[4/12/2004 4:50:05 PM] <Luigistock> out 1/2 POSO for a double in an hour and a half :)
[4/12/2004 4:50:34 PM] <hotto> Remember last week? the question of the week was "when do we short IPIX"?....
[4/12/2004 4:50:43 PM] <croy> LOL
[4/12/2004 4:50:50 PM] <croy> Here and there is the answer
[4/12/2004 4:50:56 PM] <hotto> We all do it... think we "know better"... BUT
[4/12/2004 4:51:07 PM] <croy> but not for long
[4/12/2004 4:51:41 PM] <hotto> When in Bull Mkt... short very carefully... and... with specific objectives... NOT - Because you THINK it is overvalued
[4/12/2004 4:52:10 PM] <hotto> Overvalued can go to *2.. or *3.. as we see in TASR
[4/12/2004 4:52:32 PM] <BossFan> I in particular need to work on that one hotto..
[4/12/2004 4:52:55 PM] <Investortrader> I don't short in a bull market except in the beginning of IT downturns like we just had from end of Jan to end of March ...
[4/12/2004 4:53:05 PM] <Luigistock> The Panda taught me that one early on
[4/12/2004 4:53:10 PM] <hotto> LOL.. we all need to - put our "opinions" aside.. Just use the rules..
[4/12/2004 4:53:33 PM] <Quintus> MACE jeez had to let a 1/2 go here 9.48. i'm sure i'll regret it..
[4/12/2004 4:53:59 PM] <hotto> Good job Quint... probably close enough for this run...
[4/12/2004 4:54:03 PM] <Quintus> but right w/ ya luigi -- double in few hrs -- in 4.31
[4/12/2004 4:54:15 PM] <croy> Hotto I did make money scalping short on MAGS and IPIX but I must admit it was a ride for consenting adults and you certainly don't want to be in there for a long period of time So in most cases I missed the bigger moves
[4/12/2004 4:54:37 PM] <Luigistock> sweet play Q
[4/12/2004 4:54:43 PM] <Quintus> wonder if Oz scanner caught this one even earlier ?
[4/12/2004 4:54:48 PM] <hotto> well - congrats. croy.
[4/12/2004 4:54:52 PM] <Quintus> thx lug
[4/12/2004 4:55:51 PM] <Quintus> got a feeling this CMBX gonna test our mettle w/ spike down before Big rewards come. just has that look
[4/12/2004 4:56:14 PM] <napleschip> mace...you may get to short yourself next week....D....
[4/12/2004 4:58:38 PM] <Investortrader> Hard to regret a double ;)
[4/12/2004 4:59:43 PM] <Quintus> hotto haven't heard much on oils here recently. but biggest (major) sector leader recently. do charts like PETD, ROYL do anything for ya ? long both & looking for more.. (feel like i'm spending a bit much time fretting over these Security flyers.)
[4/12/2004 4:59:46 PM] <Luigistock> no regrets here
[4/12/2004 5:00:40 PM] <hotto> Quint.. fretting over stocks that can move 25 to 50% per day... is worth it...
[4/12/2004 5:01:06 PM] <Luigistock> so the 200% like mace defiantly worth it
[4/12/2004 5:01:08 PM] <hotto> Oils may move 10% in a few days..
[4/12/2004 5:02:01 PM] <Quintus> wouldnt argue that. must admit i mostly do bigger size on slower stocks. a psycho-thang..
[4/12/2004 5:02:05 PM] <hotto> When we have Super moves available.... best to play along
[4/12/2004 5:02:13 PM] <Investortrader> I used to trade oils exclusively Quintus, mostly drillers and E&P ... never did play either of those though remember ROYL from the California summer blackout

[4/12/2004 5:02:28 PM] <hotto> Oils will be there any time..
[4/12/2004 5:02:38 PM] <mstrader> nothing wrong if it makes you financially secure.
[4/12/2004 5:03:23 PM] <napleschip> quintus...take a look at PBT. nice chart and 8% yield.
[4/12/2004 5:03:27 PM] <Quintus> these are certainly Super
[4/12/2004 5:03:46 PM] <Investortrader> Royalty trusts are a completely different animal
[4/12/2004 5:04:10 PM] <Investortrader> But they've been doing well too
[4/12/2004 5:04:26 PM] <hotto> If the volatility is getting to you.. then... keep posns small.. and move to other groups.
[4/12/2004 5:04:43 PM] <napleschip> i figure a royalty trust is like insurance in these turbulent times..but the insurance pays me.
[4/12/2004 5:05:33 PM] <Investortrader> They have been paying well naples
[4/12/2004 5:06:28 PM] <napleschip> yeah IT. slow and steady..and if mideast problems then they could pay off big.
[4/12/2004 5:07:12 PM] <Investortrader> Do you read any yahoo boards? I used to post on a few royalty trust boards I think in the end of '02? Same handle
[4/12/2004 5:07:52 PM] <napleschip> can't say i do..but might give it a shot. you're there?
[4/12/2004 5:08:14 PM] <Investortrader> Not anymore, used to be back in the end of '02 when I first got interested in royalty trusts
[4/12/2004 5:08:57 PM] <napleschip> well the trusts are a bit boring. but hard to find anything that pays a return so good place for some.
[4/12/2004 5:09:13 PM] <Investortrader> Played some ERF and NCN at some staggering yields of over 15% plus nice price run-up for a few months
[4/12/2004 5:09:30 PM] <Investortrader> I think NCN had over 20% yield
[4/12/2004 5:10:21 PM] <Investortrader> I'm remembering around 22% for NCN
[4/12/2004 5:10:29 PM] <napleschip> i see ERF has done well. most trusts seem to have had a good run now are soft.
[4/12/2004 5:10:47 PM] <Quintus> i just have harder time finding any 'dependable' suppt/resistance -- which is understandable -- but even Range Contraction somewhat hard to find intraday in these Supers movers. (meanwhile hotto bids for some security stock in mini-freefall -- & gets w/in 1% of reversal) .. very impressive Hot one, and i'm learnin'.
[4/12/2004 5:10:55 PM] <Investortrader> NCN, new symbol or merge? NCN symbol not found lol
[4/12/2004 5:11:27 PM] <napleschip> maybe NCN was eaten by someone.
[4/12/2004 5:11:30 PM] <Investortrader> ERF is the high quality Canadian royalty trust
[4/12/2004 5:11:50 PM] <Investortrader> Had one of the longest reserve lives when I was looking at it of all of them
[4/12/2004 5:11:56 PM] <croy> MACE is amazing :o
[4/12/2004 5:12:00 PM] <napleschip> ERF would be the place to be as insurance for mideast probs.
[4/12/2004 5:12:18 PM] <DataMiner> Does anyone know, is it considered a day trade if you buy during market hours and sell after hours?
[4/12/2004 5:12:22 PM] <Luigistock> ERF is that enerplus ?
[4/12/2004 5:12:31 PM] <Investortrader> Yes Luigi
[4/12/2004 5:12:37 PM] <hotto> Quint - 24 + years of trial and error.. with different types of stocks.. at different phasess of Market.
[4/12/2004 5:12:58 PM] <Quintus> Data -- at IB, it is a daytrade
[4/12/2004 5:13:08 PM] <Luigistock> gonna put the brain sucking cap on you at some poitn hotto

