[3/5/2004 8:39:45 AM] [Stixman] Kudlow gets upset when anyone interrupts him but he does nothing but interrupt whoever is voicing their opinion. He thinks whoever shouts the loudest and longest is correct.

[3/5/2004 8:43:49 AM] [hotto] over 600K stopped looking for work.
[3/5/2004 8:43:56 AM] [hotto] just in Feb.
[3/5/2004 8:44:12 AM] [Zathrus] they all joined hotto club....
[3/5/2004 8:44:27 AM] [dagwood] no gas to get to work anyway
[3/5/2004 8:44:35 AM] [Mariobozu] And the illegals are being sent back instead of milking our system!
[3/5/2004 8:44:51 AM] [neofighter] keep talking hotto, I'm listening
[3/5/2004 8:45:19 AM] [hotto] There will be some Real searching - to understand what is different. All the models are failing.

[3/5/2004 8:48:56 AM] [Zathrus] Unless someone does something about outsourcing,

we could be looking at a decades long issue IMO. We can't ALL work at Wal-Mart

[3/5/2004 8:49:07 AM] [hotto] Interesting... how the COMP rallied right up to the decision point..

[3/5/2004 8:49:10 AM] [SeattleSteve] Hotto, *if* the market reverses off a morning low (an open question), do you see any interesting setups in the averages under that scenario?

[3/5/2004 8:49:19 AM] [tiga] But we're not to be concerned about outsourcing.....other jobs that add more value will be created to put people to work....yeah right.....

[3/5/2004 8:49:41 AM] [Marioboza] Zath, we went through this went we changed from agricultural to industrial - it is CHANGE

[3/5/2004 8:49:59 AM] [Zathrus] Different thought - the industrial was HERE -

[3/5/2004 8:50:23 AM] [Marioboza] China is losing amny more jobs than US - MANY more this is really about getting educated and facing change, just like farmers had to

[3/5/2004 8:50:46 AM] [neofighter] whatever system we live under, must work for the majority of the people, we must have a large middle class to fund all the programs

[3/5/2004 8:50:51 AM] [atexpal] economy will adjust...politician in power as it does will get credit "accidentallly"

[3/5/2004 8:50:53 AM] [Stixman] Aren't the jobs outsourced jobs that no one here wants anyways??

[3/5/2004 8:50:56 AM] [Marioboza] The information revolution is HERE

[3/5/2004 8:51:21 AM] [Zathrus] Stix - I'm losing mine soon - going to India - I don't run a lead-blower

[3/5/2004 8:51:21 AM] [Marioboza] DID everyone want to be farmers and run plow back in the 40s?

[3/5/2004 8:51:25 AM] [tiga] Yeah like all those IT jobs going to India.....no one wants those

[3/5/2004 8:51:36 AM] [Zathrus] sorry - leaf blower

[3/5/2004 8:51:56 AM] [Marioboza] We all want to pay less for more - do any of you run around making sure you pay the HIGHEST price?

[3/5/2004 8:51:57 AM] [hotto] More Stock traders...)

[3/5/2004 8:52:09 AM] [MarcoPolo] The politicians will use this as there main stumping idea offer tax incentives to those Benedict Arnold companies to keep job's..

[3/5/2004 8:52:21 AM] [Gigantus] No one wants those! Thus the bloated American worker

[3/5/2004 8:52:29 AM] [Marioboza] Jobs, stock market, success - everything follows the MONEY\$\$

[3/5/2004 8:52:32 AM] [dagwood] MAMA is not feeling well this morning.

[3/5/2004 8:07:02 PM] [Golfermary] Hi there

[3/5/2004 8:07:57 PM] [Investortrader] I couldn't get to TORM last night so I'll do it first tonight

[3/5/2004 8:07:59 PM] [Aktony] Hello IT :)

[3/5/2004 8:09:21 PM] [Investortrader] This one had such a huge distribution day at the top that it really skews the OBV

[3/5/2004 8:09:49 PM] [Investortrader] In cases like this, I start over with where it is now

[3/5/2004 8:10:17 PM] [Investortrader] Keeping in mind there will be a lot of overhead supply from those who bought it so much higher

[3/5/2004 8:10:24 PM] [enzo] hi it

[3/5/2004 8:10:55 PM] [Investortrader] Today it came down and tagged the sma20 and bounced very nicely off of it

[3/5/2004 8:11:44 PM] [Investortrader] That was also right around the BO area at the end of Feb

[3/5/2004 8:12:39 PM] [Investortrader] This one looks ok here with the support holding as it did

[3/5/2004 8:12:53 PM] [Investortrader] And the bullish engulfing candle on it today

[3/5/2004 8:13:36 PM] [Investortrader] Any questions on TORM?

[3/5/2004 8:14:04 PM] [Aktony] If the OBV goes outside the bb, how do you interpret that?

