[12/14/2003 9:30:01 AM] [luckieeguy] does anyone have the link that Hotto mentioned yesterday for the free Zacks Ratings at yahoo finance?
[12/14/2003 9:35:19 AM] [Mulrod] for Zacks, just go to www.zacks.com. then click on the Research tab. I think you'll find a place you can enter a stock symbol. Hard to negotiate their website, but the info is free, even tho you register. good luck. off to breakfast on the west coast.
[12/14/2003 9:40:04 AM] [Kasa] short oil and gas on monday

[12/14/2003 9:47:17 AM] [atexpal] hopefully this will enable us to wind things down over there having accomplished a meaningful change for the better.

[12/14/2003 9:50:14 AM] [HowNow] A diagnostic moment. Reactions of many leaders at home and abroad will clarify their attitudes and positions on world terrorism.

the end of this chapter.

[12/14/2003 10:06:30 AM] [hotto] back to stocks...

[12/14/2003 10:07:24 AM] [hotto] Yahoo finance changed from Zacks to Thompson/ First Call... for analyst estimates..

[12/14/2003 10:07:55 AM] [hotto] I don't know when that change happened.. but it is true now..

[12/14/2003 10:08:14 AM] [Candlestick1] Hotto, which stocks will benefit the most?

[12/14/2003 10:09:27 AM] [hotto] To get to the First Call analyst numbers.. Go to the Yahoo Stock Page Link.. on Hotto / Links... Then click the Analyst Opinion or Analyst Estimates.. to the left of the screen..

[12/14/2003 10:10:11 AM] [parkwaypet] test

[12/14/2003 10:10:40 AM] [parkwaypet] Anyone hear the news caught suddam hussein today

[12/14/2003 10:11:37 AM] [parkwaypet] I think the market as a whole will go up from this news

[12/14/2003 10:12:15 AM] [hotto] GM Candle !.. I have only thought it would cause a surge in the Blue Chips and HighFlyers.. And.. stocks that have been hurt in past by terrorist events.. fears.. may get a pop.. Hotels / Airlines.. Probably short -lived..

[12/14/2003 10:12:17 AM] [Kasa] good chance for institutions to unload shares on good news

[12/14/2003 10:14:25 AM] [Candlestick1] short lived, but the longer the market stays above 10,000, the more i think the institutions have to be heavily invested going into the end of the year

[12/14/2003 10:23:34 AM] [silverdole] NEW YORK (AP) -- For the first holiday season since the 2001 terrorist attacks, tourists are pouring into New York in near-record numbers, packing hotel rooms and eating out in droves.

[12/14/2003 10:28:37 AM] [Saroj] hotto - bad news - new beta release of TCNet (2.1.00120) does NOT have OBV; still has MS although for some brilliant reason it isn't listed amongst the available functions.

[12/14/2003 10:32:13 AM] [hotto] :(

[12/14/2003 10:35:03 AM] [cpratsch] Saroy-what do you mean "OBV is not in beta"? It is now ,not?

[12/14/2003 10:35:07 AM] [Saroj] You are allowed to sort a watchlist by the indicators in your chart template open at the time and thus OBV, however the value in the column appears to have NO relationship to how high or low OBV is displayed on the chart.

[12/14/2003 10:36:38 AM] [cpratsch] h programmers at TC seem unaware of Technical Analysis need

[12/14/2003 10:36:49 AM] [Saroj] OBV - cannot now use in a pcf; lots of folks requested it be included in the next release which is in Beta at the moment. I downloaded it and installed it and checked for OBV.

[12/14/2003 10:37:22 AM] [Saroj] It does have what appears to be intraday sorting on many different indicators - that will be big if it works reasonably well.

