[2/25/2004 11:23:34 AM] [tffssf] all TC-NET A/D = 3334 / 2506

[2/25/2004 11:24:02 AM] [hotto] NTGR.. watch for possible reversal any day...

[2/25/2004 11:28:43 AM] [hotto] Several people tried to join Hottoworks.com over the last few days. Did not complete the process. If you changed your mind... fine. But.. if having trouble signing up.... please send an email to.....

[2/25/2004 11:28:54 AM] [Sharon1555] anyone having trouble w StreetSmartPro?

[2/25/2004 11:28:55 AM] [hotto] support@hottoworks.com

[2/25/2004 11:29:23 AM] [hotto] someone will help

[2/25/2004 11:37:00 AM] [hotto] +24 10590... 1647 / 1427... erosion...

[2/25/2004 11:37:11 AM] [Stixman] All these guys say how happy they are that FOGGy is there. Does he have a choice? Doesn't he have to be there. Aren't we paying him \$200,000 to shoot off his mouth.

[2/25/2004 11:37:52 AM] [hotto] OEX puts have increased in price over last hour

[2/25/2004 11:38:50 AM] [swan] yah think somebody knows sumpthin? lol

[2/25/2004 11:40:03 AM] [jasp] Do you hold puts overnight or wait for underlying index to hit targets?

[2/25/2004 11:40:18 AM] [swan] Hotto, are you still long VECO, as it's heading South

[2/25/2004 11:42:19 AM] [hotto] yes.. VECO. may fill gap.. I may add more

[2/25/2004 11:45:03 AM] [HowNow] Greenspan agreed to another 25 minutes. =o

[2/25/2004 11:45:44 AM] [hotto] OEX puts.. Now that we have another relief rally attempt.. appears to be failing.. I plan to hold some puts.. for the test of SMA50.. These little relief rallies allow the IT correction to go on longer... Maybe rip out SMA50.. after a small bounce..

[2/25/2004 11:46:09 AM] [hotto] I will continue the usual approach..

[2/25/2004 11:46:47 AM] [jasp] Thank you.

[2/25/2004 11:47:36 AM] [hotto] I have heard several strategists.. comment about 10400.. as important.. Ralph Bloch yesterday... Note.. With that much fascination.. with 10400... it is likely to be tested.. Soon.

[2/25/2004 11:48:29 AM] [hotto] And.. IF we drop to 10400... DJIA will be below SMA50.. like the COMP.. and DJ-20.. and SOX

[2/25/2004 11:49:00 AM] [hotto] That will likely bring up the VIX level.. NERVES...

[2/25/2004 11:49:26 AM] [hotto] Maybe allow a drop back from the big Bullishness..

[2/25/2004 11:49:45 AM] [hotto] Il numbers... 59% bull... 19% Bear...

[2/25/2004 11:50:08 AM] [hotto] Those numbers were fine.. during the Liquidity phase of the Bull...

[2/25/2004 11:50:21 AM] [hotto] We had plenty of other \$\$\$ to play with...

[2/25/2004 11:51:00 AM] [hotto] But.. now that Outflows by Secondary Offerings.. and

ClubHome

Insider Selling... are Overwhelming... Inflows by AMG Data...

[2/25/2004 11:51:15 AM] [hotto] We Now need better Sentiment numbers again..

[2/25/2004 11:51:55 AM] [hotto] ie... More bears.. Less Bulls.. to show that we have more sideline money.. again.. to support the next IT Rally.

[2/25/2004 11:53:10 AM] [hotto] So.. for now.. look for ST oversold stocks.. for potential bounce-backs.. AND look for Short opps.. on stalled rallies.

[2/25/2004 11:54:15 AM] [hotto] We also have those trusty weekend plays.. some should be buyable again by tomorrow..

[2/25/2004 12:18:40 PM] [HowNow] Gspan primary advice to reinstate 90s procedural budget restraint will probably be ignored by both parties until after election, imho.