[3/5/2004 8:15:28 PM] [Investortrader] It depends on the pattern in which it occurred ... usually it's a sign of strength but after a big move when it happens it often is signalling an exhaustion of the move

[3/5/2004 8:16:20 PM] [Investortrader] The final gap up day that is on huge volume which marks the top will make OBV move way outside of the BB's usually

[3/5/2004 8:16:31 PM] [Aktony] Thanks. Also, note when the OBV was below the bb's

ClubHome

about 5 days ago.

[3/5/2004 8:17:01 PM] [Investortrader] Right

[3/5/2004 8:17:55 PM] [Investortrader] That was one of those huge volume reversal days, where it was over the BB's, then tanked hard

[3/5/2004 8:18:46 PM] [Aktony] Then, does OBV outside the bb's suggest reversal?

[3/5/2004 8:19:22 PM] [Investortrader] Notice it happened at an extreme in price after a big run-up already ... that is when it suggests a reversal

[3/5/2004 8:19:51 PM] [Aktony] Thanks. I've noticed that on several fast-moving stocks and wasn't sure how to interpret it.

[3/5/2004 8:20:01 PM] [Icamani] good evening IT - mostly watch and listen - question is: can you use the BB double touches (upper or lower) set out by Hotto this last week for interday scalping of 5 or 15 min charts - if so which time frame ?

[3/5/2004 8:20:09 PM] [Icamani] ty

[3/5/2004 8:20:55 PM] [Investortrader] You should be able to Icamani, but I'm not the one to talk to about daytrading as I don't do it

[3/5/2004 8:21:52 PM] [Investortrader] On to BKHM ...

[3/5/2004 8:22:40 PM] [Investortrader] This one has been in a steady downtrend for awhile now with the OBV dropping also

[3/5/2004 8:23:01 PM] [Investortrader] With hardly any rally attempts along the way

[3/5/2004 8:23:42 PM] [Investortrader] If you were here when the market closed today you heard Hotto and I briefly discuss this one

[3/5/2004 8:24:15 PM] [Investortrader] We had both come to the conclusion that around the lower BB area looks like a reasonable place

[3/5/2004 8:25:09 PM] [Investortrader] Notice back in late Dec this area was the resistance that it broke through to start that nice rally

[3/5/2004 8:26:00 PM] [Investortrader] It looks like it has a chance to waterfall down to that level quickly here

[3/5/2004 8:28:25 PM] [Investortrader] That should be a pretty good area of support there

[3/5/2004 8:28:37 PM] [Investortrader] Any questions on BKHM?

[3/5/2004 8:29:16 PM] [Aktony] No questions here. Thanks

[3/5/2004 8:29:52 PM] [Investortrader] That's the only two I had to cover, so the floor is open

[3/5/2004 8:30:54 PM] [Zathrus] TLAB?

[3/5/2004 8:31:22 PM] [Investortrader] TLAB ...

[3/5/2004 8:33:04 PM] [Investortrader] I like how the OBV has been making new highs here

[3/5/2004 8:33:23 PM] [Investortrader] Even before the price

ClubHome

[3/5/2004 8:33:32 PM] [Zathrus] I'm concerned that it hasn't been able to break the triangle -
[3/5/2004 8:34:40 PM] [Investortrader] It may come back to test the 50sma, which I'd look at as a good place to pick some up
[3/5/2004 8:35:11 PM] [Investortrader] I'm not too worried about that yet
[3/5/2004 8:35:20 PM] [Golfermary] Triangle - meaning?
[3/5/2004 8:35:21 PM] [Zathrus] I'm in at 9.50 on the last bounce of 50 sma, so riding nervously along in the joy wagon :)
[3/5/2004 8:36:07 PM] [Investortrader] Thanks Zathrus :)
[3/5/2004 8:36:10 PM] [Zathrus] take a look at the lines in Cyan on my chart Mary
[3/5/2004 8:36:41 PM] [Zathrus] So you think it's best to set the stop below the 50 sma at this point IT?
[3/5/2004 8:36:55 PM] [Golfermary] aha Z thats what I guessed it was!! I am learning!!! Thanks!
[3/5/2004 8:37:11 PM] [Investortrader] Notice where the 50sma is
[3/5/2004 8:37:19 PM] [Zathrus] my pleasure mary
[3/5/2004 8:37:45 PM] [Zathrus] yes - 50 forms the bottom of the triangle for the most part
[3/5/2004 8:38:04 PM] [Investortrader] Making it an even more important support .. I'd be out if it breaks by too much
[3/5/2004 8:38:56 PM] [Zathrus] agreed - it's always a touchy subject though - how much is too much? how much is enough? the kind of thing that makes my remaining hair fall out
[3/5/2004 8:38:59 PM] [Investortrader] Then decide if you are trading it if you want to pick it up again around the lower BB in case it's now in a sideways channel
[3/5/2004 8:39:45 PM] [Zathrus] good idea - thanks
[3/5/2004 8:39:51 PM] [Investortrader] Welcome :)
[3/5/2004 8:40:32 PM] [Zathrus] I also couldn't help noticing that the LR30 once again provided support - it's amazing how often that works
[3/5/2004 8:41:20 PM] [Investortrader] That's why I added it to my KISS template after joining Hotto club, when I saw how well it works
[3/5/2004 8:47:28 PM] [cuidado] Z- your OBV_50MA I haven't seen before. Do you find it very useful?
[3/5/2004 8:48:11 PM] [Zathrus] Well, I put that on there just for one more reference point - if the price shows 50, it makes sense to me to it for OBV as well
[3/5/2004 8:48:45 PM] [dwells129] :D
[3/5/2004 8:48:58 PM] [cuidado] I see... I was wondering about divergences..
[3/5/2004 8:49:00 PM] [Investortrader] I've always used it, and have talked about it

