Chat Logs for hotto 2/1/2004

[2/1/2004 6:47:19 AM] [HOTTO] dwells129 has replied to: Birthday for Hotto Club
[2/1/2004 10:15:42 AM] [AlTruist] .
[2/1/2004 10:44:01 AM] [VJnet] hello hotties
[2/1/2004 11:47:02 AM] [Mikon] Hotto members, any comments on CSCO? It's hitting the first Fibonacci retracement line and has strong support above the next retracement line. See shared chart.
[2/1/2004 11:51:06 AM] [Mikon] Did my CSCO chart get through? Anyone?
[2/1/2004 11:51:33 AM] [leon] yes, but I can't see the fib drawings
[2/1/2004 11:51:50 AM] [Zathrus] I see a NANX chart Mkon
[2/1/2004 11:52:08 AM] [leon] actually I see a SPY
[2/1/2004 11:52:25 AM] [Zathrus] now I've got a CSCO
[2/1/2004 11:52:25 AM] [leon] go it
[2/1/2004 11:52:51 AM] [rqballer] got it mikon
[2/1/2004 11:53:29 AM] [leon] how do you draw those fibs?
[2/1/2004 11:53:36 AM] [Mikon] anyone else NOT see the Fib lines?
[2/1/2004 11:53:52 AM] [leon] they don't look right
[2/1/2004 11:54:24 AM] [Zathrus] I got the fib lines
[2/1/2004 11:54:27 AM] [leon] where are your start and end points?
[2/1/2004 11:55:07 AM] [leon] oh I got it, these are partial fibs
[2/1/2004 11:55:20 AM] [Mikon] Leon, click on the pencil icon just above the chart and select the far right icon. Then click and drag from the lowest price to the highest price and let go.
[2/1/2004 11:56:12 AM] [leon] Is hard to measure partials, I only go for total history
[2/1/2004 11:56:23 AM] [Mikon] Fibs are based on mid-April to mid-Jan prices
[2/1/2004 11:59:30 AM] [Mikon] Stchs are low (oversold) and historically do not stay low for long. CSCO may dip to ~24, but should rise with expected sales over the next few months.
[2/1/2004 12:01:25 PM] [Mikon] Thanks to all for chart feedback. When I try to "view chart", it gives me my 1st split window with two (old) charts.
[2/1/2004 12:06:16 PM] [leon] ok, I drew my fibs and got a line at 23.74 and the top at 38.7

ClubHome

[2/1/2004 12:08:47 PM] [Mikon] Leon, it should top around 29, not 39... just a typo?

[2/1/2004 12:09:20 PM] [leon] no, I draw all history fibs

[2/1/2004 12:09:56 PM] [leon] if you want a intermediadiate give me a sec and I'll draw it

[2/1/2004 12:10:29 PM] [Mikon] OK, but what was your original time frame?

[2/1/2004 12:11:45 PM] [leon] the original time frame is the history of the chart

[2/1/2004 12:12:23 PM] [leon] 29.39 is the line

[2/1/2004 12:12:43 PM] [leon] let me share the chart so you will see the fibs

[2/1/2004 12:13:53 PM] [Mikon] OK. I'm inteested in the intemediate term and considering the expected upgrades from enterprises in the next 6 months.

[2/1/2004 12:15:38 PM] [leon] if you see CSCo it is now bellow the 50% retrac, that is free fall to23.78

[2/1/2004 12:16:40 PM] [leon] it is very commun that a chart will test the fib support when is bellow 50%

[2/1/2004 12:17:41 PM] [Mikon] Could be, that's why I noted it could dip to ~24. But, check my next shared chart. It also indicates support in the same range

[2/1/2004 12:18:51 PM] [Mikon] ??? Did not see my chart notice come up???

[2/1/2004 12:20:02 PM] [leon] CSCO vs sub-ind?

[2/1/2004 12:20:06 PM] [Mikon] Tried again, still no response from TCNET. Did you see a chart share notice, Leon?

[2/1/2004 12:21:51 PM] [leon] Look I haven't done my geometries and volume studies for CSCO, my computer crashed yesterday and I am rebuilding, but I like to have multiple confirmationsof support, momentum and speed

[2/1/2004 12:21:59 PM] [loftyB] If you click on "Share" and then "View another user" you can get Mikon's and Leon's charts

[2/1/2004 12:22:01 PM] [leon] no

[2/1/2004 12:22:05 PM] [themasdtrader] I can see and access both of your charts FWIW.

[2/1/2004 12:22:24 PM] [leon] got something

[2/1/2004 12:23:08 PM] [loftyB] I drew Fibs from Oct 02 low and get support at 25.25

[2/1/2004 12:23:27 PM] [loftyB] Sorry 24.25

[2/1/2004 12:24:34 PM] [Mikon] Thanks, loftyB. However, when I click on "View another user" and select Me (Mikon) I get a XLNX chart???? Not what I sent to TCNET.

