[12/9/2003 7:22:49 AM] [Fern] ,
[12/9/2003 7:30:40 AM] [Talisman] Hello, good morning all
[12/9/2003 7:32:11 AM] [rnrinvest] GM everyone..anyone have any more thoughts on TSAI. Shorted yesterday but is indicating higher ?? ty
[12/9/2003 7:38:11 AM] [dpg45] gm all
[12/9/2003 7:39:41 AM] [Talisman] TSAI held LR30and bounced off the 20sma, closed over 10sma but, the stoch is over-bought. I'd watch closely and probably cover sooner than later. But that's me and I'm new at this.
[12/9/2003 7:46:42 AM] [Talisman] Any thoughts on PMTI? Did this just complete ABC? Would this be a buy over the B 7.99 +.03= 8.02?
[12/9/2003 7:49:11 AM] [rnrinvest] Im covering it at 19.40 . TSAI that is Im a little concerned at the ask being up higher even thuogh it is 8:50 am ...but thanks for your input:)
[12/9/2003 7:49:28 AM] [Talisman] yw
[12/9/2003 7:50:02 AM] [Talisman] What do you think of PMTI?
[12/9/2003 7:53:51 AM] [rnrinvest] My stochastics are set much diferently than use. And I use the histogram as well wich shows strenght on both (a buy) but with an 18% + yesterday I would wait a while after opening bell to see where it going and stay right on top all day. Maybe a scalp or if you have the cash you can buy enough to be happy w/ a few pennies. But who knws it could rocket again.
[12/9/2003 7:57:14 AM] [bs4aces42] what do you two think of poso?
[12/9/2003 7:57:19 AM] [Talisman] thanks
[12/9/2003 7:57:42 AM] [Talisman] jpmti
[12/9/2003 7:57:48 AM] [Talisman] oops

[12/9/2003 11:40:48 AM] [nemsca] iTina, do u hv a buy spot on NANO???

[12/9/2003 11:40:49 AM] [TraderStar] so NGEN is the one we should be in instead of NANO .. just read Forbes article!, could have made 50% in 3 days!

[12/9/2003 11:41:11 AM] [tinaSDtrader] but you would have had to be in 3 days ago!

[12/9/2003 11:41:17 AM] [Investortrader] Remember it was a story stock, and those you have to be careful with when playing them, and always always always have a point where you will say .. I give up .. and sell

[12/9/2003 11:41:22 AM] [tinaSDtrader] NGEN down today along with NANO

[12/9/2003 11:41:26 AM] [TraderStar] right .. should have been :D

[12/9/2003 11:42:00 AM] [TraderStar] well, I'm flagging NGEN to see if it bases then moves again :)

[12/9/2003 11:42:02 AM] [Ggtrader] if "i think" had any relevance from hotto club input, it would be above 6.40 and not below 3.00. Pretty sure that IVAN does not care what any of us think.

[12/9/2003 11:42:06 AM] [Investortrader] Not hindsight micky, you should have your stop loss BEFORE going into every trade

[12/9/2003 11:42:14 AM] [tinaSDtrader] and NGEN doesn't have even the 10ema support below it - its about 18% away. NANO sitting on 10ema at least. Not advising, just noting the charts.

[12/9/2003 11:42:33 AM] [Sharon1555] broke a rule .. bought IVAN, took profit, rebought as it was falling... big mistake... against Tina's rules :)

[12/9/2003 11:47:08 AM] [tinaSDtrader] I call that "uncle" or "mercy" - know when to fold instead of just watching something fall and fall

[12/9/2003 11:47:14 AM] [Talisman] I definitely have learned to keep my share sizes smaller until I really know how to trade better. I was greedy!

[12/9/2003 11:47:39 AM] [micky] UNCLE lol

[12/9/2003 11:47:43 AM] [tinaSDtrader] NANX - note on daily how last time it ran hard it pulled right back to the 10ema before bouncing. Stocks like to do this.

[12/9/2003 11:47:50 AM] [Investortrader] Always good to start small and build your way up :)

[12/9/2003 11:47:52 AM] [AllWeOwn] or jsut too eager and not strict rules for self?

[12/9/2003 11:48:04 AM] [SirWelcomeback] When your wife or husband starts receiving punishment for the performance of a stock they don't even know about, that's a good sell signal.

[12/9/2003 11:48:11 AM] [Investortrader] The markets will always be here to trade, no need to make it all in one day or one trade

[12/9/2003 11:49:01 AM] [tinaSDtrader] NANO sitting on the 10ema right now. Can it drop further, of course! But comparing the two charts, with no other information (i.e. news), I'd take the one close to the 10ema any time! But I only buy when rising off it,

not falling toward it. But remember, doing that I don't get as good a price. And that's a-okay with me. We all have different styles.

