[3/31/2004 8:42:05 AM] <Wayne48> I'm thinking the target is around 33-34, then a nice bounce.

[3/31/2004 8:44:29 AM] <Wayne48> must go all the way back to early 2003 for support now on QLGC at around 33.

[3/31/2004 9:01:52 AM] <america> but what?

[3/31/2004 9:02:45 AM] <softrock> Mango - databank - real time settings. It should be cleared every once in a while. It slows processing when it gets too large

[3/31/2004 4:39:32 PM] <cuidado> Rocket, must've been bad. They were reporting
on Phase III trial results in 4:15 pm conference call.... you could probably find out by
going to their website
[3/31/2004 4:40:08 PM] <Rocket> Hit En
[3/31/2004 4:40:55 PM] <Rocket> Article sez trial was good and forms basis for new

[3/31/2004 4:45:10 PM] <dgraham42> go here for SUPG report...
http://biz.yahoo.com/prnews/040331/new035_1.html
[3/31/2004 4:46:30 PM] <youngman> Just went to site and it looks like my trail ends
4/29/04
[3/31/2004 4:52:21 PM] <dagwood> remember ALTH, it was another one of these,
well it works but the endpoint was not the ultimate target. Somewhat as SUPG is in
now
[3/31/2004 4:57:01 PM] <RkyMtnFool> On a day when the Fed Chairman is rumored
to have had a heart attack, CNBC has spent more time covering The Donald's hair
than Greenie's health.
[3/31/2004 4:57:30 PM] <RkyMtnFool> Up to the minute business news!
[3/31/2004 4:58:27 PM] <dagwood> well that is better than trying out new Cars, and
seeing where hot sauce is made.
[3/31/2004 5:05:31 PM] <hotto> SUPG... flipped.. for .24 gain.. That's all.
[3/31/2004 5:06:25 PM] <malealltrash> supg 9.60 last price i see down 3.20 ah
[3/31/2004 5:07:01 PM] <Johnster> hotto, you've got the big ones playing with that
one...(tho' I tried shorting it near 15 AHs...didn't fill, damn it).
[3/31/2004 5:08:02 PM] <malealltrash> supg made u live 70 days longer did nadda
fro m what I have heard who knows with this market crap
[3/31/2004 5:09:08 PM] <malealltrash> had thought that BBY @ 47 vs 35 would
run ah did not
[3/31/2004 5:10:16 PM] <malealltrash> NGEN up 11 ah
[3/31/2004 5:11:05 PM] <malealltrash> will buy back IDSA in the ah down from
where I sold it or pm in a.m.
[3/31/2004 5:11:46 PM] <malealltrash> why hasn't tcnet updated that IDSA chart ?
[3/31/2004 5:11:49 PM] <cuidado> spg on the rise
[3/31/2004 5:12:00 PM] <cuidado> supg on the rise
[3/31/2004 5:12:16 PM] <malealltrash> not with my money it won't lol
[3/31/2004 5:12:19 PM] <tffsf> if you update, IDSA is updated
[3/31/2004 5:12:45 PM] <malealltrash> now it is was not earlier
[3/31/2004 5:13:19 PM] <cuidado> went down to 9, now back at10 almost
[3/31/2004 5:14:01 PM] <malealltrash> last price I see is 9.83
[3/31/2004 5:14:12 PM] <w2jc> maybe SUPG willopen tmw at 12 :)
[3/31/2004 5:14:29 PM] <malealltrash> cool cna I have some of that stuff u smoking

players wanted to knock price down quick to get for super bargain

[3/31/2004 5:14:54 PM] <malealltrash> nytol have a good evening

[3/31/2004 5:15:23 PM] <cuidado> I think it's going to come back substantially during the ah

[3/31/2004 5:15:43 PM] <malealltrash> from ur lips to my ears lol

[3/31/2004 5:15:46 PM] <w2jc> reading the report, they do mention that side effects were a lot worse with it

[3/31/2004 5:16:06 PM] <w2jc> and death rate was higher, but they lived longer - figure that out

[3/31/2004 5:16:06 PM] <malealltrash> read on some died

[3/31/2004 5:17:29 PM] <cuidado> lots of volume.... I think we need to read the report ourselves instead of repeating this hearsay trash lol!

[3/31/2004 5:17:49 PM] <w2jc> scroll back in the hotto log for the URL

[3/31/2004 5:18:13 PM] <malealltrash> yes 1,560,5076 trades as I see and stock now 9.80

[3/31/2004 5:18:14 PM] <cuidado> yes, got it and going there now

[3/31/2004 5:18:27 PM] <malealltrash> bye bye

[3/31/2004 5:19:56 PM] <cuidado> c u!

[3/31/2004 5:22:58 PM] <w2jc> SUPG appears to have gone down to the 50 day ma on its free-fall

[3/31/2004 5:24:02 PM] <w2jc> which was also a significant support level all thru Nov and Dec last year, and resistance in Feb this year

[3/31/2004 5:58:15 PM] <VJnet> any news on grmn

[3/31/2004 6:01:58 PM] <cuidado> r u still here, Jim?

[3/31/2004 6:02:27 PM] <w2jc> me?

[3/31/2004 6:02:35 PM] <cuidado> yes

[3/31/2004 6:02:41 PM] <w2jc> guess i am !