[12/14/2003 10:37:33 AM] [cpratsch] the OBV numerical system seems isolated from price etc., just like TSV

[12/14/2003 10:37:41 AM] [cpratsch] seems

[12/14/2003 10:37:50 AM] [Saroj] If it is the programmers who are creating the application requirements, we are all in trouble. :)

[12/14/2003 10:39:40 AM] [cpratsch] yes, we are. Just had a fling with RSI when programmers put RSI in PCFs in simple, on charts in exponential form. They changed it back when I bitched and moaned

[12/14/2003 10:40:09 AM] [cpratsch] when I bitched and moaned

[12/14/2003 10:40:35 AM] [Saroj] Jee, the way I hear it, I'm the only one who bitches around here!! :D

[12/14/2003 10:41:13 AM] [cpratsch] no, i am too

[12/14/2003 10:41:45 AM] [cpratsch] have to bitch or the programmers take over

[12/14/2003 10:43:01 AM] [cpratsch] they should introduce an alert system for intra-day traders, at least like the AMIBROKER Alert system

[12/14/2003 10:44:26 AM] [Saroj] well it DOES look like we have an exponential operator now. That's very nice.

[12/14/2003 10:45:40 AM] [Saroj] Unless they have made major improvements in their alert functionality, I wouldn't bother with it. Very unreliable. I use Tradestation. Very good and you can create your own wave files so it can say "hot diggity" or "blast off" for different conditions and criteria!!

[12/14/2003 10:46:31 AM] [cpratsch] the Alert system for intra-day data in AMIBROKER is very reliable

[12/14/2003 10:47:28 AM] [cpratsch] it is NOT price alert system as we now have n Tc, but one that signals relations between price and any indicator and its settings

[12/14/2003 10:49:30 AM] [Saroj] I wasn't referring to Amibroker -] TCNet. I don't know anything about Amibroker.

[12/14/2003 10:50:18 AM] [cpratsch] I play with it daily, have yet to find a real moneymaking alert setting

[12/14/2003 10:51:03 AM] [cpratsch] I still use TCNet exclusively for selling/buying

[12/14/2003 10:51:04 AM] [Saroj] No SD indicator on Stochastics. Easy enuf to calculate if one is so inclined which most here are NOT (nor should they have to be), but also very easy to include in TCnet. Strange they don't included it.

[12/14/2003 10:51:51 AM] [cpratsch] again-programmers vs. analysts. This includes Peter W.

[12/14/2003 10:56:04 AM] [taxedman] Anyone know of source for stocks with high number of shorts ??

[12/14/2003 10:56:16 AM] [Saroj] Well, frankly they should create an advisory group of a cross-section of their desired target audience and let them define the user requirements; let the technical folks stick to technical requirements.

[12/14/2003 10:57:01 AM] [taxedman] Good idea Saroj...

[12/14/2003 10:57:43 AM] [taxedman] Apparently they didn't read our "wish list" with user in mind

[12/14/2003 10:57:45 AM] [w2jc] taxedman -- use the "Latest Short Interest Ratio" indicator in TC and sort for max

[12/14/2003 10:57:56 AM] [cpratsch] this way yoy never will reach a decision. Don't forget the powwer

ClubHome

of Don W.'s analysis approaches: Simple, price, volume, break outs

[12/14/2003 10:58:21 AM] [taxedman] tx W2JC

[12/14/2003 10:58:55 AM] [Saroj] Jim, is that known to be an accurate representation?

[12/14/2003 10:59:32 AM] [cpratsch] I still think parabolics and directionals should be included in TC and an intra-day data alert system

[12/14/2003 10:59:34 AM] [w2jc] i don't know... have not compared it with anything else, but at least a good 'relative' indicator ... if it is 8 or 10 or 15 you know it's heavily shorted !!

[12/14/2003 11:00:41 AM] [cpratsch] Monday may bring an opening jump of unseen proportions

[12/14/2003 11:01:01 AM] [Saroj] So the lower the number, the more it is shorted rather than the other way around?

[12/14/2003 11:01:15 AM] [cpratsch] May have to sell all my holdings 10 minutes into market

[12/14/2003 11:01:36 AM] [w2jc] no, the larger the number the more shorts there are

[12/14/2003 11:01:53 AM] [Saroj] cp - and then take off for the rest of the day!! That's the way to trade!

[12/14/2003 11:02:08 AM] [cpratsch] I hope

[12/14/2003 11:02:17 AM] [Saroj] w2 - that's what I would have thought. you seemed to be saying the opposite. thx for clarification.

[12/14/2003 11:02:42 AM] [Saroj] BTW, w2, you did a fabulous job on the Tina presentations. Really professional! Thanks.

[12/14/2003 11:02:50 AM] [w2jc] well, most stocks it runs around 1 or less ... i said if it was 8 or 10 then it's heavily shorted

[12/14/2003 11:03:08 AM] [Saroj] Also the pcf list. again - thanks. to you and to Lofty too.

