 [4/28/2004 7:34:05 AM] [dagwood] par here vs # of ADR would be \$6 to \$7 but anything goes on a stock as this. Gonna be fun to watch.

[4/28/2004 12:15:03 PM] [Investortrader] VICL's chart looks good in general, would like to see more vol on todays rise of course ... but notice how the OBV held it's middle BB and it's 50sma on the recent pb in price
[4/28/2004 12:16:14 PM] [Investortrader] Which made for a nice positive divergence in OBV on it between the late MArch low and the mid-April test of that low
[4/28/2004 12:16:27 PM] [kmgreen] VICL would be in statosphere if not such a \$%#^ day
[4/28/2004 12:16:32 PM] [isay] i have no clue what joduval is talking about except that I think the word is torture not "torcher" :D
[4/28/2004 12:16:46 PM] [Investortrader] but it does have overhead resistance with the 50sma and the upper BB converging above
[4/28/2004 12:17:07 PM] [Vltmus] now may be the time finally to think of buying fvcx its finally filled the gap now all it has to do is turn up what suspense

[4/28/2004 1:20:32 PM] [Investortrader] Since it's a slow day, I'm going to comment on NIAG chart like it was a class ... some important things to point out in that chart
[4/28/2004 1:21:54 PM] [Investortrader] Downtrend since the first days of March, that first pb in mid-March tested the 50sma from 3/11 to 3/18, then tried to rally with 3/19 making it look good, nice candle on bigger vol
[4/28/2004 1:22:26 PM] [Investortrader] But it immediately reversed, albeit on lower vol ... however
[4/28/2004 1:23:32 PM] [peanut] ASKJ testing LOD
[4/28/2004 1:23:42 PM] [Investortrader] When it came back down thru the middle BB 3/29 was a big vol sell day ... and on 3/30 it came down to test the lower BB .. got a small bounce back up to the middle BB within the next few days
[4/28/2004 1:23:57 PM] [lovedust] sybol niag no longer valid
[4/28/2004 1:24:33 PM] [Investortrader] When it couldn't break back up thru the middle BB on 4/2 - 4/5, that was a sign of weakness, time to start looking to get out if it broke back down thru the 50sma
[4/28/2004 1:24:30 PM] [RoadDog] NIAG OK here...
[4/28/2004 1:24:27 PM] [lovedust] niag.pk is the new one

[4/28/2004 1:24:42 PM] [Rondon] FVCX,,,,,,,2.39
[4/28/2004 1:25:26 PM] [Investortrader] Which it did on 4/8 ... the last chance gasp and big signal of weakness came on 4/19 when it had a big failure at the convergence of the 50sma and the middle BB
[4/28/2004 1:25:45 PM] [lovedust] they filed SEC form 10-K/A
[4/28/2004 1:26:07 PM] [Investortrader] And OBV has been making new lows with price during the decline ... not good
[4/28/2004 1:26:49 PM] [Investortrader] I never did buy NIAG because of those reasons NIAG symbol still works in TCNet

[4/28/2004 2:19:08 PM] [Stixman] TBUS straight up on 1'

[4/28/2004 2:19:11 PM] [kellam] FVCX must push through ma20 @2.52 15' to have any legs IMHO

[4/28/2004 2:20:09 PM] [Jwerner] Hey guys, look at the bright side . . . VICL is up .02 =D

[4/28/2004 2:20:11 PM] [rsi77] If earnings like that don't drive a stock up....it's time to go fishing...or sell stuff on EBAY

[4/28/2004 2:26:02 PM] [Jwerner] I'd buy some puts in TASR, but just don't have the nerve to do much of anything right now.

[4/28/2004 2:26:55 PM] [SDGoodGuy] I also like CRDN ... very volatile stock ... move fast ... especially DOWN ... last hour yesterday was really ugly ...

[4/28/2004 2:33:51 PM] [BossFan] sold mine this AM Jwerner on the DBD

[4/28/2004 2:34:08 PM] [Investortrader] Chart class tonight at 9:30 eastern! Bring me your tired your poor, your huddled stocks yearning to break out. The wretched refuse of your teeming portfolio. Send these, the homeless, the tempest-tossed stocks ... I lift my lamp beside the golden chart! B)

[4/28/2004 2:34:20 PM] [loftyB] Hotto rules:- Don't hold stocks thro earnings

[4/28/2004 2:34:49 PM] [Investortrader] With the market not rewarding good earning reports, I see no reason to hold thru earnings at all

[4/28/2004 2:36:13 PM] [Investortrader] Thank you naples

[4/28/2004 2:36:18 PM] [KauaiDave] It is indeed painfull to hold thru earnings most of the time

[4/28/2004 2:36:19 PM] [america] lol you guys.

