[3/30/2004 12:01:01 AM] [gnpiii] but OBV did bounce off lower BB  
[3/30/2004 12:01:02 AM] [Investortrader] I saw that ... didn't look back for the news as the 20sma held and it reversed up then and OBV has made new highs  
[3/30/2004 12:01:55 AM] [SkyDragon] IT, could you look at SUN  
[3/30/2004 12:02:20 AM] [Investortrader] It did look bad at the time .. bit notice one thing in it .. for such huge volume it didn't have that big a range .. so lots of new buyers were stepping up to meet the sellers  
[3/30/2004 12:02:54 AM] [gnpiii] Yes noticed that also  
[3/30/2004 12:03:09 AM] [Nitabug] IT, WOULD 8.15 BE A btbo on (HYC) BACK FROM 1-28-02?  
[3/30/2004 12:03:42 AM] [Investortrader] Also see in late Jan when it sold off, then in early Feb the 6-6.10 area was resistance .. and that big vol day lod was supported there  
[3/30/2004 12:04:12 AM] [gnpiii] what are your thoughts on Indicators, in this case OBV, that seem to be "extended"? Do you expect them to relax some?  
[3/30/2004 12:04:14 AM] [Investortrader] I don't go back that far Nitabug as I'm a shorter term swing trader  
[3/30/2004 12:04:32 AM] [Investortrader] I look at it as being a BO now from the earlier March high  
[3/30/2004 12:05:00 AM] [Investortrader] But if that is an all-time high, it's always good to be in new all-time high ground  
[3/30/2004 12:05:03 AM] [Nitabug] Ty. It..GREAT SESSION...  
[3/30/2004 12:05:17 AM] [Investortrader] Welcome Nitabug :)  
[3/30/2004 12:05:41 AM] [Investortrader] gnpii, it depends on the other conditions as to whether or not OBV is extended  
[3/30/2004 12:05:57 AM] [Investortrader] Here I don't think it is  
[3/30/2004 12:06:27 AM] [gnpiii] ok thanks, so you consider this a go.....I like buying new highs also.....ok thanks again? Any ideas on an entry point? possibly below close today somewhere?  
[3/30/2004 12:06:47 AM] [gnpiii] great volume last hour  
[3/30/2004 12:06:55 AM] [Investortrader] If you look back in the "discussion" section, or wherever it got moved to, for my in-depth talk on ITIG from last year ... it has a good example of an extended OBV and how to read it and how to tell  
[3/30/2004 12:07:32 AM] [Investortrader] And goes in-depth into riding an upper BB and when the OBV is useful and when it is extended  
[3/30/2004 12:07:48 AM] [Investortrader] Any questions on HYC?  
[3/30/2004 12:07:53 AM] [gnpiii] ok great.....its easily found in one folder or another?  
[3/30/2004 12:08:46 AM] [Investortrader] I'm checking now to see where they moved the "Discussion" section if I can real quick  
[3/30/2004 12:09:46 AM] [gnpiii] ty  
[3/30/2004 12:09:57 AM] [cobralso] IT you put it in my TC mail  
[3/30/2004 12:10:16 AM] [Investortrader] It's in "Boards" then "General discussion"  
[3/30/2004 12:10:50 AM] [Investortrader] It's huge, some is in there and there is a link to the rest of it  
[3/30/2004 12:11:02 AM] [Investortrader] But easy to find :)  
[3/30/2004 12:11:10 AM] [Investortrader] On to SUN ...

## ClubHome

[3/30/2004 12:11:20 AM] [bmweyrauch] excellent presentation this evening.....thanks IT

[3/30/2004 12:11:50 AM] [Investortrader] Welcome bmw :)

[3/30/2004 12:12:50 AM] [Investortrader] This one looks a bit iffy

[3/30/2004 12:13:12 AM] [Investortrader] The middle BB has held the pb's until now

[3/30/2004 12:14:15 AM] [Investortrader] And on this little dbl btm where the second btm tested the 50sma ... the OBV made a lower low

[3/30/2004 12:14:39 AM] [Investortrader] Plus the advance today was on low vol

[3/30/2004 12:15:19 AM] [Investortrader] I don't see much to interest me in this one now

[3/30/2004 12:15:53 AM] [Investortrader] Though it is in a good group, especially if OPEC doesn't cut production like they threatened ... I've heard margins are pretty good now

[3/30/2004 12:16:04 AM] [Investortrader] for the refiners

[3/30/2004 12:16:13 AM] [gnpiii] did you talk about IDSA tonight? My apologies if so.....