before in class :)

[3/5/2004 8:49:07 PM] [Golfermary] Jeez - dont show AAUK - pro advisor told me to sell it early Nov! (long before I started TCNet!)

[3/5/2004 8:49:09 PM] [ces] It AVNX ?

[3/5/2004 8:49:29 PM] [Investortrader] Ooops Golfermary :(

[3/5/2004 8:49:31 PM] [Zathrus] I've actually been playing around with backtesting a system using a 10 and 50 day MA on OBV - it's actually not to bad....

[3/5/2004 8:50:11 PM] [Investortrader] I'm just going through some of my scans

[3/5/2004 8:50:30 PM] [cuidado] IT, OOPs! I guess I have seen it before!

[3/5/2004 8:50:38 PM] [Investortrader] AVNX ...

[3/5/2004 8:50:45 PM] [Investortrader] Hehehe cuidado ;)

[3/5/2004 8:51:03 PM] [Investortrader] This chart looks nice

[3/5/2004 8:51:48 PM] [Zathrus] I forgot one thing - did everyone observe a moment of silence for Martha Stewart today? BWAHAHAHAHAHA!! :D

[3/5/2004 8:51:48 PM] [Investortrader] We've had a good pb

[3/5/2004 8:52:07 PM] [Golfermary] Just to let you know - also had me sell DNA in 5/03 & WOOF the same time as AAUK!

[3/5/2004 8:52:21 PM] [Investortrader] Notice the OBV divergence at the bottom

[3/5/2004 8:53:04 PM] [Investortrader] In early March when it tested the late Feb low, the OBV didn't come down near as much as the price ... and the Feb bottom held

[3/5/2004 8:53:17 PM] [Investortrader] Now we're bouncing off it on increasing volume

[3/5/2004 8:54:10 PM] [Investortrader] This pattern is a very good set-up

[3/5/2004 8:54:29 PM] [Investortrader] Let's look back in this downtrend

[3/5/2004 8:54:45 PM] [Investortrader] To point out the importance of this type of set-up

[3/5/2004 8:55:14 PM] [Investortrader] After it popped in mid-Jan, it went sideways the rest of the month

[3/5/2004 8:55:25 PM] [Investortrader] But notice OBV was deteriorating

[3/5/2004 8:55:46 PM] [Investortrader] Making new lows as the price was trading sideways

[3/5/2004 8:56:07 PM] [Investortrader] Then it fell down to the 50sma on 2/5

[3/5/2004 8:56:52 PM] [Investortrader] Got the usual bounce off the 50sma on first approach then retested the 50sma 2/12 thru 2/18

[3/5/2004 8:57:31 PM] [Investortrader] But notice again, the OBV on 2/12 when the price was testing that 2/5 low, was lower than it was on 2/5

[3/5/2004 8:57:53 PM] [Investortrader] So price was testing that low, but OBV was making new lows .. still not the right set-up

