[3/4/2004 8:27:58 AM] [CDYTrader] 1.99x1.998

[3/4/2004 8:28:45 AM] [AlanD] Thats what I'm showing. I bought in yesterday at 1.36.

[3/4/2004 8:39:52 AM] [invest4eternity] Mornin' VJ

[3/4/2004 8:40:03 AM] [VJnet] hey invest

[3/4/2004 8:40:14 AM] [AlanD] Thats what my wife calls me VJ and good morning.

[3/4/2004 8:40:50 AM] [VJnet] hey Alan...good to see you

[3/4/2004 8:41:24 AM] [AlanD] Yes and you too. I'm still around. Just lurking and trading mostly.

[3/4/2004 8:41:49 AM] [VJnet] and making a ton of money, I'm sure

[3/4/2004 8:42:25 AM] [AlanD] LOL, I'm doing fairly well. Still have occassional losers but I think we all have those.

[3/4/2004 8:43:43 AM] [w2jc] Running List has been updated and cleaned up ... fetch from Hotto club / Reports

[3/4/2004 8:44:09 AM] [VJnet] ty jim

[3/4/2004 8:44:12 AM] [AlanD] I found a combo of EW and Fib analysis technique that works very well and have been using that quite a bit.

[3/4/2004 8:44:29 AM] [VJnet] that sounds interesting

[3/4/2004 8:45:39 AM] [dagwood] got to learn those waves.... That is next next goal and study

ClubHome

[3/4/2004 8:46:28 AM] [AlanD] Yes it is. EW gives me the target area and another tool I have points to the fib support area as its occurring in RT as the point in which the target area has been met. Just wish both techniques where in the same program.

[3/4/2004 8:47:09 AM] [dagwood] best book you might rec on that Alan

[3/4/2004 8:47:09 AM] [gary12] AlanD i have alot of losers but no big one's ;)

[3/4/2004 8:47:20 AM] [malealltrash] Good Morning all hope all having a great day ! looks like EVOL gonna be a runner today

[3/4/2004 8:49:47 AM] [AlanD] Dagwood, I don't have any book on using the two together. Just something I stumbled on. But "Applying Elliottwave Theory Profitably" by Steven Poser is suppose to be the best regarding the use of EW.

[3/4/2004 8:50:26 AM] [AlanD] Gary, so long as your money management techniques are sound you can have 50% losers and still do very well.

[3/4/2004 8:50:39 AM] [dagwood] thank you sir

[3/4/2004 8:52:12 AM] [hotto] Good Morning

[3/4/2004 8:52:23 AM] [AlanD] Hope that helped. Book doesn't cover the Autowave tool I use but the techniques as related to EW are pretty good. In EWA their are certain waves which have a high probability of being correct. If one narrows their focus on just those, EWA can work pretty well.

[3/4/2004 8:52:28 AM] [AlanD] GM Hott.

[3/4/2004 8:52:28 AM] [VJnet] gm hotto

[3/4/2004 8:52:37 AM] [gary12] gm

[3/4/2004 8:52:38 AM] [AlanD] sorry Hotto. Can type this morning.

[3/4/2004 8:52:43 AM] [hotto] AUO 18.30 + .58 This may be it !

[3/4/2004 8:52:51 AM] [AlanD] see "can" = can't

[3/4/2004 8:52:56 AM] [TraderGeorge] HOTTO HOTT down 1.37 pre-market because of a "downgrade on valuatiiion" by Piper Jaffray, after beating expectations by 1 cent.

[3/4/2004 8:53:25 AM] [acmetrader] HOTT CEO will be on CNBC 9:15

[3/4/2004 8:55:07 AM] [AlanD] Looking at the NDX--X the first downleg in January was a 5 wave down followed by a corrective ABC pattern into early Feb which was key from an EW perspective which signaled a possible change in trend.

[3/4/2004 8:58:22 AM] [AlanD] EW was saying that the January top had completed an intermediate wave up but the confirmation came from the 5 waves down and ABC correction.

[3/4/2004 8:59:18 AM] [ttfssf] DDDC popped yesterday, maybe today is VOCL's turn? i bot some at sma200 yesterday...

[3/4/2004 8:59:21 AM] [AlanD] Doesn't mean the NDX won't attempt to rechallenge the previous high, just that the near term upside movement from an EW perspective

had completed.

[3/4/2004 9:04:22 AM] [hotto] Thanks for the kind comments to everyone. The MarketView layout credit goes to Janet.

[3/4/2004 9:04:44 AM] [adcum] gm all

[3/4/2004 9:05:09 AM] [DMut] my comments earlier, so useful, improving all the time.

[3/4/2004 9:05:12 AM] [ChuckR] behind every successful man.....is a woman

[3/4/2004 9:05:14 AM] [tiga] ASKJ sheesh

[3/4/2004 9:05:15 AM] [johnport] Janet did a great job - it has made reviewing your thoughts so much easier

[3/4/2004 9:05:30 AM] [Johnster] Alan, the monthly TSV12 has now crossed down through it's RSI9 for the first time since this rally began 18 months ago...fwiw.

