[1/13/2004 12:00:48 AM] [Luigistock] Standalone as far as i know has produced some nice gains with vol scan alone have to ask oz details though..hows your "grail" coming along?

[1/13/2004 12:01:11 AM] [StockStalker] the way it works is like this... we host the servers... lots of them.. have the T1 lines... lots of them.. have the 1.5 megabit SnP satellite feed (big bux) and process against the whole market.... then the output goes to ur client software and uses little of ur resources

[1/13/2004 12:01:49 AM] [AlanD] Grail still working though I've put it on hold mostly to play the January effect microcap stocks. The gains have been too good to pass up.

[1/13/2004 12:01:52 AM] [StockStalker] can find anything I want with it.. just need to be able to describe it mathematically

[1/13/2004 12:03:00 AM] [StockStalker] in any time frame

[1/13/2004 12:03:35 AM] [AlanD] That seems to be the hard part. The code to do what you want. WealthLab is somewhat good at that.

[1/13/2004 12:03:39 AM] [StockStalker] Teresa Lo uses a "Grail" Setup

[1/13/2004 12:04:17 AM] [AlanD] One of my picks for tomorrow is TGAL. Just one type of setup I look for.

[1/13/2004 12:05:02 AM] [StockStalker] bot TGAL for 2.06 on 12/19

[1/13/2004 12:05:41 AM] [StockStalker] 22k shares since it was rated "Stalker Setup"

[1/13/2004 12:05:58 AM] [StockStalker] only about 2-4 % get rated that

[1/13/2004 12:06:59 AM] [StockStalker] Hotto are u awake or are u in ur other room

[1/13/2004 12:07:00 AM] [AlanD] I use a variety of scans to find stocks like TGAL but on 19 Dec., TCScan+ would have spit it out as a possible MoneyStream setup currently in a pullback.

[1/13/2004 12:07:52 AM] [Luigistock] I think hotto is doing the dinner thing oz

[1/13/2004 12:08:10 AM] [StockStalker] ALTI about 2.04 ish day of move

[1/13/2004 12:08:12 AM] [FirstWave] TGAL a MOBO pick on 10/3 and 12/29

[1/13/2004 12:08:48 AM] [Luigistock] So Alan what are you seeing in TGAL at this point?

[1/13/2004 12:09:43 AM] [Luigistock] ABC bo

[1/13/2004 12:10:04 AM] [StockStalker] I rather have some fresh meat and not jerky...

[1/13/2004 12:12:28 AM] [StockStalker] AMZN looking perky

[1/13/2004 12:12:57 AM] [AlanD] I like the volume on TGAL and the pattern setup. I wouldn't buy though unless I get a confirming break above the 3.55 area.

[1/13/2004 12:14:02 AM] [Luigistock] So you are playig the abc reset and bo right?

[1/13/2004 12:14:54 AM] [AlanD] Hey guys have to run for now. Wife just got home.

[1/13/2004 12:21:18 AM] [ChartMonkey] but, think of a mighty chariot, being pulled along at high speed by a legion of ants ...

[1/13/2004 6:04:24 PM] [Investortrader] Hi aktony

[1/13/2004 6:04:37 PM] [Luigistock] Teach us some stuff prof :)

[1/13/2004 6:04:38 PM] [Aktony] good to see you. Looking forward to your class

[1/13/2004 6:04:49 PM] [Investortrader] I got requests during the day to cover FNSR and SCKT so I'll do those two first

[1/13/2004 6:05:33 PM] [Investortrader] FNSR ...

[1/13/2004 6:05:44 PM] [Investortrader] One of Hotto's last mile buildout stocks

[1/13/2004 6:06:14 PM] [Investortrader] This one had a very nice base build thru most of Dec

[1/13/2004 6:06:59 PM] [Investortrader] Broke out on 1/5 on good volume, and has been riding the upper BB since

[1/13/2004 6:07:08 PM] [Investortrader] With OBV confirming the move

[1/13/2004 6:07:50 PM] [Investortrader] If you look back to mid Nov, 18-24 or so,

ClubHome

you'll see it's hitting a bit of resistance in this area

[1/13/2004 6:08:51 PM] [Investortrader] Most of you should have some good profits in this one if you were buying back when Hotto was accumulating it around \$3

[1/13/2004 6:09:26 PM] [Investortrader] I would want to see the 50sma hold on it on any pb here

[1/13/2004 6:10:31 PM] [Investortrader] It could easily test that area with the market feeling a bit heavy here

[1/13/2004 6:11:14 PM] [Investortrader] Especially with a bit more volume today on the downturn

[1/13/2004 6:11:24 PM] [Investortrader] Not an alarming amount of volume however

[1/13/2004 6:11:55 PM] [Investortrader] If you aren't in and want to get in, that would be a good place to put an order, a few cents above the 50sma

[1/13/2004 6:12:12 PM] [Investortrader] Or if you have scalped out some, a good add back area

[1/13/2004 6:13:00 PM] [Investortrader] Any questions on FNSR?

[1/13/2004 6:13:48 PM] [bluesman] if it falls to the Ir30 what then?

[1/13/2004 6:14:03 PM] [Kasa] does it look like head and shoulder, strong resistance at double top

[1/13/2004 6:14:20 PM] [Investortrader] I would probably get out if it broke the 50sma and not wait for the LR30, depends on the volume

[1/13/2004 6:14:39 PM] [bluesman] ok

[1/13/2004 6:15:04 PM] [Investortrader] Kasa, dbl top in Nov?

[1/13/2004 6:15:19 PM] [Kasa] yes,

[1/13/2004 6:15:35 PM] [Investortrader] The 4.10, the lower of the two tops, looks like it will be resistance also

[1/13/2004 6:16:03 PM] [Investortrader] One more thing on FNSR, looking at 1/5 and 1/6

[1/13/2004 6:16:30 PM] [Investortrader] The highs of those days where it broke out, are just above where the 50sma is now

[1/13/2004 6:16:57 PM] [Investortrader] Another reason I would get out using a break of the 50sma

[1/13/2004 6:17:42 PM] [Investortrader] Especailly on any volume

[1/13/2004 6:18:07 PM] [Investortrader] Moving on to SCKT ...

[1/13/2004 6:19:00 PM] [Investortrader] This one sold off the beginning of Dec, notice the price pattern on 12/10

[1/13/2004 6:19:35 PM] [Investortrader] Much increased volume and that bar on 12/10 is a bullish bar after a big sell-off, washout day

[1/13/2004 6:19:51 PM] [Investortrader] Built a little base for about 2 weeks

ClubHome

[1/13/2004 6:20:11 PM] [Investortrader] Around 3.25 was the high during the base
[1/13/2004 6:20:32 PM] [Investortrader] Broke out on 12/24 on good volume especially for teh holiday week
[1/13/2004 6:20:50 PM] [Investortrader] Came right down and tested the top of the base
[1/13/2004 6:21:29 PM] [Investortrader] Broke out again and tried to ride the upper BB but lacked the volume to do that
[1/13/2004 6:22:15 PM] [Investortrader] The volume being under it's 30sma was a clue there, as was how it could barely get up to the upper BB
[1/13/2004 6:22:59 PM] [Investortrader] The LR30 and the middle BB have converged , looks like that's a minimum test for the price here
[1/13/2004 6:23:17 PM] [Investortrader] I wouldn't be surprised to see it re-test that 3.25 area either
[1/13/2004 6:24:02 PM] [Investortrader] Today's price bar looks like continued downside also
[1/13/2004 6:24:47 PM] [Investortrader] OBV looks a bit suspicious here too
[1/13/2004 6:25:07 PM] [Investortrader] Not bad yet, but could easily get bad
[1/13/2004 6:26:10 PM] [bluesman] The six downdays would constitute technical damage, and suggest overhead supply making it difficult to gain ground? awhile?
[1/13/2004 6:26:34 PM] [bluesman] ignore awhile
[1/13/2004 6:26:53 PM] [Investortrader] 6 down days?
[1/13/2004 6:27:32 PM] [bluesman] in early dec
[1/13/2004 6:27:46 PM] [poppop_1943] IT, if you have time could you comment on CAMP to see if my analysis is correct. ty
[1/13/2004 6:28:13 PM] [Investortrader] Ok, yes .. the base was only 2 weeks long in Dec after that, usually I like to see a bit longer base for a try to get over that cascading waterfall of downdays early Dec
[1/13/2004 6:28:22 PM] [Investortrader] Get that one next poppop
[1/13/2004 6:29:03 PM] [Investortrader] If I wanted to get into SCKT I would try to get it just over the 3.25 area
[1/13/2004 6:29:17 PM] [Investortrader] And be out quick if that failed
[1/13/2004 6:29:36 PM] [TrendFriend] read phase 3 trial CAMP, EXCELLENT results, no morbidity, sounds like prostate vaccine will be fast tracted
[1/13/2004 6:30:21 PM] [Investortrader] Any questions on SCKT?
[1/13/2004 6:30:53 PM] [TrendFriend] agree FW, will go down but it WILL be back
[1/13/2004 6:31:45 PM] [Kasa] i'm holding sckt, what would be my stop from the chart , 50dma?
[1/13/2004 6:32:03 PM] [Investortrader] One more thing on SCKT, usually after a

ClubHome

failed tag of an outer BB, like we had early Jan with the upper BB failure, the middle BB will be hit

[1/13/2004 6:32:39 PM] [Investortrader] Kasa, where are you in from? It's already below the 50sma

[1/13/2004 6:33:02 PM] [Kasa] 3.62

[1/13/2004 6:33:13 PM] [Kasa] v smal loss

[1/13/2004 6:33:31 PM] [Investortrader] Looks like it will get bigger before it gets smaller here

[1/13/2004 6:33:56 PM] [Kasa] ty will be watchin tomorrow

[1/13/2004 6:33:58 PM] [Investortrader] If you are a longer term trader, I would hold unless it fell below that 3.25 area of good support

[1/13/2004 6:34:23 PM] [Investortrader] Although that's over 10% risk ... but you didn't get in at the best place

[1/13/2004 6:34:42 PM] [Kasa] this is what i was thinking when decided not to sell today

[1/13/2004 6:35:23 PM] [Investortrader] One thing I try to do is buy near support, low risk

[1/13/2004 6:35:45 PM] [bluesman] that's what makes entry price so critical

[1/13/2004 6:35:50 PM] [Investortrader] True bluesman

[1/13/2004 6:36:18 PM] [Investortrader] If you missed the breakout in Dec, it gave a good opportunity to get back in around the first of the year at that breakout price

[1/13/2004 6:36:48 PM] [Investortrader] Ok, on to CAMP ...

[1/13/2004 6:37:23 PM] [TrendFriend] sorry, I was referring to DNDN, not CAMP

[1/13/2004 6:38:05 PM] [Investortrader] Big breakout gap on very big volume late Dec

[1/13/2004 6:38:20 PM] [Investortrader] Sideways since then

[1/13/2004 6:38:58 PM] [Investortrader] OBv looks to be falling slightly during the sideways action

[1/13/2004 6:40:21 PM] [Investortrader] The low of this sideways action on 12/26 ... we're almost there, I wouldn't want to see that fail if I held this one

[1/13/2004 6:40:32 PM] [Investortrader] That was at 13.53

[1/13/2004 6:41:27 PM] [Investortrader] Doesn't feel like it was a break-away gap with this long of sideways movement, thus it should get at least partially filled, which is why I wouldn't want to see that 13.53 fail

[1/13/2004 6:42:29 PM] [Stixman] What stock are we talking about?