[3/30/2004 12:16:24 AM] [Investortrader] Not yet, I'll do that one next

[3/30/2004 12:16:30 AM] [gnpiii] tks

[3/30/2004 12:17:09 AM] [Investortrader] So I don't see much in this one here

[3/30/2004 12:17:14 AM] [Investortrader] Any questions on SUN?

[3/30/2004 12:17:29 AM] [SkyDragon] Thanks IT. I love your presentations.

[3/30/2004 12:17:36 AM] [Investortrader] Welcome SkyDragon :)

[3/30/2004 12:17:46 AM] [Investortrader] If you did want to own it, I would use a bit under the 50sma as a stop

[3/30/2004 12:18:24 AM] [Investortrader] On to IDSA ...

[3/30/2004 12:19:21 AM] [Investortrader] I remember being asked about this one first day or two of March I think

[3/30/2004 12:19:53 AM] [AlanD] I'm holding IDSA IT.

[3/30/2004 12:19:54 AM] [Investortrader] We couldn't figure out why the huge monster run-up, only news they found was it was going to split

[3/30/2004 12:20:23 AM] [Investortrader] So I said if that's the only news, it's a short .. and it fell from around 40 to around 25

[3/30/2004 12:20:34 AM] [AlanD] Huge run up due to very small float being fed by the idea of scrap metal being a bread winner for IDSA

[3/30/2004 12:20:41 AM] [gnpiii] I think its the recycling part of the business? only thing there really

[3/30/2004 12:20:43 AM] [Investortrader] Ahhh, thanks Alan :)

[3/30/2004 12:20:56 AM] [gnpiii] from what I saw at least

[3/30/2004 12:21:17 AM] [AlanD] Now, running up into split due late tomorrow or Wed. Only 800K shares in float.

[3/30/2004 12:21:18 AM] [Investortrader] The chart looks good recently in that it's turned up from this base on some nice vol

[3/30/2004 12:21:28 AM] [Investortrader] That is a small float!

[3/30/2004 12:21:49 AM] [AlanD] I think one more day runup or at least intraday. I should be out tomorrow.

[3/30/2004 12:21:57 AM] [Investortrader] Small float means big volatility

[3/30/2004 12:22:18 AM] [Investortrader] I'd be careful with it too Alan

[3/30/2004 12:22:26 AM] [AlanD] You bet. And big volatility means big gains if one knows how to play it.

[3/30/2004 12:22:38 AM] [AlanD] I am. Like I said probably out tomorrow.

[3/30/2004 12:22:57 AM] [AlanD] I'm currently sitting on a substantial gain from it.

[3/30/2004 12:23:01 AM] [Investortrader] Nice trade :)

[3/30/2004 12:23:47 AM] [AlanD] Yes it has been. Tried to short it near the top but no shares available.

[3/30/2004 12:23:49 AM] [Investortrader] Probably best to take the money and run

too

[3/30/2004 12:24:10 AM] [gnpiiii] Interesting that the volume is RIGHT On the 30 day MA

[3/30/2004 12:24:22 AM] [AlanD] Yes your right.

[3/30/2004 12:25:05 AM] [AlanD] SCON is one to watch.

[3/30/2004 12:25:17 AM] [AllWeOwn] hold it a second inv?

[3/30/2004 12:25:35 AM] [AlanD] inv?

[3/30/2004 12:25:38 AM] [Investortrader] Yes AllWeOwn?

[3/30/2004 12:25:48 AM] [AllWeOwn] plz share why you are using simple rather than exp for the 30 MA/vol?

[3/30/2004 12:26:00 AM] [Investortrader] I always use simple

[3/30/2004 12:26:17 AM] [AlanD] I agree with the simple MA

[3/30/2004 12:26:31 AM] [AllWeOwn] lol see thay but WHY?

[3/30/2004 12:26:34 AM] [Investortrader] In this chart the 30sma on vol doesn't really tell you much as it's been so varied

[3/30/2004 12:26:53 AM] [AllWeOwn] ok, and then when you....