[2/1/2004 12:25:12 PM] [loftyB] Well I get your chart

[2/1/2004 12:25:32 PM] [leon] No sorry I don't get a fib at that level

[2/1/2004 12:25:55 PM] [loftyB] Presume you can't share a chart with yourself

[2/1/2004 12:26:26 PM] [leon] I got 25.17, but very weak

ClubHome

[2/1/2004 12:26:42 PM] [leon] I don't think will hold there
[2/1/2004 12:27:00 PM] [Mikon] Good. I guess TCNET only provides me with a shared chart if it is different than my primary chart that is already displayed.
[2/1/2004 12:27:29 PM] [leon] In think we see 24 before we see 30
[2/1/2004 12:28:02 PM] [Mikon] You may be right, Leon. I'll keep a watch on it for a couple of days. Have to support the DesignCon 2004 Conference starting tomorrow anyway.
[2/1/2004 12:28:56 PM] [Mikon] ~24 is my pick also for the dip.
[2/1/2004 12:29:05 PM] [loftyB] Showed my CSCO chart with fibs from Oct 02
[2/1/2004 12:29:32 PM] [Cobratrader] imjim, thanks i thought it might be my puter, i'll open 1 at support also.
[2/1/2004 12:30:07 PM] [loftyB] Fibs match Dec price level as support
[2/1/2004 12:30:11 PM] [leon] oct 02 is not support
[2/1/2004 12:31:10 PM] [leon] march 10/03
[2/1/2004 12:31:22 PM] [loftyB] No Oct 02 is not support it is the base from where I drew the fibs. Dec 03 corresponds to fibs support
[2/1/2004 12:32:14 PM] [leon] well, that is not the lowest point in this wave
[2/1/2004 12:32:16 PM] [Mikon] Good display, loftyB. I also use several MAs (with a binary relationship starting at 5, 10, 20, 40,...)
[2/1/2004 12:33:06 PM] [leon] that is the lowest point in the previos mayor wave
[2/1/2004 12:34:07 PM] [leon] we had a sub A B C and the curent wave started march 03
[2/1/2004 12:34:41 PM] [Rex] Dear Associates: I know and appreciate that you are all trying to be helpfu in sharing and discussing your charts. But BLUE is a must difficult color to distinguish on a black background. Could you all please select a different color or create a light, bright blue
[2/1/2004 12:35:11 PM] [leon] .I didn't even looked at it until you mention the date, it just confirms my fibs
[2/1/2004 12:36:13 PM] [leon] no more blue
[2/1/2004 12:37:37 PM] [Mikon] Still sounds like 24 would be a good entry point. Agree?
[2/1/2004 12:38:19 PM] [loftyB] We've got 50 sma & LBB all coming together so should be some resitance in that area.
[2/1/2004 12:38:51 PM] [leon] I just realize, we also have a window gap January 15, taht is another possible congestion area to bounce
[2/1/2004 12:39:30 PM] [leon] yes, I like at 24 at this speed, but if gets slower it will be lower
[2/1/2004 12:39:40 PM] [Stixman] .

ClubHome

[2/1/2004 12:40:10 PM] [adcum] is hotto having a meeting today?
[2/1/2004 12:40:33 PM] [leon] this retracement took 9 bars to resolve 7
[2/1/2004 12:40:41 PM] [Stixman] As far as I know .. noon est
[2/1/2004 12:41:00 PM] [adcum] ok ty
[2/1/2004 12:41:35 PM] [adcum] have to count live in europe
[2/1/2004 12:41:38 PM] [loftyB] isn't it now 12:41 est?
[2/1/2004 12:41:48 PM] [leon] ilike when the retracement is faster than the thrust
[2/1/2004 12:42:08 PM] [Stixman] Can't get anything by you lofty !
[2/1/2004 12:42:46 PM] [loftyB] Also in Europe and only have 5 fingers;))
[2/1/2004 12:43:14 PM] [loftyB] opps fingers
[2/1/2004 12:44:17 PM] [Stixman] There is a hotto shared chart in the "share" but it doesn't look like one of his.
[2/1/2004 12:44:37 PM] [Mikon] CSCO, Leon & loftyB, I expect a dip to ~24, perhaps on a nice hammer. If a hammer, I'll jump in.
[2/1/2004 12:45:26 PM] [Rex] Thanks Leon; also I wish we could get Wordens to print the percentage retracements on the respective Fib lines.
[2/1/2004 12:45:41 PM] [loftyB] CSCO I'll watch for a bounce first. Feb pb who knows if resistance will hold?
[2/1/2004 12:47:04 PM] [Mikon] True, but a close stop might be the answer.
[2/1/2004 12:48:02 PM] [loftyB] Prefer to watch and see what volume is doing,- and obv
[2/1/2004 12:51:25 PM] [Mikon] Always...
[2/1/2004 12:52:08 PM] [mstrader] PPD I any comments?
[2/1/2004 12:56:39 PM] [loftyB] PPD I neg OBV divergance between highs .12 04 and 0121
[2/1/2004 1:02:08 PM] [leon] got back
[2/1/2004 1:03:15 PM] [leon] I do think will hold, but I want to see at least 2 bounces before I go into CSCO
[2/1/2004 1:04:23 PM] [leon] the first piercing the 24 the second one I jump in
[2/1/2004 1:04:25 PM] [Stixman] PPD I has support at 20MA (low risk stop) ; above lower bb, obv up, light volume but adequate, Looks like possible move to LR30 which until recently it liked to ride up. JMHO
[2/1/2004 1:05:55 PM] [Stixman] Where in the world is Waldo ...er Hotto?
[2/1/2004 1:06:20 PM] [mstrader] ty 4 feedback on PPD I.
[2/1/2004 1:07:02 PM] [parkwaypet] ISPH maybe ready to change direction bottom fishing?
[2/1/2004 1:07:43 PM] [mstrader] Just noticed PPD I was downgraded on 1/23 by thomas weisel