[3/4/2004 9:07:16 AM] [neofighter] Marketview-outstanding and definately worth the price of admission! Thanx hotto family.

[3/4/2004 9:09:57 AM] [sal3] Hotto The actual trades in marketview is the best improvement yet. Thanks.

[3/4/2004 9:10:24 AM] [AlanD] Johnster, that an interesting observation and one to look at closer. Does it have any history in terms of being a good indicator for other turn downs?

[3/4/2004 9:10:45 AM] [neofighter] AVNX-I am showing last trade at 3.41-anyone confirm?

[3/4/2004 9:11:06 AM] [neofighter] AVNX-5.41

[3/4/2004 9:12:12 AM] [Holland] AVNX 5.25

[3/4/2004 9:12:27 AM] [Investortrader] AVNX is now 5.14 x 5.22

[3/4/2004 9:12:34 AM] [neofighter] TY

[3/4/2004 9:13:16 AM] [mullet] Hotto: When do you try to post Market Views to Hottoworks?

[3/4/2004 9:13:21 AM] [Investortrader] FNSR, I bot a little at 2.51 in AH yesterday, only a partial fill

[3/4/2004 9:13:47 AM] [VJnet] gm again everyone

[3/4/2004 9:14:43 AM] [neofighter] FNSR, I already have enough. Maybe too much.

[3/4/2004 9:14:43 AM] [rsi77] Mullet, they usually show up within an hour or so of the end of his discussion--very timely!

[3/4/2004 9:14:46 AM] [pope39c] PLMO trading up .75

[3/4/2004 9:15:18 AM] [rsi77] LOOK trading higher PM, close to yesterday HOD

[3/4/2004 9:16:01 AM] [Investortrader] Hehehe neofighter

[3/4/2004 9:16:35 AM] [neofighter] I'm glad you're amused..:(

[3/4/2004 9:16:37 AM] [Johnster] Well, alan, if you look at it on a monthly chart, TSV 12 never got above RSI9 in the rally to 3/00 top, tho' both turned down at that ttime.

ClubHome

It's worked on stocks, where cross down is a sell signal. Right now, the monthly TSV12 will cross down below the 80 line if it drops further here, after bouncing off it in Sept/Oct. RSI is still climbing on monthly, flat on weekly and down on daily. Quarterly TSV also turning down at 89 line for first time since 3/00 top (actually it's flat top with quarterly doji candle0. Top seems near...how low it corrects, who knows?

[3/4/2004 9:16:59 AM] [hotto] mullet. Janet works on the article each afternoon - as I write it. She posts it in 2 stages. First the text.. usually by 9pmET - depending on how long it is.... then she adds the trade info.. maybe after dinner...)

[3/4/2004 9:17:18 AM] [Investortrader] Oh, sorry neo, I misread it and thought you said you already MADE enough on FNSR

[3/4/2004 9:17:24 AM] [hotto] Our dinner schedule here is pretty flexible.

[3/4/2004 9:18:01 AM] [adcum] very good hotto

[3/4/2004 9:18:38 AM] [neofighter] Actually, I think it is amusing also. Every time I get on a roll and think I have this understood, reality steps in.

[3/4/2004 9:19:54 AM] [AlanD] Really. I'll have to build a template of those indicators to get a better picture. EW for now telling me the decline in the NDX will be shallow. Perhaps as low as 1300 but most of my correlation is occurring around the 1400-1450 area.

[3/4/2004 9:20:16 AM] [Investortrader] That's a good psychological point to cover neofighter, like after a string of bad trades one should back off on size or position number or take a break ... I think after a series of being "in the zone" one should do the same thing

[3/4/2004 9:20:26 AM] [neofighter] On FNSR- I do think people are over reacting a bit. They are throwing this thing overboard like we were in Boston Harbor.

[3/4/2004 9:20:45 AM] [BWill] neo, I find the market to be "self-correcting" in more ways than one... :D

[3/4/2004 9:22:05 AM] [neofighter] BWill-so true-I have a tendency to think highly of myself-trading is the perfect place for me-at least that is what my wife says.

[3/4/2004 9:22:43 AM] [BWill] my wife would say"you're too hard on yourself, isn't the market enough? !!

[3/4/2004 9:23:22 AM] [neofighter] LOL :D

[3/4/2004 9:23:47 AM] [ttfssf] IDSA -1.48 in PM

[3/4/2004 9:23:58 AM] [HOTTO] monkeycat has replied to: LR30 Custom Indicator

[3/4/2004 9:24:09 AM] [AlanD] I tried to short IDSA yesterday morning. Couldn't get in.

[3/4/2004 9:24:20 AM] [neofighter] I'm holding my orange juice in the air (too early for a cold one) Here's to a good day!

[3/4/2004 9:24:22 AM] [dagwood] it that HowdyDowdy's boy?