[3/31/2004 6:02:45 PM] <cuidado> i got a phone call

[3/31/2004 6:03:13 PM] <w2jc> i'll be around for a while

[3/31/2004 6:03:14 PM] <cuidado> I read that report and it really does not sound like good news to me

[3/31/2004 6:03:46 PM] <w2jc> the first part sounded ok (of course) but the next couple of paragraphs didnt sound so hot...

[3/31/2004 6:04:04 PM] <cuidado> the difference in death rate between the test cases and controls was insignifiacant statistically

[3/31/2004 6:04:09 PM] <w2jc> BUT the price drop AH is a bit significant

[3/31/2004 6:04:27 PM] <cuidado> oh yeah!

[3/31/2004 6:05:00 PM] <w2jc> if it bounces above 10.50 i can make some money on it... or if it gets down to 8+ even better for me !!

[3/31/2004 6:05:15 PM] <w2jc> assuming, of course, that it bouces again after the \$8

[3/31/2004 6:06:06 PM] <cuidado> seems to have found some support at 9.30 - 9.40

[3/31/2004 6:06:14 PM] <w2jc> seems like about a million shares have traded in AH today

[3/31/2004 6:06:42 PM] <w2jc> 9.56 is the 50 day MA

[3/31/2004 6:07:28 PM] <w2jc> of course, theoretically it could drop back to the low of early March around 6.80 :o

[3/31/2004 6:07:46 PM] <cuidado> cbsmw says over 3.1M sh AH

[3/31/2004 6:08:22 PM] <w2jc> maybe tcnet isnt showing all the volume ah

[3/31/2004 6:10:10 PM] <w2jc> and then there is the 500 day MA at 5.73 or so !!

[3/31/2004 6:10:10 PM] <cuidado> no, i didn't think they show any AH or PM data

[3/31/2004 6:10:37 PM] <w2jc> oh yeah, my Vol - RT has been incrementing all evening

[3/31/2004 6:11:56 PM] <cuidado> interesting, I've concluded just the other day that I really don't understand the relationship between Worden's "RT" data and "non-RT"

ClubHome

data

[3/31/2004 6:12:32 PM] <w2jc> non-RT data is either end of day, or 20 min+ delayed
(IF you do Update during the day)

[3/31/2004 6:13:14 PM] <w2jc> guess i'll have to get up early tmw and watch the
PRE for an hour on supg

[3/31/2004 6:14:22 PM] <cuidado> i know what they say it is, but AH, my percent
change from last price and volume get zeroed

[3/31/2004 6:15:24 PM] <cuidado> supg now getting a little bounce off the lbb on 5'

[3/31/2004 6:15:41 PM] <w2jc> my "today's percent change" stays at what it was at
the bell... but Bid Ask and Vol - RT are all live during AH

[3/31/2004 6:17:17 PM] <cuidado> actually mine now are too... but then i reinstalled
from scratch with tech support just this morning.... so apparently my missing data
problem is fixed

[3/31/2004 6:17:44 PM] <w2jc> some days are just better than others :)

[3/31/2004 6:18:26 PM] <w2jc> i find that clearing the cache, and stopping/starting
the real-time data flow clear up a lot of data problems

[3/31/2004 6:18:48 PM] <cuidado> ooh suupg back to ~9.26 from a dip to 9

[3/31/2004 6:19:37 PM] <Bobtrader> W2jc ...where is the cache that you clear

[3/31/2004 6:19:49 PM] <cuidado> hmmm...I'll try that

[3/31/2004 6:20:03 PM] <w2jc> Bob -- click Databank ... it's near the bottom of that
pulldown menu

[3/31/2004 6:20:14 PM] <Bobtrader> TY

[3/31/2004 6:21:00 PM] <cuidado> actually after clicking databank, click 'real time
settings'

[3/31/2004 6:21:14 PM] <cuidado> then you'll see it

[3/31/2004 6:21:21 PM] <w2jc> ok , sorry forgot that step !

[3/31/2004 6:22:34 PM] <cuidado> well, got to go for now... lbb is turning slightly
downward on supg...

[3/31/2004 6:23:08 PM] <w2jc> L8r

[3/31/2004 6:23:40 PM] <Bobtrader> W2jc TY had 11000 kb in cache

[3/31/2004 6:24:03 PM] <w2jc> wow 11MB that's big !!

[3/31/2004 6:25:48 PM] <Bobtrader> I dont know ..first time i cleared it. what size is
your's usually

[3/31/2004 6:26:22 PM] <w2jc> right now it's 3.2mb

[3/31/2004 6:27:18 PM] <Bobtrader> oh .. so thats close :)...almost

[3/31/2004 6:29:23 PM] <Bobtrader> my last pr does not change..supg=12.80...but
bid=9.04..ask=9.09

[3/31/2004 6:30:07 PM] <w2jc> same here Bob ... the Last price is from the daytime

[3/31/2004 6:31:40 PM] <Bobtrader> tes.. I think vol is last daytime also

[3/31/2004 6:31:57 PM] <Bobtrader> mean..yes...

[3/31/2004 6:32:38 PM] <w2jc> Vol - Rt is active AH

[3/31/2004 6:33:35 PM] <Bobtrader> do you have 93780 vol

[3/31/2004 6:35:25 PM] <w2jc> yes

[3/31/2004 6:36:28 PM] <Bobtrader> thanks W2jc... I was not sure before

[3/31/2004 9:22:45 PM] <FibForum> hello ...anyone trade the SP in here.....)