[12/9/2003 11:49:52 AM] [Investortrader] I never get the best price either tina ... never know it is the best price until after it starts back up

[12/9/2003 11:49:52 AM] [TraderStar] so what would be a NANO target? Earlier in here the number 25 was given at one point...I'm talking at least a couple of weeks of course

[12/9/2003 11:49:59 AM] [tinaSDtrader] HITK great volume on this 5min bar

[12/9/2003 11:50:20 AM] [stan1z] tina: do you use both the 10 and 20 ema on your 5-min. charts?

[12/9/2003 11:52:05 AM] [Newkid49] INGP=vol spike on 5'

[12/9/2003 11:52:55 AM] [TraderStar] If NANO bounces and moves up again, is there a new target?

[12/9/2003 11:53:13 AM] [DaveG] Anyone have a support area for SCKT?

[12/9/2003 11:53:58 AM] [Brooks5] SCKT is at a fib support on daily now

[12/9/2003 11:54:23 AM] [Investortrader] TraderStar, first scalp if it bounces here would be the recent high, around 20 might be next one but I'm just eyeballing it

[12/9/2003 11:54:36 AM] [Investortrader] But!

[12/9/2003 11:54:46 AM] [tinaSDtrader] NANO is a new hi - you'll need to go to weekly chart and find the closest peak above the current price for potential target.

[12/9/2003 11:55:03 AM] [croy] SCKT is at 61% fibo ... It must retrace up a little

Sorry it usually does hope is not part of trading :)

[12/9/2003 11:55:10 AM] [Investortrader] Stop loss point is more important, I've always said selling is much more important than buying

[12/9/2003 11:55:14 AM] [tinaSDtrader] Trade smart or be eaten alive I say.

[12/9/2003 11:55:18 AM] [AllWeOwn] fwiw last week hotto said he would look for re-entry 3.30- 3.50 range

[12/9/2003 11:56:13 AM] [Investortrader] And if you don't preserve your capital on down stocks, won't have anything to trade with

[12/9/2003 11:56:35 AM] [Ggtrader] use stops or run out of money. You may not be stupid when you run out, but bet you will feel like it.

[12/9/2003 11:56:48 AM] [tinaSDtrader] Preservation of capital is my #1 priority. Well said Investor.

[12/9/2003 12:04:08 PM] [tinaSDtrader] I lost about 40% of my trading account when I started, before I finally stopped the bleeding. Then had to get all that back, it was not easy. But learned a lot. Now knowing how important to control losses, that is my #1 focus before gains.

[12/9/2003 12:04:35 PM] [tinaSDtrader] I was lucky stopped and learned before lost it all. I know traders who lost their entire account, more than once, before figured out how to trade well.

[12/9/2003 12:06:28 PM] [tinaSDtrader] yes, it was a long haul back after that hit. But it didn't drop that much all at once, happened over many weeks/months.

[12/9/2003 12:06:49 PM] [BossFan] I think we all "hope" to some extent. I bought IVAN at support today and I "hope" and believe it will go up. Perhaps if you trade with ONLY hope, then you shall be defeated

[12/9/2003 12:07:02 PM] [tinaSDtrader] But I did the math and realized that could not continue. Stopped trading and began learning. Only when understood my mistakes did I go back in and get back my \$.

yourself where you will get out and cut your losses

[12/9/2003 12:10:12 PM] [tinaSDtrader] Biggest mistakes, two of them: 1) holding onto losers as they keep falling (chasing stops downhill I call that);

[12/9/2003 12:10:50 PM] [tinaSDtrader] 2) Breaking the rules of my trading system. Has resulted in my largest losers.

[12/9/2003 12:11:19 PM] [Investortrader] you will get whipsawed sometimes, part of the game, but you can always get back in, and I'll take a few whipsaws (small losses) over a big drawdown anyway

[12/9/2003 12:18:48 PM] [rambo] Tina I'd like to meet a trader that was successful from day one. Is ther such an animal?

[12/9/2003 12:18:48 PM] [TraderStar] my biggest remiaining thing to conquer is to take profits when my profit target is reached! Once I master that, I think I will finally start to see gains .. my acct has been flat for 8 months .. have made \$10k or so, then lost it all again by not taking profits! I may have to have reminder tattooed on my eyeballs!

[12/9/2003 12:18:57 PM] [mweathers] My biggest mistake this year was selling too early. I often bought stocks at the very bottom, then sold after a small profit or loss only to see them skyrocket 300% or more, not believing in the bull market phase

[12/9/2003 12:19:42 PM] [TraderStar] I also sold too soon .. but then went to other extreme and tried to hold on too long...

[12/9/2003 12:21:12 PM] [Investortrader] I certainly didn't start out winning right away, I don't think anyone does no matter how much they papertrade, it's not the same emotionally when real \$'s are at stake

[12/9/2003 12:21:51 PM] [tinaSDtrader] Paper trading I'm mixed on - think it is important because teaches you much. BUT, it doesn't take in account: 1) emotions; 2) real time market manipulation.

