[12/10/2003 12:02:04 AM] [Investortrader] INTC looks like it just broke
[12/10/2003 12:02:21 AM] [tiga] You really have to try to trade with the general market on these. When things started to fall apart, just nail it and ride down with the market but usually at a faster pace
[12/10/2003 12:03:30 AM] [Investortrader] INTC I see 30.70 - 30.75 but may not pop that high to short it
[12/10/2003 12:03:31 AM] [tiga] It could dance around this 50 dsma or it could just continue to tank. Time to count some sheep. good luck tomorrow

around 12/16). SPX data from 1962 says" In Decembers that actually trade on the 31st of the month (like this year) the market rises in the last 11 trading days of the month 87% of the time (26 wins, 4 losses). In Dec's that do NOT trade on the 31st the index rises in the last 10 trading days 73% of the time (8 wins, 3 losses). Combine these 2 sets and we have 34 ups and 7 downs for an 83% winning percentage."

[12/10/2003 2:17:26 PM] [malealltrash] @ 3.50 I will buy ITIG to make back some moola

[12/10/2003 2:18:16 PM] [malealltrash] keep it clean Investortrader

[12/10/2003 2:19:12 PM] [Investortrader] =D

ClubHome

[12/10/2003 2:19:17 PM] [starrbucks] mtrash...how did you come to the figure of 3.50 for ITIG???.....a point on the chart??

[12/10/2003 2:19:37 PM] [Rondon] Ha ha Male, you replacing Kuf today :D

[12/10/2003 2:20:22 PM] [malealltrash] yes I do my trading by the Kuf

[12/10/2003 2:20:30 PM] [malealltrash] and seat of pants

[12/10/2003 2:21:12 PM] [tinaSDtrader] I am thinking same about your 3.50 male - seems arbitrary, what if ITIG decides to bounce off the 50ema or sma, you'll miss the run then waiting for lower price. Not to say it can't or won't go that low, we know they can.

[12/10/2003 2:21:43 PM] [tinaSDtrader] IVAN nearing new HOD

[12/10/2003 2:21:46 PM] [malealltrash] I liked the 3.50 had a nice round ring to it news moves stocks

[12/10/2003 2:21:52 PM] [Flent] itig

[12/10/2003 2:22:23 PM] [tinaSDtrader] yes, but the market does not care about arbitrary #s, it does care about support/resistance levels. Just a thought.

[12/10/2003 2:23:07 PM] [malealltrash] that's why I rely on u Tina Love ur support

[12/10/2003 2:23:09 PM] [tinaSDtrader] Same reason why I do not use arbitrary #s for stops, as mentioned in my Sat. discussion.

[12/10/2003 2:23:59 PM] [tinaSDtrader] Understanding technical levels versus arbitrary # is a VERY important concept. It's why we use charts, to see where prices have been, held, etc.

[12/10/2003 2:24:12 PM] [starrbucks] okay...mtrash.... interested in your thoughts.....Tina's point helpful.....considering adding to ITIG position

[12/10/2003 2:24:26 PM] [tinaSDtrader] Just my opinion of course, but have learned/read, etc. from other great traders about this concept.

[12/10/2003 2:25:29 PM] [starrbucks] meet too thanks Tina.....need a basis for choice

[12/10/2003 2:25:52 PM] [Investortrader] I agree tina

[12/10/2003 2:26:04 PM] [tinaSDtrader] you all who buy ITIG while it's still a falling knife will always get a better price than me, because I don't touch it until it stops falling. Glad to give you the better price for more certainty I'm on the right side of the trade. Just my style, others have different styles.

[12/10/2003 2:26:26 PM] [malealltrash] seems to me Tina u had a choice with HITK watched that stock and it is down down down ..so what does the chart say now ?

[12/10/2003 2:26:26 PM] [rnrinvest] Anyone buying RGLD or RSTO for a bounce tomorrow ? :8

[12/10/2003 2:26:46 PM] [mweathers] Already bought RSTO

[12/10/2003 2:27:19 PM] [tinaSDtrader] According to my chart HITK is in an uptrend, 10ema above 20ema. I am not down much at all. How can you even compare how

ClubHome

HITK is sitting to what ITIG is doing?

[12/10/2003 2:27:42 PM] [malealltrash] no u reading me wrong on that

[12/10/2003 2:27:42 PM] [mweathers] LAB continuing to climb

[12/10/2003 2:28:15 PM] [tinaSDtrader] ITIG may be going up intraday, on the day it is big black candle, with 10ema trying to cross below 20ema.

[12/10/2003 2:29:00 PM] [tinaSDtrader] I'm not even down 2% on HITK, so saying I am way down is relative to what you think "way" means.

[12/10/2003 2:29:13 PM] [Quintus] just a note.. i believe HITK has earnings tomorrow

[12/10/2003 2:29:23 PM] [Quintus] pre-mkt

[12/10/2003 2:29:33 PM] [Voltmus] id be careful with itig not that much support at 4.16

[12/10/2003 2:29:47 PM] [Investortrader] That's why I just nibbled here on ITIG

[12/10/2003 2:30:51 PM] [tinaSDtrader] ITIG also has not held on the 40ema or sma today, seeing now if it can hold on the 50. That is a stock in a downtrend imo, at least temporarily.

[12/10/2003 2:30:52 PM] [jbrad] ITIG daily sma50 is at 3.91 -- it's probably headed there.

