[4/14/2004 9:42:22 PM] <Tilt> Hello IT, thanks for the help today!

[4/14/2004 9:42:31 PM] <Investortrader> Welcome Tilt :)

[4/14/2004 9:46:37 PM] <mstrader> Hello, I have two charts LU & SGI.

[4/14/2004 9:47:14 PM] <mstrader> Oops. Hello IT. twocharts: LU & SGI

[4/14/2004 9:50:44 PM] <Golfermary> IT class later?

[4/14/2004 9:51:23 PM] <bravotrader> IT, how about AVCI?

[4/14/2004 9:51:37 PM] <Investortrader> Hi everyone :)

[4/14/2004 9:51:46 PM] <mstrader> ;)

[4/14/2004 9:52:00 PM] <Investortrader> LU ...

[4/14/2004 9:52:16 PM] <tickpick> :)

[4/14/2004 9:52:18 PM] <cobralso> hello IT

[4/14/2004 9:52:35 PM] <Golfermary> OK class NOW!

[4/14/2004 9:52:41 PM] <Investortrader> :)

[4/14/2004 9:54:26 PM] <Investortrader> I like how the vol on this one has been lower on this pb down to test the middle BB and the 50sma

[4/14/2004 9:54:38 PM] <Investortrader> OBV is also holding over the 50sma here

[4/14/2004 9:55:45 PM] <Investortrader> Just under that point is where I'd be placing a stop if I were long here ... just in case the market corrects here and pulls it down

[4/14/2004 9:56:52 PM] <Investortrader> With the new interest rate fears, and lots of the long time traders getting cautious here, Hotto, FW, PW ... make sure you keep stops in place

[4/14/2004 9:58:15 PM] <Investortrader> In most circumstances I'd be looking to buy set-ups like this, low vol pb's to the 50sma .. especially since it just recently broke out over it

[4/14/2004 9:58:59 PM] <Investortrader> And with the 50sma converging with the middle BB, that makes it stronger support and more important to sell if it breaks

[4/14/2004 9:59:14 PM] <mstrader> LU earnings 4/20/04 next Tuesday.

[4/14/2004 9:59:43 PM] <Investortrader> If not long and looking to get long, I'd look around that support area, or around today's lows as a good risk/reward entry point

[4/14/2004 10:00:02 PM] <Investortrader> Thanks mstrader ... I don't hold thru earnings

[4/14/2004 10:01:01 PM] <Investortrader> Unless I'm really sure about two things, first the earnings, and second how the market will react .. we saw this afternoon one stock reported (I think LRCX?) good earnings and they took it down some

[4/14/2004 10:01:02 PM] <mstrader> ty IT. I don't hold either. Just looking for pre-earning pop if it is there.

[4/14/2004 10:02:07 PM] <Investortrader> They might run it back up again off the 50sma, it's usually good for at least a bounce ... and many times at the start of a trend prices will come down to test it once after the BO before continuing

[4/14/2004 10:02:18 PM] <Investortrader> So I like this pattern

[4/14/2004 10:03:05 PM] <Investortrader> The up days have all been on higher vol than the down days the last two weeks or so also

[4/14/2004 10:03:15 PM] <Investortrader> Any questions on LU?

[4/14/2004 10:03:43 PM] <mstrader> no. ty IT.

[4/14/2004 10:03:53 PM] <Investortrader> On to SGI ...

