[12/11/2003 4:28:30 PM] [Kuf] Typical media misquoting

[12/11/2003 4:28:30 PM] [TCNut] Kuf My Dad is signing up for {tcnetlogo} Can I just copy over all my templates and pcf's? Or, will my specific user data complicate that process?

[12/11/2003 4:33:51 PM] [CoveredCall] :D

[12/11/2003 4:34:07 PM] [ProfitTrader] Kuf, smilies I can understand but other graphics?

[12/11/2003 4:34:54 PM] [Kuf] Profittrader, the TCNet logo was simply on the login connection. Some smart users figured out how to display it themselves. We'll be changing the syntax for sure so people don't abuse it

[12/11/2003 4:35:56 PM] [TCNut] Logo's that pop up for your favorite buddies in the chat....so it catches your eye better when someone of importance to you speaks...

[12/11/2003 8:07:12 PM] [hotto] was not ready for such strong Breadth today... here in December..

[12/11/2003 8:08:39 PM] [hotto] NHB.. bounced off sma50 yesterday.. rallied today... bcak over ma20.. a good day.. after a good Earnings report last night.. by a homebuilders..

[12/11/2003 10:56:13 PM] [Investortrader] With all 3 of those together I sold out at 13.89 for +0.13, anyone who held did a lot better!

[12/11/2003 10:58:23 PM] [Investortrader] Yesterday it was also held back by the 50sma on the 5's, so I just got out

[12/11/2003 10:59:01 PM] [Investortrader] Sometimes this happens, so I just moved on .. it does look good for tomorrow if you held

[12/11/2003 10:59:24 PM] [Investortrader] (I haven't looked at any after hours prices)

[12/11/2003 11:02:44 PM] [Investortrader] I got out today at 13.56 for +.45 .. I noticed lots of sellers lined up from 13.57 to 13.60

[12/11/2003 11:03:14 PM] [Investortrader] And about that time TCNet went down, my ISP went down, I lost everything for a few minutes and TCNet was out for awhile as we all know

[12/11/2003 11:03:46 PM] [Investortrader] So part of my selling was because I don't want to fly blind, and had seen those big sellers

[12/11/2003 11:04:11 PM] [Investortrader] Figured I could buy it back a bit cheaper either later in the day or tomorrow morning perhaps

[12/11/2003 11:04:33 PM] [Investortrader] Still looks good to me

[12/11/2003 11:04:42 PM] [Investortrader] On the daily

[12/11/2003 11:07:26 PM] [Investortrader] See how it acts before deciding

[12/11/2003 11:07:57 PM] [Investortrader] you'll know if I do, I post everything soon as I get confirmation on the fill, which is usually within seconds :)

[12/11/2003 11:08:27 PM] [Investortrader] LAte day sell-off a little worrisome, might get a nice price on it in the morning, we'll see

[12/11/2003 11:09:00 PM] [Investortrader] Another reason I sold besides the flying blind, was it was making a "ceiling" up there in the upper 3.50's

[12/11/2003 11:09:38 PM] [Investortrader] you can see on the 5's it made a few stabs at it and didn't break thru, that coupled with the heavy sellers up there, and the snafus caused me to take teh money and run

[12/11/2003 11:10:09 PM] [Investortrader] Can always buy back another day or trade another stock ...

[12/11/2003 11:10:47 PM] [Investortrader] I'll be looking to see if 3.30 holds, and buying around there if it does

[12/11/2003 11:11:27 PM] [Investortrader] That's around where it got stopped yesterday and early beginning of today

[12/11/2003 11:11:47 PM] [Investortrader] So I'm looking for prior resistance to become new support

[12/11/2003 11:12:17 PM] [Investortrader] 3.40 may hold, but with the higher vol selloff last ten minutes I tend to doubt it

[12/11/2003 11:12:44 PM] [Investortrader] But the daily still looks healthy to me so I'll be buying most likely

[12/11/2003 11:13:04 PM] [Investortrader] slight increase in vol over yesterday and an up day ...