[1/13/2004 6:42:30 PM] [Investortrader] I don't see anything in the chart to compel me to buy it up here

[1/13/2004 6:42:34 PM] [Investortrader] CAMP

[1/13/2004 6:42:43 PM] [poppop_1943] if i know how to do it properly, the fib38 is

ClubHome

almost there the sma20 is. is that correct and would that be the next level of support if 13.51 fails.

[1/13/2004 6:42:47 PM] [Stixman] thx

[1/13/2004 6:43:10 PM] [poppop_1943] where not there

[1/13/2004 6:43:26 PM] [Investortrader] The 20sma is around the 12.50 level

[1/13/2004 6:44:59 PM] [Investortrader] It might hold there, but I want to see how it trades from here to there first

[1/13/2004 6:45:27 PM] [Investortrader] Probably a lot of new people in it now, and if it starts to drop could get a bit ugly as they try to get out

[1/13/2004 6:46:03 PM] [Investortrader] I know if I held it before the big gap up, I'd have sold it by now

[1/13/2004 6:47:04 PM] [Stixman] It would be showing strength if it can hold the gap but it looks unlikely to me you have stoc and OBV down and today's bar giving a sell on the lower bb. Might hold 20sma at around 12.50 but more likely will go down to the 50 sma around 10.50 (currently) JMHO

[1/13/2004 6:47:24 PM] [bluesman] no never been there

[1/13/2004 6:47:59 PM] [SmartTrader] If you have time can you look over BCON, plz

[1/13/2004 6:48:03 PM] [Investortrader] I was thinking same thing Stixman, 50sma looks like better support, more of a gap fill, and should be more buyers there than at the 20sma, plus lots more newer hands holding it since the gap up from all those selling it who owned it before the gap up

[1/13/2004 6:48:19 PM] [poppop_1943] ty. that was pretty much my analysis.

[1/13/2004 6:48:28 PM] [Investortrader] And those newer hands could push it down that far if it starts to drop

[1/13/2004 6:48:33 PM] [poppop_1943] maybe i am learning.

[1/13/2004 6:48:33 PM] [Investortrader] Welcome poppop :)

[1/13/2004 6:48:47 PM] [Investortrader] Any other questions on CAMP?

[1/13/2004 6:48:47 PM] [poppop_1943] ty. glad to be here.

[1/13/2004 6:49:18 PM] [Investortrader] On to BCON ...

[1/13/2004 6:50:40 PM] [Investortrader] I generally don't like commenting on ones this low as I never trade them ...

[1/13/2004 6:51:02 PM] [Investortrader] Looked like a nice breakout yesterday, but right back down today

[1/13/2004 6:51:25 PM] [SmartTrader] Do you think the down pattern will continue or possibly chance to go up?

[1/13/2004 6:52:07 PM] [Investortrader] It was on lower volume, and with the LR30 and middle BB convergence, that could hold it ... I'd definitely be out if it failed those

[1/13/2004 6:52:26 PM] [SmartTrader] ty.

ClubHome

[1/13/2004 6:52:52 PM] [Investortrader] Welcome, I don't feel comfortable doing TA on these low priced ones

[1/13/2004 6:53:02 PM] [Investortrader] As i have no experience trading them

[1/13/2004 6:53:19 PM] [Luigistock] just use price and volume all you need on lil guys

[1/13/2004 6:53:46 PM] [Luigistock] range contraction and expansion confirmed by volume

[1/13/2004 6:54:02 PM] [Investortrader] Maybe Luigi can handle the lil guy questions ;)

[1/13/2004 6:54:17 PM] [SmartTrader] It held very well all day today until the last 5 min. So maybe tomorrow will be better.

[1/13/2004 6:54:19 PM] [Luigistock] no thats OZ's department but thats what he's beating into my head :)

[1/13/2004 6:54:27 PM] [Investortrader] Hehehe

[1/13/2004 6:55:17 PM] [dgraham42] jivan

[1/13/2004 6:55:41 PM] [Investortrader] Any other stocks for me to look at here?

[1/13/2004 6:55:52 PM] [Stixman] Ominous Dark cloud cover but it isn't at the top of an uptrend so possibly meaningless. You have a Soap buy and a MOBO buy yesterday. Volume was 3X average yesterday but back to average today. The lower bb and the 50 sma converge at about !.12. If it doesn't hold there I would definately bail. Should probably have been sold when it fell more than half way down yesterdays white candle.

[1/13/2004 6:56:12 PM] [Stixman] BCON

[1/13/2004 6:56:57 PM] [Investortrader] I show the lower BB around 1.05, but not using the MOBO bands here, just using the normal ones

[1/13/2004 6:56:59 PM] [Stixman] SATC?

[1/13/2004 6:57:06 PM] [SmartTrader] Yes, I know that is a definite candlestick rule.

[1/13/2004 6:57:15 PM] [Investortrader] SATC ...

[1/13/2004 6:57:44 PM] [dwells129] IT, how about TXCC?

[1/13/2004 6:58:13 PM] [Investortrader] I'll get to TXCC next dwells

[1/13/2004 6:58:59 PM] [Investortrader] SATC had some good news today, Cal energy commision

[1/13/2004 6:59:10 PM] [Investortrader] Good volume on teh breakout also

[1/13/2004 6:59:30 PM] [Investortrader] Had a monster run up in Sept and has been in a slow steady decline ever since

[1/13/2004 7:00:05 PM] [Investortrader] No really good days since then until today

[1/13/2004 7:00:24 PM] [Investortrader] A nice BTBO

[1/13/2004 7:01:15 PM] [Investortrader] Might pause some at the 12/2 high of 2.79, pretty close to that already

ClubHome

[1/13/2004 7:01:44 PM] [Stixman] That news is right in front of me and I didn't see it.
Would you sell this on a gap opening] i bought it today at 2.44
[1/13/2004 7:02:08 PM] [Investortrader] Gap up or gap down?
[1/13/2004 7:02:26 PM] [Stixman] lol I was thinking up.
[1/13/2004 7:02:33 PM] [Investortrader] ;)
[1/13/2004 7:02:51 PM] [Investortrader] No, I woudn't sell a gap up, however ...
[1/13/2004 7:03:20 PM] [Investortrader] I would probably move my stop way up, to
maybe a few cents under todays close
[1/13/2004 7:03:47 PM] [Stixman] good idea thx.
[1/13/2004 7:03:50 PM] [Investortrader] In case they just run it back down like they
did with BCON
[1/13/2004 7:04:36 PM] [Investortrader] If it gaps up it should continue up with
volume, thus the stop placement, maybe 2.64
[1/13/2004 7:04:49 PM] [acmetrader] RNDC could run tomorrow
[1/13/2004 7:04:58 PM] [dwells129] on SATC, OBV did not kick up much, how is that
possible? Seems like it should have pegged.
[1/13/2004 7:05:42 PM] [Stixman] I've noticed that nmany times when a long White
candle is followed immediately by a long black doen day (if it doest trade below low of
the white candle) it often has a big white candle on the third day
[1/13/2004 7:05:44 PM] [Investortrader] It did pick up some, harder to see here, let
me zoom in
[1/13/2004 7:06:01 PM] [Stixman] doen = down
[1/13/2004 7:06:08 PM] [Investortrader] On zoom 8 you can see it better
[1/13/2004 7:07:09 PM] [dwells129] MS went up a lot but OBV still looks fairly flat.
[1/13/2004 7:07:16 PM] [Investortrader] I just got candlestick1's book in the mail
today, can't wait to read it!
[1/13/2004 7:07:19 PM] [dwells129] zoom8
[1/13/2004 7:07:27 PM] [ron643] QQQ please
[1/13/2004 7:07:59 PM] [dwells129] would you expect this to come back and test the
50 day?
[1/13/2004 7:08:08 PM] [Investortrader] I rarely glance at MS, once in awhile but only
a glance and not often, I prefer OBV
[1/13/2004 7:08:24 PM] [Stixman] IT that by far is the best book I've ever read on the
subject
[1/13/2004 7:09:03 PM] [Investortrader] No dwells, I would expect it to continue up
here, has had a very long base, and broke out on good volume ... but I could be
wrong :o
[1/13/2004 7:09:22 PM] [Investortrader] Let me check the 5's

ClubHome

[1/13/2004 7:10:54 PM] [Investortrader] I've only heard great things about that book Stix :)

[1/13/2004 7:11:27 PM] [Stixman] Hey RNDC is a good example of the three canle sandwich I was describing!

[1/13/2004 7:11:31 PM] [Investortrader] With the much increased volume and the price closing up near the highs, I expect it to continue up

[1/13/2004 7:11:45 PM] [Investortrader] Any questions on SATC?

[1/13/2004 7:12:15 PM] [Investortrader] Gotta do TXCC before RNDC :)

[1/13/2004 7:12:35 PM] [Investortrader] On to TXCC

[1/13/2004 7:13:03 PM] [Stixman] oh sorry IT

[1/13/2004 7:13:18 PM] [dwells129] gap up was on increased guidance

[1/13/2004 7:13:28 PM] [Stixman] txcc

[1/13/2004 7:13:43 PM] [Investortrader] Thanks dwells, looks like the news leaked out the day before to some preferential clients lol

[1/13/2004 7:14:17 PM] [dwells129] yes i would agree, actually bought some that day on the unusual kick.

[1/13/2004 7:14:34 PM] [Investortrader] Nice move!

[1/13/2004 7:14:54 PM] [Investortrader] Notice all the way back in Sept the 3.15 area was a top

[1/13/2004 7:15:07 PM] [HOTTO] Charela has joined the club. Please welcome your new member.

[1/13/2004 7:15:08 PM] [dwells129] normally sell before they kick, like EGHT.

[1/13/2004 7:15:20 PM] [Investortrader] Then most of Nov it based around that area, under and over it

[1/13/2004 7:15:44 PM] [Investortrader] That resistance has been holding it down since the gap up

[1/13/2004 7:16:12 PM] [Investortrader] Lots of people who bought around there, and held thru the Dec pb, are now what I call .. Even and leavin

[1/13/2004 7:16:45 PM] [dwells129] i was assuming it need to work into the BB and maybe hit the middle band?

[1/13/2004 7:17:22 PM] [Investortrader] On 1/5, when dwells bought, it broke thru the base high on good volume, so even the leaked news showed up in the charts if you were watching!