[4/14/2004 10:04:09 PM] <Investortrader> This one doesn't look near as good

ClubHome

[4/14/2004 10:04:23 PM] <Investortrader> It's a similar pattern but in the reverse
[4/14/2004 10:04:37 PM] <Investortrader> Broke down under the 50sma, then rallied back up to it
[4/14/2004 10:04:59 PM] <Investortrader> And the 50sma was too strong and turned it away
[4/14/2004 10:05:18 PM] <Investortrader> Also at the upper BB there, so it was stronger resistance
[4/14/2004 10:05:53 PM] <Investortrader> OBV barely made it above it's middle BB during that rally attempt
[4/14/2004 10:06:44 PM] <Investortrader> Looks like it may need to test the lower BB again .. at which time it may set up a LBBCBS
[4/14/2004 10:07:16 PM] <mstrader> great contrast between LU & SGI. And your chart clearly shows that.
[4/14/2004 10:07:25 PM] <Investortrader> Thanks mstrader :)
[4/14/2004 10:07:36 PM] <Investortrader> Simple, but effective
[4/14/2004 10:07:46 PM] <Investortrader> Any questions on SGI?
[4/14/2004 10:07:50 PM] <RickW> IT... GGNS when you can?
[4/14/2004 10:08:01 PM] <mstrader> No. but a comment.
[4/14/2004 10:08:12 PM] <Investortrader> Comments are good too!
[4/14/2004 10:08:51 PM] <mstrader> OBV & middle of its BB is pointing down for SGI & up for LU.
[4/14/2004 10:09:35 PM] <Investortrader> Yes
[4/14/2004 10:09:47 PM] <mstrader> I will stay away from SGI. Its earnings are also on 4/20/04. So I picked up these two charts.
[4/14/2004 10:09:55 PM] <Investortrader> I would too
[4/14/2004 10:10:06 PM] <Investortrader> On to AVCI ...
[4/14/2004 10:10:16 PM] <mstrader> Ty IT;)
[4/14/2004 10:10:22 PM] <Investortrader> Welcome mstrader :)
[4/14/2004 10:10:40 PM] <Investortrader> This chart looks nice
[4/14/2004 10:11:18 PM] <Investortrader> Looks at that positive OBV divergence between the March low on 3/23 and yesterdays low
[4/14/2004 10:11:30 PM] <Investortrader> And now we have a high vol BO
[4/14/2004 10:11:58 PM] <Investortrader> This one should run to the 50sma pretty easy for a first target
[4/14/2004 10:12:12 PM] <Investortrader> Which is almost 17
[4/14/2004 10:12:20 PM] <Investortrader> Coming down a bit each day
[4/14/2004 10:12:40 PM] <Investortrader> Then we would have a BO off the dbl btm
[4/14/2004 10:12:59 PM] <Investortrader> Over the 4/2 peak
[4/14/2004 10:13:33 PM] <Investortrader> Would most likely bounce back down from the 50sma to that 4/2 peak area to test the BO area as usually first approach to the 50sma fails
[4/14/2004 10:14:06 PM] <Investortrader> But with this big volume I would expect after that for it to bounce off that area and then BO thru the 50sma ... take it one day at a time and see how it plays out
[4/14/2004 10:14:36 PM] <Investortrader> It might also just blast thru the 50sma ... this I give some credence too because of the good vol
[4/14/2004 10:15:07 PM] <Investortrader> But with the weaker market now I'd also respect the pb theory
[4/14/2004 10:15:26 PM] <Investortrader> And looking at the OBV now, it's confirming this move
[4/14/2004 10:15:46 PM] <Investortrader> It's already broken out and is at it's 50sma
[4/14/2004 10:16:14 PM] <Investortrader> I like this chart
[4/14/2004 10:16:51 PM] <bravotrader> ty IT :)
[4/14/2004 10:17:00 PM] <Investortrader> Welcome bravotrader :)
[4/14/2004 10:17:10 PM] <Investortrader> Any questions on AVCI?