[4/12/2004 5:13:45 PM] <DataMiner> What horrible things do they do to you if you day trade 3 times in one day?

[4/12/2004 5:13:46 PM] <ChuckR> jerf

[4/12/2004 5:13:49 PM] <croy> Data I call it a trade There is no shame to day-trades LOL

[4/12/2004 5:14:02 PM] <croy> as long as you make money ...

[4/12/2004 5:14:26 PM] <Luigistock> ddat first time usually talk your way out of it

[4/12/2004 5:14:33 PM] <Investortrader> Data, it takes 4 daytrades over a 5 day period

[4/12/2004 5:15:04 PM] <DataMiner> Oh, good, I thought it was 3. Now I just have to be careful for the rest of the week. Thanks.

[4/12/2004 5:15:08 PM] <dgraham42> dATA... 4 round trips in 5 days

[4/12/2004 5:15:27 PM] <croy> let the trend be your frined Data

[4/12/2004 5:16:12 PM] <Luigistock> not an illness just freeflow

[4/12/2004 5:16:19 PM] <croy> LOL

[4/12/2004 5:16:21 PM] <RkyMtnFool> Only "harm" on being a "Pattern Daytrader" is that you must maintain \$25k balance in account.

[4/12/2004 5:16:22 PM] <dgraham42> don,t let the trend get you fried

[4/12/2004 5:16:29 PM] <Quintus> on these Security names -- are we anticipating more of this back & forth, such as IDNX -- where trading around is highly rewarded -- or a big move (MAGS style) in other Security names -- making scalping look silly in the week/month time frame ?

[4/12/2004 5:16:37 PM] <Investortrader> We had something in 7th grade called "freeflow" lol

[4/12/2004 5:16:41 PM] <napleschip> good one croy. but loogie does the best he can with what he has..that is, 10 thumbs...D...

[4/12/2004 5:16:44 PM] <DataMiner> They don't like day trading in my retirement account.

[4/12/2004 5:21:40 PM] <croy> Sorry hotto we are polutting your very serious teachings with our funny stuff

[4/12/2004 5:21:47 PM] <Investortrader> I'm gone, don't forget chart class tonight at 9:30! If I can start early I'll do a quick re-cap of all the stocks from last weeks classes first

product... Was profitable a couple years ago. With that much history.. harder to break through.. Lots of traders jump on it as "familiar" That puts a drag on the stock... with lots of weak hands..

[4/12/2004 5:23:05 PM] <croy> Con call is confirmed on Novellus.com ... 2h30 PST so 5h30 it is EST

[4/12/2004 5:23:42 PM] <neofighter> lavenderangel- i am also unable to pull up the shared lists-

[4/12/2004 5:23:58 PM] <CodyCare> hotto did you become interested in MACE today because of the DVR product announcement at 11:30?

[4/12/2004 5:24:04 PM] <croy> If you want to listen ... www.fulldisclose.com will do the free webcast

[4/12/2004 5:24:20 PM] <croy> sorry fulldisclosure.com

[4/12/2004 5:24:44 PM] <Quintus> hotto - sounds like a IBD-type thought.. (no offense !) that its the newer stocks, 6-8 yrs old at most, that make those 5-10 baggers. i see what you mean, anyway. thx for thoughts my good man

[4/12/2004 5:26:04 PM] <hotto> croy.. no concern over "serious"..

[4/12/2004 5:26:28 PM] <croy> LOL I still remember a friday night full of jokes ...after one tough day ...

[4/12/2004 5:27:19 PM] <hotto> IDNX.. looks like we have a shot at a clean BO over 8.55 tomorrow. Probably an early pop to 8.90... Then ??? back to work studying details..

[4/12/2004 5:28:46 PM] <hotto> MACE.. Cody.. I just saw MACE on % gain list.. on another service.

[4/12/2004 5:29:24 PM] <Quintus> same here.. Must admit. i looked at this MACE in late 2003 -- it was the only other "old school" name in security that i remember from childhood, along w/ Taser guns (from action flicks, etc.). Thankfully not personal experiences ! Still, just caught it today -- Fundy's not comparable though. Kinda like XMSR vs SIRI , imo

[4/12/2004 5:30:03 PM] <w2jc> fwiw, i can think of one detrator for idnx ... i've had 1000 in my 'dormant' account for almost 10 years ... it's been as high as \$11 .. they have been working on airport and other ID systems since then, and apparently have not had great success (or they should have been flying high at the start of all this homeland security stuff)...

[4/12/2004 5:30:25 PM] <CodyCare> OK, Hotto, good to know on MACE.

[4/12/2004 5:30:40 PM] <hotto> yeah... for these Intraday moves.. fundys.. are not important...