[4/28/2004 2:37:09 PM] [Investortrader] I rarely hold thru earnings, only if I know 2 things ... First, that they will be above expectations, and Second, that Mr Market is rewarding good earnings

[4/28/2004 2:38:23 PM] [Jwerner] My only reasoning for holding was a possible announcement, with earnings, about their cancer drug.

[4/28/2004 9:27:48 PM] [Investortrader] Hi everyone :)
[4/28/2004 9:28:04 PM] [Groundog] :)
[4/28/2004 9:28:06 PM] [america] hi IT
[4/28/2004 9:28:08 PM] [da2rth] hi IT
[4/28/2004 9:28:19 PM] [Investortrader] First I need to re-post the little bit lost from the logs at the end of last class
[4/28/2004 9:28:48 PM] [Investortrader] This was on MSON ..
[4/28/2004 9:29:11 PM] [Investortrader] I'd probably be looking to sell real soon ... this most recent 3-day rally not on much volume. So unless vol comes in real soon, OBV won't be confirming if it makes a new high. It's made lower lows and lower highs on some days. But the swing highs and lows have been higher. With it testing the 4/19 swing high here, I would probably sell at least half since the vol isn't confirming here
[4/28/2004 9:29:19 PM] [cobralso] Hi IT
[4/28/2004 9:29:49 PM] [Investortrader] Stochs look weak to me here. But I only use them on candlestick scans to check for overbot or oversold. Any questions on MSON?
[4/28/2004 9:30:04 PM] [Investortrader] On to IMX ... It looks like we may be getting thinner BB's on it for a bit ... which means an upcoming move in one direction or the

other ... looking at the OBV on it ... doesn't seem so healthy. OBV didn't confirm the 4/8 new highs. And 4/9 was a big vol reversal day, bearish engulfing candle. It has the feel of sideways to down to me. And now it's trading under the middle BB too. I'm not really much interested in this one. Any questions on IMX?

[4/28/2004 9:30:20 PM] [nan111] Hi IT, if you get a chance, could you look at XYBR?

[4/28/2004 9:30:33 PM] [Investortrader] On to BLUD ... (last one for the night). This one looks nice. And it's a good example of how sometimes OBV needs to be "corrected" in how we are looking at it. Look at 3/25. That was a heck of a positive day as far as trading action is concerned!

[4/28/2004 9:30:51 PM] [Investortrader] Gapped down big to open near it's lows, then ran to close much higher ... but it was still down a bit for the day so OBV got whacked. Now .. think how the OBV would look if it had closed positive that day .. and that's how it should be read as it was a very positive trading day in it. On captulation days you must be careful with how you use OBV. Capitulation. Wash-out bottoms. And blow-off tops. If you did reverse the OBV for that day ... it would make the OBV now higher than it was at the Feb highs. OBV is a very good indicator, you just need to know when it's giving you a "false" reading, which in it's own way is a signal. It just signals the opposite of what OBV usually signals! Any questions on BLUD?

[4/28/2004 9:31:03 PM] [Investortrader] And that was the end for Monday night

[4/28/2004 9:31:47 PM] [Investortrader] Hi Groundog, america, da2rth, cobralso, and nan :)

[4/28/2004 9:32:08 PM] [nan111] :)

[4/28/2004 9:32:09 PM] [Investortrader] Before getting on to charts I want to emphasize something for the newer traders

[4/28/2004 9:33:00 PM] [Investortrader] 90% of traders wash out in the first year .. this isn't an easy job. You're going against some of the best, every day.

[4/28/2004 9:33:49 PM] [Investortrader] The biggest mistake and the one that causes most traders to wash out ... is hanging on too long in losing positions ... or failing to use stops

[4/28/2004 9:34:37 PM] [Investortrader] The biggest reason given is the fear of missing "the move" ... or having it turn right back up after they have sold it

[4/28/2004 9:35:15 PM] [Investortrader] And that happens to everyone happens to me, to Hotto ... everyone

[4/28/2004 9:35:38 PM] [Investortrader] The key to having it not happen too often, is the correct placement of your stops (another topic altogether)

[4/28/2004 9:36:49 PM] [Investortrader] But in all the trading you've seen me do on here finally you may have seen me get caught in a whipsaw ... so by correctly using stops you can see having a stock reverse on you won't happen to often

[4/28/2004 9:37:05 PM] [Investortrader] Whipsaw being SYNC which I'll cover in a bit

[4/28/2004 9:37:44 PM] [ilovemusicCOM] I don't believe in whipsaws ?

