet either
[4/16/2004 6:37:52 PM] <Investortrader> So the 3-day rule doesn't apply here
[4/16/2004 6:38:05 PM] <Investortrader> And you need to look at other things
[4/16/2004 6:38:29 PM] <Investortrader> Yes Cody, just under that
[4/16/2004 6:38:38 PM] <Investortrader> Just under the 4/1 lod
[4/16/2004 6:39:37 PM] <Investortrader> If this one is healthy it really should rally on Monday, barring the market taking things down
[4/16/2004 6:40:04 PM] <Investortrader> It's had it's low vol pb, retraced pretty much the whole BO candle, and now a doji
[4/16/2004 6:40:28 PM] <Investortrader> I tried buying this a few days ago and got stopped out already
[4/16/2004 6:40:36 PM] <Investortrader> days ago
[4/16/2004 6:41:19 PM] <CodyCare> I know your reason for selling NGEN, I read it in the log, but where did you buy and why?
[4/16/2004 6:41:57 PM] <Investortrader> Looks like I bot it on 4/12
[4/16/2004 6:42:29 PM] <Investortrader> And sold on 4/13
[4/16/2004 6:43:08 PM] <Investortrader> .Backed up the chart to 4/12
[4/16/2004 6:43:39 PM] <Investortrader> I got in at 8.81, near the lows ... near the end of day I think
[4/16/2004 6:43:44 PM] <DMut> I think we all though 8.60 would hold because of offering.
[4/16/2004 6:44:03 PM] <Investortrader> That's one reason I got in DMut :)
[4/16/2004 6:44:12 PM] <Investortrader> Plus the LR30 was right there
[4/16/2004 6:44:21 PM] <Investortrader> underneath for support on 4/12
[4/16/2004 6:44:31 PM] <Investortrader> And we were on the third lower vol pb day
[4/16/2004 6:44:49 PM] <Investortrader> So I took a stab at it under those conditions
[4/16/2004 6:45:04 PM] <Investortrader> And when the 8.60 secondary offering price didn't hold, I didn't hold
[4/16/2004 6:45:14 PM] <Investortrader> As that was my pre-decided area to get out
[4/16/2004 6:45:25 PM] <Investortrader> Because of all the things I just mentioned
[4/16/2004 6:45:45 PM] <Investortrader> and when a stock hits my stop, I get out, no questions asked

[4/16/2004 6:45:53 PM] <bmweyrauch> plan your trade..trade your plan...nice!!
[4/16/2004 6:46:01 PM] <Investortrader> We see the very next day it did :P
[4/16/2004 6:46:10 PM] <Investortrader> Exactly bmw :) Discipline!
[4/16/2004 6:46:47 PM] <daniel329> IT... when u have some time.. can u have a class on rules and disciplined trading strategies?..
[4/16/2004 6:47:01 PM] <Investortrader> If I had fudged, and said .. well, it held the 20sma at least ... on 4/13 ... that wasn't my original plan, and it's usually not good to change plans in the middle of a battle
[4/16/2004 6:47:09 PM] <DMut> what would have gotting you back in? after being stopped
[4/16/2004 6:47:30 PM] <Investortrader> Maybe later tonight daniel I'll ramble on some about that :)
[4/16/2004 6:47:35 PM] <CodyCare> So, usually you buy when it bounces off support, but this time you bought because it was close to the 8.60 offering price which was your "support"?
[4/16/2004 6:47:55 PM] <Investortrader> Right Cody, also the LR30 was around that same area, for more support
[4/16/2004 6:48:00 PM] <Investortrader> Plus
[4/16/2004 6:48:17 PM] <Investortrader> the swing high on 3/18 is 3.59 ... more support
[4/16/2004 6:48:28 PM] <Investortrader> I mentioned all of those when I bot I believe
[4/16/2004 6:48:43 PM] <Investortrader> Though I didn't specifically say that was going to be my stop ...
[4/16/2004 6:48:54 PM] <Investortrader> I may have mentioned somewhere just under there
[4/16/2004 6:49:04 PM] <Investortrader> For getting back in
[4/16/2004 6:49:26 PM] <Investortrader> Not until today do I see anything that would have gotten me back in
[4/16/2004 6:49:54 PM] <Investortrader> So from when I sold till now, there was no signal ... no candlestick pattern, no BO, no vol
[4/16/2004 6:50:12 PM] <Investortrader> And today is only a possibility, needs confirmation Monday
[4/16/2004 6:50:52 PM] <Investortrader> I usually like to buy support in a way that I am not risking more than 3-4%
[4/16/2004 6:51:06 PM] <CodyCare> Would confirmation be a higher open, or DBO over 8.38?
[4/16/2004 6:51:42 PM] <Investortrader> Higher open would do it, but would have to hold today's lod
[4/16/2004 6:51:53 PM] <Investortrader> And close higher
[4/16/2004 6:52:11 PM] <Investortrader> So if I bot the higher open, and it failed, I would sell
[4/16/2004 6:52:26 PM] <Investortrader> Because the pattern would have failed
[4/16/2004 6:52:56 PM] <DMut> wait until end of day to see if failed?
[4/16/2004 6:53:19 PM] <Investortrader> Depends on vol, if I saw a higher open with a lot of vol coming in, I would step up and buy it
[4/16/2004 6:53:38 PM] <Investortrader> Because by eod, it may be over the 50sma again
[4/16/2004 6:54:10 PM] <Investortrader> Look at the 4/1 move it made on vol when it BO
[4/16/2004 6:54:27 PM] <DMut> oh that pesky 50sma
[4/16/2004 6:54:34 PM] <Investortrader> Hehehe
[4/16/2004 6:56:20 PM] <Investortrader> On discipline ... what I do is ... try to never chase, only buy support
[4/16/2004 6:56:36 PM] <Investortrader> If it breaks, sell ... period
[4/16/2004 6:57:19 PM] <Investortrader> Always have your stop-loss in place either

in your mind or physically (I use mental ones as I can watch all day) BEFORE placing your order to get into that trade

[4/16/2004 6:57:40 PM] <Investortrader> Well, physically immediately after you buy :8

[4/16/2004 6:57:47 PM] <Investortrader> Since you can't put it in before lol

[4/16/2004 6:58:17 PM] <Investortrader> Also have an idea of how you will trade it

[4/16/2004 6:58:35 PM] <Investortrader> Either have a target in mind

[4/16/2004 6:59:00 PM] <Investortrader> Or have a pre-determined exit strategy .. like if you get into a stock riding the upper BB

[4/16/2004 6:59:19 PM] <Investortrader> We have a good strategy to get out of those

[4/16/2004 7:00:07 PM] <Investortrader> And every time you break a rule ... and it costs you money (and it will almost always cost you money) ... keep that trade handy next to your computer for a little while, to remind you

[4/16/2004 7:00:57 PM] <Investortrader> If it helps, make a post-it note on that rule you broke and stick it to the side of your computer

[4/16/2004 7:01:14 PM] <Investortrader> Eventually you'll break rules less and less :)

[4/16/2004 7:01:43 PM] <Investortrader> It's hard sometimes when you see people making money on a stock, where your rules say you can't trade it ... tough!

[4/16/2004 7:01:56 PM] <Investortrader> No one said this is an easy job :)

[4/16/2004 7:02:32 PM] <daniel329> yes, let's do a class on rules please..

