[3/10/2004 8:16:36 AM] [MarcoPolo] IDCC halted, news pending

[3/10/2004 8:20:09 AM] [MarcoPolo] ERES upped to Strong Buy at Advest

[3/10/2004 8:29:41 AM] [MarcoPolo] Treasuries are marginally lower overnight on light volume as the market prepares for today's 5-year auction. As with the last month's auction, traders would like to see significant indirect (foreign central bank) participation give a bid to treasuries. The market fall early this morning saw squaring up ahead of the auction and the 8:30 AM ET trade number. The January trade balance and wholesale inventories data should add some economic footing to support the substantial recent rise in treasuries. Currency traders will be watching the Bank of Japan today for any sign of disappearing bids (the pattern has been about 1:00 PM ET) as the BOJ tests the market by throwing its weight around. The 10-year is currently -01/32nds; yielding 3.727%, 2-year is currently unch; yielding 1.488%, 5-year is currently -01/32nds; yielding 2.663%, 30-year is currently -01/32nds; yielding 4.672%.

[3/10/2004 4:03:21 PM] [SeattleSteve] Wildbill, if the market gaps down, someone will be selling (to you) at a bargain price

[3/10/2004 4:03:24 PM] [hotto] Yes.. Close at lows.. then GAp down.. reverse

[3/10/2004 4:03:39 PM] [tinaSDtrader] 9:35 or 10ish maybe

[3/10/2004 4:03:39 PM] [hotto] Opposite of a good ST top...

[3/10/2004 4:03:40 PM] [payck] then retest?

[3/10/2004 4:03:49 PM] [Dragon1] buy more calls on the gap down tomorrow?

[3/10/2004 4:03:51 PM] [MarcoPolo] oooooooo I like bargains!!!

[3/10/2004 4:04:19 PM] [tiga] Still trending down ah

[3/10/2004 4:04:23 PM] [wildbill] ya think... hopefully we "pick" a few good ones to make our week.....er month:)

[3/10/2004 4:04:25 PM] [HowNow] OEX puts and ARTX made this a great day for me.

[3/10/2004 4:04:45 PM] [tinaSDtrader] Dow sure took it's time rolling over past few wks, then bam!

[3/10/2004 4:04:50 PM] [hotto] I will buy calls IF we get that gap down...

[3/10/2004 4:05:25 PM] [hotto] Last one down... How many times have we discussed that ?

[3/10/2004 4:05:30 PM] [tinaSDtrader] good call hotto (pun intended)

[3/10/2004 4:06:04 PM] [hotto] Sold my PUs too soon... but... good profits..

[3/10/2004 4:06:51 PM] [ProfitTrader] same here, one hour churning around lunch hour threw me off...

[3/10/2004 4:06:53 PM] [tinaSDtrader] I probably covered my DIA too soon too hotto, but a snap back would have hurt.

[3/10/2004 4:07:09 PM] [tinaSDtrader] but I kept big chunk til close, so got that last blast

[3/10/2004 4:07:29 PM] [wildbill] but remember the more- that "expect" a snaoback off a gap down- the less likely it will occur -- look for an initial "false" snapback" early followed by another quick deep "rinse" then go -- just another "possible" scenario- but watch the hotguy - he will keep you abreast imo

[3/10/2004 4:07:29 PM] [ProfitTrader] right tina - pain of positive trade turning -ve more painful than missing profits

[3/10/2004 4:07:51 PM] [swan] how much of a gap might you expect? 50 cents on QQQ's?