[4/14/2004 10:17:36 PM] <Investortrader> I'll be watching this one and LU tomorrow
[4/14/2004 10:18:04 PM] <Investortrader> On to GGNS ...
[4/14/2004 10:19:30 PM] <Investortrader> This one never really had a positive look to it the whole decline until recently
[4/14/2004 10:19:50 PM] <Investortrader> You can see how OBV never really rallied much
[4/14/2004 10:20:24 PM] <Investortrader> A weak attempt on 1/28 on OBV, and that was an important day on price
[4/14/2004 10:20:48 PM] <Investortrader> Rallied up the the 50sma and was met by lots of selling that drove it back down .. that first attempt failure
[4/14/2004 10:21:17 PM] <Investortrader> Then notice in early Feb how the BB's pinched in and got skinny
[4/14/2004 10:21:47 PM] <Investortrader> That signals an upcoming move ... but it doesn't signal direction by itself, just that a move is coming
[4/14/2004 10:22:38 PM] <Investortrader> Since it had just recently had a failure attempt, and was in a downtrend ... it was looking weak
[4/14/2004 10:23:05 PM] <Investortrader> That was about your last chance to get out before it fell off that ledge
[4/14/2004 10:23:21 PM] <Investortrader> Now it's based pretty well thru March
[4/14/2004 10:23:40 PM] <Investortrader> And has made higher highs with OBV higher
[4/14/2004 10:24:04 PM] <Investortrader> This last new high looks a bit weak, but one good vol upday would fix that
[4/14/2004 10:24:37 PM] <Investortrader> Because it looks a bit weak, and with the weaker market here ... it could come down to test the 50sma again
[4/14/2004 10:25:03 PM] <Investortrader> That will be converging with the 20sma real soon
[4/14/2004 10:25:18 PM] <Investortrader> So should be good support there if it does test
[4/14/2004 10:26:11 PM] <Investortrader> I like AVCI better, but this is still a positive looking chart so far
[4/14/2004 10:26:36 PM] <Investortrader> Any questions on GGNS?
[4/14/2004 10:26:56 PM] <RickW> ty IT, no questions.
[4/14/2004 10:27:02 PM] <Investortrader> Welcome Rick :)
[4/14/2004 10:27:14 PM] <acmetrader> IT how much do you rely on market indicators vs individual charts?
[4/14/2004 10:27:35 PM] <Investortrader> Good question
[4/14/2004 10:28:04 PM] <Investortrader> I use the markets to decide a few things
[4/14/2004 10:28:15 PM] <Investortrader> Whether I am looking to go long or short stocks
[4/14/2004 10:28:45 PM] <gary12> IT SGR if you have time TY
[4/14/2004 10:28:46 PM] <Investortrader> How I will be managing my money at the time, larger or smaller position sizes
[4/14/2004 10:29:09 PM] <Investortrader> And whether I put on more or fewer positions
[4/14/2004 10:29:34 PM] <Investortrader> Then I use individual charts to decide which stocks to trade within those parameters
[4/14/2004 10:29:52 PM] <Investortrader> Remeber in late Jan when the IT correction started, and I said I was only going to be shorting stocks
[4/14/2004 10:30:15 PM] <Investortrader> And late last year when many set-ups weren't working I stated I was using smaller position sizes than normal
[4/14/2004 10:30:16 PM] <acmetrader> also on AVCI the most open interest for puts and calls is at 15 on Friday, coincidence? For may it is the 12.50 mark that has all those options out.
[4/14/2004 10:30:29 PM] <Investortrader> And fewer positions

ClubHome

[4/14/2004 10:30:44 PM] <Investortrader> So that's how I use the market indicators vs individual charts

[4/14/2004 10:31:17 PM] <DMut> Hi, heard you say you might be going to cash because leaving, but if you were staying would you be just shorting now?

[4/14/2004 10:31:23 PM] <Investortrader> The market for macro thinking, and the individual charts for micro thinking

[4/14/2004 10:31:49 PM] <Investortrader> Thanks acme

[4/14/2004 10:31:56 PM] <Investortrader> On to SGR ...

[4/14/2004 10:32:00 PM] <acmetrader> Thanks IT

[4/14/2004 10:32:18 PM] <Investortrader> No, I wouldn't be just shorting quite yet

[4/14/2004 10:32:52 PM] <Investortrader> But I might be looking to put on some shorts for balance

[4/14/2004 10:33:07 PM] <acmetrader> How long are you leaving for iT?

[4/14/2004 10:33:18 PM] <Investortrader> And I would probably use smaller positions here until it shakes out

[4/14/2004 10:33:49 PM] <Investortrader> I'm looking to leave for next week, maybe Mon maybe Tues depending on weather, for a few days at least, probably be gone the rest of the week

[4/14/2004 10:34:10 PM] <Investortrader> Might be back on Thu or Fri if I get out of here early Mon

[4/14/2004 10:34:55 PM] <Investortrader> SGR ... earnings today, looks like they must have been ok

[4/14/2004 10:35:06 PM] <Investortrader> Going to look at the 5's for a second

[4/14/2004 10:35:34 PM] <america> IT, when you have a chance, would you look at FVCX? thanks

[4/14/2004 10:35:54 PM] <Investortrader> This chart looks good too

[4/14/2004 10:36:08 PM] <Golfermary> jNite IT - Have to feed the lions. Good nite

[4/14/2004 10:36:19 PM] <Investortrader> Another good OBV divergence with the dbl btm .. second btm in price was yesterday

[4/14/2004 10:36:27 PM] <Investortrader> Nite Golfermary :)

[4/14/2004 10:36:58 PM] <Investortrader> Broke out above the 4/2 peak between those two bottoms

[4/14/2004 10:37:25 PM] <Investortrader> Scouted above the 50sma and the upper BB and pulled back to close just under them

[4/14/2004 10:37:37 PM] <Investortrader> Nice vol and nice price range today

[4/14/2004 10:38:32 PM] <Investortrader> Once we BO over the 50sma here it looks like it's good to test the Feb and MArch highs in the 12.50 area

[4/14/2004 10:38:42 PM] <Investortrader> As a first target

[4/14/2004 10:39:35 PM] <Investortrader> This attempt at teh 50sma is on much better vol than the Feb and March rally attempts at it

[4/14/2004 10:41:41 PM] <Investortrader> If it can't BO thru the 50sma you've seen what happens ... so with it so close here if I wasn't in I would wait for that

[4/14/2004 10:41:42 PM] <acmetrader> does it concern you OBV is much lower than on those prior attempts?