[3/4/2004 9:24:54 AM] [dagwood] opps

[3/4/2004 4:21:56 PM] [StockStalker] Today we will have the mid-quarter update from Intel (INTC-NASDAQ). This will come out as a press release most likely at 4:15 PM

EST just like it did last quarter and most quarters, and there will be a webcast around 5:30 PM EST. The mid-quarter update last quarter included guidance for Revenues, Gross Margin, R&D, the Tax Rate, and Charges. While they did not offer an EPS number they did say "all other expectations are unchanged". Consensus estimates as they stand now are 0.28 EPS (although most are 0.28/0.27+) and about \$8.25B R\$.

[3/4/2004 5:12:14 PM] [RkyMtnFool] Short NVLS - this shouldn't be trading up on INTC news.

[3/4/2004 5:16:27 PM] [tiga] INTC ah not really taking the news all that bad

[3/4/2004 5:18:11 PM] [RkyMtnFool] INTC is recovering, down just 0.36 AH

[3/4/2004 5:20:23 PM] [rickmrge] VTIV..Ventiv Health (Nasdaq: VTIV) reports Q4 earnings of \$0.20 per share, 9 cents better than estimates. Revenues came in at \$75.2 million versus the consensus of \$58.4 million.

[3/4/2004 5:44:50 PM] [malealltrash] VTIV up almost 4.00 ah

[3/4/2004 5:47:07 PM] [tiga] Don't buy it now.....

[3/4/2004 5:48:16 PM] [tiga] not short but it's due for a little pb

[3/4/2004 5:48:57 PM] [tiga] INTC may be heading out to the wood shed now

[3/4/2004 5:52:09 PM] [SirPoolPlayer] And unemployment numbers in morning will need to shine.. to offset INTC

[3/4/2004 5:53:17 PM] [tiga] a little surprised there hasn't been more of a reaction in INTC still trading within today's range

[3/4/2004 6:01:51 PM] [beach] AP Poll finds Bush Kerry tied in race

[3/4/2004 6:04:57 PM] [rickmrge] no I just found it on a scan looks interesting good obv on the daley?

[3/4/2004 6:05:20 PM] [rickmrge] .

[3/4/2004 6:06:11 PM] [rickmrge] is there any targets on it?

[3/4/2004 6:12:18 PM] [tiga] INTC wrestled free from the old man taking it to the wood shed but looks like the old man may have some legs.....we'll see if INTC gets a #@% whoopin' here. so far the kid been pretty slippery

[3/4/2004 6:13:53 PM] [gary12] ;)

[3/4/2004 6:21:33 PM] [tiga] Quit squirmin' boy! Hey! Get back here..... Tune in tomorrow for the eciting conclusion to "You gonna get yours boy!"

[3/4/2004 8:30:10 PM] [Golfermary] Hi

[3/4/2004 8:30:20 PM] [Photobug] Hi

[3/4/2004 8:31:02 PM] [Investortrader] I don't have any particular charts of my own yet, so if any of you have any you would like me to look at, throw'em out

[3/4/2004 8:31:35 PM] [swingtrade] how about intc

[3/4/2004 8:31:58 PM] [Investortrader] INTC ...

[3/4/2004 8:32:52 PM] [Photobug] RCO, SANM, GFI

[3/4/2004 8:32:55 PM] [Investortrader] OBV on this one has been making new lows this whole downtrend since Jan so far

[3/4/2004 8:33:55 PM] [Investortrader] Looks like it went down AH when they made their announcement

[3/4/2004 8:34:43 PM] [Investortrader] It's been trying to base here but with the OBV not giving it much help

[3/4/2004 8:35:21 PM] [Investortrader] See in mid Feb where it tried to rally and the 20sma held it back, then again a couple of days ago .. same thing

[3/4/2004 8:35:49 PM] [Investortrader] This is one where I would want to see it prove itself before buying it ... with a break above the 20sma

[3/4/2004 8:36:41 PM] [Investortrader] Until then I wouldn't be buying it myself

[3/4/2004 8:37:17 PM] [Investortrader] Any questions on INTC?

