[12/5/2003 8:21:54 AM] [greggster7] bunch of data due out today...

[12/5/2003 8:21:59 AM] [hotto] WFII. dipped to 13.46 yesterday.. barely into a buy-back range.. volume getting quiet now

[12/5/2003 8:22:19 AM] [DMut] got some

[12/5/2003 8:22:20 AM] [TraderJoe] What high and low points are used to determine Fib

[12/5/2003 8:22:38 AM] [Fannye] ITIG interesting HOTTO, you post the Fibs and immediately 100 shares trade @4.2 on quotetracker.

[12/5/2003 8:23:33 AM] [hotto] I posted the fibs yesterday on ITIG.. to give us all an idea of what other traders may be looking at.

[12/5/2003 8:23:55 AM] [beach] gmjonn

[12/5/2003 8:23:59 AM] [EZmoney] 4.20 was there before the post

[12/5/2003 8:24:17 AM] [beach] :)

[12/5/2003 8:24:48 AM] [TraderJoe] Which high and low points are used to determine current Fib #'s?

[12/5/2003 8:24:58 AM] [beach] jnovl

[12/5/2003 8:25:56 AM] [hotto] ITIG.. since it was turned back on Wed.. has an appearance of a dbl-top... (not the only interp.)

[12/5/2003 8:26:12 AM] [hotto] But.. If that is the one you consider...

[12/5/2003 8:26:59 AM] [hotto] Then... I took the whole rally from 9/30 to 12/3

[12/5/2003 8:27:18 AM] [hotto] Low=1.77... High = 6.55

[12/5/2003 8:27:47 AM] [hotto] ITIG.. some credibility to that view.. since.. Fib.382 = 4.72..

[12/5/2003 8:27:58 AM] [TraderJoe] ty, Hotto

[12/5/2003 8:28:24 AM] [hotto] note.. the series of prices.. near 4.70 in late November

[12/5/2003 8:29:24 AM] [hotto] also.. the 11/6 LOD=4.24.. near the 4.16 Fib.500..

[12/5/2003 9:25:08 AM] [Oregongeordie] NTGR, a G+ stock up big in PM this morning on positive news out of China.

[12/5/2003 9:25:10 AM] [tinaSDtrader] THis is where it pays to keep an eye on indexes. SOX--X the dble top forming is very apparent, see this and drill down to the component stocks.

[12/5/2003 9:25:48 AM] [tinaSDtrader] But again, the dble top does not confirm until a close BELOW the bottom in btwn the two tops. If it doesn't confirm, and instead bounces there, more likely the stock is in a horiz channel.

[12/5/2003 9:26:09 AM] [micky] tina we have a triple top o nthe qqq`s

[12/5/2003 9:27:21 AM] [hotto] ITIG.. some discussion of Fibs. earlier. Tomorrow.. will review 3 date ranges I have looked at... all IT dates... to show how similar all the numbers are... Not to emphasize the differences.. but... how to find a reasonable range.. to look for some chart points to use..

[12/5/2003 9:27:44 AM] [tinaSDtrader] I don't see QQQ as a clean triple, very choppy.

[12/5/2003 9:28:33 AM] [tinaSDtrader] The cleanest tops are very symmetrical.

There are many good traders in this room. If your take the time to study and read you will learn yourself. This should be an even exchange of ideas and information. You will feel more comfortabel when you have the knowledge and make the decision on your own and not simply relying on one person. This is the best forum I have ever seen for the

[12/5/2003 12:42:22 PM] [tinaSDtrader] SINA - sorry, meant the 20ema not 10ema -
notice how it comes up and tests the 20ema, then tends to drop again. If doesn't drop
again, that is my signal.

[12/5/2003 12:50:13 PM] [Fieldcrestcf] hotto, imho the calling helps , and seeing your good results makes me anyway think how can i apply that to the current situation. As what should have i been looking at a few days ago ... or a few minutes ago to say AH HA there is an opportunity.

[12/5/2003 12:51:42 PM] [SeattleSteve] It's not that calling doesn't help, I suspect. It's that more time to think will help the whole enterprise (and all of us Hotto club members). The market is unlikely to be as "easy" going forward as it has been for us the past 7-8 months
[12/5/2003 12:52:06 PM] [SeattleSteve] My two cents -- could always be wrong

[12/5/2003 1:02:02 PM] [Fieldcrestcf] I found a note i had written about SCON in April
03 (1st week) that it looked like a good stock. Unfortunately, I didn't buy it and it is up
about 500% (5 times) ouch. Others that I have bought have been stuck in the mud .
[12/5/2003 1:02:34 PM] [tinaSDtrader] I'm taking SINA profits now and focusing long,
on 5s tho, as long as SINA keeps below the 20ema may be ok.
[12/5/2003 1:03:37 PM] [Gigantus] Field, you're not alone. I'm sick from "spotting" but

[12/5/2003 4:40:34 PM] [atexpal] i am watching the basing in jcom...stopped out for now. suspect its proximity to 200 day is source of strength as russell 2000 weakens

250 sms to get JCOM reloaded, just feel we will see the same again this year imho

[12/5/2003 4:55:44 PM] [Rob22911] sorry meant 200dsma

[12/5/2003 5:01:05 PM] [atexpal] i don't disagree on jcom and am out of the stock...the flush out on 10/20 occurred over "controversy" re: whether they guided down...may be weak until next earnings announcement

[12/5/2003 5:03:32 PM] [atexpal] seems jcom is guilty until proven innocent re: guidance

[12/5/2003 5:04:30 PM] [atexpal] i'm a 4 time loser on jcom...just a bystander now

[12/5/2003 5:07:16 PM] [Rob22911] there is a good entry in your future lol[S]

[12/5/2003 5:11:03 PM] [atexpal] as many times as i've lost on it...I would buy a breakout

[12/5/2003 5:11:28 PM] [atexpal] would be much less risk now

[12/5/2003 5:12:00 PM] [atexpal] unless they led the ceo off in "cuff" or something

[12/5/2003 5:13:38 PM] [Rob22911] ahhhhh...well my read is that once it bounces at around 22.5 or thereabouts, it will overcome resistance at 29.5 but take time to get through 32ish which is where the 50dsma will be by then. if you wait for this breakout, which is safest you miss a good part of the first move

[12/5/2003 5:15:24 PM] [Rob22911] the real price to watch is 29.39 which is the high in the basing period, until that goes we may have more down side

[12/5/2003 5:15:26 PM] [atexpal] whatever...if it livens up i will be aboard..."addicted" to pain in that one

[12/5/2003 5:16:08 PM] [atexpal] i am just looking for a breakout off of this base top its been laying