[4/28/2004 9:38:14 PM] [Investortrader] The alternative is never selling and watching a holding go down 20, 40, 80% or more

[4/28/2004 9:38:35 PM] [Investortrader] I'll show you a possible one in a bit ilovemusic ;)

[4/28/2004 9:38:46 PM] [ilovemusicCOM] not if you have OPS to lean on :)

[4/28/2004 9:38:50 PM] [Investortrader] I prefer using stops

[4/28/2004 9:38:53 PM] [ilovemusicCOM] oops, shouldn't say that bad word in here.

[4/28/2004 9:39:20 PM] [ilovemusicCOM] sorry, hotto, slip of the tongue.

[4/28/2004 9:39:38 PM] [Investortrader] I have no idea what you're talking about

ClubHome

you very long :(

[4/28/2004 9:42:39 PM] [nan111] mental stops or real ones?

[4/28/2004 9:42:54 PM] [Investortrader] If you can't pull the trigger on mental ones you have to use real ones

[4/28/2004 9:42:57 PM] [atraveler] but even with stops you can experience a 2-3% drawdown or more in a broad selloff such as today's

[4/28/2004 9:43:39 PM] [kmack] my advice...make it automatic...put on the position...put on the stop..

[4/28/2004 9:43:54 PM] [kmack] for new traders

[4/28/2004 9:44:00 PM] [Investortrader] atraveler .. slightly different subject ... the market hasn't felt good for a bit now ... that should have some bearing on positions too

[4/28/2004 9:44:41 PM] [atraveler] have you covered indicators for "hasn't felt good"?

[4/28/2004 9:45:08 PM] [atraveler] agree, Kmack

[4/28/2004 9:45:24 PM] [Investortrader] Not specifically, you can use lots of things ... H/L numbers, A/D numbers

[4/28/2004 9:45:35 PM] [Investortrader] How the market reacts to news

[4/28/2004 9:45:42 PM] [atraveler] recently A/D hasn't worked

[4/28/2004 9:45:49 PM] [Investortrader] Is good news rewarded, is bad news punished, or vice versa

[4/28/2004 9:47:00 PM] [Investortrader] So you look at it all and get an overall view of the market ... and overall that view hasn't been too good recently

[4/28/2004 9:47:04 PM] [atraveler] Last Wednesday good news was very rewarded

[4/28/2004 9:47:14 PM] [atraveler] we're in a trading range

[4/28/2004 9:47:45 PM] [Investortrader] On to SYNC ...

[4/28/2004 9:49:02 PM] [Investortrader] Here I was looking at the swing low on 3/30 of 2.69, and the 4/20 low of 2.70

[4/28/2004 9:50:05 PM] [Investortrader] And during the day I saw them trying to defend 2.70, lots of buy orders there ... so I bot at 2.71

[4/28/2004 9:52:01 PM] [Investortrader] Put on a smaller than normal position ... because that's one of my rules when the market is acting like this ... and got stopped out when that support broke

[4/28/2004 9:52:42 PM] [Investortrader] It fell some then reversed up later in the day ... so it may have just caught me!

[4/28/2004 9:52:46 PM] [HOTTO] JorisMar has joined the club. Please welcome your new member.

[4/28/2004 9:53:02 PM] [Investortrader] But whipsaws will happen, hopefully not too often

[4/28/2004 9:53:39 PM] [ilovemusicCOM] whipsaws are buying opportunities.

[4/28/2004 9:53:39 PM] [Investortrader] This one has somewhat strong resistance overhead at the converging middle BB and 50sma

[4/28/2004 9:53:50 PM] [ilovemusicCOM] While all of you TA people panic, I step in

[4/28/2004 9:53:57 PM] [Investortrader] Tell that to the FVCX owners ilovemusic

[4/28/2004 9:54:03 PM] [ilovemusicCOM] I'm the one causing the whipsaw.

[4/28/2004 9:54:41 PM] [kmack] music...will you stop interrupting please?

[4/28/2004 9:54:42 PM] [ilovemusicCOM] I'm glad for all of you weak Americans.