ClubHome

[3/4/2004 8:38:45 PM] [swingtrade] no, thanks
[3/4/2004 8:39:02 PM] [Golfermary] Could you review IDSA today?
[3/4/2004 8:39:09 PM] [Investortrader] One more note on INTC, see the triple top it had Nov, Dec, and Jan
[3/4/2004 8:39:43 PM] [Investortrader] And see how the OBV was lower on that third top
[3/4/2004 8:39:53 PM] [Investortrader] Lower on the second one also
[3/4/2004 8:40:21 PM] [Investortrader] Each one of those tops with the lagging OBV was a warning to get out on any weakness
[3/4/2004 8:40:35 PM] [Investortrader] On to RCO ...
[3/4/2004 8:41:00 PM] [Investortrader] This one looks much better
[3/4/2004 8:41:26 PM] [Investortrader] We've been basing ever since the late Jan run-up
[3/4/2004 8:41:57 PM] [Investortrader] See how the vol was drying up ... much lower in the base than during the run-up
[3/4/2004 8:42:43 PM] [Investortrader] Had a healthy pb down to that breakout area in late Feb, but see how tiny the vol was then
[3/4/2004 8:43:00 PM] [Investortrader] And the OBV wasa holding up nicely
[3/4/2004 8:43:22 PM] [Investortrader] So when the price broke the 50sma it bounced right back ... sign of strength there
[3/4/2004 8:43:33 PM] [Investortrader] Now it's broken out on some good vol
[3/4/2004 8:44:22 PM] [Investortrader] One caveat ... I don't like commenting on such low priced stocks as I don't trade them ... so my comments don't carry near as much weight here
[3/4/2004 8:44:39 PM] [Investortrader] So on to SANM ...
[3/4/2004 8:44:43 PM] [Photobug] RCO, It appears that is has formed a symetrical triangle I think with the volume today it will breakout up, but wanted you opinion thanks,:8
[3/4/2004 8:44:55 PM] [Investortrader] Welcome Photobug :)
[3/4/2004 8:45:35 PM] [Investortrader] This one is trying to make a base here, has resistance right overhead at the 50sma
[3/4/2004 8:46:09 PM] [Investortrader] The 50sma is always an important place, so I would wait for a BO over that to buy
[3/4/2004 8:46:21 PM] [Photobug] On SANM, I felt it was an ABC down from the top of 15.51 but I'm not sure as it has rallied for the past several days
[3/4/2004 8:46:25 PM] [Investortrader] One other thing I might look for now is ...
[3/4/2004 8:46:37 PM] [mace] layn
[3/4/2004 8:47:01 PM] [Investortrader] If it were to have a low vol pb down to its

recent lows, with the OBV remaining good, that would be another place I might buy some at

[3/4/2004 8:47:38 PM] [dwells129] IT, please add SSYS and HTV to your growing list. SSYS appears to be heavily manipulated, see volume on 5's.

[3/4/2004 8:47:47 PM] [Investortrader] The C may have been on 2/24 .. or it may need to revisit that area

[3/4/2004 8:47:54 PM] [Photobug] ok, thanks Investor, I've been following it for a while.

[3/4/2004 8:48:03 PM] [Investortrader] Welcome :)

[3/4/2004 8:48:15 PM] [Investortrader] It is growing ;)

[3/4/2004 8:48:24 PM] [Investortrader] Any questions on SANM?

[3/4/2004 8:48:41 PM] [Photobug] no thanks again

[3/4/2004 8:48:51 PM] [Investortrader] On to GFI ...

[3/4/2004 8:49:29 PM] [Investortrader] This one looks good here

[3/4/2004 8:50:06 PM] [Investortrader] During the base from late Feb see how the OBV has been rising .. showing accumulation

[3/4/2004 8:51:20 PM] [Investortrader] Let's look at the 5's on this one for a minute

[3/4/2004 8:51:45 PM] [Photobug] yes I see the obv move , my own opinion is it is about to break up, it has retraced on somewhat less volume

[3/4/2004 8:52:22 PM] [Photobug] like those last 5 minutes

[3/4/2004 8:52:44 PM] [Investortrader] Yes, good vol that last 5 bar headed up

[3/4/2004 8:53:05 PM] [Investortrader] I like it anywhere in this area, should at least run up and tag the 50sma

[3/4/2004 8:53:13 PM] [Photobug] I'm in it an looking for a run back to the mid 14 area

[3/4/2004 8:53:40 PM] [Investortrader] Once it breaks above the 3/1 hod ...

[3/4/2004 8:53:42 PM] [Photobug] might be too optimistic., but

[3/4/2004 8:53:55 PM] [Photobug] yes I agree

[3/4/2004 8:54:01 PM] [Investortrader] That projects to 14 area

[3/4/2004 8:54:19 PM] [Photobug] I'll let someone else go thanks IT=D

[3/4/2004 8:54:28 PM] [Investortrader] Maybe not too optimistic there, depends on time frame

[3/4/2004 8:54:35 PM] [Investortrader] Welcome :)

[3/4/2004 8:54:43 PM] [Investortrader] Any questions on GFI?

[3/4/2004 8:54:50 PM] [Photobug] no sire thanks!

[3/4/2004 8:55:15 PM] [Investortrader] On to SLNK ...

[3/4/2004 8:55:20 PM] [mace] if employment picks up and interest rates rise gold will go down?

