[1/25/2004 3:26:12 PM] [SeattleSteve] Kmack, lots of the "followers" and "students"
are up big percentages over the past year
[1/25/2004 3:26:14 PM] [kmack] I just know you have been calling the market
accurately for over a year..
[1/25/2004 3:26:18 PM] [rickmrge] Hi hotto could you put up your chart that you use
the most with the rs & bb bands? I had to reinstall tcnet and lost every thing.
[1/25/2004 3:26:40 PM] [hotto] But... Last 4 weeks.. very nice..
[1/25/2004 3:27:02 PM] [hotto] My gains from Oct. 2002 to Dec 2002 were
published..
[1/25/2004 3:27:07 PM] [SeattleSteve] Last 5 weeks, I agree, hotto. Very, very nice
[1/25/2004 3:27:19 PM] [hotto] Gains from April to July.. also published..
[1/25/2004 3:27:23 PM] [beach] my guess K, is that Hotto is up well over 300% for
the year
[1/25/2004 3:27:42 PM] [hotto] Gains from April to October.. also published..
[1/25/2004 3:27:42 PM] [kmack] ok...when is Maria going to call??
[1/25/2004 3:27:54 PM] [kmack] where are they published?
[1/25/2004 3:28:14 PM] [beach] with Hotto's guidance and teaching I ended the year
up 100%
[1/25/2004 3:28:18 PM] [hotto] In discussions.. in Hotto Club.. over the months..
[1/25/2004 3:28:19 PM] [kmack] you CAN trade the market...oh no!! CNBC was

[1/25/2004 3:40:25 PM] [parkwaypet] I have daily or 5 day a scan for the 3 day?
[1/25/2004 3:40:39 PM] [hotto] PPC3 = C / (C3 +.0001)
[1/25/2004 3:40:46 PM] [parkwaypet] TY
[1/25/2004 3:41:09 PM] [hotto] oops... not DS2V.... LOL
[1/25/2004 3:41:29 PM] [hotto] use AS2V - the old AdvStx2Vol scan
[1/25/2004 3:41:55 PM] [hotto] DS2V is for Down stocks.. DeclStx2Vol (old name)
[1/25/2004 3:42:12 PM] [hotto] It just took me too long to type those old names.
[1/25/2004 3:42:52 PM] [kmack] could someone add that to the glossary..AS2V and DS2V
[1/25/2004 3:42:56 PM] [kmack] ?
[1/25/2004 3:43:29 PM] [loftyB] Is DS2V for stocks to short or for stocks which have a PB and are looking to bounce?
[1/25/2004 3:44:41 PM] [hotto] lofty... Depends on how you use it.. !
[1/25/2004 3:45:38 PM] [hotto] Better to use DS2V... for Shorting ideas..
[1/25/2004 3:45:55 PM] [hotto] I use it like this..
[1/25/2004 3:46:31 PM] [hotto] I save 2 or 3 days... back on each of the key scans..
[1/25/2004 3:46:55 PM] [hotto] ie.. back up the Watchlists.. into Named Watchlists like...
[1/25/2004 3:47:15 PM] [hotto] DS2V 012204
[1/25/2004 3:47:38 PM] [hotto] that has last Thursday's heavy volume decliners..
[1/25/2004 3:48:07 PM] [hotto] Then.. After Friday's market.. Sort for Percent Gains.. 1 day..
[1/25/2004 3:49:24 PM] [hotto] That would give some Bounce backs After high volume drops on Thursday...
[1/25/2004 3:50:10 PM] [hotto] To get another idea...of putting some of these together..
[1/25/2004 3:51:09 PM] [hotto] I often use the AS2V from the prior day..
[1/25/2004 3:51:35 PM] [hotto] then... use the Price Percent change.. 1 day.. for sort
[1/25/2004 3:52:09 PM] [loftyB] Thanks Hotto ;) Do you also use NR7 / INR7 as OZ was suggesting ?
[1/25/2004 3:52:27 PM] [hotto] That will show me stocks that had High Volume ups.. on Thursday... Followed by a PB day...
[1/25/2004 3:53:05 PM] [hotto] Often find low priced High % gainers that way...
[1/25/2004 3:53:23 PM] [hotto] We did lots of those in October and November
[1/25/2004 3:54:06 PM] [hotto] I use NR7U as a Sort on a few of my basic Scans..