[4/16/2004 7:02:33 PM] <Investortrader> I don't really have many rules, I just rarely break them

[4/16/2004 7:03:11 PM] <Investortrader> you should have a few rules

[4/16/2004 7:03:30 PM] <Investortrader> Set for your own personal comfort level

[4/16/2004 7:03:47 PM] <Investortrader> Max trading position rule ... the most you will put in any one stock

[4/16/2004 7:04:11 PM] <Investortrader> That should be smaller for newer traders

[4/16/2004 7:04:36 PM] <Investortrader> A Max overall invested rule the most you will have invested at any one time

[4/16/2004 7:04:54 PM] <Investortrader> I rarely use margin for instance, some use it heavily

[4/16/2004 7:06:33 PM] <Investortrader> For newer traders, I would suggest to never average down ... that can really kill you

[4/16/2004 7:07:14 PM] <Investortrader> If you are buying good support, you should never avg down as you should be selling when support breaks ... and you can buy the next level of support down

[4/16/2004 7:07:50 PM] <Investortrader> You should know how much you are comfortable losing on any trade for your max loss

[4/16/2004 7:08:08 PM] <da2rth> hi IT...love your insights. keep up the good work...and have a nice weekend too..;)

[4/16/2004 7:08:20 PM] <Investortrader> Thank you da2rth, you too! :)

[4/16/2004 7:10:11 PM] <Investortrader> And the biggest rule of all ... when your stop gets hit, SELL

[4/16/2004 7:10:37 PM] <Investortrader> Don't look for excuses to lower your stop "just a little bit more"

[4/16/2004 7:11:17 PM] <Investortrader> It's always better to plan your strategy before a trade and not during the heat of battle ... lowering your stop just a bit more is in the heat of battle

[4/16/2004 7:11:38 PM] <Investortrader> And yes, you will get whipsawed sometimes .. that is part of the game

[4/16/2004 7:11:59 PM] <Investortrader> Better to get whipsawed a few times than to have a few major losses

[4/16/2004 7:12:47 PM] <Investortrader> That's about it I think for rules ... just gotta have the discipline to follow them, if you don't have discipline, get it .. if you can't find

it, buy mutual funds

[4/16/2004 7:13:37 PM] <Investortrader> Anyone have a rule I left out?

[4/16/2004 7:13:59 PM] <Investortrader> And buy a few good books and learn

[4/16/2004 7:14:23 PM] <Dannyboy> did you talk about profit-taking sells?

[4/16/2004 7:14:33 PM] <Investortrader> Not yet Dannyboy :)

[4/16/2004 7:15:02 PM] <Investortrader> Only a little when I mentioned you need to have either a plan or a target

[4/16/2004 7:15:28 PM] <Investortrader> Targets come from a few things, moving averages, chart points, prior swing highs and lows

[4/16/2004 7:15:40 PM] <Investortrader> Areas of congestion

[4/16/2004 7:16:07 PM] <Investortrader> Some chart patterns you can measure the move from the pattern to get your target

[4/16/2004 7:16:43 PM] <Investortrader> When Hotto is using FOP, Fold Over Projection .. that is a type of measured move

[4/16/2004 7:18:09 PM] <Investortrader> When a stock nears a target of mine, I'll either sell it right there (part or all), or watch and see how it is acting there .. it usually takes vol to push thru a target

[4/16/2004 7:18:47 PM] <Investortrader> So if I don't already have an order in to sell there, and am watching it ... if I don't see any vol pushing it ... I sell

[4/16/2004 7:20:12 PM] <Investortrader> Once you learn how to read a chart better, you'll see the support and resistance easier ... then it's up to you to buy the support and sell the resistance

[4/16/2004 7:20:43 PM] <Investortrader> And remember this old futures traders saying

[4/16/2004 7:20:51 PM] <Investortrader> The markets don't run on hope

[4/16/2004 7:21:26 PM] <Investortrader> Don't "hope" that your stock will recover if it's going down ...

[4/16/2004 7:21:29 PM] <hud> .

[4/16/2004 7:21:47 PM] <Investortrader> If it hits your stop, sell and move on

[4/16/2004 7:21:55 PM] <Investortrader> I can't stress that enough

[4/16/2004 7:23:16 PM] <Investortrader> For those who subscribe to Hottoworks ... on his website there is a paper on stalling that will help some for selling at a profit after a run and before it falls back down

[4/16/2004 7:23:48 PM] <Dannyboy> Do you usually put on your entire position at one time? When do you average up?

[4/16/2004 7:24:08 PM] <Investortrader> Dannyboy, that depends on a few things

[4/16/2004 7:24:49 PM] <Investortrader> My normal position sizes will change depending on the feel of the market

[4/16/2004 7:25:08 PM] <Investortrader> Sometimes it's smaller, sometimes larger .. sometimes very large

[4/16/2004 7:25:28 PM] <Investortrader> If something breaks out, and I bought the support, usually I'll add there

[4/16/2004 7:25:44 PM] <Investortrader> Because the BO area is now the new support

[4/16/2004 7:26:00 PM] <Investortrader> So I'm still buying close to support .. it's just a higher level of support

[4/16/2004 7:26:19 PM] <Investortrader> And I'll also move my stop up to just under the BO area

[4/16/2004 7:27:33 PM] <Investortrader> So usually I'm putting on my whole position, it's just that a whole position for me can be different sizes depending on the markets

[4/16/2004 7:27:59 PM] <Investortrader> I also rarely average down

[4/16/2004 7:28:14 PM] <Investortrader> But I do average up a lot

[4/16/2004 7:28:45 PM] <Dannyboy> What's your strategy for setting stops to reduce whipsaws?

ClubHome

[4/16/2004 7:29:39 PM] <Investortrader> I put them a little under support, usually if support breaks it's headed lower

[4/16/2004 7:29:52 PM] <Investortrader> I never use a %-age stop or a \$-age trailing stop

[4/16/2004 7:30:00 PM] <Investortrader> %-age trailing stop

[4/16/2004 7:30:32 PM] <Investortrader> The market doesn't know where you bot the stock, thus doesn't know where your %-age trailing stop is .. but it does know where support and resistance is

[4/16/2004 7:31:34 PM] <Investortrader> The people in here who have watched me trade for awhile ... actually haven't seen me ge whipsawed very much at all ... lucky so far! ;)

[4/16/2004 7:32:04 PM] <tinaSDtrader> IT - I 100% agree with you on arbitrary stops.

[4/16/2004 7:32:05 PM] <Dannyboy> Thanks IT! This is very valuable advice.

[4/16/2004 7:32:24 PM] <Investortrader> If I do get whipsawed a few times on a stock ... I just move on, plenty of other stocks out there where maybe my timing will be better

[4/16/2004 7:32:34 PM] <Investortrader> Hi tina :)

[4/16/2004 7:32:52 PM] <Investortrader> Welcome Dannyboy :)

[4/16/2004 7:33:07 PM] <Investortrader> tina is another good trader for you newer people

[4/16/2004 7:33:30 PM] <Investortrader> she just hasn't been around much lately since she was helping during tax season

[4/16/2004 7:33:34 PM] <tinaSDtrader> Hi IT - When I saw that comment I said, "hey, that's almost word for word what I tell my clients"!

[4/16/2004 7:33:54 PM] <tinaSDtrader> (blushing) Thx IT

[4/16/2004 7:34:03 PM] <Investortrader> It must be good then tina! ;)

[4/16/2004 7:34:16 PM] <tinaSDtrader> We speak some common language!

[4/16/2004 7:34:22 PM] <Investortrader> True!

