## ClubHome

[12/7/2003 8:56:35 AM] [Fern] kellaam, tina said it was technical analysis for financial markets, but i can only find book technical analysis for futures market in half.com is that the book she is recommding?

[12/7/2003 8:58:14 AM] [beach] by John Murphy

[12/7/2003 8:58:48 AM] [Fern] yes by murphy

[12/7/2003 8:59:16 AM] [beach] Amazon search of murphy brings up the book

[12/7/2003 8:59:45 AM] [Fern] is it tech analysis for futures market , because tina said it was tech analysis for financial markets

[12/7/2003 9:03:04 AM] [wiseman] The Master Swing Trader--Farley--toughest but best book I have read on the subject

[12/7/2003 9:03:18 AM] [wiseman] errr--still reading

[12/7/2003 9:03:40 AM] [Fern] that is a good book

[12/7/2003 9:05:32 AM] [Fern] i was going to order murphy's book from half.com until i noticed the title was not the same as the title tina gave us, i guess it must be the tech analysis for futures market

[12/7/2003 9:08:15 AM] [Saroj] Here's the title from the actual book on my shelf:

"Technical Analysis of the Financial Markets" - John Murphy

[12/7/2003 9:09:47 AM] [Fern] ty saroj, i will try to find the right book

[12/7/2003 9:09:52 AM] [Saroj] copyright 1999 published by the New York Institute of Finance; ISBN 0-7352-0066-1

[12/7/2003 10:43:22 AM] [tuckams] gm everyone. The DCGN chart looks very nice. good find

[12/7/2003 10:44:37 AM] [tuckams] just curious. did you find DCGN with a scan or just stumble on it?

[12/7/2003 10:46:03 AM] [Fern] hi tuckams just scanned for all stocks with volumes over 75% and price \$1 - \$10, then just went real quick over them looking for inc obv

[12/7/2003 10:46:14 AM] [tuckams] good job. ty

[12/7/2003 12:13:19 PM] [HOTTO] swan has replied to: Hotto's A B C Pattern  
[12/7/2003 12:29:30 PM] [bobpan] Can anyone direct me to a source where I can get the basic concept of the ABC pattern. Looking back at charts, where it is used does not give me a clear picture of what is going on. This is like trying to understand geometry without knowing the Theorems. Any help or direction will be appreciated.  
[12/7/2003 12:31:29 PM] [Golfman25] bob, go to the club disucssions page. someone put up a nice PFD paper on it. Haven't gone thru it yet, but looks good.  
[12/7/2003 12:38:51 PM] [trdr] bobpan...the basic concept is after a typical 5 wave pattern in Elliot Wave theory,,there is an A,B,C count at the end.in the opposite direction...go to most any EW site and it will give you a picture .I am not a expert in EW  
[12/7/2003 12:47:46 PM] [trdr] bobpan...after the 5 top (as example)the first counter trend leg would be A..the impulse wave up would be B. and the next wave down would be a C....I.E a zig zag ..down /up/down..a/b/c  
[12/7/2003 12:53:00 PM] [w2jc] Bobpan -- if you are still here, in addition to the PDF file (in Files of Hotto club) there are a lot of other excellent files and papers you should read to get "up to speed" on the techniques... look thru the Discussions section and the Files section... you can also get one big file of all the Hotto logs from [www.elliottwaves.us#hotto-logs](http://www.elliottwaves.us#hotto-logs)  
[12/7/2003 12:55:36 PM] [trdr] w2jc....I think we are wasting our efforts...like Elvis.....I think boppan asked the question...then left the building  
[12/7/2003 12:55:58 PM] [w2jc] well, someone else might see the posts and be helped ;)  
[12/7/2003 12:58:53 PM] [trdr] Bor..I have heard it said a lot of ways...but yours is the most unusual.....lol  
[12/7/2003 1:01:08 PM] [szasza] -  
[12/7/2003 1:01:54 PM] [trdr] hey Sza..what you doing ..working on a Sunday...no Emini's to scalp here  
[12/7/2003 1:33:35 PM] [tuckams] does anyone know how to enter a field in the status bar? I read Tina's discussion of that yesterday, but don't seem to be able to do it.  
[12/7/2003 1:33:56 PM] [tuckams] disregard. Just figured it out.  
[12/7/2003 1:46:08 PM] [swan] .  
[12/7/2003 1:49:07 PM] [terribletom] tuckams, you may have looked, but tcnet help is very good on many of those things