[1/25/2004 3:55:53 PM] [hotto] or... If you are a Real believer..

[1/25/2004 3:58:51 PM] [hotto] yes tina.. min +.03.. depending.. on what I see..

[1/25/2004 3:59:08 PM] [tinaSDtrader] yes, minimum, or end up often in false signal

[1/25/2004 3:59:14 PM] [SeattleSteve] Hotto, what will you be looking at as early warning signs of a possible intraday top on Monday and this coming week?

[1/25/2004 4:00:08 PM] [hotto] esp.. on the PlanA1 sort by NR7... I am more interested in a Solid BO... Because.. usually... get 2 or 3 days.. of upside..OR 1 Huge day up

[1/25/2004 4:01:00 PM] [hotto] Steve.. Same old things.. Pop. run.. Drop.. is my favorite..

[1/25/2004 4:01:05 PM] [tinaSDtrader] fine line - want to be in early, but bite too quick you get the bull trap and either wait 1 or more days for actual b/o or it may roll over on you. My experience anyway.

[1/25/2004 4:01:29 PM] [SeattleSteve] Thanks

[1/25/2004 4:01:33 PM] [hotto] Or.. I will look for weakening Breadth..

[1/25/2004 5:30:07 PM] [SeattleSteve] There are actually a lot of good setups still this weekend. They just may be different stocks than the ones that were so good the past five weeks.

[1/25/2004 5:30:16 PM] [kellam] croy a chat in tcnet tonight around 5Pm , signal explaining chats he uses,i will share what he provided

[1/25/2004 5:30:26 PM] [tinaSDtrader] Note: I have NOT checked news, earnings, fundamentals or if Hotto has made any negative/positive comments on these stocks. My comments are based solely on the chart, all daily time frame.

[1/25/2004 5:30:37 PM] [ChartMonkey] SS - you seem to call out energy plays from time to time - how do you like NE long?

[1/25/2004 5:30:48 PM] [tinaSDtrader] The following stocks are consolidating sideways. They can't do this forever, so they eventually either break out or break down.

[1/25/2004 5:31:00 PM] [AllWeOwn] tina, by large chart patterns do you mean intermediate term holds vs shorter?

[1/25/2004 5:31:06 PM] [armiller] ok Tina I'm all ears

[1/25/2004 5:31:09 PM] [tinaSDtrader] ABGX, ACXM, ASF, ASPT, ATVI, CHTT, EGOV, GNTX, GMT, GTI, KFY, PD, RHAT, TTEC, WHI

[1/25/2004 5:31:23 PM] [tinaSDtrader] ATVI makes me mouth water!!

[1/25/2004 5:31:25 PM] [SeattleSteve] CM, NE is one of dozens of energy stocks that could break out here. Wish I had a good way to know which ones will make the best trades

[1/25/2004 5:31:41 PM] [Luigistock] Dojitis will do that

[1/25/2004 5:31:41 PM] [tinaSDtrader] CMRC - if this one can just hold here above 200ema may have a chance.

[1/25/2004 5:31:58 PM] [tinaSDtrader] CTIC - needs to get above that 200ema.

[1/25/2004 5:32:08 PM] [tinaSDtrader] EXAS - needs to clear that 50ema.

[1/25/2004 5:32:16 PM] [tinaSDtrader] NGEN - this one can be volatile, trade with caution.

eyeballs.

[1/25/2004 5:32:31 PM] [ChartMonkey] my favorite indicators are price and volume
btw

[1/25/2004 5:32:48 PM] [tinaSDtrader] These stocks I mentioned are all consolidating
sideways. They can't do this forever, so they eventually either break out or break
down.