[4/16/2004 7:34:24 PM] <Tilt> And she lives here in sunny San Diego!

[4/16/2004 7:34:47 PM] <tinaSDtrader> Market doesn't give a hoot about arbitrary, it does care about support - bottoms, MAs, floors, gap opens, LOD, etc.

[4/16/2004 7:34:48 PM] <Investortrader> The moving on after getting whipsawed a couple/few times, or taking losses in a stock .. is part of my own discipline approach

[4/16/2004 7:35:03 PM] <Investortrader> Right tina, chart points it knows!

[4/16/2004 7:35:22 PM] <tinaSDtrader> The higher the volatility the stock, the more it will laugh at your pidly little arbitrary 5%!!!

[4/16/2004 7:35:41 PM] <Investortrader> I visited SD a few times in the 90's, stayed with a friend who lived in El Cajon and we would drive in sometimes

[4/16/2004 7:35:59 PM] <tinaSDtrader> It has grown much here, crowded, housing very \$\$

[4/16/2004 7:36:14 PM] <tinaSDtrader> Pay dearly for our daily sunshine (sigh)

[4/16/2004 7:36:48 PM] <Investortrader> If a stock gets the best of me, I don't try to fight it, I move on .. many times I even take it off my quotes too ... don't want to look at it anymore so it won't affect my trading psychology

[4/16/2004 7:36:58 PM] <Dannyboy> So, if your "max loss" rule requires a stop that isn't near support - you shouldn't do the trade...?

[4/16/2004 7:37:05 PM] <daniel329> what price range stocks u normally trade IT?

[4/16/2004 7:37:06 PM] <Investortrader> That's if I lose on it 3 times in a row

[4/16/2004 7:37:16 PM] <tinaSDtrader> It's not the snake that bites ya that kills ya, it's chasing the snake. Hmmmm. Something to think about.

[4/16/2004 7:37:41 PM] <Investortrader> Exactly Dannyboy, but if you are buying near good support, a bit under that support should easily be within ones max loss rule

[4/16/2004 7:38:25 PM] <Investortrader> I don't like to go under \$3 but will on certain special situations .. like a few of the lonmg term plays in some of the themes Hotto

[4/16/2004 7:39:27 PM] <Investortrader> But I will trade higher priced stocks like IBM ... using ITM options as a stock proxy

[4/16/2004 7:39:48 PM] <Investortrader> That's higher risk and not suggested here

[4/16/2004 7:40:26 PM] <daniel329> just getting a hang on stocks.. options is another game.. for later..

[4/16/2004 7:40:47 PM] <Investortrader> Good idea :)

[4/16/2004 7:40:49 PM] <daniel329> this is very good info.. thanks for sharing IT..

[4/16/2004 7:40:57 PM] <Investortrader> Welcome daniel :)

[4/16/2004 7:41:47 PM] <bravotrader> IT, many times stocks go a couple of % below support and than reverse. DO you try to accommodate that?

[4/16/2004 7:42:39 PM] <Investortrader> I put my stop a bit under support, usually 2-3% as I'm usually buying only 1-2% above support

[4/16/2004 7:42:58 PM] <Investortrader> Or right on support or above it by a few pennies

[4/16/2004 7:43:15 PM] <Investortrader> So I'm mostly safe from those bravotrader by default

[4/16/2004 7:43:40 PM] <bravotrader> ty IT

[4/16/2004 7:43:56 PM] <Investortrader> I'm usually only risking 3-4% on any trade ... but that's me, plus I use bigger position sizes so need to be ruthless on cutting losses

[4/16/2004 7:44:16 PM] <Investortrader> And many times I'm out with much less of a loss

[4/16/2004 7:44:31 PM] <Investortrader> That's max (unless I walk into a big gap down of course)

[4/16/2004 7:44:51 PM] <Investortrader> Welcome bravotrader :)

[4/16/2004 7:44:53 PM] <tinaSDtrader> I think you fall into those IT!

[4/16/2004 7:45:05 PM] <Investortrader> lol tina, I think you are right!

[4/16/2004 7:45:15 PM] <tinaSDtrader> Fall off a cliff and get shot on the way down!

[4/16/2004 7:45:24 PM] <Investortrader> Like that lady who fell into the sinkhole in Florida last month I think it was

[4/16/2004 7:45:41 PM] <Investortrader> Out walking her dog, and boom, ground fell in on her

[4/16/2004 7:45:49 PM] <tinaSDtrader> Terrible way to die.

[4/16/2004 7:46:00 PM] <Investortrader> Did she die? I never heard

[4/16/2004 7:46:18 PM] <Dannyboy> IT, do you have any fundie-based rules, e.g. would you enter a position just before an earnings announcement?

[4/16/2004 7:46:19 PM] <tinaSDtrader> Maybe not, shouldn't assume.

[4/16/2004 7:46:43 PM] <tinaSDtrader> xP just before earnings, yikes

[4/16/2004 7:46:49 PM] <Investortrader> I never hold thru earnings Dannyboy .. unless I am almost sure of two things ...

[4/16/2004 7:47:05 PM] <Investortrader> 1) the earnings will be good to very good ... and

[4/16/2004 7:47:16 PM] <Investortrader> 2) the markets reaction to those good earnings will be positive

[4/16/2004 7:47:28 PM] <Investortrader> We've seen recently no rewards for good earnings from the market

[4/16/2004 7:47:38 PM] <tinaSDtrader> And even then have to hope for no negative guidance or surprises.

[4/16/2004 7:47:53 PM] <Investortrader> Right tina

[4/16/2004 7:48:01 PM] <Investortrader> I've rarely rarely rarely done it

[4/16/2004 7:48:24 PM] <Dannyboy> what source do you use for upcoming earnings dates?

ClubHome

[4/16/2004 7:48:27 PM] <Investortrader> Back when I was only trading drillers and oil

service stocks and knew the fundies really well for the companies, the industry, etc

[4/16/2004 7:48:40 PM] <tinaSDtrader> Good earnings, but bit less than expected will be punished. Or maybe their margins a bit off, or mention competition is increasing, etc.

[4/16/2004 7:49:05 PM] <Investortrader> And was in daily conversations with some big oil guys, people who owned their own company, people who brokered drilling rigs, etc

[4/16/2004 7:49:44 PM] <Investortrader> Very tricky as tina says

[4/16/2004 7:50:08 PM] <tinaSDtrader> I'm with you IT, I don't do it. It would be a very rare exception for me to do so.

[4/16/2004 7:50:17 PM] <Investortrader> And then only after trading only ols for years did I do that

[4/16/2004 7:50:20 PM] <Investortrader> oils

[4/16/2004 7:50:34 PM] <Investortrader> And even then, only very rarely!

[4/16/2004 7:51:03 PM] <Investortrader> It's much less risky to trade off charts

[4/16/2004 7:51:22 PM] <daniel329> do you trade the reaction to the news after earning announced?

[4/16/2004 7:51:24 PM] <Investortrader> I can make a living doing that, no need to take on the extra risk B)

[4/16/2004 7:51:47 PM] <Investortrader> It depends on how the chart looks daniel

[4/16/2004 7:52:06 PM] <bmweyrauch> IT - I must run...want to wish you a great vacation...and thank you again for your tremendous contributions we all benefit greatly

[4/16/2004 7:52:24 PM] <Investortrader> If it's good news, vol coming in, and it's BO from a base yes, but I do that without news

[4/16/2004 7:52:27 PM] <daniel329> like SGR... earnings lower but new contract pushed it higher... interesting...