[4/12/2004 5:30:40 PM] <CodyCare> ty

[4/12/2004 5:31:00 PM] <DMut> geez MACE going to reach target before end of day :)

[4/12/2004 5:31:06 PM] <Quintus> that said, maybe can dump rest of MACE on a 100% gap up in morning & be done w/ it for few days..

[4/12/2004 5:31:48 PM] <Quintus> i feel Looney tossing out such numbers :8

[4/12/2004 9:59:35 PM] <Investortrader> Hi everyone :)
[4/12/2004 9:59:47 PM] <bmweyrauch> Hi IT
[4/12/2004 10:00:16 PM] <DMut> we're here IT
[4/12/2004 10:00:17 PM] <CashMan> I'm here IT
[4/12/2004 10:00:23 PM] <Investortrader> This has been a very good market recently, lots of set-upsd have been working, remember late last year when good set-ups failed a lot ... now they are working well
[4/12/2004 10:00:43 PM] <Investortrader> Hi bmw and DMut
[4/12/2004 10:01:24 PM] <Investortrader> First I would like to cover NGEN (not sure why the chart jumped to that other symbol)
[4/12/2004 10:01:50 PM] <AtlantaRob> Hi IT
[4/12/2004 10:01:56 PM] <Investortrader> Evening Rob
[4/12/2004 10:02:02 PM] <Tilt> Hi IT, I got my lern'n cap on
[4/12/2004 10:02:06 PM] <Investortrader> First I want to point out the action since Dec in it
[4/12/2004 10:02:19 PM] <Investortrader> Hi Tilt ;)
[4/12/2004 10:02:58 PM] <Tilt> B)
[4/12/2004 10:03:12 PM] <Investortrader> See how the vol spikes have almost always started a good move, excpet for the late Jan one which was 1) after a nice move already and 2) the beginning of the IT correction
[4/12/2004 10:03:59 PM] <Investortrader> I played this one back in Dec when it was breaking out, got it at 6.01
[4/12/2004 10:04:19 PM] <Investortrader> See how the vol contracted in that Dec base after the big gap up
[4/12/2004 10:04:44 PM] <Investortrader> Now we're having the same low vol basing

[4/12/2004 10:05:15 PM] <Investortrader> It's come down a few days now, on lower and lower vol
[4/12/2004 10:06:08 PM] <Investortrader> I'm going to be careful with it as we're still flirting with the 50sma ... but it looks to have already bottomed in March with the market
[4/12/2004 10:06:22 PM] <Investortrader> And the up days have been on better vol than the down days
[4/12/2004 10:06:40 PM] <Investortrader> And after the 4/1 nice vol BO I've been looking for a place to buy it
[4/12/2004 10:07:22 PM] <Investortrader> Many times when you see a 3-day pb on lower and lower vol a stock becomes ready
[4/12/2004 10:09:09 PM] <Investortrader> Notice the 3/18 swing high of 8.59, around there should hold (if it continues to drift lower here) for me to feel comfortable still in it
[4/12/2004 10:09:49 PM] <Investortrader> So I'm looking at a very small risk, and a

ClubHome

nice reward if I'm reading it correctly

[4/12/2004 10:11:09 PM] <Investortrader> That little plateau in mid Feb just below the middle BB, from 2/5 to 2/17, looks like a nice target if this move continues

[4/12/2004 10:12:10 PM] <Investortrader> I like risking nickels to make dollars :)

[4/12/2004 10:12:24 PM] <Investortrader> Any questions on NGEN?

[4/12/2004 10:12:40 PM] <bmweyrauch> NGEN - possible support from 3/18 SH, 3/26 SH or LR30 also.

[4/12/2004 10:12:44 PM] <Tilt> .what about the 50ma

[4/12/2004 10:13:18 PM] <Investortrader> Right bmw, lots of support in this general area here

[4/12/2004 10:13:26 PM] <AtlantaRob> Where would you look to buy the breakout, above the previous day high?

[4/12/2004 10:14:11 PM] <Investortrader> The 50sma is a bit of a concern Tilt, as it's flirting around with it ... but the rest of the chart looks like it could be good to go here

[4/12/2004 10:14:21 PM] <malkovich> yes

[4/12/2004 10:15:09 PM] <Investortrader> Yes Rob, with it having lower highs on this lower vol pb every day, you could buy a BO

[4/12/2004 10:15:15 PM] <Investortrader> Or add-to on a BO

[4/12/2004 10:15:41 PM] <Golfermary> Missed 1st part - had to go train on a horse - will catch up - Hi all

[4/12/2004 10:15:48 PM] <Investortrader> Especially since that would put it significantly above the 50sma ... especially if it's on good vol

[4/12/2004 10:15:58 PM] <Investortrader> Hi mary :)

[4/12/2004 10:16:17 PM] <Investortrader> Note the OBV on this one also

[4/12/2004 10:16:36 PM] <Investortrader> It's been confirming the new high

[4/12/2004 10:16:42 PM] <Investortrader> New highs

[4/12/2004 10:17:25 PM] <streetwalker> IT: plz comment on impact of the NGEN new issuance last week @ 8.60, thanx.

[4/12/2004 10:17:32 PM] <Investortrader> If it does BO, I'll be moving stop-losses up to just under the BO area

[4/12/2004 10:18:10 PM] <Investortrader> That's another thing in that area of support, to give it support, but it's much stronger

[4/12/2004 10:18:14 PM] <Investortrader> The new issue

[4/12/2004 10:18:38 PM] <Investortrader> Those are people who did a lot of research before buying, and are strong hands

[4/12/2004 10:19:04 PM] <Investortrader> Usually when there is a secondary below the current price, as this one was ... that area becomes good support ... we've seen that happen a few times

[4/12/2004 10:19:31 PM] <Investortrader> It will trade down to or near that area for a few days, shaking out the weak hands, then reverses back up

[4/12/2004 10:19:52 PM] <Investortrader> And I'm always willing to steal some cheap shares B)

[4/12/2004 10:20:08 PM] <Investortrader> If I'm wrong, it will be a small loss, the kind I like

[4/12/2004 10:21:04 PM] <Investortrader> I am pretty ruthless on taking losses while they are very small ... because I try to buy near good support

[4/12/2004 10:21:15 PM] <streetwalker> IT: nice discussion, much appreciated! Trying to figure stop-loss if it continues to drift lower.