[1/25/2004 5:33:02 PM] [tinaSDtrader] Because they can easily roll over instead of
breaking out, be careful going too early on the breakout day. If volume not above avg
on breakout day I do not trade them.

[1/25/2004 5:33:16 PM] [tinaSDtrader] Going early can result in couple of things:

[1/25/2004 5:33:26 PM] [tinaSDtrader] 1) buying a false signal (aka bull trap) - price
pushes up outside the consolidation then pulls back inside. Then price continues to
base sideways for days with your money tied up;

[1/25/2004 5:33:36 PM] [tinaSDtrader] 2) Rolls to downside with you in it and takes
out your stop (assuming you are using one!).

[1/25/2004 5:34:31 PM] [tinaSDtrader] So as with any trade, require confirmation
before entering (minimum: price moving up, volume on the move). And stops in case it
turns against you.

[1/25/2004 5:34:53 PM] [AllWeOwn] tina so you do not enter until close to closing on
breakout day or at least after av vol is shown?

[1/25/2004 5:35:17 PM] [tinaSDtrader] If you do get caught in a false breakout, give it
a chance to break again, but be ready if it turns over instead.

[1/25/2004 5:35:36 PM] [tinaSDtrader] I enter once I am certain (as certain as one
can be in mkt) that the b/o is good.

[1/25/2004 5:35:58 PM] [tinaSDtrader] Depending on how good the first day run is, if
wait til close of day give up a lot of the run.

[1/25/2004 5:36:17 PM] [tinaSDtrader] But going intraday comes with risks. You must
weight the risks against the rewards.

[1/25/2004 5:36:35 PM] [AllWeOwn] so you must be watching for things like nice
base on 5's ? and ???

[1/25/2004 5:37:10 PM] [tinaSDtrader] Stair stepping up intraday, like 5s or 15s, is
good. Also, volume staying with it intraday as it steps up.

[1/25/2004 5:37:30 PM] [AllWeOwn] ok yes

[1/25/2004 5:37:37 PM] [tinaSDtrader] I don't buy the second it breaks, I wait a bit.
Usually by the time I know about it, it's way up on 5s or 15s, I let it pull back and then
resume before going.

[1/25/2004 5:37:55 PM] [tinaSDtrader] And even then, I may wait longer - like if we're
in the doldrums.

ClubHome

[1/25/2004 5:38:18 PM] [tinaSDtrader] I'll usually wait till just after doldrums to make sure it picks back up.

[1/25/2004 5:38:26 PM] [AllWeOwn] so you see that most often there is a PB opp to enter within a reasonable time frame

[1/25/2004 5:39:38 PM] [tinaSDtrader] yes, usually, unless it gapped up at open, then they often drift back during day

[1/25/2004 5:40:16 PM] [tinaSDtrader] All - re: your earlier question on chart patterns. The triangles, wedges, head shoulders, etc.

[1/25/2004 5:40:43 PM] [tinaSDtrader] Usually take 3+ weeks to form daily bars. Depending on pattern, and market, can go to target in days to couple of weeks.

[1/25/2004 5:41:02 PM] [tinaSDtrader] Sometimes longer - like in Dec. when things didn't follow thru as well due to PT, rotation, tax selling.

[1/25/2004 5:42:16 PM] [tinaSDtrader] Hope that helps.

[1/25/2004 5:42:36 PM] [tinaSDtrader] If our bull market doesn't take a sharp turn down, many consolidations will resume uptrend.

[1/25/2004 5:43:25 PM] [tinaSDtrader] If market pulls back, even great set-ups often pull back with it. SOme will still go.

[1/25/2004 5:43:34 PM] [AllWeOwn] so you were describing bar to bar stuff, and larger chart patterns you mean really long term, like years?

[1/25/2004 5:43:43 PM] [tinaSDtrader] Not predicting a pull back or correction, just stating what can happen if we encounter one.

[1/25/2004 5:43:53 PM] [tinaSDtrader] no, not years, weeks.

[1/25/2004 5:44:14 PM] [tinaSDtrader] they take weeks to form, usually 3 to about 12. But doesn't mean once they break they take weeks to get to target.