[3/30/2004 12:26:57 AM] [Investortrader] I would call today good vol even though it's only at the 30sma

[3/30/2004 12:27:21 AM] [Investortrader] I'm a simple kinda guy ... but seriously ...

[3/30/2004 12:27:22 AM] [AllWeOwn] mention that it is interesting that it is sitting RIGHT on ma are you thinking perhaps a little manipulation?

[3/30/2004 12:27:28 AM] [gnpiiii] I agree.....last twodays volume has been enough to kick up the 30 day

[3/30/2004 12:27:53 AM] [Investortrader] I prefer simple, it works better usually on price and on OBV

[3/30/2004 12:27:57 AM] [gnpiiii] No, just that it was so close to it, like its a precursor to an XL volume day

[3/30/2004 12:28:40 AM] [Investortrader] Exponential was used to make mvg avg crossover signals faster ... but that's not the best way to trade

[3/30/2004 12:28:47 AM] [AllWeOwn] ok so telling perhaps tomorrow may be bigger vol? anyone know if the share issue is going to occur at open or AH

[3/30/2004 12:29:02 AM] [AllWeOwn] THAT"s what I was looking for; makes sense ok ty

[3/30/2004 12:29:09 AM] [Investortrader] I wouldn't call it manipulation ... maybe coincidence on the vol today

[3/30/2004 12:29:12 AM] [gnpiiii] its on the 31st

[3/30/2004 12:29:15 AM] [Investortrader] Welcome :)

[3/30/2004 12:29:25 AM] [gnpiiii] before open

[3/30/2004 12:29:30 AM] [AllWeOwn] announcement said 30th

[3/30/2004 12:29:37 AM] [Investortrader] mvg avg crossovers aren't so hot for traders

[3/30/2004 12:29:49 AM] [AllWeOwn] more position holds?

[3/30/2004 12:30:11 AM] [AlanD] So based on your analysis of volume and price you think continuation of todays move or sell off?

[3/30/2004 12:30:23 AM] [AlanD] I assume your still referring to IDSA?

[3/30/2004 12:30:58 AM] [Investortrader] It should continue ... yes IDSA ... I would probably take some off at least if it pops to the early March highs

[3/30/2004 12:31:42 AM] [AllWeOwn] is that really reasonable that it could pop that big inv? can't imagine! jsut the split hype could do that?

[3/30/2004 12:32:07 AM] [Investortrader] That's only 5 points up, it did that yesterday

[3/30/2004 12:32:29 AM] [AllWeOwn] oh, I was seeing 47, that would be 10 from today

[3/30/2004 12:32:43 AM] [Investortrader] But it's not just the split hype, it has a momo BO now

