[7/1/2003 1:10:21 AM] [hotto] Expecting... there may be violent Rotational behavior..

[7/1/2003 1:10:39 AM] [hotto] and.. looks like it happened

[7/1/2003 1:10:54 AM] [Luigistock] where to look for clues to the rotation?

[7/1/2003 1:10:54 AM] [hotto] MTLG is a case ..

[7/1/2003 1:11:14 AM] [hotto] nearly textbook chart...

[7/1/2003 1:11:46 AM] [hotto] 6/17 Top... closed just over Upr BB... then 3 days heavy selling...

[7/1/2003 1:12:04 AM] [hotto] dropped right down through ma10 and LR30...

[7/1/2003 1:12:31 AM] [hotto] then.. crawled back up.. undr ma10 for 3 days... slowing Volume

[7/1/2003 1:12:49 AM] [hotto] then rolled over.. and held at ma20 on Friday..

[7/1/2003 1:13:11 AM] [hotto] then Today.. BOOM.. broke below ma20... and below Swing Low

[7/1/2003 1:13:39 AM] [hotto] Volume pickup... and close near LOD.. nice Short Entry...

[7/1/2003 1:13:41 AM] [Luigistock] It is so ugly its cute

[7/1/2003 1:13:45 AM] [hotto] LOL

[7/1/2003 1:14:06 AM] [hotto] NOte.. the TOP date... 6/17...

[7/1/2003 1:14:22 AM] [hotto] PERFECT match to the MOMO peak of mkt..

[7/1/2003 1:14:30 AM] [hotto] the Top of T2118..

[7/1/2003 1:14:35 AM] [Luigistock] right

[7/1/2003 1:14:38 AM] [hotto] almost eerie...

[7/1/2003 1:15:12 AM] [hotto] USNA.. we just had that nice Snap-back rally... but... look at OBV..

[7/1/2003 1:15:31 AM] [hotto] PHS... again...

[7/1/2003 1:15:35 AM] [Luigistock] leading down

[7/1/2003 1:15:42 AM] [hotto] Peak on 6/17.. !!

[7/1/2003 1:16:11 AM] [hotto] dropped.. crawled back up under LR30 for a dbl top..

[7/1/2003 1:16:33 AM] [hotto] today... Big Vol.. drop... to close below Yesterday's LOD..

[7/1/2003 1:17:03 AM] [hotto] Makes for an "easy short"... in that the Stop-loss is very close by.

[7/1/2003 1:17:14 AM] [Luigistock] How much credence given to PHS \$48 support zone with that much down volume?

[7/1/2003 1:17:34 AM] [hotto] something to watch...

[7/1/2003 1:17:52 AM] [hotto] but.. at least the Stop is close by...

[7/1/2003 1:17:56 AM] [Luigistock] true

[7/1/2003 1:18:14 AM] [hotto] OR.. just wait for the Swing Low to be taken out...

[7/1/2003 1:18:32 AM] [hotto] say.. Short below 47.10

[7/1/2003 1:18:48 AM] [trdr] thanks stalker...interesting..

[7/1/2003 1:18:58 AM] [hotto] PHS.. already has 3 things in place..

[7/1/2003 1:19:11 AM] [hotto] A big Uncorrected rally...

[7/1/2003 1:19:19 AM] [Luigistock] 1

[7/1/2003 1:19:39 AM] [hotto] Chart says.. it should correct to about 37 - 40 because of that..

[7/1/2003 1:19:48 AM] [hotto] 2. Dbl - Top

[7/1/2003 1:20:08 AM] [StockStalker] Mr Hotto, speaking of narrow range days and NR7's (narrowest range in 7 days) , I just saw something very interesting on Q's (naz 100)

ClubHome

[7/1/2003 1:20:11 AM] [hotto] 3. Big Vol down day.. closing below prior Day's LOD..

[7/1/2003 1:20:25 AM] [Luigistock] 4 - neg OBV leading lower

[7/1/2003 1:20:42 AM] [hotto] good point Luigi

[7/1/2003 1:20:53 AM] [StockStalker] So far this is the narrowest range month on the Naz in almost 5 years and is a Doji on the monthly

[7/1/2003 1:20:56 AM] [hotto] yes.. QQQ.. is holding

[7/1/2003 1:21:16 AM] [hotto] It will resolve shortly...

[7/1/2003 1:21:56 AM] [StockStalker] You can see the move that came after all the other narrow monthly dojis on the comp

[7/1/2003 1:21:59 AM] [hotto] When you get narrow move in avgs.. as we have had in DJIA and SP-500 last few days..

[7/1/2003 1:22:12 AM] [Luigistock] Hotto - your interpretation of NTLI - huge down volume but candle logic says strong finish

[7/1/2003 1:22:37 AM] [hotto] then.. look at things like the Up / Down... Extremes... as I showed...

[7/1/2003 1:22:39 AM] [StockStalker] but this one is the tightest in over 50 months, or an NR50

[7/1/2003 1:22:51 AM] [hotto] It Shows extreme ROTation...

[7/1/2003 1:23:05 AM] [hotto] so.. Stock picking is in order...

[7/1/2003 1:23:13 AM] [hotto] Find some Good Shorts...

[7/1/2003 1:23:22 AM] [hotto] AND some good Longs..

[7/1/2003 1:23:44 AM] [hotto] work both sides.. while this Rotational Correction plays out

[7/1/2003 1:24:14 AM] [hotto] Today .. I had 1 short good for -1.25... and 2 Longs good for over +2

[7/1/2003 1:24:42 AM] [hotto] also... had SPY Short from HOD.. ahead about .80 on that

[7/1/2003 1:25:03 AM] [trdr] stalker ..lines from top..a fan or just catching points?

[7/1/2003 1:25:22 AM] [hotto] The T2100 and T2118 suggest.. we need more correction before any big up turn

[7/1/2003 1:25:26 AM] [StockStalker] just catching points of extrem range contraction

[7/1/2003 1:25:31 AM] [StockStalker] and then reversal

[7/1/2003 1:25:47 AM] [trdr] thanks

[7/1/2003 1:25:47 AM] [StockStalker] but the current poiint is by far the most compact since 98

[7/1/2003 1:25:49 AM] [hotto] could be

[7/1/2003 1:26:10 AM] [Luigistock] Hotto what is OBV telling you on SQST?

[7/1/2003 1:59:40 AM] [StockStalker] I do too, but if you go to the top left of the chart and click on the two faces it will allow u to repoint it at me correctly and not the other share that it is finding

[7/1/2003 9:39:20 AM] [Nance] MLNM - Ryan Beck believes investors may be disappointed with the relatively modest \$15 mln upfront licensing fee. However, firm notes that this amount is somewhat misleading, as it believes that a significant portion of the \$125 mln in potential milestones tied to the multiple myeloma indication is payable upon European approval --a highly likely event firm expects to take place in 1Q04. As such, firm considers the upfront portion of the agreement to be closer to \$100 mln than \$15 mln. Firm raising price target to \$21 from \$18 based on the inclusion of European Velcade royalties and a shorter discount period. Overall, firm believes that MLNM potentially passed up more lucrative near-term deals for this particular agreement, which likely will allow co to better maximize long-term value for shareholders and increase the likelihood of becoming a leading player in the biotech industry

[7/1/2003 10:55:20 AM] [tinaSDtrader] funny you say that, I drew that trendline last 5-min, had me concerned, but needs to close below it to be valid.

[7/1/2003 10:55:32 AM] [McDermojo] TRIN climbing again to 2.80, TICK -200

[7/1/2003 10:55:44 AM] [tinaSDtrader] actually SINA did close below it last 5-min, sorry

[7/1/2003 10:55:51 AM] [hotto] SOHU -use 30.55 - 30.80 as "magic number" re-entry (means Buy if seen)

[7/1/2003 10:56:38 AM] [tinaSDtrader] But SINA on 15-min diff view, pulling back to the 10EMA and may try the 20EMA as well. All depends on what time frame trading. I'm hesitant to short this one on any time frame.

[7/1/2003 10:59:15 AM] [hotto] either.. Just a "projection" based on "foldover"... BUT

[7/1/2003 10:59:48 AM] [hotto] obviously... many other Traders are using 22.50... Hence the "fear of 22.50" selling at 22.34

[7/1/2003 11:00:09 AM] [Ngurumo] tinaSD...thanks...not thinking about shorting...just watching your "patterns:)

[7/1/2003 11:00:25 AM] [MoneyJohn] long CHINA

[7/1/2003 11:01:08 AM] [Rickski] Just spoke with Ameritrade. Placed an order just as the servers crashed. Lost \$50 while waiting to get through on the phone. They can't make up the loss (no time stamp on order if not confirmed) but they gave me four free trades. It's a wash, but the anxiety of being frozen out is hard to put a price tag on. Will move to another broker.

[7/1/2003 11:01:12 AM] [tinaSDtrader] SINA 15-min, if leaves the 11am 20.85 as a btm, we'll have a higher btm and the 20EMA will have acted as support.

[7/1/2003 11:15:27 AM] [hotto] ITMN -.41.. ouch

[7/1/2003 11:15:43 AM] [tinaSDtrader] The second dip didn't go as far, leaving higher btm, giving rising trendline.

[7/1/2003 11:15:57 AM] [odysseytrader] Hotto is this another shakeout dip on SINA or is it done for the day

[7/1/2003 11:16:27 AM] [Jean16] Hotto, took profits on SINA and ASIA, thanks again for your help

[7/1/2003 11:22:04 AM] [tinaSDtrader] SINA also has not closed below the 20EMA on 15s today, breaks it but closes above, key factor.

[7/1/2003 11:22:55 AM] [MaxSteel] The single biggest thing to get from the book is the concept of a locked position

[7/1/2003 11:23:52 AM] [TCNut] charles cottle's book is a li'l overwhelming....but figure if I can get through it....will as w2jc suggests....have lots of options knowledge! Also...Cottle is thinkorswims "Risk Doctor"....they have an 800# directly to him...and he has spent and hour ...a couple of times babying me through strategies

[7/1/2003 11:24:02 AM] [Coral] Max, what is the book you keep refering to ?

[7/1/2003 11:24:06 AM] [MaxSteel] The simplest form of a locked position is a conversion or a reversal

[7/1/2003 11:26:11 AM] [MaxSteel] A sample of a locked position is "long stock + short call + long put"

[7/1/2003 11:26:16 AM] [mtrade48] yikes avii !!!!

[7/1/2003 11:26:28 AM] [tinaSDtrader] my knowledge is chart patterns, support and resistance so I'll pitch in when possible on those issues.

[7/1/2003 11:26:38 AM] [MaxSteel] This is a perfect hedge ... and if done at a credit always makes money

[7/1/2003 11:26:45 AM] [hotto] ty tina...:)

[7/1/2003 11:27:30 AM] [tinaSDtrader] Asc triangles on both ASIA and CHINA invalidated, now going sideways on 5-mins, as long as they keep a base here this builds a strong floor. Strong floors act as support as price comes back down to them.

[7/1/2003 11:27:30 AM] [gary12] CHINA volume today greater than volume yesterday

[7/1/2003 11:27:40 AM] [turningpoint] MAX Same strike and month on options?

[7/1/2003 11:27:58 AM] [bmwrider] IMAX short working today

[7/1/2003 11:28:42 AM] [MaxSteel] Yes ... long stock + short synthetic

[7/1/2003 11:29:15 AM] [Luigistock] BMR haveheard no POW out of you :)

[7/1/2003 11:29:42 AM] [tinaSDtrader] Careful shorting LLTC - on 5s is a falling wedge (bullish) and starting to base sideways a bit, let it resume downtrend and throw off the wedge b4 short again.