[4/28/2004 9:56:53 PM] [Investortrader] So if SYNC continues up tomorrow, you guys just saw me get caught in my first whipsaw in awhile :o

[4/28/2004 9:57:00 PM] [husker] .

[4/28/2004 9:57:07 PM] [husker] 4

[4/28/2004 9:57:15 PM] [Investortrader] Any questions on SYNC?

[4/28/2004 9:57:41 PM] [cobralso] are you short IT

[4/28/2004 9:57:46 PM] [Investortrader] Don't know cobralso, don't care ... and don't see him anymore =D

[4/28/2004 9:57:57 PM] [kmack] anyway to avoid having stops where everyone else does?

[4/28/2004 9:58:21 PM] [Investortrader] Not short, just got back from vacation and was 100% cash

[4/28/2004 9:58:30 PM] [ilovemusicCOM] glad to see you guys finally waking up. Was getting worried that the hotto world was gone

[4/28/2004 9:58:45 PM] [cobralso] I am confused what is a whipsaw ?

[4/28/2004 9:58:51 PM] [Investortrader] kmack, I don't worry about that ... I just find my own place and if it hits it it hits it

[4/28/2004 9:59:07 PM] [kmack] ok...

[4/28/2004 9:59:20 PM] [ilovemusicCOM] whipsaw is when a Technical pattern suggests that you get out of a stock because, say, support is broken

[4/28/2004 9:59:30 PM] [ilovemusicCOM] so you sell, but then the stock bounces back

[4/28/2004 9:59:32 PM] [Investortrader] I'm trying to place it just under strong support, and usually when that breaks you should get out, so I do

[4/28/2004 9:59:39 PM] [ilovemusicCOM] and shoots up

[4/28/2004 10:00:06 PM] [Investortrader] Whipsaw is when you place a stop, the price runs down and you sell .. then runs back up

[4/28/2004 10:00:31 PM] [cobralso] Oh ok ty

[4/28/2004 10:00:33 PM] [kmack] so...if it comes back above support..it still has to test it from the other side...then it's safe to reenter...

[4/28/2004 10:01:13 PM] [Investortrader] kmack, sometimes it gets tricky ... if I lose 2, or 3 times on a stock from that .. I just move on to another stock .. plenty of them out there

[4/28/2004 10:02:23 PM] [cobralso] So how do you like SIRI IT?

[4/28/2004 10:02:56 PM] [Investortrader] Here I'm not sure what to do with SYNC .. so I'll just watch it since I am out of it .. that could change tomorrow

[4/28/2004 10:03:05 PM] [da2rth] i'm assuming , "stops" are based on daily chart. right, IT?

[4/28/2004 10:03:24 PM] [Investortrader] Mine are da2rth ... daytraders might use different timeframes

[4/28/2004 10:03:34 PM] [da2rth] ok

[4/28/2004 10:04:08 PM] [Investortrader] Longer term investors might use weekly charts .. all depends on your timeframe just like chart patterns

[4/28/2004 10:04:26 PM] [Investortrader] Any questions on SYNC?

[4/28/2004 10:05:10 PM] [Investortrader] On to XYBR ...

[4/28/2004 10:09:13 PM] [Investortrader] This one is looking good but does have nearby resistance with the upper BB and the 50sma converging .. but OBV is saying that should be taken out sooner or later

[4/28/2004 10:11:33 PM] [Investortrader] So far the middle BB has held during this base ... I like seeing that

[4/28/2004 10:11:52 PM] [atraveler] pls comment on MEDI

[4/28/2004 10:12:40 PM] [Success] XYBR 1.21 support has held

[4/28/2004 10:12:44 PM] [Investortrader] And with how the lower BB is rising ... there isn't too much risk too the downside

[4/28/2004 10:13:08 PM] [Investortrader] Good eye Success!