[12/10/2003 2:31:28 PM] [malealltrash] bl have to go with wife to get car inspected

[12/10/2003 2:32:49 PM] [mstrader] c u male

[12/10/2003 2:32:59 PM] [tinaSDtrader] The 50ma is before the 3.50 # male mentioned, that's why I point that out. It is an important support level for ITIG.

[12/10/2003 2:33:09 PM] [Smitty] I think IVAN must know what my basis is

.....3.56.....doesn't want me to make any money today~!

[12/10/2003 2:33:10 PM] [CoveredCall] cya malealltrash...

[12/10/2003 2:34:18 PM] [mstrader] ITIG may go there today.

[12/10/2003 2:36:41 PM] [tinaSDtrader] I did not enter HITK based on 5min bars, I chose it on daily for a BTBO yesterday.

[12/10/2003 2:36:47 PM] [Investortrader] Bot VRSO 3.11

[12/10/2003 2:37:13 PM] [BossFan] If you were down over \$5K in IVAN this morning and by a miracle today, you're just about even, would you sell?

but vol not quite enough.

[12/10/2003 4:10:18 PM] [hotto] IVAN 58.8 M shares.. new high Vol closed over LR30 and ema100.. It's a start

[12/10/2003 4:10:47 PM] [tinaSDtrader] that is huge volume

[12/10/2003 4:11:10 PM] [hotto] indeed

[12/10/2003 4:11:52 PM] [tinaSDtrader] MSFT looks like closed above 200ma today on daily, that's good. This mkt wacky tho, I'm trading very cautious.

[12/10/2003 4:13:30 PM] [tinaSDtrader] Remember when MSFT was over \$50 and couldn't go any lower!! Goes to show stocks can certainly keep falling. But maybe it's found it's bottom here - time will tell

[12/10/2003 4:13:46 PM] [hotto] SLAB.. today is first chance at a bottom... . may begin base building here... or ? dip to ema200=40 ? tax-selling affects them all..

[12/10/2003 4:14:38 PM] [FirstWave] I gave a MSFT MOBO buy on 11/28 , it is still good

[12/10/2003 4:14:52 PM] [CashMan] Could IVAN do the same thing as EGHT go up today and down tomorrow and give up all it's gains?

[12/10/2003 4:15:15 PM] [tinaSDtrader] IONA - that stock loves to jump up out of the base and pull people in. Have to be careful on that one, as I mentioned earlier. But at least it held up today better than so many others.

[12/10/2003 4:15:42 PM] [tinaSDtrader] I do not own it, just commenting because some bought today.

[12/10/2003 4:16:04 PM] [Fern] SCKT came back up to 100ma and threw a long dragonfly doji, reversal??

[12/10/2003 4:16:06 PM] [tinaSDtrader] MEDI still rising in a/h

[12/10/2003 4:19:33 PM] [Fern] that is 8 straight down days for SCKT and today high volume and long legged doji, i am going to look for possible reversal day tomorrow

[12/10/2003 4:19:49 PM] [tinaSDtrader] Cash - cannot say what IVAN will do - but many have gone up and taken back the gains, EGHT, NANO, NANX. Just play safely imo.

[12/10/2003 4:20:11 PM] [tinaSDtrader] gotta run - have a great afternoon/evening all.

[12/10/2003 4:20:26 PM] [ProfitTrader] tina, have a nice evening...

[12/10/2003 4:22:57 PM] [tinaSDtrader] I am over half in cash now, unusual for me. Using it for intraday trades for now. Will load up again when like what I see. Til then, some longs still holding up, like MEDI, and good shorting opps intraday.

[12/10/2003 4:24:56 PM] [tinaSDtrader] I'm only jumping on the best long opps now, like IVAN day traded today. Maybe again tomorrow since volume so big today has attn. of many.

[12/10/2003 4:26:53 PM] [FirstWave] Join us on Voice chat, will talk about the MSFT signals last month

[12/10/2003 4:28:16 PM] [CashMan] Tina I made a nice profit on EGHT and on IVAN will keep on jumping in like you have been instructing. It has worked for me so far. Running scans first thing in the morning and working em:)

[12/10/2003 4:29:07 PM] [tinaSDtrader] I'm not instructing you on how to trade, just my observations and sometimes I'll tell what I'm doing. Need to make sure that is very clear. But glad what you are doing is working for you.

[12/10/2003 4:29:30 PM] [tinaSDtrader] I am adjusting to what current market is doing, will adjust again when a shift comes.

[12/10/2003 4:31:58 PM] [CashMan] No no miss understood or should I say worded it wrong.

[12/10/2003 4:33:07 PM] [tinaSDtrader] ok, just making sure. Don't want anyone blaming me if they trade something I mention and it doesn't go well or they don't trade it as I would. I've only recently began even discussing my specific picks for that reason.