[12/14/2003 11:03:14 AM] [w2jc] saroj -- before i was 'retired' at end of august, that WAS my profession !!

[12/14/2003 11:03:14 AM] [cpratsch] look at IFN, may be relate to all the reports on India's technology participations

[12/14/2003 11:03:58 AM] [Saroj] I've got lots that are 70 and above.

[12/14/2003 11:04:43 AM] [Saroj] that's why I'm confused on the short interest ratio interpretation.

[12/14/2003 11:04:47 AM] [w2jc] maybe we're not talking about the same indicator? i've rarely seen anything over about 15 and that was huge

[12/14/2003 11:05:29 AM] [w2jc] 70 would mean 70% of the float is short? i think that's the way it's interpreted...

[12/14/2003 11:05:47 AM] [Saroj] Nope - "short interest ratio" - I've sorted my watchlist by it. one is ICCI - 94; another is GTCB - 95; XING - 82; WM - 76

[12/14/2003 11:06:19 AM] [Saroj] I'll check the TCNet help file.

[12/14/2003 11:06:49 AM] [w2jc] yeah, was going to say that one of us better check the description to clarify!! anyway, the bigger the number the more shorts, i'm sure of that...

[12/14/2003 11:07:08 AM] [ken2k] where is the short interest ratio found?

ClubHome

[12/14/2003 11:07:37 AM] [Saroj] Well, I managed to lock up the BETA version. If I had the time and was getting paid to do it, I could spend the next 5 days doing nothing but identifying bugs in the beta version.

[12/14/2003 11:08:08 AM] [w2jc] wow... that's not encouraging at the beta level !!

[12/14/2003 11:08:46 AM] [Saroj] maybe folks would like to take up a collection. It would probably save 10X what I would charge to do it in lossess for everyone over the next 6 months.

[12/14/2003 11:08:52 AM] [Barnabus] my understanding of short interest ratio is it is the number of days of average volume it would take to cover all the short shares

[12/14/2003 11:08:55 AM] [w2jc] kenk -- it's a regular TC indicator

[12/14/2003 11:09:37 AM] [w2jc] here is what the TC help file says: The short interest shares divided by average daily volume, representing the number of days of average trading needed to cover the shorts.

[12/14/2003 11:10:20 AM] [nitrobo] Barnabus -- you are correct

[12/14/2003 11:10:41 AM] [w2jc] well, i guess the number would be gigantic for very low volume stocks!! looks like i had it upside down

[12/14/2003 11:12:44 AM] [Saroj] ok - Barnabus cleared it up. the 94 is the RANK; 13.20 is the value.

[12/14/2003 11:14:06 AM] [Saroj] when you use it in the "sorted by" column it displays the ranking, not the value. However the data sheet shows it.

[12/14/2003 11:15:09 AM] [ken2k] sorry to bother again.. i don't see it in my data sheet or sorts.. is this something new on tcnet?

[12/14/2003 11:15:55 AM] [HamFon] Need to not trust the data sheet numbers on "ranked" values, though ... they show the AVERAGE (or occasionally the high and low) of the range for that percentile - NOT the actual number for that stock.

[12/14/2003 11:16:28 AM] [Saroj] Unfortunately if you put in a column of S.I.R. - you also get only the ranking, not the value. I wish I understood why WB thinks we should have the ranking all the time instead of the raw number.

[12/14/2003 11:17:29 AM] [Saroj] ken2k - that's probably because you are looking under "S" for Short...; look under "L" for Latest Short blah blah blah. Took me about 5 minutes to find the damn thing.

[12/14/2003 11:18:25 AM] [ken2k] bingo !!!!! thanks

[12/14/2003 11:18:48 AM] [nitrobo] a high short interest # could signal a possible "short squeeze" at some point but I haven't found it real helpful

[12/14/2003 11:19:37 AM] [ken2k] do we know how old the numbers are? when i have looked up short interest in the past there was a considerable lag in reporting

[12/14/2003 11:20:12 AM] [Saroj] My understanding is that fundamentals are updated every Saturday....