[4/28/2004 10:13:30 PM] [Success] made enough on XYBR in 2000 to care
[4/28/2004 10:13:46 PM] [Investortrader] See how it made a dbl btm with the peak between the two on 3/31 having 1.21 as it's hod
[4/28/2004 10:14:04 PM] [gnpiiii] IT, please look at ECLP if you have time.....thanks in advance
[4/28/2004 10:14:08 PM] [Investortrader] Then on 4/20 and 4/21 it came right down to there
[4/28/2004 10:14:23 PM] [Success] at 20 SMA now
[4/28/2004 10:14:32 PM] [Investortrader] If one were interested buying anywhere around here would be ok
[4/28/2004 10:15:12 PM] [Success] news last couple days too
[4/28/2004 10:15:17 PM] [Investortrader] Looking to either scalp it near the 50sma or hold for a BO based on the OBV
[4/28/2004 10:15:22 PM] [jerry99] IT if you bought this here where would you put your stop?
[4/28/2004 10:16:04 PM] [Investortrader] I don't trade ones this low and usually don't comment on them ... but I guess the nice OBV (and the devil) made me do it :o
[4/28/2004 10:17:42 PM] [Investortrader] Could use a few cents below that 1.21 support ... or could go a bit lower to just under the lower BB, which is rising pretty sharply
[4/28/2004 10:18:19 PM] [jerry99] Thanks I would not have thought about the BB stop.
[4/28/2004 10:18:35 PM] [Investortrader] Or if your plan is to either hold or get out for good, and not loo to get back in, maybe a few cents under the 4/8 lod
[4/28/2004 10:18:54 PM] [Investortrader] Not "look" to get back in
[4/28/2004 10:19:10 PM] [Investortrader] Welcome jerry :)
[4/28/2004 10:19:27 PM] [Investortrader] Any questions on XYBR?
[4/28/2004 10:19:56 PM] [Investortrader] On to SIRI ...
[4/28/2004 10:20:03 PM] [jerry99] I usually just stay in the shadows :)
[4/28/2004 10:21:33 PM] [Investortrader] This one doesn't look too good, but it is sitting on support here at the converging lower BB and 50sma
[4/28/2004 10:22:06 PM] [Investortrader] Many times you've seen me buy pb's to the 50sma ...
[4/28/2004 10:22:18 PM] [Investortrader] This one looks more ominous to me
[4/28/2004 10:22:38 PM] [Investortrader] Note how the down days have bene on much bigger vol than the up days in this decline
[4/28/2004 10:22:54 PM] [Success] hourly bounced at 400 SMA and went sideways
[4/28/2004 10:23:02 PM] [Investortrader] And see the last couple of days how vol has increased each day as it went down
[4/28/2004 10:23:26 PM] [Investortrader] Not something I want to see when looking for a buy candidate on a pb to the 50sma
[4/28/2004 10:23:44 PM] [Investortrader] I want to see declining vol on successive days as it gets down to the 50sma, not increasing vol
[4/28/2004 10:24:14 PM] [jerry99] You probably have discussed this before but what do you want on a PB to the 50?
[4/28/2004 10:24:21 PM] [Investortrader] Will it bounce here? Maybe ... but I won't be in it
[4/28/2004 10:24:48 PM] [jerry99] I guess you just answered me. Thanks
[4/28/2004 10:25:07 PM] [Investortrader] jerry, vol is pretty big, also ... look at the OBV here ... it's making lower lows as the price makes lower lows, not good
[4/28/2004 10:25:13 PM] [Investortrader] Yup ;)
[4/28/2004 10:25:38 PM] [jerry99] So you really like an OBV divergence?
[4/28/2004 10:25:41 PM] [Investortrader] There are some other chart points around this area
[4/28/2004 10:26:01 PM] [Investortrader] The 2/12 swing high was 3.29