ClubHome

[3/5/2004 8:58:30 PM] [Investortrader] And down we came to make a new low on 2/23 thru 2/25 in both price and OBV
[3/5/2004 8:59:00 PM] [Investortrader] However this time on 3/2 when the price tested that low, OBV wasn't making new lows, it was making a higher low
[3/5/2004 8:59:27 PM] [Investortrader] And now we have broken out above the 2/27 swing high
[3/5/2004 8:59:59 PM] [Investortrader] This is one good thing to look for in a downtrend when you are watching a stock drop and waiting to buy and wondering where to step in
[3/5/2004 9:00:46 PM] [SusanM] That was quite informative !
[3/5/2004 9:00:56 PM] [Investortrader] This is a pretty common pattern and easy to spot visually too
[3/5/2004 9:01:04 PM] [Golfermary] Thanks !
[3/5/2004 9:01:05 PM] [Investortrader] Thanks Susan :)
[3/5/2004 9:01:15 PM] [Investortrader] Welcome Golfermary :)
[3/5/2004 9:01:25 PM] [ces] Thanks It
[3/5/2004 9:01:33 PM] [Investortrader] Welcome ces :)
[3/5/2004 9:02:38 PM] [tickpick] neat analysis IT
[3/5/2004 9:02:49 PM] [Investortrader] Thank you tickpick :)
[3/5/2004 9:03:09 PM] [blusky] thank you
[3/5/2004 9:03:32 PM] [nitrobbob] good stuff IT
[3/5/2004 9:03:39 PM] [Bobtrader] real good IT ..thanks
[3/5/2004 9:03:50 PM] [cobralso] Hi IT
[3/5/2004 9:04:02 PM] [Investortrader] The first resistance on it would be at the 50sma, notice also that was the resistance from 2/13 to 2/19
[3/5/2004 9:04:18 PM] [Investortrader] Welcome blusky and nitrobbob and Bobtrader :)
[3/5/2004 9:04:35 PM] [Investortrader] Hi cobralso
[3/5/2004 9:05:12 PM] [Investortrader] After that you're looking at the upper BB, which also is around the resistance area of the 2/6 - 2/11 bounce
[3/5/2004 9:07:07 PM] [Bobtrader] thanks SIG ..good one
[3/5/2004 9:07:08 PM] [nitrobbob] wasn't the sma50 support from 2-13 to 2-19?
[3/5/2004 9:07:33 PM] [cuidado] IT, whoa... don't you mean support from 2/13-2/19 and sma20 providing resistance of 2/6-2/11 bounce?
[3/5/2004 9:07:42 PM] [Investortrader] Yes it was, it's an important avg
[3/5/2004 9:08:20 PM] [Investortrader] cuidado, I mean, where the 50sma is right now, is at the top of that 2/13 - 2/19 range
[3/5/2004 9:08:28 PM] [Investortrader] Not where the 50sma was then
[3/5/2004 9:08:51 PM] [cuidado] Ohhhhhhhhhh.....sorry

ClubHome

[3/5/2004 9:09:02 PM] [Investortrader] :)
[3/5/2004 9:09:32 PM] [cuidado] :o
[3/5/2004 9:10:09 PM] [Golfermary] Nite all - thanks - dinner time! Bye
[3/5/2004 9:10:20 PM] [Investortrader] Nite Golfermary
[3/5/2004 9:10:34 PM] [cuidado] and the same re:the ubb, right?
[3/5/2004 9:11:15 PM] [Investortrader] Right, it's at the same place that capped the 2/6 - 2/11 rally attempt
[3/5/2004 9:11:27 PM] [Investortrader] The bounce off the first 50sma approach
[3/5/2004 9:11:54 PM] [Investortrader] The second approach it didn't bounce at all off of it, then fell thru it
[3/5/2004 9:12:59 PM] [Investortrader] You'll usually see the same thing in reverse ... so there's a good possibility tomorrow it will run up to tag the 50sma and then pb to around the 2/27 swing high support
[3/5/2004 9:13:44 PM] [Investortrader] Which is also the 20sma
[3/5/2004 9:14:21 PM] [Investortrader] The increasing vol on it is very nice
[3/5/2004 9:15:40 PM] [cuidado] so first target is 5.67-ish?
[3/5/2004 9:15:53 PM] [Investortrader] Right
[3/5/2004 9:16:35 PM] [Investortrader] There is always a chance it could blow right thru any target, so always watch if you can when it comes close to there
[3/5/2004 9:17:01 PM] [cuidado] Sure....How are you trading it since you don't daytrade?
[3/5/2004 9:17:09 PM] [Investortrader] Back in late Dec the 50sma didn't stop it at all
[3/5/2004 9:17:45 PM] [Investortrader] My timeframe is usually a few days to a couple of weeks .. though I'll hold longer if the trend still looks good
[3/5/2004 9:18:31 PM] [nitrobb] so set an alert at say 5.65 and watch then
[3/5/2004 9:19:08 PM] [Investortrader] Maybe even 5.60
[3/5/2004 9:20:09 PM] [Investortrader] About a nickel over todays hod, might just run it right on up there
[3/5/2004 9:21:10 PM] [cuidado] good advice on the alert.... I don't make enough use of them...
[3/5/2004 9:21:59 PM] [Investortrader] If you're using TCNet for alerts I've heard many people say they are late
[3/5/2004 9:22:11 PM] [cuidado] yes, if volume continues to expand, it could move similar to late Dec...
[3/5/2004 9:23:07 PM] [cuidado] re: alerts, I use Quote Tracker, which is neat because you can use your own sound files
[3/5/2004 9:23:29 PM] [Investortrader] That is neat, have different sounds for longs and shorts

ClubHome

[3/5/2004 9:24:29 PM] [cuidado] yes, you can say, "AVNX is at 5.60! Take a look , you jerk!"