[4/14/2004 10:41:58 PM] <Investortrader> No, it doesn't

[4/14/2004 10:42:17 PM] <Investortrader> If I'm reading it right here ... I'm looking at the possibility of the beginning of a new uptrend

[4/14/2004 10:42:32 PM] <Investortrader> From the recent positive OBV divergence

[4/14/2004 10:42:42 PM] <acmetrader> it has a sort of W pattern which can be strong

[4/14/2004 10:42:51 PM] <Rcctrader> IT, if there is time, could you look at CNLG, TY.

[4/14/2004 10:43:05 PM] <Investortrader> Right acme, with good OBV signals at the two bottoms

[4/14/2004 10:43:45 PM] <acmetrader> by signals you mean sharp Vs?

ClubHome

[4/14/2004 10:43:49 PM] <Investortrader> If I was already long here ... I would watch closely to see if it can BO over the 50sma

[4/14/2004 10:44:11 PM] <Investortrader> I mean ... how the second bottom in OBV was much better

[4/14/2004 10:44:31 PM] <Investortrader> First bottom along the lower BB near the end of MArch

[4/14/2004 10:44:35 PM] <acmetrader> ah, thanks

[4/14/2004 10:44:47 PM] <Investortrader> Second bottom yesterday barely broke the middle BB

[4/14/2004 10:44:57 PM] <REB2186> IT, quite often Hotto comes up with Intra-Day trade opportunities that have the potential for >15% gains within a few hours or day; do you participate in those plays or do you still stick with 2day to 3 week plays? Also, what is your minimum % gain that you are shooting for?

[4/14/2004 10:45:17 PM] <Investortrader> I don't daytrade Reb

[4/14/2004 10:45:29 PM] <Investortrader> Though sometimes I am in on those in a way

[4/14/2004 10:46:00 PM] <Investortrader> If the chart looks good for my style I will buy it, sometimes that happens and I am in ... sometimes it doesn't and I am not

[4/14/2004 10:46:37 PM] <gary12> ty IT :) on SGR

[4/14/2004 10:46:43 PM] <HOTTO> ElliotandPam has joined the club. Please welcome your new member.

[4/14/2004 10:46:43 PM] <Investortrader> Welcome gary :)

[4/14/2004 10:46:56 PM] <Investortrader> Any questions on SGR?

[4/14/2004 10:46:59 PM] <REB2186> ty IT

[4/14/2004 10:47:00 PM] <acmetrader> you do only technical or do you add fundamentals?

[4/14/2004 10:47:05 PM] <Investortrader> Welcome Reb :)

[4/14/2004 10:47:23 PM] <Investortrader> I prefer to trade the G+ stocks, but will trade others on good charts

[4/14/2004 10:47:47 PM] <Investortrader> Gotta be more careful on those, or on story stocks

[4/14/2004 10:48:16 PM] <Investortrader> earnings stocks are one thing, story stocks are a different animal, sometimes nice, sometimes nasty

[4/14/2004 10:48:51 PM] <Investortrader> I rarely play a story stock unless I see a good chart and good support close-by ... but I look for that in every trade

[4/14/2004 10:49:07 PM] <Investortrader> On to FVCX

[4/14/2004 10:50:01 PM] <Investortrader> I look at the OBV on this one and I think of the old show ... The Honeymooners

[4/14/2004 10:50:56 PM] <Investortrader> Very volatile, still riding the upper BB here

[4/14/2004 10:51:22 PM] <Investortrader> I didn't play this one

[4/14/2004 10:52:21 PM] <acmetrader> ARTX?

[4/14/2004 10:52:28 PM] <bbmd> IT in 2000 this was about \$120.