[1/25/2004 5:44:34 PM] [tinaSDtrader] SOmetimes they get to target very quickly, like 3-7 days.

[1/25/2004 5:46:38 PM] [tinaSDtrader] I distinguish bar-to-bar stuff as things like - islands, kickers, all candlestick patterns.

[1/25/2004 5:46:52 PM] [tinaSDtrader] These, by themselves, not a strategy. But combined with other technicals, can be good.

[1/25/2004 5:47:40 PM] [tinaSDtrader] I distinguish chart patterns as larger - 15+ bars to form. Except pennants and flags, they are usually a few bars up to 12-14 or so. I still consider those "chart patterns."

[1/25/2004 5:48:11 PM] [tinaSDtrader] The tight sideways move, harder to classify. Not really "bar to bar" but not enough swing to them to call them "chart patterns." I just call them sideways or consolidating.

[1/25/2004 5:48:30 PM] [AllWeOwn] ok I think I am gettgin it; so you are focusing on islands, kickers, candlestick signals and patterns, etc, for discussion purposes today

ClubHome

vs. the larger patterns of wedge, triangle etc. that take longer to form

[1/25/2004 5:49:35 PM] [tinaSDtrader] Today - the stocks I mentioned - are ALL actually going sideways. They are bigger than "bar to bar" but not swinging between two trendlines either.

[1/25/2004 5:50:04 PM] [tinaSDtrader] I don't put much focus on bar patterns, unless they are really strong ones - like kickers and islands.

[1/25/2004 5:50:15 PM] [AllWeOwn] ok thanks sorry to slow chat

[1/25/2004 5:50:25 PM] [tinaSDtrader] But even strong bar patterns, some are much better than others. Takes practice and experience to learn difference.

[1/25/2004 5:51:00 PM] [starrbucks] anyone put up a chart with PCF NR7 sort so I can copy....lost a couple of the sorts..ty

[1/25/2004 5:51:01 PM] [tinaSDtrader] With bar patterns, I prefer to see them inside another strong set-up. For example, a falling wedge that makes an island bottom at bottom of wedge.

[1/25/2004 5:51:11 PM] [isis]

[1/25/2004 5:51:22 PM] [tinaSDtrader] That means a bullish pattern inside a bullish pattern - nice. But kind of rare.

[1/25/2004 5:52:22 PM] [tinaSDtrader] Many think candlestick (bar) patterns are strong - but need to test them. I find they are not strong by themselves, but if show up at certain technical levels, help confirm.

[1/25/2004 5:53:18 PM] [kellam] tina I use the candles with stocs to show Ob or OS conditions

[1/25/2004 5:53:22 PM] [Luigistock] ((H - L) [= (H1 - L1)) AND ((H - L) [= (H2 - L2)) AND ((H - L) [= (H3 - L3)) AND ((H - L) [= (H4 - L4)) AND ((H - L) [= (H5 - L5)) AND ((H - L) [= (H6 - L6))

[1/25/2004 5:54:15 PM] [tinaSDtrader] Indicators can help with bar patterns. But always wait for price to confirm.

[1/25/2004 5:54:39 PM] [tinaSDtrader] Same for chart patterns, indicators help, price must confirm or all you have is a set-up, no entry.

[1/25/2004 5:54:52 PM] [tinaSDtrader] Many get beat up because they buy in the set-up without waiting for the breakout.

[1/25/2004 5:54:59 PM] [kellam] good advice,thx much

[1/25/2004 5:55:13 PM] [tinaSDtrader] Patterns can fail, going early can be costly.