[4/16/2004 7:52:34 PM] <Investortrader> Welcome bmw, glad it's helping! :)

[4/16/2004 7:52:49 PM] <bmweyrauch> :)

[4/16/2004 7:52:58 PM] <tinaSDtrader> daniel - I was short SGR missed earns when that contract came out, had to do damage control on my short.

[4/16/2004 7:53:34 PM] <tinaSDtrader> No fun - but didn't panic, waited for the gap up and then dropped for awhile so I could cover less loss. Exited before started back up.

[4/16/2004 7:54:34 PM] <Investortrader> And you'd be awful sorry if you hadn't tina - good example of discipline and getting out when you need to

[4/16/2004 7:55:20 PM] <tinaSDtrader> MUST get out when it goes against you, but can time it to take less loss if understand market action.

[4/16/2004 7:55:30 PM] <daniel329> hard to tell... watching some like CREE yesterday and today... good earning.. rally AH then gapped up and tanked later..

[4/16/2004 7:56:04 PM] <SkyDragon> Tina, which gap are talking about on SGR?

[4/16/2004 7:56:53 PM] <tinaSDtrader> Don't remember, several weeks ago at least.

[4/16/2004 7:56:56 PM] <Investortrader> Notice on CREE the 50sma is just above it ... since that is usually good support/resistance, and it was so close ... That's an example of where I would have waited for it to BO over the 50sma to buy it

[4/16/2004 7:57:30 PM] <TedM> Must go - TY IT

[4/16/2004 7:57:36 PM] <Investortrader> Welcome Ted :)

[4/16/2004 7:57:53 PM] <Investortrader> But see how the OBV was already breaking down before today on it

[4/16/2004 7:58:59 PM] <Investortrader> Also on 4/2 when it tried to BO over the 50sma it got turned right back

[4/16/2004 7:59:06 PM] <Tilt> IT, I am getting soooo much out of this, I think the early time slot is the difference

[4/16/2004 7:59:17 PM] <Investortrader> Great Tilt! :)

ClubHome

[4/16/2004 8:00:08 PM] <Investortrader> With resistance so close overhead ... I always let someone else be the hero that pushes it thru .. to avoid being the zero if it fails

[4/16/2004 8:02:39 PM] <Investortrader> My best guess on CREE here is that it will break the March lows

[4/16/2004 8:02:46 PM] <daniel329> this is a whole new way to look at charts.. this is good stuff...

[4/16/2004 8:02:52 PM] <Investortrader> At the very least test them

[4/16/2004 8:03:06 PM] <SkyDragon> The price increase from 3/26 to 4/1 wasn't confirmed by OBV.

[4/16/2004 8:03:14 PM] <REB2186> IT, I very much appreciate and enjoy your presentations. However, I'm not able to always be watching when and have lost track of when you make your presentations. Do you have a set schedule?

[4/16/2004 8:03:29 PM] <Investortrader> Good eyes SkyDragon :)

[4/16/2004 8:04:24 PM] <Investortrader> Thank you REB :) Mondays and Wednesdays at 9:30 eastern, Fridays at 6 eastern (this is the first Friday class) IF Hotto is running long I wait till he is done in Hottoworks then give everyone a 15-minute break in between

[4/16/2004 8:05:02 PM] <Investortrader> To digest his comments, get a snack, etc

[4/16/2004 8:05:39 PM] <Investortrader> However, next week I will be on vacation, so might not be any next week

[4/16/2004 8:05:49 PM] <tinaSDtrader> IT - I like your methods, many similarities to mine.

[4/16/2004 8:05:59 PM] <Investortrader> Leave and return dates weather dependant

[4/16/2004 8:06:29 PM] <Investortrader> Thank you tina, I noticed we think a lot alike before when you gave a saturday chat, and sometimes your advice in channel during the day :)

[4/16/2004 8:06:45 PM] <tinaSDtrader> New traders benefit from hearing many different styles and the experience of others who have survived this tough business.

[4/16/2004 8:07:12 PM] <Investortrader> True, everyone needs to find a style that suits them, so hearing different ones always helps

[4/16/2004 8:07:24 PM] <Investortrader> Not many of us survivors around!

[4/16/2004 8:07:26 PM] <tinaSDtrader> Yes, IT, when you were typing I was thinking "is that one of my students." Then I realized it was you and we just have similar speak.

[4/16/2004 8:07:38 PM] <Investortrader> Hehehe :)

[4/16/2004 8:07:57 PM] <tinaSDtrader> I pound my organizing principles into them - like "Hope is not a Strategy."

[4/16/2004 8:08:15 PM] <tinaSDtrader> See them repeating those mantras in here and realize they got it!

[4/16/2004 8:08:26 PM] <Investortrader> I remember hearing that futures traders saying from the pits back in the 80's

[4/16/2004 8:09:19 PM] <Investortrader> tina, today that happened to me, someone mentioned on LEXR how I covered that pattern in class of failing the upper BB before

[4/16/2004 8:09:22 PM] <tinaSDtrader> The "Robust" concepts work across most all stocks and trading vehicles in all time frames. Weird, nichey stuff disappears or stops working.

[4/16/2004 8:09:44 PM] <tinaSDtrader> Robust lasts decades.

[4/16/2004 8:09:45 PM] <Investortrader> MAKes ya proud!

[4/16/2004 8:10:11 PM] <Investortrader> I like the simple time tested things ... if I don't understand it I don't want to use it

[4/16/2004 8:10:27 PM] <tinaSDtrader> Most new traders won't make it, 90% or so will lose their \$ or confidence before learning what to do.

[4/16/2004 8:10:33 PM] <Investortrader> Many things I understand and still don't want to use! lol

[4/16/2004 8:11:01 PM] <tinaSDtrader> Me too, I'm a high probability trader not a "maybe" trader. I go for the rules, not the exceptions.

[4/16/2004 8:12:06 PM] <Investortrader> We should have a higher success rate in here, with everyone helping like we do

[4/16/2004 8:12:21 PM] <Investortrader> But the mental part of the game is the hardest part to conquer

[4/16/2004 8:12:30 PM] <tinaSDtrader> Even with help, many fly by seat of pants and take big losses and are gone.

[4/16/2004 8:12:33 PM] <Investortrader> And that's hard to teach

[4/16/2004 8:12:40 PM] <enzo> good evening all

[4/16/2004 8:13:01 PM] <Investortrader> Yup, I remember a guy back in the late 90's ... his mantra was ... why ever sell anything at a loss, it always comes back

[4/16/2004 8:13:06 PM] <Investortrader> Hi enzo :)

[4/16/2004 8:13:13 PM] <tinaSDtrader> A good chunk of my tutoring is on the "business" side of trading. Forms, processes, daily/weekly rituals, etc. I find most don't get that learning from books, etc.

[4/16/2004 8:13:41 PM] <enzo> hi IT i see you still here

[4/16/2004 8:13:49 PM] <tinaSDtrader> It may come back, but when? I've seen people hold stuff for months and months and still not back up. I do NOT do that.

[4/16/2004 8:14:14 PM] <Investortrader> I haven't seen him since the bubble burst
tina :o

[4/16/2004 8:14:18 PM] <tinaSDtrader> But each must decide their own strategy. Mine is to not hold Longs into a downtrend.

[4/16/2004 8:14:48 PM] <tinaSDtrader> Imagine that IT!

[4/16/2004 8:14:48 PM] <tinaSDtrader> Imagine that IT!