[1/13/2004 7:18:33 PM] [Investortrader] It's within the BB's now, if it can't make another move to tag the upper BB within a couple of days I would expect it to come down to test

[1/13/2004 7:19:29 PM] [Investortrader] With the middle BB rising at a fair angle, and the 50sma pretty flat, and the LR30 between the two also rising but not as steeply,

ClubHome

they may all converge soon

[1/13/2004 7:21:19 PM] [Investortrader] So far nothing ominous in the chart, but with it losing contact with the upper BB, I need to see it re-establish that contact soon or my work says it will test that middle BB, and with everything possibly converging by then, I would definately get out if it broke them

[1/13/2004 7:21:39 PM] [dwells129] thx

[1/13/2004 7:21:55 PM] [Investortrader] Welcome :)

[1/13/2004 7:22:01 PM] [Investortrader] Any questions on TXCC?

[1/13/2004 7:22:38 PM] [Investortrader] On to RNDC ...

[1/13/2004 7:23:09 PM] [poppop_1943] is the converging of lr30, ma20 and ma40 bad or good as a support level?

[1/13/2004 7:23:24 PM] [poppop_1943] just a general question.

[1/13/2004 7:23:43 PM] [poppop_1943] and that should have been ma50 not ma40

[1/13/2004 7:25:13 PM] [Investortrader] poppop, the more chart points, indicator levels, and mvg avg levels that converge, the stronger any point should be as support or resistance

[1/13/2004 7:25:40 PM] [Investortrader] Kind of like a trendline, the more times it is hit the stronger it becomes

[1/13/2004 7:25:43 PM] [poppop_1943] ty. that is what I thought

[1/13/2004 7:26:15 PM] [Investortrader] I'm actually a bit leery of RNDC here

[1/13/2004 7:27:03 PM] [Investortrader] With all the volume today, huge volume, it closed below where it opened .. so there were plenty of sellers to meet the new buyers

[1/13/2004 7:28:36 PM] [Stixman] It could be what Hotto calls a scout. It did get above the double tops of Oct and Nov.

[1/13/2004 7:28:41 PM] [Investortrader] Made a btm in early Dec, then popped over the middle BB with OBV confirming the new move

[1/13/2004 7:29:06 PM] [ChuckR] what huge volume....RNDC...lower volume

[1/13/2004 7:29:12 PM] [Investortrader] The middle BB held good support while it based a bit more, then it made a move to the upper BB

[1/13/2004 7:29:47 PM] [Investortrader] I'll get to that in a bit Stix :) Chuck, My chart shows huge volume today on RNDC

[1/13/2004 7:29:54 PM] [ChuckR] excuse mewas looking at 5'

[1/13/2004 7:30:00 PM] [Investortrader] Ok :)

[1/13/2004 7:30:07 PM] [ChuckR] :o

[1/13/2004 7:30:35 PM] [Investortrader] When it hit the upper BB it immediately pulled back for a couple days, then made another run at it

[1/13/2004 7:30:50 PM] [Investortrader] Had a hard time closing above it

ClubHome

[1/13/2004 7:31:23 PM] [Investortrader] Then yesterday had a move above it, but closed near where it opened with long tails on both sides ... showing some indecision

[1/13/2004 7:31:35 PM] [Investortrader] Today it had news

[1/13/2004 7:31:54 PM] [Investortrader] First nationwide VoIP conferencing

[1/13/2004 7:32:20 PM] [Investortrader] To be offered (I didn't read when, just the little blurb in TCNet without clicking on it for full story)

[1/13/2004 7:32:54 PM] [Investortrader] It did get above the Sept, Oct, and Nov highs today

[1/13/2004 7:33:22 PM] [Investortrader] I just don't like the fact that it closed lower than where it opened

[1/13/2004 7:33:52 PM] [OddBodkin] Got time to do GENR?

[1/13/2004 7:34:04 PM] [Investortrader] Sure OddBodkin, in a bit

[1/13/2004 7:34:09 PM] [OddBodkin] k

[1/13/2004 7:34:32 PM] [Investortrader] I wouldn't want to see this one get below today's lows

[1/13/2004 7:34:43 PM] [Investortrader] And I wouldn't buy it up here myself

[1/13/2004 7:35:04 PM] [dwells129] going to work out, if you have time, EGHT, i'll read later. Night.

[1/13/2004 7:35:40 PM] [Investortrader] Have a good workout dwells, I'll do that after GENR

[1/13/2004 7:37:12 PM] [Investortrader] Between the Sept, Oct, Nov highs, and the lower close than open, if it does break today's lod I would expect it to come back down to at least the LR30 and probably the 50sma which has converged with the middle BB

[1/13/2004 7:37:41 PM] [Investortrader] Any questions on RNDC?

[1/13/2004 7:38:22 PM] [Investortrader] I was asked for QQQ, I don't trade indexes so will just take a quick look at it

[1/13/2004 7:39:14 PM] [Saroj] RNDC - yes - do you think today was an exhaustion gap or start of a big move up.

[1/13/2004 7:39:56 PM] [Investortrader] Saroj, looks more exhaustion to me, needs to hold the lod today for it to be the start of something more I think

[1/13/2004 7:40:07 PM] [Saroj] thx

[1/13/2004 7:40:12 PM] [Investortrader] Welcome :)

[1/13/2004 7:40:24 PM] [Saroj] :)

[1/13/2004 7:41:42 PM] [Investortrader] QQQ, came down and tagged the LR30, had a nice run in it, nice for the Q's anyway ... overall market feels heavy to me, if it breaks the LR30 I would sell any longs ... but I don't trade indexes and never traded the Q's so take my advice for what it's worth in that situation ... in other words, it's

worth what you paid for it :)

[1/13/2004 7:42:01 PM] [Investortrader] GENR ...

[1/13/2004 7:42:25 PM] [Saroj] how about GNTX?

[1/13/2004 7:43:03 PM] [Saroj] was in it and then decided it could go down to the 50 and bailed about even...

[1/13/2004 7:43:32 PM] [Investortrader] Added it to the list, may not have time unless Hotto is late .. we'll see

[1/13/2004 7:44:20 PM] [Investortrader] GENR riding that upper BB, OBV still confirming this uptrend

[1/13/2004 7:45:06 PM] [Investortrader] Came down today to test the close of 1/7, the big breakout day

[1/13/2004 7:45:38 PM] [Investortrader] Held nicely and closed in the upper half of today's range

[1/13/2004 7:45:56 PM] [Investortrader] Also tested on lower volume, and with a down market it came back

[1/13/2004 7:46:19 PM] [Investortrader] I wouldn't be selling this one yet if I owned it

[1/13/2004 7:46:50 PM] [OddBodkin] thanks IT

[1/13/2004 7:47:04 PM] [Investortrader] Notice the beginning of Dec, where that 4.25-ish area was resistance, same place as it tested today, as resistance became support

[1/13/2004 7:47:17 PM] [OddBodkin] yep

[1/13/2004 7:47:37 PM] [Investortrader] Might want to move stop up to a few cents under that area

[1/13/2004 7:47:47 PM] [OddBodkin] done

[1/13/2004 7:48:23 PM] [Investortrader] Any questions on GENR?

[1/13/2004 7:48:37 PM] [OddBodkin] 4.80 next target?

[1/13/2004 7:48:59 PM] [Investortrader] Yes, the early Nov highs where it failed at the 50sma

[1/13/2004 7:49:13 PM] [OddBodkin] thanks for looking :)

[1/13/2004 7:49:19 PM] [Investortrader] Welcome :)

[1/13/2004 7:49:28 PM] [Investortrader] On to EGHT, I own this one

[1/13/2004 7:49:34 PM] [Investortrader] First time I played EGHT!

[1/13/2004 7:50:47 PM] [Investortrader] This one has a nice base in Dec, dipped a bit then on 1/6 broke out on decent volume

[1/13/2004 7:51:12 PM] [Investortrader] I started watching it then

[1/13/2004 7:51:49 PM] [Investortrader] Notice how the LR30 and middle BB's have converged, and the BB's overall have gotten skinny

[1/13/2004 7:52:14 PM] [Investortrader] I bought on 1/9 at 4.92 right near the close of

the day

[1/13/2004 7:52:32 PM] [Investortrader] Nice safe entry point after a breakout

[1/13/2004 7:53:25 PM] [Investortrader] Today it broke our again on good volume, but couldn't close up high in the range, only around the middle

[1/13/2004 7:53:25 PM] [ron643] the island reversal.....does it bother you or are they over rated?

[1/13/2004 7:53:45 PM] [Investortrader] you mean end of Nov ron?

[1/13/2004 7:53:53 PM] [ron643] yes

[1/13/2004 7:54:07 PM] [Investortrader] That is what caused the sell-off since then

[1/13/2004 7:54:21 PM] [Investortrader] Clear indication to get out, then, if you owned it

[1/13/2004 7:54:35 PM] [Investortrader] It will also be some resistance if we get back up there

[1/13/2004 7:54:44 PM] [ron643] the basing since overcomes

[1/13/2004 7:55:10 PM] [Investortrader] It does for now, along with the volume breakout, plus ...

[1/13/2004 7:55:48 PM] [Investortrader] I won't mind if it is resistance, I got in under 5, if it takes me up to close to 7 and gets stopped by that island, still a nice %-age trade :)

[1/13/2004 7:56:15 PM] [Investortrader] The OBV is confirming this new move so far

[1/13/2004 7:56:19 PM] [ron643] very true

[1/13/2004 7:56:30 PM] [poppop_1943] is today a hammer even though the open and LOD are .03 apart?

[1/13/2004 7:56:42 PM] [Investortrader] So I am risking nickles with the safe entry, looking for dollars if it gets up there, very good risk/reward

[1/13/2004 7:57:20 PM] [Investortrader] I don't know many candlestick names poppop, but I just got candlestick1's book in the mail today, so I will know them soon!

[1/13/2004 7:57:23 PM] [Avalanche] Why did hotto sell at the end of the day?

[1/13/2004 7:57:24 PM] [Saroj] Update on OBV - the latest release of the TCNet BETA actually DOES ;have the OBV indicator available for pcf's.

[1/13/2004 7:57:35 PM] [Investortrader] That's great Saroj!!!

[1/13/2004 7:57:47 PM] [Luigistock] no way?

[1/13/2004 7:57:55 PM] [RkyMtnFool] YES!

[1/13/2004 7:58:00 PM] [Investortrader] Did Hotto sell EGHT at eod today? Or just scalp some?

[1/13/2004 7:58:00 PM] [Luigistock] but?

[1/13/2004 7:58:01 PM] [Saroj] Thought you'd be pleased... just discovered that over the weekend.