[3/5/2004 9:24:44 PM] [Investortrader] LOL

[3/5/2004 9:25:32 PM] [cuidado] tx much for the analysis and trading suggestions

[3/5/2004 9:25:52 PM] [Investortrader] Only analysis .. no trading suggestions :)

[3/5/2004 9:26:09 PM] [Investortrader] Just what I might do ;)

[3/5/2004 9:26:21 PM] [cuidado] er...FEPO, of course!:8

[3/5/2004 9:26:31 PM] [Investortrader] =D

[3/5/2004 9:26:55 PM] [nitrobo] my alert would have to call me MR. Jerk!

[3/5/2004 9:27:11 PM] [Investortrader] Make it show respect!

[3/5/2004 9:27:51 PM] [nitrobo] =D

[3/5/2004 9:28:00 PM] [cuidado] It'll repeat anything you say into the microphone, IT.

[3/5/2004 9:28:27 PM] [Investortrader] Gimme a B lol

[3/5/2004 9:28:28 PM] [sunny] on that note, here's what i play when i make a dopey decision: <http://texas.clubsi.com/Josh/ubb/youare.swf>

[3/5/2004 9:28:39 PM] [cuidado] er...nitro...jeez, I can't seem to read and type at the ssame time

[3/5/2004 9:29:13 PM] [cuidado] I will check it out, tx, sunny

[3/5/2004 9:30:15 PM] [Investortrader] That's great sunny! :8

[3/5/2004 9:30:32 PM] [sunny] thnx. i luv it

[3/5/2004 9:33:00 PM] [cuidado] great visual self-flaggelation:(

[3/5/2004 9:34:11 PM] [cuidado] can you look at another stock or two? like NAVR, for one?

[3/5/2004 9:34:37 PM] [Investortrader] Sure, NAVR ...

[3/5/2004 9:36:13 PM] [Investortrader] This one has been pretty much sideways for months

[3/5/2004 9:37:07 PM] [REB2186] IT, I'm holding some TWAV; Bollinger Bands tightening - expect a move soon?jnavr

[3/5/2004 9:38:01 PM] [Investortrader] If I were looking for a patient trade, I might try trading the swings within the range ... or just wait for it to BO

[3/5/2004 9:38:59 PM] [Investortrader] Any questions on NAVR?

[3/5/2004 9:39:47 PM] [w2jc] If you are going to be here for the noon Hotto session tomorrow and haven't done so yet, please download and print the Report "PCF Creation" from Hotto Report area

[3/5/2004 9:40:04 PM] [Investortrader] Thanks Jim :)

[3/5/2004 9:40:21 PM] [cuidado] I just wonder how patient.... there is positive divergence of OBV relative to OBV at January highbefore swing high

[3/5/2004 9:42:08 PM] [Investortrader] True, the OBV is looking good here

[3/5/2004 9:42:34 PM] [Investortrader] Even after the big vol gap day
[3/5/2004 9:42:53 PM] [cuidado] re: NAVR, also, volume is dwindling to nothing and last two days were inside the 3-days-ago range
[3/5/2004 9:43:15 PM] [cuidado] and up
[3/5/2004 9:43:46 PM] [Investortrader] It does have some positives in it
[3/5/2004 9:44:25 PM] [Investortrader] And the sideways range it's been in is worth trading even if it doesn't BO
[3/5/2004 9:45:10 PM] [cuidado] I agree, tx again!
[3/5/2004 9:45:13 PM] [Investortrader] On to TWAV ...
[3/5/2004 9:45:23 PM] [Investortrader] Welcome cuidado :)
[3/5/2004 9:47:16 PM] [Investortrader] This one I'm a bit unsure on, it's got a few indications both ways
[3/5/2004 9:49:36 PM] [Investortrader] With so many stocks to trade, when I'm on unsure on something I just move on ... doesn't mean someone else might be able to read it better ... There are some I can read, and some I can't, and a few that are just unreadable ... sorry I can't help you on this one
[3/5/2004 9:49:53 PM] [REB2186] Bot 3 weeks ago on uptrend, still holding - wishful thinking?
[3/5/2004 9:50:00 PM] [Investortrader] Hmmmm
[3/5/2004 9:50:11 PM] [SusanM] I can only see continued downward signals on this one...
[3/5/2004 9:50:43 PM] [Investortrader] I don't like the action in it today, but there is a slight positive OBV divergence still ... though that could be taken out tomorrow
[3/5/2004 9:51:03 PM] [SusanM] Using declining 20ma as resistance
[3/5/2004 9:51:07 PM] [REB2186] Has some likely support now at 10sma and lr30 -- should I expect it to stabilize now?
[3/5/2004 9:51:08 PM] [sunny] pmfbi, i agree, a chart does not always speak to everyone. i think u said u were already in this, so, u wanna know if there's hope. my impression is, it's in a downtrend, and somewhat stable
[3/5/2004 9:51:08 PM] [Investortrader] LR30 is holding it up, 20sma is holding it down here
[3/5/2004 9:51:58 PM] [REB2186] Thanks to all of you.
[3/5/2004 9:52:28 PM] [Investortrader] That's a good way to put it sunny
[3/5/2004 9:52:30 PM] [sunny] invie, can u show the large triangle it's making?
[3/5/2004 9:53:16 PM] [Investortrader] I just don't get a feel for it
[3/5/2004 9:53:50 PM] [sunny] ya, it's a disappointing one, and for that very reason, something is bound to happen soon
[3/5/2004 9:54:15 PM] [sunny] gimme another minute, i think i see it