[1/25/2004 5:55:29 PM] [AllWeOwn] yes very good point; not really reliable market for entering in consolidations

[1/25/2004 5:55:51 PM] [kellam] luigi what is the pcf you posted,for what signal?? thx much

[1/25/2004 5:56:01 PM] [tinaSDtrader] if buy while still consolidating, easy to sit for

days watching account go up/down a bit and other good trades passing you by.
[1/25/2004 5:56:21 PM] [tinaSDtrader] and certainly the day you give up and throw in
towel, it goes up next day.
[1/25/2004 5:56:39 PM] [tinaSDtrader] Make sure to PM me the day you give up so I
can get ready to go long. :D
[1/25/2004 5:57:14 PM] [Luigistock] nr7 kellam
[1/25/2004 5:57:24 PM] [SusanM] Tina, I gave up on TRIB on Friday.... :)
[1/25/2004 5:57:27 PM] [chipvette] lol tina all too true.
[1/25/2004 5:57:29 PM] [tinaSDtrader] But if you are not so lucky, it "rolls over" down
out of the consolidation.
[1/25/2004 5:57:29 PM] [kellam] thx luigi
[1/25/2004 5:57:34 PM] [Luigistock] yw
[1/25/2004 5:57:48 PM] [tinaSDtrader] Too funny, I have an alert in on TRIB for when
it starts back up.
[1/25/2004 5:58:04 PM] [tinaSDtrader] Did same on ITIG and banked!
[1/25/2004 5:59:11 PM] [Budamonk] what price is alert set to for TRIB out of curiosity
tina?
[1/25/2004 5:59:17 PM] [tinaSDtrader] My alert triggered on ITIG on 1/7 and in I went.
Held it for few days then took profits.
[1/25/2004 5:59:46 PM] [tinaSDtrader] TRIB 4.72 - BUT, does not mean I'll buy there,
that's just so I don't forget about it.
[1/25/2004 6:00:16 PM] [tinaSDtrader] I will then watch to be sure the b/o is real. Big
target on that one if/when gets going again.
[1/25/2004 6:00:35 PM] [tinaSDtrader] Could run back up to 12/30 6.72. We'll see.
[1/25/2004 6:00:43 PM] [tinaSDtrader] I use my broker alerts, not TC Net's.
[1/25/2004 6:00:52 PM] [Budamonk] me2 i do it to remind myself so wont forget
[1/25/2004 6:01:28 PM] [Moe] Tina, so my 4,59 in TRIB is reasonably safe..do u
agree?
[1/25/2004 6:01:31 PM] [tinaSDtrader] exactly Budamonk - I keep many stocks on my
radar. I'm patient, get rewarded when they get going.
[1/25/2004 6:01:46 PM] [tinaSDtrader] Moe - is 4.59 your alert?
[1/25/2004 6:01:57 PM] [cperkins] tina do you think ivan will continue down
[1/25/2004 6:02:25 PM] [tinaSDtrader] TRIB 4.59 awfully tight - easy to bite on false
signal, but you'll get a better price than me.
[1/25/2004 6:02:31 PM] [Moe] No Tina...I'm inn since 10 days at 4,59
[1/25/2004 6:03:31 PM] [tinaSDtrader] Oh - well, at this point I'd recommend having a
stop in. See if goes from here. Unless need \$ for other trades.
[1/25/2004 6:03:51 PM] [tinaSDtrader] IVAN - what can I say, crystal ball still missing.

ClubHome

[1/25/2004 6:04:35 PM] [tinaSDtrader] IVAN - has 200ema below, and a bottom at 12/10, those may offer support. It's just what you can hold thru and how long takes to get it back.

[1/25/2004 6:04:46 PM] [cperkins] might not have support yill 2.50

[1/25/2004 6:05:20 PM] [cperkins] dec low

[1/25/2004 6:06:19 PM] [cperkins] where is 200 ema for ivan

[1/25/2004 6:06:23 PM] [tinaSDtrader] yes, IVAN could go to \$2.50, we just can't know.

[1/25/2004 6:06:41 PM] [tinaSDtrader] IVAN - 200ema is 2.74, 200sma is 2.27

[1/25/2004 6:07:08 PM] [cperkins] ty

[1/25/2004 6:08:03 PM] [tinaSDtrader] On IVAN - if you are still holding it, and bot somewhere above the 50mas, I know you are not using stops!!!

[1/25/2004 6:09:08 PM] [jbs] Tina, if you are looking at a chart now would you mind sharing it? I would like to follow along.