[4/16/2004 8:14:48 PM] <Investortrader> I believe, even if one is a very long term buy and holder ... you still need to use charts and use stops

[4/16/2004 8:14:55 PM] <Investortrader> LOL

[4/16/2004 8:15:12 PM] <tinaSDtrader> Yes, must have your mercy or Uncle point - Max you'll take on a loss. Know it in advance and obey it.

[4/16/2004 8:15:45 PM] <tinaSDtrader> Write it down, in your head it's "flexible." If not disciplined enough to take the trade off when alert hits, must use hard stops.

[4/16/2004 8:16:35 PM] <Investortrader> One thing I am good at is discipline

[4/16/2004 8:17:15 PM] <tinaSDtrader> It's a never-ending thing - always polishing and working on staying disciplined. Consistency important.

[4/16/2004 8:17:23 PM] <SkyDragon> How about AVII.

[4/16/2004 8:17:52 PM] <Investortrader> AVII ...

[4/16/2004 8:17:54 PM] <BWill> IT & Tina, thanks alot, I've been reading the log... another rule to mention is not to change timeframes in the middle of a trade... if you enter on a daily set up, don't "adjust" to the weekly when it goes against you...

[4/16/2004 8:18:09 PM] <Investortrader> Good point BWill! Very good

[4/16/2004 8:18:20 PM] <Investortrader> Don't let a trade turn into an investment

[4/16/2004 8:18:47 PM] <tinaSDtrader> :D

[4/16/2004 8:19:08 PM] <tinaSDtrader> When a day trade goes bad, becomes a swing trade. When a swing trade goes bad, you become an investor. NOT!

[4/16/2004 8:19:23 PM] <gary12> :D

[4/16/2004 8:19:30 PM] <tinaSDtrader> BUt I know traders who do that and suffer much.

[4/16/2004 8:19:33 PM] <Investortrader> :D

[4/16/2004 8:19:45 PM] <Investortrader> Probably won't know them for long ...

[4/16/2004 8:19:55 PM] <BWill> put it in the IRA, let the kids deaal with it :D

[4/16/2004 8:20:00 PM] <tinaSDtrader> I tell them e-mail me so I can short it.B)

[4/16/2004 8:20:12 PM] <Investortrader> AVII had good news which really popped the vol on 4/1

[4/16/2004 8:20:25 PM] <Investortrader> And that really made OBV look good

ClubHome

[4/16/2004 8:20:38 PM] <Investortrader> But it's failed the 50sma here
[4/16/2004 8:20:39 PM] <tinaSDtrader> They are the same ones I tell - when you've had enough of that loss and sell, call me because it will finally go up next day.
[4/16/2004 8:21:23 PM] <Investortrader> I'm feeling mixed on it, great looking OBV ... but why couldn't it get above the 50sma yet .. and is failing it now
[4/16/2004 8:21:33 PM] <Investortrader> lol tina, but isn't that so true
[4/16/2004 8:21:50 PM] <tinaSDtrader> Too true
[4/16/2004 8:22:08 PM] <Investortrader> Might go up the next minute after they sell!
[4/16/2004 8:22:30 PM] <tinaSDtrader> Yeah, they are the Low of Day!
[4/16/2004 8:23:12 PM] <tinaSDtrader> Remember the beginning days IT when you bot the very hi and sold the very low!!
[4/16/2004 8:23:14 PM] <Investortrader> Someones gotta create the low ;)
[4/16/2004 8:23:20 PM] <RoadDog> Pass along your numbers!!:D
[4/16/2004 8:23:29 PM] <tinaSDtrader> On the same stock!
[4/16/2004 8:23:50 PM] <tinaSDtrader> Sure glad I outgrew that, would never have made it.
[4/16/2004 8:23:53 PM] <Investortrader> Those were the days my friend, we thought they'd never end lol
[4/16/2004 8:24:21 PM] <Investortrader> So on AVII I wouldn't buy it until it could prove itself by a BO over the 50sma on vol
[4/16/2004 8:24:45 PM] <starbucks> that was funny IT!
[4/16/2004 8:24:45 PM] <Investortrader> Because I am getting mixed signals on it, and want to wait till it's more clear
[4/16/2004 8:24:54 PM] <Investortrader> starbucks :)
[4/16/2004 8:24:58 PM] <tinaSDtrader> Time for dinner - have a good weekend everyone.
[4/16/2004 8:25:07 PM] <Investortrader> you too tina :)
[4/16/2004 8:25:56 PM] <Investortrader> Any questions on AVII?
[4/16/2004 8:26:12 PM] <daniel329> IT.. what scans u use to look at potential stock candidates?
[4/16/2004 8:26:17 PM] <Investortrader> It does feel like that could be a false OBV on it
[4/16/2004 8:26:38 PM] <Investortrader> I have all sorts of scans daniel
[4/16/2004 8:26:40 PM] <Investortrader> vol scans
[4/16/2004 8:26:44 PM] <Investortrader> vol surge scans
[4/16/2004 8:26:49 PM] <Investortrader> candlestick scans
[4/16/2004 8:26:58 PM] <Investortrader> mo-mo scans
[4/16/2004 8:27:27 PM] <Investortrader> Plus scanning Hotto's picks!
[4/16/2004 8:29:32 PM] <hud> IT ..would you look at PFE as a upper BB play
[4/16/2004 8:29:57 PM] <Investortrader> PFE ...
[4/16/2004 8:30:03 PM] <hud> think I am getting the picture on BB
[4/16/2004 8:30:22 PM] <hud> the stock PFE
[4/16/2004 8:30:38 PM] <Investortrader> Looks good here, nice BO on good vol
[4/16/2004 8:30:52 PM] <Investortrader> Which also BO over the 50sma yesterday
[4/16/2004 8:31:05 PM] <Investortrader> OBV confirming the price rise
[4/16/2004 8:32:03 PM] <Investortrader> Might get a little resistance near the highs of today as that's around the March swing high area close to 38
[4/16/2004 8:32:27 PM] <SkyDragon> LJPC
[4/16/2004 8:32:28 PM] <Investortrader> but it looks like you are getting the picture hud :)
[4/16/2004 8:32:34 PM] <hud> ty..great lessons on BB
[4/16/2004 8:32:39 PM] <da2rth> recently, a number of stocks look like CYBS. do you play these? if so, when? i.e. ..day of bo? or day after? and how? thanks.
[4/16/2004 8:32:41 PM] <Investortrader> Welcome hud
[4/16/2004 8:33:03 PM] <Investortrader> Any questions on PFE?