[4/12/2004 10:21:30 PM] <Investortrader> Thanks streetwalker :)

[4/12/2004 10:22:05 PM] <Investortrader> I'm using a bit under the 3/18 swing high, which is also within a penny of the secondary issue price

[4/12/2004 10:22:19 PM] <Investortrader> The swing high is within a penny that is

[4/12/2004 10:23:09 PM] <Investortrader> What I don't want to be doing, is holding onto this if the 50sma fails here

[4/12/2004 10:23:11 PM] <ChuckR> 8.59

[4/12/2004 10:23:30 PM] <streetwalker> Hmmmm. Good for me; hate to bail too soon, a common habit of mine. :(

[4/12/2004 10:23:37 PM] <Investortrader> As that could mean new lows, though I doubt it with the secondary here but I never argue with the charts

[4/12/2004 10:23:45 PM] <AtlantaRob> IT, do you always expect a stock to ride the UBB when it breaks out?

[4/12/2004 10:24:06 PM] <Investortrader> Not always Rob, it depends on how the chart looks .. sometimes it's a signal to be selling

[4/12/2004 10:24:25 PM] <Investortrader> But usually BO's are meant to be bought

[4/12/2004 10:24:57 PM] <Investortrader> This is the beginning of a new trend I'm thinking, after the Jan to March correction

[4/12/2004 10:25:09 PM] <Investortrader> In the beginning of trends it can ride much easier

[4/12/2004 10:25:35 PM] <Investortrader> This one has a recent history of jumping fast when it does jump

[4/12/2004 10:27:00 PM] <Investortrader> Another thing I wouldn't want to see in it would be increased vol on a down day tomorrow .. that might get me out before my stop is hit

[4/12/2004 10:27:56 PM] <HOTTO> JJN has joined the club. Please welcome your new member.

[4/12/2004 10:28:15 PM] <Golfermary> What would you consider an entry point - have made \$\$\$ would like more like all of us!

[4/12/2004 10:28:55 PM] <Investortrader> One thing I do that I do not recommend any newer traders (or anyone else, lol) do .. is I take big starting position usually, 10% at least and many times 20, 40, and have even been 50% in one stock ... but I also ruthlessly cut losses, have to

[4/12/2004 10:29:15 PM] <Investortrader> On NGEN? I bot today at 8.81

[4/12/2004 10:30:15 PM] <bmweyrauch> NGEN - I am long @ 8.88

[4/12/2004 10:30:32 PM] <bmweyrauch> fwiw :)

[4/12/2004 10:31:07 PM] <Investortrader> Could buy anywhere around here, or wait for a BO, I think one may be coming very soon ...

[4/12/2004 10:31:59 PM] <Investortrader> This pattern of lower and lower vol each day as it pulls back a bit, after a big vol upday ... is something I look for

[4/12/2004 10:32:23 PM] <Investortrader> Now it looks like the sellers may have dried up in it, we'll see tomorrow :)

[4/12/2004 10:32:57 PM] <bmweyrauch> NGEN - three closes off the UBB ... ready to head north again...he said optimistically :)

[4/12/2004 10:33:18 PM] <Investortrader> It's right where I like to see them bmw :)

[4/12/2004 10:33:25 PM] <acmetrader> Looks like LR30 is holding it up too

[4/12/2004 10:33:52 PM] <Investortrader> Another support point acme :)

[4/12/2004 10:34:09 PM] <acmetrader> fundamentally NGEN is much stronger than NANX, imho...just waiting for the market to *get* that

[4/12/2004 10:34:29 PM] <gary12> 10 ma :)

[4/12/2004 10:34:37 PM] <Investortrader> I don't know much about the fundamentals on it, but that's good to hear!

[4/12/2004 10:35:04 PM] <acmetrader> wish I had sold on that pop to 10, what did I miss as an indicator to do so IT?

[4/12/2004 10:35:26 PM] <acmetrader> close below previous hi?

[4/12/2004 10:35:49 PM] <Golfermary> Late TY but TY IT

[4/12/2004 10:36:16 PM] <Investortrader> acme, on 4/1 it ran right up to the 50sma, first approach since it fell below ... usually I sell out there as that's an important avg

[4/12/2004 10:36:21 PM] <Investortrader> Welcome mary :)

[4/12/2004 10:36:46 PM] <Investortrader> Then on the next day when it gapped higher and couldn't hold, closing lower ... could have scalped either of those two places

ClubHome

[4/12/2004 10:37:29 PM] <Investortrader> When on 4/2 it gapped higher, then fell below the 4/1 close, that could have been used also

[4/12/2004 10:37:37 PM] <Investortrader> All because this was the first approach to the 50sma

[4/12/2004 10:38:15 PM] <acmetrader> but it ran up the next day and that on the 3rd and that is where I didn't sell my bad

[4/12/2004 10:38:17 PM] <Investortrader> you've seen both Hotto and I sometimes take profits, then buy back a little higher ... when a stock comes up the the 50sma .. we're assessing it as more risk, then once the 50sma is crossed safely the risk is lower so we buy it back

[4/12/2004 10:39:06 PM] <da2rth> NGEN...on weekly, obv at all time high. is this right?

[4/12/2004 10:39:39 PM] <Investortrader> I probably would have sold the 4/2 gap up when it failed and fell below the 4/1 close, probably would have held on 4/1 as it was a big vol BO, even though it stopped right at the 50sma, I would have watched closely the next day

[4/12/2004 10:40:17 PM] <Investortrader> And looked to buy a low vol pb .. but I didn't own it, though I did buy the low vol pb

[4/12/2004 10:40:48 PM] <Investortrader> da2rth, OBV looks very good on the weekly chart

[4/12/2004 10:40:47 PM] <acmetrader> ok, just to share my head (look out , here it comes) 4-2 was an *inside* day on BO so, I was looking for more

[4/12/2004 10:41:16 PM] <Investortrader> 4/2 made a higher high, so it wasn't an inside day

[4/12/2004 10:41:25 PM] <acmetrader> and 4-3 had higher hi and higher low even though it left a lot of the high behind

[4/12/2004 10:41:52 PM] <acmetrader> oh kkkkrap, I am looking at the wrong day

[4/12/2004 10:41:54 PM] <Investortrader> you mean 4/6?