[3/31/2004 9:30:08 PM] <Investortrader> Hi everyone ... I pretty much only trade
stocks FibForum

[3/31/2004 9:30:36 PM] <kellam> Hi IT

[3/31/2004 9:31:16 PM] <FibForum> darn.....I used to trade stocks...but got hooked
on the SP and ER.....

[3/31/2004 9:31:49 PM] <Investortrader> First one I'd like to cover is FNSR

[3/31/2004 9:32:47 PM] <Investortrader> This one I bot today, but a lot of selling vol

came in later this afternoon ... which I don't like

[3/31/2004 9:34:46 PM] <FibForum> i never traded stocks under 5 bucks.....but that is an ugly chart if you are a long term investor for sure

[3/31/2004 9:34:47 PM] <Investortrader> There is a nice upturn in the OBV, but todays increased vol to the downside needs to be corrected tomorrow

[3/31/2004 9:36:41 PM] <kellam> IT how do you use wave theory, what stage is FNSR in your view

[3/31/2004 9:37:16 PM] <Investortrader> If you mean EW, I don't use it just the basic ABC stuff sometimes

[3/31/2004 9:37:57 PM] <kellam> OK thx

[3/31/2004 9:38:17 PM] <FibForum> getting some of the things figured out

[3/31/2004 9:38:29 PM] <RONNN777> IT, thoughts on dsco and vsat?

[3/31/2004 9:39:30 PM] <Investortrader> This may make a quick dive to the lower BB

[3/31/2004 9:39:57 PM] <Investortrader> I'm not feeling too good about this one ... we'll see tomorrow

[3/31/2004 9:40:38 PM] <Investortrader> Another one I bot today was VICL ...

[3/31/2004 9:41:14 PM] <Investortrader> I know lots followed Hotto in ... this one had a private placement at 5.50 I think it was last week

[3/31/2004 9:41:48 PM] <Investortrader> We've seen before in stocks how that can draw the price like a magnet but it's also a good place to buy

[3/31/2004 9:42:23 PM] <Investortrader> And see in this one how the OBV came down and held it's 50sma even though price came down thru the 50sma

[3/31/2004 9:42:48 PM] <Investortrader> I feel much better about this one, good vol upmove today

[3/31/2004 9:44:20 PM] <Investortrader> OBV has already recovered, only a matter of time till price does

[3/31/2004 9:45:18 PM] <Investortrader> Any questions on FNSR or VICL?

[3/31/2004 9:46:43 PM] <Investortrader> One other thing on VICL, see the last two days before this one where it was pulling back a little ... notice the very low volume ... low vol pb's are healthy

[3/31/2004 9:46:53 PM] <kellam> IT see resistance at 50ma for VICL?

[3/31/2004 9:47:32 PM] <Investortrader> IT could pause there kellam, the 20sma stopped it today ... but if vol continues it won't stop it for long

[3/31/2004 9:47:47 PM] <CaptVideo> IT, can you share your chart?

[3/31/2004 9:48:07 PM] <Investortrader> It should be shared CaptVideo

[3/31/2004 9:48:40 PM] <kellam> It I get concerned with that high vol PB down 6 days back from the 50ma

[3/31/2004 9:49:15 PM] <Investortrader> That was probably when the news came out about the private placement

[3/31/2004 9:50:07 PM] <kellam> Good point It,OBV strong for sure

[3/31/2004 9:50:12 PM] <Investortrader> It's still a good idea to sell at least some at the 50sma

[3/31/2004 9:50:45 PM] <kellam> any thoughts on SYNC on hotto chat today

[3/31/2004 9:51:10 PM] <Investortrader> SYNC is the next one I am covering, the other one I bot today :)

[3/31/2004 9:52:17 PM] <kellam> right always smart to take some profits,I bought SYNC also IT

[3/31/2004 9:52:29 PM] <Investortrader> SYNC has a good chart here ... looks like it finished correcting on 3/16

[3/31/2004 9:52:56 PM] <Investortrader> Then it had two big vol up days and has been drifting on lower vol since then