[3/10/2004 4:08:02 PM] [hotto] wb... LOL

[3/10/2004 4:08:15 PM] [tinaSDtrader] yeah bill, no surprise to see it retest

[3/10/2004 9:15:51 PM] [Investortrader] Hi everyone, I'll be starting in 15 minutes, give everyone a snack break

[3/10/2004 9:26:50 PM] [gary12] IT can you look at RSE ty

[3/10/2004 9:29:38 PM] [Investortrader] The first thing I'd like to comment on quickly is the DJIA ... I usually don't comment on indexes but just want to point out a few things in the chart

[3/10/2004 9:30:40 PM] [Investortrader] After the run-up in Dec, I want to focus on the OBV during the sideways phase

[3/10/2004 9:31:31 PM] [Investortrader] All looked healthy in it until late Feb when the OBV crashed down thru its 50sma

[3/10/2004 9:33:07 PM] [Investortrader] Where it was already below its lows of the late Jan early Feb bottom

[3/10/2004 9:33:46 PM] [Investortrader] Then the first of March when it attempted a rally, OBV couldn't come close to it's highs, or even breaking above the 50sma

[3/10/2004 9:34:19 PM] [Investortrader] Now the price has broken down to new lows from this attempted base up here, with OBV leading the way down

[3/10/2004 9:34:35 PM] [Investortrader] And on increased volume too

[3/10/2004 9:35:16 PM] [Investortrader] Lots of stocks have been correcting and finally the Dow has joined them

[3/10/2004 9:36:17 PM] [Investortrader] The good news is ... the Dow is usually the last one to correct, so the end is closer

[3/10/2004 9:37:03 PM] [Investortrader] Quick look at FNSR ...

[3/10/2004 9:37:25 PM] [Investortrader] Not a bad day today considering the market

[3/10/2004 9:37:37 PM] [kellam] thanks for template investor, I will use in my reviews in future

[3/10/2004 9:37:52 PM] [Investortrader] Welcome Kellam :)

[3/10/2004 9:38:41 PM] [Investortrader] Nothing too exciting here yet, with it holding on a day like today it should be one of the good bouncers when the market bounces

[3/10/2004 9:39:18 PM] [Investortrader] Any questions on FNSR?

[3/10/2004 9:39:39 PM] [kellam] we can watch for candle signals to confirm bounce FNSR

[3/10/2004 9:42:21 PM] [kellam] FNSR seems to reverse with large candle up ie OCT,Dec turns
[3/10/2004 9:42:48 PM] [Investortrader] Never know where the next level will be, look how far it's dropped already .. I didn't expect it to drop this far

[3/10/2004 9:45:08 PM] [Investortrader] you mean down in the 2.20's?
[3/10/2004 9:45:19 PM] [da2rth] yes
[3/10/2004 9:45:46 PM] [Investortrader] I doubted it would get to 2.50 ;)
[3/10/2004 9:46:05 PM] [da2rth] \$2.28 on 10/1/03.
[3/10/2004 9:47:20 PM] [Investortrader] On to RSE ...
[3/10/2004 9:48:03 PM] [Investortrader] This one looks pretty good with the OBV rising along with the price
[3/10/2004 9:48:11 PM] [Jim1421] It, could you comment on the obv on the sp-500 if you get a chance?
[3/10/2004 9:48:44 PM] [Investortrader] I wouldn't expect more than a test of teh 20sma so far on any pb
[3/10/2004 9:49:07 PM] [kellam] RSE one concern with that high vol down at last run up in early Feb
[3/10/2004 9:49:42 PM] [Investortrader] The gap down day ... lots of stock changed into strong hands then
[3/10/2004 9:50:24 PM] [Investortrader] That area was tested later in Feb on lower vol making a nice rounded bottom for this move to break out from
[3/10/2004 9:50:46 PM] [Investortrader] Been riding the upper BB all month here so far
[3/10/2004 9:51:18 PM] [kellam] cleaned out the weak holders on the gap down right

IT? RSE

[3/10/2004 9:51:26 PM] [Investortrader] At any time you could get a consolidation of a few days during a ride ... could be the start of one here

[3/10/2004 9:51:38 PM] [Investortrader] Exactly kellam

[3/10/2004 9:52:18 PM] [Investortrader] Then later in Feb any who missed the chance that day got in ... which held that price area as support

[3/10/2004 9:52:52 PM] [Investortrader] Also notice how during that little rounded bottom then the price always closed in the upper half of it's range each day

[3/10/2004 9:53:36 PM] [Investortrader] And OBV was also holding it's gap low area