[3/30/2004 12:32:50 AM] [AllWeOwn] you are looking at close of 43

## ClubHome

[3/30/2004 12:33:05 AM] [Investortrader] Yeah, I was using the close  
[3/30/2004 12:33:14 AM] [AllWeOwn] yes ok  
[3/30/2004 12:33:31 AM] [AtlantaRob] I can't believe how much that stock moved in 1/2 a month, sorry I just got back:8  
[3/30/2004 12:34:08 AM] [Investortrader] Same here Rob  
[3/30/2004 12:34:21 AM] [Investortrader] If it does go up 10, I'd be selling the rest!  
[3/30/2004 12:34:43 AM] [AllWeOwn] the gap today wasn;t a breakaway tho; but wiht the market strength it should have a nice move rather than retrace here  
[3/30/2004 12:34:49 AM] [AllWeOwn] ya no kidding lol  
[3/30/2004 12:35:14 AM] [gnpiii] it says the 30th on Yahoo, the shares "will be delivered or mailed on the 30th".....but I read somewhere else before the open on 31st  
[3/30/2004 12:35:22 AM] [Investortrader] I like the increased volume on it .. if it did go up that much would feel like a blowoff most likely  
[3/30/2004 12:35:34 AM] [AtlantaRob] If you guys know Marioboza, he told me the other day that he was in on this move, I think it was this one anyway  
[3/30/2004 12:35:34 AM] [parkwaypet] would be nice to have some insider on that one  
[3/30/2004 12:35:42 AM] [AllWeOwn] blowoff?  
[3/30/2004 12:35:46 AM] [Investortrader] If it doesn't, could continue on and maybe use the Riding the upper BB rules  
[3/30/2004 12:35:52 AM] [gnpiii] yes, but do you have any experiences with blowoffs on the day of the split?  
[3/30/2004 12:35:52 AM] [Investortrader] Blowoff top  
[3/30/2004 12:36:09 AM] [AllWeOwn] become a runaway?  
[3/30/2004 12:36:16 AM] [AllWeOwn] blue sky, etc  
[3/30/2004 12:36:19 AM] [Investortrader] Blowoff top is a reversal signal  
[3/30/2004 12:36:31 AM] [Investortrader] Like a washout bottom  
[3/30/2004 12:36:54 AM] [AtlantaRob] So would you say that the two really high vol days at the top were a sign to sell?  
[3/30/2004 12:37:00 AM] [Investortrader] That's if it goes up ten tomorrow, which I am not counting on  
[3/30/2004 12:37:18 AM] [Investortrader] Yes Rob! Good example of a blowoff top  
[3/30/2004 12:37:18 AM] [AllWeOwn] ok got it; and gnpill asks re: exp. with blowoff in relation to split?  
[3/30/2004 12:38:01 AM] [Investortrader] A split shouldn't make any difference, though for awhile in the bubble splits created their own momentum  
[3/30/2004 12:38:22 AM] [bbmd] IT do have time for ATYT,Thx.  
[3/30/2004 12:38:35 AM] [gnpiii] the thing about it is the chart gets skewd.....like TASR for example  
[3/30/2004 12:38:45 AM] [Investortrader] Look at 3/1 for example  
[3/30/2004 12:39:32 AM] [Investortrader] Gap up, big volume, after a big move up, but small price range .. I mentioned this pattern earlier tonight as one of those reversal patterns where I wouldn't wait for a 3-4 day stall out of contact with the upper BB to sell, I'd sell on that day  
[3/30/2004 12:40:03 AM] [Investortrader] small price range meaning the body of the candle  
[3/30/2004 12:40:13 AM] [gnpiii] not hard to see also, way out in front of lin reg 30  
[3/30/2004 12:40:22 AM] [gnpiii] almost double  
[3/30/2004 12:40:39 AM] [Investortrader] Any questions on IDSA?  
[3/30/2004 12:41:05 AM] [gnpiii] would you want to see higher highs on OBV tomorrow?  
[3/30/2004 12:41:25 AM] [Investortrader] OBV is fine on IDSA here  
[3/30/2004 12:41:26 AM] [AlanD] None here. Nice analysis.  
[3/30/2004 12:41:34 AM] [AllWeOwn] thank you for being so accomodating to my

interruptions :)

[3/30/2004 12:41:37 AM] [gnpiiii] thanks again

[3/30/2004 12:41:53 AM] [AtlantaRob] ty very much IT, I learned a lot

[3/30/2004 12:41:54 AM] [gnpiiii] very easy to understand your stuff, and you teach well

[3/30/2004 12:41:55 AM] [parkwaypet] SNT0 has been nothing but really moving last month

[3/30/2004 12:41:56 AM] [Investortrader] If it doesn't run up too much tomorrow might hold and see how it rides the upper BB, it has consolidated for a bit here

[3/30/2004 12:42:09 AM] [Investortrader] Thanks Alan :)

[3/30/2004 12:42:17 AM] [Investortrader] Welcome gnpiiii :)

[3/30/2004 12:42:25 AM] [Investortrader] Welcome Rob :)

[3/30/2004 12:42:46 AM] [Investortrader] ATYT ...

[3/30/2004 12:43:42 AM] [Investortrader] 2nd qtr conference call today ... looks like they said some good things

[3/30/2004 12:44:16 AM] [parkwaypet] Look at TSV WOW

[3/30/2004 12:44:58 AM] [Investortrader] I don't think I have TSV anywhere anymore lol

[3/30/2004 12:45:10 AM] [Investortrader] If you mean the indicator

[3/30/2004 12:45:19 AM] [parkwaypet] ya

[3/30/2004 12:45:33 AM] [Investortrader] This one wouldn't surprise me if we got a little pb to the 50sma, right around todays open

[3/30/2004 12:45:36 AM] [parkwaypet] Way ahead of OBV

[3/30/2004 12:45:52 AM] [Investortrader] The OBV looks ok in it

[3/30/2004 12:46:24 AM] [Investortrader] That 15.80 area has a few chart points too

[3/30/2004 12:47:17 AM] [Investortrader] It was resistance late Nov and mid Dec on 11/18 and 12/12

[3/30/2004 12:47:37 AM] [Investortrader] Also early March after it fell thru the 50sma

[3/30/2004 12:49:01 AM] [Investortrader] I wouldn't want to see it fall back below 15 or that would negate this pattern

[3/30/2004 12:49:33 AM] [bbmd] It was up some after hour to day.