[4/14/2004 10:52:33 PM] <Investortrader> A lot of sellers came in to bring the price back off the highs here ... like they did on 4/6

[4/14/2004 10:52:55 PM] <gary12> IT AXYX looks good

[4/14/2004 10:53:01 PM] <Investortrader> In 200 a lot of stocks were \$120, or \$250, or \$400 that are under \$5 or out of business today :)

[4/14/2004 10:53:08 PM] <Investortrader> 2000 that is

[4/14/2004 10:53:22 PM] <Investortrader> I wouldn't go by 2000 prices at all

[4/14/2004 10:53:41 PM] <HOTTO> toptrader99 has joined the club. Please welcome your new member.

[4/14/2004 10:54:25 PM] <Investortrader> So this one may need a rest day with all the sellers today in it

[4/14/2004 10:54:42 PM] <Investortrader> But even on rest days it's been making higher lows

ClubHome

[4/14/2004 10:54:55 PM] <Investortrader> Except for that first rest day
[4/14/2004 10:56:17 PM] <Investortrader> If not in and wanting to be in, I might look around today's open because of that
[4/14/2004 10:56:37 PM] <Investortrader> Or just above it some
[4/14/2004 10:56:42 PM] <Investortrader> May not get down there
[4/14/2004 10:57:43 PM] <Rondon> Time permitting,,,,,SYNC plz
[4/14/2004 10:58:14 PM] <Investortrader> Today is a bit troubling to me since it had such high vol and closed in the lower half of its range a bit
[4/14/2004 11:00:13 PM] <Investortrader> If it does get below yesterday's open (which was the high) of 4.67 (which is below today's 4.75 Hotto wanted it to hold for an add-to), I would expect it to test around today's open since each day it's been testing the prior day's low to a degree
[4/14/2004 11:00:39 PM] <Investortrader> As for a stop on this one ...
[4/14/2004 11:01:04 PM] <Investortrader> It looks pretty far off for a chart point
[4/14/2004 11:01:14 PM] <toptrader99> which stock are you talking about ?
[4/14/2004 11:01:19 PM] <Investortrader> FVCX
[4/14/2004 11:01:30 PM] <toptrader99> thnx
[4/14/2004 11:01:57 PM] <Investortrader> If it breaks low it could run down to the LR30 even
[4/14/2004 11:02:24 PM] <Investortrader> Which is at the first reaction low now off the BO
[4/14/2004 11:03:07 PM] <Investortrader> But could still be considered in an uptrend especially if testing that on low vol
[4/14/2004 11:03:23 PM] <toptrader99> it will prob test the 2 trendlines I posted here
[4/14/2004 11:03:43 PM] <toptrader99> they will intersect tomorrow on the 1 hour
[4/14/2004 11:04:01 PM] <toptrader99> at or around 4.40
[4/14/2004 11:04:02 PM] <Investortrader> Looks like around 4.40 or so there
[4/14/2004 11:04:06 PM] <Investortrader> :)
[4/14/2004 11:04:08 PM] <toptrader99> yep
[4/14/2004 11:04:40 PM] <toptrader99> if it stops to build a small base, would seemingly be bullish IMHO
[4/14/2004 11:04:58 PM] <Investortrader> That could be used as a stop area, just underneath it
[4/14/2004 11:05:19 PM] <Investortrader> But this is a volatile one
[4/14/2004 11:05:24 PM] <toptrader99> hard to tell on these little ones, usually they "wig you out" at the oddest times
[4/14/2004 11:05:51 PM] <Investortrader> Hotto has been trading it pretty well ... I'll let him handle it tomorrow :)
[4/14/2004 11:06:08 PM] <toptrader99> cool, I'm new, will be watching... have a good night
[4/14/2004 11:06:09 PM] <Investortrader> But those are my concerns on it here ...
[4/14/2004 11:06:16 PM] <Investortrader> Any questions on FVCX?
[4/14/2004 11:06:23 PM] <Investortrader> Night toptrader :)
[4/14/2004 11:06:28 PM] <toptrader99> bye
[4/14/2004 11:06:49 PM] <Investortrader> On to CNLG ...
[4/14/2004 11:07:16 PM] <Investortrader> Let's look at the 5's for a minute on this one
[4/14/2004 11:07:26 PM] <acmetrader> CNLG has a float of 1.2m shares
[4/14/2004 11:07:38 PM] <Investortrader> Thanks acme
[4/14/2004 11:07:44 PM] <Investortrader> That's low!
[4/14/2004 11:08:23 PM] <acmetrader> very very very manipulatable...and I sold it yesterday duh
[4/14/2004 11:08:37 PM] <Investortrader> chit happens =o
[4/14/2004 11:08:47 PM] <Investortrader> It did pb a lot off the high
[4/14/2004 11:08:59 PM] <Investortrader> Happen to know what the short interest

ClubHome

is?