[7/1/2003 11:29:44 AM] [MaxSteel] When we place a trade ... the MM must take the other side ... if you are long, he is short, plus a long synthetic at a credit

[7/1/2003 11:30:11 AM] [Ngurumo] Hotto...SINA if we don't see your 20.60 is that a sign of weakness...looks like we got 20.65...close enough?

[7/1/2003 11:30:45 AM] [hotto] ASIA - now "in the gap" from 7/23/02 to 7/24/02.. Closes gap at 9.58.. then "covers close" at 10.04.. then 10.30... then pause.. then 12.30... pause... finally 13.85.. looks like an important Target... Since ASIA had a "hesitation day" yesterday... and now BO "first day up" today... will be important how many - if any - of those Targets can be taken out by Mid-day tomorrow. Remember.. All this started for ASIA... a few days ago... when ASIA reported 2 large new orders.. after the close..

[7/1/2003 11:46:57 AM] [DukeAlfred] Someone develop a "hotkey" for hotto that says "LATER"

[7/1/2003 11:47:30 AM] [tinaSDtrader] Harry Dent wrote a book called "The Roaring 2000s". Interesting read on economics. Talks about the baby boomers being a pig moving thru a python. 85 million boomers will be over 65 at same time within next 10+ years. They will begin pulling more out of mutual funds than putting in. GenX coming up behind them are only 1/4 their size, how can they keep up the spending and mfund contrib of the boomers, plus pull off Social Sec and Medicare. Painful times ahead?
[7/1/2003 11:48:09 AM] [DukeAlfred] Luig - sorry I blinked

[7/1/2003 11:50:23 AM] [tinaSDtrader] His book is dated, but the snake thing is valid. The boomers move the economy as they age.

[7/1/2003 1:01:40 PM] [odysseytrader] hotto is next CHINA target 9.75, then 12+ still?
[7/1/2003 1:02:14 PM] [hotto] no change.. whatever I said.. BUT.. needs more detail..
[7/1/2003 1:02:39 PM] [odysseytrader] thanks hotto
[7/1/2003 1:02:47 PM] [hotto] CHINA... will finish.. after ANDW...
[7/1/2003 1:03:40 PM] [hotto] ANDW.. broke above EMA100 on 5/2.. then over SMA200 on 5/6... big vol..
[7/1/2003 1:04:05 PM] [tinaSDtrader] Getting private msgs on this so will say to all - I keep the 20-period exponential moving average on all my time frames. This is a very strong MA in the market. If long, you want a stock to be closing above, not below this MA and vice versa for shorts. If a stock closes below the 20EMA (Exponential Moving Average), then it will try to find support at something below that, like another moving average, maybe the 40 or 50. It will also try to stop at a recent bottom if there is a strong enough one below the 20MA. Once a stock takes out a strong support, look for it to go down and try to hold at next strong support.
[7/1/2003 1:05:47 PM] [odysseytrader] is there a scalp target on SINA?
[7/1/2003 1:06:06 PM] [dns1] Thanks for the info Tina!
[7/1/2003 1:06:41 PM] [tinaSDtrader] You're welcome. Support and resistance is an important technical.
[7/1/2003 1:06:43 PM] [Luigistock] SOHU scalp out +.40
[7/1/2003 1:07:19 PM] [hotto] ANDW.. there was a Hesitation day on 5/1... HOD = 7.88..
[7/1/2003 1:07:32 PM] [Ngurumo] looks like SINA doesn't want CHINA to get to far our in front! ...and then up comes ASIA... this is better than the track. :8
[7/1/2003 1:07:48 PM] [Luigistock] heeere's...rusty
[7/1/2003 1:07:52 PM] [tinaSDtrader] CHINA 5m is trapped between support/resist, \$9.04-9.42, if breaks that ceiling could be fun.
[7/1/2003 1:07:54 PM] [Physician] Added to XMSR long today...
[7/1/2003 1:08:15 PM] [TCNut] DJ-20,30, SPY...MSFT...strong RT-Volume....all moving up hand in hand
[7/1/2003 1:08:21 PM] [Luigistock] Hi phys - you've been quiet
[7/1/2003 1:08:24 PM] [hotto] ANDW.. 4/30 HOD was 7.90.. then..vol dipped on 5/1.. and began to advance again.. with the advance...
[7/1/2003 1:09:16 PM] [MadameButterfly] We always like to hear what you do!
[7/1/2003 1:09:21 PM] [hotto] ANDW... so.. now that the High level consolidation is failing.. I expect 1.. retest of sma200.
[7/1/2003 1:10:05 PM] [TCNut] :D second I hit enter key...they all turn down...go figure
[7/1/2003 1:10:19 PM] [acetrader] You got the magic touch TC
[7/1/2003 1:10:30 PM] [hotto] ANDW.. the ema100 may cause a hesitation on the down move.. Note.. yesterday.. dipped to ema100.. and again today.. that level held..
[7/1/2003 1:10:34 PM] [acetrader] Tht is I assume you going long with that key
[7/1/2003 1:10:34 PM] [Luigistock] Just fake long ..go short Tcnu
[7/1/2003 1:11:01 PM] [acetrader] SOHU needs to gt above its 20 ema on the 10min

[7/1/2003 1:11:28 PM] [hotto] ANDW was a good short scalp today.. for a cover at yesterday's LOD..

[7/1/2003 1:14:19 PM] [hotto] CHINA.. already took out the 11/27 HOD..
[7/1/2003 1:14:59 PM] [HerbS] Market Int. ratios, 1:00 , DJ down 75, -1 since 12:00 ... uv/dv .29; a/d .64; h/l 14
[7/1/2003 1:15:06 PM] [hotto] CHINA .. 11/9 to 11/10..left a gap from 10.13..
[7/1/2003 1:15:43 PM] [hotto] 11/14 HOD = 9.88... so.. that is the area of our next "target"..
[7/1/2003 1:15:57 PM] [marketrogue] .

[7/1/2003 1:16:59 PM] [Grinder] Anyone have target for XMSR?
[7/1/2003 1:17:13 PM] [Ngurumo] Physician ... XMSR add ... recently or earlier today? Subscriber news ... or anticipating BO above recent HODs?
[7/1/2003 1:17:34 PM] [hotto] CHINA.. "Maybe" 9.88 will be hit.. but.. so close.. who cares?... we can sit out the last .13...
[7/1/2003 1:17:41 PM] [Intuitive] CDWC 1 hr
[7/1/2003 1:18:16 PM] [tinaSDtrader] XMSR may find some resistance at 11.71, 15-min peak 6/27/03 9:45am
[7/1/2003 1:18:17 PM] [Luigistock] SINA 30' Soap Buy
[7/1/2003 1:18:40 PM] [hotto] Then... After we get the PB from the 9.75 - 9.88 area... look for the push up "into the gap" over 9.88... THEN be Long again.. for the moves to...
[7/1/2003 1:19:14 PM] [hotto] 10.50... 11.50...and 13+... for CHINA...

Closes gap at 9.58.. then "covers close" at 10.04.. then 10.30... then pause.. then 12.30... pause... finally 13.85.. looks like an important Target... Since ASIA had a "hesitation day" yesterday... and now BO "first day up" today... will be important how many - if any - of those Targets can be taken out by Mid-day tomorrow. Remember.. All this started for ASIA... a few days ago... when ASIA reported 2 large new orders.. after the close..

CHINA.. "Maybe" 9.88 will be hit.. but.. so close.. who cares?... we can sit out the last .13... Then... After we get the PB from the 9.75 - 9.88 area... look for the push up "into the gap" over 9.88... Then be Long again.. for the moves to... 10.50... 11.50...and 13+... for CHINA... At that point.. Must Re-assess the Volume... price patterns to make sure the Rally we are building is "Sound"... CHINA.. that is all

[7/1/2003 5:27:14 PM] [payck] trying to catch up to where we are now
[7/1/2003 5:27:28 PM] [hotto] we had some excitement last few days..
[7/1/2003 5:27:53 PM] [hotto] trying to keep balanced amid all the conflicting Inputs..
[7/1/2003 5:28:11 PM] [payck] yes, my "big" account is in transfer and if I trade in it, I'll delay the process, so I'm in small accounts now
[7/1/2003 5:28:13 PM] [hotto] Did you check out those new PCFs ?
[7/1/2003 5:28:31 PM] [payck] I saw them but haven't scanned them yet

[7/1/2003 5:33:22 PM] [hotto] Look in today's Logs.. early morning.. 7/1/03...
[7/1/2003 5:33:46 PM] [hotto] for AdvStx2Vol and DeclStx2Vol PCF refs...

[7/1/2003 5:40:23 PM] [payck] yes hotto?
[7/1/2003 5:40:44 PM] [hotto] is the revelation.. of the Extreme Rotation yesterday... as we would expect... Last Day of Qtr... and last day of 1st Half
[7/1/2003 5:41:39 PM] [hotto] Those PCFs usually get about 200 hits each per day...

ClubHome

then... 300 to 100 ... on an up day... or 100 to 300 on a down day...

[7/1/2003 5:41:53 PM] [hotto] Yesterday.. for the first time EVER...

[7/1/2003 5:42:15 PM] [hotto] BOTH the UP and DOWN PCFs.. each got over 800 Hits !

[7/1/2003 5:42:56 PM] [hotto] Shows.. Big \$\$ moving from the Winners.. of the IT Rally... to... NEw Prospects...

[7/1/2003 5:43:25 PM] [hotto] Many new Low Priced stocks emerged in the UP -PCF...

[7/1/2003 5:43:39 PM] [payck] I'm assuming the Adv will give longs, and the Decl will give shorts?

[7/1/2003 5:44:19 PM] [hotto] I will save those watchlists... as they will likely be showing the new *4 or *5 stocks to come

[7/1/2003 5:44:46 PM] [hotto] AdvStx2Vol... = Advancing Stocks on Double normal 30day Volume

[7/1/2003 5:45:01 PM] [payck] so that's why Mondays data is so important, I see

[7/1/2003 5:45:08 PM] [hotto] Then... Use PPC62 to SORT ... as usual//

[7/1/2003 5:45:13 PM] [hotto] yes

[7/1/2003 5:45:47 PM] [hotto] the Mid-year Portfolio Adjustment ... occurs just 1 time...per year...

[7/1/2003 5:46:09 PM] [payck] there's another feature that would be nice on TCNet, update through a specific date...

[7/1/2003 5:46:10 PM] [hotto] An Important factor...

[7/1/2003 5:46:46 PM] [hotto] Got both extreme Downs.. and Ups...

[7/1/2003 5:47:27 PM] [hotto] was expecting maybe more Downs... because of End of IT RALLY...

[7/1/2003 5:47:46 PM] [hotto] and the UPs.. would come in October.. or Nov...

[7/1/2003 5:48:21 PM] [hotto] THis shows.. The Rally will resume... at least this Rotational Thing we have been in...

[7/1/2003 5:48:47 PM] [hotto] We just must Get with the Right Groups... and The Right Stocks....

[7/1/2003 5:49:08 PM] [hotto] so... OUr Sector analysis.. etc.. is very important..

[7/1/2003 5:49:57 PM] [hotto] I only got through about 100 of the Up stocks list last night... Many very exciting stocks there..

