[12/18/2003 8:31:45 AM] [tiga] Computer performance: FWIW, adding RAM is a cheap and easy way to improve your PC performance. I thought I had enough with half a gig but added another half gig and the difference in performance is remarkable. RAM is dirt cheap compared to where it was so max out your memory. No I don't own any memory stocks.....lol

[12/18/2003 9:02:31 PM] [Investortrader] On above avg volume too, though somewhat less today
[12/18/2003 9:02:56 PM] [Investortrader] It's getting right up near some resistance here
[12/18/2003 9:04:20 PM] [Investortrader] Looks like the news ma have propelled it higher, haven't read it yet
[12/18/2003 9:04:28 PM] [jbrad] RHAT announced record revenues just before the close. May be a climber tomorrow.
[12/18/2003 9:04:40 PM] [Investortrader] With the lower volume today, it will need more volume to keep going
[12/18/2003 9:04:53 PM] [Investortrader] I would look for some kind of pullback here on it
[12/18/2003 9:05:12 PM] [Investortrader] BEcause of the lower volume today, unless a lot of volume comes in tomorrow early
[12/18/2003 9:06:12 PM] [Investortrader] I wouldn't be a buyer here

[12/18/2003 9:09:03 PM] [jbrad] MOSY

[12/18/2003 9:09:33 PM] [cpratsch] TKF too

[12/18/2003 9:09:40 PM] [Investortrader] MO ...

[12/18/2003 9:10:15 PM] [Borankin] Don Worden commented on RHAT today.

[12/18/2003 9:10:43 PM] [Investortrader] I didn't look at any comments on RHAT, I'll do that after MO

[12/18/2003 9:11:00 PM] [Investortrader] MO steady easy uptrend

[12/18/2003 9:11:06 PM] [jbrad] TKF - today was a doji candle - tomorrow may be down

[12/18/2003 9:11:14 PM] [Investortrader] OBV confirming

[12/18/2003 9:11:29 PM] [Borankin] PW commented today...he was negative. Today, DW was positive. Ya gotta love it.

[12/18/2003 9:11:38 PM] [Investortrader] With MO always have to wonder if another lawsuit will hit it

[12/18/2003 9:11:49 PM] [cpratsch] TKF-yes, short term. Looks good long-term too, have to take some dip

[12/18/2003 9:11:49 PM] [Borankin] I meant PW commented on RHAT yesterday.

[12/18/2003 9:12:26 PM] [Investortrader] The 20-sma has been holding all pullbacks recently in MO

[12/18/2003 9:12:40 PM] [Investortrader] For the last couple months

[12/18/2003 9:12:48 PM] [cpratsch] 10 SMA!

[12/18/2003 9:13:19 PM] [Investortrader] If you buy here make sure you can withstand that pullback, if not I'd wait for one for a better r/r entry

[12/18/2003 9:13:42 PM] [Borankin] By the way, if you're thinking of shorting MO, be sure to be aware of ex-div date. Same holds true if you are short any ATM calls. They will be exercised early just for the dividend. Beware.

[12/18/2003 9:14:19 PM] [Investortrader] Yes, MO does have a nice divvy, good point

[12/18/2003 9:15:06 PM] [cpratsch] bor-good advice. I hold MO for the long run as long as stochastics 30.4 are above 67

[12/18/2003 9:15:43 PM] [Borankin] cpr, do you hold the common stock or calls on MO?

[12/18/2003 9:15:58 PM] [cpratsch] common

[12/18/2003 9:19:04 PM] [Investortrader] Read his notes on RHAT, I don't use any of those indicators but the chart does look good, nice volume breakout over the long base

[12/18/2003 9:19:26 PM] [Investortrader] MOSY ...

tomorrow, first contact with the upper Bolinger Band

[12/18/2003 9:21:14 PM] [Investortrader] On much bigger volume

[12/18/2003 9:22:46 PM] [Investortrader] OBV turning up nicely, above the recent high in early Dec

[12/18/2003 9:23:18 PM] [Investortrader] Looks like 9 will be very easily done

[12/18/2003 9:24:06 PM] [Investortrader] After that upper 9's to 10 doable

[12/18/2003 9:24:29 PM] [techlord61] jter

[12/18/2003 9:24:32 PM] [Investortrader] May need a rest before then, we'll see how volume goes

[12/18/2003 9:24:53 PM] [Investortrader] MACD Histogram and RSI also looking good

[12/18/2003 9:26:23 PM] [Investortrader] Think I'll add this one to my watch list too :)

[12/18/2003 9:26:38 PM] [Investortrader] TKF ...