[12/7/2003 4:32:49 PM] [Fern] hello everyone

[12/7/2003 4:33:12 PM] [rsi77] hello Fern

[12/7/2003 4:33:24 PM] [Fern] does anyone know if hotto will be on

[12/7/2003 4:33:39 PM] [Fern] hi rsi

[12/7/2003 4:33:40 PM] [starrbucks] good question fern..ty

[12/7/2003 4:34:13 PM] [rsi77] I don't know either...

[12/7/2003 4:34:20 PM] [Fern] came across another stock that looks real good, NOVL

[12/7/2003 4:35:07 PM] [rsi77] I'm still liking TIWI a lot....I was in but got out a few days ago.

[12/7/2003 4:35:20 PM] [Fern] rising triangle with flying obv

[12/7/2003 4:36:24 PM] [rsi77] It does look interesting...

[12/7/2003 4:37:01 PM] [Fern] tiwi has a flag forming should move by tomorrow, last three candles lower highs and higher lows, just like a mini triangle

[12/7/2003 4:37:28 PM] [Fern] and volume decreasing

[12/7/2003 4:37:31 PM] [HOTTO] starrbucks has replied to: This is a trial Pop-up Report 120303

[12/7/2003 4:37:34 PM] [rsi77] what do you think of VRSO?

[12/7/2003 4:39:07 PM] [rsi77] ACTG had BTBO Friday, but I'm not trusing follow through's so much lately

[12/7/2003 4:39:28 PM] [Fern] looks like another one with rising triangle, threw doji friday shoul move up tommorw to form bottom of trangle

[12/7/2003 4:42:53 PM] [Fern] look at ITIX, 5 month sym. triangle that broke upwards on 12/3 with rising obv and now forming flag or abc pattern, should movu up much higher, foldover target 6.25

[12/7/2003 4:47:12 PM] [Fern] s=4.45 hod 9/23, s=4.85 hod 7/15, t=6.25 (foldover) hod 6/132002 was 6.20 pretty close, i wish hotto was here to confirm or refute what i see

[12/7/2003 4:47:45 PM] [Fern] sorry itxc not itix

[12/7/2003 4:49:56 PM] [rsi77] yes, ITXC has been catching my attention as well

[12/7/2003 4:50:52 PM] [Fern] look at the obv, + obv divergence between 7/15 and now

[12/7/2003 4:53:38 PM] [rsi77] have you spotted any short picks?

[12/7/2003 4:54:47 PM] [Fern] rsi, you are going to laugh but i have yet to short a stock, have only been at this since july in earnest

[12/7/2003 4:55:50 PM] [Fern] finally managed to get an account for my pension plan that allows me nargin and to short stocks but have not done either yet

[12/7/2003 4:56:03 PM] [Fern] margin

[12/7/2003 4:56:19 PM] [rsi77] I've nto yet made money on a short...but I haven't tried too many of them

[12/7/2003 4:56:39 PM] [rsi77] This is a bull market after all....full of "surprises"

[12/7/2003 4:57:05 PM] [Fern] looks like prices drop faster than they go up so it should be easy, but i bet it isn;t

[12/7/2003 4:57:10 PM] [charlesd] Are any of you finding many breakouts that follow through. Most I see seen to be better shorts than longs.

[12/7/2003 4:57:53 PM] [rsi77] Seems to be true with the ones I was following, but energy stocks are following through lately...