[1/25/2004 6:09:09 PM] [Noname] IVAN-shorter @ 4\$-looking for 2.30\$-see no reason to go long

[1/25/2004 6:09:16 PM] [tinaSDtrader] Stops are your safety net, especially if a newer trader. It's not winners that kill your account, it's losers, especially big ones.

[1/25/2004 6:09:45 PM] [tinaSDtrader] Under \$5 they usually won't let you short, exceptions tho.

[1/25/2004 6:10:19 PM] [cperkins] i dont have it

[1/25/2004 6:10:28 PM] [tinaSDtrader] jbs - I'm just commenting on IVAN, nothing to share really because you can't see where I place the vertical bar.

[1/25/2004 6:10:49 PM] [jbs] OK, thanks.

[1/25/2004 6:10:58 PM] [tinaSDtrader] I day traded the heck out of IVAN 12/10-12/11, my system just wouldn't let me hold it o/night.

[1/25/2004 6:11:25 PM] [Luigistock] What are your overnight holding rules Tina?

[1/25/2004 6:11:52 PM] [cperkins] just found a nice hammer on ssnc

[1/25/2004 6:11:54 PM] [tinaSDtrader] 10ema above 20ema daily, minimum requirement. Only exceptions: bullish kicker, falling wedge breakout.

[1/25/2004 6:12:32 PM] [tinaSDtrader] But this will keep you out of many stocks too. It's a trade-off. But I find plenty to trade and feel safer going long in an already established uptrend.

[1/25/2004 6:12:47 PM] [tinaSDtrader] It's really about your tolerance level and trading personality.

[1/25/2004 6:12:55 PM] [Luigistock] whatever wurks 4 u and its seems to wurk :8

[1/25/2004 6:14:35 PM] [tinaSDtrader] My system rules don't let me buy while a stock is falling, thus I don't get to add-to at cheaper prices. Mine waits til stock turns up off

support. So I'll always pay a higher price because I wait.

[1/25/2004 6:15:14 PM] [tinaSDtrader] It's a trade off, I pay more for my more conservative stance. But it suits me so I listen to that.

[1/25/2004 6:16:20 PM] [tinaSDtrader] And conservative is a relative term. I'm not conservative like a buy and hold trader for example.

[1/25/2004 6:16:48 PM] [tinaSDtrader] I do take risks, just calculated ones.

[1/25/2004 6:17:52 PM] [tinaSDtrader] Many of hotto picks meet my system right away, some I have to wait on and get in later. But either way, I get to trade plenty of his. Plus mine that I pick.

[1/25/2004 6:17:59 PM] [ChartMonkey] buy and hold can be riskier than trading at some epochs in the markets

[1/25/2004 6:18:07 PM] [tinaSDtrader] here here!

[1/25/2004 6:19:06 PM] [tinaSDtrader] But to most, when use the word "conservative" they think I don't get to trade the high fliers.

[1/25/2004 6:19:29 PM] [tinaSDtrader] I do trade them, but based on rules that work for my personality.

[1/25/2004 6:19:35 PM] [ChartMonkey] sp-500 in the 70's, anyone?

[1/25/2004 6:19:40 PM] [Budamonk] SSNC is hanging man hammer isnt that trend reversal?cperkins

[1/25/2004 6:20:34 PM] [tinaSDtrader] That SP-500 daily chart a beauty - hugging the 10ema all the way up since Dec.

[1/25/2004 6:21:44 PM] [tinaSDtrader] Gotta run all - have a great weekend. Trade smart.:8

[1/25/2004 6:22:00 PM] [babue] Thank you Tina

[1/25/2004 6:24:50 PM] [poppop_1943] tina, if you had a stop set for NMGA, would you have set it for a DBO on 1/22 or a BO above 1/15 or 12/04 or none of the above?

[1/25/2004 6:27:15 PM] [tinaSDtrader] Min req would be a close above 1/15 peak 54.42, but realize there are two more ceilings it may encounter: 1/8 peak 54.99 (also a round #), 12/2 peak 55.25. Look to peaks for resistance, and they also make good targets. Look to bottoms for support, and good place for stop unless too far away.