[12/18/2003 9:27:38 PM] [Investortrader] This one has been riding the upper Bollinger Band for many days here

[12/18/2003 9:28:08 PM] [Investortrader] Closed end fund, I don't like trading those

[12/18/2003 9:28:24 PM] [Investortrader] Also you have big event risk for Turkey

[12/18/2003 9:29:51 PM] [techlord61] SUNW?

[12/18/2003 9:30:05 PM] [Investortrader] It's had good volume recently on the up days, but it's been riding up that upper band so long now, and with today's gap up, I would be a bit leery

[12/18/2003 9:31:20 PM] [Investortrader] Doesn't look like an exhaustion gap since the volume wasn't overwhelming, but it is too extended for me to play here

[12/18/2003 9:31:31 PM] [Investortrader] SUNW ...

[12/18/2003 9:32:56 PM] [Investortrader] This one looks like it is basing a bit here, I like how OBV made a higher high this last price runup

[12/18/2003 9:33:13 PM] [Investortrader] And OBV is holding above where it was in the last base in Nov

[12/18/2003 9:33:58 PM] [Investortrader] MACD Histogram has turned up but is still under the zero line, but turning up is enough, and RSI looks to be over 50

[12/18/2003 9:34:01 PM] [Investortrader] And rising

[12/18/2003 9:35:06 PM] [Investortrader] Peaked above the LR30, and a two day DBO also, closed just under the LR30, looks good here

[12/18/2003 9:35:43 PM] [Investortrader] I'd like to see a bit more volume in it

[12/18/2003 9:36:06 PM] [techlord61] so I wait till next week thanks.....

[12/18/2003 9:36:38 PM] [Investortrader] Welcome techlord :) Watch it tomorrow in case it does get that volume

[12/18/2003 9:38:52 PM] [Investortrader] Too many cross currents

[12/18/2003 9:39:01 PM] [Investortrader] I'd keep to smaller positions

[12/18/2003 9:40:09 PM] [techlord61] what you think about KPN or NT for tomoroow

[12/18/2003 9:40:21 PM] [Investortrader] KPN ...

[12/18/2003 9:40:45 PM] [techlord61] looking to fill that gap

[12/18/2003 9:40:58 PM] [Investortrader] I'm not a daytrader, so won't give one day advice ... but just what I see in teh chart

[12/18/2003 9:42:29 PM] [Investortrader] This stock doesn't have much volume in it, less than 100,000

[12/18/2003 9:42:40 PM] [Investortrader] TA needs volume to work, I'll have to pass on this one

[12/18/2003 9:43:02 PM] [Investortrader] Won't have that problem with NT :)

[12/18/2003 9:44:30 PM] [MadameButterfly] Investor, would that be positive divergence on the OBV on NT?

[12/18/2003 9:44:51 PM] [techlord61] jnt

[12/18/2003 9:44:59 PM] [techlord61] sorry ...

[12/18/2003 9:45:45 PM] [Investortrader] Madame, definately higher than at the Nov lows

[12/18/2003 9:46:13 PM] [Investortrader] And price held nicely above also, and on this last week made a short term dbl bottom

[12/18/2003 9:46:28 PM] [Investortrader] I like the price action yesterday and today also

[12/18/2003 9:47:09 PM] [techlord61] BB bands in the midle 4.60 res.i think he have some potentials ...

[12/18/2003 9:47:54 PM] [techlord61] but this is 4 times test that 4.60 res.line

[12/18/2003 9:48:08 PM] [Investortrader] Ys techlord .. I think it can get up there on this move

[12/18/2003 9:48:13 PM] [techlord61] consolidate time?