[3/31/2004 9:53:15 PM] <Investortrader> Now today another good vol BO

[3/31/2004 9:53:59 PM] <Investortrader> Looks like the 50sma will be easy

[3/31/2004 9:54:32 PM] <Investortrader> I feel good about this one too

[3/31/2004 9:54:37 PM] <kellam> good pattern should make it to 50ma

ClubHome

[3/31/2004 9:54:57 PM] <Investortrader> 50sma is also right at the gap area from late Feb
[3/31/2004 9:55:31 PM] <Investortrader> Which was also support in Dec ... so should be some resistance there now
[3/31/2004 9:56:52 PM] <Investortrader> Hotto is using 3.50 area, which is the hod area for the last two swing highs, 3/5 and 3/18
[3/31/2004 9:57:45 PM] <Investortrader> So it's got some overhead resistance .. make sure to take some profits as it gets there
[3/31/2004 9:58:04 PM] <kellam> will do IT
[3/31/2004 9:58:48 PM] <Investortrader> This had a good consolidation pattern after the vol BO on 3/17 - 3/18
[3/31/2004 9:59:06 PM] <Investortrader> Hotto was all over this one yesterday I remember
[3/31/2004 9:59:24 PM] <Investortrader> Any questions on SYNC?
[3/31/2004 9:59:34 PM] <kellam> Agree nice low vol pattern hugging the LR30 all the way
[3/31/2004 9:59:39 PM] <Investortrader> OBV is good on SYNC also
[3/31/2004 10:00:09 PM] <Investortrader> On to DSCO ...
[3/31/2004 10:00:16 PM] <kellam> IT HETC had reversal today I believe if you can cover
[3/31/2004 10:00:51 PM] <kellam> reversal
[3/31/2004 10:01:37 PM] <kellam> DSCO talk about no vol!
[3/31/2004 10:02:03 PM] <Investortrader> It's got vol, just small bars because of one huge day
[3/31/2004 10:02:44 PM] <kellam> IT I see that now thanks
[3/31/2004 10:03:18 PM] <Investortrader> The 10 level has been good support all year ... OBV hard to say, lower here but may have had a small pos divergence
[3/31/2004 10:04:18 PM] <Investortrader> Looks like it's about to BO from this consolidation here
[3/31/2004 10:04:42 PM] <kellam> If DSCO closes below ma10 however avoid?
[3/31/2004 10:04:44 PM] <Investortrader> But it may hold till the new public offering is done
[3/31/2004 10:06:27 PM] <Investortrader> Not avoid as it's got good support around 10 still
[3/31/2004 10:06:42 PM] <Investortrader> And with the offering priced at 11 too
[3/31/2004 10:07:14 PM] <Investortrader> It could test 11 easily just as VICL tested it's 5.50 offering price area
[3/31/2004 10:07:27 PM] <enzo> evenig IT
[3/31/2004 10:07:32 PM] <Investortrader> Hi enzo
[3/31/2004 10:08:14 PM] <kellam> thx IT did not realize Offering price was 11
[3/31/2004 10:09:05 PM] <Investortrader> If I wanted to own it I'd put an order in around there and see .. it's got a few days to go for that offering still
[3/31/2004 10:09:55 PM] <Investortrader> Any questions on DSCO?
[3/31/2004 10:10:15 PM] <enzo> when the offering is on dsco
[3/31/2004 10:10:45 PM] <Investortrader> Expected to close April 2
[3/31/2004 10:11:46 PM] <enzo> if they do the offering stock get dilute may come back to retest \$10
[3/31/2004 10:12:11 PM] <kellam> KLIC,CNLG also of interest if you have time
[3/31/2004 10:12:42 PM] <Investortrader> On to VSAT ...
[3/31/2004 10:14:15 PM] <Investortrader> This one looks lower here ... compare the vol on the decline from 3/18 to 3/23 with the vol on the recent advancing days
[3/31/2004 10:14:24 PM] <StockStalker> have to admit I was curious bout ur FNSR trade
[3/31/2004 10:15:01 PM] <Investortrader> It doesn't look as good now as when I put it on earlier on FNSR

ClubHome

[3/31/2004 10:15:54 PM] <StockStalker> my curiosity was at that moment... seems like the down vol spikes were Huge at that moment and it was on a low volume bounce.. what else did u see... was it the 500 sma perhaps

[3/31/2004 10:16:03 PM] <Investortrader> Was looking to play a possible dbl btm on it, on a low vol pb .. then lots of selling vol came in :P

[3/31/2004 10:17:14 PM] <kellam> brb

[3/31/2004 10:17:41 PM] <Investortrader> Safe entry after a pretty long pb, some divergence in OBV, the possible dbl btm,

[3/31/2004 10:18:56 PM] <Investortrader> Also the price has been cut just about in half from it's 4.26 high, usually good for a bounce at least but we'll see

[3/31/2004 10:19:16 PM] <Intuitive> IT, isn't the OBV above 50ma and 20ma a bullish trade above 50sma?

[3/31/2004 10:19:29 PM] <Investortrader> VSAT ... here the run-up on lower vol came up to the 50sma

[3/31/2004 10:19:59 PM] <Investortrader> And closed today in the lower half of it's range

[3/31/2004 10:20:06 PM] <Investortrader> So I'm thinking it has more downside here

[3/31/2004 10:20:36 PM] <Investortrader> Intuitive ... not sure what you are asking .. ?

[3/31/2004 10:21:25 PM] <RONNN777> thx IT, learned alot

[3/31/2004 10:21:39 PM] <Investortrader> Welcome Ronnn :)

[3/31/2004 10:21:45 PM] <dagwood> If you get time ITafter the other requests, MPP (had 3 successful shorts...looking again)

[3/31/2004 10:22:28 PM] <Investortrader> Any questions on VSAT?

[3/31/2004 10:23:02 PM] <Intuitive> OBV > 50ma, and price , < 50sma. Also, middle band of OBV stopped last rally, this time it made it above.

[3/31/2004 10:23:56 PM] <Investortrader> What I don't like is the vol on the down days was higher ... how it rallied today and couldn't hold much of it

[3/31/2004 10:24:50 PM] <Investortrader> And it rallied into some resistance there with the 20sma and 50sma, also that area was support from the 3/11 to 3/16 time ... so now it's resistance

[3/31/2004 10:25:14 PM] <Investortrader> I would have liked to seen it hold more of it's gains today

[3/31/2004 10:25:52 PM] <Investortrader> Though I have been known to be wrong sometimes ;)

[3/31/2004 10:26:22 PM] <Investortrader> On to HETC ...