[3/10/2004 9:53:50 PM] [Investortrader] And its own 50sma

[3/10/2004 9:54:11 PM] [Investortrader] If I owned it here I would be holding on still

[3/10/2004 9:54:32 PM] [kellam] thx IT I se those other indications now also low vol during the little rounded base

[3/10/2004 9:54:34 PM] [Investortrader] Though with the market headed lower some will want to scalp it

[3/10/2004 9:55:00 PM] [Investortrader] Good point, that lower volume makes it more sure when you see it happening

[3/10/2004 9:55:23 PM] [Investortrader] Then the increased vol when it broke out of that rounding

[3/10/2004 9:56:06 PM] [Investortrader] Any questions on RSE?

[3/10/2004 9:56:11 PM] [gary12] IT ty:) RSE

[3/10/2004 9:57:26 PM] [Investortrader] On to S&P 500

[3/10/2004 9:57:42 PM] [Investortrader] I don't usually look at indexes as I don't trade them

[3/10/2004 9:58:22 PM] [parkwaypet] If possible IT check out MOBE

[3/10/2004 9:58:27 PM] [Investortrader] It still looks negative with the cascading waterfall of prices ... but the OBV does look better on it

[3/10/2004 9:59:24 PM] [Investortrader] But breaking the 50sma isn't a good sign

[3/10/2004 9:59:57 PM] [Investortrader] Any bounce will probably get shorted if it makes it up there, in both this and the Dow

[3/10/2004 10:00:26 PM] [Investortrader] That is how I would look to be playing it if I played indexes ... at least as of today

[3/10/2004 10:01:02 PM] [Investortrader] On to MOBE ...

[3/10/2004 10:01:20 PM] [Jim1421] Thanks, I just couldn't figure out why obv looks so strong relative to the obv on the dj-30.

[3/10/2004 10:03:08 PM] [Investortrader] I can't really help much Jim as I don't trade indexes or follow them too closely

[3/10/2004 10:03:29 PM] [Investortrader] MOBE has been having a nice low volume pb here

[3/10/2004 10:04:10 PM] [Investortrader] Had a bit better vol on the test of the 20sma, so some buyers are out there down here

[3/10/2004 10:04:20 PM] [Investortrader] That was yesterday

[3/10/2004 10:04:52 PM] [Investortrader] It may need to back and fill a bit more as there was a bearish engulfing today, but it was also on lower volume

[3/10/2004 10:04:53 PM] [Jim1421] I am sure someone knows and may comment. Thanks for taking a look. I didn't want to be the only one around here scratching my head and wondering about this obv.

[3/10/2004 10:05:14 PM] [Investortrader] Welcome Jim

[3/10/2004 10:05:37 PM] [Investortrader] OBV still looks healthy in it

[3/10/2004 10:07:16 PM] [Investortrader] With the market headed lower it could pull anything down with it ... but this one still looks ok

[3/10/2004 10:07:59 PM] [Investortrader] I like how vol was rising as it pushed up out of the late Feb base, and it's been low during this pb

[3/10/2004 10:08:48 PM] [Investortrader] Any questions on MOBE?

[3/10/2004 10:09:56 PM] [Investortrader] Another one I'd like to cover is BKHM ...

[3/10/2004 10:11:03 PM] [parkwaypet] ty IT

[3/10/2004 10:11:08 PM] [Investortrader] This one has been steadily dropping here, finally hitting the bottom BB

[3/10/2004 10:11:15 PM] [Investortrader] Welcome parkwaypet

[3/10/2004 10:12:25 PM] [Investortrader] OBV has been headed lower the whole decline also

[3/10/2004 10:12:53 PM] [Investortrader] Notice we are right down testing the late Dec BO area too

[3/10/2004 10:13:59 PM] [Investortrader] This might be good support here because of that for at least a bounce

[3/10/2004 10:15:07 PM] [Investortrader] I wouldn't expect runs to new highs yet as all the stocks in this sector had either bad earnings or lowered guidance last qtr report ... one saying they didn't expect any big growth until first qtr of '05

[3/10/2004 10:15:54 PM] [Investortrader] That may postpone things with them for awhile

