[12/23/2003 9:17:47 PM] [stocks4me] anybody has any idea about RImm for tomorrow?

[12/23/2003 9:20:47 PM] [albertd] Yes RIMM is a good candidate for shorts

[12/23/2003 9:21:53 PM] [stocks4me] RIMM for tomorrow, any guesses?

[12/23/2003 9:22:33 PM] [Riverlily] see if your broker can find some for u to short after 10 am on friday.

[12/23/2003 9:24:01 PM] [stocks4me] why after 10.0 a.m. on friday?

[12/23/2003 9:24:03 PM] [Investortrader] No guesses here

[12/23/2003 9:25:03 PM] [cobralso] Riverlily Are you shure you are 16+

[12/23/2003 9:25:45 PM] [albertd] Not exactly.but the next couple of trading sessions wich are short ones untill 1 o clock my guess is around 3 to 4 dollars.

[12/23/2003 9:25:53 PM] [Riverlily] Usually takes 3 days for flury of excitement to wear off. Final retail investor flury could be am of 3rd day then mm's take it back down.

[12/23/2003 9:26:01 PM] [Investortrader] Anyone up for some charts?

[12/23/2003 9:26:24 PM] [Riverlily] Yep way plus...

[12/23/2003 9:27:49 PM] [cobralso] how about PDLI

[12/23/2003 9:27:59 PM] [Investortrader] PDLI ...

[12/23/2003 9:28:49 PM] [Investortrader] Upgraded today plus some good news

[12/23/2003 9:29:20 PM] [albertd] Good MS

[12/23/2003 9:29:21 PM] [Investortrader] Up on some increasing volume, I think Hotto played this one today

[12/23/2003 9:30:06 PM] [Investortrader] OBV lagging a bit but that could change with another up day ... volume may be light .. holiday session

[12/23/2003 9:31:01 PM] [Investortrader] Looking at the 5's, if I wasn't in already I'd look for a bit of a pb to get it ...

[12/23/2003 9:31:46 PM] [Investortrader] Notice the opening 5' bar, high of around 17.50

[12/23/2003 9:32:04 PM] [Investortrader] The pb near 11 was to around 17.50

[12/23/2003 9:32:31 PM] [Investortrader] And when it drifted lower in the 2 o'clock hour, 17.50!

[12/23/2003 9:32:55 PM] [Investortrader] That is where I'd look to be getting in most likely

[12/23/2003 9:33:28 PM] [Investortrader] It does have a nice rounded bottom for Dec after the spike up on the daily

[12/23/2003 9:34:17 PM] [Investortrader] And on 12/2, hod was ... 17.50 ... lots of chart points at

ClubHome

that number

[12/23/2003 9:34:29 PM] [Investortrader] That was the day after the spike up

[12/23/2003 9:36:06 PM] [Investortrader] Though if it is going up on big volume (probably won't happen on a shortened holiday session, but you never know) I'd buy stop it around 17.90 or so if you really want to be in it

[12/23/2003 9:37:50 PM] [Investortrader] I'd use a smaller than normal position if you buy-stop it. Holiday trading is always tricky this week

[12/23/2003 9:38:12 PM] [Investortrader] I do like the increased vol on it today

[12/23/2003 9:38:20 PM] [Investortrader] And MACD Histogram has turned up also

[12/23/2003 9:39:03 PM] [Investortrader] I may try for it just over 17.50 but I won't be buy-stopping it I don't think

[12/23/2003 9:43:21 PM] [newbee] investortrader how about FOSL

[12/23/2003 9:43:30 PM] [Investortrader] FOSL ...

[12/23/2003 9:45:00 PM] [Investortrader] This one looks ok ... it recently bottomed 12/10 12/11 .. then

[12/23/2003 9:45:14 PM] [Investortrader] 12/16 came down to test that bottom

[12/23/2003 9:45:35 PM] [Investortrader] First bottom was outside the lower Bollinger Band while second bottom wasn't ... same for OBV

[12/23/2003 9:45:58 PM] [Investortrader] So we had a nice positive divergence then

[12/23/2003 9:46:46 PM] [Investortrader] Overall OBV is back up to it's highs while price isn't yet, meaning accumulation has been taking place

[12/23/2003 9:47:47 PM] [Investortrader] And it had pretty good volume today closing above the open and up near the top end of the daily bar

[12/23/2003 9:48:50 PM] [Investortrader] Usually when price is supported by OBV like this, and it bounces off the lower band like it has with a sucessful re-test ...