[3/4/2004 8:55:42 PM] [jasp] Investor, Like your chart - especially the OBV with BB and MA

[3/4/2004 8:55:46 PM] [Investortrader] If interest rates rise, it will help the \$ also, and both of those will hurt gold, yes

[3/4/2004 8:56:12 PM] [Photobug] well yes, but inflation is here, check the price of gas, milk etc

[3/4/2004 8:56:13 PM] [Investortrader] Thanks jasp, I call it my KISS chart, Keep It Simple Somehow ;)

[3/4/2004 8:56:13 PM] [tobydad] bkhm

[3/4/2004 8:56:26 PM] [tobydad] sorry, error

[3/4/2004 8:56:59 PM] [Investortrader] SLNK is having what looks like a typical consolidation pattern after that big gap up day

[3/4/2004 8:57:38 PM] [Investortrader] It's come down close to the 50sma both days, and is on lower volume, looks like just a little pt rest here

[3/4/2004 8:57:40 PM] [mace] SLNK got 2 big new contracts

[3/4/2004 8:57:47 PM] [Investortrader] Thanks mace :)

[3/4/2004 8:57:55 PM] [Investortrader] No wonder it popped!

[3/4/2004 8:58:29 PM] [Investortrader] OBV is remaining above it's 50sma here on this little pb from the pop

[3/4/2004 8:59:04 PM] [Investortrader] May need another day or two of rest here, but I wouldn't be worried if I owned it

[3/4/2004 8:59:33 PM] [Investortrader] Might even look to pick some up around the 50sma

[3/4/2004 9:00:25 PM] [Investortrader] Any questions on SLNK?

[3/4/2004 9:00:41 PM] [mace] layn

[3/4/2004 9:00:45 PM] [gary12] TY IT :)

[3/4/2004 9:01:15 PM] [Investortrader] Got IDSA first, then LAYN ...

[3/4/2004 9:01:35 PM] [Investortrader] IDSA ... I wouldn't buy it up here

[3/4/2004 9:01:52 PM] [mace] looks short to me

[3/4/2004 9:01:56 PM] [Investortrader] But it's a great example of riding the upper BB

[3/4/2004 9:02:14 PM] [jasp] 2 for 1 split for holders as of 3/16

[3/4/2004 9:02:15 PM] [Investortrader] I've gone over that in a few classes before

[3/4/2004 9:02:28 PM] [Photobug] awesome stock, hope you had it from 5

[3/4/2004 9:02:39 PM] [Investortrader] Once a stock hits the upper BB, it can ride it for awhile .. this is an extreme example!

[3/4/2004 9:03:22 PM] [Investortrader] I'd want to know the story that propelled this stock before shorting it ... but if it were to run up on weak vol that might be a good

place to short

[3/4/2004 9:03:44 PM] [Investortrader] A failure at the upper BB

[3/4/2004 9:03:56 PM] [jasp] Investor - it is a split story. Should drop after the split

[3/4/2004 9:04:08 PM] [jasp] IDSA

[3/4/2004 9:04:13 PM] [Investortrader] It ran from 4 to 40 just on split news?

[3/4/2004 9:04:35 PM] [jasp] Evidently.

[3/4/2004 9:05:08 PM] [Investortrader] That's what I would look to do in this, certainly wouldn't buy it ... too much risk

[3/4/2004 9:05:18 PM] [mace] I have researched this stock, I dont have any idea how it could have done this move

[3/4/2004 9:05:35 PM] [Investortrader] mace ... big short interest and a small float perhaps?

[3/4/2004 9:05:47 PM] [mace] I guess??

[3/4/2004 9:06:10 PM] [mace] Blows me away who would have bought it today

[3/4/2004 9:06:13 PM] [Investortrader] Think I'll keep an eye on it for shorting ...

wonder if there are shares available lol

[3/4/2004 9:06:14 PM] [Golfermary] THanks IT it was traded today for large \$\$ from about \$32 to \$36

[3/4/2004 9:06:30 PM] [jasp] Went from no revenue to over \$100 M and from loss to .42 per share -

[3/4/2004 9:06:33 PM] [Investortrader] Welcome Golfermary :)

[3/4/2004 9:06:39 PM] [jasp] Could be one reason.

[3/4/2004 9:07:01 PM] [mace] looks like bubble to mew

[3/4/2004 9:07:06 PM] [Investortrader] Must be a small float, that's a lot of profit per share for such little revenue

[3/4/2004 9:07:23 PM] [jasp] Read the 3/4/04 news item. 4th quarter results

[3/4/2004 9:08:10 PM] [jasp] All I know is what I read in the new releases :8

[3/4/2004 9:08:33 PM] [Investortrader] :D

[3/4/2004 9:08:41 PM] [Investortrader] Any questions on IDSA?

[3/4/2004 9:09:06 PM] [Golfermary] Nope, just wish I had only known!!

[3/4/2004 9:09:12 PM] [Investortrader] ME too!