[4/14/2004 11:09:25 PM] <acmetrader> negligzble prior to this runnup
[4/14/2004 11:09:54 PM] <Investortrader> So far every time it's had a good day or two it pulls back for awhile
[4/14/2004 11:10:22 PM] <acmetrader> owners registered 75K shares to sell and they need to raise money cuz they are losers
[4/14/2004 11:10:22 PM] <Investortrader> And the buyers dried up today and it couldn't hold near it's highs
[4/14/2004 11:10:28 PM] <Investortrader> lol
[4/14/2004 11:10:57 PM] <Investortrader> The trading history suggest not to chase this one
[4/14/2004 11:11:53 PM] <Investortrader> And to buy the low vol pb's it has and sell the big vol pops
[4/14/2004 11:13:29 PM] <Investortrader> A stock like this could pull all the way back to the middle BB, as it has both times it popped before .. and still be in an uptrend
[4/14/2004 11:14:49 PM] <Investortrader> So I won't be buying it here
[4/14/2004 11:15:20 PM] <Investortrader> You needed to bring it to class Monday! ;)
On the test of the middle BB where OBV was making a positive divergence
[4/14/2004 11:15:54 PM] <gary12> ;)
[4/14/2004 11:15:56 PM] <Investortrader> So long term positive on this one still, but too extended for me to buy it here
[4/14/2004 11:16:20 PM] <Investortrader> Any questions on CNLG?
[4/14/2004 11:16:51 PM] <Investortrader> On to AXYX ...
[4/14/2004 11:17:02 PM] <Investortrader> This one looks nice
[4/14/2004 11:17:04 PM] <bbmd> MTSX
[4/14/2004 11:17:06 PM] <Rcctrader> TY IT
[4/14/2004 11:17:18 PM] <Investortrader> Welcome Rcctrader :)
[4/14/2004 11:17:25 PM] <acmetrader> pretty one, cup and handle and all the bells and whistles
[4/14/2004 11:17:33 PM] <Investortrader> Nice vol BO today
[4/14/2004 11:17:38 PM] <Investortrader> Sure is acme
[4/14/2004 11:18:06 PM] <Investortrader> Here the cup is from 3/8 to 4/5
[4/14/2004 11:18:07 PM] <malkovich> did anyone use tccompanion
[4/14/2004 11:18:52 PM] <bbmd> In mad cow business!axyx.
[4/14/2004 11:18:52 PM] <Investortrader> Notice the higher volume on the rightside of the cup rally on 3/31 thru 4/2 ... just what we want to see
[4/14/2004 11:19:17 PM] <enzo> IT you are picking all my stocks for tommor;)
[4/14/2004 11:19:49 PM] <Investortrader> And see the positive OBV divergence between the 3/22 bottom and the 3/30 bottom at the bottom of the cup
[4/14/2004 11:19:56 PM] <Investortrader> Hehehe enzo :)
[4/14/2004 11:20:19 PM] <Investortrader> Next, notice how the vol dried up in the handle as it pulled back ... perfect set-up
[4/14/2004 11:20:44 PM] <Investortrader> With the 50sma converging on the LR30 holding it as support
[4/14/2004 11:20:54 PM] <Investortrader> Now we have a nice vol BO
[4/14/2004 11:21:17 PM] <Investortrader> Over the Jan highs too
[4/14/2004 11:21:38 PM] <acmetrader> and it is in the possible next hot sector
[4/14/2004 11:21:38 PM] <Investortrader> With OBV confirming the BO
[4/14/2004 11:21:54 PM] <Investortrader> This one could ride the upper BB here
[4/14/2004 11:22:03 PM] <Investortrader> Has all the good stuff on the chart
[4/14/2004 11:22:32 PM] <Investortrader> Goes on my watchlist for tomorrow ... I may have to skip that vacation! lol
[4/14/2004 11:22:44 PM] <gary12> IT you like my stocks :8
[4/14/2004 11:22:57 PM] <Investortrader> You're getting good at picking them gary :)
[4/14/2004 11:23:26 PM] <Investortrader> I like how this one opened at the low and

closed right up at the high on good vol too

[4/14/2004 11:23:30 PM] <BossFan> LJPC when u get a chance IT...TY

[4/14/2004 11:23:37 PM] <Investortrader> Any questions on AXYX?