[12/10/2003 4:34:19 PM] [CashMan] tina I am responsible for my own trades. I never blame any one except me. I pull the trigger not any one else here in tcnet. Lets get that one across. :)

[12/10/2003 4:35:14 PM] [tinaSDtrader] that's a responsible attitude cash

[12/10/2003 9:28:09 PM] [ProfitTrader] NHB, Towards the end it started to come back. Nobody is sure. over all bullish but fear of 'tax selling' will cause trading in range until bargain buying begins late Dec-early Jan.
[12/10/2003 9:29:22 PM] [Investortrader] Will be an interesting December
[12/10/2003 9:30:38 PM] [ProfitTrader] Sure will. I have reduced my exposure and risk taking. Today ended up 'no trade' day for me.
[12/10/2003 9:31:10 PM] [Investortrader] I went 90% cash middle of last week, but did buy 3 stocks today ... but smaller than normal posns
[12/10/2003 9:31:38 PM] [Investortrader] All ended up but one buy post created a bit of a ruckus in here lol
[12/10/2003 9:32:19 PM] [rsi77] was it EGHT?
[12/10/2003 9:32:32 PM] [Investortrader] Ruckus was ITIG, other two were CYPB and VRSO
[12/10/2003 9:32:50 PM] [Investortrader] ITIG has the worst daily chart which was the cause
[12/10/2003 9:33:03 PM] [rsi77] I was watching VRSO, wondering when it would turn around....are you still holding?
[12/10/2003 9:33:07 PM] [Investortrader] I may have to get out of that one tomorrow
[12/10/2003 9:33:24 PM] [Investortrader] Yes, bought this morning at 3.11, still holding .. I'm not really a daytrader
[12/10/2003 9:33:27 PM] [rsi77] You went long ITIG?
[12/10/2003 9:33:43 PM] [Investortrader] Yes, long at 4.17 which created all the debate
[12/10/2003 9:33:59 PM] [ProfitTrader] Investor, I am about 50% cash. Have not cashed out Mutual funds in 401K (yes it is still 401K and not 104K:). Will wait for clear sell signal before taking such step. May lose few % or may start pulling in steps. It is time for re-adjustment anyway.
[12/10/2003 9:34:10 PM] [Investortrader] lol, 401 not 104
[12/10/2003 9:34:21 PM] [Investortrader] I own no funds anymore
[12/10/2003 9:34:30 PM] [rsi77] yes, no wonder....I'm way overtrading lately, but I think there could be some good longs for tomorrow...lots of good buys and some have already reversed on good volume

ClubHome

[12/10/2003 9:35:03 PM] [Investortrader] ITIG I was buying some fairly strong (to me) support, could have dropped a bit more, which it did ... and it's got to prove itself tomorrow or I'll be out

[12/10/2003 9:35:29 PM] [Investortrader] Since the dialy chart isn't that great looking

[12/10/2003 9:35:34 PM] [rsi77] ITIG, if it is reversing you definately got in at the bottom...hope it works for you

[12/10/2003 9:36:00 PM] [Investortrader] True, my work gets me in early a lot of times on a move .. and it's always near support so the risk is small

[12/10/2003 9:36:17 PM] [rsi77] check out ONNN for such a trade

[12/10/2003 9:36:42 PM] [Investortrader] I wouldn't do this in a down market, but I feel the market is only drifting lower so any catalyst could turn it ... like maybe Toll Brothers very good earnings

[12/10/2003 9:37:06 PM] [rsi77] did you see PLAB today?

[12/10/2003 9:38:13 PM] [Investortrader] ITIG has been selling off on lower and lower volume also, this may have been a kind of smaller washout near support .. tomorrow will tell

[12/10/2003 9:38:28 PM] [rsi77] yep, it sure will

[12/10/2003 9:38:46 PM] [Investortrader] ONNN same thing but didn't have the bigger vol on the prior rise before this fall, and it's not near the 50-day yet

[12/10/2003 9:38:59 PM] [Investortrader] Didn't see PLAB, will look at it now

[12/10/2003 9:39:37 PM] [Investortrader] My trades are always an open book in here, in as close to realtime as I can report them ... so everyone can follow my pain if it goes down lol

[12/10/2003 9:41:15 PM] [Investortrader] Upgraded to Overweight at ThinkEquity (who are they?) target 29 on PLAB

[12/10/2003 9:41:29 PM] [rsi77] looks like big upgrade, target \$29.....maybe not HOTTO real \$\$\$ news..so I don't know

[12/10/2003 9:42:00 PM] [Investortrader] Upgrades/downgrades are only opinions, not real \$\$\$ at all

[12/10/2003 9:42:13 PM] [Investortrader] They do say 13% of float is short too

[12/10/2003 9:42:31 PM] [rsi77] some of the upgrades I read though have real \$\$ logic behind them....I don't know if that counts

[12/10/2003 9:43:04 PM] [rsi77] 13% is a good bit of covering

[12/10/2003 9:43:40 PM] [Investortrader] I think Hotto only counts real \$\$\$ news as news from the company, but not sure

[12/10/2003 9:44:17 PM] [Investortrader] lol
[12/10/2003 9:44:56 PM] [Investortrader] But that is one reason I went over that trade some, in case anyone did follow me, I think at least a few did, or they were still holding from higher prices ... I got a couple pm's on it
[12/10/2003 9:45:18 PM] [Investortrader] And saw a couple saying go ITIG in here
[12/10/2003 9:45:45 PM] [CashMan] The reason I said that is I got chewed out earlier. Because some one thought I was coping their trades.
[12/10/2003 9:45:55 PM] [Investortrader] It traded between the 50-day and the LR30 on the 5's pretty much at end of day
[12/10/2003 9:46:02 PM] [Investortrader] I saw that!
[12/10/2003 9:46:44 PM] [rsi77] Well ITIG does have real \$\$ news behind it....as long as the charts are supporting you it would seem like a good trade to get into, if you know to get out if it don't work for ya
[12/10/2003 9:47:54 PM] [Investortrader] True rsi, I don't mind taking a shot at a G+ stock in this situation, lower vol pb, possible washout at support, and only took a small original posn, not near as much as when I first bought it at 3.06
[12/10/2003 9:47:59 PM] [rsi77] I like what Tina has to say, and I pay attention to her moves....but I'm my own trader, just like everyone else

[12/10/2003 10:02:31 PM] [Aktony] Early and Premarket trading is often skewed by shorts covering which drives the price up only to fall back later. Also, float for stocks is available at Yahoo Finance. Type in the ticker symbol for a quote and then go to "key statistics."