[12/14/2003 11:20:33 AM] [nitrobo] true since it's only reported once a month in IBD

[12/14/2003 11:20:50 AM] [Saroj] ...that said, who knows how "fresh" the actual data source is or

ClubHome

"what" the source actually IS...

[12/14/2003 11:22:17 AM] [ken2k] i have never found it very useful in the past because of that time lag

[12/14/2003 11:22:28 AM] [Saroj] nitro - check out the action on ICCI this past week; some think that was directly related to two things: high internal ownership (i.e., few shares available to buy) combined with high short interest. I can't verify that myself as I don't really know how to do it, but this is what I was told.

[12/14/2003 11:22:51 AM] [Saroj] ken - where does one look it up?

[12/14/2003 11:23:03 AM] [Fieldcrestcf] SADDAM HUSSAN CAPUTERED !!!! SEE CNN

[12/14/2003 11:23:21 AM] [Saroj] cf - hey, man, did you just wake up???? :D

[12/14/2003 11:23:26 AM] [ken2k] i haven't looked in some time... but i think i found it at schaeffer's web site

[12/14/2003 11:23:54 AM] [taxedman] Chris....u just wake up buddy ??

[12/14/2003 11:24:00 AM] [Fieldcrestcf] had the tv off, but was talking to my sister that hear it.

[12/14/2003 11:24:03 AM] [docstash] So do I really believe that all the shorts have covered in opwv?

[12/14/2003 11:24:05 AM] [nitrobbob] K Mart had the highest shrt # I had seen but I stayed short on it because there was no reason to be long... and did well

[12/14/2003 11:24:10 AM] [Fieldcrestcf] am i late ?

[12/14/2003 11:24:44 AM] [Fieldcrestcf] i've been up since 7am CT

[12/14/2003 11:24:56 AM] [Saroj] Saddam - we've been musing about appropriate "remedies" for his actions. Came up with some pretty gruesome ones. Leads me to wonder if we are all monsters underneath (me included)!

[12/14/2003 11:25:19 AM] [gary12] just 4 hours Field LOL

[12/14/2003 11:25:29 AM] [Fieldcrestcf] oops

[12/14/2003 11:26:10 AM] [Saroj] Actually the funniest one is that he be put in high-flame drag and paraded (sp?) around IRAQ in a circus cage so folks can beat on him with their shoes.

[12/14/2003 11:26:23 AM] [Fieldcrestcf] oh well

[12/14/2003 11:27:13 AM] [Saroj] nitro - maybe it is the combo of few shares available to buy to cover with the high short interest that makes a difference.

[12/14/2003 11:27:43 AM] [ken2k] i just ran "short interest ratio" on google... here is business week site that has weekly updates..

http://prosearch.businessweek.com/businessweek/SEARCH_HISHOINT.html?template=corpsnap.htm

[12/14/2003 11:28:16 AM] [nitrobbob] could be saroj

[12/14/2003 11:28:56 AM] [acmetrader] ought

[12/14/2003 11:29:22 AM] [Saroj] ken - thanks

[12/14/2003 11:29:42 AM] [ken2k] do the google search... looks of sites out there

[12/14/2003 11:31:32 AM] [Saroj] how about percentage of insider ownership?
[12/14/2003 11:33:24 AM] [Saroj] I can do the search, but not sure what the correct phrase is.
[12/14/2003 11:36:23 AM] [TraderStar] <http://wallstreetcity.com> has the best all around information I have found on things like insider buying/selling & its graphic presentation makes it very easy to understand. It is \$9.95 a month but free for first 30 days ... IMO it has more information than briefing for the same price .. FWIW :)
[12/14/2003 11:38:36 AM] [Saroj] thanks TS. that's helpful.

[12/14/2003 1:01:21 PM] [beach] both will be open
[12/14/2003 1:01:37 PM] [RJMGroup] I didn't know commercial entities could open clubs here.

[12/14/2003 3:04:04 PM] [bobpan] Does anyone know how I can move the PDF files of Tina's presentations to My Documents without losing the PDF format. When I try to copy and paste I lose the format and the charts do not transfer over. Any help will be appreciated.

[12/14/2003 3:04:35 PM] [RJMGroup] Can you right click on them and click Save As?