[12/11/2003 11:13:35 PM] [Investortrader] Though it did close below the LR30 on the daily ... may just need this pb to gather strength to break thru it

[12/11/2003 11:14:11 PM] [Investortrader] Since mid oct the 50sma on the daily has been holding it back so that's my target for now

[12/11/2003 11:15:04 PM] [Investortrader] If it can break thru that and hold looks like the highs in Sept could be challenged

[12/11/2003 11:15:17 PM] [Investortrader] But one target at a time as Hotto says :)

[12/11/2003 11:15:45 PM] [Investortrader] ITIG - this was a riskier buy yesterday, and we heard about it!

[12/11/2003 11:16:23 PM] [Investortrader] But the 50sma on the daily is many times a bounce area, much stronger than the 40

ClubHome

[12/11/2003 11:16:56 PM] [Investortrader] And it was coming down on lower and lower vol, then it felt like a mini-washout yesterday down to the 50sma, so I took a small posn

[12/11/2003 11:17:11 PM] [Investortrader] at 4.17

[12/11/2003 11:17:33 PM] [Investortrader] added when it broke up thru 4.25 which had become minor resistance yesterday

[12/11/2003 11:17:58 PM] [Investortrader] I gave 2 targets for today, 4.50 and 4.80

[12/11/2003 11:18:26 PM] [Investortrader] 4.50 stopped it for awhile to the penny, I sold scalp shares at 4.49, then later sold the rest at 4.48 when it looked to be stalling

[12/11/2003 11:18:39 PM] [Investortrader] I tried to buy back in the 4.30's but missed

[12/11/2003 11:19:15 PM] [Investortrader] Ran up to 4.76, close to 4.80, I'm not near as good as Hotto is yet at targets :)

[12/11/2003 11:19:54 PM] [Investortrader] But he does say to scalp a few cents before target usually, maybe we can get him to expound on that a bit more one saturday when he's healthy

[12/11/2003 11:20:25 PM] [Investortrader] I didn't chase it when it broke thru 4.50 as it went too fast

[12/11/2003 11:21:05 PM] [Investortrader] you can see it also made a "ceiling" up there for a short time before selling back off, looking at the 5's

[12/11/2003 11:21:28 PM] [cdg] yawn....nite

[12/11/2003 11:21:34 PM] [Investortrader] Nite cdg

[12/11/2003 11:22:07 PM] [Investortrader] I almost bought back at 4.51 when it retraced but it broke 4.50, so I didn't

[12/11/2003 11:22:33 PM] [Investortrader] Closed at 4.34 and I'll be watching it to buy again tomorrow

[12/11/2003 11:23:03 PM] [Investortrader] 50sma held it today at the lows, may be a good place for an order

[12/11/2003 11:23:24 PM] [Investortrader] We'll see how the vol looks as it approaches there, if it does

[12/11/2003 11:23:39 PM] [Investortrader] And those were my trades for the day, and my thinking behind them

[12/11/2003 11:24:40 PM] [Investortrader] If anyone has any charts they'd like me to eyeball ... I don't really daytrade so if it's for a daytrade I probably should withhold comment or take anything I say with a grain of salt ;)

[12/11/2003 11:25:15 PM] [TolucanTrader] Investor-- thanks for sharing your thoughts and reasons.

[12/11/2003 11:25:33 PM] [Investortrader] Welcome Tolucan :) Hope it helps a little

[12/11/2003 11:28:43 PM] [Investortrader] Daily looks like a nice rebound
[12/11/2003 11:28:50 PM] [Investortrader] Increased vol a bit today
[12/11/2003 11:28:57 PM] [Norm19] Thanks, aaflyer. I'll be mostly listening for awhile