[12/10/2003 10:03:15 PM] [Investortrader] I don't know about float numbers, but I don't like using yahoo finance because I've seen so many wrong numbers for other numbers .. mabye float is correct

[12/10/2003 10:05:03 PM] [CashMan] rsi - question- I been having a hard time to figure out if it's a false bo or what like in OCPI . Like on the 12/4. How do you all figure it out? any strageties.

[12/10/2003 10:05:16 PM] [rsi77] just curious as to what 13% short means in real numbers

[12/10/2003 10:05:31 PM] [TrillionDolarMan] STEVE WOODS...."FloatAnalysis.com".....any opinions?

[12/10/2003 10:05:39 PM] [mace] cash use FW mobo band template

[12/10/2003 10:06:19 PM] [rsi77] Cash...I think in "choppy" market it is almost impossible to know....even if very skilled...that's when skilled traders trade defensively

[12/10/2003 10:06:27 PM] [Investortrader] I want to see volume confirm any breakout

[12/10/2003 10:06:46 PM] [rsi77] but lately even volume has been deceptive in many cases

[12/10/2003 10:07:08 PM] [rsi77] TDM, read the book and subscribed to service for a time....

[12/10/2003 10:07:25 PM] [CashMan] mace can you share a the template.

[12/10/2003 10:07:53 PM] [rsi77] Float Analysis: I think I do just as well by ignoring float and paying attention to price, volume, support..etc.

[12/10/2003 10:08:07 PM] [TrillionDolarMan] How'd you like it, rsi? I take the site now, to get a feel for the float charts, and becuase it's cheaper than buying the Metastock add on, let alone the hassle of installing it...etc.

[12/10/2003 10:08:19 PM] [rsi77] I would never buy according to float without those others in agreement

[12/10/2003 10:08:40 PM] [Investortrader] I never look at float

[12/10/2003 10:09:13 PM] [rsi77] But there's obviously good reasoning behind it....as long as there aren't day traders involved....but there's lots of day traders involved

[12/10/2003 10:09:17 PM] [TrillionDolarMan] Steve had a nice short on SNDK the other day...real clean float chart, too....I go by PRICE, VOLUME, and TIME as a pseudo shaved-head, eye-of-newt-only eating, sealed room PURE TECHNICIAN...so, float is part of my world.

[12/10/2003 10:09:37 PM] [CashMan] rsi I agree look at EGHT. Good volume and today it gave it all back again. I guess I will just keep with my stragety and try to stay in cash by the end of day.

[12/10/2003 10:10:02 PM] [Investortrader] EGHT got slammed on CNBC last night again, as not being a trie VOIP

[12/10/2003 10:10:11 PM] [Investortrader] true VOIP

[12/10/2003 10:10:12 PM] [TrillionDolarMan] I can hear your point, rsi.....that's why I'm checking it out.....to see if I can determine any of the parameters functionally...

[12/10/2003 10:10:26 PM] [rsi77] Cash, I think that during a good general market thrust you can trust volume breakouts most of the time...as long as other things are OK

[12/10/2003 10:10:27 PM] [mace] cash look at CAFE my shared chart

[12/10/2003 10:10:38 PM] [CashMan] mace thanks I do have that template.

[12/10/2003 10:11:05 PM] [TrillionDolarMan] FW told OZ and I to be weary of EGHT, just as he said about similar pattern on IVAN...and, he's right seems like...chart beats CNBC to the punch according to a good set of experienced eyes...

[12/10/2003 10:11:28 PM] [mace] price above 10.8 BB's

[12/10/2003 10:11:27 PM] [rsi77] My experience with Steve was that he had seasons

ClubHome

of lots of good hits....then I started trusting it...but the seasons change....

[12/10/2003 10:12:36 PM] [mace] soap buy on 12/1

[12/10/2003 10:13:03 PM] [rsi77] TDM, use it...but don't ignore what you already know

[12/10/2003 10:13:38 PM] [CashMan] mace I see the difference.

[12/10/2003 10:14:05 PM] [rsi77] So what is "soap" buy...I hear it all the time?

[12/10/2003 10:14:16 PM] [Investortrader] Breakouts, gotta have volume, gotta buy near the breakout point, and be quick to take your loss if it drops back down thru the breakout to keep it small

[12/10/2003 10:14:44 PM] [mace] see my shared chart

[12/10/2003 10:14:48 PM] [rsi77] Yeah, but too many small losses add up , it it aint the season for follow through

[12/10/2003 10:14:57 PM] [rsi77] ..if it aint...

[12/10/2003 10:15:00 PM] [tiga] .

[12/10/2003 10:15:52 PM] [rsi77] is that for me Mace?