[12/23/2003 9:49:11 PM] [Investortrader] It will run up to the upper band (which is coming down now)

[12/23/2003 9:49:48 PM] [Investortrader] Looks like the recent swing high on 12/15 will be easily overcome which would clear the way to the upper band

[12/23/2003 9:50:03 PM] [Investortrader] That high is 28.19, not too far away

[12/23/2003 9:50:46 PM] [Investortrader] To be very safe you could buy it at 28.25 ... but I think it could be bought before that ... let's look at the 5's

[12/23/2003 9:51:27 PM] [Investortrader] Looks like 27.60 was good support most of the day today

[12/23/2003 9:51:59 PM] [newbee] great ,thanks for your time

[12/23/2003 9:52:07 PM] [Investortrader] Welcome newbee :)

[12/23/2003 9:52:50 PM] [Investortrader] Might try for a 20 cent pullback to buy it also, to just over that support

ClubHome

[12/23/2003 9:53:45 PM] [Investortrader] And then add to it around that 28.25 level
[12/23/2003 9:57:41 PM] [Investortrader] Could someone check my note on ITIG and see if there is a reply to it that looks like a question to be answered ... I can't view my own note without crashing to dekstop!
[12/23/2003 9:57:48 PM] [Investortrader] Desktop that is
[12/23/2003 9:58:02 PM] [Investortrader] And I know there are 4 replies to it

[12/23/2003 10:07:50 PM] [Investortrader] cobralso, when you read it was the note stretched way out to the right?
[12/23/2003 10:08:59 PM] [Investortrader] w2jc tc-mailed me saying he reported it on the bug website as it ran way over on the right when he looked at it, with a tiny chart
[12/23/2003 10:09:13 PM] [cobralso] No short note!
[12/23/2003 10:11:02 PM] [Investortrader] Short? Hmmmm, did you see the long addendum describing the chart action?
[12/23/2003 10:11:32 PM] [cobralso] You have to open up the page to read your notes anyway
[12/23/2003 10:11:48 PM] [Investortrader] I wish I could read my own note! lol
[12/23/2003 10:12:00 PM] [cobralso] Me too
[12/23/2003 10:12:58 PM] [Investortrader] From now on I'll make them all short, and just do multiple notes on each one if it will be long, a new note every day for a few days
[12/23/2003 10:13:26 PM] [cobralso] Yes saw addendum

[12/23/2003 10:17:23 PM] [america] thanks honey. i use win98se also.

ClubHome

[12/23/2003 10:17:47 PM] [cobralso] Long notes don't work well because , can't see note and chart at the same time to follow along. So the note loses meaning

[12/23/2003 10:18:03 PM] [Investortrader] That might be the problem, hmmm, I told tech support but they didn't seem to think it was that ... but who knows

[12/23/2003 10:18:11 PM] [pope39c] I had the very same trouble. TCNet pulls down half of the resources in Windows 98SE. If I had more than one page it crashed. I changed to Windows XPpro and no more trouble

[12/23/2003 10:18:39 PM] [Investortrader] Might be time to upgrade .. I only have 256 RAM also

[12/23/2003 10:18:54 PM] [america] i do not think win98se is the problem at all. memory shouldn't be the problem here either.

[12/23/2003 10:19:21 PM] [america] i also tried clicking onto your profile and the same thing happened.

[12/23/2003 10:19:29 PM] [america] i.e., i crashed.

[12/23/2003 10:19:50 PM] [Investortrader] Same here, no matter where I tried to look at that note I crash

[12/23/2003 10:19:54 PM] [pope39c] With 98se I could load only TCNet. Nothing else. That would run about 20 minutes and crash. Now with XPpro I can run 10 windows with the same computer and no problem

[12/23/2003 10:20:17 PM] [america] i can run anything, no problem.