[12/14/2003 3:05:01 PM] [Rjw] me too

[12/14/2003 3:05:07 PM] [bobpan] I'll give it a try

[12/14/2003 3:05:46 PM] [RJMGroup] I haven't seen them so I'm not sure if they're embedded in PowerPoint or attached files.

[12/14/2003 3:07:52 PM] [HowNow] Dean already said we should turn over reconstruction of Iraq to others and split (hopefully before election). :D

[12/14/2003 3:07:59 PM] [BWill] if you opened the Tina file in Acrobat you can simply save it from Acrobat into any folder on your computer that you like; the charts stay with it

[12/14/2003 3:23:57 PM] [aaanalyst] If gold and silver drop, Soros is going to take a big hit. Probably lose all that money he was going to give to Dean

[12/14/2003 3:25:51 PM] [ron643] and what about all those US dollars he is short

[12/14/2003 3:26:15 PM] [ron643] dollars

[12/14/2003 3:37:00 PM] [HowNow] It will take longer than 6 months just for Iraq to come up with the legal infrastructure - a constitution, a judiciary and judicial structure and apparatus - then months or years to identify list of defendants, to develop legal process, gather evidence and develop case.

[12/14/2003 3:43:24 PM] [HowNow] Some dem candidates gambled on creating a parallel universe in which Bush is the criminal and terrorists need to be understood (appeased). Without a majority to settle there, parallel universe disappears.

[12/14/2003 3:48:20 PM] [Investortrader] Hi everyone, I'm going to wait on any chart classes as this news will overpower any chart pattern in my opinion at least in the very short term. However ...

[12/14/2003 3:49:28 PM] [Investortrader] It's not relevant to company earnings so while everything may gap up I'm wondering exactly how long those high prices will hold. Though it could always be the start of a whole new leg up. Surprises are usually to the upside in a rallying market.

[12/14/2003 3:50:20 PM] [Investortrader] Monday night maybe 30-60 minutes after Hotto is done I'll be here to go over any charts.

[12/14/2003 3:51:12 PM] [Investortrader] By request I've put up a few books in my profile that I consider worth having in your traders library with a little explanation on each

[12/14/2003 3:51:58 PM] [Investortrader] I'll also get my main template in there before the weekend is over, my KISS template, keep it simple somehow ;)

[12/14/2003 3:53:05 PM] [Investortrader] Sharing it now, I'll have a few notes on what I look at in it on my profile, later today/tonight.

[12/14/2003 4:05:40 PM] [rsi77] Hi IVT, are you still long VRSO?

ClubHome

[12/14/2003 4:06:30 PM] [Investortrader] No, I covered that trade the night I sold and my reasons, think it was Thurs night. Then Friday I wasn't feeling so hot so only watched and didn't trade.

[12/14/2003 4:06:52 PM] [Investortrader] I never trade when feeling under the weather

[12/14/2003 4:07:08 PM] [Investortrader] Probably would have bought it back Fri if I wasn't feeling bad though

[12/14/2003 4:07:21 PM] [rsi77] You explained on Thursday night here?

[12/14/2003 4:07:25 PM] [Investortrader] I just don't trade my best when feeling bad

[12/14/2003 4:07:28 PM] [Investortrader] Yes

[12/14/2003 4:07:34 PM] [rsi77] OK, I'll check it out

[12/14/2003 4:07:40 PM] [Fibotrader] could you re-share that chart template. didnt show up on mine the first time..thx

[12/14/2003 4:07:46 PM] [Investortrader] 30 or 60 minutes after Hotto was done

[12/14/2003 4:08:17 PM] [Investortrader] Just tried .. did it show up?

[12/14/2003 4:08:27 PM] [Fibotrader] no, could be my system

[12/14/2003 4:08:38 PM] [Investortrader] Let me try again

[12/14/2003 4:08:43 PM] [Fibotrader] aah, there it is...

[12/14/2003 4:08:52 PM] [Investortrader] Cool :)

[12/14/2003 4:09:14 PM] [Investortrader] I'll add some notes in my profile on what I look for a bit later, going over Sat logs now as I wasn't here

[12/14/2003 4:09:24 PM] [Fibotrader] must be something wrong --- it doesnt look complicated enough! :)

[12/14/2003 4:09:30 PM] [Investortrader] Fortunately, I burn thru a cold in 24 hours, so I'm fine now ... high metabolism

[12/14/2003 4:09:44 PM] [Investortrader] I call it my KISS template, keep it simple somehow :)

[12/14/2003 4:10:06 PM] [Fibotrader] a great concept!