[12/10/2003 10:15:54 PM] [mace] PNRA soap and first day up

[12/10/2003 10:17:05 PM] [CashMan] mace would you be buying now or would you wait until it breaks out above the momo bands?

[12/10/2003 10:17:18 PM] [rsi77] Wow, PLAB, 95% held by institutions, 9.4% held by insiders...must be some extra shares there...

[12/10/2003 10:17:23 PM] [mace] which stock cash Cafe?

[12/10/2003 10:17:41 PM] [CashMan] mace sorry the PNRA chart

[12/10/2003 10:19:20 PM] [mace] look at shared chart on PNRA lower two windows when green crosses yellow from oversold

[12/10/2003 10:19:53 PM] [armiller] Mace - how well do you get the signals?

[12/10/2003 10:20:04 PM] [mace] PNRA will have to get above BB's on upper window and get thru those moving avergaes

[12/10/2003 10:20:33 PM] [armiller] because I would love to ask a few questions if you really understand FW's SOAP stuff

[12/10/2003 10:20:51 PM] [rsi77] So PNRA not yet a soap buy...is that it?

[12/10/2003 10:20:58 PM] [rsi77] Or it is now?

[12/10/2003 10:21:18 PM] [mace] as long as price doesnt drop below BB's 1st window preferably stayes above BBs trens should continue, but depends on where the moving averages are above price

[12/10/2003 10:21:44 PM] [mace] also volume

[12/10/2003 10:22:02 PM] [rsi77] Looks like PLAB's volume today could have taken care of all that short covering....but I'm sure that not all of it was short covering....but if I were short I definately would have covered

[12/10/2003 10:22:29 PM] [RTW777] Speaking of BBs... what are the settings?
[12/10/2003 10:22:47 PM] [mace] Plab is a soap and price is above MOMO bands
buy on BO over 200ma
[12/10/2003 10:22:53 PM] [Investortrader] 20,20 ... though I think in TCNet you need
to put 20,200 to get that
[12/10/2003 10:23:14 PM] [Investortrader] Oh, I mean 20,2, but need to put in 20,20
[12/10/2003 10:23:28 PM] [mace] FW uses 10,8 for MOMO bands, Hotto uses 20,20
[12/10/2003 10:24:12 PM] [mace] PLAB stop right on 200 ma
[12/10/2003 10:24:13 PM] [rsi77] So Hotto uses actual 20, 20, right....so you need to
put in 20, 200?
[12/10/2003 10:24:14 PM] [Investortrader] Its 20-day simple mvg avg and 2 standard
deviations, as John invented them ... been using them since he did .. I put them on
price and OBV
[12/10/2003 10:24:43 PM] [Investortrader] He uses 20,2 but in TCNet you need to put
in 20,20 to get the 2 std devs
[12/10/2003 10:24:49 PM] [mace] 20 period 20 width
[12/10/2003 10:24:55 PM] [rsi77] I was always confused about that...thanks
[12/10/2003 10:25:44 PM] [rsi77] well I gotta go do some other stuff now...nice talkin'
to y'all
[12/10/2003 10:25:55 PM] [Investortrader] Nigth rsi
[12/10/2003 10:26:06 PM] [rsi77] May Hotto be resting comfortably
[12/10/2003 10:26:33 PM] [mace] If PLAB BO over 200 MA then next target 500 MA
about 19.25
[12/10/2003 10:26:34 PM] [CashMan] rsi have a good night.
[12/10/2003 10:26:56 PM] [rsi77] thanks IVT, thanks MACE, see ya Cash
[12/10/2003 10:27:06 PM] [HamFon] If you're referring to the "Width" setting for
Bollinger Bands, that's the Standard Deviation ... in 10ths. Default Bollinger Bands
use 2 SDevs - so you'd enter 20 there.
[12/10/2003 10:27:06 PM] [mace] night
[12/10/2003 10:27:19 PM] [armiller] Mace - can we talk about your PLAB example?
You get a SOAP template buy on 11/19 and confirmation on 12/9? Correct?
[12/10/2003 10:27:49 PM] [Investortrader] Thanks HamFon, I had put in 2 first time
and wondered why it looked so funny, before figuring I needed to use 20
[12/10/2003 10:27:50 PM] [armiller] Do you ignor the soap template sell signal on
12/3?
[12/10/2003 10:28:22 PM] [HamFon] Yah, Investor... VERY narrow BBands with
SDev setting of 2 (which is 0.2)!
[12/10/2003 10:28:40 PM] [Investortrader] I noticed! lol

[12/10/2003 10:28:54 PM] [mace] yes arm on PLAB

[12/10/2003 10:30:59 PM] [armiller] Mace - Thanks, I've been trying to figure that out for a while - what to do about the crossover of the template signals and whether I should count or ignore them

[12/10/2003 10:31:44 PM] [CashMan] mace thanks for the insight on fw soap buy signals.

[12/10/2003 10:31:49 PM] [mace] see shared chart on PLAB

[12/10/2003 10:32:27 PM] [mace] window 2 and 3 soap signals and window 1 MOBO bands

[12/10/2003 10:33:12 PM] [mace] I think Plab may move tomorrow will buy))# over todays hi

[12/10/2003 10:33:15 PM] [Investortrader] Top window looks kind of busy

[12/10/2003 10:33:23 PM] [mace] .03 over HI Plab

[12/10/2003 10:33:49 PM] [armiller] Mace I copied your template and see it, but I do not see any attention paid to volume, so I modified my own to include volume bars

[12/10/2003 10:33:55 PM] [mace] all the averages are important as they are support or resistance

[12/10/2003 10:34:13 PM] [mace] PLab vol was great today

[12/10/2003 10:35:23 PM] [armiller] How does the bottom chart confirm (or not confirm) the middle chart?