[4/12/2004 10:42:08 PM] <Investortrader> ::8

[4/12/2004 10:42:16 PM] <acmetrader> I meant 4-3....so 4-4 is where I failed to bail

[4/12/2004 10:42:33 PM] <Investortrader> 4/3 and 4/4 were Sat and Sun

[4/12/2004 10:42:37 PM] <acmetrader> oh my god, 4-6, what is wrong with me, lol

[4/12/2004 10:42:41 PM] <Investortrader> lol :)

[4/12/2004 10:42:50 PM] <Luigistock> focus acme

[4/12/2004 10:42:52 PM] <acmetrader> how does hotto do this 24/7 and not go blind

[4/12/2004 10:43:05 PM] <Investortrader> Good optometrist?

[4/12/2004 10:43:16 PM] <Tilt> We're paying him?

[4/12/2004 10:43:41 PM] <Investortrader> So on 4/1 I would have held because it was such a good day, even though it ran right up to the 50sma and stopped .. but on 4/2 I would have been out

[4/12/2004 10:43:44 PM] <acmetrader> doesn't NGEN have sort of a flag thing here?

[4/12/2004 10:45:13 PM] <acmetrader> it is coming to an apex on a big right triangle, move coming one way or the other withing days

[4/12/2004 10:45:27 PM] <Investortrader> Some bought NGEN I think the days I would have bene selling it

[4/12/2004 10:45:50 PM] <Investortrader> That's how I'm looking at it here too acme, move coming very soon

[4/12/2004 10:46:13 PM] <acmetrader> yes I should have sold my added shares on the 6th or something

[4/12/2004 10:46:48 PM] <acmetrader> have some in the low 7s added bfore hotto started talking it up again

[4/12/2004 10:47:08 PM] <Investortrader> That was another small warning day, see the higher vol that day, but it couldn't hold much of it's gains .. showing some sellers were meeting the buyers up there

[4/12/2004 10:47:20 PM] <acmetrader> yes

ClubHome

[4/12/2004 10:47:24 PM] <Golfermary> Hate to ask but could you share the "apex on a big right triangle" move?
[4/12/2004 10:48:06 PM] <Investortrader> Is that the triangle you meant acme?
[4/12/2004 10:48:11 PM] <acmetrader> the feb dissapointed buyers were *getting out with a little loss*
[4/12/2004 10:48:34 PM] <Golfermary> Ah Ah! See it now!
[4/12/2004 10:48:40 PM] <Investortrader> :)
[4/12/2004 10:48:41 PM] <acmetrader> let me share my chart with the trendlines drawn in
[4/12/2004 10:48:49 PM] <Investortrader> Go for it acme :)
[4/12/2004 10:49:20 PM] <acmetrader> there are some older ones on there
[4/12/2004 10:49:56 PM] <acmetrader> see the triangle now?
[4/12/2004 10:50:24 PM] <Investortrader> I don't see your top line
[4/12/2004 10:50:25 PM] <acmetrader> ascnding right triangle, where the top is resistance of prior support
[4/12/2004 10:50:35 PM] <Investortrader> Oh, now I do :)
[4/12/2004 10:50:53 PM] <Investortrader> Those usually resolve themselves to the upside
[4/12/2004 10:51:15 PM] <acmetrader> giving the decreasing volume on the down days, yes
[4/12/2004 10:51:35 PM] <Investortrader> Right!
[4/12/2004 10:51:57 PM] <acmetrader> it is also in a channel pattern with the bottom of the R triangle being the bottom trend line
[4/12/2004 10:52:08 PM] <Investortrader> I saw your channel lines also
[4/12/2004 10:52:20 PM] <acmetrader> there is the upper channel
[4/12/2004 10:53:15 PM] <acmetrader> so 8.50 is indeed really important to hold
[4/12/2004 10:53:52 PM] <Investortrader> It's about a 50% move from the bottom of the triangle to the top, so you can measure another 50% move off that, which would take it from 10 to 15 ... and look at the Jan highs ... 14.95
[4/12/2004 10:54:06 PM] <acmetrader> yep
[4/12/2004 10:54:40 PM] <Investortrader> Good points acme :)
[4/12/2004 10:55:15 PM] <acmetrader> that means a bunch coming from you , thanks
[4/12/2004 10:55:23 PM] <Investortrader> Anyone have a chart they would like to look at?
[4/12/2004 10:55:25 PM] <acmetrader> sometimes these charts just look greek to me
[4/12/2004 10:55:32 PM] <acmetrader> yes, SINA
[4/12/2004 10:55:37 PM] <Investortrader> You're learning! :)
[4/12/2004 10:55:44 PM] <Investortrader> and with that will come confidence
[4/12/2004 10:56:05 PM] <acmetrader> I so often don't pull the trigger when I should due to lack of confidence, hope you are right!
[4/12/2004 10:56:40 PM] <Investortrader> The more you see, and understand, and watch how it works, and see your own calls working ... the more confidence you will get
[4/12/2004 10:57:16 PM] <Investortrader> The first thing I notice on the SINA chart is the OBV
[4/12/2004 10:57:21 PM] <acmetrader> well I have the burnt ass to prove it, but see enough to have learned something..but so often am just in luck with the market...have to improve that!
[4/12/2004 10:57:45 PM] <bobpan> acme.. i can't buy your top trendline on your triangle...too much open space..IMHO
[4/12/2004 10:58:04 PM] <Investortrader> The OBV has been slowly climbing since mid-Feb, this shows accumulation
[4/12/2004 10:58:14 PM] <acmetrader> si

ClubHome

[4/12/2004 10:59:12 PM] <acmetrader> ok bobpan...I see it as resistance anywho...which is a top trendline even though it is not fully filled in

[4/12/2004 10:59:46 PM] <Investortrader> And it looks to have completed a small reverse head and shoulders, with the left shoulder from 3/10 to 3/16, and the head from 3/22 to 3/25

[4/12/2004 11:00:14 PM] <acmetrader> on 4.8 SINA stopped at a fib line and is digesting the gain...oh yeah, didn't see that

[4/12/2004 11:00:40 PM] <bobpan> I'm sharing what I think is a valid trendline and it is a rising wedge... danger sign

[4/12/2004 11:00:56 PM] <Investortrader> One thing I'd like to point out is the volume in this H+S, the climax low in vol was in the left shoulder, with the head showing less vol, and the right shoulder having even less vol

[4/12/2004 11:01:18 PM] <acmetrader> isn't that backwards of what is best?