[1/13/2004 7:58:05 PM] [Zathrus] that can't be - it would actually be useful!!!
[1/13/2004 7:58:12 PM] [Investortrader] lol Zathrus
[1/13/2004 7:58:18 PM] [Saroj] I-t - what do you think of GNTX?
[1/13/2004 7:58:30 PM] [poppop_1943] i believe hotto sold out of EGHT. I stand to be corrected.
[1/13/2004 7:58:34 PM] [Saroj] O, Z - such a cynic!! LOL
[1/13/2004 7:58:39 PM] [OddBodkin] he said he was out
[1/13/2004 7:58:45 PM] [Avalanche] Hotto listed 5 stocks he was selling and that was one of them
[1/13/2004 7:59:01 PM] [Investortrader] Notice on 1/7 the high was 5.61, I added at 5.65 when that was taken out
[1/13/2004 7:59:06 PM] [rsi77] Hotto did say he sold all EGHT, thought VOCL was the volp winner for the time being
[1/13/2004 7:59:10 PM] [rensop] hotto sold eght when it hit 50 avg
[1/13/2004 7:59:40 PM] [rsi77] but I still own eght
[1/13/2004 7:59:45 PM] [Investortrader] I was very busy with non-market stuff and didn't watch the club last half of the day, would have to ask Hotto why he sold out
[1/13/2004 7:59:48 PM] [SmartTrader] poppop - This wld. be an inverted hammer if the shadow was 2x length of body.
[1/13/2004 8:00:18 PM] [OddBodkin] same here. I still have EGHT.
[1/13/2004 8:00:19 PM] [rsi77] I couldn't sell it today cause I used up all my day trades...so I'm with you IT...it doesn't look bad to me now...and trading higher AH
[1/13/2004 8:00:33 PM] [Investortrader] Higher AH is always good!
[1/13/2004 8:00:34 PM] [poppop_1943] ty ST.
[1/13/2004 8:00:49 PM] [SmartTrader] yw.
[1/13/2004 8:00:58 PM] [rsi77] It looked like it was reversing direction at the end of day (eght)
[1/13/2004 8:01:20 PM] [ChuckR] hotto was cutting back because of FCI...probably was way long
[1/13/2004 8:01:30 PM] [Investortrader] And I don't want to guess why Hotto sold ... maybe ask him when he gets here later
[1/13/2004 8:01:44 PM] [Investortrader] Any questions on EGHT?
[1/13/2004 8:01:53 PM] [Investortrader] I still like EGHT, so far
[1/13/2004 8:02:13 PM] [ChuckR] me too
[1/13/2004 8:02:16 PM] [rsi77] I think he considered VOCL the winner of the VoIP "clan"....I don't know that it was technically completely shot
[1/13/2004 8:02:20 PM] [hotto] EGHT.. I sold for 2 reasons..
[1/13/2004 8:02:22 PM] [beach] most likely a stall out on EGHT

[1/13/2004 8:02:26 PM] [Investortrader] Got 2 more to cover, RHAT was a pm request, then GNTX
[1/13/2004 8:02:31 PM] [Investortrader] Ah, here he is!
[1/13/2004 8:02:39 PM] [rsi77] you have the floor sir...
[1/13/2004 8:02:42 PM] [Investortrader] *listens*
[1/13/2004 8:02:56 PM] [hotto] I was cutting back on Longs...
[1/13/2004 8:03:25 PM] [hotto] 2. EGHT was losing the Rel strength competition with VOCL.
[1/13/2004 8:04:00 PM] [hotto] But.. at EOD.. recovered ok.. ..May buy back in am... if things line up ok
[1/13/2004 8:04:11 PM] [wildbill] there's that new guy again!:D
[1/13/2004 8:04:22 PM] [rsi77] glad to hear that....I like being in your company rather than out...
[1/13/2004 8:04:28 PM] [Investortrader] VOCL does have a nice chart
[1/13/2004 8:04:49 PM] [rsi77] after today VOCL has a REAL nice chart!
[1/13/2004 8:04:49 PM] [Luigistock] .
[1/13/2004 8:05:11 PM] [Investortrader] Should I cover the last two quickly Hotto or are you ready to start?
[1/13/2004 8:05:17 PM] [hotto] I must keep this very brief
[1/13/2004 8:05:31 PM] [Investortrader] I can cover them after your talk also
[1/13/2004 8:05:34 PM] [hotto] Please.. let me go.. just 5 min
[1/13/2004 8:05:39 PM] [hotto] 10 min
[1/13/2004 8:05:43 PM] [Investortrader] No worries, go right ahead! :)
[1/13/2004 8:05:55 PM] [ChuckR] 15 min...:D
[1/13/2004 8:06:12 PM] [rsi77] OK...an hour...
[1/13/2004 8:06:20 PM] [hotto] I am worn out... need rest.. b4 new flu.. or whatever
[1/13/2004 8:07:07 PM] [hotto] DJ-30 chart up..
[1/13/2004 8:07:20 PM] [hotto] We looked at it last night..
[1/13/2004 8:07:43 PM] [hotto] note.. Friday dropped through LR30 and sma10.. closing below
[1/13/2004 8:08:11 PM] [hotto] yesterday... bounced back up closed just under sma10 again..
[1/13/2004 8:08:13 PM] [long351] if you liked vocl check out dddc similar lack of liquidity same sector
[1/13/2004 8:08:25 PM] [HOTTO] This channel is now a moderated auditorium. Chat will be queued for channel moderators.
[1/13/2004 8:09:51 PM] [hotto] We discused.. DJIA needed to get Over that sma10.. and stay there... to continue the trek to challenge 10600 again... on the way to 10673

[1/13/2004 8:10:32 PM] [hotto] This mornnig.. got the little push... just over the OLD IT high... we fought with... 10502...

[1/13/2004 8:11:07 PM] [hotto] Then.. PT hit.. and slid down hard.. Taking A/D along.. Not much strength..

[1/13/2004 8:11:40 PM] [hotto] DJIA dropped all the way to a perfect tag of sma20... Again.. another very Professional day...

[1/13/2004 8:12:24 PM] [hotto] note these precise moves.. and tags.. we have been getting.. Nice for us... watching them so closely...

[1/13/2004 8:13:06 PM] [hotto] Just alerts me to the manipulation.. or whatever..

[1/13/2004 8:13:59 PM] [hotto] From V1 today.. note the steady increase in %A/D.. most of the way into close..

[1/13/2004 8:14:40 PM] [hotto] My guess is Program trading.. all the way.

[1/13/2004 8:15:07 PM] [hotto] We are now into the unwinding of the Collars put on in October and November..

[1/13/2004 8:15:36 PM] [hotto] To protect the Port managers.. from losing their Performance.. and their bonuses..

[1/13/2004 8:16:03 PM] [hotto] This is options exp week.. Should be all done by Friday.. with the Collars..

[1/13/2004 8:16:38 PM] [hotto] Maybe it will take a bit longer.. I don't know..

[1/13/2004 8:17:07 PM] [hotto] But ..I saw signs of stalling and churning last few days...

[1/13/2004 8:17:40 PM] [hotto] And.. many new false BOs.. that just fell back..

[1/13/2004 8:17:56 PM] [hotto] I got fooled into a couple of those myself

[1/13/2004 8:18:57 PM] [hotto] Remember.. DJIA has little support.. until about 10000... now about 400 pts down. look at the run from November

[1/13/2004 8:19:41 PM] [hotto] So.. once the Earnings mystery is solved.. How we react to the EArns..

[1/13/2004 8:20:01 PM] [hotto] If it is neg.. Like tonight on LLTC... and friends..

[1/13/2004 8:20:34 PM] [hotto] Then.. Traders may give up quickly on "runups into earnings" plays

[1/13/2004 8:20:50 PM] [hotto] Anyway... that is my concern tonight

[1/13/2004 8:21:17 PM] [hotto] back to the last few days.. in DJIA..

[1/13/2004 8:21:33 PM] [hotto] now the faltering OBV really stands out.

[1/13/2004 8:22:01 PM] [hotto] and.. from Friday... fell through LR30 and sma10..

[1/13/2004 8:22:14 PM] [hotto] Monday hesitated up under sma10...

[1/13/2004 8:22:48 PM] [hotto] Tuesday (today) tried to lift up.. found resistance at old 10502.. and fell

[1/13/2004 8:23:04 PM] [hotto] now has hit sma20.. bounced some...

ClubHome

[1/13/2004 8:23:25 PM] [hotto] next.. is sma50.. If it keeps falling..
[1/13/2004 8:23:49 PM] [hotto] Good for us... it bounced off sma20 well..
[1/13/2004 8:24:13 PM] [hotto] maybe we get a chance to unload last weak longs tomorrow morning..
[1/13/2004 8:24:40 PM] [hotto] Unfortunately, we are not the only ones thinking this thought..
[1/13/2004 8:25:16 PM] [hotto] No big economic news due tomorrow.. ie.. things the market has cared much about until now
[1/13/2004 8:25:47 PM] [hotto] So.. maybe we can get some good earns reports early.. and help the opening..
[1/13/2004 8:26:33 PM] [hotto] I was slow.. in selling.. only got half done what I wanted.... complacency or fatigue... either can be expensive
[1/13/2004 8:27:00 PM] [hotto] DIA up now.. same story
[1/13/2004 8:27:35 PM] [hotto] SP-500 up now.. one MA behind... .DJIA is the weakest of the 3...
[1/13/2004 8:28:10 PM] [hotto] SP-500... pierced below sma10... but closed back over..
[1/13/2004 8:28:38 PM] [hotto] volume increased on the down day...
[1/13/2004 8:29:25 PM] [hotto] SPY... bigger volume.. But.. bounced more.. a tempting candle
[1/13/2004 8:29:57 PM] [hotto] COMPQX. near highs.. LOD below yesterday
[1/13/2004 8:30:14 PM] [hotto] QQQ. similar..
[1/13/2004 8:30:56 PM] [hotto] I saw lots of semis sold off some.. with LLTC tonight... but..
[1/13/2004 8:32:15 PM] [hotto] tomorrow AH is INTC.. and YHOO and QLGC
[1/13/2004 8:32:42 PM] [hotto] we won't know about the reaction until then..
[1/13/2004 8:33:39 PM] [hotto] No need wasting more time with guesses.. It is about New Money coming in to buy now...
[1/13/2004 8:34:06 PM] [hotto] we are 8 mkt days into January... We have seen the "Themes" work..
[1/13/2004 8:34:22 PM] [hotto] Should be a pause here... sometime..
[1/13/2004 8:34:55 PM] [hotto] I just hope now.. to preserve the gains of the last 3 weeks..
[1/13/2004 8:35:46 PM] [hotto] Hopefully.. we will be able to pick up on the next move quickly... I hate to anticipate it..
[1/13/2004 8:36:03 PM] [hotto] The T2118.. has been steady
[1/13/2004 8:36:22 PM] [hotto] tonight... just flat.. no big deal..

[1/13/2004 8:46:41 PM] [RkyMtnFool] Distribution should be clear and unequivocal.

Tuesday's closing levels along with the action of leading stocks reflected a reasonable pullback, not serious weakness. IBD

[1/13/2004 8:57:58 PM] [Investortrader] Ok, we ready for more charts? I have two more I was asked to go over

[1/13/2004 8:58:13 PM] [Investortrader] First is RHAT ...