[12/9/2003 12:21:52 PM] [TraderStar] yes that's how I see it .. but did spend/lose some in training/software that was not all that useful ..

[12/9/2003 12:23:40 PM] [TraderStar] Tried to papertrade .. it just doesn't work for me .. have to be live. [12/9/2003 3:17:38 PM] [Investortrader] TraderStar, I always look at volume, and the OBV which is another way to look at volume

[12/9/2003 3:17:39 PM] [ProfitTrader] syatt, every half hour to hourly - every 15 min. at open and closing hour - thanks

[12/9/2003 3:18:10 PM] [syatt] ok

[12/9/2003 3:18:13 PM] [swingingschoolmarm] Yes, Oz. Got it then. Thanks.

[12/9/2003 3:18:24 PM] [TraderStar] but will that tell me which stocks are good for swing trading for next week or two?

[12/9/2003 3:18:42 PM] [talltrader] No Oz, wish I was tuned in yesterday, bought today at 5.50

[12/9/2003 3:19:20 PM] [StockStalker] well looks like nobocy liked anyways

[12/9/2003 3:19:25 PM] [Investortrader] It will help in deciding if a price downturn is normal profit taking or not, but it's not a stand alone indicator

[12/9/2003 3:19:28 PM] [StockStalker] but I like it

[12/9/2003 3:19:42 PM] [hotto] DIA.. new LOD

[12/9/2003 3:19:45 PM] [TraderStar] Oz, what helped you see that EGHT would reverse upwards?

[12/9/2003 3:19:52 PM] [Physician] Thanks Oz....your EGHT call yesterday was great...

[12/9/2003 3:19:59 PM] [TraderStar] ..especially today when everything else is tanking

[12/9/2003 3:20:23 PM] [StockStalker] did u get the TUTS too doc?

[12/9/2003 3:20:51 PM] [talltrader] Oz, EGHT will be a core stock for me.

[12/9/2003 3:20:59 PM] [swingingschoolmarm] I did! TUTS.

[12/9/2003 3:21:31 PM] [StockStalker] volume was drying up intraday and the 20 ema dialy was hit

[12/9/2003 3:21:51 PM] [StockStalker] TUTS was a real time scan stock today

[12/9/2003 3:22:01 PM] [softrock] AVII wow, at an 8 month low.

[12/9/2003 3:22:14 PM] [syatt] 1358 - 1898 / 2147

[12/9/2003 3:22:47 PM] [Fieldcrestcf] I would gladly sell my AVII at my cost .

[12/9/2003 3:22:55 PM] [Physician] I thought about jumping into King TUTS tomb, but I passed on it...:8

[12/9/2003 3:47:47 PM] [hotto] I am just looking for a PB from the DJIA 10K tag.. And.. some tax-selling creeping in.. both winners and losers..

[12/9/2003 3:49:31 PM] [syatt] uda
[12/9/2003 3:49:51 PM] [hotto] JCOM.. breaking below sma200... not good.
[12/9/2003 3:50:53 PM] [hotto] This is not a Bear Mkt.. BUT... coming into tax-selling time.. with "losers" can feel like a Bear Mkt..
[12/9/2003 3:51:42 PM] [hotto] AND... now with All 3 Big avgs.. having accomplished goals... Could be some big-time selling now...
[12/9/2003 3:52:59 PM] [YahooMike] so do stocks like JCOM & SCKT come back after tax selling?
[12/9/2003 3:53:37 PM] [hotto] COMPQX hit 2000... SP-500 hit 1070.... DJIA hit 10000... now.. Profit protection.. and tax-selling adjustments..

[12/9/2003 4:38:10 PM] [softrock] .

[12/9/2003 5:03:11 PM] [bobpan] Can anyone tell me one can download account info from broker, directly into Quicken? Also, is there a fee to Quicken for this service?

[12/9/2003 5:04:15 PM] [ButterflySpread] If you have a recent version of quicken you can download directly as long as your broker has an agreement with quicken. No fee.

[12/9/2003 5:04:57 PM] [ButterflySpread] You have to set this up and you can do so by calling your broker because there are routing numbers you need to input.

[12/9/2003 5:05:29 PM] [bobpan] Regarding Interactive Brokers, does anyone know if they provide it?

[12/9/2003 5:12:04 PM] [nemsca] IB does have a setup where u can download activity to Quicken, I don't know if you can upgrade q or not, let me know if u find out, please.

[12/9/2003 5:14:47 PM] [auctionsxx] my brokerage account works with microsoft money...but its not very usefu

[12/9/2003 5:21:48 PM] [jbrad] Bush just signed the \$3.7 billion bill for nano-technology

[12/9/2003 5:22:11 PM] [Cobratrader] EGHT just got slammed by Kramer on CNBC

[12/9/2003 5:24:02 PM] [asg1694] Schwab has a direct download for quicken. No Fee.!