[3/5/2004 9:55:49 PM] [cuidado] I bought in last swing up, too, and had to bail at small loss... most important thing is

[3/5/2004 9:57:12 PM] [cuidado] when stock goes against you, decide how much you're going to risk losing, and if you hit that point, just sell and move on

[3/5/2004 9:57:22 PM] [sunny] k, shud i share a chart to show the triangles?

[3/5/2004 9:57:25 PM] [Investortrader] Very true cuidado!

[3/5/2004 9:57:30 PM] [Investortrader] Sure sunny

[3/5/2004 9:57:46 PM] [sunny] k, thnx. don't wanna be stepping on ur toes, inv

[3/5/2004 9:57:56 PM] [Investortrader] you'd be helping :)

[3/5/2004 9:58:22 PM] [sunny] as i see it, triangle definable in 2 ways

[3/5/2004 9:59:02 PM] [sunny] we see the neat and orderly top of range in the downtrend, that upper line sloping down

[3/5/2004 9:59:32 PM] [sunny] descending triangle, with that horizontal bottom line, somewhere near 4 ish

[3/5/2004 9:59:58 PM] [Investortrader] Nice chart

[3/5/2004 10:00:04 PM] [sunny] also, a somewhat symmetrtical triangle, with that long uptrend line since june

[3/5/2004 10:00:12 PM] [sunny] apex is near

[3/5/2004 10:00:46 PM] [sunny] short term, downtrend: lower lows, even this last one

[3/5/2004 10:01:04 PM] [sunny] but, about to hit a trendline. so, gotta pay attention

[3/5/2004 10:01:25 PM] [sunny] 2/24 hammer with volume, it went up

[3/5/2004 10:01:59 PM] [sunny] perhaps we can pretend that each low is met with less volume

[3/5/2004 10:02:13 PM] [sunny] overall, vol rate is fading.

[3/5/2004 10:02:31 PM] [sunny] more apparent on 2day bars

[3/5/2004 10:02:53 PM] [sunny] a break above 4.76 redefines the trend

[3/5/2004 10:03:19 PM] [sunny] for some people. for others, a break above this downtrend line is the signal

[3/5/2004 10:04:06 PM] [George50] IT I am new about 1 month to Hottoworks. Will everything he will cover Saturday at noon will be in the logs

[3/5/2004 10:04:21 PM] [sunny] in this picture, the half hour chart, we see a moneystream (yellow line middle window) divergence

[3/5/2004 10:04:26 PM] [Investortrader] George, it will be in the logs for Hottoworks club

[3/5/2004 10:04:48 PM] [sunny] OBV, the blue line, does not agree with the divergence

[3/5/2004 10:05:05 PM] [sunny] and lastly. on the half hour chart, we have an uptrend

[3/5/2004 10:05:07 PM] [George50] Thanks I may not be able to attend but can see

[3/5/2004 10:06:28 PM] [sunny] and again, am sorry if i intruded

[3/5/2004 10:06:40 PM] [Investortrader] Not at all! I think you added a lot :)

[3/5/2004 10:06:50 PM] [sunny] good, thnx

[3/5/2004 10:07:15 PM] [Investortrader] One other upside point for possible trend reversal would be yesterdays hod

[3/5/2004 10:07:32 PM] [Investortrader] Some will look at the last 5 days as a possible falling wedge

[3/5/2004 10:07:32 PM] [atexpal] thanks IT

[3/5/2004 10:08:14 PM] [Investortrader] Welcome atexpal :)

[3/5/2004 10:08:32 PM] [cuidado] tx, sunny. Basically, the moment of truth is coming at the apex of the big symmetrical triangle in next several days

[3/5/2004 10:09:24 PM] [Investortrader] Triangles are more reliable if they resolve before the apex ... coule be the horizontal line in sunny's chart will be more important

[3/5/2004 10:09:32 PM] [sunny] yes, zakly, tho, i have heard some say, getting this far into the apex is not a good omen. more frequently, breaks up happen about 3/4 the way into apex

[3/5/2004 10:09:41 PM] [Investortrader] Right sunny

[3/5/2004 10:10:24 PM] [sunny] thnx. so many details to remember. like trying to keep 20 gallons of ice cream in a little cup

[3/5/2004 10:10:44 PM] [Investortrader] Mmmmm, ice cream ... I have some rocky road in the freezer too!