[4/14/2004 11:24:02 PM] <Investortrader> On to SYNC

[4/14/2004 11:24:22 PM] <Investortrader> I've liked SYNC's chart for awhile here

[4/14/2004 11:24:34 PM] <Investortrader> Very nice OBV

[4/14/2004 11:25:06 PM] <Investortrader> Some overhead resistance at teh 50sma and the upper BB convergence ... but with this OBV it should break thru that

[4/14/2004 11:25:27 PM] <acmetrader> bb pinching

[4/14/2004 11:25:53 PM] <Investortrader> I put in an order to add AH today at 3.07 ... got a whole 400 shares!

[4/14/2004 11:26:11 PM] <parkwaypet> Been on my list and missed NAVR today but good chart BO I think thanks IT

[4/14/2004 11:26:38 PM] <Investortrader> I've been regularly trying to add to this one down in this area

[4/14/2004 11:27:13 PM] <Investortrader> Notice the difference in vol on SYNC between the down days and the up days

[4/14/2004 11:27:29 PM] <Investortrader> We have lots of accumulation going on here

[4/14/2004 11:27:34 PM] <acmetrader> hence the happy obv

[4/14/2004 11:27:39 PM] <Investortrader> Right acme

[4/14/2004 11:27:47 PM] <acmetrader> is it just hotto folks or more?

[4/14/2004 11:28:00 PM] <Investortrader> As I like to say, when the bigs buy or sell, they leave their footprints all over the chart

[4/14/2004 11:28:15 PM] <Investortrader> It's got to be more on those big vol days

[4/14/2004 11:28:33 PM] <Investortrader> almost 3 1/2 million yesterday, I don't think we're that big!

[4/14/2004 11:28:52 PM] <acmetrader> oh, couldn't see the actual numbers....gtknow

[4/14/2004 11:29:42 PM] <Investortrader> So this one I expect to BO over the 50sma, and it's at a great buying place here with close support

[4/14/2004 11:30:04 PM] <Investortrader> Just let me buy the rest of mine first tomorrow! lol

[4/14/2004 11:30:33 PM] <Investortrader> I will prbably hold this one and put in a stop on my trip

[4/14/2004 11:31:01 PM] <Investortrader> As once it breaks out over the 50sma, it could run

[4/14/2004 11:31:21 PM] <Investortrader> I expect the late Feb gap to be an easy fill

[4/14/2004 11:31:48 PM] <acmetrader> then the 200ma

[4/14/2004 11:31:56 PM] <enzo> IT enjoe your trip have good night all

[4/14/2004 11:31:59 PM] <Investortrader> Any questions on SYNC?

[4/14/2004 11:32:05 PM] <Investortrader> Thank you enzo :)

[4/14/2004 11:32:11 PM] <starrbucks> YES

[4/14/2004 11:33:23 PM] <starrbucks> THE OBV being so high above the price...have any significance

[4/14/2004 11:34:11 PM] <Investortrader> The very good OBV is showing accumulation is going on

[4/14/2004 11:34:41 PM] <Investortrader> It's leading price here, already the OBV has BO to new highs during this base

[4/14/2004 11:34:58 PM] <Investortrader> That's something that is good to see

[4/14/2004 11:35:55 PM] <Investortrader> I own it here, and am buying more here

[4/14/2004 11:36:16 PM] <starrbucks> is the height of the OBV above the price that says there is accumulation???

[4/14/2004 11:36:34 PM] <Investortrader> It's the rising OBV while the price is going sideways

ClubHome

[4/14/2004 11:36:53 PM] <Investortrader> Compare the OBV to the price just from 4/1 to today

[4/14/2004 11:37:24 PM] <Investortrader> Price has been very sideways during that time with OBV rising nicely

[4/14/2004 11:37:52 PM] <starrbucks> oh...I see what you mean.....so if it were down close to the price then means distribution

[4/14/2004 11:38:07 PM] <Investortrader> If it were falling during a sideways price move

[4/14/2004 11:38:39 PM] <Investortrader> Just the opposite of what it's doing here

[4/14/2004 11:38:50 PM] <acmetrader> Have you seen OBV *lie*?