ClubHome

[2/1/2004 1:08:21 PM] [mstrader] But PPD I is G+
[2/1/2004 1:09:25 PM] [loftyB] PPD I Lots of support under price but don't like the bid
neg OBV div. to Dec top
[2/1/2004 1:10:45 PM] [mstrader] ty Lofty. i will watch it.
[2/1/2004 1:12:57 PM] [BossFan] anyone having problems with hard drive charts with
the update CD? Can't seem to get the past data to be read off the CD
[2/1/2004 1:13:10 PM] [Stixman] ISPH looking good. Broke thru LR30, 10a and lower
bb all in the same day, closed above the first two. Good volume confirmed by OBV. It
has had trouble in the past getting thru the 20 ma so upside may be limited. jmho
[2/1/2004 1:13:38 PM] [MaxSteel] Boss ... mine updated fine !!!
[2/1/2004 1:14:40 PM] [BossFan] My HD charts list is populates with all stocks, but
when viewing it only show 30 days or so of data
[2/1/2004 1:16:26 PM] [Bobtrader] mstrader...PPDI is not on G+ list as of today
[2/1/2004 1:16:46 PM] [Bobtrader] just checked
[2/1/2004 1:17:04 PM] [loftyB] BossFan, Have you copied all tharts from CD? I use
"Watchlist" "Copy to other list" "All Symbols".
[2/1/2004 1:17:26 PM] [BossFan] yup, tried that...I need to check the support website
[2/1/2004 1:24:37 PM] [hackswartz] ,
[2/1/2004 1:24:43 PM] [jbrad] BossFan - Check out --]
<http://support.tcnet.info/viewArticle.asp?id=56>
[2/1/2004 1:24:54 PM] [mstrader] Bobtrader, where did u check PPD I for G+?
[2/1/2004 1:25:14 PM] [BossFan] ty jbrad, looking at it now
[2/1/2004 1:26:16 PM] [loftyB] G+ G- on Hottoworks website
[2/1/2004 1:27:06 PM] [loftyB] PPD I is G+
[2/1/2004 1:27:14 PM] [Bobtrader] mstrader...ooopppssss!!!! checked again and found
it in G+ list...
[2/1/2004 1:28:08 PM] [Bobtrader] tough morning....too early or too late.. i don't know
[2/1/2004 1:30:15 PM] [mstrader] No problem Bobtrader.
[2/1/2004 1:52:53 PM] [RAS34] I lost Hotto's F-3 template..could some share it
?...thanks...)
[2/1/2004 1:54:25 PM] [RkyMtnFool] There ya go. F3 Hotto showing RDWR
[2/1/2004 1:55:53 PM] [RAS34] ty RMF..got it saved.:)
[2/1/2004 1:56:31 PM] [RkyMtnFool] YW
[2/1/2004 1:58:55 PM] [Stixman] Anyone heard from hotto?
[2/1/2004 2:00:07 PM] [Stixman] I'll take that to be a "No".
[2/1/2004 2:00:20 PM] [SmartTrader] No - but maybe he's taking the day off being big
SuperBowl game day!
[2/1/2004 2:00:32 PM] [mace] anyone in XRIT, I am long from 7.30-9 and looks like

ClubHome

triple top??

[2/1/2004 2:01:32 PM] [Stixman] Hope that's it. Not like him tho ..he usually pops on to say there will be no discussion today. Hope all is well.