[12/7/2003 4:58:02 PM] [Fern] i have a feeling that this st pullback is not helping many stocks to really bo like they would normally

[12/7/2003 4:58:30 PM] [rsi77] But many of them have sloppy lookin charts (to me) so it's hard for me to buy into them, and others have to pull back first

[12/7/2003 4:59:07 PM] [Fern] there were only a few with nice rising obv and ready to break out.

[12/7/2003 4:59:11 PM] [rsi77] The question is, how much of a pullback will this be...may be more severe for some sectors than others

[12/7/2003 4:59:13 PM] [wildbill] would suggest you both start practicing soon:-) not imminent - bull market - not hardly-- tremendousl cyclical bull rally yes - but bull market - u have got to be kidding:)

[12/7/2003 4:59:14 PM] [charlesd] I can't find many setups that are presently working.

[12/7/2003 4:59:14 PM] [kmack] bull mkt?

[12/7/2003 4:59:42 PM] [wildbill] hey k - couldn't let that one go LOL

[12/7/2003 4:59:50 PM] [Fern] LU also has a sym triangle raedy to pop, with nice obv

[12/7/2003 5:00:13 PM] [rsi77] wildbill, you think this isn't a bull market? what is then?

[12/7/2003 5:00:30 PM] [wildbill] i just said what is is

[12/7/2003 5:00:48 PM] [rsi77] yes, you said "

[12/7/2003 5:00:55 PM] [rsi77] "cyclical bull rally"

[12/7/2003 5:01:07 PM] [rsi77] do you think the larger context is a bear market?

[12/7/2003 5:01:07 PM] [kmack] in other words...a bear mkt rally...

## ClubHome

[12/7/2003 5:01:11 PM] [wildbill] a Fed based cyclical bull - within a secular bear  
nothin more nothing less  
[12/7/2003 5:01:26 PM] [rsi77] you mean cause it's been "planned"  
[12/7/2003 5:01:28 PM] [Fern] DRRDRRX broke out friday and crossed four ma's and  
sent "scout" over fifth and held over the sma 50, looks real good to me also  
[12/7/2003 5:01:33 PM] [wildbill] lots of money to be made on both sides  
[12/7/2003 5:01:38 PM] [Fern] DRRX sorry  
[12/7/2003 5:01:47 PM] [Fern] was stuttering, lol  
[12/7/2003 5:01:50 PM] [kmack] my thoughts...don't get too biased...  
[12/7/2003 5:01:50 PM] [rsi77] I guess I can't disagree that it's going to go down  
again...  
[12/7/2003 5:02:01 PM] [kmack] just go with the flow...  
[12/7/2003 5:02:39 PM] [wildbill] watching this market has been almost comical to  
watch at times - profitable yes - but comical  
[12/7/2003 5:02:39 PM] [rsi77] but couldn't you see the bear market as a pullback  
from a much larger bull market....do people all agree on this  
[12/7/2003 5:03:11 PM] [wildbill] again - u are joking right?  
[12/7/2003 5:03:11 PM] [kmack] course they don't agree....that is what makes it a mkt  
[12/7/2003 5:03:15 PM] [rsi77] But I don't really care anyway, I trade much more short  
term  
[12/7/2003 5:03:49 PM] [rsi77] Last 9 months acted a lot like a bull market for swing  
traders  
[12/7/2003 5:04:07 PM] [rsi77] And i guess it won't last indefinately...  
[12/7/2003 5:04:21 PM] [rsi77] maybe has already started to end....  
[12/7/2003 5:05:05 PM] [rsi77] I'm pretty new at this so I don't have strongly based  
opinions  
[12/7/2003 5:05:07 PM] [wildbill] historical norms of PE's are 13 to 15 - markets  
always revert to the mean - you tell me which is which - no not ending yet - we remain  
in weekly uptrends  
[12/7/2003 5:05:51 PM] [rsi77] wildbill, what is your time frame....I mean if I look at  
yearly sp-500 from 1970....looks pretty bullish to me...  
[12/7/2003 5:06:29 PM] [rsi77] last three years looks like a short term (relatively  
speaking) pull back  
[12/7/2003 5:06:41 PM] [ChartMonkey] hey if you plan to live 200 years, just buy right  
now and hold. :)  
[12/7/2003 5:07:02 PM] [ChartMonkey] should do fine.  
[12/7/2003 5:07:19 PM] [rsi77] I'm definately not "buy and hold" mentality....even if I  
dd live 200 years.

