[4/6/2004 12:01:16 AM] <bbmd> sorry ,the chart was shifted.
[4/6/2004 12:01:36 AM] <Investortrader> Also, on 3/1 the OBV was testing it's lower BB, while on 3/24 it was only testing it's middle BB
[4/6/2004 12:01:39 AM] <Investortrader> Ahh, ok :)
[4/6/2004 12:02:08 AM] <Investortrader> Any questions on IDEV?
[4/6/2004 12:02:18 AM] <drnpsharma> IT.. where can I learn more about OBV application.
[4/6/2004 12:02:32 AM] <TSSteve> why are you looking at lows and not hi's?
[4/6/2004 12:02:56 AM] <TSSteve> for the divergences I mean
[4/6/2004 12:03:03 AM] <Investortrader> There were a few Saturday chats in Hotto logs in Nov of '02 I think covering OBV
[4/6/2004 12:03:13 AM] <Investortrader> And I cover OBV a lot in these classes :)
[4/6/2004 12:03:16 AM] <drnpsharma> thnx.
[4/6/2004 12:03:45 AM] <Investortrader> TSSteve, I look at the lows first to compare the selling vol
[4/6/2004 12:04:04 AM] <DarrellHardy> don't miss LEXR
[4/6/2004 12:04:06 AM] <Investortrader> To see if the selling has remained consistent thru that period or has dried up some
[4/6/2004 12:04:07 AM] <drnpsharma> IT.. do u have OBV in the top window? with price
[4/6/2004 12:04:24 AM] <Investortrader> OBV is in the middle window, BB's are on price and OBV
[4/6/2004 12:04:24 AM] <TSSteve> so you have vol plotted on the same chart then?
[4/6/2004 12:04:48 AM] <Investortrader> OBV is one way to look at vol, but yes, I also have vol in the bottom window (my chart is shared)
[4/6/2004 12:05:19 AM] <Investortrader> But I also look at highs for OBV divergence ... just did in a prior stock
[4/6/2004 12:05:56 AM] <Investortrader> On to EMBT ...
[4/6/2004 12:05:56 AM] <TSSteve> got the shared chart now, ty!
[4/6/2004 12:06:05 AM] <Investortrader> Welcome TSSteve :)
[4/6/2004 12:06:28 AM] <Investortrader> This one looks real good here
[4/6/2004 12:06:35 AM] <drnpsharma> where is the shared chart?
[4/6/2004 12:07:19 AM] <Investortrader> If you go up to "share" up top and click on it, then click on the "view another user" tab you'll see my name in there
[4/6/2004 12:07:58 AM] <drnpsharma> thnx IT
[4/6/2004 12:08:21 AM] <Investortrader> Notice in EMBT the 2/4 and the 3/2 lows in OBV ... nice positive divergence on the double bottom in price
[4/6/2004 12:08:26 AM] <Investortrader> Welcome drnpsharma :)
[4/6/2004 12:08:36 AM] <Tilt> thnx IT, just lernt something that's been bugging me too
[4/6/2004 12:08:57 AM] <Investortrader> Welcome Tilt :) What was it?
[4/6/2004 12:09:22 AM] <Tilt> how to get to your chart w/o scrolling for it
[4/6/2004 12:09:24 AM] <Investortrader> Then in Mid-March it ran right up to the 50sma, even with OBV flying the 50sma stopped it
[4/6/2004 12:09:30 AM] <Investortrader> Ahhh!
[4/6/2004 12:10:26 AM] <Investortrader> And the bottom of the new base after the 50sma test was around the top of the late Feb early March base .. what was

ClubHome

resistance became support

[4/6/2004 12:11:20 AM] <Investortrader> And see how the last 10 days or so in March the vol was starting to dry up in the base

[4/6/2004 12:11:40 AM] <Investortrader> Low vol bases and pb's are what I like to see

[4/6/2004 12:12:01 AM] <Investortrader> Now it broke thru the 50sma on good vol, and got up over the upper BB too

[4/6/2004 12:12:12 AM] <Investortrader> With OBV confirming the new highs

[4/6/2004 12:12:53 AM] <Investortrader> you can see how OBV was pointing for a BO thru this whole base

[4/6/2004 12:13:10 AM] <Investortrader> Now lets go back to IDEV for just a minute

[4/6/2004 12:13:20 AM] <TSSteve> so how do you enter it?