[3/10/2004 10:16:56 PM] [Investortrader] I picked up some at 2.21 today, while I was gone for lunch

[3/10/2004 10:19:08 PM] [cobralso] Why did you pick some up
[3/10/2004 10:19:15 PM] [america] yes IT, where would you sell it?
[3/10/2004 10:20:08 PM] [cobralso] Did you go long or short
[3/10/2004 10:20:10 PM] [Investortrader] There is some support here from the Dec
BO area, and vol has slowed down a bit last two days without much decrease in price
... momentum slowing to the downside ... big decline already
[3/10/2004 10:20:13 PM] [Investortrader] I went long
[3/10/2004 10:21:34 PM] [Investortrader] I'm looking for a bounce to the 20sma here
to sell, we'll see how it reacts if it gets up there
[3/10/2004 10:22:51 PM] [Investortrader] Since on any bounce to the middle BB, the
20sma ... off the bottom BB ... there will be the chance for it to continue to the upper
BB ... which here is also where the 50sma is ... I would definately sell all there no
matter how I see it reacting
[3/10/2004 10:24:17 PM] [Investortrader] But first there will be some resistance at the
20sma, so one price at a time
[3/10/2004 10:24:57 PM] [america] thanks IT. would you look at ADCT if you have a
chance? thanks
[3/10/2004 10:25:04 PM] [Investortrader] Welcome america :)
[3/10/2004 10:25:08 PM] [Investortrader] On to ADCT ...
[3/10/2004 10:25:43 PM] [Investortrader] This could be making a dbl btm here with a
LBBCBS along with it
[3/10/2004 10:26:18 PM] [Investortrader] Notice also where the 2/24 btm is
[3/10/2004 10:26:50 PM] [Investortrader] Right around the support area in Dec after
the gap up day on 12/3
[3/10/2004 10:27:05 PM] [Investortrader] So more chart points to indicate this could
be a dbl btm here
[3/10/2004 10:30:26 PM] [Investortrader] The OBV is holding up at this second btm
also
[3/10/2004 10:32:38 PM] [Investortrader] Any questions on ADCT?
[3/10/2004 10:32:50 PM] [america] no. thanks IT
[3/10/2004 10:33:17 PM] [Investortrader] Welcome america
[3/10/2004 10:33:36 PM] [Investortrader] Anyone watching the Iditarod race?
[3/10/2004 10:34:37 PM] [cobralso] The what?
[3/10/2004 10:34:59 PM] [Investortrader] I'll be watching ADCT tomorrow to maybe
add a little, or to sell if support breaks ... I bot a little at 2.89 for the first time this
downtrend
[3/10/2004 10:35:13 PM] [Investortrader] Iditarod, alaskan sled dog race to Nome
[3/10/2004 10:36:14 PM] [cobralso] Cold

ClubHome

[3/10/2004 10:37:26 PM] [Investortrader] DISH ...
[3/10/2004 10:38:42 PM] [Investortrader] Got dumped to desktop
[3/10/2004 10:39:45 PM] [Investortrader] It may have bottomed yesterday, but I'm not getting really clear signals
[3/10/2004 10:40:24 PM] [Investortrader] Lawsuit news, always tricky since it will overrule anything in the charts
[3/10/2004 10:40:41 PM] [Investortrader] Look at what happened with MSO
[3/10/2004 10:41:22 PM] [Investortrader] Unless you know what's going on with it, I'd stay away on general principle
[3/10/2004 10:42:14 PM] [Investortrader] That's it for tonight folks, gotta get something to eat before the race comes on
[3/10/2004 10:42:24 PM] [tobydad] thanks IT
[3/10/2004 10:42:24 PM] [Investortrader] Good trading tomorrow! :)
[3/10/2004 10:42:32 PM] [Investortrader] Welcome tobydad
[3/10/2004 10:42:47 PM] [Investortrader] I'm gone, have fun!
[3/10/2004 10:43:09 PM] [america] bye IT. many thanks. have fun.
[3/10/2004 10:43:22 PM] [cobralso] Thanks IT