[7/1/2003 5:50:16 PM] [payck] I will look for the watchlist...

[7/1/2003 7:16:04 PM] [hotto] hello Alan

[7/1/2003 7:20:24 PM] [AlanD] Hello Hotto. Enjoying an early day off from work. Nice reversal today. If it weren't for my BBBY short in the morning, I would have been down. Ended up being a very good day even with my long positions.

[7/1/2003 7:20:56 PM] [hotto] very good.. !

[7/1/2003 7:21:45 PM] [hotto] We had 4 up over 10%.. and 2 over 7%

[7/1/2003 7:22:12 PM] [hotto] NO

[7/1/2003 7:22:33 PM] [AlanD] Very Nice! Wish I was trading like I use to. Regarding the

ClubHome

amt. of time I had to trade during the day. Only get the first 45mins now.

[7/1/2003 7:22:37 PM] [hotto] no Really big winners.. today... 2 up 12%

[7/1/2003 7:23:21 PM] [hotto] yeah.. we miss you.. and the extra boost your plays give many days..

[7/1/2003 7:24:57 PM] [AlanD] LOL Hotto, I miss the ability to monitor the market intraday to play those high MOMO stocks too. Unless I catch them right at the open, I will have to settle for standard continuation plays.

[7/1/2003 7:25:29 PM] [hotto] yeah..

[7/1/2003 7:26:11 PM] [AlanD] Well so long as I can net 3-5% a week, I'll be happy.

[7/1/2003 7:26:18 PM] [hotto] Got new BOs today in ASIA and CHINA.. Lots of energy..

[7/1/2003 7:26:46 PM] [hotto] Also.. IJI came to life..

[7/1/2003 7:27:08 PM] [AlanD] Yes, looks real good.

[7/1/2003 7:27:45 PM] [AlanD] I put some money into VRA today as more of a early speculative move.

[7/1/2003 7:28:29 PM] [FirstWave] we had a look at VRA today with Candle1 on FW, conclusion we like it.

[7/1/2003 7:28:32 PM] [hotto] I figured.. these plays would work no matter the DJIA etc.. worked well beginning yesterday.. so far so good

[7/1/2003 7:28:48 PM] [hotto] VRA came up for me, too..

[7/1/2003 7:29:03 PM] [hotto] just too many..

[7/1/2003 7:29:26 PM] [AlanD] Yes, your right. I'm also seeing quite a few potential setups.

[7/1/2003 7:29:53 PM] [AlanD] Barring any negative news, tomorrow is looking like an up day.

[7/1/2003 7:30:11 PM] [hotto] my 63day BO scan picked up extreme rotation... over 800 Ups.. and 800 downs...

[7/1/2003 7:30:34 PM] [hotto] WY more than ever before in 1 day...

[7/1/2003 7:30:50 PM] [AlanD] Interesting, how does that compare to previous days?

[7/1/2003 7:30:50 PM] [hotto] marks end qtr, end half...

[7/1/2003 7:31:03 PM] [AlanD] Do you think it was window dressing?

[7/1/2003 7:31:28 PM] [hotto] usual is about 200 to 200... then shifts depending on whether mkt is up or down...

[7/1/2003 7:31:46 PM] [hotto] the Downs... are from the big winners of last qtr...

[7/1/2003 7:32:09 PM] [AlanD] Sounds like possible sector rotation?

[7/1/2003 7:32:10 PM] [hotto] the Ups.. ... only got through the 1st hundred so far..

[7/1/2003 7:32:15 PM] [hotto] yep

[7/1/2003 7:32:39 PM] [AlanD] Well looks like metals acted favorably today.

[7/1/2003 7:32:42 PM] [hotto] Lots of new cheapies with dble normal vol to upside

[7/1/2003 7:32:57 PM] [hotto] BOs.. everywhere

[7/1/2003 7:33:41 PM] [SeattleSteve] Extremely interesting, hotto. Do you think this will give us a new set of stocks to play with for this quarter?

[7/1/2003 7:33:48 PM] [hotto] It is not what I was expecting to see... !

[7/1/2003 7:34:09 PM] [hotto] Yes SS... that is exactly what it looks like...

[7/1/2003 7:34:11 PM] [AlanD] Hello Steve.

[7/1/2003 7:34:20 PM] [SeattleSteve] Hi, guys

[7/1/2003 7:34:36 PM] [AlanD] I haven't done any sector analysis yet. What do you think is shaping up

[7/1/2003 7:34:46 PM] [SeattleSteve] Hotto, this could be really good news if it is a rotation into a whole new set of stocks to trade.

[7/1/2003 7:34:55 PM] [hotto] the big traders want some more 5 baggers...etc... the next month or 2

[7/1/2003 7:35:18 PM] [SeattleSteve] I'll take one or two of those, please ;)

[7/2/2003 1:36:59 AM] [hotto] DTAS BO..
[7/2/2003 1:38:26 AM] [really] you think PCNTF would be hard to buy under \$10 cause of it being an inter from PCNTF except PCNF not at high yet.
[7/2/2003 1:39:16 AM] [hotto] well.. STAA will be VERY hard to buy... It is gonna GAp up...
[7/2/2003 1:39:29 AM] [ChartMonkey] VICL also good news after the bell (patent)
[7/2/2003 1:39:49 AM] [ChartMonkey] A/H bid/ask well above close

[7/3/2003 12:00:48 AM] [really] I work in Wholesale Computer industry . I have spent half my life begging for financing in that industry.

[7/3/2003 12:02:37 AM] [enzo] i only look at charts the charts tell you if gone to break

[7/3/2003 12:09:38 AM] [really] INTV - anyone want to comment on it for today's opening?

[7/3/2003 12:10:35 AM] [bmweyrauch] INTV - will move to the right tomorrow

[7/3/2003 12:10:39 AM] [bmweyrauch] :)

[7/3/2003 12:10:59 AM] [really] by right you mean nowhere?

[7/3/2003 12:11:04 AM] [really] sideways?

[7/3/2003 12:11:50 AM] [bmweyrauch] INTV - just being silly...actually I think up then PB with the mrkt for the long weekend

[7/3/2003 12:13:34 AM] [bmweyrauch] INTV - approaching / at resistance early '02

[7/3/2003 12:14:05 AM] [really] If you look at the daily of today it went up to 6.39 and in middle of day dropped back to 5.20 before going back up again. Talk about a heart failure ride

[7/3/2003 12:15:33 AM] [bmweyrauch] wow ...what a ride for sure

[7/3/2003 12:16:16 AM] [really] It would be interesting to know if any day traders that bought at the opening were still there at the close.

[7/3/2003 12:16:27 AM] [bmweyrauch] same with my old favorite CDWC....must have been some mid day news

[7/3/2003 12:18:19 AM] [JerryA] RBAK acted well today...needs another good day to prepare a breakout move

[7/3/2003 12:19:05 AM] [HOTTO] bmweyrauch has replied to: Picks for 6/30/03 to 7/3/03 Week

[7/3/2003 12:20:10 AM] [really] bm - why do you like CDWC?

[7/3/2003 12:22:13 AM] [bmweyrauch] nothing special except I got to trading it when I joined wildbills tapthegap group....have traded it more than any other stock...it moves pretty well and is good for the early morning gap plays

[7/3/2003 12:23:37 AM] [bmweyrauch] part of me believes that I do better with a smaller group of stock that I get to know fairly well

[7/3/2003 12:25:37 AM] [really] Probably true if not looking for x-bagger. It is the envy of the computer wholesale industry. MALL is categorized as a Retail - Catalog Mail Order but it is really in same business as CDW

[7/3/2003 12:35:47 AM] [really] Everyone must be punch drunk from all the \$\$\$ they made today and gone to bed early

[7/3/2003 12:36:38 AM] [bmweyrauch] ;)

[7/3/2003 12:37:19 AM] [really] My best move was I sold CHINA at \$10.07 , \$.01 from high. dumb luck

[7/3/2003 12:37:28 AM] [bmweyrauch] lookin' at a lot of charts with bottle rockets for their last bars....wow

[7/3/2003 12:37:43 AM] [bmweyrauch] good job!!

[7/3/2003 12:38:39 AM] [bmweyrauch] I did two things right today....bought XING on PB and decided not to chase ASIA

[7/3/2003 12:39:37 AM] [bmweyrauch] wildbill has a good saying about one of the most powerful tools we have as traders is the ability not to trade

[7/3/2003 12:56:51 AM] [RkyMtnFool] I don't think Denver will be happy with any QB unless Elway returns.

[7/3/2003 1:06:41 AM] [RkyMtnFool] Good trading bmw!

[7/3/2003 1:06:50 AM] [bac] RMF, so u know Monument then...

[7/3/2003 1:07:04 AM] [bac] .

[7/3/2003 1:07:09 AM] [RkyMtnFool] Oh yea.

[7/3/2003 1:07:24 AM] [really] I can imagine the 100's near Palm Springs. It's 62 degrees here

[7/3/2003 1:08:02 AM] [bac] enough already!! We'll be out there vacationing soon enough really!;)

[7/3/2003 1:08:37 AM] [bac] I liked the "snow days" as a kid...

[7/3/2003 1:09:09 AM] [really] So bac what you gonna do manana when the market opens?

[7/3/2003 1:10:52 AM] [bac] Gonna wait til the MM's replenish then jump off on the intraday spike through the high...been long options for 2 days (1635 COMP)

[7/3/2003 1:12:25 AM] [really] replinsh - what do you mean?

[7/3/2003 1:13:15 AM] [bac] It's a magnetic attractor at this level (the high)..MM's are low on supply after today's imbalance...

[7/3/2003 1:14:13 AM] [bac] they'll try to open it soft, then jerk the ask up when they replenish to create "demand", then, we're off!

[7/3/2003 1:14:31 AM] [really] so MM's start shorting and drive down NAZ to 1635, is that what you are saying

[7/3/2003 1:15:07 AM] [bac] Sorry, NO...I got long at 1635 yesterday...sorry to confuse

[7/3/2003 1:15:15 AM] [really] ok

[7/3/2003 1:16:14 AM] [really] I am new at this morning stuff. I find it very fascinating. But, how do you think the short day effects everything?

[7/3/2003 1:18:01 AM] [bac] historically, has a positive bias until the second trading day...Tues which has a negative bias. FWIW

[7/3/2003 1:18:20 AM] [RkyMtnFool] Light volume - easier to manipulate.

[7/3/2003 1:19:16 AM] [RkyMtnFool] The BIGS are plotting. =o

[7/3/2003 1:19:51 AM] [really] RMF - you in AVII?

[7/3/2003 1:20:15 AM] [RkyMtnFool] Not now. Played there a month ago.

[7/3/2003 1:22:31 AM] [really] I find it interesting that is can't seem to get anywhere. stays essentially in the base. Yet much positive yakked about it and written about it. So the "sponsors" are trying to get investors to give up on it.

Seems to me anyway.

[7/3/2003 1:53:52 AM] [TCNut] bac....will you share the template you were talking about last night please?

[7/3/2003 1:54:40 AM] [TCNut] like Lady Top Down better!

[7/3/2003 1:54:48 AM] [TCNut] :8

[7/3/2003 1:58:24 AM] [TCNut] bummer....too late to the party

[7/3/2003 1:59:52 AM] [shadow] I think bac has signed off for the evening.

[7/3/2003 2:16:20 AM] [hotto] Similar to our discussions last Saturday... All doubt disappeared by late today.. in the spirit of Holiday euphoria.