[12/9/2003 5:24:56 PM] [cyberact] Cobratrader...my 2 cents on the VoIP stocks like EGTH....they are not going down because of Kramer...they are going down because none of them owns a Cable company....anr that's where the real play is on internet telephoning...

[12/9/2003 5:25:26 PM] [cyberact] companies like time warner etc...

[12/9/2003 5:25:43 PM] [cyberact] will put thoem out of business

[12/9/2003 5:25:58 PM] [cyberact] eventually

[12/9/2003 5:26:54 PM] [Cobratrader] cyber, kramer was saying that EGHT was not a VoiP play, something about them being into video conferencing , no position here just thought others might be interested

[12/9/2003 5:27:48 PM] [Derfel] Video conferencing over IP, or over proprietary lines?

[12/9/2003 5:28:12 PM] [cyberact] well...be cautious....because video conferencing thru the internet will also be a cable systems play IMO....

[12/9/2003 5:29:10 PM] [Cobratrader] sorry i didn't catch the details, but i agree cable has the upper hand in the long run. EGHT is trading down in AH

ClubHome

[12/9/2003 5:31:01 PM] [cyberact] they will be all penny stocks in the end.. Just my opinion...

[12/9/2003 5:31:23 PM] [Derfel] That's more of a concern to buy-and-hold investors.

[12/9/2003 5:34:18 PM] [Derfel] Question: can't the VoIP companies use cable?

[12/9/2003 5:35:08 PM] [Cobratrader] theres trades hitting at 5.00 AH, mostly on Kramers comment IMO.. was %.79 right before he opened his mouth..

[12/9/2003 5:37:20 PM] [Cobratrader] Derfel, I think that was cyberact's point, VoiP & cable.

[12/9/2003 5:38:09 PM] [Derfel] I missed the point then, why would a VoIP company need to own cable lines?

[12/9/2003 5:39:19 PM] [Derfel] EGHT may be recovering slightly -- possibly another buy opportunity here

[12/9/2003 5:39:38 PM] [Cobratrader] Sooner or later the cable companies will start there own service and will compete with companies like EGHT

[12/9/2003 5:40:40 PM] [RTW777] FYI... EGHT is NOT a VOIP company... they do tele-conferencing

[12/9/2003 5:40:47 PM] [Derfel] Anti-trust regulations may prevent that.

[12/9/2003 5:40:54 PM] [Cobratrader] More bundled services, TV, Internet, Phone all from one place.

[12/9/2003 5:41:37 PM] [Derfel] Just guessing, but it seems unlikely that the provider of the physical media will be allowed to also control the content.

[12/9/2003 5:41:59 PM] [RTW777] Comcast in Denver offers that package (Cable T.V., hi-speed internet & telephone)

[12/9/2003 5:42:54 PM] [Cobratrader] others also are starting, doesn't look good for the Bells, IMO..

[12/9/2003 5:43:06 PM] [Derfel] Did Comcast originate those services, or are they reselling someone else's technology?

[12/9/2003 5:43:39 PM] [RTW777] AT&T Cable also offered it before Comcast buy-out

[12/9/2003 5:43:57 PM] [w2jc] Cablevision in N NJ recently announced telephone service over their cable plant also ... they are providing the service on their network

[12/9/2003 5:44:29 PM] [w2jc] i dont know whose hardware they are using

[12/9/2003 5:44:42 PM] [RTW777] Don't be surprised if Qwest breaks on to the VOIP scene (beaucoup fiber!)

[12/9/2003 5:45:15 PM] [Derfel] Great, we just deregulated phone service and now it's all going to end up in the hands of your local cable provider?

[12/9/2003 5:45:35 PM] [Cobratrader] Cable has the last mile wrapped up...