[4/12/2004 11:01:24 PM] <Investortrader> Wait, that's worded wrong

[4/12/2004 11:01:37 PM] <Investortrader> The climax selling in vol, not the climax low in vol

[4/12/2004 11:01:56 PM] <BossFan> Opinion on BWEB when you get a chance IT...ty

[4/12/2004 11:02:21 PM] <Golfermary> Lost me

[4/12/2004 11:04:20 PM] <acmetrader> lots of open contracts at 40 on SINA, likely to be held until after Friday...imho..then kabbam

[4/12/2004 11:04:24 PM] <Investortrader> Now we have a gap up in nice vol, with a lower vol pb today ... but it's stopped at that pesky 50sma

[4/12/2004 11:04:30 PM] <Investortrader> Where did we lose you mary?

[4/12/2004 11:05:07 PM] <Golfermary> Don't fret - I'll learn!

[4/12/2004 11:05:12 PM] <Investortrader> :)

[4/12/2004 11:06:03 PM] <acmetrader> who is mary?

[4/12/2004 11:06:11 PM] <Golfermary> Maybe sometimes charts could change to reflect questions

[4/12/2004 11:06:32 PM] <Investortrader> The vol pattern I pointed out in this reverse H+S is important, you want to see the vol drying up as the pattern is formed

[4/12/2004 11:06:50 PM] <acmetrader> otay

[4/12/2004 11:06:56 PM] <Tilt> off topic, anyone know IT's gender? not in profile, am having trouble put a voice to IT's typing=o

[4/12/2004 11:07:16 PM] <Investortrader> *Chuckles*

[4/12/2004 11:07:18 PM] <acmetrader> IT is an it...get it?

[4/12/2004 11:07:30 PM] <Luigistock> LMAO ROFL

[4/12/2004 11:07:49 PM] <Investortrader> Ever watch the Addams Family? lol

[4/12/2004 11:08:04 PM] <acmetrader> is Luigi thing?

[4/12/2004 11:08:12 PM] <Luigistock> fester

[4/12/2004 11:08:15 PM] <acmetrader> LOL

[4/12/2004 11:08:22 PM] <cobralso> Tough group tonight IT

[4/12/2004 11:08:31 PM] <acmetrader> just giddy, tired

[4/12/2004 11:08:45 PM] <Investortrader> Was a good day today, so good for joking around too!

[4/12/2004 11:08:50 PM] <Golfermary> If its not fun why do it (well profit helps)

[4/12/2004 11:09:13 PM] <Investortrader> Any questions on SINA?

[4/12/2004 11:09:30 PM] <Tilt> thanks, I thought so by your logical mind

[4/12/2004 11:09:35 PM] <Luigistock> Nope its gonna rock

[4/12/2004 11:09:42 PM] <cobralso> How about FNSR

[4/12/2004 11:09:44 PM] <acmetrader> next

[4/12/2004 11:09:51 PM] <acmetrader> BWEB was next

[4/12/2004 11:10:17 PM] <Investortrader> Looks good to me also Luigi, only thing in it's way is the 50sma here

[4/12/2004 11:10:32 PM] <Investortrader> On to BWEB ...

ClubHome

[4/12/2004 11:11:01 PM] <cobralso> OH NO :o
[4/12/2004 11:11:29 PM] <acmetrader> Pugsly?
[4/12/2004 11:11:33 PM] <Investortrader> This one looks good too, see how in the end of March the vol really dried up
[4/12/2004 11:11:59 PM] <Investortrader> So much so OBV went flattish
[4/12/2004 11:12:09 PM] <acmetrader> Look at it on a weekly :-)
[4/12/2004 11:12:30 PM] <Investortrader> 4/5 had a nice big vol BO day that got over the 50sma
[4/12/2004 11:12:47 PM] <Investortrader> Then 3 lower vol pb days, there are those 3 days we see now in NGEN ...
[4/12/2004 11:13:17 PM] <Investortrader> Now today a bit higher vol BO
[4/12/2004 11:13:53 PM] <Investortrader> Todays BO could have bene bot, or the pb to the middle BB (if you were quick)
[4/12/2004 11:14:15 PM] <Investortrader> And it's also back over the 50sma
[4/12/2004 11:14:35 PM] <BossFan> Glad u like this one IT...I think we break the 50MA tomorrow...I am long currently and down a few bucks on it.
[4/12/2004 11:14:45 PM] <Investortrader> Though it is a bit low priced for my comments, I still like the chart
[4/12/2004 11:14:52 PM] <malkovich> hi
[4/12/2004 11:15:01 PM] <acmetrader> why the big volume surge?
[4/12/2004 11:15:07 PM] <Investortrader> BossFan, I hope you mean SINA!
[4/12/2004 11:15:09 PM] <malkovich> any good trades for tomorrow?
[4/12/2004 11:15:16 PM] <Investortrader> Hi malkovich
[4/12/2004 11:15:21 PM] <malkovich> hi buddy
[4/12/2004 11:15:29 PM] <malkovich> whats up
[4/12/2004 11:15:54 PM] <Investortrader> They did have news on 4/5, must have been good news, I didn't read it, just looked to see if it had any
[4/12/2004 11:15:55 PM] <BossFan> I meant BWEB...should've said stay over the 50MA
[4/12/2004 11:16:01 PM] <acmetrader> ah news of biz for bweb
[4/12/2004 11:16:30 PM] <Investortrader> your down a few bucks on BWEB? it's only a \$1 stock here :(
[4/12/2004 11:16:54 PM] <Investortrader> Oh, you must mean a few bucks in your account ;)