[1/25/2004 6:27:30 PM] [long351] tina how would you sum up mannings methodology?

[1/25/2004 6:27:34 PM] [tinaSDtrader] yw starr - thx so much for the nice compliment

[1/25/2004 8:11:07 PM] [hotto] It's gonna be great !
[1/25/2004 8:11:22 PM] [armiller] hotto you do continue to amaze
[1/25/2004 8:11:25 PM] [payck] any suggestions for that, I was thinking % change OBV greater than % change price????
[1/25/2004 8:11:31 PM] [armiller] ...us
[1/25/2004 8:11:45 PM] [hotto] Not how I use it pay.....
[1/25/2004 8:12:01 PM] [hotto] that is how some others use it..
[1/25/2004 8:12:20 PM] [payck] I didn't think that was how you used it or we could

have been comparing LR's

[1/25/2004 8:12:30 PM] [hotto] works fine in some cases..

[1/25/2004 8:13:11 PM] [hotto] I simply use it as a divergence measurement..

[1/25/2004 8:13:22 PM] [payck] looking for higher OBV at SH's, will have to think about how to "word" that

[1/25/2004 8:13:57 PM] [hotto] Pick the key dates... like the Jan 13 SL in DJIA

[1/25/2004 8:14:36 PM] [hotto] depending on the Language.. could be....

[1/25/2004 8:16:00 PM] [hotto] (OBV1 [OBV7) AND (C1] C7)

[1/25/2004 8:16:34 PM] [payck] thanks, I'll give it a try

[1/25/2004 8:16:46 PM] [hotto] that would find Prices moving with DJIA up from 1/13 to 1/22... With faltering OBV

[1/25/2004 8:17:07 PM] [hotto] a Classic Neg OBV divergence vs PRice..

[1/25/2004 8:17:23 PM] [payck] but I'd have to switch it for longs right?

[1/25/2004 8:17:24 PM] [Sharon1555] Hotto.. I have a question on sorting the Indexes.. I tried to follow your formula but think I am missing something...

[1/25/2004 8:17:28 PM] [hotto] The type of scans I use in Stockcharts.com

[1/25/2004 8:17:51 PM] [hotto] yes , pay....THat was for Short finding

[1/25/2004 8:18:07 PM] [payck] understand

[1/25/2004 8:18:43 PM] [hotto] for Longs.. a point would have been.. from the 1/8 SH.. to the 1/13 SL..

[1/25/2004 8:18:59 PM] [hotto] then.. look for Pos OBV divergence vs PRice

[1/25/2004 8:20:05 PM] [payck] thanks

[1/25/2004 8:20:09 PM] [hotto] Note..I try to use days where the DJIA closes Up near SH and Closes Down near SL.. to make sure the pressure

[1/25/2004 8:20:29 PM] [Sharon1555] I have waned to do sector analysis and compare it with yours but my results are way off... would you go over that some time or on your web?

[1/25/2004 8:20:34 PM] [hotto] on the stocks.. was going in the direction we want.. for the sense of the OBV

[1/25/2004 8:21:08 PM] [hotto] Sharon.. Let's do.. Friday...

[1/25/2004 8:21:34 PM] [hotto] I have my Sector Analysis Watchlist up now

[1/25/2004 8:21:36 PM] [Sharon1555] great!!!

[1/25/2004 8:22:14 PM] [hotto] I am sorting by PPC3...

[1/25/2004 8:22:47 PM] [hotto] C / (C3 + .0001)

[1/25/2004 8:23:40 PM] [hotto] I use PPC3 today... since that was the last DJIA down close.. just before the SL..on 1/21/04

[1/25/2004 8:24:21 PM] [hotto] need to use the Down Close day... to have a Negative Market mood...Into the EOD.. on that day.

[1/25/2004 8:29:14 PM] [hotto] I hit the space bar.. down to 2nd one...