[12/11/2003 11:29:10 PM] [Investortrader] Will need more to get the OBV up there again, but easily could happen
[12/11/2003 11:30:41 PM] [Investortrader] Also had a 3-day DBO
[12/11/2003 11:30:59 PM] [Investortrader] Price over last 3 days of trading
[12/11/2003 11:31:33 PM] [Investortrader] Plus it closed over the 20sma
[12/11/2003 11:31:56 PM] [Investortrader] Many professional traders won't go long a stock that is under the 20sma, so this may attract their attention
[12/11/2003 11:32:47 PM] [Investortrader] And closed right up near the high, all positive signs
[12/11/2003 11:33:23 PM] [long351] much appreciated
[12/11/2003 11:33:36 PM] [Investortrader] Lemme look at the 5's quick
[12/11/2003 11:34:34 PM] [Investortrader] If not in yet, I'd wait for it to get maybe 10 cents over todays high to buy it
[12/11/2003 11:34:47 PM] [Investortrader] To prove it still has buyers coming in
[12/11/2003 11:36:05 PM] [Investortrader] I wouldn't want to buy it and have the last 40 minutes or so of trading today be a ceiling on it that turns it down
[12/11/2003 11:36:22 PM] [long351] actually short 37.15 avg from 12-4, looking for 32.5 stop rolled down to 38.25
[12/11/2003 11:36:54 PM] [long351] wondering if i should roll the stop down again or throw in the towell
[12/11/2003 11:38:23 PM] [Investortrader] The only reason I move a stop (I use mental stops) is if the stop is approached on low vol, and I won't move it much
[12/11/2003 11:39:39 PM] [Investortrader] OBV on the 5's looks good at end of day
[12/11/2003 11:40:29 PM] [Investortrader] If it shows increasing volume tomorrow I would just get stopped out of a short on this one and not move it, if it hits your stop
[12/11/2003 11:40:52 PM] [long351] fair nuff thanks again
[12/11/2003 11:41:36 PM] [Investortrader] Welcome :) sorry for the bad news
[12/11/2003 11:41:56 PM] [Investortrader] Might even think about just getting out at that 10 cent over todays high on vol price
[12/11/2003 11:43:01 PM] [Investortrader] I did that on TIWI earlier this month when I played it
[12/11/2003 11:43:24 PM] [Investortrader] Didn't wait for it to hit my stop as it felt too weak, ended up continuing down and stopping out others who were in it I noticed

them say

[12/11/2003 11:44:05 PM] [Investortrader] But that's a more experienced play, gotta feel it

[12/11/2003 11:46:25 PM] [long351] i need to stay pretty mechanical to keep the emotions out

[12/11/2003 11:46:38 PM] [Investortrader] semi's have alos been down in general last bunch of days so ready for a rally

[12/11/2003 11:46:52 PM] [Investortrader] Good idea, never want those emotions creeping in :)

[12/11/2003 11:48:46 PM] [Investortrader] Got a request for MOT

[12/11/2003 11:49:57 PM] [Investortrader] A few good reports came out in the notes on it

[12/11/2003 11:50:10 PM] [Investortrader] Just glanced at those, didn't look indepth

[12/11/2003 11:52:22 PM] [Investortrader] DBO today, closed at high, both good signs .. but not really on increased vol, but not on less vol either

[12/11/2003 11:52:50 PM] [Investortrader] However ...

[12/11/2003 11:53:13 PM] [Investortrader] OBV is much lower on this low than the mid-nov low at around the same price

[12/11/2003 11:53:24 PM] [Investortrader] A warning sign

[12/11/2003 11:54:17 PM] [Investortrader] Plus a few different resistances overhead

[12/11/2003 11:54:25 PM] [Investortrader] LR30, 50sma, 20sma

[12/11/2003 11:54:51 PM] [Investortrader] Not really much room to them so the risk/reward doesn't look that great on this one ...

[12/11/2003 11:55:12 PM] [Investortrader] Unless it can get thru them, looks like it will need help from mr market to do that

[12/11/2003 11:56:19 PM] [Investortrader] I would probably leave this one alone, I use OBV pretty heavy in my work and this just doesn't have it

[12/11/2003 11:56:34 PM] [Investortrader] I mean, I will leave it alone, but others should probably also

[12/11/2003 11:57:03 PM] [Investortrader] If it does break thru those resistances on good vol, then ok

[12/11/2003 11:57:26 PM] [Investortrader] And it will probablky then go back to test the recent highs .. but OBV is suggesting it won't do that

[12/11/2003 11:58:40 PM] [Investortrader] If anything I would be looking for it to break down here or go sideways from the OBV

[12/11/2003 11:59:20 PM] [Investortrader] If it does looks like the gap late sept would be a target