[12/18/2003 9:48:32 PM] [Investortrader] RSI looks nice as it just turned up from under 20

[12/18/2003 9:48:55 PM] [Investortrader] MACD Histogram rising too, the way I use MACD Histogram it doesn't need to be above the zero line, just in a rising formation

[12/18/2003 9:49:44 PM] [techlord61] I use MACD 12,26,9 and it looks like is touching the zero line

[12/18/2003 9:50:14 PM] [Investortrader] Also on the template I have up now ... many mvg avgs are converging, which can be a good signal for an upcoming move

[12/18/2003 9:50:25 PM] [Investortrader] techlord, I use 5,17,9

[12/18/2003 9:50:30 PM] [MadameButterfly] Investor, could you please show us the template you use?:)

[12/18/2003 9:50:54 PM] [Investortrader] MAdame, in my profile is my main template, my KISS template, Keep It Simple Somehow :)

[12/18/2003 9:51:27 PM] [MadameButterfly] Thank you.

[12/18/2003 9:51:34 PM] [Investortrader] The one now is my secondary one, this one can't negate a trade, but can confirm if it will be a powerful move or a less powerful move

[12/18/2003 9:52:10 PM] [Investortrader] I like NT here, going to add it also for tomorrows watchlist

[12/18/2003 9:52:33 PM] [Investortrader] Any move up on volume I'll probably be buying it

[12/18/2003 9:52:50 PM] [Investortrader] Going to take a quick look at the 5's on it

[12/18/2003 9:53:00 PM] [techlord61] whit this market did not trade for whilelost my confidence

[12/18/2003 9:53:41 PM] [Investortrader] Good idea to stop trading if you lose confidence ... for a bit, just not too long, gotta get in tehre and swing again soon

[12/18/2003 9:53:57 PM] [techlord61] thanks INVESTOR for you effortthanks

[12/18/2003 9:54:09 PM] [Investortrader] Welcome techlord :)

[12/18/2003 9:54:33 PM] [Investortrader] I may put in order in on NT looking for a small pullback in the morning, and pay up if it doesn't happen

[12/18/2003 9:55:24 PM] [Investortrader] Going to look at the 5's on MOSY here, since I liked that one also

[12/18/2003 9:56:33 PM] [Investortrader] I look at the 5's to look for some support to find a lower entry than the close, deosn't always pullback any but if it does it will give you a good place to place an order

[12/18/2003 9:57:12 PM] [Investortrader] This one doesn't look like it will, but I'll be there in case it does, or pay up a little

[12/18/2003 9:57:37 PM] [Investortrader] So we have a breakout play in MOSY

[12/18/2003 9:57:58 PM] [Investortrader] And a short term dbl btm play in NT, with this crazy market the dbl btm play may be safer

[12/18/2003 9:58:22 PM] [techlord61] three days up and three kickers ...pullback any time ...

[12/18/2003 9:58:28 PM] [Investortrader] In NT I would use a few cents under yesterdays low for a stop loss

[12/18/2003 9:58:41 PM] [Investortrader] In MOSY ...

[12/18/2003 9:59:06 PM] [w2jc] IT ... doesnt the fact that NT stopped at resistance on the 50 day ma last time affect your exuberance?

[12/18/2003 9:59:07 PM] [Investortrader] That one is more dangerous, but also has more momentum behind it

[12/18/2003 9:59:51 PM] [Investortrader] w2jc, not really, but if I am in it I will be watching volume as it approaches there ... have to remember ...

[12/18/2003 10:00:10 PM] [Investortrader] The middle peak is what defines a dbl btm, and it will need to break above that to confirm the pattern

[12/18/2003 10:00:25 PM] [Investortrader] Then it's a simple measuring to get your targets

[12/18/2003 10:00:49 PM] [w2jc] if you can get into it around 4.10 then there is some space above to the 4.35 ma, but from where it is now it's kinda tight

[12/18/2003 10:01:29 PM] [w2jc] otherwise I agree, on the daily NT everything does look ready to pop

[12/18/2003 10:01:32 PM] [Investortrader] True, but the price/volume activity when it gets there will most likely tell you whether to scalp it there or hold

[12/18/2003 10:01:54 PM] [Investortrader] Yes, it looks ready so that 4.35 area doesn't concern me as much as it would otherwise

[12/18/2003 10:02:17 PM] [Investortrader] Plus recently the up days have been on more volume than the down days

[12/18/2003 10:02:53 PM] [Investortrader] We'll know by th volume as it gets there, if it's good, I'd hold, if weak sell

[12/18/2003 10:03:09 PM] [Investortrader] A low volume rise to there is definately a warning signal

[12/18/2003 10:03:33 PM] [Investortrader] But that's a good point you brought up, good eye!