[3/4/2004 9:09:18 PM] [jasp] Me three

[3/4/2004 9:11:11 PM] [Investortrader] This one looks nice, steady uptrend, great
OBV leading the way the whole way
[3/4/2004 9:11:18 PM] [ChuckR] jidsa
[3/4/2004 9:11:37 PM] [mace] I lobe it in from 7.50
[3/4/2004 9:11:41 PM] [ChuckR] sorry
[3/4/2004 9:11:42 PM] [mace] love
[3/4/2004 9:11:49 PM] [Investortrader] Nice mace!
[3/4/2004 9:12:09 PM] [mace] just think I should sell ??
[3/4/2004 9:12:29 PM] [Investortrader] After it broke out in late Nov, it based
thruoughout DEc and into Jan
[3/4/2004 9:12:46 PM] [Investortrader] Then broke up fom that base and since then
the 20sma has held all pb's
[3/4/2004 9:13:40 PM] [Investortrader] Sell for good or sell to trade around your
position?
[3/4/2004 9:14:13 PM] [Investortrader] I wouldn't sell for good any stock still in an
uptrend like this one is, never know where the top might be
[3/4/2004 9:14:44 PM] [Investortrader] Might be today, might be next month, might be
next fall
[3/4/2004 9:15:23 PM] [Investortrader] Since the 20sma has been holding it I might
consider using that as a stop area, just below it a bit
[3/4/2004 9:15:24 PM] [Photobug] IT if you look way back it could have at least 17 in
it???
[3/4/2004 9:15:43 PM] [Photobug] weekly chart back to 1998?
[3/4/2004 9:16:11 PM] [Investortrader] Here's a monthly chart
[3/4/2004 9:16:31 PM] [Investortrader] I see that 17 area you are looking at
[3/4/2004 9:16:55 PM] [lavenderangel] if you have nothing else lined up, could you
look at IBM?
[3/4/2004 9:17:02 PM] [Photobug] since it has run so far it might try to reach it
although I dont like the vol
[3/4/2004 9:17:10 PM] [Investortrader] I wouldn't just sell here mace if I owned it
[3/4/2004 9:17:31 PM] [mace] the vol in dropping
[3/4/2004 9:17:38 PM] [Investortrader] But I would have a stop somewhere
underneath so I don't give it all back
[3/4/2004 9:18:01 PM] [Investortrader] Notice after every nice vol up day, the vol
drops and it bases some more
[3/4/2004 9:18:40 PM] [Investortrader] If you want to try to scalp it some, maybe ...
but I wouldn't sell out and walk away

[3/4/2004 9:19:02 PM] [Investortrader] At least not today
[3/4/2004 9:19:37 PM] [Investortrader] On to SSYS ...
[3/4/2004 9:19:43 PM] [mace] I have stop at 14.65
[3/4/2004 9:20:18 PM] [Investortrader] Pretty tight, but I see your concern on the vol dropping
[3/4/2004 9:20:57 PM] [jasp] drte?
[3/4/2004 9:21:23 PM] [Investortrader] Lots of vol on that last 5 min bar
[3/4/2004 9:21:52 PM] [Investortrader] A little vol BO just before, then someone piled in
[3/4/2004 9:22:18 PM] [Investortrader] The daily looks ok here
[3/4/2004 9:22:51 PM] [Investortrader] Had a gap down on vol followed by another big vol down day on 2/18 and 2/19
[3/4/2004 9:23:48 PM] [Investortrader] On 2/24 it had a doji, which could be a reversal signal ... it's been basing ever since then
[3/4/2004 9:24:02 PM] [Investortrader] With OBV rising slightly .. always a positive sign
[3/4/2004 9:24:24 PM] [dwells129] do those heavy vol days through off the OBV, otherwise it looks to be pos diver on OBV vs Price
[3/4/2004 9:24:31 PM] [Investortrader] This one looks good for a possible bounce to the 20sma
[3/4/2004 9:25:30 PM] [dwells129] that pile in thing happened both of the last two trading day, then down right away the next morning.
[3/4/2004 9:25:30 PM] [Investortrader] Will need to re-evaluate there and see how it reacts
[3/4/2004 9:25:43 PM] [dwells129] next
[3/4/2004 9:26:05 PM] [Investortrader] That's good to know dwells, I was about to say if it opened up in the morning would be a good sign ... now it will be even better
[3/4/2004 9:26:41 PM] [Investortrader] And if it follows that down right away next morning ... I'd pass on it for now and wait another day until it BO from this base
[3/4/2004 9:27:35 PM] [Investortrader] Any questions on SSYS?
[3/4/2004 9:27:51 PM] [dwells129] i sold it this afternoon and it went nuts a half hour later. did not lose money though, but it irks me. only 80K shares traded around 2:30 PM
[3/4/2004 9:28:15 PM] [Investortrader] Hard to say on those lightly traded days
[3/4/2004 9:28:35 PM] [dwells129] 250K in the last hour
[3/4/2004 9:28:45 PM] [Investortrader] Might get another chance if it does back up, or if it does BO can jump back in it
[3/4/2004 9:29:06 PM] [Investortrader] I think I'll watch it in the morning and see which

way it goes

[3/4/2004 9:29:20 PM] [mace] .

[3/4/2004 9:29:22 PM] [Investortrader] On to HTV ...

[3/4/2004 9:29:24 PM] [mace] .