[4/28/2004 10:26:26 PM] [Investortrader] Yes, I do jerry
[4/28/2004 10:26:37 PM] [jerry99] OK
[4/28/2004 10:26:56 PM] [Success] XMSR same business - hourly at LR30
[4/28/2004 10:27:03 PM] [Investortrader] It usually means something ..
accumulation, distribuion ... trick is to know when it's a false signal, I point those out
when I see them
[4/28/2004 10:27:24 PM] [Investortrader] But OBV is just one thing, you need more
than just OBV
[4/28/2004 10:27:58 PM] [Investortrader] If the price pattern stinks, or if there are
other reasons, can't be buying just becuase OBV looks good
[4/28/2004 10:28:34 PM] [Investortrader] So SIRI may bounce here, pretty good
support and usually there is a bounce off the 50sma
[4/28/2004 10:29:10 PM] [Investortrader] But in general the pattern looks weak and
there must be better charts to trade out there
[4/28/2004 10:29:21 PM] [Investortrader] Any questions on SIRI?
[4/28/2004 10:29:45 PM] [jerry99] No
[4/28/2004 10:29:56 PM] [Investortrader] On to MEDI ...
[4/28/2004 10:31:51 PM] [Investortrader] This one ended some deal, lowered outlook
yesterday ... and it goes up ... nice when they react well to bad news
[4/28/2004 10:32:36 PM] [Investortrader] BO on nice vol, with OBV looking good
here as well
[4/28/2004 10:33:11 PM] [Investortrader] Could be starting to ride the upper BB here
... pretty strong in this market
[4/28/2004 10:33:51 PM] [Investortrader] Think what it would look like if the market
were up 150 today!
[4/28/2004 10:35:13 PM] [Investortrader] This one looks good to me
[4/28/2004 10:35:20 PM] [atraveler] me too
[4/28/2004 10:35:24 PM] [atraveler] thx
[4/28/2004 10:35:26 PM] [da2rth] if not in already, where would you buy?
[4/28/2004 10:35:57 PM] [jerry99] And would you have a first target? Or second?
[4/28/2004 10:36:22 PM] [Investortrader] The first question I always ask is .. where
would I put a stop ... then I look for where would I buy
[4/28/2004 10:36:42 PM] [da2rth] good one...i like that
[4/28/2004 10:36:44 PM] [Investortrader] Because if the stop is too far away ... I stay
away
[4/28/2004 10:37:01 PM] [jerry99] Yes, stops I even forget about them in chat :)
[4/28/2004 10:37:02 PM] [Investortrader] Here there are a couple reasonable stop
areas
[4/28/2004 10:37:10 PM] [Investortrader] lol jerry!
[4/28/2004 10:37:44 PM] [jerry99] Yea laughing keeps me from crying!
[4/28/2004 10:38:13 PM] [Investortrader] Since this is the beginning of the move, that
first big vol updays' lod shouldn't be violated ... that would be a pretty tight one ...
using just under the middle BB or the 50sma is also reasonable here
[4/28/2004 10:39:07 PM] [Investortrader] So your looking at 24.66, 24.32, and 24.11 (
I always go a bit under)
[4/28/2004 10:39:09 PM] [Success] will present at conference next week
[4/28/2004 10:39:41 PM] [Investortrader] Thanks Success ... I'd probably be out

[4/28/2004 10:39:53 PM] [Investortrader] But we've got a week!
[4/28/2004 10:39:54 PM] [Success] analysts lowered estimates tonight and rate it
Hold
[4/28/2004 10:40:16 PM] [Investortrader] Now that we have possible stop areas,
where would we buy it ...

give us a good entry

[4/28/2004 10:47:18 PM] [Investortrader] Thanks da2rth :)
[4/28/2004 10:48:20 PM] [Investortrader] This looks like a case of the news overriding the negative chart ... another reason why you need to use stops! Would have hated to been short this one today with no stop
[4/28/2004 10:48:44 PM] [Investortrader] Big vol, big range, big day
[4/28/2004 10:49:06 PM] [Investortrader] Earnings, must have been good
[4/28/2004 10:50:02 PM] [Investortrader] Hard to not like this one, big BO, over the middle BB, over the 50sma
[4/28/2004 10:51:22 PM] [Investortrader] This could be strong, if interested definately read and understand the earnings news on it
[4/28/2004 10:53:10 PM] [da2rth] look at last hour...obv not looking too good in relation to price...or could be profit taking?
[4/28/2004 10:53:11 PM] [Investortrader] When news overrides a chart ... you need to give that more weight .. so that makes reading the chart less accurate ... without understanding the news hard to say if it will pb to test the 50sma (which usually happens) or have another nice day tomorrow
[4/28/2004 10:53:13 PM] [gnpiii] I have listened to the Call on ECLP.....hard to gauge.....seems like their prodcut is being accepted however, and of projected revs, 90% for 2004 is locked in already

[4/28/2004 10:59:21 PM] [Investortrader] Which is where the 50sma is about
[4/28/2004 10:59:38 PM] [Investortrader] OBV suggests that may not hold
[4/28/2004 11:00:12 PM] [Investortrader] With a weak market, and a weak chart ... this one looks like a short possibility
[4/28/2004 11:00:42 PM] [neofighter] how bout longer term chart..monthly?

[4/28/2004 11:01:19 PM] [jerry99] IT how does OBV tell you the BB will not hold?
[4/28/2004 11:01:51 PM] [Investortrader] Monthly shows it's right up near resistance

[4/28/2004 11:08:33 PM] [BossFan] Ok, no prob...saw the big OBV and close over 50MA and thought WOW

[4/28/2004 11:11:18 PM] [texastony] confirm, BCRX

[4/28/2004 11:11:29 PM] [Investortrader] You need to be VERY careful when trading charts like this ... swing trading that is, daytraders have your fun!