[12/18/2003 10:03:52 PM] [w2jc] hmmm... i just looked at the 2 day NT and notice that the 100 day sma and ema are both just about 4.05 ... should be fairly strong support

[12/18/2003 10:03:54 PM] [techlord61] tomoroow exp.day so we should be ok ...

[12/18/2003 10:04:05 PM] [Investortrader] I do like yesterdays price action, and todays, both clsoing near the hod

[12/18/2003 10:04:46 PM] [Investortrader] Another tricky event, triple witching!

[12/18/2003 10:05:00 PM] [techlord61] 4.05 supportstrong for me

[12/18/2003 10:06:14 PM] [techlord61] plus dbl bottom .
[12/18/2003 10:06:32 PM] [techlord61] we need one more day

[12/18/2003 10:10:38 PM] [Investortrader] I'll most likely be in NT either way unless it

[12/18/2003 10:12:03 PM] [techlord61] next year maybe
[12/18/2003 10:12:05 PM] [Investortrader] Nice tail on it today, but would look a lot
better with more volume
[12/18/2003 10:12:29 PM] [Investortrader] It has had a few good volume up days and
OBV looks ok
[12/18/2003 10:13:23 PM] [cobralso] Ok make it go over 3.00
[12/18/2003 10:13:30 PM] [Investortrader] Hmmm, must have had a 2-day chart up

[12/18/2003 10:17:15 PM] [Investortrader] However, it is in one of the currently hot sectors with oil and gas stocks jumping recently

[12/18/2003 10:18:15 PM] [cobralso] what do you think of ITIG

[12/18/2003 10:19:25 PM] [Investortrader] ITIG I wrote a long note on the other day, very long, and TCNet screwed it up! And it never showed up, so I just put in a very short note about my kiss template using it for my profile .. lets take a look now

[12/18/2003 10:19:36 PM] [techlord61] yes I know watch them all the time love Oil stacks they more predictable

[12/18/2003 10:19:44 PM] [Investortrader] very long, took me 45 minutes to write it, I was pissed lol

[12/18/2003 10:21:14 PM] [w2jc] IT ... from past similar experience... i will never type a big note like that directly here ... i always type it in Notepad and then cut/paste ... just in case !!

[12/18/2003 10:21:21 PM] [cobralso] Would have loved to read it

[12/18/2003 10:21:53 PM] [arptroy] Investortrader - I did the same thing with a long note I wrote. I discovered that the system won't take a note over suchand such a length. Typed it again, saved it to notepad before I tried to post. It lost it again, broke it up into two pieces and posed them separately.

[12/18/2003 10:22:03 PM] [Investortrader] I leanred the hard way w2jc lol

[12/18/2003 10:22:25 PM] [Investortrader] arptroy, did you make it two notes or make it an addendum?

[12/18/2003 10:23:36 PM] [Investortrader] I'll get it all in cobralso, some how, maybe break it up into a few notes

[12/18/2003 10:23:45 PM] [arptroy] I made it two notes, but had to post under two different days, because can't post more than one note per day. I don't think I tried an addendum. But I read a very long note today with two long addendums. Gues that is the way you have to do it.

[12/18/2003 10:24:11 PM] [HOTTO] HakunaMetata has joined the club. Please welcome your new member.

[12/18/2003 10:24:24 PM] [Investortrader] I'll put it in notepad and try the addendum first

[12/18/2003 10:25:29 PM] [Investortrader] I like the low volume pullback, the low volume consolidation, and the high volume today on ITIG

[12/18/2003 10:58:01 PM] [Investortrader] But you can see in late sept and oct where that was support, and support becomes resisitance once it fails