[1/13/2004 8:58:42 PM] [cyberact] G..look at ISSI if you have time...this one topped today IMO

[1/13/2004 8:58:58 PM] [cyberact] wrong channel...sorry guys

[1/13/2004 9:01:48 PM] [Investortrader] This one had a nice breakout on good volume in Dec, with OBV confirming

[1/13/2004 9:02:09 PM] [Investortrader] Then based for a couple of weeks

[1/13/2004 9:02:37 PM] [Investortrader] Note 1/6 and 1/7

[1/13/2004 9:02:52 PM] [Investortrader] Bigger volume days, on a minor pullback .. but

[1/13/2004 9:03:08 PM] [Investortrader] The range was small both those days

[1/13/2004 9:03:18 PM] [Investortrader] the buyers were stepping up

[1/13/2004 9:03:33 PM] [Investortrader] And the sellers couldn't push it down very far even with the increased volume

[1/13/2004 9:03:58 PM] [Investortrader] And the OBV fell, but was held by the middle BB

[1/13/2004 9:04:24 PM] [Investortrader] Today it sold off on a bit lower volume

[1/13/2004 9:05:10 PM] [Investortrader] I would expect the recent base to hold any pullbacks ... however

[1/13/2004 9:05:24 PM] [Investortrader] With the market feeling heavy, gotta be careful

[1/13/2004 9:05:32 PM] [Investortrader] On all long positions

[1/13/2004 9:05:56 PM] [Investortrader] The OBV is still confirming, so it still looks good if you hold it

[1/13/2004 9:06:52 PM] [Investortrader] Just with the overall market looking like it wants to head lower ... it could pull any stock down with it

[1/13/2004 9:07:30 PM] [Investortrader] The middle BB will be up into that recent base area very soon, which would provide more support

[1/13/2004 9:09:13 PM] [Investortrader] Notice right before the breakout in Dec, the BB's got skinny ... I like looking for skinny BB's, usually means a move is coming ..

ClubHome

one way or the other. Need to look at other things like OBV and volume to try to find out which way, the skinny BB's don't show which way by themselves

[1/13/2004 9:09:41 PM] [Investortrader] Any questions on RHAT?

[1/13/2004 9:10:25 PM] [Investortrader] On to GNTX ...

[1/13/2004 9:11:30 PM] [parkwaypet] cNKTR up 30% since jan 1 maybe needs a breather ?

[1/13/2004 9:11:40 PM] [parkwaypet] NKTR

[1/13/2004 9:11:48 PM] [Investortrader] This one has been in a steady stair-step upmove since early Oct

[1/13/2004 9:11:59 PM] [Investortrader] I'll do that one next parkwaypet

[1/13/2004 9:12:14 PM] [parkwaypet] ty

[1/13/2004 9:12:21 PM] [Investortrader] Higher highs and higher lows the whole way

[1/13/2004 9:13:24 PM] [Investortrader] Notice on each high the OBV also tagged it's upper BB

[1/13/2004 9:14:39 PM] [Investortrader] And it looks like the OBV made a new high with each new price high, last one is a bit hard to tell

[1/13/2004 9:14:41 PM] [Bobtrader] IT .. can you share chart

[1/13/2004 9:15:20 PM] [Investortrader] I am sharing Bobtrader, click on "share" then the "view another user" tab

[1/13/2004 9:15:58 PM] [Bobtrader] GOT IT .. TY

[1/13/2004 9:16:04 PM] [Investortrader] Welcome :)

[1/13/2004 9:16:38 PM] [Investortrader] Today it came down close to the 50sma, which has held every pullback so far, then closed in the upper half of todays range (not by much, but it made it)

[1/13/2004 9:17:29 PM] [Investortrader] I would definately use a nickle or so under the 50sma as my stop if I owned it

[1/13/2004 9:18:54 PM] [Investortrader] Also, if interested in buying this one ... near the 50sma is one of those safe entry points I like to buy

[1/13/2004 9:19:50 PM] [Investortrader] If your trading style doesn't permit you to buy a stock until it turns up ...

[1/13/2004 9:19:52 PM] [Rcctrader] IT, have you talked about SGR tonight, looks like a good bullish engulfing candle.

[1/13/2004 9:20:06 PM] [Investortrader] Then a break above the LR30 would be a good place to buy it

[1/13/2004 9:20:32 PM] [Investortrader] Will do that one after NKTR Rcctrader

[1/13/2004 9:20:55 PM] [Rcctrader] ty.

[1/13/2004 9:22:15 PM] [rensop] IT y ou say even though the price fell below the middle bb and shows a slight increase that is ok
[1/13/2004 9:22:45 PM] [Investortrader] BAck to GNTX for a minute :)
[1/13/2004 9:23:06 PM] [Investortrader] Yes, that is still ok rensop
[1/13/2004 9:23:22 PM] [rensop] ty
[1/13/2004 9:23:28 PM] [Investortrader] Notice almost every pb along this run has dipped below the middle BB
[1/13/2004 9:23:55 PM] [Investortrader] And the OBV is higher now than during the last pb too
[1/13/2004 9:24:19 PM] [Investortrader] But, if it breaks the 50sma, all bets are off
[1/13/2004 9:24:26 PM] [rensop] IT ok i got it thx
[1/13/2004 9:24:30 PM] [Investortrader] Welcome :)
[1/13/2004 9:24:35 PM] [Investortrader] On to NKTR ...
[1/13/2004 9:24:57 PM] [Investortrader] This one has had a nice long 3 1/2 month base
[1/13/2004 9:25:15 PM] [Investortrader] BB's got real skinny right before the breakout
[1/13/2004 9:25:33 PM] [Investortrader] Now it's been riding the upper BB all of Jan
[1/13/2004 9:25:45 PM] [Investortrader] With the OBV flying
[1/13/2004 9:26:38 PM] [Investortrader] Leerink Swann (whoever they are) upgraded it today from underperform to outperform with a \$32 target
[1/13/2004 9:27:27 PM] [Investortrader] This one is way too extended for me to buy it here
[1/13/2004 9:27:49 PM] [Investortrader] Going to look at the 5's on it
[1/13/2004 9:29:12 PM] [Investortrader] This one could pb at any time, did have a lot of volume early today
[1/13/2004 9:30:19 PM] [Investortrader] Notice all month, it never went under the previous days lod
[1/13/2004 9:30:22 PM] [rensop] It what are the 5s?
[1/13/2004 9:30:29 PM] [Investortrader] 5's are the 5 minute chart
[1/13/2004 9:30:38 PM] [rensop] ty
[1/13/2004 9:31:08 PM] [Investortrader] With it being so extended, if I owned it, I would place a stop a few cents under todays lod, and move it up every day it wasn't hit
[1/13/2004 9:31:18 PM] [AV1] IT, what bb settings do you use?
[1/13/2004 9:31:42 PM] [Investortrader] AV1, the normal ones, 20 day sma and 2 standard deviations, which in TCNet is 20,20

[1/13/2004 9:33:12 PM] [parkwaypet] any special scan you like IT
[1/13/2004 9:33:28 PM] [Investortrader] I have volume scans, and breakout scans, and breakdown scans
[1/13/2004 9:33:36 PM] [dpg45] how much you think it will pullback NKTR
[1/13/2004 9:33:42 PM] [Investortrader] And some multi-mvg avg scans
[1/13/2004 9:34:05 PM] [Investortrader] And multi-day volume scans
[1/13/2004 9:34:41 PM] [Investortrader] When it does pb dpg, I would expect at least a test of the LR30, and probably the middle BB
[1/13/2004 9:35:18 PM] [dpg45] THX
[1/13/2004 9:35:29 PM] [Investortrader] A scan concerning the 20sma, breaking up over it or down thru it on volume
[1/13/2004 9:35:58 PM] [parkwaypet] Funny very big upgrade NKTR worth watching
[1/13/2004 9:36:15 PM] [cobralso] IT could you look at CORV
[1/13/2004 9:36:16 PM] [Investortrader] I use all sorts of scans and look at hundreds of charts every night, and every day
[1/13/2004 9:36:41 PM] [Investortrader] Sure cobralso, but SGR first, then CORV
[1/13/2004 9:36:48 PM] [Investortrader] On to SGR ...
[1/13/2004 9:38:37 PM] [Investortrader] This one doesn't look so good, not bad but not good
[1/13/2004 9:38:47 PM] [kellam] been following your teaching IT thx very helpful
[1/13/2004 9:39:00 PM] [kellam] been
[1/13/2004 9:39:06 PM] [Investortrader] It's been meandering sideways, and the recent high at the end of year was not confirmed by OBV

ClubHome

[1/13/2004 9:40:37 PM] [Investortrader] SGR can be used as a good example
[1/13/2004 9:40:44 PM] [parkwaypet] hopefully not to late for me
[1/13/2004 9:40:54 PM] [Investortrader] Mid-Dec the BB's got a bit skinny
[1/13/2004 9:41:28 PM] [Investortrader] Then it pushed up and rode the upper BB for a few days
[1/13/2004 9:42:06 PM] [Investortrader] on 12/24 it lost contact with the upper BB, but OBV was still in contact suggesting just a minor pb
[1/13/2004 9:42:41 PM] [Investortrader] 12/26 it consolidated in the pb then made another push up to the upper BB
[1/13/2004 9:43:02 PM] [Investortrader] And on 12/31 it failed
[1/13/2004 9:43:35 PM] [Investortrader] Closing below the lod of 12/30 as it retraced back away from the upper BB
[1/13/2004 9:44:04 PM] [Investortrader] you've heard me say before, this usually means at least a test of the middle band, and many times a test of the lower band
[1/13/2004 9:44:29 PM] [Investortrader] 2 days later it broke under the middle BB and the LR30
[1/13/2004 9:44:59 PM] [Investortrader] Notice how the middle BB, the LR30, and the 50sma have all converged, and for the next week that was resistance
[1/13/2004 9:45:12 PM] [Investortrader] Until today it finally tested the lower BB
[1/13/2004 9:45:54 PM] [Investortrader] Bounced off it on increased volume, but still couldn't get over the confluence of indicators just above it
[1/13/2004 9:46:51 PM] [Investortrader] And the OBV is also under the middle BB and it's 50sma, which also have converged
[1/13/2004 9:47:53 PM] [Investortrader] I don't see too much interesting here, if it does break up over those converged indicators, it could run up to test the upper BB again ... but not enough reward for the risk of going back down to the lower BB for my style
[1/13/2004 9:48:51 PM] [Investortrader] Remember EGHT from earlier, risking nickles to get dollars, and compare it to the risk/reward here
[1/13/2004 9:49:12 PM] [Investortrader] Thus I am not interested in this one
[1/13/2004 9:49:28 PM] [Investortrader] Any questions on SGR?
[1/13/2004 9:49:41 PM] [payck] SGR reports pre mrk tomorrow
[1/13/2004 9:50:01 PM] [Investortrader] That might give it some impetus payck :)
[1/13/2004 9:50:10 PM] [payck] I'm out

[1/13/2004 9:50:27 PM] [Investortrader] Good idea, I'm like Hotto I don't hold thru earnings

[1/13/2004 9:52:26 PM] [payck] many places cobra, briefing, your brokerage site, yahoo
[1/13/2004 9:52:30 PM] [Investortrader] OBV confirming the new price highs

[1/13/2004 9:54:52 PM] [Bobtrader] what about a stop
[1/13/2004 9:55:01 PM] [Bobtrader] TY
[1/13/2004 9:55:12 PM] [Investortrader] Where did you get in Bob?
[1/13/2004 9:55:18 PM] [Bobtrader] 1.50