[12/9/2003 5:45:39 PM] [w2jc] cable phone not regulated either :o

ClubHome

[12/9/2003 5:47:11 PM] [Derfel] Cable phone?
[12/9/2003 5:47:39 PM] [w2jc] isnt that what you were discussing derfel?
[12/9/2003 5:48:02 PM] [Derfel] Oh, VoIP? Yeah.
[12/9/2003 5:48:54 PM] [Cobratrader] EGHT back up to 5.55 AH
[12/9/2003 5:49:37 PM] [Derfel] I suppose as long as the phone companies are around, the cable companies will have competition for phone services and can escape deregulation.
[12/9/2003 5:51:20 PM] [Derfel] Deregulation wasn't the right word....)
[12/9/2003 5:52:32 PM] [RTW777] Cisco is a VoIP player as well... instead of digital phones made by Lucent that use digital phone lines, you could have Cisco phones that use an I.P address off of a LAN/computer conneciton
[12/9/2003 5:54:23 PM] [Jay] RTW - how do you know what number to dial, or does VoIP just provide an internal phone network
[12/9/2003 5:55:04 PM] [RTW777] To the end-user, it works the same as a "normal" phone
[12/9/2003 5:55:49 PM] [RTW777] You KNOW that the CWA is watching VoIP VERY close
[12/9/2003 5:55:50 PM] [Jay] so someone with a cell phone could call someone with VoIP?
[12/9/2003 5:56:26 PM] [Jay] or a landline?
[12/9/2003 5:57:00 PM] [RTW777] Jay] yep. That's the tricky part - getting the VoIP network to interface w/ all the other systems
[12/9/2003 5:57:19 PM] [Derfel] My company has used Vonage, which I think is VoIP. Quality is sucky for business use, but probably okay for personal use.
[12/9/2003 5:57:50 PM] [Jay] sounds cool. Thanks for the info
[12/9/2003 5:57:52 PM] [RTW777] b-a-n-d-w-i-d-t-h
[12/9/2003 5:59:08 PM] [RTW777] That's why I'm still a little skeptical about the "fiber glut" - maybe now, but as more products hit the market & more uses are created...
[12/9/2003 6:11:29 PM] [w2jc] commissions on options in my IRA are outrageous
[12/9/2003 6:12:17 PM] [beach] w2,,,options commisions at IB are 1.50 contract in an IRA
[12/9/2003 6:13:33 PM] [w2jc] thanks beach... that was supposed to be for Borankin but i forgot the /r
[12/9/2003 6:15:02 PM] [RTW777] W2] who's your IRA broker?
[12/9/2003 6:15:11 PM] [w2jc] HarrisDirect
[12/9/2003 6:16:08 PM] [RTW777] Beach] you use IB?

[12/9/2003 7:23:07 PM] [Zathrus] Can someone out there tell me where one can view the current T-bill interest rates online?

[12/9/2003 7:35:23 PM] [Fieldcrestcf] hey Z, they have them is Tradestation. Don't know if that helps

[12/9/2003 7:35:42 PM] [BoBoTrader] you can view the T bill interest rates by www.ask.com enter your question.

[12/9/2003 7:35:42 PM] [Zathrus] thanks - I don't have tradestation though

[12/9/2003 7:36:06 PM] [Fieldcrestcf] which one do u want

[12/9/2003 7:36:06 PM] [Zathrus] wow Bobo - that sounds pretty dang simple :D
[12/9/2003 7:36:40 PM] [Fieldcrestcf] is that in ask and you shall receive ?
[12/9/2003 7:36:44 PM] [Zathrus] actually a friend of mine is all spazed out about a mortgage he's trying to get that's tied to T-bill rates - he's driving me nuts!
[12/9/2003 7:37:25 PM] [Fieldcrestcf] i wonder if quotes.yahoo.com would have it.
[12/9/2003 7:38:08 PM] [Zathrus] the ask jeeves link works great!
[12/9/2003 7:38:20 PM] [Fieldcrestcf] they are on the cboe maybe cboe.com as a guess
[12/9/2003 7:39:14 PM] [Fieldcrestcf] cboe.com
[12/9/2003 7:39:20 PM] [Fieldcrestcf] oops
[12/9/2003 7:40:04 PM] [BoBoTrader] Ask Jeeves is pretty good can ask any question and get an answer.
[12/9/2003 7:40:36 PM] [Zathrus] well heck Bobo - you can ask ME any question and get an answer - it just might not be right :)
[12/9/2003 7:41:03 PM] [BoBoTrader] :D
[12/9/2003 7:41:07 PM] [long351] ask jeeves is more like ask any question and receive 20 websites where you can buy something vaguely related to your inquiry
[12/9/2003 7:41:14 PM] [wildbill] :D
[12/9/2003 7:41:45 PM] [Zathrus] there is a website called BankRate.com which looks really sweet! Thanks to Jeeves
[12/9/2003 7:42:14 PM] [Zathrus] all figures this week, last month, and 1 year ago - how could you beat that!
[12/9/2003 7:44:58 PM] [Fieldcrestcf] cool
[12/9/2003 7:50:11 PM] [Fieldcrestcf] if a company (AVII) issues a bunch of warrants at around 5.6 (have to check the news to get the real number) and the stock is at 4.2, is that good or bad for the stock ?
[12/9/2003 7:54:57 PM] [long351] its bad in that it is dilutive if things start to go right and will also add supply to the stock on the way up
[12/9/2003 7:55:57 PM] [long351] its good if the folks they were issued to are fast money guys who now have a vested interest in pushing the stock through those levels but thats just me neing jaded
[12/9/2003 7:57:05 PM] [Zathrus] if it is AVII it is always bad - no matter what it is. AVII burned my village, and stole the silver from our church.
[12/9/2003 7:57:37 PM] [Barnabus] lol...steal your dog too?
[12/9/2003 7:58:05 PM] [Zathrus] yes - after they performed unspeakable acts with him
[12/9/2003 7:58:07 PM] [Bwc] hit the dog with a car i bet
[12/9/2003 7:58:34 PM] [long351] thats great zath

[12/9/2003 9:59:20 PM] [hotto] The Correction I have discussed in Feb-MAR.. is not just an Interest-rate Fear.. decline..