[3/4/2004 9:30:08 PM] [Investortrader] I mentioned this one last Fri I think, as having a very nice OBV divergence

[3/4/2004 9:30:55 PM] [Investortrader] On 2/27, also mentioning how it was a doji and possible bottom formation

[3/4/2004 9:31:31 PM] [Investortrader] I would have liked to have seen a little more vol today, but the chart looks good to me

[3/4/2004 9:32:37 PM] [dwells129] i sold this one too, the light vol threw me. I was afraid it was only up due to Naz being up.

[3/4/2004 9:32:52 PM] [Investortrader] But look at that OBV!

[3/4/2004 9:33:27 PM] [Investortrader] It may still be basing here and come back down a little

[3/4/2004 9:33:41 PM] [dwells129] i know, i wish i still had it, but tomorrows numbers could really trash the market.

[3/4/2004 9:33:50 PM] [Investortrader] With the lower vol day today .. but I would have held it

[3/4/2004 9:34:03 PM] [Investortrader] That is true

[3/4/2004 9:34:21 PM] [Investortrader] Market is sensitive to those numbers now too

[3/4/2004 9:34:22 PM] [dwells129] all cash right now.

[3/4/2004 9:34:43 PM] [mace] fundamentals not great on it

[3/4/2004 9:35:00 PM] [dwells129] thx for the comments. i am going to keep a watch on these two.

[3/4/2004 9:35:08 PM] [Investortrader] I like the chart

[3/4/2004 9:35:14 PM] [Investortrader] Welcome dwells :)

[3/4/2004 9:35:16 PM] [dwells129] Mace, on HTV?

[3/4/2004 9:35:25 PM] [Investortrader] Any questions on HTV?

[3/4/2004 9:36:33 PM] [jasp] WOUld you please look at OEX

[3/4/2004 9:36:43 PM] [Investortrader] On to IBM ...

[3/4/2004 9:38:43 PM] [Investortrader] I don't really like this one

[3/4/2004 9:39:08 PM] [lavenderangel] what about for a short?

[3/4/2004 9:39:16 PM] [Investortrader] I don't really like it either way here

[3/4/2004 9:39:25 PM] [lavenderangel] ok, why?

[3/4/2004 9:39:28 PM] [Investortrader] Though it does look a bit more negative than positive

[3/4/2004 9:39:55 PM] [Investortrader] It's holding the 50sma here, wouldn't short it

ClubHome

unless that was taken out

[3/4/2004 9:40:12 PM] [mace] Id short if breaks below 50ma

[3/4/2004 9:40:15 PM] [lavenderangel] ok, that's what i'm missing!

[3/4/2004 9:40:41 PM] [lavenderangel] I've made a 100 on a short and lost a 100 on IBM short. now i know why

[3/4/2004 9:40:47 PM] [Investortrader] It may bounce off the 50sma here some, that would be normal ... but I don't get the feeling that it would make much of a new high if it did

[3/4/2004 9:41:12 PM] [Investortrader] So not much room to the upside for profits either

[3/4/2004 9:41:25 PM] [Investortrader] 50sma is very important lavender :)

[3/4/2004 9:41:29 PM] [mace] risk reward

[3/4/2004 9:41:36 PM] [Investortrader] Exactly mace

[3/4/2004 9:41:43 PM] [lavenderangel] ok, so i need to wait and be more patient. maybe i'll cover and take my 19. profit

[3/4/2004 9:42:04 PM] [lavenderangel] I think of it for longs but not for shorts!

[3/4/2004 9:42:08 PM] [Investortrader] If it broke the 50sma, I would expect it to attempt to fill that gap from mid-Jan

[3/4/2004 9:42:25 PM] [Investortrader] At the very least

[3/4/2004 9:42:30 PM] [lavenderangel] ok, i just started too soon.

[3/4/2004 9:42:46 PM] [mace] TOY

[3/4/2004 9:43:01 PM] [Investortrader] Just a bit soon, still might work out

[3/4/2004 9:43:14 PM] [Investortrader] OBV is saying lower here

[3/4/2004 9:43:54 PM] [Investortrader] Any questions on IBM?

[3/4/2004 9:44:55 PM] [Investortrader] On to DRTE ...

[3/4/2004 9:45:08 PM] [lavenderangel] thank you, IT

[3/4/2004 9:45:15 PM] [Investortrader] Welcome lavender :)

[3/4/2004 9:46:32 PM] [lindy] Is OBV showing a bullish divergence to price, IT?

[3/4/2004 9:46:44 PM] [jasp] OBV strong - Bullish Engulfing. Volume low.

[3/4/2004 9:46:50 PM] [Investortrader] It sure is lindy :)

[3/4/2004 9:47:57 PM] [Investortrader] It looks ok, OBV is saying higher, right jasp, a bit low vol last two days here

[3/4/2004 9:48:21 PM] [Investortrader] But the run-up off the attempted gap fill was on ok vol

[3/4/2004 9:48:40 PM] [mace] reported positive guidance too

[3/4/2004 9:48:53 PM] [Investortrader] That is always a plus!