[1/13/2004 9:56:12 PM] [cobralso] 1.45 ;)
[1/13/2004 9:56:31 PM] [Bobtrader] ty guys for lessons
[1/13/2004 9:56:38 PM] [Investortrader] I'd use a few cents under yesterdays lod, which is 2.30 ... also the LR30 will be right around that price too, may want to figure exactly where the LR30 will be tomorrow
[1/13/2004 9:57:28 PM] [Investortrader] Or, if it gaps up on big volume then turns down to take out the opening price, might get out then too
[1/13/2004 9:57:33 PM] [rensop] IT thx for the lessons I always enjoy them when I catch them
[1/13/2004 9:57:33 PM] [rensop] IT thx for the lessons I always enjoy them when I catch them
[1/13/2004 9:57:33 PM] [Investortrader] gaps up
[1/13/2004 9:57:43 PM] [Investortrader] Welcome Bob and rensop :)
[1/13/2004 9:58:24 PM] [Investortrader] Notice last time it gapped up on big volume it kept going, if it does gap and crap, get out
[1/13/2004 9:58:51 PM] [Investortrader] Or at the very least, if it does gap up nice
[1/13/2004 9:59:08 PM] [Investortrader] Move your stop to a few cents under todays close, or todays lod
[1/13/2004 9:59:45 PM] [Investortrader] Less than a dimes difference between the two
[1/13/2004 10:00:20 PM] [Investortrader] What that does is get you out on an exhaustion gap and not ride it back down very much
[1/13/2004 10:00:38 PM] [Investortrader] Any questions on CORV?
[1/13/2004 10:01:27 PM] [Investortrader] On to SIRI, last one then I need to update and run scans

[1/13/2004 10:03:25 PM] [Investortrader] Broke out late Dec and rode the upper BB
[1/13/2004 10:03:50 PM] [Investortrader] Notice 1/5, good example of gap and crap
[1/13/2004 10:04:20 PM] [Investortrader] Opened at 4.19, hod was 4.20
[1/13/2004 10:04:49 PM] [Investortrader] Now it's a dollar lower, big %-age
[1/13/2004 10:05:16 PM] [Investortrader] The strategy just outlined would have gotten you out over 4 somewhere unless it really tanked super fast
[1/13/2004 10:05:44 PM] [Investortrader] At the very least should have gotten you out in the upper 3's
[1/13/2004 10:06:07 PM] [Investortrader] On a parabolic runup, this is how it ends many times
[1/13/2004 10:06:42 PM] [Investortrader] With an exhaustion move
[1/13/2004 10:07:04 PM] [Investortrader] Now lets look at 1/7
[1/13/2004 10:07:06 PM] [Borankin] Parabolic....quite a word.
[1/13/2004 10:07:25 PM] [Investortrader] Almost asymptotic ;)
[1/13/2004 10:07:54 PM] [Investortrader] On 1/7, the price came down and tagged the LR30, while the OBV broke under the middle BB, and tagged the 50sma
[1/13/2004 10:08:08 PM] [Investortrader] Then it had a very weak rally attempt next two days
[1/13/2004 10:08:26 PM] [Investortrader] With the OBV barely able to struggle up over the middle BB
[1/13/2004 10:08:31 PM] [cobralso] AS what?
[1/13/2004 10:09:03 PM] [Investortrader] MATH term :o
[1/13/2004 10:09:36 PM] [Investortrader] Now it's turned back down again, and OBV has made a new low, broke thru the 50sma
[1/13/2004 10:09:52 PM] [Investortrader] so OBV is confirming the price downmove
[1/13/2004 10:12:08 PM] [Investortrader] If one didn't get out on the gap and crap, then yesterday was the last day in my work as it would have been 4 days out of contact with the upper BB along with OBV failing
[1/13/2004 10:13:25 PM] [Investortrader] Remember this strategy of selling opening gaps that fail *after* a big runup, you'll see it time and time again
[1/13/2004 10:13:44 PM] [Investortrader] That will save you lots of profits!
[1/13/2004 10:15:15 PM] [Investortrader] Going to update now, I'm floating this window so can still chat
[1/13/2004 10:15:20 PM] [cobralso] How about the ABC
[1/13/2004 10:15:40 PM] [Bobtrader] expensive lesson i need to learn TY
[1/13/2004 10:16:18 PM] [Investortrader] Can't see chart now cobralso, but I'm talking after a big runup like SIRI had, especially a parabolic one
[1/13/2004 10:16:42 PM] [Bobtrader] I think ... AS ... is in glossary

[1/13/2004 10:16:46 PM] [Investortrader] Geometry term parabolas :o
[1/13/2004 10:16:56 PM] [parkwaypet] IT DSCO nice flag formation
[1/13/2004 10:17:55 PM] [Investortrader] Bob, if you are in SIRI, make a little post-it note and stick it on the side of your computer ... Sell gaps that fail like in SIRI! And you'll remember it :)
[1/13/2004 10:18:02 PM] [Bobtrader] asymptotic
[1/13/2004 10:18:25 PM] [cobralso] $1/7=A$ $1/9=B$ $1/13=c$ SIRI ???
[1/13/2004 10:18:42 PM] [Bobtrader] doing as we speak
[1/13/2004 10:18:47 PM] [Bobtrader] chat
[1/13/2004 10:19:00 PM] [Bobtrader] chat speak TY
[1/13/2004 10:19:10 PM] [Investortrader] I'll look when done updating cobralso, but any price pattern needs confirmation from volume
[1/13/2004 10:19:38 PM] [Investortrader] And the volume and OBV are both saying more downside to me
[1/13/2004 10:19:46 PM] [cobralso] OH :o
[1/13/2004 10:20:11 PM] [Investortrader] That's why I call them ... price/volume patterns :)
[1/13/2004 10:22:34 PM] [cobralso] You can talk & scan at the same time :D
[1/13/2004 10:23:07 PM] [Investortrader] Still updating :8
[1/13/2004 10:24:32 PM] [cobralso] Can you pat your head and rub your tummy at the same time? =D
[1/13/2004 10:25:02 PM] [Investortrader] Hehehe, I can walk and chew gum at the same time!
[1/13/2004 10:25:07 PM] [BossFan] hey guys...finally home!
[1/13/2004 10:25:47 PM] [cobralso] Your my hero
[1/13/2004 10:26:07 PM] [Investortrader] Hiya BossFan!
[1/13/2004 10:27:32 PM] [Borankin] The thing about walk and chew gum at the same time is attributable what LBJ allegedly said about Gerald Ford. But that was not what LBJ really said. He was much more crude in saying that Gerry could not XXXX and chew gum at the same time.
[1/13/2004 10:28:47 PM] [Investortrader] Interesting Borankin ... But who wants to XXXX and chew gum at the same time? ;)
[1/13/2004 10:28:49 PM] [dwells129] IT, been in AAI long for too long, bad pick, it seems to want to head up though and i feel if i sell then it is sure to go. i have no access to tcnet during the day and usually find out what i should have bought after i get home at night. comments on AAI?

[1/13/2004 10:30:10 PM] [Borankin] Claudia Alta Taylor
[1/13/2004 10:30:26 PM] [parkwaypet] you are with it
[1/13/2004 10:30:36 PM] [husker] .
[1/13/2004 10:30:36 PM] [husker] .
[1/13/2004 10:31:42 PM] [Investortrader] Remember when you got into AAI dwells?
[1/13/2004 10:32:26 PM] [dwells129] yup, bought it on the upgrade around 14. sold some the other day when it bounced off of the 50
[1/13/2004 10:32:58 PM] [dwells129] i think 11/24
[1/13/2004 10:33:01 PM] [Investortrader] Would that be late Nov, maybe 11/20?
[1/13/2004 10:33:12 PM] [Investortrader] Ok
[1/13/2004 10:33:43 PM] [dwells129] it broke out of the upper trendline, that is why i still like it
[1/13/2004 10:35:32 PM] [Investortrader] Depends on how you draw the trendline, using closes or hod's
[1/13/2004 10:36:00 PM] [Investortrader] Can you see the one I just drew?
[1/13/2004 10:36:03 PM] [dwells129] i go to the top of the candles, is that a bad way?
[1/13/2004 10:36:24 PM] [dwells129] i do not include the tales
[1/13/2004 10:36:51 PM] [Investortrader] If you include the tails, it hasn't broken thru quite yet, but is close
[1/13/2004 10:37:01 PM] [dwells129] yes i see it.
[1/13/2004 10:37:10 PM] [Investortrader] Ok, I just erased it lol
[1/13/2004 10:37:23 PM] [Investortrader] Let's look at it from 11/24
[1/13/2004 10:37:34 PM] [Investortrader] The next day it ran up and tagged the 50sma
[1/13/2004 10:37:35 PM] [dwells129] should i have included the tails?
[1/13/2004 10:37:53 PM] [Investortrader] I don't use trendlines much in my work, some include the tails and some don't
[1/13/2004 10:38:33 PM] [Investortrader] Would be better to ask someone who uses trendlines a lot in their work
[1/13/2004 10:38:56 PM] [dwells129] i actually saw that trade go through, it was pure manipulation as only a couple hundred shares traded there.
[1/13/2004 10:40:01 PM] [Investortrader] Most times the first attempt at the 50sma fails, coming from both directions, a stock over it will bounce off it, a stock under it will fail there
[1/13/2004 10:40:45 PM] [Investortrader] Notice the OBV there also
[1/13/2004 10:41:10 PM] [Investortrader] Couldn't make it over the 20sma, and was

ClubHome

lower on the lower price high, confirmation of continued downtrend

[1/13/2004 10:41:16 PM] [dwells129] where at the bounce off 50?

[1/13/2004 10:41:27 PM] [Investortrader] And price fell right back thru the 20sma

[1/13/2004 10:41:39 PM] [Investortrader] Yes, on 11/25

[1/13/2004 10:41:52 PM] [Investortrader] That was a sell signal, both of those combined

[1/13/2004 10:42:59 PM] [Investortrader] I just wanted to go over that because someone today said buying is covered a lot but not selling, I told him I cover both in my chart classes :)

[1/13/2004 10:43:32 PM] [Investortrader] Made a dbl btm in Dec, with OBV higher on the second btm

[1/13/2004 10:44:01 PM] [dwells129] i though it was a sell too, but as a newer trader, i thought the upgrade was worth more, wrong again.

[1/13/2004 10:44:04 PM] [Investortrader] And on 1/6 it broke out over that dbl btm

[1/13/2004 10:44:26 PM] [Investortrader] Gotta be careful of analysts

[1/13/2004 10:44:59 PM] [Investortrader] OBv also confirmed the breakout over the dbl btm

[1/13/2004 10:45:05 PM] [dwells129] :(

[1/13/2004 10:45:19 PM] [Investortrader] By breakout over the dbl btm, I mean over the 12/15 peak between the two bottoms

[1/13/2004 10:45:36 PM] [dwells129] i follow

[1/13/2004 10:45:52 PM] [Investortrader] Good move to sell some when it went up to test the 50sma a few days ago

[1/13/2004 10:46:07 PM] [Investortrader] OBV is also being held down by the 50sma

[1/13/2004 10:46:52 PM] [Investortrader] And now on the price, the 50sma is converging with the upper BB

[1/13/2004 10:47:19 PM] [Investortrader] It will need good volume to break thru there

[1/13/2004 10:47:47 PM] [Investortrader] The sell-off from the 50sma was also on increased volume ... may need to do some more work to get thru it

[1/13/2004 10:47:58 PM] [dwells129] on your OBV comment, i am to look at your middle window for that one?