[3/5/2004 10:11:06 PM] [sunny] oops, now we made me hungry

[3/5/2004 10:11:15 PM] [cuidado] yes, agree... but this one does seem less certain and more risky than many others out there right now...

[3/5/2004 10:11:59 PM] [sunny] definitely. but, i bet that's part of why some stuff is soaring unbelievably. surprise action from scary charts

[3/5/2004 10:12:07 PM] [cuidado] I'm wonderiing if that last piece of cherry pie is still in the fridge too:D

ClubHome

[3/5/2004 10:12:25 PM] [Investortrader] I agree here cuidado, though if it breaks up on vol it's ok to at least the 50sma, which is also in the 2/11 to 2/19 resistance area

[3/5/2004 10:12:25 PM] [sunny] o, u guys are torturing me !

[3/5/2004 10:12:41 PM] [REB2186] I'll hold a bit longer and watch carefully. Am learning from you people. Thanks again.

[3/5/2004 10:12:50 PM] [sunny] yes, excellent point about first target

[3/5/2004 10:12:54 PM] [Investortrader] Welcome REB, good luck with it :)

[3/5/2004 10:13:39 PM] [TrillionDolarMan] Any opinions on today's TICK reading?

[3/5/2004 10:13:41 PM] [TCNut] you guys still talking about TWAV?

[3/5/2004 10:13:58 PM] [Investortrader] Yes TCNut

[3/5/2004 10:14:07 PM] [sunny] we were, now everyone's raiding the fridge

[3/5/2004 10:14:11 PM] [Investortrader] I don't follow the TICK at all

[3/5/2004 10:14:17 PM] [Investortrader] lol sunny

[3/5/2004 10:14:19 PM] [HOTTO] FSturek has replied to: Concepts and Creation of PCFs

[3/5/2004 10:14:28 PM] [TrillionDolarMan] Highest since July 2, 2003.....today.

[3/5/2004 10:14:52 PM] [sunny] wow! really?

[3/5/2004 10:15:01 PM] [TrillionDolarMan] Checking the data....moment...

[3/5/2004 10:15:24 PM] [Investortrader] If PWAV can get thru the 50sma then you've got a measured move back to around the Jan high area

[3/5/2004 10:16:00 PM] [Investortrader] TWAV I mean

[3/5/2004 10:16:21 PM] [TCNut] check out my shared TWAV chart....has OBV in steady down trend since beginning of year....too many more promising charts out there to focus on...IMO

[3/5/2004 10:16:55 PM] [rchale] Ok, please tell us beginners what the significance is of the TICK being high?

[3/5/2004 10:17:09 PM] [TCNut] wonder if in my opinion works as symbol:=D

[3/5/2004 10:17:10 PM] [TrillionDolarMan] Data is correct, it seems....

[3/5/2004 10:17:25 PM] [Investortrader] That was the first thing I said just about TCNut, not getting much out of it either way ;)

[3/5/2004 10:17:45 PM] [HOTTO] FSturek has replied to: Concepts and Creation of PCFs

[3/5/2004 10:19:02 PM] [sunny] tcn, obv is yellow in bottom window? do we see a higher low on the last bounce?

[3/5/2004 10:19:20 PM] [gary12] IT is this the chart you interday trade with? ty

[3/5/2004 10:19:50 PM] [TCNut] TWAV....seems lonely for the 200sma...with 200ema playing minor support

[3/5/2004 10:20:03 PM] [Investortrader] My KISS template is the one I always use

ClubHome

heavily, it's normally the first one I look at

[3/5/2004 10:20:18 PM] [Investortrader] And I can trade many times just off of it

[3/5/2004 10:20:35 PM] [TrillionDolarMan] Tick measures....# of stocks going up or down at each tick during the day....the high or low # for the day is what is usually tracked....and on a 5 DMA and 10 DMA basis, etc....Tick readings of over, say...1300+ are bearish....as buying pressure is being expended....tick readings of -1300 are bullish, as selling pressure is expended....today was 1497, and symbol is TICK....so you can check for yourself.

[3/5/2004 10:20:46 PM] [TCNut] OBV is smoothed out by moving averages sunny

[3/5/2004 10:21:02 PM] [TrillionDolarMan] That 1300 # is APPROXIMATE....varies according to mkt. condition....etc.