[4/6/2004 12:13:28 AM] <Investortrader> See how OBV is rising (though not as fast) on this one too

[4/6/2004 12:13:47 AM] <Investortrader> Which is why I said I expected it to get thru the 50sma

[4/6/2004 12:14:27 AM] <Investortrader> EMBT could have been bot today on the BO, lets look at the 5's for a minute

[4/6/2004 12:15:16 AM] <Investortrader> Hmmm, something looks funny

[4/6/2004 12:16:03 AM] <Investortrader> Something wrong with that chart

[4/6/2004 12:16:10 AM] <parkwaypet> Big drop on opening

[4/6/2004 12:16:35 AM] <Investortrader> It shows yesterday as being too high

[4/6/2004 12:16:39 AM] <Investortrader> On the 5's

[4/6/2004 12:17:22 AM] <Investortrader> The daily doesn't show anywhere near 13.75 for yesterday

[4/6/2004 12:17:43 AM] <bmweyrauch> 10' data looks better

[4/6/2004 12:17:43 AM] <Tilt> I just pulled it up & it is ok

[4/6/2004 12:18:07 AM] <Tilt> on the 5's

[4/6/2004 12:18:12 AM] <Investortrader> Wonder why mine is funky

[4/6/2004 12:18:28 AM] <bmweyrauch> IT my 5' not correct either

[4/6/2004 12:18:51 AM] <Investortrader> Strange

[4/6/2004 12:19:02 AM] <Nipsy331> Mine also incorrect, though 10, 15 etc look ok

[4/6/2004 12:19:08 AM] <Tilt> OOOOPS I was on the wrong chart, sorry

[4/6/2004 12:19:13 AM] <houcpl> big difference in 5 and 10

[4/6/2004 12:19:19 AM] <SkyDragon> My chart shows the same chart on the 5' twice.

[4/6/2004 12:19:33 AM] <TSSteve> mine is hosed too

[4/6/2004 12:19:47 AM] <Investortrader> The 13.10 area held the big intra-day dip (if one happened, not sure I can trust this chart now!)

[4/6/2004 12:20:13 AM] <TSSteve> all of the sub daily times are messed up

[4/6/2004 12:21:10 AM] <Investortrader> Might be fixed by tomorrow if update about 30 minutes into the open

[4/6/2004 12:21:42 AM] <SkyDragon> Zoom out and you'll see the same chart for 4/5 twice.

[4/6/2004 12:22:27 AM] <Investortrader> That's weird, but true

[4/6/2004 12:22:33 AM] <Investortrader> Ok, on to LEXR ...

[4/6/2004 12:23:11 AM] <Investortrader> I covered LEXR last week in class too, saying how it's beginning to ride the upper BB and to hold on

[4/6/2004 12:23:44 AM] <Investortrader> It was a pretty slow ride the first couple of days after that ... but it's still riding

[4/6/2004 12:24:10 AM] <Investortrader> I put in order in on it the next day but never did get a fill

[4/6/2004 12:24:22 AM] <Investortrader> Still looks good here

[4/6/2004 12:24:47 AM] <Investortrader> Volume increase today with nice price range, and OBV still confirming

ClubHome

[4/6/2004 12:25:34 AM] <Investortrader> So I hope whoever asked me last week held on!

[4/6/2004 12:25:54 AM] <bbmd> It is close to early january high at this time.

[4/6/2004 12:26:05 AM] <Investortrader> This chart is why I don't like to scalp them when they start to ride the upper BB

[4/6/2004 12:26:25 AM] <Nipsy331> I tried to get in last week also, just after class, but my price never got filled.:(

[4/6/2004 12:26:44 AM] <Investortrader> Good eye bbmd, it could have a pause there

[4/6/2004 12:26:53 AM] <Investortrader> Same here Nipsy :(

[4/6/2004 12:27:46 AM] <Nipsy331> I just got here, thanks for the class, IT. Did you cover qdel earlier?

[4/6/2004 12:28:07 AM] <Investortrader> Will do that one next Nipsy

[4/6/2004 12:28:14 AM] <Nipsy331> Thanks

[4/6/2004 12:28:16 AM] <Investortrader> Any questions on LEXR?

[4/6/2004 12:28:29 AM] <Investortrader> If I had bene filled on LEXR, I would still hold it here

[4/6/2004 12:28:35 AM] <Tilt> is that a w botton

[4/6/2004 12:28:54 AM] <IncaKid> jlexr

[4/6/2004 12:29:00 AM] <Investortrader> Looks like it made a short term one there Tilt

[4/6/2004 12:29:03 AM] <IncaKid> sorry

[4/6/2004 12:29:51 AM] <Investortrader> That would measure to right up around those Jan highs for a first target also, that W bottom

[4/6/2004 12:30:00 AM] <Investortrader> No worries IncaKid :)

[4/6/2004 12:30:14 AM] <bbmd> IT is that a bear trap late Feb.