## ClubHome

[12/7/2003 5:08:12 PM] [rsi77] Anyway, not so important really  
[12/7/2003 5:08:41 PM] [rsi77] But everytime I've tried to short a stock that was starting down and broke through several supports....  
[12/7/2003 5:09:17 PM] [rsi77] it seems to snap back up and head higher again....whereas with long stocks that broke resistance, they've mostly gone up  
[12/7/2003 5:09:30 PM] [rsi77] but no lately so much  
[12/7/2003 5:10:21 PM] [rsi77] wildbill, don't you think with lots of money coming into the market historical norms may not be repeated?  
[12/7/2003 5:10:48 PM] [rsi77] it's really supply/demand....not actual value...as far as I understand it.  
[12/7/2003 5:12:07 PM] [rsi77] and if money starts coming out of the market, for whatever reason, stocks won't stop going down at PE 13-15, that's not related to any real value, is it?  
[12/7/2003 5:12:32 PM] [wildbill] you need to short into strength and go long into weakness during market rally phases  
[12/7/2003 5:13:06 PM] [wildbill] supply and demand has nothing to do with stock prices imo  
[12/7/2003 5:13:19 PM] [rsi77] THat would definately have worked for me sometimes....but not alway...and would have worked more on the long side in the last 9 months...at least with the stocks I've been watching  
[12/7/2003 5:13:50 PM] [wildbill] of course because your mentality is to look on the long side  
[12/7/2003 5:14:39 PM] [rsi77] I don't know if I've tried to do that....it's just always worked better, so I tend to go with what has worked  
[12/7/2003 5:14:40 PM] [wildbill] there are stocks that have gone 10 fold in 6 months - has that any basis in reality?  
[12/7/2003 5:15:22 PM] [rsi77] I don't think the stock market as a whole has much basis in reality...at least I haven't figured out what it is yet.  
[12/7/2003 5:15:45 PM] [wildbill] stop trying to figure it out!  
[12/7/2003 5:15:54 PM] [rsi77] But it seems to affect reality in a big way....the whole thing is rather strange to me....  
[12/7/2003 5:16:22 PM] [rsi77] Yes, I stopped trying to figure it out...I think...but I wold like to figure out what stocks are going up tomorrow..  
[12/7/2003 5:16:30 PM] [rsi77] any ideas?  
[12/7/2003 5:17:09 PM] [wildbill] pretty much all "should" go up tomorrow - but will they that is the real question  
[12/7/2003 5:17:29 PM] [rsi77] You've had a lot of good picks...I pay attention  
[12/7/2003 5:17:40 PM] [rsi77] yes, they should all go up at least 10%