[7/3/2003 2:16:46 AM] [Traderabe] Hello Hotto

[7/3/2003 2:16:56 AM] [hotto] hi, Abe

[7/3/2003 2:17:19 AM] [FirstWave] we were just discussing the last time it was this high

[7/3/2003 2:17:20 AM] [Nomeite] hi guys B)

[7/3/2003 2:17:26 AM] [Traderabe] Tick similar to the 87 crash...

[7/3/2003 2:17:30 AM] [FirstWave] Aug, '87

[7/3/2003 2:18:10 AM] [Luigistock] Hey Hotto

[7/3/2003 2:18:20 AM] [hotto] I watched the High Flyers BRCM, VRTS, etc... move sharply up... with little effort.. air-pocket moves..

[7/3/2003 2:18:33 AM] [hotto] ty FW.. yeah 1987 !!!

[7/3/2003 2:18:40 AM] [hotto] hi Luigi

[7/3/2003 2:19:30 AM] [hotto] The Snap-back... Rally toward the dbl-top by 7/3 or 7/7 is in Full swing... with the NHB breaking over recent tops.. and close over ma20...

[7/3/2003 2:20:05 AM] [hotto] NHB High close was 1836.. ..LR30 = 1803..

[7/3/2003 2:20:53 AM] [hotto] I have not done all my research yet.. but.. enough to make my hair stand up again...

[7/3/2003 2:21:37 AM] [hotto] For some Review.. look back at the 6/4/03 Chat Logs.. beginning 10:18PM... to 11:00PM

[7/3/2003 2:22:12 AM] [hotto] Then the 6/5 Logs.. from 9:32PM to 10:37PM...

[7/3/2003 2:22:19 AM] [really] Hotto - did you notice that the TICQ closed -271 yet TICK closed at almost all time high?

[7/3/2003 2:23:08 AM] [hotto] those were the "HUddles" that prepared us for the Close-at-High on Big +Tic.... then GAP up Big .. RUn up... REverse... Top of 6/6..

[7/3/2003 2:23:43 AM] [hotto] NYSE TICK +1500 Tells me enough... ALL Buyers at Close..!

[7/3/2003 2:24:08 AM] [hotto] This is the 3rd such Big Tick Close.. in the last few weeks...

[7/3/2003 2:24:25 AM] [hotto] 3's are magic.. On Wall St...

[7/3/2003 2:25:01 AM] [hotto] I am only interested now... in Preserving Capital... Today was my best day of 2003... thanks Mr. Mkt.

[7/3/2003 2:25:25 AM] [hotto] Yesterday was also a very good day..

[7/3/2003 2:25:46 AM] [hotto] Now.. approaching the Dble-Top.. With almost NO BEARS.

[7/3/2003 2:26:18 AM] [hotto] and... Wall St. telling us... Rally will continue for "the rest of the year".. LOL

[7/3/2003 2:26:23 AM] [Luigistock] congrats on your profits hotto - gota overall figure for me..lam sitting down :)

[7/3/2003 2:26:39 AM] [hotto] no Luigi..

[7/3/2003 2:27:38 AM] [hotto] T2118... McClellan Summation Index...

[7/3/2003 2:27:57 AM] [Luigistock] so, of we don't get the gap and dump ..maybe a small pullback like discussed in 6/4 log ..do we stay long

[7/3/2003 2:28:02 AM] [really] Dble top in the ???? NHB . The NHB is much closer to dble top than COMP or S&P etc.But maybe I am splitting hairs.

[7/3/2003 2:28:23 AM] [hotto] Sold off sharply... since the MOMO peak.. on 6/17... down to the Lower BB... (Magic?)

[7/3/2003 2:28:38 AM] [hog] fwiw, Crawford is moving to Short tomorrow and Bradley model peaks, any pause for concern?

[7/3/2003 2:28:54 AM] [really] Sorry have that incorrect. the COMP looks to be at dble top

[7/3/2003 2:29:13 AM] [hotto] T2106... is really what I want to examine...

[7/3/2003 2:29:20 AM] [really] ok
[7/3/2003 2:29:28 AM] [hotto] The McClellan Oscillator...
[7/3/2003 2:29:32 AM] [Luigistock] lets mcclellan away
[7/3/2003 2:30:01 AM] [hotto] note.. bottomed on 6/23.. below BBs.. then rallied back to LR30...
[7/3/2003 2:30:41 AM] [hotto] hesitated.. then.. now moved up to near 0... the normal behavior in a Big Snap-back Rally..
[7/3/2003 2:31:08 AM] [hotto] This leads to a pause point in the T2118..
Summation Index
[7/3/2003 2:32:05 AM] [Luigistock] got it
[7/3/2003 2:32:15 AM] [hotto] SPY.. note the big vol up day yesterday. as it bounced off the Lwr BB.. very near ma50.
[7/3/2003 2:32:42 AM] [hotto] SPY .. today.. volume slowed a lot.. but still moderate.
[7/3/2003 2:33:12 AM] [hotto] No real information here.. could continue up... in a Momentum movement
[7/3/2003 2:33:45 AM] [hog] i'm trying to learn here, the obv of SPY isn't confirming this rally, is it?
[7/3/2003 2:33:49 AM] [hotto] The one missing element.. to this picture.. is the old Granville... "DJIA Soliary Walk"
[7/3/2003 2:34:33 AM] [hotto] note the Volume pattern in the DJ-30... Was UP today.. indicative of a continuation day again tomorrow.
[7/3/2003 2:35:12 AM] [hotto] The Scary thing.. (my hair standing up)..is that in years past... Just when I was looking for a top...
[7/3/2003 2:35:13 AM] [hog] Granville actually said that tuesday reversal gave him another buy signal
[7/3/2003 2:36:02 AM] [hotto] the "other stocks would stall out"... and the DJIA would continue a Monster rally for 3 to 5 more days...
[7/3/2003 2:36:11 AM] [BushinkaiAiki] OCT 19, 1987 was the crash. Was my sons B-Day.
[7/3/2003 2:36:37 AM] [hotto] Just playing with my "foldover projection game"...
[7/3/2003 2:38:14 AM] [hotto] 6/17 Top = 9352.77 .. PB LOD (7/1) = 8871.20
[7/3/2003 2:38:33 AM] [hotto] NOte how close the LOD on 7/1 came to our est of 8850...
[7/3/2003 2:39:02 AM] [Luigistock] great call
[7/3/2003 2:39:27 AM] [hotto] Foldover.. would put the DJIA at $9352.77 + 481.57 = 9834.34$
[7/3/2003 2:40:03 AM] [Luigistock] how does one profit from a "Splitary walk"
[7/3/2003 2:40:15 AM] [hotto] DIA's
[7/3/2003 2:40:48 AM] [hog] Hotto, i am nobody to question you, but if this mkt rallies hard for another 3-5 days, I'll forever bow to you
[7/3/2003 2:40:48 AM] [hotto] HOD on 6/19/02 = 9733.39.. kinda close
[7/3/2003 2:40:57 AM] [Luigistock] not oex calls
[7/3/2003 2:41:22 AM] [hotto] hog.. I am NOT predicting... Just trying to Preserve Capital...
[7/3/2003 2:41:52 AM] [Luigistock] always a good idea imo to look at both sides of the market everyday
[7/3/2003 2:41:55 AM] [hotto] 2 weeks ago... I had my only big losing day... When I went Short. too big..
[7/3/2003 2:42:41 AM] [hotto] IF I Short big... tomorrow or Monday... and DJIA Rallies 500 more pts.. could be a Big Pain.
[7/3/2003 2:42:50 AM] [hog] i understand, i'm getting close to hero worship

[7/3/2003 2:56:35 AM] [hotto] Be careful of getting too short early...

[7/3/2003 2:56:51 AM] [Luigistock] well - basic aim right now is short scalps

[7/3/2003 2:57:11 AM] [hotto] Think back.. I started with the IT Rally in early April..

[7/3/2003 2:57:28 AM] [hotto] AND.. started cautiously..

[7/3/2003 2:57:55 AM] [hotto] IF this is going to be a BIG decline... into Sept.. Oct.. as I expect...

[7/3/2003 2:58:05 AM] [Luigistock] if you weren't under the microscope of hotto club would youhave pushed the envelope a bit more?

[7/3/2003 2:58:19 AM] [Luigistock] ...at the beginning

[7/3/2003 3:00:58 AM] [hotto] Once I "had it"... I only hesitated ONCE...
[7/3/2003 3:01:05 AM] [Luigistock] when was that
[7/3/2003 3:01:19 AM] [hotto] Else.. I KNEW that I had my IT Rally...
[7/3/2003 3:01:37 AM] [hotto] so.. most nights.. I went home 150% - 170% Long..
[7/3/2003 3:02:07 AM] [Luigistock] had a bunch of those myself
[7/3/2003 3:02:26 AM] [hotto] Without the Big analysis.. that I did in early April... I may not have been courageous enough... day by day..
[7/3/2003 3:02:28 AM] [rockin] hotto - how many positions do you juggle at a time - average?
[7/3/2003 3:02:31 AM] [Luigistock] probably shouldn't have but lost some won more and learned a bunch
[7/3/2003 3:02:43 AM] [hotto] about 16 - 19
[7/3/2003 3:02:49 AM] [Luigistock] jesus
[7/3/2003 3:02:50 AM] [hotto] oops 16 -18
[7/3/2003 3:03:05 AM] [really] GN all
[7/3/2003 3:03:05 AM] [Luigistock] 8 -10 tweks my melon

[7/3/2003 3:03:40 AM] [rockin] well that makes a difference - I can only keep about 6-7 straight at a time - your a better amn than I Gungaden
[7/3/2003 3:03:40 AM] [Luigistock] rotation
[7/3/2003 3:04:04 AM] [hotto] when 1 goes against you.. it won't paralyze you..
[7/3/2003 3:04:32 AM] [hotto] I had some go against me... All came back.. due to the IT RALLY...
[7/3/2003 3:05:11 AM] [hotto] The 1 hesitation.. was back in May... when FW issued that Sell...
[7/3/2003 3:05:14 AM] [Luigistock] yeah learned that lesson the hard way ..still bear thoughts ingrained sold at losses what were gains two days later
[7/3/2003 3:05:18 AM] [hotto] shook me up...
[7/3/2003 3:05:56 AM] [hotto] After that... worked even Harder on MY day-to-day.. "healt-test" work...
[7/3/2003 3:06:19 AM] [Luigistock] lam a plebe..but i ooften wonder how you studtcnnetters balance your opinions against such obviously adept peers
[7/3/2003 3:06:25 AM] [hotto] Have come through this rally better off than before..
[7/3/2003 3:06:42 AM] [ChartMonkey] hotto do you find it easier to manage more positons as you increase your detachment/lack of remorse/decisiveness? i mean, we can churn through looking at 10's or 100's of charts in a chat and make rather quick judgements about them, good or bad - does that translate into real life heat of battle for you?
[7/3/2003 3:06:46 AM] [hotto] it is tough.
[7/3/2003 3:06:52 AM] [Luigistock] you owned the IT big H

[7/3/2003 3:07:32 AM] [Luigistock] gotta get the shirts
[7/3/2003 3:08:01 AM] [SeattleSteve] Hotto, it seems like the troubles you had in May for a few days turned out to be a blessing in disguise. You sharpened up your approach since then.
[7/3/2003 3:08:20 AM] [hotto] CM.. It is the IT RALLY... that allows the extra # of posns...