[12/10/2003 10:36:28 PM] [Investortrader] McGovern ... it wasn't my mistake I lost, it was the mistake of the voters lol

[12/10/2003 10:37:44 PM] [mace] green and yellow should be in oversold area and when yellow crosses greean it is a soap as far as I understand it, someone correct me if wrong

[12/10/2003 10:38:51 PM] [armiller] Mace - I presume you are referring to the bottom chart?

[12/10/2003 10:39:26 PM] [armiller] I kinda get the middle chart as it relates to buy/sell signals

[12/10/2003 10:40:09 PM] [mace] Both

[12/10/2003 10:40:25 PM] [CashMan] mace HSKA may turn into a soap buy tomorrow? Both middle and bottow windows the yellow starting to cross over the green.

[12/10/2003 10:41:10 PM] [armiller] OK!!! and thanks for the lesson. Some of these guys that created these templates are really sharp!

[12/10/2003 10:41:18 PM] [mace] HSKA yes may but still below MOBO bands in window 1

[12/10/2003 10:42:16 PM] [techlord61] hotto are you there?

ClubHome

[12/10/2003 10:42:22 PM] [armiller] so true SOAP would require tagging of upper MOBO band?

[12/10/2003 10:43:06 PM] [mace] NO, but it need to be inside the bands and it it moves above bands trend should continue

[12/10/2003 10:43:11 PM] [Investortrader] Hotto is taking the night off to rest

[12/10/2003 10:43:34 PM] [techlord61] PSRC opinon.....please

[12/10/2003 10:43:41 PM] [mace] I think Soap and MOBO are two different studies

[12/10/2003 10:44:03 PM] [CashMan] mace Okay I see what you are talking about. I understand more now thanks. sorry to bother you. I'll let you get back to what you doing before I bothered you:) and again thanks for the quick lesson

[12/10/2003 10:44:13 PM] [armiller] I hate to test your patience - close inside the bands, completely inside?

[12/10/2003 10:44:29 PM] [armiller] just trying to get your read on this

[12/10/2003 10:44:38 PM] [techlord61] new company i think it may be good for 30.00target test

[12/10/2003 10:45:30 PM] [mace] look at Plab, note price moving above MOMO bands, thats what you want as long as it doesnt drop below trend should continue vol necessary of course

[12/10/2003 10:46:45 PM] [armiller] mace - that's why I added volume bars to my template - what do you do to track vol on this kind of chart?

[12/10/2003 10:47:50 PM] [mace] I just go to another template same as this but I change window 3 to volume

[12/10/2003 10:48:35 PM] [armiller] Mace - I am most grateful for your time and instruction!! I hope I can return the favor to someone, someday!!

[12/10/2003 10:48:38 PM] [Investortrader] Checking PSRC

[12/10/2003 10:48:50 PM] [mace] yw arm

[12/10/2003 10:49:37 PM] [Investortrader] PSRC not really enough data for me to comment, sorry

[12/10/2003 10:55:06 PM] [hud] .

[12/10/2003 10:56:08 PM] [bmweyrauch] FALC - gettin' pinched by BB....ready for a move one way or t'other :)

[12/10/2003 10:56:40 PM] [Flent] looking at NHB, noticed October highs (thru the 27th) and November lows are at 2070, should be strong resistance and maybe a good place for market to turn up.

[12/10/2003 10:56:53 PM] [Investortrader] Looks like it might be to the upside bmw

[12/10/2003 10:57:12 PM] [Investortrader] Nice OBV while treading water here

[12/10/2003 10:57:21 PM] [bmweyrauch] FALC - I agree...likely turn up

[12/10/2003 10:57:47 PM] [Investortrader] MACD histogram and RSI also hint that the

[12/10/2003 10:58:06 PM] [Investortrader] Flent, homebuilders should be up tomorrow which will help NHB too

[12/10/2003 10:59:14 PM] [bmweyrauch] symbol for Flent ??

[12/10/2003 10:59:16 PM] [Investortrader] Going to go over my 3 buys of today now for those who followed me in ... ITIG already covered a lot, just reminding it needs to go up, tomorrow! Or I'll be out

[12/10/2003 10:59:40 PM] [Flent] Investor, enough to turn market or just a short opportunity?

[12/10/2003 11:00:02 PM] [bmweyrauch] sorry Flent :)

[12/10/2003 11:00:07 PM] [Flent] symbol for Flent?? haha

[12/10/2003 11:00:34 PM] [Investortrader] We'll see tomorrow Flent, I've been of the mind that the market is drifting lower here and not really going down hard, so any catalyst could reverse that, maybe the Toll Brothers report and how the homebuilders react could do it

[12/10/2003 11:00:51 PM] [Flent] no problem Bmw, got a good laugh

[12/10/2003 11:01:03 PM] [bmweyrauch] didn't see the comma :)

[12/10/2003 11:01:09 PM] [Investortrader] Hehehe bmw

[12/10/2003 11:02:16 PM] [Investortrader] VRSO, bot at 3.11 based on double bottom possibility and much higher OBV at this bottom than last one