[12/9/2003 10:00:49 PM] [hotto] It will be based. on several negs.. that have built up... Incl fear of "W" not winning re-election.. many things.. We have discussed.. on Saturdays..

[12/9/2003 10:03:00 PM] [hotto] I used DIA short today.. And... some OEX Puts.... still have my LRCX short as well...

[12/9/2003 10:51:40 PM] [Investortrader] I've been 90% cash since last Wed I think ...

[12/9/2003 10:51:48 PM] [cobralso] Does VZ look like a good short

[12/9/2003 10:52:40 PM] [Investortrader] OBV did make a lower high on the recent price upmove a few days ago, which isn't good

[12/9/2003 10:52:56 PM] [pope39c] Double top in FARO, If breaks down some, room to move lower

[12/9/2003 10:52:57 PM] [Intuitive] These stocks were up the last 30' on above ave volume: HITK DTAS CYPB OPSW IO PTEK CHINA FRNT MOBE ATML VRSO EMC SOHU LEXR NANO. Comments?

[12/9/2003 10:53:56 PM] [Investortrader] And VZ is sitting right near the 50 and 20 day

[12/9/2003 10:54:08 PM] [Investortrader] I use simple mvg avgs

[12/9/2003 10:55:07 PM] [Investortrader] Market feels like it will drift lower as I commented on when the fed report was pretty much as expected which should help out any short posns

[12/9/2003 10:55:18 PM] [cobralso] Too much support I gess

[12/9/2003 10:56:19 PM] [Investortrader] If it does break that support where it sits right now could easily move down to test the lower Bollinger Band ... watch vol, up today from yesterday

[12/9/2003 10:57:56 PM] [Investortrader] FARO if it breaks below the 11/24 low, will be below the lower Bollinger Band but the 50 day is creeping up to that point almost, would want to see increased vol or the OBV won't make a new low if price breaks

[12/9/2003 10:58:15 PM] [Investortrader] I like to see confirmation in the OBV

[12/9/2003 10:58:39 PM] [Investortrader] But again, with market drifting lower will help shorts

[12/9/2003 10:59:03 PM] [Investortrader] That's a long list Intuitive!

[12/9/2003 11:00:00 PM] [Investortrader] I think HITK tina was playing it and Hotto has mentioned it but I have not played it

[12/9/2003 11:00:02 PM] [Intuitive] Long...yes, will watch how they open tomorrow.

[12/9/2003 11:00:25 PM] [Investortrader] What's your time frame Intuitive?

[12/9/2003 11:00:31 PM] [Investortrader] For trading

[12/9/2003 11:01:19 PM] [Investortrader] I'm a short term swing trader, few days to a couple weeks usually, so I mostly go off the daily to find stocks, and use the 5's for better entry/exit

[12/9/2003 11:01:33 PM] [Intuitive] Like candles signals, want the stock to be up after 1st 30'

[12/9/2003 11:02:51 PM] [Investortrader] Notes on HITK say earnings and

ClubHome

conference call are on the 11th

[12/9/2003 11:03:13 PM] [cobralso] HITK looks strong for a long, alot of support

[12/9/2003 11:03:31 PM] [Investortrader] Other than that chart looks good, but I don't like holding into earnings so the time frame is too short for me to play

[12/9/2003 11:04:21 PM] [Investortrader] It does look good cobralso, but if earnings are bad it'll change

[12/9/2003 11:04:38 PM] [Intuitive] Check out PTEK. Daily scan shows down day, but stong closed strong. Worth watching for smart money buying at close on down day.

[12/9/2003 11:05:20 PM] [Investortrader] PTEK 7.95 has been support

[12/9/2003 11:05:32 PM] [Investortrader] Or around there give or take a few cents

[12/9/2003 11:06:20 PM] [Investortrader] So it's near support, which is how I like to buy, so you know if you are wrong soon and only take a small loss

[12/9/2003 11:06:54 PM] [Investortrader] But I've been leary of buying long since last wed when a lot of stocks rolled over

[12/9/2003 11:07:07 PM] [Intuitive] Same here, like to buy near support.