[4/6/2004 12:31:11 AM] <Nipsy331> That 13 dollar area was a support/resistance point last year-- august and Dec

[4/6/2004 12:31:34 AM] <Investortrader> Kind of, but usually those have more volume to be called that

[4/6/2004 12:33:19 AM] <Investortrader> On to QDEL ...

[4/6/2004 12:33:51 AM] <Investortrader> This looks interesting here

[4/6/2004 12:34:28 AM] <Investortrader> A nice big bullish engulfing candle today after a long downtrend

[4/6/2004 12:35:04 AM] <Investortrader> Let's look at the Jan/Feb top for a minute first

[4/6/2004 12:35:19 AM] <Investortrader> As I know many have trouble with tops and getting out

[4/6/2004 12:36:12 AM] <Investortrader> Thru Dec and Jan as it was running up, see how it reacted on every pb

[4/6/2004 12:36:41 AM] <Investortrader> How the middle BB held the price, and the OBV wasn't very affected by pb's

[4/6/2004 12:37:59 AM] <Investortrader> Then in Feb the daily price range was under the middle BB for 3 days in a row ... 2/5, 2/6, and 2/9 ... some weakness was showing up

[4/6/2004 12:38:52 AM] <Investortrader> And for the first time in the run-up the OBV was affected by the pb from 1/26 to 2/9

[4/6/2004 12:39:21 AM] <Investortrader> Followed by a weak rally attempt at the upper BB

[4/6/2004 12:40:09 AM] <Investortrader> Then you have three bad days in a row, three black crows I think they are called in candlesticktheory, on 2/12, 2/13, and 2/17

[4/6/2004 12:40:30 AM] <Investortrader> And look at the OBV crashing then to make new lows

[4/6/2004 12:40:53 AM] <Investortrader> All the way down to the lower BB

[4/6/2004 12:41:07 AM] <Investortrader> the next three days saw a very weak rally

ClubHome

with the OBV not even being able to get over it's middle BB

[4/6/2004 12:41:20 AM] <Investortrader> All those were signals to get out

[4/6/2004 12:42:06 AM] <drnpsharma> IT.. this is great teaching Thnx.

[4/6/2004 12:42:07 AM] <Investortrader> The final straw, for anyone who didn't catch those signals, was the heavy vol gap down day on 2/27 when it crashed down thru the 50sma

[4/6/2004 12:42:15 AM] <Investortrader> Welcome drnpsharma :)

[4/6/2004 12:42:26 AM] <Investortrader> And closed near the lows for the day

[4/6/2004 12:42:59 AM] <Investortrader> Anyone still holding ... and no one taking these classes should have bene holding then ;) ... should have sold that day

[4/6/2004 12:43:27 AM] <Investortrader> the next day it gapped down more, showing severe weakness .. and has continued down sinice

[4/6/2004 12:43:56 AM] <SkyDragon> Todays LOD was 6.02 and the 500sma was 6.06

[4/6/2004 12:44:09 AM] <Investortrader> Now ... between yesterday and today ... we might have a washout reversal in place

[4/6/2004 12:44:38 AM] <Investortrader> Good point SkyDragon

[4/6/2004 12:45:04 AM] <Nipsy331> Washout? not sure what that means..Could you explain?

[4/6/2004 12:45:28 AM] <Investortrader> Washout bottom is the opposite of a blow-off top

[4/6/2004 12:46:08 AM] <Investortrader> A final climax in volume with a reversal in price after a long trend

[4/6/2004 12:46:27 AM] <Nipsy331> yes! ty

[4/6/2004 12:46:34 AM] <Investortrader> Welcome Nipsy :)

[4/6/2004 12:46:46 AM] <IncaKid> it washed previous 4 days

[4/6/2004 12:47:30 AM] <Investortrader> Washouts are usually one day events marking the bottom, but sometimes they can be two day things like maybe this is
[4/6/2004 12:48:11 AM] <Investortrader> A one day washout looks like a hammer with a long tail, with very big volume, right at the bottom

[4/6/2004 12:48:21 AM] <drnpsharma> what do u do in a washout situation?

[4/6/2004 12:48:33 AM] <Golfermary> Thanks IT - appreciate your effort! Good nite

[4/6/2004 12:48:38 AM] <Investortrader> you buy as that marks the bottom

[4/6/2004 12:48:49 AM] <Investortrader> Welcome mary :) pleasant dreams

[4/6/2004 12:48:56 AM] <Golfermary> TY

[4/6/2004 12:49:55 AM] <Nipsy331> I missed this move today. How would you think about entering, if you were inclined to do so?