ClubHome

[4/16/2004 8:33:29 PM] <CodyCare> Yes a question on PFE
[4/16/2004 8:34:12 PM] <daniel329> would u enter a trade as it's moving out of the lowest BB and riding into the upper BB? like PFE on about 03/26?
[4/16/2004 8:34:16 PM] <CodyCare> sorry, nevermind
[4/16/2004 8:34:37 PM] <Investortrader> Ok :)
[4/16/2004 8:35:17 PM] <gary12> if you have time JMAR TY
[4/16/2004 8:35:58 PM] <Investortrader> I do sometimes daniel, not sure here if I would have bot that one
[4/16/2004 8:36:17 PM] <Investortrader> Maybe the 3/29 BO
[4/16/2004 8:37:18 PM] <Investortrader> But probably not as it wasn't on higher vol and the middle BB was getting close
[4/16/2004 8:37:53 PM] <Investortrader> Now the pb in early april, that was a nice set-up
[4/16/2004 8:38:15 PM] <Investortrader> But I don't think I would have been in on the run up from the lower BB on this one
[4/16/2004 8:38:28 PM] <Investortrader> On to LJPC ...
[4/16/2004 8:38:30 PM] <daniel329> thanks..
[4/16/2004 8:38:35 PM] <Investortrader> Welcome :)
[4/16/2004 8:39:05 PM] <Investortrader> This one I covered positively also two days ago
[4/16/2004 8:40:08 PM] <Investortrader> Now we're testing the 50sma for the first attempt ... that means I would have sold at least part ... even though it had a high vol BO, and OBV is confirming
[4/16/2004 8:40:41 PM] <Investortrader> But I would be ready to buy it back a bit higher if it BO over the 50sma also
[4/16/2004 8:40:44 PM] <CodyCare> What is middle BB?
[4/16/2004 8:40:58 PM] <Investortrader> It's the 20sma by defintion Cody
[4/16/2004 8:41:09 PM] <CodyCare> Oh, I thought so. thnx
[4/16/2004 8:41:15 PM] <Investortrader> Welcome :)
[4/16/2004 8:41:56 PM] <Pucker> NPSP
[4/16/2004 8:41:56 PM] <Investortrader> So even with all the positives, and it riding the upper BB here, and all the other positives ... I would have sold some at the 50sma
[4/16/2004 8:42:23 PM] <Investortrader> Might just bust thru it, in which case I would add back a bit higher ... but usually the first attempt at the 50sma fails
[4/16/2004 8:42:47 PM] <Investortrader> But it does look like if there were one that wouldn't fail this could be it, because of all those positives
[4/16/2004 8:43:18 PM] <Pucker> Doji after two days up..maybe tired
[4/16/2004 8:43:32 PM] <hud> DJ-30 closed today at its 50ma
[4/16/2004 8:43:35 PM] <Investortrader> Might be Pucker
[4/16/2004 8:43:46 PM] <Investortrader> Another reason to take some profits here!
[4/16/2004 8:44:17 PM] <Pucker> right
[4/16/2004 8:44:40 PM] <Investortrader> Any questions on LJPC?
[4/16/2004 8:44:49 PM] <Pucker> NPSP
[4/16/2004 8:45:07 PM] <Investortrader> On to CYBS ...
[4/16/2004 8:46:02 PM] <Investortrader> If I can get in early enough on the BO I will buy it
[4/16/2004 8:48:29 PM] <Investortrader> Other than that ... where would a stop be placed ... and how far below todays close?
[4/16/2004 8:49:21 PM] <Investortrader> Jumped on earnings, the report looked good ... but it did earn only 2 cents
[4/16/2004 8:49:57 PM] <Investortrader> We have seen a lot of stocks look like this before .. only to immediately fall and end up all teh way back down
[4/16/2004 8:50:10 PM] <Investortrader> Let's look at TORM for a second
[4/16/2004 8:50:45 PM] <Investortrader> For an example of that

[4/16/2004 8:51:23 PM] <Investortrader> So I'm always very careful with patterns like this

[4/16/2004 8:52:11 PM] <Investortrader> They can be quite heady for daytraders ... but if you aren't nimble ... and I don't daytrade so doubt I would be very nimble at it ... you lose it all back

[4/16/2004 8:53:11 PM] <Investortrader> Any questions on CYBS?

[4/16/2004 8:55:01 PM] <Investortrader> With the HUGE vol it had today ... you could try to buy it in Mon morning if it looked like it was continuing ... ie open up or unch and moving up on vol ... but be nimble and I would sell if it reversed to under todays close to avoid being in for a nasty reversal

[4/16/2004 8:55:03 PM] <da2rth> thanks IT...I thought I was the only one not so nimble too..;)

[4/16/2004 8:55:50 PM] <Investortrader> Hehehe da2rth, when it comes to daytrading I'm probably pretty clumsy

[4/16/2004 8:56:02 PM] <SkyDragon> You said you may buy a BO if it is early enough. Could you explain that concept a little?

[4/16/2004 8:56:33 PM] <Investortrader> SkyDragon ... early in the BO the support is still close enough

[4/16/2004 8:56:42 PM] <Investortrader> Let's look at the 5's on it

[4/16/2004 8:58:06 PM] <Investortrader> If you got in early it was still fairly close to the base it was breaking out of

[4/16/2004 8:58:52 PM] <Investortrader> If you didn't get in until after 10 when it was 7 - 7.25, you'd be faced with an immediate pb

[4/16/2004 8:59:17 PM] <Investortrader> Then what do you do? Will it retrace the whole day? Many times they do

[4/16/2004 8:59:50 PM] <Investortrader> If you're an experienced daytrader, that's one thing ... but I am not

[4/16/2004 9:01:10 PM] <SkyDragon> Would you call the opening the support point or the previous HOD?

[4/16/2004 9:02:14 PM] <Investortrader> The high of that little base it made before the BO is 5.25

[4/16/2004 9:02:33 PM] <Investortrader> It opened today at 5.30 ... so they are close enough to be pretty much the same

[4/16/2004 9:02:45 PM] <Investortrader> And the lod today was 5.26

[4/16/2004 9:02:57 PM] <Investortrader> So just under the lowest of those three prices

[4/16/2004 9:03:40 PM] <SkyDragon> And what would be you maximum entry point?

[4/16/2004 9:03:40 PM] <Investortrader> Since they are all pretty close

[4/16/2004 9:05:00 PM] <Investortrader> I probably would have used around 5.20 for a stop

[4/16/2004 9:05:07 PM] <daniel329> IT.. need to get going.. but thanks a lot for this class and sharing with us... have a great weekend and well deserved time off...

[4/16/2004 9:05:27 PM] <Investortrader> Which would make around 5.40 - 5.50 a reasonable loss if it reversed from there

[4/16/2004 9:05:45 PM] <Investortrader> Thank you daniel, good trading :)

[4/16/2004 9:06:06 PM] <Investortrader> But I cut losses shorter than a lot do

[4/16/2004 9:06:22 PM] <Investortrader> And if I put on a smaler position than normal might go a bit higher

[4/16/2004 9:07:11 PM] <Investortrader> And if I did buy it, I would have sold at least part at the close

[4/16/2004 9:07:39 PM] <Investortrader> If not before the close, after such a good run on one day

[4/16/2004 9:07:56 PM] <SkyDragon> Sounds very reasonalbe. Thanks. Your classes alone are worth the monthly cost of TCNet.

[4/16/2004 9:08:09 PM] <Investortrader> In case it reversed down tomorrow, I would

ClubHome

have locked in some profits, and if it continues to run, I would still own some

[4/16/2004 9:08:25 PM] <Investortrader> Thank you SkyDragon :)

[4/16/2004 9:08:39 PM] <Investortrader> That's quite a compliment!