[12/14/2003 4:10:13 PM] [Investortrader] That's my main template and first one I always look at

[12/14/2003 4:10:29 PM] [Investortrader] I look at a couple others but not really that many

[12/14/2003 4:10:36 PM] [Investortrader] RSI, MACD histogram

[12/14/2003 4:10:57 PM] [Investortrader] Just for confirmation of the strength of the KISS template

[12/14/2003 4:12:25 PM] [Fibotrader] are you an old time OBV user?

[12/14/2003 4:12:43 PM] [Investortrader] Ever since John Bollinger invented it!

[12/14/2003 4:13:02 PM] [Fibotrader] I thought Joe Granville invented OBV

[12/14/2003 4:13:03 PM] [Investortrader] And it plays an important role in my work

[12/14/2003 4:13:10 PM] [CashMan] Investortrader he has a book out doesn't he?

[12/14/2003 4:13:24 PM] [Investortrader] Yes, he did, in the 70's, for some reason I read it as Bollinger bands lol

[12/14/2003 4:13:34 PM] [Fibotrader] :)

[12/14/2003 4:13:44 PM] [Investortrader] Notice I put BOLLINGER Bands on the OBV

ClubHome

[12/14/2003 4:14:03 PM] [Investortrader] Granville or Bollinger CashMan? Probably they both do
[12/14/2003 4:14:19 PM] [CashMan] Bollinger
[12/14/2003 4:14:23 PM] [Fibotrader] very interested in how you interpret the OBV with Bbands
[12/14/2003 4:14:34 PM] [Investortrader] I got all my Bollinger Band theory from John Bollinger while watching FNN in the old days
[12/14/2003 4:15:06 PM] [Fibotrader] You go all the way back to black and white tv :)
[12/14/2003 4:15:12 PM] [Investortrader] Mostly I look for divergences Fibo, with price and within the BB's
[12/14/2003 4:15:32 PM] [Investortrader] I have a little 13" b+w sitting next to my monitor! lol
[12/14/2003 4:15:55 PM] [Investortrader] And it's probably 20 years old now, still going strong
[12/14/2003 4:17:14 PM] [Fibotrader] does your bband and obv band analysis currently give you any edge on guessing which way ITIG may go?
[12/14/2003 4:17:22 PM] [silverdolr] Investor.....hell buy a new "color".....I need a job
[12/14/2003 4:17:40 PM] [Investortrader] I'll start with one chart in a profile note to show the template, and a few comments, and add as I go more stocks with the different things I look at for examples
[12/14/2003 4:17:50 PM] [Fibotrader] great
[12/14/2003 4:18:02 PM] [Investortrader] Hehehe silverdolr
[12/14/2003 4:18:43 PM] [silverdolr] Investor,,,,,how can you tell MS from TSV?
[12/14/2003 4:18:55 PM] [Investortrader] I don't use TSV at all
[12/14/2003 4:19:15 PM] [Investortrader] And I prefer OBV to MS as MS drops data, while OBV is a true cumulative indicator
[12/14/2003 4:19:34 PM] [Investortrader] Why does my chart keep changing to other stocks? lol
[12/14/2003 4:20:09 PM] [Investortrader] MS is kind of like a moving average in that way, after a certain number of periods it drops, or forgets, what has happened, while OBV doesn't
[12/14/2003 4:20:53 PM] [Investortrader] I glance at MS, but really it has no bearing for me, and never even look at TSV
[12/14/2003 4:21:56 PM] [Borankin] Investortrader, sorry to be argumentative, but how do you know what MS drops or forgets if it is a proprietary formula?
[12/14/2003 4:22:47 PM] [Investortrader] I asked Peter Worden about it in All-TCNet as I had heard that it drops past data at a certain point and he confirmed that for me
[12/14/2003 4:23:08 PM] [Borankin] Thank you.
[12/14/2003 4:23:12 PM] [Fibotrader] has anyone started a raffle yet betting on how high the indices peg the meter tomorrow before putting a fork in the bulls
[12/14/2003 4:23:25 PM] [Investortrader] It only goes back far enough to to calculate itself, not truly cumulative ... Welcome :)
[12/14/2003 4:24:48 PM] [Investortrader] I had one idea Fibo, that the open could be the high of the day since everyone will know the news by tomorrow ... gap and crap ... but it could also be the start of the next leg up, will have to wait and see how it plays out

ClubHome

[12/14/2003 4:25:21 PM] [Investortrader] That's why I don't feel comfortable giving a chart class now, news is too big and will/could easily override anything the charts say

[12/14/2003 4:25:34 PM] [Borankin] Investortrader, that being the case, that's an oscillator feature. And Wordens insist MS is not an oscillator.