[3/31/2004 10:27:13 PM] <Investortrader> Gotta like this vol reversal here

[3/31/2004 10:27:26 PM] <Investortrader> Must have been some good news yesterday on it

[3/31/2004 10:28:13 PM] <Investortrader> But other than that it's really too low vol to make TA comments

[3/31/2004 10:28:43 PM] <Investortrader> So I have to move on to KLIC ...

[3/31/2004 10:28:58 PM] <Investortrader> (sorry)

[3/31/2004 10:29:17 PM] <StockStalker> ya think TINY bout to get big hre

[3/31/2004 10:30:29 PM] <Investortrader> They had some good news today but it couldn't move the stock much on KLIC

[3/31/2004 10:31:12 PM] <Investortrader> That worries me a little .. but the chart pattern looks ok with it breaking over the middle BB

[3/31/2004 10:31:53 PM] <parkwaypet> klic

[3/31/2004 10:31:55 PM] <Investortrader> But good news on orders should have moved this more

[3/31/2004 10:33:08 PM] <Investortrader> So I'm leery of it here

[3/31/2004 10:33:25 PM] <BossFan> Just found CANI..nice bullish engulfing after a doji yesterday. Opinions please. TY

[3/31/2004 10:33:49 PM] <Investortrader> Any questions on KLIC?

ClubHome

[3/31/2004 10:33:49 PM] <kellam> thx for reviews IT
[3/31/2004 10:33:58 PM] <Investortrader> Welcome kellam :)
[3/31/2004 10:34:25 PM] <Investortrader> On to CNLG ...
[3/31/2004 10:34:45 PM] <Investortrader> This one looks ok here
[3/31/2004 10:35:06 PM] <Investortrader> See how since the BO all the big vol days have been big moves to the upside
[3/31/2004 10:35:23 PM] <Investortrader> And all the pb's have been on lower vol
[3/31/2004 10:35:41 PM] <kellam> see the pattern IT on vol
[3/31/2004 10:35:42 PM] <Investortrader> That's just what you want to see in a healthy rally
[3/31/2004 10:36:06 PM] <Investortrader> Big up day, followed by lower vol pb
[3/31/2004 10:37:03 PM] <Investortrader> See how the 20sma has pretty much held the pb's on it too, nice and orderly so far
[3/31/2004 10:37:37 PM] <Investortrader> Though it has had a huge run this month
[3/31/2004 10:38:29 PM] <Investortrader> And notice this is one volatile stock, and how much every bar is worth
[3/31/2004 10:38:58 PM] <Investortrader> But so far it looks good here
[3/31/2004 10:39:09 PM] <Investortrader> Any questions on CNLG?
[3/31/2004 10:39:59 PM] <Investortrader> On to MPP ...
[3/31/2004 10:41:13 PM] <kellam> high vol down in PB on MPP
[3/31/2004 10:41:59 PM] <Investortrader> Right, it's doubled from late Feb, ran up nicely ... not notice how vol really increased at the top here
[3/31/2004 10:42:19 PM] <Investortrader> Now notice how vol really increased
[3/31/2004 10:43:17 PM] <Investortrader> With the gap up on 3/29 on such big vol after the price had doubled ... then the bearish engulfing also on big vol
[3/31/2004 10:43:36 PM] <Investortrader> This looks like a possible blow-off top
[3/31/2004 10:44:06 PM] <Investortrader> Any new high at all would invalidate that pattern
[3/31/2004 10:45:30 PM] <Investortrader> So looking at it from the short side as suggested would be how I would look at it now, and I'd sell if I owned any of it
[3/31/2004 10:46:55 PM] <kellam> thx much IT for running these sessions you are a good teacher, have to sign off a bit early tonight will catch up in logs
[3/31/2004 10:46:56 PM] <Investortrader> This is another time where I wouldn't wait for the 3-4 stall after riding the upper BB before selling it ... I would sell it right now ... probably would have been out yesterday on the bearish engulfing
[3/31/2004 10:47:09 PM] <Investortrader> Thank you kellam :)
[3/31/2004 10:47:31 PM] <Investortrader> Any questions on MPP?
[3/31/2004 10:47:44 PM] <Investortrader> One thing I'd like to point out on MPP before leaving it is the OBV at the top ...
[3/31/2004 10:47:47 PM] <kellam> YW and thanks for all your insights and willingness to give us this time
[3/31/2004 10:47:48 PM] <enzo> mpp float is very small they run up fast
[3/31/2004 10:48:20 PM] <Investortrader> On a blow off top the OBV will look healthy still, making new highs because of all that vol at the top
[3/31/2004 10:48:26 PM] <Investortrader> Thanks enzo
[3/31/2004 10:48:41 PM] <Investortrader> So the OBV needs to be discounted at those times
[3/31/2004 10:49:09 PM] <Zathrus> so how do you know when to discount OBV and when not to?
[3/31/2004 10:49:09 PM] <Investortrader> On to TINY ...
[3/31/2004 10:49:40 PM] <dagwood> thanks IT
[3/31/2004 10:49:42 PM] <Investortrader> Zathrus, if it's after a big run-up like this ... and then huge vol comes in on a gap up ... which in this case has been immediately reversed ... that would be one time
[3/31/2004 10:49:48 PM] <Investortrader> Welcome dagwood :)