[2/25/2004 12:18:51 PM] [ron643] 14.98 -0.37: Moors & Cabot believes that Credence Systems acquisition of NPTest announced yesterday provides additional fodder for a large company (i.e. Agilent Technologies or Advantest) to make a bid for LTX Corp. (LTX)? Like NPTest, LTX Corp. has a niche market segment (in LTX's case, high-end SoC marketplace) and LTX's business is driven primarily by one prominent customer (Texas Instruments).?Firm suspects that companies that lack some of the specialized areas that LTX possesses will become interested in LTX after the Credence acquisition. In fact, long-term speculation had Credence and LTX Corp. merging at one point. Given Credence's appetite for acquisitions,?firm would not be surprised to see Credence make another bid sometime down the road.? In?firm's opinion, LTX has done an excellent job in positioning itself for this upturn and would command at least a comparable premium to the Credence-NPTest deal (approx 30%). Based on Monday's closing price, that could set a price of \$

[2/25/2004 4:04:37 PM] [sunny] \$john, the new ameritrade accounts said something
about there's a time out feature that u can set somewhere
[2/25/2004 4:05:08 PM] [lavenderangel] yes, its' in settings under 3rd drop down

[2/25/2004 4:06:40 PM] [tobydad] kmg; that may be cuz new TCnet is preloading and
anticipating where it thinks you're going...you'll notice after 1st delay, it's much faster
as you scroll thrul lists, etc.

[2/25/2004 4:10:10 PM] [kmgreen] luigi, thats what I thot; anybody have level II on tc??

[2/25/2004 4:12:32 PM] [lavenderangel] no, it's in ameritrade, etrade, scottrade and tradestation

[2/25/2004 4:12:50 PM] [MaryHelen] MoneyJohn, where did you find time out settings in Ameritrade? Thanks...

[2/25/2004 4:12:59 PM] [tobydad] no level II on tc (never seen it anyway)

[2/25/2004 4:13:48 PM] [tiga] ESI hope nobody was long when they halted it.....halting should not be allowed imo.....let the market do it's thing

[2/25/2004 4:14:12 PM] [kmgreen] anyhow, I asked about slow response in the new programe to changes in time, zoom anybodyelse have a problem?

[2/25/2004 4:14:53 PM] [lavenderangel] increase your cache memory. new tcnet eats it up. should have at least 1MB

[2/25/2004 4:14:54 PM] [MoneyJohn] window to right side under Account Services go to settings

[2/25/2004 4:15:09 PM] [biggpspicks] If you have a wheel on your mouse you can scroll thru timer frames quicker than before

[2/25/2004 4:15:38 PM] [kmgreen] yes boss

[2/25/2004 4:15:40 PM] [lavenderangel] go to your control panel and bring up system

[2/25/2004 4:16:12 PM] [BossFan] I've noticed it slow if I had a bunch of other tasks running on my machine. Does it happen after a fresh boot?

[2/25/2004 4:17:03 PM] [lavenderangel] then performance

[2/25/2004 4:18:10 PM] [lavenderangel] then advanced , then virtual memory size if you have XP that is.

[2/25/2004 4:54:24 PM] [hotto] a few weeks ago... NYSE H/L was running well over 400 per day...Even on down days in the market..

[2/25/2004 4:54:47 PM] [Shark] Hotto, I'm not able to be trading everyday...but are you saying that momentum to the downside is slowing, and that isn't particularly good if your are short or bought puts?

[2/25/2004 4:55:37 PM] [Mikon] Hotto, re: your H/L comment. Looks like a momentary uptick to me with more downside to follow on the Nasdaq. See chart I'll post

[2/25/2004 4:55:57 PM] [hotto] Today... avgs were up..All day... And "only" 126/ 6...

ClubHome

Shows momentum is very weak now.. IF no surge over next few days... next down may be bloody..

[2/25/2004 4:55:58 PM] [Luigistock] in the short term yes shark but what hotto is refering to is the intermediate term highs are less than in the midst of the it rally so NOT GOOD for the long side

[2/25/2004 4:56:20 PM] [hotto] We can't "know"... but - it is a clue..