[12/10/2003 11:02:45 PM] [Investortrader] Also price didn't break down thru the lower BB on this bottom as it did on last one

[12/10/2003 11:03:15 PM] [rsi77] IVT, VRSO also considered a "real" IpVO player

[12/10/2003 11:03:30 PM] [Investortrader] Will add to on a DBO tomorrow if it happens looking for at least the 50-day for a target

[12/10/2003 11:03:52 PM] [Investortrader] I didn't know that rsi, that's even better, I just liked the chart setup :)

[12/10/2003 11:04:23 PM] [Investortrader] 50-day has held it back recently so I will be taking at least some profits there

[12/10/2003 11:05:09 PM] [Investortrader] It not all profits

[12/10/2003 11:05:51 PM] [Investortrader] Wish there was more vol today but might get that tomorrow especailly if it does a DBO

[12/10/2003 11:06:11 PM] [Flent] am looking at compqx on weekly and it looks like we are making a plateau. maybe a ST correction coming?

[12/10/2003 11:06:49 PM] [Investortrader] Stop on it under the lows of last bottom in late nov

[12/10/2003 11:07:29 PM] [rsi77] Or could be "trading range" followed by BO in either direction...sort of like what stocks often do on smaller timeframes.....I don't know...just

thinking

[12/10/2003 11:07:34 PM] [Investortrader] compqx, on the daily the early dec high not confirmed by OBV

[12/10/2003 11:07:53 PM] [rsi77] OBV, good point

[12/10/2003 11:08:18 PM] [Investortrader] I don't really look at weekly charts, time frame too short for them to matter to me

[12/10/2003 11:08:29 PM] [Investortrader] My trading time frame that is

[12/10/2003 11:09:06 PM] [Investortrader] My other buy today was CYPB at 13.76

[12/10/2003 11:09:29 PM] [Investortrader] This was baed on the higer vol BTBO last two days

[12/10/2003 11:09:41 PM] [Investortrader] based on

[12/10/2003 11:10:24 PM] [Investortrader] Looked like it was going to be a low vol pb today, but it ended up having some vol to it, not quite as much as the last two up days but not as low as I would have liked

[12/10/2003 11:10:54 PM] [Investortrader] OBV confirmed the breakout

[12/10/2003 11:11:26 PM] [Investortrader] should continue especailly if market reacts well to the Toll Brothers earnings

[12/10/2003 11:11:40 PM] [CashMan] BELM looks interesting. OBV looks good up on nice vol. Filled the gap back on 10/9

[12/10/2003 11:12:11 PM] [Investortrader] first scalp coule be around the highs around 15 (I'm not near as good at scalp targets as our main man Hotto is as I don't really daytrade)

[12/10/2003 11:12:59 PM] [Investortrader] If true breakout target would be around 16.5 eyeballing it, will look more carefully if it does go up

[12/10/2003 11:13:05 PM] [Investortrader] first target

[12/10/2003 11:13:22 PM] [TraderStar] Try putting the Q's on the SOAP chart .. fascinating!

[12/10/2003 11:13:46 PM] [TraderStar] Really shows how schizophrenic the market has been these past weeks ...

[12/10/2003 11:14:19 PM] [Investortrader] Because of the higher than I wanted vol today, will have to be careful if it does start to head lower

[12/10/2003 11:14:51 PM] [Investortrader] Hope anyone who followed me into any of these reads tonights chat looking for Hotto :)

[12/10/2003 11:15:00 PM] [Investortrader] On to BELM

[12/10/2003 11:15:25 PM] [TraderStar] SFY looks nice, wonder if too late to join the party...

[12/10/2003 11:16:36 PM] [Investortrader] Notes say BELM presented at some conference today, price ended near the high so must have been at least fairly good

[12/10/2003 11:17:08 PM] [Investortrader] Good vol too

[12/10/2003 11:17:21 PM] [Investortrader] OBV looking healthy

[12/10/2003 11:17:51 PM] [Investortrader] MACD histogram headed up and above zero now

[12/10/2003 11:18:11 PM] [Investortrader] And RSI should break above 20 on an advance tomorrow

[12/10/2003 11:19:13 PM] [Investortrader] LR30 very close above it, I'll be watching this one to see if it can break thru that on vol, added to my watch list for tomorrow thanks CashMan :)

[12/10/2003 11:19:45 PM] [Investortrader] quick bathroom break then I'll look at SFY

[12/10/2003 11:19:49 PM] [HOTTO] RichS has joined the club. Please welcome your new member.

[12/10/2003 11:19:55 PM] [CashMan] Investortrader you mean I'm learning :D

[12/10/2003 11:21:08 PM] [Howieeee] What you guys think of HURC chart ?. Major short, int, IT BO--- dwards and Magee would love it.

[12/10/2003 11:21:38 PM] [Investortrader] You must be CashMan! :)

[12/10/2003 11:22:00 PM] [long351] wheres the short interest, i have a .3 hurc

[12/10/2003 11:22:20 PM] [Investortrader] SFY that sector has been on a run last few days

[12/10/2003 11:22:28 PM] [long351] chart looks even better on the weekly though

[12/10/2003 11:22:35 PM] [Investortrader] NE gets a storm and that sector ran lol

[12/10/2003 11:23:14 PM] [Investortrader] Big vol and good looking OBV

[12/10/2003 11:23:27 PM] [Investortrader] But too extended here for my taste

[12/10/2003 11:24:19 PM] [bmweyrauch] Investor - may I ask what RSI setting are you using for swings?