[12/7/2003 5:18:17 PM] [Rookie] WB. You an options player?  
[12/7/2003 5:19:00 PM] [wildbill] don't like making directional picks - my wife does the options - IV - drives me crazy - can never get a handle on it  
[12/7/2003 5:19:23 PM] [Rookie] Who does better % wise?  
[12/7/2003 5:20:03 PM] [wildbill] DITC - "should" pop on a pullback early on - but no guarantees  
[12/7/2003 5:20:46 PM] [rsi77] wb, didn't you short that at close Friday?  
[12/7/2003 5:20:57 PM] [wildbill] % wise - options hands down - but she does not "play" that often  
[12/7/2003 5:21:27 PM] [wildbill] nope not me - don't play the close anymore  
[12/7/2003 5:21:37 PM] [rsi77] OK, my mistake  
[12/7/2003 5:21:58 PM] [Rookie] As long as you both come out ahead!  
[12/7/2003 5:22:19 PM] [gary12] WB do you know anyone that can trade the first hour and make money? :D:D  
[12/7/2003 5:22:22 PM] [wildbill] we try .... just like everyone else  
[12/7/2003 5:24:25 PM] [wildbill] nah ... thats amateur hour isn't it -- don't THEY tell you to stay away from the first hour- in other words WE don't want to share the easy money with anyone else - :)  
[12/7/2003 5:24:32 PM] [Rookie] OK. WB. Tell me what you see in DITC? Everything I see with the exception of OBV is neg.  
[12/7/2003 5:25:07 PM] [ChartMonkey] wb - sarcasm? thought you played the open and only the open ...  
[12/7/2003 5:25:27 PM] [wildbill] sarcasm? me LOL  
[12/7/2003 5:25:34 PM] [ChartMonkey] :)  
[12/7/2003 5:29:13 PM] [wildbill] rookie - just looking for an "oversold" pop- should go a dollar or so before goin back down  
[12/7/2003 5:30:30 PM] [Rookie] OK. I was looking for it to dip dn to the 20dma over the next couple days. Thx for your thoughts.

## ClubHome

[12/7/2003 6:43:29 PM] [w2jc] bobpan -- sorry, just noticed your posting ... what is the question (no guarantee of answer!)

[12/7/2003 6:50:43 PM] [bobpan] W2jc As I read the chat logs re ABC, I think I understand that , ideally, "C" should retrace to "A". Is that correct?

[12/7/2003 6:51:40 PM] [w2jc] i'm just learning the ABC process myself, but my notes indicate that is correct -- or better that it retraces even a little bit more than a -- but often does not do that

[12/7/2003 6:52:54 PM] [bobpan] THnx. Its a daunting subject to grasp, right now.

[12/7/2003 6:53:49 PM] [w2jc] certainly is ... but worth studying ... have you read the Saturday logs on the ABC subject? i think several of them were referenced in the PDF paper...

[12/7/2003 6:56:54 PM] [bobpan] I'm in the process. By the way... I cannot find the November 2002 logs in the file posted on Elliott Wave site. The title shows it but, when I download, I get only Nov.2003. Any clue?

[12/7/2003 6:57:23 PM] [w2jc] you need to download the 'big' file that has ALL the months all the way back to Nov. 2002

[12/7/2003 6:58:30 PM] [w2jc] the one ABOVE the one with the 'new' icon

[12/7/2003 6:58:32 PM] [bobpan] I thought I did that... 2002 pages. But, I'll go back and see if I goofed anywhere.

[12/7/2003 6:59:43 PM] [w2jc] that one is a ZIP file that contains a PDF for each month all the way back to 11/02

[12/7/2003 7:01:12 PM] [bobpan] that's the one i opened... all I could get was Nov. 2003.

[12/7/2003 7:01:28 PM] [w2jc] what is the name of the file you opened?

[12/7/2003 7:01:54 PM] [bobpan] I'll go back and check ...hold on

[12/7/2003 7:07:46 PM] [bobpan] I think I have it squared away, now THnx

[12/7/2003 7:08:08 PM] [w2jc] ok ... after the first few times you get the hang of it ;)

[12/7/2003 7:10:45 PM] [w2jc] did any by any chance capture the charts that Tina used in her presentation yesterday ??

[12/7/2003 7:13:02 PM] [starrbucks] no but i will in the future show how to capture them because i rarely miss any session....you are very helpful... thank you. :):)

[12/7/2003 7:29:21 PM] [starrbucks] hey folks is Hotto talking tonight if so what time???

[12/7/2003 7:30:46 PM] [w2jc] dunno starr... but he deserves a sunday off ;)

[12/7/2003 7:34:11 PM] [starrbucks] agree....)....just don't want to miss anything he has to say.....never had an opportunity to track/or follow a successful trader live before....gurru's talk about what they have done and sell us a book or tape about it but not actually follow the trade itself ""live""...very special moments for me....great