[2/25/2004 4:56:21 PM] [Luigistock] ..in the intermediate term

[2/25/2004 4:56:59 PM] [MaryHelen] Luigi....Thanks for the info on medved. I will check it out.....

[2/25/2004 4:57:07 PM] [Luigistock] you're welcome

[2/25/2004 4:57:18 PM] [Mikon] On my chart, momentum Yellow and OBV Blue are definitely heading down (as is TSV on middle chart).

[2/25/2004 4:57:55 PM] [Mikon] "Momentum" is shown as ROC

[2/25/2004 4:58:16 PM] [Shark] Thanks for the clarifications...I sure miss not being a regular

[2/25/2004 4:58:39 PM] [Luigistock] yw shark

[2/25/2004 4:58:43 PM] [hotto] yes Luigi... I only expect another day or so.. Will be looking closely at numbers tomorrow.. midday.. No excuses.. Things must GO now...

[2/25/2004 4:58:49 PM] [RkyMtnFool] Another way to look at the lower number of new highs: The recent leaders were not strong today.

[2/25/2004 4:59:30 PM] [Luigistock] well double damn hotto - can you get me through til midday on friday :)

[2/25/2004 4:59:55 PM] [hotto] We had an ok PB to 10522.. in DJIA.. and severe downs in DJ-20.. SOX.. etc.. There should be Some buyers out there for 2-3 days... 1-2 more... after today

[2/25/2004 5:01:27 PM] [hotto] Mikon said it about right... Just a relief to an oversold condition in many sectors.. NOTE.. DJIA was not much "oversold" not much pop today..

[2/25/2004 5:01:39 PM] [Mikon] I'm betting on one more day up, then back sown

[2/25/2004 5:03:14 PM] [hotto] We will see it in the numbers.. I expect..

[2/25/2004 5:03:14 PM] [Mikon] "sown" should be "down"

[2/25/2004 5:03:45 PM] [Mikon] True, but so many bail out on Fridays

[2/25/2004 5:04:05 PM] [Fannye] RMBSAH 34.5

[2/25/2004 5:05:19 PM] [hotto] Today... first day that we did not touch DTL4.. since 2/11.. And.. stopped 22 points shy of yesterday's HOD..

[2/25/2004 5:05:55 PM] [hotto] just a lousy Inside Up Day on Lower Volume

[2/25/2004 5:06:13 PM] [Luigistock] jsut about to say that - but w/o the lousy

[2/25/2004 5:45:16 PM] [kennethroyal] CaptJack - knee surgery has habit of causing clot formation in thigh - after the surgery - you might ask your surgeons whether they will be placing you on heparin after surgery - tricky - don't wish to do it too soon as causes bleeding into surgical wound - but at certain point can be very beneficial.

[2/25/2004 9:50:12 PM] [Fannye] I seems that anyone can enter is they go thru their secondary computer.

[2/25/2004 9:52:44 PM] [hotto] Fannye... Paul says he thinks it is protected...

[2/25/2004 9:52:56 PM] [hotto] Thanks for your concern.

[2/25/2004 9:53:52 PM] [hotto] You may have logged in with that computer before.. and so it is recognized..

[2/25/2004 9:54:15 PM] [RkyMtnFool] It's real protected! I can't get on. :(

[2/25/2004 9:56:17 PM] [hotto] Rocky.. still not ? how many times has it failed ?

[2/25/2004 9:57:13 PM] [RkyMtnFool] I've been trying with IE & Netscape since it was mentioned in HOTTOWORKS chat.

[2/25/2004 9:59:02 PM] [hotto] I just logged on... using IE.. first time..

[2/25/2004 9:59:21 PM] [hotto] about 3rd or 4th time today..

[2/25/2004 10:00:28 PM] [gary12] i just loged on using IE

[2/25/2004 10:03:08 PM] [RkyMtnFool] Seriously, I just closed IE & Netscape & tried again. No luck. I'll be patient. Paul can email or TCMail me if he has questions.