ClubHome

[3/31/2004 10:49:56 PM] <Zathrus> thanks IT
[3/31/2004 10:50:16 PM] <Tilt> Hello IT, I'm new and facinated by this
[3/31/2004 10:50:21 PM] <Investortrader> It's the extra huge vol at the top, especially followed by the big vol nearish engulfing
[3/31/2004 10:50:26 PM] <Investortrader> Welcome Zathrus :)
[3/31/2004 10:50:38 PM] <Investortrader> Hi Tilt, it fascinates me too!
[3/31/2004 10:51:13 PM] <Investortrader> But even without the bearish engulfing the huge vol gap at the top ... exhaustion gap
[3/31/2004 10:51:37 PM] <enzo> can some one give me a confermation quote after hour on evci ?
[3/31/2004 10:51:39 PM] <Investortrader> Which is usually followed by some kind of confirmation, island reversal, bearish engulfing, etc
[3/31/2004 10:51:51 PM] <bmweyrauch> I must run, thanks for excellent session IT.
[3/31/2004 10:51:58 PM] <Investortrader> Welcome bmw :)
[3/31/2004 10:52:16 PM] <Investortrader> EVCI last 12.81
[3/31/2004 10:52:17 PM] <StockStalker> what are we talking bout...that was not tiny was it
[3/31/2004 10:52:26 PM] <Zathrus> no - mpp
[3/31/2004 10:52:30 PM] <Investortrader> No, that was MPP ... on to TINY now
[3/31/2004 10:52:37 PM] <StockStalker> deja vu
[3/31/2004 10:52:43 PM] <Investortrader> :)
[3/31/2004 10:52:43 PM] <Zathrus> all over again
[3/31/2004 10:52:47 PM] <HOTTO> Unico7 has joined the club. Please welcome your new member.
[3/31/2004 10:53:09 PM] <enzo> on yahoo after hour i got 13.48 ? where can i look to conferm
[3/31/2004 10:53:24 PM] <Investortrader> I like this chart, nice consolidation with rising OBV
[3/31/2004 10:53:38 PM] <Zathrus> now THAT sounds like TINY
[3/31/2004 10:53:49 PM] <dagwood> wow TINY 5 employees
[3/31/2004 10:54:05 PM] <StockStalker> i think it is a bit of an incubator
[3/31/2004 10:54:13 PM] <Investortrader> And with the BB's getting skinny should be looking to BO soon
[3/31/2004 10:55:12 PM] <Investortrader> Can't really use the middle BB or the 50sma here as in a consolidation like this they converge and don't mean much as the price walks back and forth around them
[3/31/2004 10:55:59 PM] <Investortrader> So I wouldn't be using them as support for a stop-loss or to buy on BO's for those two ... which is a usual strategy of mine ... that doesn't fit this situation
[3/31/2004 10:57:30 PM] <Investortrader> With something like this, since it has based for awhile and is ripe for a BO anytime ... I would pick some up here, and also have an order in around the lows of the base in case it makes anothjer trip there first
[3/31/2004 10:57:57 PM] <StockStalker> very nice.. nice seeing u bidding round the lows.. that is trading
[3/31/2004 10:58:00 PM] <Investortrader> The OBV is looking like the BO will be to the upside
[3/31/2004 10:58:30 PM] <StockStalker> put in a big chunk of my bet today
[3/31/2004 10:58:35 PM] <Investortrader> Might get a fill there too :)
[3/31/2004 10:58:47 PM] <Zathrus> I bot some yesterday -
[3/31/2004 10:58:52 PM] <StockStalker> if u have the cojones to put it in that is
[3/31/2004 10:59:01 PM] <StockStalker> i bot some yday too.. added today
[3/31/2004 10:59:12 PM] <StockStalker> many not comfy with bidding at support
[3/31/2004 10:59:14 PM] <Investortrader> It looks good
[3/31/2004 10:59:38 PM] <Investortrader> Support is the best place to bid! Smallest losses if you are wrong too

ClubHome

[3/31/2004 10:59:40 PM] <Zathrus> but if you buy at support, you know when you're wrong pretty quick

[3/31/2004 10:59:53 PM] <StockStalker> xactly

[3/31/2004 11:00:35 PM] <Investortrader> Any questions on TINY?

[3/31/2004 11:01:11 PM] <Investortrader> I do like the OBV in it, which has held above it's 50sma this entire base

[3/31/2004 11:02:04 PM] <Investortrader> On to CANI ...

[3/31/2004 11:03:01 PM] <Investortrader> I don't like the vol patterns in this one, so I wouldn't be bottom fishing it yet

[3/31/2004 11:03:23 PM] <Investortrader> Not with the down days having more vol than the up days

[3/31/2004 11:04:04 PM] <BossFan> Yes, I see that on the volume as well, but is bounce off 500MA significant?

[3/31/2004 11:04:29 PM] <Investortrader> Also you have insiders filing to sell shares after this sell-off, not the most positive thing in the world

[3/31/2004 11:05:37 PM] <Investortrader> I wouldn't touch it on the long side yet

[3/31/2004 11:06:18 PM] <BossFan> .. it could bounce some here, but the volume looks lower still .. I'd wait or find a better set-up to trade

[3/31/2004 11:05:50 PM] <Investortrader> But I don't daytrade either

[3/31/2004 11:06:03 PM] <Investortrader> Tomorrow for a daytrade, don't ask me! ;)

[3/31/2004 11:06:18 PM] <BossFan> Ok thanks...lots of other fish in the sea.

Daytrade, who me?B)

[3/31/2004 11:06:21 PM] <Zathrus> Did you do CECO today?

[3/31/2004 11:06:37 PM] <Investortrader> Any questions on CANI?