[12/10/2003 11:24:35 PM] [Investortrader] Just the standard 14

[12/10/2003 11:25:20 PM] [Investortrader] But RSI is not one of my main indicators, comes below price and vol pattern, and OBV, and BB's onthose two, and MACD Histogram

[12/10/2003 11:25:58 PM] [bmweyrauch] 14 period look back...any average value?

..... similar ranking system on indicators...thanks

[12/10/2003 11:26:10 PM] [Investortrader] More like it's nice if it's confirming but if it isn't not too big a deal for me

[12/10/2003 11:26:25 PM] [bmweyrauch] thanks

[12/10/2003 11:26:40 PM] [Investortrader] 1 for avg, I don't really fiddle with it

[12/10/2003 11:27:00 PM] [Investortrader] I use 5,17,9 for macd

[12/10/2003 11:27:40 PM] [Investortrader] On to HURC

ClubHome

[12/10/2003 11:28:00 PM] [Investortrader] News today on HURC somewhere?
[12/10/2003 11:28:36 PM] [Investortrader] reported earnings looks like, must have been good
[12/10/2003 11:29:41 PM] [Investortrader] Gimme a minute to scan it
[12/10/2003 11:32:03 PM] [CashMan] HURC reported a profit of 10 cents a share compared to 32 cent loss from last year.
[12/10/2003 11:33:46 PM] [Investortrader] Return to profitability, right CashMan
[12/10/2003 11:33:57 PM] [Investortrader] Plus new orders, and it's a weak \$ play
[12/10/2003 11:34:04 PM] [Investortrader] All good looking news
[12/10/2003 11:34:27 PM] [Investortrader] Unless the \$ strengthens which currently I don't expect, maybe correction but no trend change for now
[12/10/2003 11:35:01 PM] [Investortrader] Big volume and big price move today
[12/10/2003 11:35:04 PM] [CashMan] Investortrader only thing I didn't like was forward looking statement was cautiously optimistic
[12/10/2003 11:35:24 PM] [Investortrader] Haven't gotten to that part yet, they were cautious huh? Hmmm, back to reading lol
[12/10/2003 11:36:51 PM] [CashMan] I read that off msn money on HURC
[12/10/2003 11:36:57 PM] [Investortrader] At least they gave guidance ... might be "cautious" because of the new laws
[12/10/2003 11:37:15 PM] [Investortrader] But still optimistic
[12/10/2003 11:37:22 PM] [Investortrader] I read it off TCNet :)
[12/10/2003 11:37:58 PM] [CashMan] True I was thinking about that when I put that remark in. Better be safe if I was in his shoes. :)
[12/10/2003 11:38:08 PM] [Investortrader] Yup!
[12/10/2003 11:38:30 PM] [Investortrader] It's a ways off support and I don't like to chase
[12/10/2003 11:38:52 PM] [Investortrader] They also restructured, which is positive
[12/10/2003 11:38:59 PM] [CashMan] I don't like to chase either lost a lot of money doing that. :)
[12/10/2003 11:39:19 PM] [CashMan] chase = chase
[12/10/2003 11:39:19 PM] [Investortrader] That was one of my two biggest mistakes when I started, chasing, and holding losers too long
[12/10/2003 11:39:35 PM] [Investortrader] Common newbie mistakes
[12/10/2003 11:39:55 PM] [CashMan] But I will put in my watch list.
[12/10/2003 11:40:02 PM] [CashMan] Yep
[12/10/2003 11:40:13 PM] [Investortrader] Probably worth watching for when it makes a new base or pulls back some
[12/10/2003 11:40:50 PM] [Investortrader] Could continue higher but will need vol,

ClubHome

but todays move and vol should attract some interest

[12/10/2003 11:42:20 PM] [rsi77] Yep, I still chase sometimes....still relative newbie

[12/10/2003 11:42:54 PM] [CashMan] HURC will probably will go up for about another 2 to 3 days then pt will set in and then it will be attractive

[12/10/2003 11:43:38 PM] [Investortrader] I don't mind adding and avg-ing up, but not chasing

[12/10/2003 11:43:46 PM] [Investortrader] For an initial purchase

[12/10/2003 11:43:57 PM] [CashMan] Well time to go out and have a beer or 2. You all have fun. Good night all.

[12/10/2003 11:44:05 PM] [Investortrader] Night CashMan :)

[12/10/2003 11:44:17 PM] [Investortrader] I'll be headed out soon also

[12/10/2003 11:45:21 PM] [Investortrader] I've got a pretty good plate with the 3 I bought and 2 more at least to look at in the morning, I don't put on loads of posns

[12/10/2003 11:45:32 PM] [CashMan] See you all in the morning. have a good evening.

[12/10/2003 11:45:48 PM] [Investortrader] So I'll pass on hurc for now

[12/10/2003 11:47:45 PM] [Investortrader] I've also got my eye on ANSR at somewhat lower price

[12/10/2003 11:48:14 PM] [Investortrader] low vol pullback and OBV holding up nicely

[12/10/2003 11:58:53 PM] [bmweyrauch] ANSR still on my G+ WL...traded late Oct through last week...watching for re-entry

[12/11/2003 12:00:03 AM] [bmweyrauch] family time...GN all and good trading tomorrow