[4/14/2004 11:39:03 PM] <Investortrader> acme, it has to be discounted at times

[4/14/2004 11:39:30 PM] <Investortrader> In the in-depth ITIG discussion I pointed out at the blow-off top one of those times

[4/14/2004 11:39:59 PM] <Investortrader> A blow-off top will always make a new high in OBV but obviously a blow-off top isn't bullish

[4/14/2004 11:40:31 PM] <acmetrader> not familiar with blow off top, though I bet I have bought a few

[4/14/2004 11:40:36 PM] <Investortrader> Same with a washout many times ... though sometimes a washout ends the day positive so OBV soars that day

[4/14/2004 11:42:01 PM] <Investortrader> There you go, blow-off top

[4/14/2004 11:42:07 PM] <Investortrader> New high in OBV

[4/14/2004 11:42:21 PM] <acmetrader> looks like a double top?

[4/14/2004 11:42:26 PM] <Investortrader> Huge vol on 12/2, but very little price range

[4/14/2004 11:42:34 PM] <Investortrader> Same on 12/1

[4/14/2004 11:42:41 PM] <Investortrader> Also the double top area

[4/14/2004 11:43:01 PM] <Investortrader> There it ended up falling to the 50sma

[4/14/2004 11:43:36 PM] <Investortrader> (where I bought, and posted ... but that's all in that in-depth discussion)

[4/14/2004 11:44:07 PM] <starrbucks> okay

[4/14/2004 11:44:21 PM] <Investortrader> Well worth reading as it covers the upper BB ride in late Oct to early Nov, thru the blow-off top, down to the 50sma, and further

[4/14/2004 11:44:21 PM] <DMut> printed out your discussion a couple of days ago. I'll get to it. Especially since I participated in this blow off top

[4/14/2004 11:44:38 PM] <OddBodkin> If you have time, IT, is OCA looking for a pause?

[4/14/2004 11:44:55 PM] <Investortrader> Ok, on to MTSX ...

[4/14/2004 11:45:08 PM] <starrbucks> when was the in-depth discussion

[4/14/2004 11:46:18 PM] <Investortrader> Go to "CLubs" ... "Hotto" ... "Boards" ... "General discussion" ... and scroll down just a tiny bit and you'll see it

[4/14/2004 11:46:45 PM] <Investortrader> MTSX, not much I can say about this one .. daytraders delight, or nightmare

[4/14/2004 11:47:16 PM] <Investortrader> you could try buying a pb to the upper BB if it happens tomorrow if not already in

[4/14/2004 11:47:39 PM] <Investortrader> And use just under yesterdays jod as a stop perhaps, which is under the upper BB by a bit

[4/14/2004 11:47:48 PM] <Investortrader> yesterdays hod

[4/14/2004 11:48:11 PM] <Investortrader> Which also looks to be around the end of Feb highs

[4/14/2004 11:48:21 PM] <Investortrader> BUT

[4/14/2004 11:48:38 PM] <Investortrader> We're talking risky on this one, I don't know the news on it at all

[4/14/2004 11:49:25 PM] <Investortrader> Not much else I can say on it, not enough vol before today for OBV to have any meaning

[4/14/2004 11:49:30 PM] <bbmd> They make a gun which fires > 1,000,000 rounds

[4/14/2004 11:53:26 PM] <Investortrader> Between the March btm and the recent April btm
[4/14/2004 11:53:45 PM] <Investortrader> Good vol today, nice price range ... with OBV already breaking out

[4/14/2004 11:55:28 PM] <Investortrader> I'd look at the 50sma for a first target, probably get a pause there
[4/14/2004 11:56:03 PM] <BossFan> Yup, 3.12 is my target...TY
[4/14/2004 11:56:06 PM] <Investortrader> OBV will be hitting around it's 50sma then too looks like

[4/14/2004 11:57:07 PM] <daniel329> IT.. if still time... comments on BABY and DCEL?
[4/14/2004 11:57:31 PM] <Investortrader> Could get that same price action of going up to the 50sma, then down to around the peak between the two btms, which was 2.97 on 3/25, then run for a BO over the 50sma .. we'll see
[4/14/2004 11:57:32 PM] <BossFan> Oh yes, DCEL has a great chart!
[4/14/2004 11:57:49 PM] <Investortrader> On to NAVR

[4/14/2004 11:58:33 PM] <Investortrader> BO over the Jan highs too
[4/14/2004 11:59:10 PM] <Investortrader> Been riding the upper BB for a week or so here, see the lower vol pb it had last two days ... right down to the LR30
[4/14/2004 11:59:25 PM] <acmetrader> IT thanks for doing this..have fun on your vacation, must go rest this head