[7/3/2003 3:08:53 AM] [hotto] then... can Continue to Study the IT RALLY.. and Let IT... take care of the Posns...

[7/3/2003 3:09:20 AM] [hotto] I just had to review the charts each day... not every minute

[7/3/2003 3:09:33 AM] [ChartMonkey] ok so no Neo-like bullet-time hyper-awareness going on there then?

[7/3/2003 3:09:34 AM] [hotto] Right SSteve !.

[7/3/2003 3:10:08 AM] [hotto] CM.. right.. What I learned Years ago... was... The IT Rally is the Thing...

[7/3/2003 3:10:35 AM] [hotto] I.D. the IT RALLY... take care of it!... and it will take care of you...

[7/3/2003 3:10:53 AM] [ChartMonkey] and then - the rest of the time (when no IT rally) - just stay out of trouble ... ?

[7/3/2003 3:11:04 AM] [Luigistock] Hotto..what was the most minute absolute first clue that made th light go off in your head"IT rally"

[7/3/2003 3:11:16 AM] [hotto] But... after 6/17... the MOMO peak... NOW.. must cut way back on the # of posns...

[7/3/2003 3:11:41 AM] [hotto] tonight.. I have only about 6 .. 2 shorts..

[7/3/2003 3:12:28 AM] [Luigistock] r u short spy?

[7/3/2003 3:12:32 AM] [hotto] Luigi... I was out at "Engineering Consulting " meetings.. 3 days.. the week of March 12..

[7/3/2003 3:12:59 AM] [hotto] So.. I missed getting long the big Impulse Rally...

[7/3/2003 3:14:28 AM] [hotto] When I saw the Chart on DJIA and SPY.. for the 3/12 - 3/21 Impulse rally... I got goose bumps...)

[7/3/2003 3:14:53 AM] [Luigistock] did the oct rally do the same

[7/3/2003 3:15:05 AM] [hotto] esp.. in SPY... Look at the OBV on SPY...

[7/3/2003 3:15:23 AM] [Luigistock] wow

[7/3/2003 3:15:26 AM] [hotto] In October... I caught the bottom within 10 minutes..!

[7/3/2003 3:16:04 AM] [hotto] I went 100 % Long in DIA / SPY.. on the day... and... had a bunch of OEX Calls

[7/3/2003 3:16:33 AM] [hotto] I was not consulting then...;)

[7/3/2003 3:16:41 AM] [Luigistock] that'll buy some milwaukees best

[7/3/2003 3:16:55 AM] [Luigistock] hope you made some good \$ on that consulting

[7/3/2003 3:17:13 AM] [hotto] only.. I was shaken out of 25% of Longs.. by a shakeout.. in the 1st hour...

[7/3/2003 3:17:24 AM] [hotto] recovered before day's end...

[7/3/2003 3:17:47 AM] [hotto] in October... TCNet was FULL of "sky is falling " Bears...

[7/3/2003 3:18:06 AM] [Luigistock] i sure hate when i know iam being shaken out but r/r says gotta go

[7/3/2003 3:18:36 AM] [hotto] It was hard to go against everyone.. who I had been listening to... for months..

[7/3/2003 3:18:52 AM] [ChartMonkey] best move i made last year was to EXIT the market completely in september - was ready to buy in october due to emotional detachment

[7/3/2003 3:19:02 AM] [hotto] Like in April... but .. not as hard in April...

[7/3/2003 3:19:34 AM] [hotto] good point CM... that is what I am kinda talking about here...

[7/3/2003 3:20:02 AM] [Luigistock] yeah making reversal calls late last year could get you sent to the nuthouse

[7/3/2003 3:20:07 AM] [hotto] I will try to trade the violent swings intraday.. that I expect.. next few days...

[7/3/2003 8:54:30 AM] [Johnster] I gotcha'...SINA more likely to bounce 'cause it closed in the green yesterday, while SOHU didn't. The nuances are clearing up...

the "Talking Heads" say on CNBC and elsewhere, they are very serious fundamental economic problems we are going to have to address. I'll leave it at that. Just don't let the phrase, "Numbers are improving" fool you. History has plenty of examples where numbers started looking good in the short term only to fool all those who believed them.

about DCTM? Do you have a target? I'm thinking a longer range target might be
14.44 based on support on a daily chart.

[7/3/2003 12:13:58 PM] [allgreen] hotto, XMSR, how would it have to close to be a BO ? thank you
[7/3/2003 12:15:41 PM] [sisterpractical] 2 ways to get shared notes - one is by having the club or the person on your notes list (notes/edit), the other is by clicking on the person, hitting view profile, and seeing the notes they have shared to clubs you are in.
[7/3/2003 12:15:47 PM] [HerbS] Mkt. Int. ratios, 12:00 DJ down 36, +19 since 11:00 .. uv/dv .57; a/d .8; h/l 154 NAS down 4, +5.50 since 11:00 .. uv/dv .68; a/d .83; h/l 38
[7/3/2003 12:17:29 PM] [hotto] XMSR has to close Over 13.28 to be a "trial BO"... but Volume is too light here... will invite Selling on Monday... if it goes like this...But.. OBV is good.. so - mixed bag.. Charts are rarely Perfect.

[7/3/2003 2:32:49 PM] [StockStalker] so u offer out, That is good when u know where resist is

[7/3/2003 2:34:30 PM] [hotto] Except.. when a Guidance warning comes through.. then .. If i think i am fast enough.. i will just punch the Short button.. to get me in at current prices

[7/3/2003 2:34:38 PM] [hotto] JB is on

[7/3/2003 2:34:43 PM] [StockStalker] if in an uptic

[7/3/2003 2:34:50 PM] [RkyMtnFool] I use several brokers, but got locked out today. My ISP decided to fix their antennas 20 minutes before the close! Ouch.

[7/3/2003 2:35:43 PM] [StockStalker] did you know that there are many company stocks listed on the Nasdaq that do not require an uptic to short them

[7/3/2003 2:36:53 PM] [StockStalker] they are not classified as nasdaq national market stocks

[7/3/2003 2:37:00 PM] [StockStalker] nnms

[7/3/2003 2:38:34 PM] [stockpicker] Bollinger negative

[7/3/2003 2:38:54 PM] [hotto] Good insight ...from JB.. once again..

[7/3/2003 2:39:23 PM] [bac] yes...he is spot on

[7/3/2003 2:39:30 PM] [hotto] "cash is trash".. is in play now... will be overthrown soon...

[7/3/2003 2:39:34 PM] [energetic] hotto, can you summarize JB, not near TV, thanks

[7/3/2003 2:40:10 PM] [hotto] we will all be reminded again.. maybe by some

ClubHome

event.. that "Cash is NOT trash"

[7/3/2003 2:41:16 PM] [StockStalker] pretty high probability comment

[7/3/2003 2:41:29 PM] [StockStalker] but i do like JB

[7/3/2003 2:41:41 PM] [hotto] We have been suffering since mid May... last inflection point..

[7/3/2003 2:42:09 PM] [stockpicker] don't venture too far in the room....stay near the exit.

[7/3/2003 2:42:27 PM] [hotto] from Incomplete corrections.. Lots Of "sins" on the charts.. we will have to pay the price before November... I expect

[7/3/2003 2:44:31 PM] [hotto] The "Greedy investors" that JB spoke of.. always make Weak Hands... and have to be Shaken out...

[7/3/2003 2:45:00 PM] [hotto] before a new leg can be built on the old one..

[7/3/2003 2:46:29 PM] [hotto] So.. having watched the action daily through our whole IT Rally...

[7/3/2003 2:46:42 PM] [StockStalker] they form the butt on the top of the leg so to speak!!!!

[7/3/2003 2:47:36 PM] [hotto] I think we have to PB to about 8400 - 8500 before we can do much more..

[7/3/2003 2:48:59 PM] [hotto] Possibly.. an event will cause a greater drop... else.. the slow steady way we built the rally in April May... looks solid..

[7/3/2003 2:49:33 PM] [hotto] At least.. until the "Re-elect "W"" work is done sometime in 2004.

[7/3/2003 2:50:32 PM] [hotto] then.. in 2005.. we can begin again.. to seek true downside "Valuation" support.

[7/3/2003 2:51:29 PM] [hotto] and... we can turn the tape back over to Prechter.. and the "sky is falling" gang..;)

[7/3/2003 2:51:50 PM] [RussH] hotto...or someone...which chart template should be used when reviewing the November chat logs on OBV...and could you share or direct me where to look....thanks so much

[7/3/2003 2:52:41 PM] [hotto] RussH.. the Template I have up now... is what I had in mind at the time..

[7/3/2003 2:53:50 PM] [hotto] since those discussions... I have added ema200 and ema100 to the top window

[7/3/2003 2:54:13 PM] [RussH] ty

[7/3/2003 2:54:50 PM] [hotto] also.. I added sma6 to the OBV in win 2.. still studying it..

[7/3/2003 2:55:45 PM] [InanOut] Hotto, is the shared chart the NHB dily zoom 9? or did I miss the one you shared?

[7/3/2003 2:55:58 PM] [InanOut] daily

[7/3/2003 2:56:11 PM] [hotto] Note ... today.. the DJIA showed us some negs.. but.. Look at NHB... very quiet.

[7/3/2003 2:57:28 PM] [hotto] IF the "bigs" were planning to open the trapdoor on Monday... the NHB would not be so well behaved today..

[7/3/2003 2:58:07 PM] [StockStalker] do you ever read the COT or commitment of traders report Hotto

[7/3/2003 2:58:28 PM] [hotto] With YHOO earns due next Wed.. My guess at this point is. we just keep on keeping on... for a few more days...

[7/3/2003 2:59:34 PM] [hotto] yes.. I look at COT when in doubt about mkt direction.

[7/3/2003 2:59:47 PM] [StockStalker] at extremes it is a good tool

[7/3/2003 3:00:11 PM] [hotto] yes..

[7/3/2003 3:00:53 PM] [hotto] yeah.. at least more time... several big Earns to

come out in next 10 days...

[7/3/2003 3:00:58 PM] [StockStalker] what changed your mind of last nights thoughts of getting out of all longs today to keep on keeping on

[7/3/2003 3:01:29 PM] [hotto] I expect we will learn quickly about "sell on the news" into good earns..

[7/3/2003 3:01:38 PM] [StockStalker] yes

[7/3/2003 3:01:50 PM] [hotto] but.. no need to anticipate.. just let it play out...

[7/3/2003 3:02:19 PM] [hotto] I may do something "bold" just before YHOO reports...

[7/3/2003 3:02:22 PM] [StockStalker] agreed

[7/3/2003 3:02:31 PM] [hotto] but.. no promise tonight.

[7/3/2003 3:03:13 PM] [hotto] I want to go over everything.. and then I may have MY plan on Saturday..

[7/3/2003 3:03:23 PM] [StockStalker] it just seemed to me that the most pain for the investor would be if they dont kill them today and wait till next week regardless of tick reading

[7/3/2003 3:03:58 PM] [hotto] have had "good fit plans" the last 2 weeks.. will try for a 3rd week in a row..

[7/3/2003 3:05:10 PM] [RussH] Is alot of this Asia move based on the currency rumors?

[7/3/2003 3:05:14 PM] [hotto] In case anyone missed it... Here it comes...

[7/3/2003 3:06:16 PM] [hotto] Last 3 Saturdays... I estimated that the 1st PB would find a bounce at about 8850... our old "DJIA Poll Number" from April...