[1/13/2004 10:48:01 PM] [Investortrader] The 1/8 sell-off

[1/13/2004 10:48:15 PM] [Investortrader] Yes, middle window has the OBV

[1/13/2004 10:48:50 PM] [dwells129] it also has the 50 day, which i don't understand in that window

[1/13/2004 10:48:56 PM] [Investortrader] Plus with the market feeling heavy here, will make it harder to go up

[1/13/2004 10:49:07 PM] [Investortrader] That's a 50sma of the OBV

ClubHome

[1/13/2004 10:49:41 PM] [Investortrader] sometimes (not as often as with price) the 50sma of OBV can be important
[1/13/2004 10:50:22 PM] [dwells129] does that give you good info? if OBV were over it, it is of more interest to you?
[1/13/2004 10:50:50 PM] [Investortrader] Sometimes it does, like now with both price and OBV being held down by the 50sma
[1/13/2004 10:50:58 PM] [dwells129] ok
[1/13/2004 10:51:36 PM] [Investortrader] But only sometimes .. but since it is sometimes, I have it in there
[1/13/2004 10:52:58 PM] [StockStalker] is everybody asleep
[1/13/2004 10:53:27 PM] [Investortrader] Notice now it's basing a bit, right around that 12/15 peak between the dbl btms too
[1/13/2004 10:53:48 PM] [dwells129] yes
[1/13/2004 10:54:14 PM] [Investortrader] I will be in another hour or so SS, after running some scans
[1/13/2004 10:54:18 PM] [Bobtrader] not yet but on the way GN ALL ...ty IT

[1/13/2004 10:56:31 PM] [Investortrader] I don't worry much about option expiry, unless I own options!
[1/13/2004 10:56:52 PM] [ChartWatcher] Can you look at OSUR?
[1/13/2004 10:56:56 PM] [Investortrader] Earnings, I do worry about, I don't hold thru earnings
[1/13/2004 10:57:03 PM] [dwells129] JBLU and LUV have guided down i think, thus my concern, but i want my money back.
[1/13/2004 10:57:26 PM] [StockStalker] I agree with that 100% Investo
[1/13/2004 10:57:56 PM] [Investortrader] dwells, you shouldn't ever think like that, no stock owes you your money back, get it back from the best stock you can

[1/13/2004 11:03:43 PM] [StockStalker] on a hedged short term portfolio I have a concept I call "making the market a loan" and it evolves around the elasticity betiwwen my shorts and longs at mkt infelction point
[1/13/2004 11:04:09 PM] [StockStalker] model has served well all year with the one exception of 2 mondays ago
[1/13/2004 11:04:18 PM] [StockStalker] was stopped out of every short that day

[1/13/2004 11:05:12 PM] [StockStalker] but went right back to putting on more shorts.... buy birds and sell terds as i say

[1/13/2004 11:05:28 PM] [StockStalker] mostly sideways
[1/13/2004 11:05:32 PM] [StockStalker] and up on longs
[1/13/2004 11:05:48 PM] [Investortrader] toby, does look ok with OBV confirming, the only thing I don't like is where do you put your stop? Looks like it would have to be over 10% lower then an entry price unless you get a pb to buy it
[1/13/2004 11:05:52 PM] [StockStalker] then the next day I believer the 3k shares of FRNT begin to pay off

half and half long and short?

[1/13/2004 11:06:35 PM] [TuscanaGold] but there are terds that can often fly like birds...

[1/13/2004 11:06:38 PM] [StockStalker] and then eventually POWI and the other while the longs pay off still.... being in the longs allows u to not have to pick off the tip top on the shorts

[1/13/2004 11:06:51 PM] [StockStalker] i in a sense.. make the mkt a loan

[1/13/2004 11:07:11 PM] [TuscanaGold] and birds that sometimes die like terds

[1/13/2004 11:07:25 PM] [StockStalker] and 9/10 it goes from being costly insurance, to free insurance... to profitabe insurance

[1/13/2004 11:07:28 PM] [tobydad] So from a mere theoretical standpoint, you think it may have the juice to keep going? FEPO, of course.

[1/13/2004 11:08:09 PM] [Investortrader] FEPO?

[1/13/2004 11:08:09 PM] [StockStalker] but it allowed me to come into 2 Mondays ago very very long over the weekend and make record money

[1/13/2004 11:08:20 PM] [Investortrader] Oh, education :)

[1/13/2004 11:08:25 PM] [tobydad] for educational purposes only...hottospeak.

[1/13/2004 11:08:44 PM] [Investortrader] Right, took me a second

[1/13/2004 11:09:04 PM] [StockStalker] this hedging strategy has allowed me to carry a line that would not be possible otherwise within tolerable risk

[1/13/2004 11:09:14 PM] [StockStalker] I am 3/1 long to short right now

[1/13/2004 11:09:28 PM] [Investortrader] Thanks SS :)

[1/13/2004 11:09:46 PM] [StockStalker] PLMO a great example of a "loan"

[1/13/2004 11:10:09 PM] [StockStalker] that squeeze it had 3 days ago hurt

[1/13/2004 11:10:30 PM] [StockStalker] but was 4/1 long to short so it was tolerable

[1/13/2004 11:10:40 PM] [StockStalker] and it not profitable

[1/13/2004 11:10:52 PM] [StockStalker] withing 5 cents of my stop that day

[1/13/2004 11:10:54 PM] [Investortrader] toby, it could with the increased volume today and it closing at the highs .. but with the market feeling heavy it may not, plus the risk is a bit large for me

[1/13/2004 11:11:06 PM] [tobydad] IT, thank you...I've enjoyed the entire session tonight. Your time away from your own pursuits does not go unappreciated. :)

[1/13/2004 11:19:55 PM] [StockStalker] lots of chat last nite
[1/13/2004 11:19:58 PM] [Investortrader] I remember the discussion on cost per share for trading lol
[1/13/2004 11:20:05 PM] [StockStalker] ahhhh
[1/13/2004 11:20:14 PM] [StockStalker] so simple but made hard
[1/13/2004 11:20:15 PM] [CashMan] IT sounds good on EGHT
[1/13/2004 11:20:44 PM] [rsi77] IT, what do you think of NT (if already holding)
[1/13/2004 11:20:46 PM] [Investortrader] We'll see tomorrow CashMan, I'm leery of the overall market taking down any longs
[1/13/2004 11:21:40 PM] [rsi77] Alan, you trade penny stocks sometimes, don't you
[1/13/2004 11:22:07 PM] [Investortrader] NT, big move, big volume, big OBV
[1/13/2004 11:22:09 PM] [CashMan] IT I agree on the overall market that's why I sold NT but I'm thinking I should have sold EGHT along with it. Hindsight is always 20-20 LOL
[1/13/2004 11:22:49 PM] [AlanD] I trade pennies when the penny market is hot. Not year round though.
[1/13/2004 11:22:59 PM] [rsi77] do you like VRA
[1/13/2004 11:23:12 PM] [Investortrader] rsi, did you catch the parabolic stop part of my class earlier?
[1/13/2004 11:23:14 PM] [AlanD] Near penny trades for today include GOAM and RCNC.
[1/13/2004 11:23:32 PM] [rsi77] no, I was out for a while IT
[1/13/2004 11:23:33 PM] [Investortrader] That is how I would handle NT
[1/13/2004 11:23:54 PM] [rsi77] OK, I'll check it out...but you're a fan of EGHT, is that right?
[1/13/2004 11:23:58 PM] [StockStalker] picked up BWEB today
[1/13/2004 11:24:10 PM] [AlanD] VRA, not really. While its sitting on support there's not much interest right now.
[1/13/2004 11:24:16 PM] [StockStalker] nice and early
[1/13/2004 11:24:27 PM] [rsi77] thx Alan
[1/13/2004 11:24:35 PM] [Investortrader] Yes rsi, got some under 5 a couple days ago on 1/9, added a bit more today when it broke thru 5.61
[1/13/2004 11:24:47 PM] [AlanD] I bought EGHT this morning. Upside highly probable despite the weak close.
[1/13/2004 11:25:12 PM] [rsi77] I guess we'll be watching it all together then...I feel

ClubHome

OK with EGHT

[1/13/2004 11:25:28 PM] [HalG] sorry, i don't understand (NT) big move, big volume, big OBV?

[1/13/2004 11:25:38 PM] [Investortrader] I covered EGHT tonight too :)

[1/13/2004 11:25:55 PM] [rsi77] RCNC....do you think there's more to that...looks like fresh big volume?

[1/13/2004 11:26:09 PM] [Investortrader] HalG, big OBV in that context meant OBV is flying high

[1/13/2004 11:26:19 PM] [AlanD] Yes, will watch the open tomorrow though to see what kind of interest is in it.

[1/13/2004 11:26:31 PM] [AlanD] Won't hold if the open does look right.

[1/13/2004 11:26:32 PM] [Investortrader] Big move on good volume, OBV confirming (NT)

[1/13/2004 11:26:44 PM] [rsi77] How long do you wait after open to determine what's going on Alan?

[1/13/2004 11:27:05 PM] [HalG] so do you believe it is a hold for now?

[1/13/2004 11:28:07 PM] [Investortrader] Hal, on NT? Read the logs, search for "parabolic" to see how I would handle NT, another stock I covered tonight looks a lot like NT does

[1/13/2004 11:29:24 PM] [Investortrader] Time for a glass of wine!

[1/13/2004 11:29:46 PM] [AlanD] Depends on where it opens with respect to where it closed and what the daily pattern looks like. If it gaps up and selling starts kicking in, I watch it for a bounce if the bounce looks weak I may lock in. Much is intuition but I've learned over time that there are only about a dozen or so opening patterns. After a while you just get a feel for how its going to end up.

[1/13/2004 11:29:58 PM] [parkwaypet] Chardonay you deserve it

[1/13/2004 11:30:17 PM] [ButterflySpread] gees yes Investor it is time for a glass of

[1/13/2004 11:32:13 PM] [parkwaypet] Butter grew up in ski area in colo in early 60's great your home

[1/13/2004 11:32:38 PM] [rsi77] Thanks Alan

[1/13/2004 11:32:39 PM] [bmweyrauch] IT - just caught up on logs...thanks a ton for your time and sharing...on to my homework now :)

[1/13/2004 11:32:40 PM] [Investortrader] Johannesburg Reisling :)

[1/13/2004 11:33:53 PM] [bmweyrauch] use your BB on OBV everyday IT

[1/13/2004 11:33:56 PM] [StockStalker] looking at the Wealthlab now Alan

[1/13/2004 11:34:00 PM] [Avalanche] Thanx for your time IT

[1/13/2004 11:34:11 PM] [Investortrader] How do you like it bmw?