[3/5/2004 10:21:21 PM] [TCNut] 20\3...ma's crossing and looking for good separation

[3/5/2004 10:22:59 PM] [TCNut] green yellow red...with separation bullish and red yellow green with separation for optimum bearish indication....still tweaking on the RSI settings (green in bottom window)

[3/5/2004 10:24:16 PM] [sunny] k, am slowly seeing those details. thnx

[3/5/2004 10:24:47 PM] [sunny] the pretty waves in middle window also show a divergence

[3/5/2004 10:25:02 PM] [rchale] Trillion - thank you for the explanation of TICK - makes sense.

[3/5/2004 10:25:22 PM] [sunny] as does rsi

[3/5/2004 10:25:36 PM] [TCNut] "Traffic Signals" is the name of template....so think green yellow red n vise versa

[3/5/2004 10:25:46 PM] [sunny] lol, very good

[3/5/2004 10:27:09 PM] [cuidado] I'm naming my copy "psychedelic traffic signals"... good work tcn!

[3/5/2004 10:27:32 PM] [TCNut] =D

[3/5/2004 10:27:39 PM] [rchale] Cool, I need something that says STOP - GO - Catiion - keep your money in your pocket! ;)

[3/5/2004 10:27:53 PM] [sunny] ya, i need that one too

[3/5/2004 10:28:34 PM] [TCNut] the MACD in bottom.....Red screams STOP...change of trend

[3/5/2004 10:30:01 PM] [sunny] tcn, if u wudn't mind, cud we see WITS on ur template please?

[3/5/2004 10:30:27 PM] [caldoc] Thx TDM for that explanation of tick. Much appreciated.

[3/5/2004 10:30:41 PM] [TCNut] what time frame n zoom?

[3/5/2004 10:30:53 PM] [rchale] I don't remember who said they owned this stock, but

ClubHome

looks like it is time to sell??

[3/5/2004 10:31:21 PM] [sunny] dunno. looking for a hint why it was weak while making new hi's today

[3/5/2004 10:31:44 PM] [TrillionDolarMan] Anytime.....caldoc.....I keep 5DMA and 10DMA....highest 5 was in June '03 at 1250 level.....this week was only 1200. Also highest 10 DMA was at that time...over 1200....1180 this week. So, no records...but high buying pressure indicated.....will it continue?

[3/5/2004 10:33:23 PM] [TCNut] DJ-30, COMPQX, SPY...ect were all over the place today! so tough to tell

[3/5/2004 10:33:41 PM] [sunny] k, thnx

[3/5/2004 10:34:05 PM] [TCNut] anyone ever noticed how closely EBAY follows the DJ-30's Daily patterns? Very uncanny

[3/5/2004 10:34:28 PM] [sunny] shame on me, i never look at the famous names

[3/5/2004 10:35:48 PM] [Investortrader] I'm gone for the night, good trading next week everyone!

[3/5/2004 10:35:57 PM] [sunny] ooo, finally, lucky me, dinner is ready. thnx all, for the ideas and comments. will be back later. enjoy

[3/5/2004 10:36:02 PM] [TCNut] also...WITS....4-10-02 and past tense....HODays...seem to be messing with pattern

[3/5/2004 10:36:35 PM] [caldoc] Thx IT. Good session.

[3/5/2004 10:36:47 PM] [TCNut] getting near long time Highs

[3/5/2004 10:36:51 PM] [sunny] ur saying each new hi is met with pullback? ya, i see that on some stuff

[3/5/2004 10:36:54 PM] [cuidado] Thx, IT!

[3/5/2004 10:37:15 PM] [TCNut] and beginning of major downtrend

[3/5/2004 10:39:01 PM] [George50] TCNUT is your "traffic" listed somewhere

[3/5/2004 10:39:43 PM] [TCNut] see the layout icon at the top right corner of the application?

[3/5/2004 10:40:06 PM] [cuidado] tcn, but WITS weekly volume is expanding... couldn't it be heading for new ATH?

[3/5/2004 10:40:14 PM] [George50] YES

[3/5/2004 10:40:17 PM] [TCNut] click on that....then choose split screen mode or float a chart

[3/5/2004 10:40:39 PM] [TCNut] then there is an icon with a picture of people...

[3/5/2004 10:41:05 PM] [TCNut] to the left of your zoom settings on the chart

[3/5/2004 10:41:07 PM] [HOTTO] Icamani has replied to: Concepts and Creation of

[3/5/2004 10:42:46 PM] [HOTTO] Icamani has replied to: Concepts and Creation of PCFs

[3/5/2004 10:43:10 PM] [TCNut] then click on the "edit" tab on the shared chart...and save it

[3/5/2004 10:53:11 PM] [TCNut] have checked most of the MACD settings out...this one is my favorite...it is from some of Ycc's templates...and only modified in color... if you use the period key to backtest the precise beginning and ending of trends....I think you will be very surprised...on all time frames

[3/5/2004 10:54:24 PM] [George50] r u sharing it now

[3/5/2004 10:57:12 PM] [TCNut] sorry...was watching the end of the Ducks Hockey Game