[2/1/2004 2:02:27 PM] [SmartTrader] True. Odd though that alot of other regular members also haven't logged on asking about him too.

[2/1/2004 2:02:50 PM] [SmartTrader] Maybe he did announce no mting. today & we just don't know it.

[2/1/2004 2:08:12 PM] [Cobratrader] Checked the logs on both sites and didn't see anything from Hotto. Probably checking out the new program. And hopefully relaxing a little, much deserved. imo

[2/1/2004 2:08:49 PM] [adcum] in last chat he is not saying gn or what it will be tomorrow

[2/1/2004 2:09:02 PM] [themasrader] Hotto has also had his share of computer problems over the last few days.

[2/1/2004 2:11:57 PM] [loftyB] On Sat Chat Hottoworks, I seem to remember he said he would have some stocks today. Presume in Hottoworks. Will recheck logs

[2/1/2004 2:14:35 PM] [loftyB] 1st mistake, - was Hottoclub

[2/1/2004 2:17:43 PM] [loftyB] [1/31/2004 4:52:50 PM] [hotto] some stocks tomorrow 12Noon ET.

[2/1/2004 2:24:51 PM] [hotto] Hello. Some distractions here. I'll try again later. Enjoy Superbowl.

[2/1/2004 2:26:45 PM] [SCB51] OK

[2/1/2004 4:55:35 PM] [HOTTO] RV6A has joined the club. Please welcome your new member.

[2/1/2004 4:56:12 PM] [Rex] When ' searching for a phrase' in HottoWorks Logs I always get 'an Error 500'. I am trying to locate the instructions for transferring a

[2/1/2004 4:57:57 PM] [Rex] themes list into TCNet. Can anyone help? thanks.

[2/1/2004 5:02:20 PM] [Scanner] There's a discussion in Hotto Club on how to import lists

[2/1/2004 5:27:26 PM] [AlTruist] .

[2/1/2004 5:49:57 PM] [MarkWayne] ...

[2/1/2004 7:36:50 PM] [gary12] .

[2/1/2004 8:50:41 PM] [HOTTO] Sscr has joined the club. Please welcome your new member.

[2/1/2004 10:35:38 PM] [Obw] Hey Luigi how you doing?

[2/1/2004 10:36:02 PM] [Luigistock] good OBW and you?

[2/1/2004 10:36:33 PM] [Obw] Just fine trying to learn all the new stuff.

[2/1/2004 10:38:49 PM] [Luigistock] yeha doin a lil playign tonight too

ClubHome

[2/1/2004 10:39:10 PM] [Luigistock] should probably be taking typing lessons instead though :)

[2/1/2004 10:40:28 PM] [Obw] Nah, you doin just fine.

[2/1/2004 10:41:25 PM] [america] =D

[2/1/2004 10:42:01 PM] [Obw] america...you solved all the prblems?

[2/1/2004 10:42:13 PM] [Obw] problems.

[2/1/2004 10:43:22 PM] [america] my problems were the same as everyone else's. couldn't make an easyscan, so kuf came up with a temporary fix until they patch it.

[2/1/2004 10:43:58 PM] [Obw] Oh...what's the fix?

[2/1/2004 10:46:18 PM] [america] drum roll. when you want to make a new easy scan, do not change the watchlist first. add one or two conditions and then you may change the watchlist. then your machine will not freeze up. but there is still a problem. we cannot make more than one easyscan in a row. if you try to, your machine will freeze while making the second one no matter what you do.

[2/1/2004 10:47:34 PM] [america] so i or someone else needs to tell kuf first thing tomorrow morning that this second condition exists. they'll need to address this issue as well in their patch or fix.

[2/1/2004 10:47:41 PM] [america] obw, r u there?

[2/1/2004 10:48:17 PM] [Obw] Have to try and see...I have an upgrade that came after the cd's were send...will you know of have that problem to

[2/1/2004 10:48:46 PM] [Obw] The upgrade is by way of beta tester.

[2/1/2004 10:51:52 PM] [Obw] Just tryed a new easy scan, it worked just fine here.

[2/1/2004 10:54:39 PM] [Stixman] OBW are you saying you have received a fix already when some members don't even have the upgrade yet?

[2/1/2004 10:55:00 PM] [Obw] america...you might try to join the bate tester club and see if you can download the patches.

[2/1/2004 10:55:11 PM] [Obw] beta

[2/1/2004 10:56:05 PM] [Obw] Yes but this only thru beta tester...to evaluate and fix possible bugs before it is sent to all users.

[2/1/2004 10:56:07 PM] [america] obw, did you make two easy scans one right after the other?

[2/1/2004 10:56:35 PM] [Obw] No just one, will try another one now.

[2/1/2004 10:59:50 PM] [Obw] america...The second one worked OK also.

[2/1/2004 11:37:35 PM] [Stixman] passed