[4/6/2004 12:50:10 AM] <SkyDragon> QDEL based in the 6.00 range from May to September last year ... good support area.

[4/6/2004 12:50:19 AM] <Investortrader> Let's see if the 5's are messed up here or not lol

[4/6/2004 12:51:04 AM] <Investortrader> Whenever a stock has a BO move of any kind, and this one had one .. I look at the 5's

[4/6/2004 12:51:22 AM] <Investortrader> First to see if there is any good support area to buy in case it does pb

[4/6/2004 12:52:05 AM] <Investortrader> It usually won't pb too much off a washout ... so if this was one I wouldn't look too far down for that support

[4/6/2004 12:52:34 AM] <Investortrader> So maybe in the 6.60's

[4/6/2004 12:52:56 AM] <Sharon1555> looks like 6.80 AH

[4/6/2004 12:53:04 AM] <Investortrader> Where it based in the late 1 early 2 o'clock hours

[4/6/2004 12:53:13 AM] <Investortrader> Thanks Sharon :)

[4/6/2004 12:53:18 AM] <Tilt> IT my screen is blank, is that right? 5's

[4/6/2004 12:53:38 AM] <Investortrader> Mine isn't blank

[4/6/2004 12:54:03 AM] <Investortrader> But I'm headed back to the daily chart on it

ClubHome

[4/6/2004 12:54:06 AM] <Tilt> I reloaded, ok now
[4/6/2004 12:54:20 AM] <Investortrader> Ok :)
[4/6/2004 12:54:27 AM] <Investortrader> The other thing to look at is yesterdays open area
[4/6/2004 12:54:44 AM] <Nipsy331> if it drops much below the 6.60's, looks like next support is 6.46 or so. too much of a drop, no?
[4/6/2004 12:54:51 AM] <Investortrader> Which is 6.61
[4/6/2004 12:54:58 AM] <Nipsy331> nixe
[4/6/2004 12:55:01 AM] <Nipsy331> nice
[4/6/2004 12:55:30 AM] <Investortrader> I wouldn't expect it to drop too much if at all here if this really is a washout reversal
[4/6/2004 12:55:59 AM] <Investortrader> And it may just open unch or up some and move up
[4/6/2004 12:56:33 AM] <bmweyrauch> QDEL - would you consider a BO over recent swing high at 7.17 another buy point, perhaps too conservative...but another chance to confirm the reversal is real
[4/6/2004 12:57:00 AM] <Investortrader> I was about to mention that bmw! :)
[4/6/2004 12:57:09 AM] <bmweyrauch> ;)
[4/6/2004 12:57:17 AM] <Investortrader> If it doesn't have a pb, to buy that BO
[4/6/2004 12:58:10 AM] <Investortrader> A true washout can really bounce as there are no sellers left
[4/6/2004 12:59:20 AM] <Investortrader> If I wanted this onoe I would watch it PM and maybe try to steal some cheap around that 6.60 - 6.65 area
[4/6/2004 12:59:38 AM] <Investortrader> Since it did sell off a bit in AH today
[4/6/2004 1:00:12 AM] <Investortrader> Any questions on QDEL?
[4/6/2004 1:00:21 AM] <Nipsy331> the 7.17 swing high puts us within .07 of the 20sma also
[4/6/2004 1:01:13 AM] <Investortrader> Which is falling at a rate of 7 cents a day here .. interesting!
[4/6/2004 1:01:51 AM] <Investortrader> Could be equal tomorrow
[4/6/2004 1:02:02 AM] <Investortrader> To make that BO more important
[4/6/2004 1:02:07 AM] <Nipsy331> Confirmation!
[4/6/2004 1:02:26 AM] <obowen> Tks,IT, just discovered your class.It's late will catch more manana.
[4/6/2004 1:02:38 AM] <Investortrader> you people are really bringing some good charts to class now :)

[4/6/2004 1:23:22 PM] <AtlantaRob> A little trick I like to use when buying "cheap" is after multiple down bars, like the dip to 7.35 on the 1-min chart, is wait for price to break above the previous bar and buy then, set stop below either previous or current bar, whichever is lower, that would have gotten you in almost at the bottom
[4/6/2004 1:23:47 PM] <DarrellHardy> ELN bounced off it's 10 sma
[4/6/2004 1:23:52 PM] <AtlantaRob> That's not an original idea though, got it from a Pristine video :P