[3/31/2004 11:07:21 PM] <Investortrader> On to CECO (good timing on that question .. are you a trader? ;))

[3/31/2004 11:07:33 PM] <Zathrus> I bought on the 55 day breakout

[3/31/2004 11:07:46 PM] <Zathrus> plan to hold for a while

[3/31/2004 11:07:55 PM] <StockStalker> is that a setup u trade Zat

[3/31/2004 11:08:09 PM] <Zathrus> something I'm trying right now - small positions

[3/31/2004 11:08:27 PM] <Investortrader> This one looks good here, riding the upper BB .. OBV also breaking out

[3/31/2004 11:08:31 PM] <StockStalker> K .. cuz one of my real time scans is a 21 day hi

[3/31/2004 11:08:36 PM] <StockStalker> turtle b/o

[3/31/2004 11:08:39 PM] <Investortrader> The last two days have been nice low vol pb days

[3/31/2004 11:08:46 PM] <StockStalker> Richard Dennis stuff

[3/31/2004 11:09:22 PM] <Zathrus> I've been backtesting this strategy with Wealth-lab- looks very solid

[3/31/2004 11:09:46 PM] <StockStalker> well if u ever need technoloy to find every one as it happens.. let me now

[3/31/2004 11:10:03 PM] <Zathrus> will do

[3/31/2004 11:10:22 PM] <Investortrader> Looks good to me Zathrus, could be the start of something nice

[3/31/2004 11:11:34 PM] <Zathrus> thanks IT - also I've picked up HIBB, RSAS, ODP, PCLN & CMI - on this plan...

[3/31/2004 11:12:21 PM] <Investortrader> Welcome Zathrus ... are you using 55 day BO's as a filter for those?

[3/31/2004 11:12:38 PM] <Zathrus> yes - scanning the IBD100 and hotto theme stocks as the universe

[3/31/2004 11:13:31 PM] <Investortrader> Not much wrong with any of those charts on a quick glance

[3/31/2004 11:13:58 PM] <Zathrus> yep - I tend to do a little discretionary pick and choose for OBV and such

[3/31/2004 11:14:21 PM] <Investortrader> Good! :) I always look at OBV
[3/31/2004 11:15:38 PM] <parkwaypet> IT worried about the dogi top on INTV but very nice move today andy ideas in at 14.40
[3/31/2004 11:17:19 PM] <Zathrus> Since I've gotten a few private messages asking - the sell stop on this system is $\text{lowest}(\text{bar}, \# \text{low}, 55) + (\text{atr}(\text{bar}, 20) * 0.05) * \text{daysintrade}$
[3/31/2004 11:20:48 PM] <Zathrus> IT - I didn't mean to drive things off into the weeds. Sorry for the interruption
[3/31/2004 11:24:01 PM] <Investortrader> Sorry about that, my computer froze and had to turn off the power
[3/31/2004 11:24:14 PM] <Investortrader> INTV ...
[3/31/2004 11:24:20 PM] <StockStalker> did u drop ur pizza on it
[3/31/2004 11:24:33 PM] <StockStalker> =D
[3/31/2004 11:24:39 PM] <Investortrader> No interruption Zathrus :)
[3/31/2004 11:24:45 PM] <enzo> good night IT thanks for your time
[3/31/2004 11:24:48 PM] <Investortrader> Hehehe, I could use a pizza and a beer now!
[3/31/2004 11:24:53 PM] <Investortrader> Night enzo :)
[3/31/2004 11:25:38 PM] <Investortrader> Nice buy parkwaypet on this one
[3/31/2004 11:26:02 PM] <Investortrader> OBv is confirming the new highs
[3/31/2004 11:26:33 PM] <Investortrader> And it just recently broke out on good vol again
[3/31/2004 11:26:50 PM] <Investortrader> This one looks good
[3/31/2004 11:27:05 PM] <bbmd> IT would U share chart,lost connection.Thx.
[3/31/2004 11:27:09 PM] <parkwaypet> I missed tge 1st nmive early in march so was on watchlist for next as it looks like a stepper
[3/31/2004 11:27:21 PM] <Investortrader> Oops, thanks bbmd
[3/31/2004 11:27:22 PM] <parkwaypet> move
[3/31/2004 11:27:43 PM] <Investortrader> It's-a steppin' alright!
[3/31/2004 11:29:32 PM] <Investortrader> It's got a good sustainable rate too
[3/31/2004 11:30:07 PM] <Investortrader> Rate of advance that is
[3/31/2004 11:30:51 PM] <Investortrader> Something without too steep an incline in price can go on for a long time without any big corrections
[3/31/2004 11:32:32 PM] <really> IT - can you comment on how you would set targets for HAUP at this time?
[3/31/2004 11:32:55 PM] <Investortrader> When the rate of climb of the price isn't so steep, I use a different rule than the 3-4 day stall .. that's for those that are more parabolic in nature
[3/31/2004 11:33:42 PM] <Investortrader> Here I would use more of a price stop-loss rather than a time stop-loss which the 3-4 day stall is
[3/31/2004 11:34:04 PM] <Investortrader> Any questions on INTV?
[3/31/2004 11:34:15 PM] <parkwaypet> Is that price rate of change
[3/31/2004 11:34:53 PM] <Investortrader> I'm looking at the angle of ascent parkwaypet .. not the official ROC indicator
[3/31/2004 11:35:09 PM] <parkwaypet> ty IT
[3/31/2004 11:35:13 PM] <Investortrader> Don't want to confuse anyone reading the logs later :)
[3/31/2004 11:35:21 PM] <SkyDragon> IT, could you look at WMB
[3/31/2004 11:35:43 PM] <Investortrader> On to HAUP looking for targets ...
[3/31/2004 11:36:21 PM] <Investortrader> First thing I'm doing here is going to longer time frames looking for any previous highs
[3/31/2004 11:36:54 PM] <IncaKid> jdsco
[3/31/2004 11:37:07 PM] <Investortrader> Since it's breaking out to new highs here, need to go back to look for any resistance for possible targets (as one method)
[3/31/2004 11:37:40 PM] <IncaKid> sorry I am behind
[3/31/2004 11:37:49 PM] <Investortrader> No worries :)