[4/12/2004 11:17:20 PM] <Investortrader> Any questions on BWEB?
[4/12/2004 11:17:22 PM] <BossFan> yup...I about on 4/6 at 1.24
[4/12/2004 11:17:36 PM] <BossFan> oops, can't type tonight...bought
[4/12/2004 11:18:16 PM] <Investortrader> On to FNSR
[4/12/2004 11:18:36 PM] <cobralso> Hold on it will go up
[4/12/2004 11:18:51 PM] <cobralso> someday
[4/12/2004 11:19:16 PM] <BossFan> in a couple years...hey we're long term investors now...
[4/12/2004 11:19:22 PM] <malkovich> thats true fnsr is good
[4/12/2004 11:19:45 PM] <acmetrader> thanks for all your input all, nighty night for this bonzo
[4/12/2004 11:20:05 PM] <Investortrader> Let's look at the entire downtrend in FNSR from Jan till here, what do you notice about the OBV?
[4/12/2004 11:20:14 PM] <Investortrader> Night acme :)
[4/12/2004 11:20:51 PM] <cobralso> It is going down
[4/12/2004 11:21:00 PM] <daniel329> looks like OBV starting to go sideways
[4/12/2004 11:21:02 PM] <BossFan> bottomed in march, inching back up in April
[4/12/2004 11:21:05 PM] <Tilt> Match's price
[4/12/2004 11:21:10 PM] <Nance> looks like a positive divergence is beginning to appear

[4/12/2004 11:21:22 PM] <Investortrader> Nance! you got it :)
[4/12/2004 11:21:22 PM] <Golfermary> Basically follows price (or leads)
[4/12/2004 11:21:48 PM] <Investortrader> BossFan you get credit too :)
[4/12/2004 11:21:51 PM] <Nance> :8
[4/12/2004 11:22:06 PM] <Investortrader> This looks like the first positive OBV development since the downtrend began
[4/12/2004 11:22:07 PM] <BossFan> TY IT...I felt left out:(
[4/12/2004 11:22:21 PM] <BossFan> just kiddin :)
[4/12/2004 11:22:31 PM] <Investortrader> :)
[4/12/2004 11:22:38 PM] <Investortrader> And price is finally holding over some time
[4/12/2004 11:23:07 PM] <Investortrader> I've traded this one 3 times in this downtrend, trying to feel out a bottom
[4/12/2004 11:23:22 PM] <Investortrader> And am almost exactly even in it lol
[4/12/2004 11:24:51 PM] <Investortrader> I tried once at 3.51 to see if the 50sma would hold, when it didn't I got out at 3.48 and 3.49 ... tried again at 2.51 and got out at 2.44 ... third time got in at 2.15 and out at 2.24 when it looked like it may be breaking down again, that was on 4/1 I think
[4/12/2004 11:25:16 PM] <Investortrader> But it didn't break down and has held fairly good
[4/12/2004 11:25:34 PM] <Investortrader> There isn't much too positive yet in it, but it's got a few positives in it here
[4/12/2004 11:27:47 PM] <AtlantaRob> Just out of curiosity, why do you guys trade these penny stocks, trying to find the next big thing?
[4/12/2004 11:28:24 PM] <Investortrader> Rob, FNSR is in one of Hotto's leading groups for broadband buildout
[4/12/2004 11:28:33 PM] <cobralso> my little white elephant :D
[4/12/2004 11:29:01 PM] <AtlantaRob> Oh ok, I have been trying to join the hottoworks, but it wont take my card :(

[4/12/2004 11:30:40 PM] <Investortrader> And I've covered FNSR a few times in class ... talked about it on either 1/20 or 1/21 with a warning sell signal
[4/12/2004 11:30:45 PM] <Investortrader> Welcome america :)
[4/12/2004 11:31:05 PM] <Investortrader> Any questions on FNSR?
[4/12/2004 11:31:22 PM] <Investortrader> If FNSR does have another low vol pb you'll probably see me buying it
[4/12/2004 11:31:39 PM] <Investortrader> Again!
[4/12/2004 11:32:16 PM] <Golfermary> What is the implication of the narrowing BB's ?
[4/12/2004 11:32:39 PM] <Investortrader> That means a move is upcoming, but it doesn't predict in which direction
[4/12/2004 11:32:52 PM] <Golfermary> Thanks
[4/12/2004 11:33:05 PM] <Investortrader> You need to look at other things, vol patterns and OBV for example, to try to ascertain direction .. or wait and buy the BO
[4/12/2004 11:33:09 PM] <Investortrader> Welcome mary :)
[4/12/2004 11:34:07 PM] <Golfermary> Hey - at least I noticed!
[4/12/2004 11:34:26 PM] <Investortrader> True!
[4/12/2004 11:34:38 PM] <Investortrader> But they can get skinnier still
[4/12/2004 11:35:02 PM] <Tilt> 50sma just crossed the 200
[4/12/2004 11:35:22 PM] <Golfermary> Wish I would
[4/12/2004 11:35:22 PM] <Investortrader> I've never used mvvg avg crossovers in trading stocks