[12/23/2003 10:20:36 PM] [Investortrader] I run TCNet, SSPRO, e-signal, and a couple of browser pages no problem ... but I can't see my note even if TCNet is only thing running

[12/23/2003 10:20:59 PM] [america] and i don't get the computer viruses that xp gets

[12/23/2003 10:21:47 PM] [america] investortrader, have a good one. and if i don't see you tomorrow, merry christmas.

[12/23/2003 10:22:04 PM] [Investortrader] America, just sent you tc mail .. and happy holidays :)

[12/23/2003 10:22:08 PM] [pope39c] Wish I knew what to help you but I don't. Sorry

[12/23/2003 10:22:31 PM] [america] ty. will give it a couple minutes and check.

[12/23/2003 10:22:43 PM] [starrbucks] Hi Investortrader....I tried looking at your note under your profile....TCNET crashed..weird????is that what you are talking about...)

[12/23/2003 10:23:30 PM] [Investortrader] Yes starrbucks, exactly! Do you run Win98SE?

[12/23/2003 10:23:58 PM] [w2jc] IT ... is this the only note that you have posted that has these problems? if so, have you tried to post the text and chart to a new note?

[12/23/2003 10:24:21 PM] [Aktony] Investortrader, I just tried to read your note. I have 1gig of RDRAM (Rambus) and Windows XP. It froze the screen and when I tried to close the window, it kicked me off TCNet. What are you drinking...or smoking! That's powerful stuff.

[12/23/2003 10:24:21 PM] [Investortrader] Jim .. read your tc-mail and replied to it ... it's the only note I have ever written ...

[12/23/2003 10:24:35 PM] [Investortrader] Hehehe Aktony!

[12/23/2003 10:25:00 PM] [bobpan] Anyone... which of the symbol choices given in the symbol lookup is the S & P 500 that Hotto uses for analysis?

[12/23/2003 10:25:03 PM] [w2jc] do you have the text of the note saved somewhere else? you must, if you just emailed it!! try posting it with a different date and see if the same thing happens

[12/23/2003 10:25:21 PM] [america] it, got your tcmail. thank you. hehehe.aktony, u r funny.

[12/23/2003 10:25:29 PM] [Investortrader] Jim, I have it saved as a text file

[12/23/2003 10:25:47 PM] [Investortrader] When I did it first time as one long note, same thing happened

[12/23/2003 10:25:48 PM] [Scanner] SP-500

[12/23/2003 10:26:06 PM] [Investortrader] Then I did it as a short note and it was ok ... but adding the long addendum got me crashing again

[12/23/2003 10:26:40 PM] [bobpan] Scanner.. that doesn't bring anything up

[12/23/2003 10:26:42 PM] [america] also a problem with your template. when i looked at it yesterday, your red bb lines were gone. it looked strange to me. just remembered.

[12/23/2003 10:26:58 PM] [qqqtheo] question for anyone--with tc2000 prices are 20 minutes delayed--with tcnet prices are real time--does that mean you can start doing an update at 9:31am ET?

[12/23/2003 10:27:00 PM] [Investortrader] Hmmmm, those should still be there

[12/23/2003 10:27:10 PM] [Investortrader] Here's my template ...

[12/23/2003 10:27:16 PM] [Scanner] just one dash

[12/23/2003 10:27:31 PM] [Investortrader] Hmm, don't see it shared

[12/23/2003 10:27:32 PM] [RkyMtnFool] You got me curious. I looked at the note & chart. The program was very balky and I need the whole screen to see the note in full, with a tiny chart beside it. Didn't crash, but sure misbehaved. I'm running XP Pro w 512 meg.