[1/25/2004 8:29:24 PM] [hotto] #2 RLX--X retail.

[1/25/2004 8:30:37 PM] [hotto] #3 OSX--X Oil svc

[1/25/2004 8:31:33 PM] [lavenderangel] Ok, maybe i'm being dense today, but what does sorting the sectors info get you?

[1/25/2004 8:31:44 PM] [Sharon1555] yes, please do.. and thanks for your patience

[1/25/2004 8:31:47 PM] [hotto] back later

[1/25/2004 8:33:13 PM] [hotto] Back in Oct..Nov... We saw the NYSE and CYC--X creeping up to top...

[1/25/2004 8:33:57 PM] [hotto] Helped ID that the Big CAPs (like DJIA) were about to take over leadership

[1/25/2004 8:34:30 PM] [hotto] They have been in the lead ever since.. (since T-Week)

[1/25/2004 8:35:20 PM] [hotto] By thumbing through the list every day or 2.. helps keep in touch.. with emerging favorites...

[1/25/2004 8:35:39 PM] [hotto] like Sharon said... where money is flowing IN and out

[1/25/2004 9:30:04 PM] [tinaSDtrader] By the way, I am thrilled with the lists of stocks on the website. Like also that you're adding a brief definition of what the themes are, extremely helpful.

[1/25/2004 9:45:55 PM] [parkwaypet] daily

[1/25/2004 9:46:05 PM] [hotto] HILL.. I noticed the big OBV last 2 weeks

[1/25/2004 9:47:02 PM] [hotto] pay.. thanks... what were your params.. on the OBV scans..?

[1/25/2004 9:48:21 PM] [payck] this is the result of a scan that hotto suggested on our new TCNet update for faltering OBV. Parameters were: (OBV1[OBV7) and (C1]c7)

[1/25/2004 9:49:01 PM] [lavenderangel] meaning, negative divergence? so stocks may tumble?

[1/25/2004 9:49:11 PM] [payck] weaker yes lav

[1/25/2004 9:52:26 PM] [payck] yw, just for comparison, the stocks that were #91-100 on the weakening OBV list (meaning they are the least weak???) were BBBY, VRSN, GRMN, APOL, LVLT, AMGN, AMAT, ALTR, ADBE, AAPL

[1/25/2004 9:52:40 PM] [starbucks] =D

[1/25/2004 9:52:58 PM] [lavenderangel] it could just as easily gone the other way!!

[1/25/2004 9:57:11 PM] [starbucks] ya, I know. I was just having fun sticking my nose in. Actually, when you guys were negotiating I looked at tit and initially thoght it didn't look like it would go up, via FW, but it had some really self contradictory signals when I looked at it more so decided in my head to bet on my first feeling and watched it, so I thoght I'd kid a little when it held down

[1/25/2004 9:58:24 PM] [lavenderangel] ok, first time i've stuck my chart reading on the line. it was a good exercise.

[1/25/2004 9:59:40 PM] [starbucks] ya, it's fun. Almost like actually trading. hehe

[1/25/2004 10:01:31 PM] [hotto] pay... something confusing in the sorting of those... AMAT for instance.. C1 is below C7... Will take some study to figure out how to use the new stuff.

[1/25/2004 10:03:55 PM] [payck] this was the Naz 100 sorted be neg OBV scan, so the ones that test false, or in other words appearing at the bottom of the list probably have no meaning really. Only the first list of 17 I gave you had TRUE results

[1/25/2004 10:05:00 PM] [hotto] ah...thanks.

[1/25/2004 10:05:08 PM] [payck] yw

[1/25/2004 10:05:59 PM] [hotto] Hong Kong -38

[1/25/2004 10:06:43 PM] [payck] and SANM

[1/25/2004 10:07:23 PM] [hotto] MLNM.. Unless it pops early.. maybe retests 17 - 17.50..

[1/25/2004 10:08:23 PM] [payck] ma50 and ema 50, yes I see that

[1/25/2004 10:08:42 PM] [hotto] SANM down hard on that CFO leaving. nearing sma50.