[4/16/2004 9:09:49 PM] <Bobtrader> second that

[4/16/2004 9:10:01 PM] <Investortrader> Thank you Bobtrader :)

[4/16/2004 9:10:08 PM] <Investortrader> On to JMAR

[4/16/2004 9:11:26 PM] <enzo> IT how did you find jmar

[4/16/2004 9:11:28 PM] <Investortrader> Looks like this one jumped on earnings report on 4/1

[4/16/2004 9:11:38 PM] <Investortrader> enzo, someone asked about it :)

[4/16/2004 9:11:45 PM] <Bobtrader> if you have time ...sspi ty

[4/16/2004 9:13:13 PM] <Investortrader> After that it tried to ride the upper BB for a few days .. notice how weak it was though, usually closing in the lower half of it's range each day

[4/16/2004 9:14:22 PM] <Investortrader> It does have good volume characteristics, with the up days on better vol than the down days since the BO

[4/16/2004 9:14:39 PM] <Investortrader> And OBV looks good on it still

[4/16/2004 9:15:07 PM] <Investortrader> Today it tried to rally and came back ... looks like it needs a bit more rest

[4/16/2004 9:15:27 PM] <Investortrader> The middle BB and the 50sma have converged, probably wants to test that again

[4/16/2004 9:16:20 PM] <Investortrader> I wouldn't want to see that fail

[4/16/2004 9:17:11 PM] <CodyCare> can you review FDG as a possible buy here, when you have time.

[4/16/2004 9:17:54 PM] <Investortrader> Right now both of those are at 2.71, and halfway down the big vol BO candle is 2.73

[4/16/2004 9:18:30 PM] <gary12> ty IT

[4/16/2004 9:18:31 PM] <Investortrader> Another reason I wouldn't want to see that area fail

[4/16/2004 9:18:36 PM] <Investortrader> Welcome gary :)

[4/16/2004 9:18:52 PM] <Investortrader> Any questions on JMAR?

[4/16/2004 9:19:08 PM] <CodyCare> so a bounce up from 50 sma here would be a buy? on JMAR

[4/16/2004 9:19:42 PM] <Investortrader> Cody, if I were interested in it I would probably look to buy some around the 50sma as the chart still looks good to me here

[4/16/2004 9:21:06 PM] <Investortrader> Though it's close enough here almost to pick some up too for me

[4/16/2004 9:21:14 PM] <da2rth> upper bb...\$3.81 would be 1st target?

[4/16/2004 9:22:20 PM] <Investortrader> Yes, a bounce off the middle BB usually runs to the upper BB at least

[4/16/2004 9:22:26 PM] <Investortrader> On a good chart

[4/16/2004 9:22:34 PM] <Investortrader> Which I think this is

[4/16/2004 9:23:16 PM] <Investortrader> And the upper BB looks to be right around the last swing high

[4/16/2004 9:23:33 PM] <Investortrader> On 4/6

[4/16/2004 9:24:23 PM] <Investortrader> And if it lost the 50sma, it would lose me

[4/16/2004 9:24:38 PM] <da2rth> i mean \$3.58...i think you are using 20, 20 for BB. sorry..

[4/16/2004 9:24:53 PM] <Investortrader> Yes, I put on that line to show it

[4/16/2004 9:25:07 PM] <Investortrader> It did look like your 3.81 was too high

[4/16/2004 9:25:23 PM] <da2rth> i was using 20, 30

[4/16/2004 9:25:27 PM] <Investortrader> Somewhere between 3.60 and 3.70 I think it is

[4/16/2004 9:25:29 PM] <Investortrader> Agg

[4/16/2004 9:25:34 PM] <Investortrader> ahhh I mean lol

ClubHome

[4/16/2004 9:25:42 PM] <da2rth> yes..that's about right.
[4/16/2004 9:26:26 PM] <Investortrader> I use 2 standard deviations as that is what John himself uses, and I learned watching him multiple times every day on FNN back in the early 80's
[4/16/2004 9:26:51 PM] <Investortrader> Until they went under lol
[4/16/2004 9:27:14 PM] <Investortrader> Now all we have is CNBC, still not even close
[4/16/2004 9:27:38 PM] <Investortrader> Any questions on JMAR?
[4/16/2004 9:28:17 PM] <Investortrader> On to NPSP ...
[4/16/2004 9:29:25 PM] <Investortrader> Same comment on this one as one previous, even with the good OBV I would wait until we see a BO over the 50sma to buy it
[4/16/2004 9:30:45 PM] <da2rth> looks like 50 and 200ma...daily are converging at \$28.52. could be pretty stiff resistance there.
[4/16/2004 9:31:05 PM] <Investortrader> It's not too far away, and since the BIG vol day on 3/30 couldn't hold over the 50sma, I would wait
[4/16/2004 9:31:44 PM] <Investortrader> Good eye da2rth, another reason to wait for the BO!
[4/16/2004 9:33:20 PM] <Investortrader> These one day huge vol stocks like this, can distort the OBV
[4/16/2004 9:33:48 PM] <Investortrader> Again I wonder, why with such a big vol day, could it not hold the 50sma, and not get over it by now
[4/16/2004 9:34:20 PM] <Investortrader> Though the gap from that BO has been filled on a rounding bottomish look here
[4/16/2004 9:34:43 PM] <Investortrader> And OBV has a slight positive divergence here
[4/16/2004 9:34:54 PM] <Investortrader> On the rounded bottom
[4/16/2004 9:35:23 PM] <da2rth> now you have a sharp eye IT
[4/16/2004 9:35:30 PM] <da2rth> lol
[4/16/2004 9:35:49 PM] <Investortrader> If one wanted to be in here on that ... I wouldn't want to see the recent lows of that bottom break by too much
[4/16/2004 9:36:00 PM] <Investortrader> I've always liked rounded bottoms da2rth ;)
[4/16/2004 9:36:20 PM] <da2rth> me too...:8
[4/16/2004 9:36:38 PM] <Investortrader> Any questions on NPSP?
[4/16/2004 9:37:05 PM] <Investortrader> On to SSPI ...
[4/16/2004 9:37:06 PM] <gary12> i think i'll pass :) on the bottom round or not
[4/16/2004 9:37:46 PM] <Investortrader> lol gary!
[4/16/2004 9:38:18 PM] <Investortrader> SSPI, another reason I don't trade those huge gap up days, since I am a swing trader
[4/16/2004 9:38:38 PM] <gary12> i look for breakout top ;)
[4/16/2004 9:39:20 PM] <Investortrader> Those are nice too gary :8
[4/16/2004 9:39:52 PM] <Investortrader> I don't see much compelling in SSPI to buy it
[4/16/2004 9:40:32 PM] <Investortrader> While it may run back up, I've seen too many come all the way back down ... will need to see more in this chart to like it here
[4/16/2004 9:40:36 PM] <Bobtrader> HOW ABOUT TO HOLD IT ..IN 1.60
[4/16/2004 9:40:53 PM] <Bobtrader> sorry about caps
[4/16/2004 9:40:55 PM] <Investortrader> I don't really like the chart Bobtrader
[4/16/2004 9:41:45 PM] <Investortrader> Before the news there wasn't too much vol in it
[4/16/2004 9:42:08 PM] <Investortrader> I don't like it because I can't really find much to trade off the chart
[4/16/2004 9:42:13 PM] <caldoc> Hello IT, everyone. Got here a little late tonight.
[4/16/2004 9:42:20 PM] <Investortrader> Hi caldoc :)
[4/16/2004 9:42:43 PM] <Investortrader> It could be called either way, not enough

vol history for me

[4/16/2004 9:43:04 PM] <Bobtrader> me either..ty

[4/16/2004 9:43:29 PM] <Investortrader> Is today a lower vol pb? Or is it just going to head down ... will it bounce off the LR30, will it reverse up tomorrow .. I just can't say here

[4/16/2004 9:43:39 PM] <Bobtrader> hopin for direction

[4/16/2004 9:43:48 PM] <Bobtrader> :)

[4/16/2004 9:44:09 PM] <Investortrader> Even though today is a lower vol pb than yesterday, it's still a lot higher vol than it had before the BO day

[4/16/2004 9:44:23 PM] <caldoc> If you have time, IT, could you do an analysis of DRXR?