[12/23/2003 10:27:51 PM] [Investortrader] qqq, no, you need to wait some before updating

[12/23/2003 10:28:21 PM] [bobpan] Got it . ty scanne. Leaving the dash out was the problem

[12/23/2003 10:28:21 PM] [Investortrader] From now on only short notes! And I'll just make a bunch of them one day after the next till I finish that thought

[12/23/2003 10:28:22 PM] [w2jc] two things bothered me when i tried to look at it last night (i'm running Win2k Pro) ... the chart was about 1/4 of the chart area ... the text was much wider than the text window (i've never seen a note in the past that ever had a variable text area or a slider on right side of that area... you aren't using the beta tcnet are you? third thing is that my cpu pegged at 100% ... usually the only time that happens is if something is running the Java stuff ...

[12/23/2003 10:28:50 PM] [qqqtheo] what is earliest time one can update?

[12/23/2003 10:28:52 PM] [Investortrader] No beta here

[12/23/2003 10:29:12 PM] [Investortrader] Gimme a few seconds to e-mail it to starrbuchs and Aktony

[12/23/2003 10:29:48 PM] [america] qqqttheo, you have to wait about 20+ minutes for your first update. hit the question mark and ask support in the a.m.
[12/23/2003 10:30:12 PM] [Aktony] qqqttheo, update the night before, or before the market opens. Then, on TCNet, you get the quote/prices as they occur after the bell. I use the one minute chart and it appears in real time.

[12/23/2003 11:14:50 PM] [Borankin] I envy you westerners. When I get to Montana, all I do is shovel and spread horse manure, throw the frisbee to the dogs, drink gallons of water, loose about 10 pounds, feel great. Then come home to Miami and eat like a pig again.

[12/23/2003 11:15:16 PM] [anaiz] lol

[12/23/2003 11:15:22 PM] [Investortrader] Montana has some gold areas

[12/23/2003 11:15:50 PM] [cobralso] NV is good. nobody wants to go to Ca these days

[12/23/2003 11:16:26 PM] [Borankin] I'll ask my son-in-law about gold in Montana. He'll know for sure. I'll let you know, Investortrader.

[12/23/2003 11:17:57 PM] [Odyssey] Hey Investor when you mentioned Johannesburg a while back, did you possibly mean Randsburg?

[12/23/2003 11:18:08 PM] [Investortrader] I'm trying to think of the towns there .. virginia city I know is one

[12/23/2003 11:18:20 PM] [Investortrader] No Odyssey, the one in California

[12/23/2003 11:19:02 PM] [Investortrader] Oh, randsburg is in California also, it's near johannesburg I think

[12/23/2003 11:19:13 PM] [Investortrader] A bit to the north of it?

[12/23/2003 11:19:22 PM] [Investortrader] Where's my map! lol

[12/23/2003 11:19:37 PM] [Odyssey] Yes Virginia City MT is a good placer site. Also check out the areas between Deer Lodge and Ellison, MT

[12/23/2003 11:20:14 PM] [Odyssey] Yeah, Randsburg is a classic gold district in SE CA

[12/23/2003 11:20:40 PM] [cobralso] No CA the locals will shoot at you if you dredge their gold american river.

[12/23/2003 11:20:56 PM] [Investortrader] Gota be careful not to claim jump :)

[12/23/2003 11:24:05 PM] [cobralso] FLASH FLOODS

[12/23/2003 11:24:43 PM] [Odyssey] Flash floods possible in the summer, but pretty unlikely this time of year

[12/23/2003 11:26:53 PM] [cobralso] In Ransberg you get flash floods when it rains. That is this time of year

[12/23/2003 11:28:17 PM] [Odyssey] Perhaps, but it takes real thunder storms East of the Sierra to do much flooding. They are not frequent this time of year.

[12/23/2003 11:29:40 PM] [HowNow] First United States case of mad cow disease confirmed near Yakima, Wash. Expect huge market impact tomorrow morning.

[12/23/2003 11:50:27 PM] [Odyssey] Thanks Investor for the CNBC note ... back to your question on the ITIG postings. I can see 4 responses to yopur note and addendum. I'm running Windows XP media edition on an HP 873n tower machine. [12/23/2003 11:51:36 PM] [Investortrader] I'll try that before I leave, then check it and if I get tossed just go to bed lol