[2/25/2004 10:03:53 PM] [hotto] I'll tell Paul see if he can help now

[2/25/2004 10:05:05 PM] [Borankin] Hey there, Hotto. Just wanted to say Hi and hope all is going well.

[2/25/2004 10:06:14 PM] [hotto] paul (potto) [---- what's the problem, rkymtn?

[2/25/2004 10:08:35 PM] [RkyMtnFool] I can't get to hottoworks.com. On IE I get "The page cannot be displayed." In Netscape I can get to the base page for non-subscribers, but the link "Click here to enter ..." won't work.

[2/25/2004 10:09:54 PM] [RkyMtnFool] The link "More about HottoWorks" does work.

[2/25/2004 10:10:38 PM] [hotto] Have you rebooted the CPU since the problem started? (How long has it been going on, BTW?)

[2/25/2004 10:11:52 PM] [hotto] rky: so in Netscape (Mozilla) you can click the link on the first page, and it brings you to the login page? In IE, is the error on the bottom of the Cannot find page screen : DNS Server Error?

[2/25/2004 10:12:00 PM] [RkyMtnFool] No, but I did close both browsers and re-open them. I don't believe I've been in the site since yesterday - I used IE then & it worked fine.

[2/25/2004 10:13:30 PM] [hotto] Yeah, I hear you... the same thing has started

happening on my development computer, as of yesterday.... everything works great on Mozilla, but stops working at a random point in my browsing experience in Internet Explorer.... it seems the only way I can start browsing again is after reboot...

[2/25/2004 10:14:55 PM] [hotto] I know everyone hates finger-pointing (trust me, I hate it when Micro\$oft does it to me when I talk to them) but it seems to be a problem with our Web host.... I have been emailing them back and forth for about a week now with complaints from several people...

[2/25/2004 10:15:19 PM] [hotto] no solution yet.... it has to do with dynamic page generation done on the server.....

[2/25/2004 10:15:54 PM] [RkyMtnFool] I'm in! IE

[2/25/2004 10:16:22 PM] [RkyMtnFool] I'm in! Netscape

[2/25/2004 10:16:42 PM] [hotto] did you reboot, or did it just start working on its own?

[2/25/2004 10:16:52 PM] [RkyMtnFool] No reboot

[2/25/2004 10:17:04 PM] [hotto] This is troubling....

[2/25/2004 10:17:08 PM] [neofighter] potto, had the same problem this morning...could not display page with IE, but had no problems this afternoon.

[2/25/2004 10:17:30 PM] [neofighter] No reboot.

[2/25/2004 10:17:46 PM] [hotto] Thank you for the info... I will compile it on my growing list of complaints to Yahoo Webhosting errrr our Web host.... ;)

[2/25/2004 10:18:26 PM] [neofighter] GN...all

[2/25/2004 10:18:37 PM] [RkyMtnFool] Probably not material, but I closed floating TCNet windows before it started working.

[2/25/2004 10:18:45 PM] [Luigistock] guess i missed the party - couldnt get chat for ovre 2 hours

[2/25/2004 10:22:22 PM] [sisterpractical] probably is relevant rky: frees up virtual memory, which is needed for live chats

[2/25/2004 10:23:34 PM] [hotto] rky : actually, in this case, I don't think the closing of the windows were relevant, since this is a server http communications problem

[2/25/2004 10:24:48 PM] [RkyMtnFool] Just re-opened floating windows, closed Netscape, re-opened. It worked fine with floating windows.

[2/25/2004 10:25:52 PM] [RkyMtnFool] Intermittant bugs, don't ya love 'em?

[2/25/2004 10:26:12 PM] [hotto] Thanks for the info Rky... I've gotta go tend to Ethan (the baby).... I'll catch up with you all later.... if ANYONE has or has had any issues with this in the past few days, please email me so I can use it for ammunition?

Thanks!

[2/25/2004 10:26:41 PM] [RkyMtnFool] Thanks for your help, Paul.