[7/3/2003 3:06:39 PM] [hotto] note that on 7/1.. the LOD was 8871

[7/3/2003 3:07:03 PM] [hotto] I can accept a 21 point error..

[7/3/2003 3:07:45 PM] [hotto] THE BIG thing.. is What we did with the RALLY...

[7/3/2003 3:09:04 PM] [hotto] Many Members reported gains over 10% yesterday (Wed).. and good gains on Tues.. That is what mattered.. what we did with the opportunities..

[7/3/2003 3:10:50 PM] [GoldMiner] Hotto, is the "GANN Stuff" still available somewhere? I can't find it in the club info. nothing seems to be there anymore.

[7/3/2003 3:11:07 PM] [hotto] Today... we were more cautious.. in trading.. Welcomed the Gap down this morning...

[7/3/2003 3:11:40 PM] [hotto] to clear the are some... aftter yesterday's AWEFULL +1500 Closing Tick..

[7/3/2003 3:12:22 PM] [hotto] So.. we were "lucky" to have some Bad economic news this morning... to help us gap down..

[7/3/2003 3:13:37 PM] [hotto] NOW... a whole day... moderat declines... will allow us to go into next week.. with the Argument still in play... THE Bulls Did NOT win today..

[7/3/2003 3:14:15 PM] [hotto] so... our IT rally can survive.. another day... gasping .. for Lack of Bears

[7/3/2003 3:14:58 PM] [hotto] But.. once again.. H/L came in very good on NYSE.. we keep on...1 more day..

[7/3/2003 3:15:19 PM] [hotto] GANN STuff. yes...

[7/3/2003 3:15:59 PM] [hotto] look in "Saturday Topics" file... for all Date / Content stuff

[7/3/2003 3:16:31 PM] [StockStalker] I agree bout the bull not winning and the possiblility of an rally extension because of it.

[7/3/2003 3:16:46 PM] [hotto] ty stalker

[7/3/2003 3:16:56 PM] [StockStalker] the mkt handled the "erroneous trade" well

[7/3/2003 3:17:16 PM] [hotto] that was a neat "trick"

[7/3/2003 3:19:03 PM] [StockStalker] we were long only one stock that correlated with that at all

[7/3/2003 3:19:07 PM] [StockStalker] nice to be under the radar

[7/3/2003 3:21:10 PM] [hotto] we did a lot in the Asian Internet Stocks this week.. to tap into the Holiday Euphoria.. while avoiding the US mkt uncertainties.. worked better than expected.. esp.. Monday and Tuesday.

[7/3/2003 3:22:22 PM] [RussH] great moves....well done....and very timely,...\$\$\$\$

[7/3/2003 3:23:34 PM] [hotto] If you want to find "froth".. how about IJJI.. up from 4.00 to 9.09 since 6/30... and... everyone kept a straight face.....:D

[7/3/2003 3:24:12 PM] [hotto] ty Russ

[7/3/2003 3:26:10 PM] [invest4eternity] hotto...how can I save your daily template to my F2? tnx

[7/3/2003 3:26:49 PM] [hotto] did you grab it... clicking on Edit ?

[7/3/2003 3:27:01 PM] [RussH] yw....what a oportunity to watch all this!!!!

[7/3/2003 3:28:47 PM] [hotto] hahahaha....:D

[7/3/2003 3:30:03 PM] [hotto] FW... I agree totallly about today... was very well behaved.. I was afraid of a GAP-em-up- Runuup Reverse.. PT free-for-all today... killing our goose

[7/3/2003 3:32:28 PM] [hotto] NOW... more stuff for me to read.. DUO Candles.. I am still not up to speed on SOAPS and FLATS.. I will just have to sleep less..;))

[7/3/2003 3:32:40 PM] [CashMan] hotto Silly question with a short trading day and alot of people going home early doesn't that make a big difference.

[7/3/2003 3:32:58 PM] [FirstWave] DUO is just a nome for the DOJL and Hammer candles together

[7/3/2003 3:33:07 PM] [hotto] not really... It all becomes part of the argument...

[7/3/2003 3:33:13 PM] [FirstWave] common death from above on new highs

[7/3/2003 3:33:21 PM] [hotto] ty FW.. :(

[7/3/2003 3:33:24 PM] [FirstWave] our buy pattern this week

[7/3/2003 3:33:50 PM] [hotto] never know how many hours I need to set aside...

[7/3/2003 3:33:50 PM] [FirstWave] was convenient t oroll it out

[7/3/2003 3:34:13 PM] [FirstWave] with the mkt cooperation :D

[7/3/2003 3:34:24 PM] [hotto] sounds like another winner..

[7/3/2003 3:34:36 PM] [hotto] yeah.:D

[7/3/2003 3:35:01 PM] [StockStalker] which would u say usually comes first. the doji or the hammer

[7/3/2003 3:35:02 PM] [FirstWave] to bad it ain't the law togive us those all the time =D

[7/3/2003 3:35:19 PM] [hotto] yeah...

[7/3/2003 3:35:22 PM] [FirstWave] Doji first, then Pos hammer..

[7/3/2003 3:35:24 PM] [hotto] =D

[7/3/2003 3:35:31 PM] [FirstWave] for buys

[7/3/2003 3:35:43 PM] [invest4eternity] hotto...you said in the past you refer mainly to 2 charts...which ones? tnx

[7/3/2003 3:36:11 PM] [StockStalker] so you gt a range cntraction followed up by a "spit" of those lows

[7/3/2003 3:37:54 PM] [hotto] CashMan.. final comment .. In the end.. today's action goes on the Charts.. 1 whole bar / candle.. same as the others.. Bulls/ Bears will argue over it significance for the next few days.. then go on to th e next Argument...

[7/3/2003 3:38:36 PM] [hotto] The important thing... is that the Argument continues.. No complete Bull Victory... Else.. that is the end..

[7/3/2003 3:39:56 PM] [CashMan] hotto I understand what your saying.

[7/3/2003 3:40:42 PM] [hotto] today.. we hadd some little stock IFLO.. that we traded last week.. sold around 7.35.. then waited for a PB.. to buy back...

[7/3/2003 3:42:01 PM] [hotto] Today.. amid the market uncertainty... IFLO managed to dip down... let us buy back around 6.90... then Bounced to 7.45.. a Very nice pop for a do-nothing market...

[7/3/2003 3:42:47 PM] [hotto] I just want the Argument to continue.. Plenty of stocks in play... with good charts.. to keep us busy.. every day..

[7/3/2003 3:42:50 PM] [EasyTrade] How can I save the chart settings for FirstWave's chart?

[7/3/2003 3:43:39 PM] [hotto] from a Shared chart ?

[7/3/2003 3:49:14 PM] [really] Hotto - yesterday when IJI hit the upper BB you mentioned you sold. When you hit the upper BB is that a hard and fast rule you use. with the frothiness of these stocks seems to me BB's are not useful.

[7/3/2003 3:49:15 PM] [FirstWave] DELL does all service calls from India.. tht's why you cannot understand them....:P

[7/3/2003 3:49:45 PM] [cyberact] hotto...i'll:D

[7/3/2003 3:50:01 PM] [hotto] really.. I made my money... and moved on..

[7/3/2003 3:50:21 PM] [hotto] I am up over 140% now.. no excuses...

[7/3/2003 3:51:05 PM] [hotto] When I find a better way to Trade consistently... with confidence.. I will do it...

[7/3/2003 3:52:11 PM] [hotto] the tradeoff between taking profits.. at confidence points... vs "letting it run"... is always a matter of Art.. more than science...

[7/3/2003 3:52:15 PM] [cyberact] FW...that's right...i can't understand them either..LOL

[7/3/2003 3:52:39 PM] [hotto] some would say... I take too high risks...

[7/3/2003 3:52:42 PM] [really] I know you are very good at trading. I am just learning the daily stuff. I know you have rules. I was just curious if that was one of them. by the way, thanks for being so helpful with us in your group.

[7/3/2003 3:53:57 PM] [cyberact] Really...hotto..is Da Man..... i've learned more from him in a very short term than any books i've read in the last 5 years...:D

[7/3/2003 3:54:15 PM] [hotto] I just do what has worked .. and Thank Mr. Mkt.. that my collection of methods.. and "rules" has worked this IT Raly...just like last Fall and in 2001...etc...

[7/3/2003 4:11:27 PM] [cyberact] I saw one of your massages yesterday about alerts ...so i went on looking..LOL

[7/3/2003 4:11:55 PM] [hotto] For those who missed it... Candlestick will be Presenting on Sunday at 8pmET.. in Hotto Club..

[7/3/2003 4:12:05 PM] [cyberact] now trying to figure out if i could access briefing and set alerts to tcnet.

[7/3/2003 4:12:11 PM] [cyberact] send

[7/3/2003 4:12:42 PM] [StockStalker] island.com does free alerts too amd om real time

[7/3/2003 4:12:46 PM] [hotto] I use TCNet.. on 1 computer... and IQChart on the

ClubHome

#2 computer

[7/3/2003 4:13:12 PM] [hotto] actually, I have IQChart on both..

[7/3/2003 4:13:17 PM] [cyberact] ty...stockstalker

[7/3/2003 4:13:33 PM] [StockStalker] yw

[7/3/2003 4:13:38 PM] [cyberact] all i got is tcnet so far

[7/3/2003 4:13:48 PM] [hotto] I prefer the "feel" of the IQchart 5min charts many times..

[7/3/2003 4:13:50 PM] [StockStalker] I like tcnet for my EOD work

[7/3/2003 4:13:57 PM] [StockStalker] and as a backup intraday

[7/3/2003 4:14:07 PM] [cyberact] soooo muchhhh tooo learnnnn!!!

[7/3/2003 4:14:20 PM] [cyberact] :D

[7/3/2003 4:14:36 PM] [StockStalker] and I have to say this chat component has become very interesting

[7/3/2003 4:14:38 PM] [hotto] yeah.. me to... and for HOW Today's developing candle... fits onto the daily chart pattern

[7/3/2003 4:14:55 PM] [StockStalker] the 100 bux seems to filter out the Raging Bull and Yahoo types

[7/3/2003 4:15:06 PM] [StockStalker] exactly

[7/3/2003 4:15:10 PM] [sear] hotto how much does IQ chart cost nowadays ?

[7/3/2003 4:15:38 PM] [StockStalker] u can do an artificail middle of day scan that is easier to trade because of no morning chatter at entry time

[7/3/2003 4:15:56 PM] [StockStalker] E-Signal is strong and I know some pros that use it as well

[7/3/2003 4:16:05 PM] [hotto] I pay \$45 per month.. for "full" features.. mostly just Number of stocks allowed

[7/3/2003 4:16:40 PM] [hotto] you can get it for \$25 or 30 / mo... i think

[7/3/2003 4:16:40 PM] [sear] ty

[7/3/2003 4:17:15 PM] [hotto] IQCHART has Scanning... and supports OBV in the scans..

[7/3/2003 4:17:32 PM] [StockStalker] intraday real time scans

[7/3/2003 4:17:39 PM] [hotto] THeY have many other TA choices as well

[7/3/2003 4:17:39 PM] [StockStalker] ?

[7/3/2003 4:17:45 PM] [sear] do they have option quotes ?