[4/12/2004 11:37:07 PM] <Investortrader> Any questions on FNSR?
[4/12/2004 11:37:52 PM] <AtlantaRob> Thanks IT, night everyone
[4/12/2004 11:37:58 PM] <mace> APCC
[4/12/2004 11:37:58 PM] <Investortrader> Welcome Rob :)
[4/12/2004 11:38:05 PM] <Investortrader> APCC ...
[4/12/2004 11:38:41 PM] <Golfermary> Thanks Lots!! Appreciate your help!
[4/12/2004 11:39:05 PM] <Investortrader> Welcome mary :)
[4/12/2004 11:39:36 PM] <Golfermary> Haven't left yet - will wait till last comment!
[4/12/2004 11:39:36 PM] <Investortrader> Look at all the open candles on this one recently
[4/12/2004 11:39:49 PM] <Investortrader> Ever since the bottom
[4/12/2004 11:39:59 PM] <mace> whats an open candle
[4/12/2004 11:40:12 PM] <Investortrader> When the close is higher than the open price
[4/12/2004 11:40:43 PM] <Investortrader> A white candle in most books, but on TCNet they look empty, open
[4/12/2004 11:40:56 PM] <Investortrader> As opposed to a black candle, a filled candle
[4/12/2004 11:40:59 PM] <mace> this is positive
[4/12/2004 11:41:14 PM] <Investortrader> Yes, it shows good buying strength no matter how they try to open it lower
[4/12/2004 11:41:45 PM] <Investortrader> One thing I'd like to pinit out again on OBV here ...
[4/12/2004 11:41:51 PM] <Investortrader> Is how to use it for comparisons
[4/12/2004 11:42:10 PM] <Investortrader> We are in a new trend here, from the March low
[4/12/2004 11:42:24 PM] <Investortrader> So I compare OBV within the trend
[4/12/2004 11:42:57 PM] <Investortrader> Meaning, it doesn't matter to me that the OBV is lower here than it was in early March when the price was higher
[4/12/2004 11:43:20 PM] <Investortrader> price was lower I mean
[4/12/2004 11:43:46 PM] <Investortrader> Wait, price higher here while OBV is lower than it was in early March
[4/12/2004 11:43:58 PM] <Investortrader> Sorry for any confusion lol
[4/12/2004 11:44:15 PM] <streetwalker> ?? negative divergence
[4/12/2004 11:44:23 PM] <mace> so this is a lack of accumulation as price rises
[4/12/2004 11:44:28 PM] <Investortrader> That was a different trend in early March, so the OBV comparison to then isn't a valid comparison in my work
[4/12/2004 11:44:45 PM] <mace> Im confused
[4/12/2004 11:45:04 PM] <Investortrader> No, I'm trying to point out ... albeit clumsily at first ... wait, let me start over
[4/12/2004 11:45:23 PM] <Investortrader> With OBV, I compare it to itself within the same trend
[4/12/2004 11:45:39 PM] <Investortrader> early March was a different trend, it was in a downtrend then
[4/12/2004 11:45:46 PM] <Investortrader> Now it's in a new trend
[4/12/2004 11:46:14 PM] <mace> but since it is lower than at the FEB hi it is negative
[4/12/2004 11:46:14 PM] <Investortrader> So the fact that the prices are higher now than in early MArch, while the OBV is lower, doesn't count in my work as it's from two different trends
[4/12/2004 11:47:21 PM] <Investortrader> Is that more clear now?
[4/12/2004 11:47:54 PM] <mace> what I hear you say is that accumulation is slowing down?
[4/12/2004 11:48:23 PM] <Investortrader> No, I'm saying to compare the two from different trends is NOT how to do it

[4/12/2004 11:49:02 PM] <Investortrader> you need to only compare within the same trend

[4/12/2004 11:49:37 PM] <mace> I am assuming at new hi OBV must confirm or its a negative and if OBV is higer and at previous lows it mean accunmulation

[4/12/2004 11:50:23 PM] <Investortrader> Right mace, but within the same trend

[4/12/2004 11:50:38 PM] <streetwalker> IT: but, from march 1 to present a trend line in price would be neg'ly divergent to the trend line in OBV in same interval.

[4/12/2004 11:51:27 PM] <Investortrader> streetwalker, there was a bottom and a trend change between March 1 and today, you need to start over at that bottom

[4/12/2004 11:52:24 PM] <Investortrader> And not compare OBV today to any OBV before that bottom

[4/12/2004 11:52:43 PM] <Investortrader> Only to the swing highs and lows within this new trend after that bottom

[4/12/2004 11:52:53 PM] <streetwalker> IT: so you're defining a segment of a larger trend; ie, at a swing point -- you "define" that segment as a new "trend"

[4/12/2004 11:53:20 PM] <mace> trying to get a handle on this OBV look at MAPX OBV is soaring at recent low

[4/12/2004 11:53:41 PM] <mace> means accumulation under cover??

[4/12/2004 11:54:06 PM] <mace> where as on APCC seems like lots of selling???

[4/12/2004 11:54:07 PM] <Investortrader> streetwalker, I'm defining how I use OBV compared to my time frame of trading also ... since my trading time frame is a few days to a couple of weeks, this is a new trend for me

[4/12/2004 11:54:44 PM] <Investortrader> Depending on how you look at it, you could say from 1982 to 2000 was one big trend, but there were lots of smaller trends along the way

[4/12/2004 11:55:04 PM] <streetwalker> IT: now I get it! thanx, sorry for the hi cerebral density.

[4/12/2004 11:55:10 PM] <Tilt> Makes sense to me IT

[4/12/2004 11:55:21 PM] <Investortrader> No worries at all, that helps everyone to understand it streetwalker! :)

[4/12/2004 11:56:28 PM] <Investortrader> mace, there is not much selling in APCC as most every day in this uptrend it's closed higher than where it opened, and OBV is climbing, and the down days are on smaller vol than the up days

[4/12/2004 11:56:41 PM] <mace> Im still confuse but proceed cuz Im in fro 10 area

[4/12/2004 11:57:19 PM] <Investortrader> Lets look at MAPX for a bit

[4/12/2004 11:57:29 PM] <mace> I just missed the last top and dont want to do that again

[4/12/2004 11:58:37 PM] <Investortrader> MAPX the OBV has been zooming, I covered it in the 4/7 class noting the big volume small price range days and how that is usually indicative of a trend change, and the next day it had a nice BO

[4/12/2004 11:59:05 PM] <Investortrader> Ran right up to the 50sma today, that area will need to be watched and could be scalped there

[4/12/2004 11:59:28 PM] <Investortrader> Though with the nice vol it may not hold it back for long

[4/13/2004 12:00:02 AM] <mace> OBV here is higher than at the DEC price HI which means major accumluation???