[12/9/2003 11:07:40 PM] [Investortrader] I think I raised cash tues and wed last week, but may have been wed and thur, it's in the chat logs whenever it was

[12/9/2003 11:09:20 PM] [Investortrader] That one, PTEK, might be worth a stab ... OBV hasn't made a new low as that support is being reached .. yet

[12/9/2003 11:09:46 PM] [cobralso] You think PTEK is a long prospect

[12/9/2003 11:10:09 PM] [Intuitive] Nice Short? CMTL. Up day...but checkout last 30'

[12/9/2003 11:10:28 PM] [Investortrader] I think it could be worth a trade on the long side, probably go down at the open continuing todays move, watch vol as it approaches the support

[12/9/2003 11:10:50 PM] [tiga] Here are some short possibilities to chew on. Listed in order of descending stochs so the ones toward the end of the list are more oversold. FDRY QCOM MERQ EXBD OVTI PFCB SOHU XLNX MCHP NATI AVID KLAC INTC SNDK

[12/9/2003 11:10:53 PM] [Investortrader] But I would use smaller than normal posns on all longs here since I think the market will drift lower

[12/9/2003 11:11:27 PM] [cobralso] TY

[12/9/2003 11:11:53 PM] [cobralso] I go play now

[12/9/2003 11:12:10 PM] [Investortrader] CMTL ...

[12/9/2003 11:12:13 PM] [tiga] RIMM how could I foget that one.

[12/9/2003 11:13:00 PM] [Investortrader] Looks like it should at least retest yesterdays lows, last couple of 5's today were down on bigger vol, and for the day range ..

[12/9/2003 11:13:23 PM] [Investortrader] Ran up to the LR30 and the 20-day which

ClubHome

turned it back down

[12/9/2003 11:13:42 PM] [Investortrader] Another long list tiga ;)

[12/9/2003 11:14:51 PM] [Investortrader] I'll look at Intuitives list and see if anything hits me in the eye, then look at yours

[12/9/2003 11:15:15 PM] [tiga] I cherry pick them in the morning. Prefer small gap up, then some move up and then a roll over on the 5 min charts. I don't chase the gap downs usually.

[12/9/2003 11:16:26 PM] [Investortrader] Good way to play, especially since the first 30-60 minutes is amateur hour, many times they pop then roll over rest of day

[12/9/2003 11:16:43 PM] [Investortrader] I almost never buy then but will sell

[12/9/2003 11:17:39 PM] [Intuitive] Stocks down last 30' on 100+ volume: SRNA
REMC CMTL VCLK NANX MNST EGHT ECIL ARBA CLST FIBR FMT CHRD NTBK
IMM IDXC

[12/9/2003 11:17:50 PM] [tiga] Works best in a down trending market where they try to move up the losers in the am only to have them sell off.

[12/9/2003 11:18:19 PM] [Investortrader] CYPB breaking out BTBO

[12/9/2003 11:18:28 PM] [Investortrader] And good vol last two days

[12/9/2003 11:18:37 PM] [tiga] These can bite you though if the general market turns back up. Gotta watch them very closely.

[12/9/2003 11:19:31 PM] [Investortrader] I think we will be in a drifting down market ... but any catalyst could pop it since I don't think it's headed down hard and fast here

[12/9/2003 11:21:44 PM] [Investortrader] MOBE has been played in here on the long side before

[12/9/2003 11:22:14 PM] [Investortrader] Don't like it yet

[12/9/2003 11:23:54 PM] [Investortrader] Possibilities in VRSO

[12/9/2003 11:24:23 PM] [Investortrader] OBV holding well here on the test of the late Nov low

[12/9/2003 11:25:00 PM] [Investortrader] Same with RSI

[12/9/2003 11:25:32 PM] [Investortrader] I'd probably wait for a DBO on it to buy

[12/9/2003 11:26:31 PM] [Investortrader] EML no volume to trade it

[12/9/2003 11:28:29 PM] [Investortrader] On to tiga's list

[12/9/2003 11:29:35 PM] [Intuitive] VRSO - low risk..set stop just below 11/21 low @ 2.90

[12/9/2003 11:29:40 PM] [tiga] uh oh.....I'm going to get graded? lol

[12/9/2003 11:30:16 PM] [Investortrader] Noooo :) Just looking to see if anything in it hits me in the eye when I look at the chart

[12/9/2003 11:30:24 PM] [tiga] lol

[12/9/2003 11:30:53 PM] [Investortrader] That was one of the things I liked about

VRSO Intuitive

[12/9/2003 11:31:51 PM] [Intuitive] OR...watch the 5s for a buy signal.

[12/9/2003 11:32:03 PM] [Investortrader] Bearish engulfing on FDRY today

[12/9/2003 11:32:42 PM] [tiga] UAX some of us remember this one when it quadrupled back in May. Penny stock though. Don't favor these if the market is going to pb a little here.