[12/14/2003 4:26:15 PM] [Investortrader] Not quite true Borankin .. it's more like a moving average in that regard, not an oscillator

[12/14/2003 4:26:57 PM] [CashMan] Investortrader the word I'm getting they are looking for a 300 point day. Possibly

[12/14/2003 4:26:57 PM] [Fibotrader] agree with your comments regarding tomorrow. just need to prepare for both scenarios

[12/14/2003 4:27:30 PM] [Investortrader] I'll probably just watch tomorrow, depends on what I see

[12/14/2003 4:27:55 PM] [Investortrader] I am not really a daytrader, daytraders will probably have fun tomorrow

[12/14/2003 4:28:26 PM] [Investortrader] CashMan, 300 gap up? Or 300 by end of day?

[12/14/2003 4:28:49 PM] [Fibotrader] shutting down for awhile to do system maintenance...

[12/14/2003 4:28:58 PM] [Investortrader] See ya Fibo

[12/14/2003 4:29:10 PM] [Fibotrader] cheers

[12/14/2003 4:29:35 PM] [Barnabus] ivestortrader, PW didn't say that MS dropped data, he said it used what it needed to make the calculation for the timeframe you choose.

[12/14/2003 4:29:59 PM] [Investortrader] BArnabus, so it's not a cumulative indicator

[12/14/2003 4:30:27 PM] [Investortrader] It doesn't look at everything in the past ... it drops what it looked at before as time goes on

[12/14/2003 4:30:36 PM] [CashMan] Investortrader it will gap up and finish at 300

[12/14/2003 4:30:40 PM] [Barnabus] perhaps, but it doesn't drop data after a certain period either

[12/14/2003 4:31:14 PM] [Investortrader] Sure it does, if it only looks back so far today, next week it won't look back as far as it's not needed to calculate it, so it has dropped that data from its calculations

[12/14/2003 4:31:30 PM] [Investortrader] Like a moving average

[12/14/2003 4:31:56 PM] [Investortrader] OBV doesn't "forget" past data, it is truly cumulative, which is why I like it better

[12/14/2003 4:32:15 PM] [Barnabus] how far it looks back depends on the timeframe you are looking at.

[12/14/2003 4:32:46 PM] [Investortrader] Doesn't matter, it still is dropping the data it was using in the past, on any time frame

[12/14/2003 4:33:12 PM] [Investortrader] Weekly looks back so far this week, next month weekly won't look as far back

[12/14/2003 4:33:59 PM] [Investortrader] It isn't cumulative on any time frame!

[12/14/2003 4:36:06 PM] [bmweyrauch] ..

ClubHome

[12/14/2003 4:36:08 PM] [Investortrader] I'm not saying it's not a good indicator, many are good using moving averages and they drop past data also ... I just prefer OBV

[12/14/2003 4:39:44 PM] [Investortrader] I asked Peter quite a few questions about it, I could feel he was a bit uncomfortable answering though that may be because it is proprietary and he didn't want to give too much away on it, he wouldn't say how many periods it uses for example, or if the periods vary

[12/14/2003 4:40:47 PM] [Investortrader] And I don't like using a "black box" :)

[12/14/2003 4:43:05 PM] [Investortrader] Oh, I never answered the OBV question, yes, I've used it since I started trading stocks 15 years ago

[12/14/2003 4:43:30 PM] [Investortrader] Or soon thereafter, don't remember exactly now

[12/14/2003 4:45:44 PM] [BossFan] hey all

[12/14/2003 4:46:00 PM] [Investortrader] Hiya BossFan

[12/14/2003 4:46:39 PM] [BossFan] Saddam news should propel this market next week, huh?