[3/30/2004 12:49:34 AM] [Investortrader] That being around the 3/17 high

[3/30/2004 12:50:20 AM] [Investortrader] It's looking good if you own it, and has possibilities on a tes of the 50sma if you don't

[3/30/2004 12:50:30 AM] [Investortrader] test of the 50sma

[3/30/2004 12:50:58 AM] [Investortrader] Any questions on ATYT?

[3/30/2004 12:51:20 AM] [parkwaypet] IT great comments

[3/30/2004 12:51:29 AM] [Investortrader] Thank you parkwaypet :)

[3/30/2004 12:51:44 AM] [Investortrader] Last one for tonight, SNT0 ...

[3/30/2004 12:51:44 AM] [bbmd] Thx.IT.

[3/30/2004 12:51:50 AM] [Investortrader] Welcome bbmd :)

[3/30/2004 12:52:25 AM] [Investortrader] This is one where the OBV needs to be looked at in a different way

[3/30/2004 12:53:09 AM] [Investortrader] As this one had pretty much zero interest before 3/12

[3/30/2004 12:54:36 AM] [Investortrader] So I would discount those two huge vol days

[3/30/2004 12:55:02 AM] [Investortrader] And start looking for comparisons in OBV with the day after that

[3/30/2004 12:55:30 AM] [Investortrader] Starting there we see OBV is confirming the new highs

[3/30/2004 12:56:15 AM] [Investortrader] The reason I am discounting is because the big vol down day lod couldn't even get down to the prior days open

[3/30/2004 12:56:35 AM] [Investortrader] And the lod of that big vol down day hasn't been violated

## ClubHome

[3/30/2004 12:57:18 AM] [Investortrader] So instead of having that day screw up the reading of the OBV, you need to take all that into account .. if the lod that day hadn't held that would be different ... but it's had plenty of time to break down and it hasn't

[3/30/2004 12:58:11 AM] [Investortrader] So the chart is looking good if you own it, a bit risky to be buying it up here though

[3/30/2004 12:59:14 AM] [Investortrader] As the 3/26 lod is the only real logical place to consider a stop for a swing trader (just under that price as usual)

[3/30/2004 1:00:42 AM] [Nipsy331] after that big gap up, what might have been a likely place to enter, if any? Or would the risk have been too high?

[3/30/2004 1:01:55 AM] [Nipsy331] it would seem that these go go gap up stocks are too hard to chase, but...from the outside the gains look delicious=D

[3/30/2004 1:01:57 AM] [Investortrader] Mostly too high for me, but after seeing it consolidate for over a week with OBV making slight improvements that could have been a place

[3/30/2004 1:03:33 AM] [Investortrader] Any shakiness usually shows up within a week

[3/30/2004 1:03:50 AM] [Investortrader] So after the first week is over, with price settling down, could start to look

[3/30/2004 1:04:20 AM] [Investortrader] And either try to buy near the lows of the consolidation recently or buy a BO

[3/30/2004 1:04:57 AM] [Investortrader] Then use just under the lows if you buy near the lows as your stop, or use just under the BO as your stop if you buy the BO ... if you buy the lows you can add on the BO

[3/30/2004 1:05:24 AM] [Investortrader] If you buy the BO you can add if it tests the BO area

[3/30/2004 1:06:16 AM] [Investortrader] But since it gapped into about a double, I'd want to wait that first week out and there is still pretty high risk

[3/30/2004 1:06:44 AM] [Nipsy331] High risk, that's for sure.

[3/30/2004 1:07:12 AM] [Investortrader] Notice once it did BO again on 3/24 ...

[3/30/2004 1:07:25 AM] [Investortrader] The next 2 days it pulled back about half way down that candle

[3/30/2004 1:08:03 AM] [Investortrader] Which was right around the high of the base before, on 3/19