[3/4/2004 9:48:55 PM] [jasp] Has new contract 3/2/04

[3/4/2004 9:49:13 PM] [jasp] This looks like a play to me.

[3/4/2004 9:49:13 PM] [mace] G+ on Hotto list
[3/4/2004 9:49:40 PM] [Investortrader] Might try to pick it up if it tests the 50sma again, or on a BO of the LR30
[3/4/2004 9:49:46 PM] [REB2186] IT, I missed your UBB strategy -- would like to see it.
[3/4/2004 9:49:53 PM] [Investortrader] Looking for a quick run to the upper BB
[3/4/2004 9:50:12 PM] [jasp] any concern about LR30?
[3/4/2004 9:50:34 PM] [jasp] Stopped there last two days
[3/4/2004 9:50:55 PM] [Investortrader] REB, if you look in discussions there is posted a pretty comprehensive talk I did on ITIG which has a lot of riding the upper BB stuff in it and what to look for and when to sell
[3/4/2004 9:50:55 PM] [mace] buy if break LR30
[3/4/2004 9:51:17 PM] [Investortrader] Right jasp, that's why I said a BO of the LR30 could be a buy
[3/4/2004 9:51:29 PM] [jasp] Thank you
[3/4/2004 9:51:36 PM] [Investortrader] If it wants to go tomorrow and doesn't want to retest the 50sma
[3/4/2004 9:52:18 PM] [Investortrader] I didn't really cover upper BB theory tonight, just mentioned that it would have kept you in the whole ride on IDSA if you had gotten in early
[3/4/2004 9:53:50 PM] [Investortrader] The only wary thing I see on the DRTE chart is how OBV died during the gap fill attempt ...but it's more than recovered and nicely, so that's not a real big concern
[3/4/2004 9:54:20 PM] [lindy] IT, I have to go, but thank you -- this has been very informative. I will study the Hotto archives.
[3/4/2004 9:54:33 PM] [Investortrader] And filling about half the gap is a good sign of strength (as opposed to completely filling the gap)
[3/4/2004 9:54:39 PM] [Investortrader] Welcome lindy :)
[3/4/2004 9:55:04 PM] [Investortrader] Any questions on DRTE?
[3/4/2004 9:55:14 PM] [jasp] Thank you again.
[3/4/2004 9:55:51 PM] [SusanM] On DRTE 60', price closed right at 50ma
[3/4/2004 9:55:52 PM] [Investortrader] lindy, Hotto has a paper on his website on OBV also .. if you're not a member look in the sat chats of Nov '02 where the paper was taken from for them
[3/4/2004 9:56:30 PM] [mace] torm
[3/4/2004 9:56:37 PM] [Investortrader] I see that Susan :)
[3/4/2004 9:57:45 PM] [Investortrader] Someone asked about OEX, I don't trade indexes but I'll take a quick look

[3/4/2004 9:58:13 PM] [mace] toy & Torm
[3/4/2004 9:58:32 PM] [Investortrader] Pick one, I gotta leave in 2 minutes :) I'll do the other one in the morning or later tonight
[3/4/2004 9:59:04 PM] [Investortrader] OEX no real comment, sodeways till it breaks one way or the other, in a long base here
[3/4/2004 9:59:04 PM] [jasp] Skip OEX if you wish.
[3/4/2004 9:59:34 PM] [Investortrader] TOY ... (last one for now)
[3/4/2004 9:59:55 PM] [Investortrader] OBV confirming the new high, looks positive here
[3/4/2004 10:00:09 PM] [Investortrader] Up on the upper BB
[3/4/2004 10:00:22 PM] [Investortrader] Time to pay close attention every day if you own it here
[3/4/2004 10:00:42 PM] [Investortrader] Of course you should be doing that anyway ;)
[3/4/2004 10:00:56 PM] [Investortrader] But every day is important while riding an outer BB
[3/4/2004 10:01:16 PM] [johntrade] ivx
[3/4/2004 10:01:17 PM] [Investortrader] I wouldn't worry about today's action
[3/4/2004 10:03:05 PM] [Investortrader] Any questions on TOY before I take off?
[3/4/2004 10:03:23 PM] [mace] thanks IT
[3/4/2004 10:03:26 PM] [Investortrader] I'll do TORM either later tonight or in the morning

[3/4/2004 10:04:06 PM] [Investortrader] Welcome Susan, gotta run! No time .. thanks Aktony .. I'm gone *poof*
[3/4/2004 10:30:05 PM] [hotto] ENDP... remember ? earlier today.. I said... ENDP "really needs" over 600K shares to be "ok" with the Bullish engulfing....
[3/4/2004 10:30:28 PM] [hotto] At the close... ENDP had only about 430K shares... BUT.
[3/4/2004 10:30:45 PM] [hotto] The "boys" fixed it up... .in AH...
[3/4/2004 10:31:03 PM] [hotto] now.. ENDP shows 606K shares... Magic !