[4/28/2004 11:11:44 PM] [Investortrader] But for us swing traders, this can be dangerous

[4/28/2004 11:12:43 PM] [Investortrader] Where would a good stop be?

[4/28/2004 11:12:56 PM] [Investortrader] Probably too far away here

[4/28/2004 11:13:42 PM] [Investortrader] When I talk about stops and placement, I mean ... good placement to avoid most whipsaws, to avoid losing too much, and that is under some kind of support so it shows weakness if it gets down there

[4/28/2004 11:13:54 PM] [texastony] could use today or yesterday lo

[4/28/2004 11:14:12 PM] [Investortrader] Here you could use under the lod of today, or yesterday .. but a low vol pb could easily take that out

[4/28/2004 11:14:18 PM] [Investortrader] Right texastony

[4/28/2004 11:14:42 PM] [Investortrader] If you're in from the BO two days ago, that's one thing, if you're not in yet and looking to buy, that's another

[4/28/2004 11:15:43 PM] [texastony] agree. I missed the BO above resistance two days ago. Best not to chase for swing.

[4/28/2004 11:15:46 PM] [Investortrader] At any time when a stock is riding an outer BB, it can rest for a couple of days, going sideways or having a pb ... in charts like these you don't want to buy up here and get taken out on that kind of pb

[4/28/2004 11:16:25 PM] [Investortrader] If looking to get in, if you see that kind of pb you can buy it .. but remember the 3-day rule

[4/28/2004 11:17:44 PM] [texastony] IT, please refresh me on the 3 day rule

[4/28/2004 11:17:45 PM] [Investortrader] A higher risk play would be to buy a pb to

[4/28/2004 11:20:18 PM] [da2rth] also, made 3 year high.....good chance to pullback from here before going higher

[4/28/2004 11:20:53 PM] [Investortrader] Clubs]]]Hotto]]]Boards]]]General discussion]]] scroll down just a little and look for Investortraders In-depth Discussion on ITIG

[4/28/2004 11:21:29 PM] [Investortrader] Everyone read it, it goes over the 3-day rule, riding the upper BB, and how I traded ITIG for a couple of months

[4/28/2004 11:22:02 PM] [Investortrader] What I saw, why I bot, why I sold, where I bot on what days, etc

[4/28/2004 11:22:17 PM] [texastony] OK, thanks IT. I'll read it.

[4/28/2004 11:22:50 PM] [Investortrader] It starts in late Oct last year on the BO and run

[4/28/2004 11:23:06 PM] [jerry99] Got it thanks

[4/28/2004 11:23:10 PM] [Investortrader] The coverage does, wrote it in Dec I think

[4/28/2004 11:23:13 PM] [BossFan] yea, ITIG was a great one bat at \$3, huh :)

[4/28/2004 11:23:21 PM] [BossFan] bat == at :)

[4/28/2004 11:23:23 PM] [Investortrader] Sure was BossFan :)

[4/28/2004 11:23:42 PM] [Investortrader] Any questions on BCRX?

[4/28/2004 11:24:09 PM] [Stixman] TBUS EMRG plz

[4/28/2004 11:24:26 PM] [Investortrader] On to CSX ...

[4/28/2004 11:24:40 PM] [Investortrader] This one looks nice here

[4/28/2004 11:25:08 PM] [Investortrader] OBV confirmed the BO to new highs, BO over the 50sma

[4/28/2004 11:25:45 PM] [Investortrader] Came back down to test the 50sma on a bit lower vol (usually the 50sma gets tested just like usually the first attempt at it fails .. but not always)

[4/28/2004 11:26:06 PM] [Investortrader] Anytime I see a test like that, I immediately check the vol

[4/28/2004 11:26:22 PM] [Investortrader] That's why you always hear me mentioning vol .. it's important

[4/28/2004 11:26:46 PM] [Investortrader] Now we have OBV breaking out over it's 50sma too

[4/28/2004 11:27:41 PM] [Superhumanskip] luv

[4/28/2004 11:27:47 PM] [Investortrader] One thing I'd like to point out on this chart, see how once it broke down in Jan

[4/28/2004 11:28:09 PM] [Investortrader] The entire decline into MArch could never rally above the middle BB

[4/28/2004 11:28:42 PM] [Investortrader] Many times during rallies, the middle BB will act as support, like it was resistance in this decline

[4/28/2004 11:29:25 PM] [Investortrader] Earnings and CC today, must have been good

[4/28/2004 11:30:23 PM] [Nitabug] IT. CC..?