[7/3/2003 4:17:54 PM] [hotto] no.. it is based on EOD data

[7/3/2003 4:18:03 PM] [hotto] no options at all

[7/3/2003 4:18:38 PM] [StockStalker] many that are hard core wavers or indicator type traders lilke the Advanced Get

[7/3/2003 4:18:47 PM] [StockStalker] mucy more costly though

[7/3/2003 4:19:12 PM] [hotto] TCNet... using .. Last update... as "last eod data point" helps a bit

[7/3/2003 4:19:18 PM] [StockStalker] and it does some intraday scanning as wel

[7/3/2003 4:19:23 PM] [StockStalker] yes

[7/3/2003 4:19:45 PM] [StockStalker] even though it is delayed 20

[7/3/2003 4:20:09 PM] [StockStalker] but sufficient for daily time frame

[7/3/2003 4:20:28 PM] [StockStalker] My favorite is First ALert but it is very pricey

[7/3/2003 4:21:16 PM] [hotto] yeah.. I will try more software.. to make myself more productive.. but.. now.. I don't have the time to analyze all the "analyzed data" that I get already...

[7/3/2003 4:22:01 PM] [hotto] the next thing i need is a helper.. (a new nightmare).

[7/3/2003 4:22:53 PM] [StockStalker] i new a trader that paid his helper 10% of profits

ClubHome

[7/3/2003 4:22:55 PM] [hotto] last time I was in business.. I got up to about 95 employees.. then.. Problems..

[7/3/2003 4:23:13 PM] [VJnet] wow... you're still here

[7/3/2003 4:23:28 PM] [StockStalker] that was in the bull

[7/3/2003 4:23:30 PM] [hotto] After that... I went back to math/ engineering..

[7/3/2003 4:23:45 PM] [hotto] hi VJ...!

[7/3/2003 4:24:03 PM] [hotto] how is the windy city?

[7/3/2003 4:24:04 PM] [StockStalker] the nice part is the "helper" made 2 million in 99

[7/3/2003 4:24:15 PM] [StockStalker] and learned to trade as well

[7/3/2003 4:24:20 PM] [VJnet] yes...just got back. Thought I'd upda5e and here you are.

[7/3/2003 4:24:22 PM] [hotto] wow! nice 10%..

[7/3/2003 4:24:33 PM] [hotto] :D

[7/3/2003 4:24:57 PM] [hotto] VJ... you just can't get away from me... lol

[7/3/2003 4:25:04 PM] [StockStalker] the trader was David Jamail the founder of Cornerstone securities (Ibecame ProTrader)

[7/3/2003 4:25:27 PM] [hotto] interesting

[7/3/2003 4:26:18 PM] [hotto] It was really a good week..)

[7/3/2003 4:26:35 PM] [hotto] not perfect... but fun.. and profitable.

[7/3/2003 4:26:38 PM] [StockStalker] then instinet bought PT for 150 mill and Dave quit trading soon therafter

[7/3/2003 4:27:05 PM] [beach] Hotto, can you get live futures charts on IQcharts. (e-minis)?

[7/3/2003 4:27:08 PM] [StockStalker] I hade to go eats sushi yesterday with all the asia talk

[7/3/2003 4:28:19 PM] [hotto] hmhhh I can't imagine life without HOtto Club.. after just 9 months.. amazing

[7/3/2003 4:28:20 PM] [VJnet] trading here much more dangerous than sushi... lol

[7/3/2003 4:28:46 PM] [hotto] yeah?

[7/3/2003 4:29:05 PM] [VJnet] You are a god, hotto...you're not thinking of leaving, are you?

[7/3/2003 4:29:16 PM] [hotto] VJ.. did you get hurt ?

[7/3/2003 4:29:27 PM] [hotto] big loss ?

[7/3/2003 4:29:47 PM] [VJnet] No,... just waiting for your cue for the website/book tour

[7/3/2003 4:30:11 PM] [hotto] NO.. not leaving.. just considering what Stalker said about his rich friend..

[7/3/2003 4:30:14 PM] [StockStalker] Trading Idea just came hotto!!!!

[7/3/2003 4:31:11 PM] [hotto] I really want to see where Hotto Club takes me next..

[7/3/2003 4:31:19 PM] [StockStalker] Good time to run a scan for stocks that were able to trade at or abouve their average trading volume today. This extra buying would be camouflaged by todays short day and reduced players.

[7/3/2003 4:31:23 PM] [VJnet] Wow...don't come in mid idea! No, hotto. life is grand. Just took a bit of a hit on the IMcle numbers...but I think it's temporary

[7/3/2003 4:31:41 PM] [StockStalker] and give an edge to those that know where it ocured

[7/3/2003 4:32:32 PM] [hotto] ok Stalker.. write it out while it's hot... I will read it over in a while...

[7/3/2003 6:49:35 PM] [kmack] hopefully someday I will come to the point where I'm happy with a "system"

[7/3/2003 6:49:44 PM] [hotto] ultimately... I think you will find.. you don't have to have a perfect system... just "workable"

[7/3/2003 6:50:22 PM] [kmack] that is worth some thought hotto...thx

[7/3/2003 6:50:35 PM] [wildbill] everything is hard until its easy - when its easy it is fun - when its fun - u love what u you do and hotto here is a prime example

[7/3/2003 6:50:55 PM] [kmack] yes!!..you too wb!!

[7/3/2003 6:51:09 PM] [kmack] then it is an art

[7/3/2003 6:51:53 PM] [kmack] I slashed back my DJ chart today and scrolled back through....saw price reacting to trendlines and Mas...it was so cool...

[7/3/2003 6:52:02 PM] [really] Hotto - thanks for looking at SQNM this morning. I bought at \$3.19 and was out at \$3.50 by 9am.

[7/3/2003 6:52:10 PM] [kmack] saw the tags and retests, etc

[7/3/2003 6:52:21 PM] [hotto] really... Really cool!

[7/3/2003 6:52:25 PM] [hotto] :D

[7/3/2003 6:52:37 PM] [hotto] I love that... good job

[7/3/2003 6:52:38 PM] [kmack] SQNM!!!

[7/3/2003 6:52:57 PM] [kmack] SQNM was my first winner...and my biggest loser!!

[7/3/2003 6:53:13 PM] [kmack] boy I was green....

[7/3/2003 6:53:13 PM] [hotto] again.. I got so busy chatting.. I forgot to put through my new orders..

[7/3/2003 6:53:23 PM] [kmack] no way!!

[7/3/2003 6:53:27 PM] [hotto] my list...

[7/3/2003 6:53:55 PM] [kmack] you mean on chat?

[7/3/2003 6:54:02 PM] [hotto] CTXS PCNTF ABI WIND on bo.. BRKS.. MTON PETC

[7/3/2003 6:54:27 PM] [hotto] this was my Super...last list (on RED notepad)

[7/3/2003 6:54:50 PM] [hotto] then... really asked SQNM so I was going to add

[7/3/2003 6:55:34 PM] [hotto] but.. it is only \$\$\$

[7/3/2003 6:55:43 PM] [hotto] lol

[7/3/2003 6:56:20 PM] [hotto] I put comments about S&C mag... "Bonus Issue" into chat stream.

[7/3/2003 6:56:42 PM] [kmack] is it on the newstand?

[7/3/2003 6:57:32 PM] [hotto] not sure.. hmmm no Price on cover

[7/3/2003 6:57:44 PM] [wildbill] lost connect again will try that last pm again-see that shared monthly on IJJI - again no coincidences

[7/3/2003 6:58:02 PM] [kmack] may only go to subscribers...

[7/3/2003 6:58:39 PM] [hotto] could be..

[7/3/2003 7:02:22 PM] [really] I find the hardest part of this business is staying focused on the charts. My broker recommended and bought ASIA in Jan when it tanked. Finally when it broke thru the base he was so releived to get out of that dog and sold at \$5.50. I was on the phone with him. I should have been buying at \$5, instead I just thought glad I didn't sit in that pig for 6 months.

[7/3/2003 7:03:35 PM] [really] I didn't focus on the chart. It had broken thru all that resistance. That was the time to buy.

[7/3/2003 7:06:03 PM] [really] Another example, I have been running the BO63V150 PCF for several days. IPA was on the top of the list for several days. It is in the Computer Wholesale business. A business I work in and WS hates. Because of my outside bias I didn't buy it. Look at the chart today.

[7/3/2003 7:06:25 PM] [hotto] yes really... I saw...very nice..

[7/3/2003 7:06:44 PM] [hotto] you made some Good picks off that list..

[7/3/2003 7:07:45 PM] [hotto] My real problem by last night.. just exhausted.. not.. maybe I can catch up a bit.. and we can do something Sunday afternoon or eve.

[7/3/2003 7:08:02 PM] [hotto] Now.. maybe

[7/3/2003 7:08:46 PM] [hotto] really... one other thing... important

[7/3/2003 7:08:50 PM] [really] I am sure you get exhausted. You are on when I go to bed at midnight and on when I get up at 5:30am

[7/3/2003 7:10:04 PM] [hotto] After the 7/1 market.. we should have been using the Bum50b PCF or the KR2 PCF..

[7/3/2003 7:10:35 PM] [hotto] I will go over the choices of the PCFs on Saturday.. in Some detail..

[7/3/2003 7:10:50 PM] [hotto] It works.

[7/3/2003 7:11:16 PM] [hotto] There are reasons for the design and use of each PCF..

[7/3/2003 7:11:26 PM] [really] I have run them also. I do need to better understand when to run which ones though.

[7/3/2003 7:11:34 PM] [hotto] They are all relatively simple...

[7/3/2003 7:11:55 PM] [AstuteWins] jinet

[7/3/2003 7:12:15 PM] [hotto] But.. it is the matchup... with how the mkt behaved ...say on Tuesday....the big drop.. and Reversal/

[7/3/2003 7:13:01 PM] [hotto] choosing the PCF to match that mkt .. will get stocks that are TUNEd to the next movement.

[7/3/2003 7:13:33 PM] [really] Yes, that is the part where I am a neophyte.

[7/3/2003 7:14:10 PM] [hotto] I was frustrated last week.. and again tuesday.. only a couple members looked at the right PCF at the right time.

[7/3/2003 7:14:35 PM] [hotto] we'll do it on Saturday.

[7/3/2003 7:15:12 PM] [hotto] anyway... What you did - was Great!.. with the tools you had to work with..

[7/3/2003 7:15:21 PM] [really] but none of the Asian internet stocks would have been on the BUM or KR PCF/s

[7/3/2003 7:15:48 PM] [hotto] That's right.. came from a totally different approach...

[7/3/2003 7:16:18 PM] [hotto] I was looking for somethihng that would be Independent of the DJIA or US mkt..

[7/3/2003 7:16:44 PM] [hotto] and just tap into the Holiday Euphoria... that I wrote about last Saturday

[7/3/2003 7:17:12 PM] [really] to tell you the truth without your leadership I would have never bought most of those asian internet stcoks. Too extended for my blood doing it solo.

[7/3/2003 7:17:18 PM] [hotto] The Asians... fit perfectly.. note.. they went up Monday.. even with the DJIA Down

[7/3/2003 7:18:02 PM] [hotto] yes.. I understand.. Next time.. be sure to get me to explain the Strategy... theory...

[7/3/2003 7:18:29 PM] [hotto] I did that last week.. but.. maybe not everyone got it.

[7/3/2003 7:18:35 PM] [really] well, I have been reading the various past sat chats

"concrete" info in one day than most do in a month iot took you 32 yrs to put it all together in a cohiseve format in your mind- can't imagine putting it all on paper - but you do a stellar job of trying A++++ for effort

[7/3/2003 7:21:10 PM] [hotto] those are all clubs that have successful traders running them..