[3/31/2004 11:38:50 PM] <Investortrader> All the way back in '00 hmmmmm
[3/31/2004 11:39:28 PM] <Investortrader> I've changed to a weekly chart to look at '00
[3/31/2004 11:39:54 PM] <Intuitive> Great teaching tonight, IT! Good night.
[3/31/2004 11:40:03 PM] <Investortrader> Night Intuitive :)
[3/31/2004 11:40:52 PM] <Investortrader> The week of 9/5/00 had a swing high of 10 ... with the low of that week being 8.50
[3/31/2004 11:41:22 PM] <Investortrader> Going back to the current daily chart
[3/31/2004 11:42:07 PM] <Investortrader> It's hit that 8.50 target
[3/31/2004 11:42:28 PM] <Investortrader> This one notice the ascent is steeper
[3/31/2004 11:42:55 PM] <Investortrader> If I were in from the BO, this is the type of chart I would use the 3 day stall on for selling
[3/31/2004 11:43:31 PM] <Investortrader> I might have to rename that as a 3 day stall is ok, just not much more, by day 4 I'm looking to get out
[3/31/2004 11:44:27 PM] <Investortrader> Though sometimes I am out on day 3
[3/31/2004 11:44:38 PM] <Investortrader> For this one I would use that approach
[3/31/2004 11:45:13 PM] <Investortrader> Though after a double many people will take profits, and it has doubled from it's recent base lows
[3/31/2004 11:45:31 PM] <Investortrader> Especially since it doubled to get up to that base
[3/31/2004 11:46:26 PM] <Investortrader> Any questions on HAUP?
[3/31/2004 11:46:29 PM] <really> This pause right now though is on reduced volume. And we seem to be in an up period for the marker
[3/31/2004 11:46:44 PM] <really> market
[3/31/2004 11:46:50 PM] <Investortrader> True, the price/vol pattern is still ok on it
[3/31/2004 11:47:13 PM] <Investortrader> OBV is a bit whacky looking on it however
[3/31/2004 11:47:15 PM] <really> Thanks for your input. I have problem with targets in these types situations
[3/31/2004 11:47:22 PM] <Investortrader> Welcome really :)
[3/31/2004 11:48:13 PM] <Investortrader> If it loses contact with the upper band for too long, that's my 3-day stall sell technique, that 3rd day out of contact you need to start looking to sell that day or the next unless it can get back to the upper BB on some vol
[3/31/2004 11:48:14 PM] <really> Looking at OBV it is whacky for sure
[3/31/2004 11:48:40 PM] <Investortrader> On to WMB ...
[3/31/2004 11:51:16 PM] <Investortrader> OBV does look ok here ... but before I'd buy it I would want to see it BO over the 50sma with some vol as long as it's so close here
[3/31/2004 11:51:42 PM] <Investortrader> IT broke under the 50sma in Feb and tested it in early March
[3/31/2004 11:52:04 PM] <Investortrader> And has been making higher lows and lower highs since
[3/31/2004 11:52:10 PM] <parkwaypet> IT your approach is very cool, sensible and easy to follow ty and off to bed
[3/31/2004 11:52:22 PM] <Investortrader> Thanks parkwaypet :)
[3/31/2004 11:52:45 PM] <Investortrader> So we have two things pulling at it here
[3/31/2004 11:52:52 PM] <Investortrader> In opposite directions
[3/31/2004 11:53:06 PM] <Investortrader> Which is why I'd wait for it to BO before buying it
[3/31/2004 11:53:41 PM] <Investortrader> Because if it breaks down, it could get ugly
[3/31/2004 11:55:06 PM] <Investortrader> Though if I wanted to take a risk on it, I'd use just under the recent swing low on 3/24 - 3/25 as a stop
[3/31/2004 11:55:14 PM] <Investortrader> Or if I already owned it here
[3/31/2004 11:55:52 PM] <Investortrader> Any questions on WMB?
[3/31/2004 11:56:12 PM] <bbmd> SWK if U have time.Thx.

ClubHome

[3/31/2004 11:56:22 PM] <Investortrader> On to SWK .. last one for the night

[3/31/2004 11:57:26 PM] <Investortrader> This looks like it gapped down on the downgrade news and came back nicely all day

[3/31/2004 11:58:13 PM] <Investortrader> OBV has been leading the way to new highs

[3/31/2004 11:58:38 PM] <Investortrader> See how it broke out to new highs before the price did

[3/31/2004 11:59:16 PM] <Investortrader> From 3/17 to 3/23 .. that was an indicator of accumulation ... always nice to see OBV leading like that