[12/9/2003 11:32:56 PM] [Investortrader] MACD histogram collapsing and RSI dropping below 80 for second time this month

[12/9/2003 11:33:58 PM] [Investortrader] tiga ... what time frame do you trade? .. I don't really daytrade myself

[12/9/2003 11:34:49 PM] [tiga] 5 min usually with 1 min entries. Mostly cash every night

[12/9/2003 11:35:25 PM] [Investortrader] Ok, my comments may not help much as I'm not a daytrader, but I'll shorten it up and give it a shot

[12/9/2003 11:35:45 PM] [Investortrader] Hehehe WB

[12/9/2003 11:35:47 PM] [Intuitive] tiga - do you have a basket of favorites?

[12/9/2003 11:36:10 PM] [Investortrader] FDRY really fell off starting 2:30 after the fed comments

[12/9/2003 11:36:29 PM] [tiga] RIMM XLNX SNDK to name a few of the latest favorites

[12/9/2003 11:37:14 PM] [Intuitive] Do you try to keep a limited list?

[12/9/2003 11:37:21 PM] [Investortrader] Looks like if it does go up a little 25.90 or so might stop it

[12/9/2003 11:37:33 PM] [tiga] I have a scan that I like to use for finding short candidates. It's at my profile.

[12/9/2003 11:37:54 PM] [Intuitive] Ok

[12/9/2003 11:38:17 PM] [Investortrader] 26.10 to 26.20 if it does get thru 25.90

[12/9/2003 11:38:29 PM] [Investortrader] I don't feel too comfortable making daytrading comments though :(

[12/9/2003 11:38:46 PM] [tiga] The scan usually has 50 to 60 hits. I'll review these for topping patterns and try to whittle it down to half a dozen or so to watch in the morning.

[12/9/2003 11:39:25 PM] [Investortrader] For a bit longer term in case anyone is interested if it breaks Fri low should continue down

[12/9/2003 11:40:03 PM] [Intuitive] So, you mainly like the short side?

[12/9/2003 11:40:27 PM] [tiga] I'll only hold them overnight if the candle is really

ClubHome

bearish and I'm way ahead on the trade.

[12/9/2003 11:40:39 PM] [Investortrader] Notes on QCOM say CEO and Director insider sales

[12/9/2003 11:41:11 PM] [Investortrader] About the only time I make a daytrade is if I buy support and it drops thru it same day

[12/9/2003 11:41:39 PM] [Investortrader] Though I will take at least some profits if it pops really good after buying also

[12/9/2003 11:42:16 PM] [tiga] Long trades too. Most of these are high beta and will move quickly the other way also.

[12/9/2003 11:42:58 PM] [tiga] I think I have a chemical imbalance in my brain because I do like shorts better.

[12/9/2003 11:43:10 PM] [tiga] :)

[12/9/2003 11:43:46 PM] [Investortrader] 46.40 or so looks like it will stop a morning pop in MERQ if looking at teh short side

[12/9/2003 11:45:52 PM] [Investortrader] Hope everyone caught the replay of the Jimmy V speech earlier, great for inspiration

[12/9/2003 11:47:17 PM] [tiga] Spend most of my time on lately on SPY with one eye watching some of these others for a good set up. Want to see evidence of a roll over or exhaustion on the upside tehn I'll short it. Give it a little rope and see if it hangs itself.

[12/9/2003 11:49:40 PM] [Investortrader] 50.05 to 50.10 could stop PFCB (I'm looking for higher targets for you to short as you said you were interested in a morning pop to short it)

[12/9/2003 11:50:35 PM] [Investortrader] But not too much higher lol

[12/9/2003 11:51:54 PM] [Investortrader] jnati

[12/9/2003 11:51:57 PM] [Investortrader] oops

[12/9/2003 11:52:56 PM] [tiga] RIMM was perfect example of how I like it to work. Shorted on 12/3 when the double top failed on the daily. Held overnight the first day only because the close was at lod and I was ahead a good amount. closed Friday because it looked like it was stalling and it was friday. reshorted it twice today. Should have held but took the money and ran today. will watch for another entry tomorrow

[12/9/2003 11:54:25 PM] [Investortrader] I see what you mean on 12/3

[12/9/2003 11:54:44 PM] [tiga] RIMM failed the 50 today pretty good too. This may be the beginning of a pretty good pb

[12/9/2003 11:55:45 PM] [Investortrader] Looking at the 5's a lot of these got hit on the fed non-announcement

[12/9/2003 11:57:56 PM] [tiga] I shorted RIMM right after it started to fall after the

ClubHome

FED.....Covered on the pop and almost resorted the top but had to leave for my son's basketball game. Nice day

[12/9/2003 11:58:48 PM] [Investortrader] When you said you shorted it twice today I figured near open and again around fedspeak time

[12/9/2003 11:58:53 PM] [Investortrader] From looking at the 5's

[12/9/2003 11:59:23 PM] [Investortrader] KLAC really got hit today

[12/10/2003 12:00:10 AM] [tiga] Actually I was a little late on the first short today.

Covered on the 11:30 pop.