[4/6/2004 1:49:22 PM] <KauaiDave> hotto, how do you know those are Buy-Stops? on My level II I can see only the ones at 7.62? you have level III?
[4/6/2004 1:49:38 PM] <hotto> DataM... gotta be less perfectionist.. Take off some profits.. "as we go"... using both targets.. and timing approaches
[4/6/2004 1:49:57 PM] <RONNN777> Hotto,thoughts on BSN and are u still in NIAG?
[4/6/2004 1:50:02 PM] <Jwerner> NGEN coming back some. Anybody going to be adding on this pullback?
[4/6/2004 1:50:24 PM] <KauaiDave> DataMiner, I take the day off and start paper trading when that happens, come back when you feel good again
[4/6/2004 1:50:27 PM] <hotto> NIAG.. out.. right now.. have Buy order in lower..
[4/6/2004 1:50:37 PM] <RONNN777> WBSN?
[4/6/2004 1:51:28 PM] <kennethroyal> SMH long 40.66 (add to) TC gives specific prices on emas - wouldn't it be nice if gave same re BBs
[4/6/2004 1:51:28 PM] <Elm> Schwab owns Cybertrader. There are some differences, with CT you get cheaper trades but pay \$50 mo for Lvl II Quotes. At least thats what they told me.

[4/6/2004 1:51:29 PM] <hotto> NGEN.. Unless a big run... Breaking over 10.. expect V2 to give a nice dip..

[4/6/2004 1:51:36 PM] <KauaiDave> ARob, I believe CT is less for DayTraders, spoke to Schwab Active Traders group about it, SSPro is the bottom line rom CYBER, I'm going to CYBERTRADER PRO this week

[4/6/2004 1:52:24 PM] <DataMiner> Thanks, guys, for letting me vent. I know I'm not taking profits properly. Either lose them completely or leave mucho on the table. Need to develop a better system.

[4/6/2004 1:52:27 PM] <Jwerner> Thanks Hotto

[4/6/2004 1:52:38 PM] <daniel329> which one would you recommend?

InteractiveBrokers? Tradestation? or Cybertrader?

[4/6/2004 1:52:52 PM] <AtlantaRob> I see, I think they give you lvlll quotes free if you make a certain # of trades per month

[4/6/2004 1:52:52 PM] <payck> sure data, I still do it, but getting better

[4/6/2004 1:53:22 PM] <AtlantaRob> KD is your trading account only 25K?

[4/6/2004 1:53:26 PM] <ProfitTrader> DataM, isn't that problem for most of us. I know it is my problem too....

[4/6/2004 1:53:38 PM] <Jwerner> Data, I'd venture to say I'm one of the worst . . . very frustrating, but learning. Hotto's a durned good teacher.

[4/6/2004 1:53:38 PM] <hotto> DRAX.. nice buy dip again today.. still look for LR30..

[4/6/2004 1:53:42 PM] <daniel329> Data.. am in the same situation.. still need to develop a plan/rules I can stick to.... trying too many things..

[4/6/2004 1:53:47 PM] <Elm> Schwab SSPro free Lvl II quotes for 120 trades a year or more.

[4/6/2004 1:54:31 PM] <hotto> FVCX... Long again.. 4.28

[4/6/2004 1:54:47 PM] <KauaiDave> ARob, no, that is what they wanted to turn the Day Trading Buying Power back on (4X account), it's closed to \$100k, but not !)) :-)

[4/6/2004 1:55:14 PM] <hotto> FVCX.. nice article in CBS Marketwatch..

[4/6/2004 1:55:20 PM] <Elm> Schwab have sliding scale trade prices, 1st leve @ 29.95 next level @14.95.

[4/6/2004 1:56:52 PM] <Elm> Leaving money on the table is better than giving it away!

[4/6/2004 1:56:55 PM] <hotto> watch for 10 ... note... NANX over 11 now.. Go NGEN.

[4/6/2004 1:56:59 PM] <FortuneFinder> AtlantaRob... At CyberTrader you also have access to other tools such as the depth of bid and ask... which I find very useful. I like their trading, but I've had several administrative screw ups on their part that always seemed to happen at the worst time. Check out their tools demos on their web site before you decide: www.cybertrader.com

[4/6/2004 1:57:03 PM] <VJnet> GDT guides higher

[4/6/2004 1:57:23 PM] <kennethroyal> seems to me that, certainly at my stage, don't need Lvl 2 - need indicators + HOTTO (and many other bright contributors in HW)

[4/6/2004 1:57:47 PM] <payck> thx VJ, you can see that one on the chart