[4/16/2004 9:44:53 PM] <Investortrader> Sorry I can't be more help on this one :(

[4/16/2004 9:45:05 PM] <Investortrader> On to FDG ...

[4/16/2004 9:45:38 PM] <Bobtrader> ok did not notice that vol before ty again ..learn new

[4/16/2004 9:45:41 PM] <Investortrader> Oh, one more thing on SSPI

[4/16/2004 9:46:05 PM] <Investortrader> If I had owned it from before the big BO day, I would have sold at least half on that day

[4/16/2004 9:46:30 PM] <Bobtrader> me know ..me goof

[4/16/2004 9:46:32 PM] <Investortrader> Who knows where, but somewhere

[4/16/2004 9:46:41 PM] <Investortrader> Next time you'll get it Bob :)

[4/16/2004 9:46:50 PM] <Investortrader> FDG ...

[4/16/2004 9:47:13 PM] <Investortrader> This one looks ok here

[4/16/2004 9:47:30 PM] <Bobtrader> working on it and you are most helpful.. ty again

[4/16/2004 9:47:36 PM] <Investortrader> In late Jan, and again in March, and again now, it came down and the 50sma held it

[4/16/2004 9:47:43 PM] <Investortrader> Welcome Bob :)

[4/16/2004 9:48:30 PM] <Investortrader> And in late March, from 3/22 on, the lows of that base are right in the area the 50sma is now

[4/16/2004 9:48:42 PM] <Investortrader> Right around that 40 line

[4/16/2004 9:49:56 PM] <Investortrader> The only thing that is a little worrisome is the two higher vol down days that got us down to the 50sma, on 4/13 and 4/14

[4/16/2004 9:50:08 PM] <Investortrader> And this bounce is lower vol

[4/16/2004 9:50:21 PM] <Investortrader> But as long as the 50sma holds it's good here

[4/16/2004 9:50:47 PM] <Investortrader> Hmmm, just noticed I'm not using log chart for some reason, argh

[4/16/2004 9:51:33 PM] <Investortrader> So this one still looks ok here

[4/16/2004 9:52:00 PM] <Investortrader> But again, if I owned it, and it lost the 50sma, it would lose me

[4/16/2004 9:52:16 PM] <caldoc> The last 2 days were up, but vol is half of the previous 2 down days. Isn't that a bit bothersome? Does that suggest it will probably test the 50sma again soon?

[4/16/2004 9:52:48 PM] <Investortrader> That is a bit worrisome caldoc

[4/16/2004 9:53:12 PM] <Investortrader> But ...

[4/16/2004 9:53:16 PM] <Investortrader> This is a trust

[4/16/2004 9:53:44 PM] <Investortrader> I'd have to look into when it pays .. monthly? quarterly?

[4/16/2004 9:53:57 PM] <Investortrader> And see if it just paid out, or was just about to

[4/16/2004 9:54:36 PM] <da2rth> also...possible double top...march and april highs....ms lower than march highs too.

[4/16/2004 9:54:37 PM] <Investortrader> CRT's (Canadian Royalty Trusts) are a different animal, we talked a bit about the Oil and Gas ones the other day

[4/16/2004 9:55:02 PM] <caldoc> Wow. I totally missed the trust thing. Always something to learn, IT. Thx.
[4/16/2004 9:55:36 PM] <Investortrader> Good point da2rth, I see the possible dbl top, another reason to be out if the 50sma fails!
[4/16/2004 9:55:41 PM] <Investortrader> Hi malkovich
[4/16/2004 9:55:58 PM] <Investortrader> Welcome caldoc :) I looked into CRT's pretty good a few years ago
[4/16/2004 9:56:06 PM] <malkovich> hi investortrader how ru
[4/16/2004 9:56:24 PM] <Investortrader> Doing good here, looking forward to prospecting next week!
[4/16/2004 9:56:32 PM] <Investortrader> Any questions on FDG?
[4/16/2004 9:57:13 PM] <Investortrader> Since I was not using log charts for some reason, I'm going to quickly look back at all the ones I covered to see if I missed something now that I have log charts back on
[4/16/2004 9:57:16 PM] <malkovich> what do u expect in the next week
[4/16/2004 9:57:39 PM] <Investortrader> I'm going on vacation next week malkovich :)

[4/16/2004 9:58:13 PM] <malkovich> wow thats great
[4/16/2004 9:58:26 PM] <malkovich> r u goin on the the cruise training
[4/16/2004 9:59:30 PM] <Investortrader> No, should be a good time though
[4/16/2004 9:59:44 PM] <Investortrader> On to DRXR ...
[4/16/2004 10:00:12 PM] <america> IT, do you use only this chart?
[4/16/2004 10:00:23 PM] <america> chart template?
[4/16/2004 10:00:47 PM] <Investortrader> Mainly america, I always use this one, also have a few others I look at sometimes
[4/16/2004 10:01:32 PM] <Investortrader> This one I use for candlestick scans, to show them more clearly along with using Stochs with them
[4/16/2004 10:01:33 PM] <america> what indicators do you consider most important and why? when you have the chance. thanks
[4/16/2004 10:02:21 PM] <Investortrader> But still always look at my KISS template too
[4/16/2004 10:02:47 PM] <america> thanks much.
[4/16/2004 10:03:31 PM] <Investortrader> I think all the ones on my KISS template are important, BB's on price and OBV, 50sma on both price and OBV, OBV of course lol
[4/16/2004 10:03:54 PM] <america> yes lol
[4/16/2004 10:04:16 PM] <Investortrader> I rely heavily on OBV ... and BB's ... and price/vol patterns
[4/16/2004 10:04:27 PM] <Investortrader> Notice I call them price/vol patterns and not just price patterns
[4/16/2004 10:04:50 PM] <Investortrader> Price without volume is meaningless
[4/16/2004 10:05:11 PM] <Investortrader> Or as FW put it once .. without volume there is no price
[4/16/2004 10:05:43 PM] <america> the mm's haven't figured out how to do that yet, huh?
[4/16/2004 10:05:59 PM] <Investortrader> I added LR30 to my KISS template after seeing how well Hotto uses it, first addition I ever made to it
[4/16/2004 10:06:06 PM] <Investortrader> lol america :)
[4/16/2004 10:06:52 PM] <Investortrader> I certainly don't like the action today in DRXR
[4/16/2004 10:07:11 PM] <Investortrader> Plenty of sellers out there
[4/16/2004 10:08:34 PM] <da2rth> on 3 and 4 day, obv extremely negative.
[4/16/2004 10:08:34 PM] <Investortrader> This looks like a very negative day to me,

closing down almost at the lows ... almost 5 dollars off the highs .. but since it closed up 55 cents it sent the OBV soaring

[4/16/2004 10:08:59 PM] <Investortrader> One of those times where I think that needs to be discounted

[4/16/2004 10:09:51 PM] <Investortrader> It is da2rth

[4/16/2004 10:10:07 PM] <Investortrader> So I wouldn't be really interested in this one here

[4/16/2004 10:10:55 PM] <Investortrader> These volatile ones can be fun to play ... or can be harsh ...

[4/16/2004 10:12:21 PM] <CodyCare> I have to go now. Thank-you so much!

[4/16/2004 10:12:31 PM] <caldoc> Thx IT. I got out at the highs today, but back in at the lows. I guess I'll have to be real careful next week.