[1/13/2004 11:34:16 PM] [Investortrader] Welcome Avalanche :)

[1/13/2004 11:34:35 PM] [StockStalker] bot my Dragon naturally speaking today too!

[1/13/2004 11:34:41 PM] [StockStalker] so did FirstWave

[1/13/2004 11:34:50 PM] [bmweyrauch] IT - like I say...use it everyday :)a favorite

[1/13/2004 11:35:18 PM] [Investortrader] They must be so much better now, when I first got one years and years ago, it screwed up every word lol But that may have been 8 years ago, or ten?

[1/13/2004 11:35:27 PM] [Investortrader] Cool bmw :)

[1/13/2004 11:35:37 PM] [Obw] Can you use it TCNet chat?

[1/13/2004 11:35:53 PM] [malini] I use dragon with TCnet & it works great

[1/13/2004 11:35:56 PM] [mace] comments on Vrsn?

[1/13/2004 11:36:08 PM] [tiga] Regarding the short interest ratio in tcnet, does anyone use this in there decision on shorting and if so, what are you looking for.

[1/13/2004 11:36:17 PM] [StockStalker] the equity curve analysis on wealthlab interesting

[1/13/2004 11:36:36 PM] [Obw] malini...thanks

[1/13/2004 11:36:48 PM] [parkwaypet] For the low price use this product in my practice so maybe a good buy have some future HSKA

[1/13/2004 11:36:59 PM] [StockStalker] something I think all traders should use... specifically newer traders cuz the curve dont lie

[1/13/2004 11:38:15 PM] [Investortrader] Are you in it already mace?

[1/13/2004 11:38:16 PM] [ChartMonkey] yes, looking at your equity curve very instructive.

[1/13/2004 11:38:24 PM] [AlanD] I am a wealthlab fan.

[1/13/2004 11:38:46 PM] [StockStalker] are u good add coding with it

[1/13/2004 11:38:54 PM] [StockStalker] what language is it

[1/13/2004 11:39:18 PM] [ChartMonkey] especially plotting against market indices that match your general approach (e.g. long COMPQX for a lot of folks)

[1/13/2004 11:39:20 PM] [mace] yes InVRSN 19.29

[1/13/2004 11:39:50 PM] [ChartMonkey] good for preventing oneself from thinking one is an investing genius. :)

[1/13/2004 11:39:53 PM] [AlanD] I am mediocre with coding. Just take snips of existing code and rewrite to meet my needs. Support on the board is very good

ClubHome

though.

[1/13/2004 11:40:24 PM] [Investortrader] VRSN did hit at least one of my scans tonight, not thru them all yet

[1/13/2004 11:41:36 PM] [mace] .

[1/13/2004 11:42:22 PM] [parkwaypet] MOBE hit 3 of my 7 scans

[1/13/2004 11:42:29 PM] [Investortrader] Looks ok, a bit extended so I'd be careful with it, but big volume day, lots of sellers sold the gap up

[1/13/2004 11:42:46 PM] [Investortrader] The weekly looks good, if you are a longer term trader

[1/13/2004 11:43:21 PM] [Investortrader] The problem with buying it today, is it can have a sizeable pb and still be in an uptrend

[1/13/2004 11:44:16 PM] [SeattleSteve] I looked at what the 2003 rate of return would have been from simply buying and holding all of the stocks carried here on TCNet that (a) closed the year at a price between \$1.00 and \$6.00 and (b) were in the top 50% of All Stocks for 90 day average volume.

[1/13/2004 11:44:44 PM] [SeattleSteve] Any guesses on the return for the year from just buying and holding those 400 some-odd stocks??

[1/13/2004 11:45:06 PM] [SeattleSteve] "some-odd" I don't remember the exact number of stocks

[1/13/2004 11:45:07 PM] [sunny] 143% ?

[1/13/2004 11:45:16 PM] [Investortrader] No idea as I don't look at half that range, anything under \$3 mostly

[1/13/2004 11:45:19 PM] [SeattleSteve] Any other guesses

[1/13/2004 11:45:31 PM] [ChartMonkey] spill it SS :)

[1/13/2004 11:45:39 PM] [SeattleSteve] 122%

[1/13/2004 11:45:56 PM] [SeattleSteve] From buying and holding, and no real stock picking

[1/13/2004 11:46:03 PM] [sunny] wow.! is that for the whole year? or from a particular date?

[1/13/2004 11:46:07 PM] [Investortrader] But how would we know where it would close the year at?

[1/13/2004 11:46:07 PM] [SeattleSteve] except to select your universe

[1/13/2004 11:46:18 PM] [SeattleSteve] 12/31/02 to 12/31/03

[1/13/2004 11:46:19 PM] [sunny] or from each stock's entry when it made a certain signal?

[1/13/2004 11:46:29 PM] [sunny] quite impressive

[1/13/2004 11:46:47 PM] [SeattleSteve] If you had taken all the stocks that started the year at .50 to 3.00 I am sure you would have made even more

ClubHome

[1/13/2004 11:47:03 PM] [SeattleSteve] No signals. Just take the whole group
[1/13/2004 11:47:08 PM] [ChartMonkey] I think that's the kind of "one-decision investment" kind of trade that TrillionDollarMan looks for
[1/13/2004 11:47:09 PM] [StockStalker] made much better than that tho SS and with less risk
[1/13/2004 11:47:28 PM] [StockStalker] that wooda cooda stuff bad for the brain
[1/13/2004 11:47:31 PM] [SeattleSteve] Yes, Oz, but many many people did a lot worse
[1/13/2004 11:47:44 PM] [SeattleSteve] Different point, Ox
[1/13/2004 11:47:45 PM] [StockStalker] oh yeah.. most i am sure
[1/13/2004 11:47:47 PM] [SeattleSteve] Oz
[1/13/2004 11:47:59 PM] [StockStalker] freudian slip of the finger
[1/13/2004 11:48:00 PM] [SeattleSteve] I thought I was adding a lot of value from my trading
[1/13/2004 11:48:09 PM] [sunny] i find it interesting, cuz it offers a comparison, a perspective
[1/13/2004 11:48:22 PM] [StockStalker] was only offering some balance... nice analysis tho
[1/13/2004 11:48:30 PM] [SeattleSteve] Now I see, I was adding a lot of value from the universe I was trading in
[1/13/2004 11:48:50 PM] [SeattleSteve] I didn't add any return from my trading.
[1/13/2004 11:49:01 PM] [SeattleSteve] Although I did cut down some on my risk
[1/13/2004 11:49:28 PM] [ChartMonkey] the risk is important. you can't know in advance that a yearlong horizon strategy is going to work by the end of the year so you need real strong conviction in your yearlong analysis because you can be pretty wrong.
[1/13/2004 11:49:44 PM] [SeattleSteve] Excellent point, cm
[1/13/2004 11:50:03 PM] [SeattleSteve] But it helped me to fine tune my strategy for the first half of January
[1/13/2004 11:50:29 PM] [SeattleSteve] Focused on high relative strength stocks, especially the ones with low prices
[1/13/2004 11:51:34 PM] [ChartMonkey] traders who are out when the market looks choppy or topy have less risk than buy'n'holders who have no market awareness, unless everything in the world & the economy and the deficit and the currency is all hunky dory
[1/13/2004 11:51:38 PM] [StockStalker] mkt has been easy these last weeks
[1/13/2004 11:52:00 PM] [SeattleSteve] I have missed some "easy" markets in the past

ClubHome

[1/13/2004 11:52:07 PM] [StockStalker] lots of forgivng stocks covering up bad trading

[1/13/2004 11:52:09 PM] [SeattleSteve] Glad I didn't miss this one

[1/13/2004 11:52:28 PM] [AlanD] Agreed, market has been too easy. Well give new traders a false sense of trading security.

[1/13/2004 11:53:16 PM] [SeattleSteve] Market almost certainly will get "harder" -- quickly

[1/13/2004 11:53:19 PM] [ChartMonkey] when the market is shoveling cash into the trough, need to 1) Show up 2) Do you very best pig impression 3) Keep an ear cocked for Farmer Brown and his big, mean axe. 4) When you start to think about buying that shiny new car, sell.

[1/13/2004 11:53:39 PM] [SeattleSteve] Well put, ChartMonkey

[1/13/2004 11:53:46 PM] [Cag] lol

[1/13/2004 11:53:56 PM] [SeattleSteve] and... probably about time to sell

[1/13/2004 11:54:53 PM] [AlanD] Those who will continue to do well are the ones who can still find the tradable long plays when the market reverses and those who can short the market on a dime.

[1/13/2004 11:54:54 PM] [StockStalker] and when u find urself "compunding on the puter"

[1/13/2004 11:55:17 PM] [ChartMonkey] only problem is, once you know the car trick, you might try to force yourself to not think about the car, and Farmer Brown doesn't care what you drive. :)

[1/13/2004 11:55:25 PM] [StockStalker] or as I do... always be on both side already

[1/13/2004 11:55:52 PM] [AlanD] I'm on both sides now.

[1/13/2004 11:56:11 PM] [Investortrader] I'm keeping an eye open for shorts in my scans tonight

[1/13/2004 11:56:12 PM] [StockStalker] I stay that way

[1/13/2004 11:56:40 PM] [AlanD] I am not always playing both sides. Only when the opportunities present themselves.

[1/13/2004 11:56:44 PM] [ChartMonkey] oz - compounding as in projecting a parabolic equity curve?

[1/13/2004 11:57:17 PM] [StockStalker] taking ur average rate of return over a week on a daily level and making projections

[1/13/2004 11:57:39 PM] [ChartMonkey] Oink!! Guilt as charged! My sell orders are going in tonight. :)

[1/13/2004 11:57:44 PM] [StockStalker] bad ju ju

[1/13/2004 11:57:55 PM] [ChartMonkey] er, guilty as charged

[1/13/2004 11:58:34 PM] [AlanD] Compounding is a great thing. A good way to make

ClubHome

a lot of money if you know how to play it.

[1/13/2004 11:58:49 PM] [StockStalker] I am up over 40% year to day in 401k acct and over 20\$ in the hedge fund... I wont even dream of compounding that out

[1/13/2004 11:59:00 PM] [StockStalker] 20% ytd

[1/13/2004 11:59:24 PM] [ChartMonkey] sure would be nice though (oink)

[1/13/2004 11:59:29 PM] [StockStalker] but u need to compound using solid numbers.... not flash or hot spots

[1/13/2004 11:59:50 PM] [StockStalker] use an equity curve in excel and put a moving avergae on it

[1/13/2004 11:59:55 PM] [ChartMonkey] another place where the equity curve comes in handy!

[1/14/2004 12:00:08 AM] [ChartMonkey] what you said, oz.

[1/14/2004 12:00:32 AM] [StockStalker] look for a smooth upward rising equity curve and not an ekg pattern

[1/14/2004 12:00:38 AM] [ChartMonkey] heh.