[4/28/2004 11:30:23 PM] [Investortrader] Todays lod shouldn't be violated, and with the LR30, 50sma, and middle BB all converging right around there ... if it broke down thru that and I was long, I'd be selling

[4/28/2004 11:30:30 PM] [Investortrader] Conference Call

[4/28/2004 11:30:33 PM] [Kuf] Investortrader, are you almost done? We need to bring the servers down for about 5 minutes

ClubHome

[4/28/2004 11:30:51 PM] [Nitabug] iT..OK TY
[4/28/2004 11:30:54 PM] [BossFan] Glad u like that one IT. Do u think it will PB on 200MA test? Looks to me like it will blast through
[4/28/2004 11:30:55 PM] [Investortrader] No problem Kuf, we'll all just take a 15 minute break :)
[4/28/2004 11:31:05 PM] [Kuf] Ok thanks. Sorry for the interruption
[4/28/2004 11:31:18 PM] [Investortrader] No worries at all, see you on the flip side in 15!
[4/28/2004 11:31:33 PM] [da2rth] should get through 200ma after failing on 4/26. 200ma will then become support
[4/28/2004 11:38:15 PM] [jerry99] Wow that was quick
[4/28/2004 11:44:01 PM] [DMut] IT, still here?
[4/28/2004 11:45:17 PM] [cobralso] IT took everybody out to dinner. didn't you go?
[4/28/2004 11:45:45 PM] [DMut] NO now feeling left out lol
[4/28/2004 11:47:18 PM] [cobralso] didn't take me eather
[4/28/2004 11:49:16 PM] [jerry99] Now I'm hungry :)
[4/28/2004 11:49:24 PM] [Investortrader] Hey everyone :)
[4/28/2004 11:50:14 PM] [DMut] still here
[4/28/2004 11:50:31 PM] [Investortrader] Were there any questions on CSX?
[4/28/2004 11:51:41 PM] [Investortrader] On to TBUS ...
[4/28/2004 11:52:03 PM] [Investortrader] This one has had a very big move this month
[4/28/2004 11:52:05 PM] [DMut] NGPS is not getting too late
[4/28/2004 11:53:10 PM] [DMut] if
[4/28/2004 11:53:39 PM] [Investortrader] I use a different exit rule on stocks that run up so much like this one did .. going from the low 2's to almost 17
[4/28/2004 11:53:53 PM] [Investortrader] Because of the tremendous amount of gains
[4/28/2004 11:54:43 PM] [Investortrader] I switched to arithmetic so the BB's wouldn't be all screwy
[4/28/2004 11:55:59 PM] [Investortrader] It would be hard not to take some profits along the way ... but I would be holding some as long as it was running outside the BB's since it started with a pretty big BO
[4/28/2004 11:56:53 PM] [Investortrader] And after such a huge upmove .. the first day it fell inside the bands I would sell it all ... and re-evaluate
[4/28/2004 11:57:35 PM] [Investortrader] All that I had left ... I know I would have taken some profits along the way .. which would have been a cushion to allow me to hold the majority for the outside the BB run
[4/28/2004 11:58:13 PM] [Investortrader] Again, this is for when you get into a major profit situation like this one was
[4/28/2004 11:58:40 PM] [Investortrader] Waiting for the 3-day rule can make a lot more profit disappear, also you don't get to buy it back cheaper during the decline
[4/28/2004 11:59:07 PM] [Investortrader] Just because you sell it all, doesn't mean you can't get back in ... that's why you re-evaluate and watch
[4/28/2004 11:59:07 PM] [DMut] what do you mean by fall inside bands? close? of just pierce them
[4/28/2004 11:59:19 PM] [DMut] or
[4/28/2004 11:59:54 PM] [Investortrader] DMut, any significant piercing, no need to wait for a close ... after such a huge run-up there will be many who take profits on any weakness ... may as well be one of the first to take profits rather than one of the last
[4/29/2004 12:00:18 AM] [Investortrader] First once it breaks back into the BB's
[4/29/2004 12:00:59 AM] [Investortrader] And if it had kept going, bummer, you only tripled your money in a week or two, dam! ;)