[12/14/2003 4:47:41 PM] [Investortrader] At least on Monday

[12/14/2003 4:48:06 PM] [BossFan] yea, eliminates a lot of uncertainty people have been going through

[12/14/2003 4:48:07 PM] [Investortrader] Doesn't really affect company earnings, but will affect confidence some

[12/14/2003 4:48:20 PM] [Investortrader] Exactly

[12/14/2003 4:48:45 PM] [Investortrader] But do they all jump in on Monday so it's over quickly as there are no buyers left?

[12/14/2003 4:50:12 PM] [Investortrader] Or does it start a new leg up? As Ed Hart on FNN used to say ... We'll know in the fullness of time

[12/14/2003 4:50:32 PM] [BossFan] No IMHO, because the IRAQ war has been on peoples minds since March. The Saddam capture should hopefully bring our guys home, but that won't happen for a while. People will start buying in earnest and then it will pick up once Iraq is totally off our minds

[12/14/2003 4:51:04 PM] [Investortrader] I think we'll still be Iraq for years

[12/14/2003 4:51:24 PM] [Investortrader] Heck, we're still in Germany!

[12/14/2003 4:51:46 PM] [BossFan] Yea, but hopefully we'll stop hearing 2-3 more soldiers dead everyday. Just sickening to hear that day in day out

[12/14/2003 4:52:11 PM] [Investortrader] BossFan, did you know the military loses that many people every day even if there are no conflicts we are attending?

[12/14/2003 4:52:43 PM] [BossFan] Nope, didn't know that

[12/14/2003 4:52:56 PM] [Investortrader] IT might get worse in the short term as all his fanatical followers decide to go out in a blaze of glory

[12/14/2003 4:53:47 PM] [BossFan] yea, no sh*t...crazy idiots

[12/14/2003 4:55:35 PM] [BossFan] Geez, I'd better get outta my shorts. I keep seeing a top on TASR and it just keeps going

[12/14/2003 5:03:47 PM] [tiga] I for one plan to keep an eye on TASR. Less than \$4 to over 87 in less than a year.....Rocket is going to run out of fuel at some point

[12/14/2003 5:08:47 PM] [Investortrader] Looks like it's been a helluva run tiga, with lots more volume last few months

[12/14/2003 5:09:22 PM] [BossFan] Nice chart on SAY. Recently added to the IBD 100 list and hit a new 52H Friday

[12/14/2003 5:13:19 PM] [HOTTO] gmhill has posted a new topic to General Discussion: Diagonal Triangle

[12/14/2003 5:13:43 PM] [tiga] Pretty good moves coming as people start to think about this one I think

[12/14/2003 5:14:14 PM] [cpratsch] Say drops, what is so great?ta

[12/14/2003 5:15:11 PM] [cpratsch] Oh no, i had the wrong time, SAY DOEs look good

[12/14/2003 5:16:14 PM] [Rob22911] TASR looks to be paying the 50dsma a visit real soon as reaction to the news...needs a nice sell off to go much higher IMHO

[12/14/2003 5:20:13 PM] [captfly] any word on futs or far east? tia

[12/14/2003 5:27:34 PM] [peanut] NZ hardly an indicator though.

[12/14/2003 5:30:10 PM] [captfly] is it gonna be sell the gap or add shares?

[12/14/2003 5:31:56 PM] [gary12] i will sell and think about buying back

[12/14/2003 5:40:25 PM] [captfly] that's not in the cards [gap down]

[12/14/2003 5:40:40 PM] [captfly] imo

[12/14/2003 5:42:05 PM] [captfly] of a sadam capture that is

[12/14/2003 5:43:26 PM] [captfly] a real positive for anything even slightly related to the rebuilding...imo

[12/14/2003 5:43:54 PM] [cpratsch] I bet the market jumps tomorrow morning, strong and short, may be only minutes

[12/14/2003 5:44:26 PM] [cpratsch] so one must watch thstocks no held overnight for the first 10-20 minutes

[12/14/2003 5:44:43 PM] [cpratsch] the stocks one held.....

[12/14/2003 5:44:52 PM] [tiga] Time for the news to sink in now.....time to think about the long term effect on the economy.....MM's and Specialists will gap it up to take advantage of those willing to buy at those levels imo.