[7/3/2003 7:21:38 PM] [hotto] ty wb.:)

[7/3/2003 7:23:15 PM] [kmack] agree with that ...you know so much...

[7/3/2003 7:23:26 PM] [really] I have looked there somewhat. I feel most comfortable here right now. YOu are very knowledgable and patient in your teaching and approach.

[7/3/2003 7:24:00 PM] [hotto] It is important to understand.. and be comforable.. with the approaches.. else.. just skip the trade..

[7/3/2003 7:24:24 PM] [hotto] and.. wait for another..

[7/3/2003 7:25:13 PM] [hotto] Or.. find a trade of your own.. like you did... and feed it in..

[7/3/2003 7:25:38 PM] [hotto] I should have put out the SQNM trade after we analyzed it.

[7/3/2003 7:29:27 PM] [really] I think that is good idea. There are many in the club, like myself, that wouldn't mind helping with the shovelling. We just don't know where to dig.

[7/4/2003 3:54:39 PM] [StockStalker] one example is TQNT
[7/4/2003 3:55:02 PM] [StockStalker] it closed below the 200 sma daily and did so on bigger volume
[7/4/2003 3:55:15 PM] [StockStalker] why would anyone dump on a thin day???
[7/4/2003 3:55:25 PM] [StockStalker] because they want out bad

[7/4/2003 4:25:51 PM] [StockStalker] U guys do realize that you can short a non marginable stock right?
[7/4/2003 4:26:32 PM] [Noname] TQNT-more downside to bad it's so cheap
[7/4/2003 4:26:48 PM] [hotto] SBYN.. I would pass on the Short.. combo of last 6 days... and ma10 and LF Shorts on Neg Reversals.. off Dble tops.
[7/4/2003 4:26:51 PM] [StockStalker] that was not rhetorical question by the way
[7/4/2003 4:27:40 PM] [StockStalker] sbyn is a bit cheap but I would whack tqnt
[7/4/2003 4:28:35 PM] [hotto] Sorry - I am in and out.. Janet keeps insisting on some attention... LOL
[7/4/2003 4:28:49 PM] [StockStalker] I have seen much better setups for sure and there are mahy out ther
[7/4/2003 4:29:36 PM] [StockStalker] we are handicapping the setup a bit becuase of the bigger volume tr have been miniscule

[7/4/2003 4:32:39 PM] [RkyMtnFool] Yes
[7/4/2003 4:32:55 PM] [StockStalker] a stock only needs to be A) borrowable B. In a margn account
[7/4/2003 4:33:09 PM] [StockStalker] u have to have a marging account to short it in
[7/4/2003 4:33:20 PM] [StockStalker] but the stock does not have to be marginable itself
[7/4/2003 4:33:41 PM] [StockStalker] any broker can put in rules that are more restrictive though
[7/4/2003 4:33:56 PM] [StockStalker] thiese are the minimum sex and nasd rules
[7/4/2003 4:34:33 PM] [StockStalker] the problem may be in that th BD could not borrow it
[7/4/2003 4:34:34 PM] [RkyMtnFool] My problem is probably the minimum sex thing.
[7/4/2003 4:35:16 PM] [StockStalker] Hotto do you trade the LR30 like a trendline?

[7/4/2003 7:10:46 PM] [silverd0lr] norton's is great...after the initial cost \$25 dollars a year gets you all the protection you need

[7/4/2003 7:11:33 PM] [hotto] ON CNBC early... one computer had over 70 cookies choking it up...

[7/4/2003 7:11:38 PM] [w2jc] there's another you should know about, called Ad-Aware -- it finds the hidden files with info all the time...

[7/4/2003 7:11:48 PM] [hotto] "spying on Internet activities."

[7/4/2003 7:12:27 PM] [Dennis4Cash] a good one is 2tucows.com (anti-trojan)

[7/4/2003 7:13:21 PM] [hotto] I guess - one reason the Asian Internets are so HOT... is due to the China... they are so close to the world

[7/4/2003 7:13:26 PM] [w2jc] ad-aware is from Sweden -- www.lavasoft.com

[7/4/2003 7:14:54 PM] [w2jc] one of the worst things they do is to get into your computer and then they can see the world all at the same time to run 'attacks' on servers they dont like... uses up your pc power and make it slow

[7/4/2003 7:16:08 PM] [Dennis4Cash] well it sure cost me plenty by not being able to trade much this past week

[7/4/2003 7:16:21 PM] [Dennis4Cash] still not completely right yet!

[7/4/2003 7:16:44 PM] [w2jc] the way we trade on here, even a small delay can screw up an exit from a trade

[7/4/2003 7:16:44 PM] [TraderGeorge] According to my sources better than a software firewall such as ZoneAlarm is to use a hardware firewall such as Linksys or Netgear

your computer and the internet. My brother, who is knowledgeable enough about computers that Cisco hired him to help them with their routers, "see" my machine's address. He says that all he can see is the address that is assigned by my Linksys router

[7/4/2003 7:17:26 PM] [Dennis4Cash] I use a router and they still got through

[7/4/2003 7:17:41 PM] [w2jc] TG -- yup ... a lot of people are using routers and cable modems to connect, but they still use the hardware firewall stuff !!

[7/4/2003 7:18:06 PM] [Dennis4Cash] maybe that's my problem???

[7/4/2003 7:18:37 PM] [w2jc] dennis - u might check the manual for your router and see if it says anything about the firewall

[7/4/2003 7:18:39 PM] [Dennis4Cash] I'll check my settings

[7/4/2003 7:18:51 PM] [Dennis4Cash] thx w2

[7/4/2003 7:19:10 PM] [w2jc] even worse are people who set up the new wireless access points and dont use a firewall

[7/4/2003 7:19:41 PM] [w2jc] any kid in the neighborhood can then sit out on the sidewalk with his laptop and connect to the internet

[7/4/2003 7:22:10 PM] [Dennis4Cash] the kids are smarter on computers than we are

[7/4/2003 7:23:55 PM] [w2jc] yup, in a lot of cases that's true these days!!! parents dont stand a chance a kid can be so scared to use the net, I'll go back to browsing my elliott wave charts !!

[7/4/2003 7:24:34 PM] [hotto] YOU guys are freaking me out !..

[7/4/2003 7:25:20 PM] [w2jc] that's good, hotto.... you need to be aware of security needs these days...

[7/4/2003 7:26:57 PM] [w2jc] i'm not sure if McAfee is a firewall, but it's good for the anti-virus (though I use email for virus, but don't think it scans files...
[7/4/2003 7:27:07 PM] [Dennis4Cash] that's better :D
[7/4/2003 7:27:22 PM] [silverdollar] hotto...you have the auto update with McAfee
[7/4/2003 7:27:46 PM] [hotto] not using it..

[7/4/2003 7:29:37 PM] [hotto] CNBC talked about a "Spy detector" that can be downloaded.
[7/4/2003 7:29:44 PM] [Dennis4Cash] Hotto, why don't you send a couple of bum trades to the Asians, man
[7/4/2003 7:30:09 PM] [w2jc] the ad-aware I mentioned earlier is a 'spy detector'
[7/4/2003 7:30:11 PM] [hotto] Dennis... I like it..
[7/4/2003 7:30:52 PM] [hotto] hey w2... You seem very knowledgeable... are you in IT ?
[7/4/2003 7:31:04 PM] [Dennis4Cash] good hotto :D
[7/4/2003 7:31:13 PM] [hotto] or... just an old hacker..?
[7/4/2003 7:31:28 PM] [Dennis4Cash] McAfee has a firewall but it interferes with a lot of stuff for me
[7/4/2003 7:32:28 PM] [hotto] Great... either the Hackers get us... Or our own "hacker protection software"
[7/4/2003 7:32:46 PM] [w2jc] hotto -- sort of... I originally set up the email and networking in the small company years until we hired a 'kid' who knows all the Cisco stuff and the super-duper stuff... but I have sub-expert level
[7/4/2003 7:33:19 PM] [Dennis4Cash] I just checked, my virus protector has been removed from my PC.....
to the house and removing my software!
[7/4/2003 7:33:45 PM] [Dennis4Cash] in person lol
[7/4/2003 7:33:52 PM] [w2jc] once they get into your PC remotely, they can do almost anything
[7/4/2003 7:34:23 PM] [Dennis4Cash] is there any way to give them the virus back w2jc?
[7/4/2003 7:35:08 PM] [w2jc] one thing I really like about ZA is that you can set programs to 'ask' and eventually it will ask if it's OK... I use that for ALL micromush programs !! bit of a pain, but I know when they are trying
[7/4/2003 7:35:23 PM] [w2jc] dennis -- you don't want to get involved with that unless you are as good as

[7/4/2003 7:37:10 PM] [w2jc] the lawmakers actually THINK

[7/4/2003 7:37:28 PM] [w2jc] whoops THAT was not intended as a complete sentence !!!!

[7/5/2003 11:31:29 AM] [kmack] click on that and you will see a small square with blue lines on it in the upper right corner

[7/5/2003 11:34:20 AM] [kmack] then you have to update....

[7/5/2003 11:34:48 AM] [kmack] then you can create an easyscan with this pcf and volume or price filters

[7/5/2003 11:34:58 AM] [JayW] great, did it and it worked. thx

[7/5/2003 11:35:09 AM] [kmack] to create the easyscan you hit the lightning button

[7/5/2003 11:35:15 AM] [kmack] man you are fast!!!

[7/5/2003 11:35:22 AM] [JayW] yeah, played with the easyscan a bit already

[7/5/2003 12:17:17 PM] [hotto] We are NOT out of the woods as yet... but... a couple things happened..

[7/5/2003 12:18:01 PM] [hotto] 1. the bad Unemployment Report on THurs morning... gave us a Gap Down... (not Up)... relieving the Bullishness...

[7/5/2003 12:19:04 PM] [hotto] 2. the put / call Ratio jumped to 1.01 .. showing some Downside bets coming out..

[7/5/2003 12:19:43 PM] [hotto] 3. the Short Interest actually Increased from May to June.!

[7/5/2003 12:20:59 PM] [hotto] Barrons has a good article on my favorite topic "Hunting Bears".. this weekend.. Good reading.

[7/5/2003 12:22:50 PM] [hotto] We have the Big Arch Crawford date coming up on Monday.. 7/7.. I suspect that part of the hesitation.. and P/C increase was due.. in part.. to the Crawford date..

[7/5/2003 12:23:45 PM] [hotto] He has been Right on... for the last couple years.. in Stocks and Gold.. Now.. saying sell Stocks and go short... on 7/7.

[7/5/2003 12:24:34 PM] [hotto] Reminder... his original date was the Bradley Model date.. of 6/23.. BUT...

[7/5/2003 12:25:23 PM] [hotto] Arch.. modified his call based on the very Stong Momentum of the IT Rally... since March... and the 7/4 Holiday week..

[7/5/2003 12:26:06 PM] [hotto] We will get to see how all that plays out over the next couple weeks.

[7/5/2003 12:26:27 PM] [hotto] YHOO.. reports Earns on Wed.. 7/10 AH..

[7/5/2003 12:27:10 PM] [hotto] YHOO Earns in October and April.. helped to kick off big rallies.. and focus on the Internet stocks.

[7/5/2003 12:28:17 PM] [hotto] We come into the YHOO EArns report.. a bit different than in April..

[7/5/2003 12:29:16 PM] [hotto] Note.. YHOO had a pop early on 4/7.. then dipped sharply into th 4/9.. close...just ahead of the Earns report.

[7/5/2003 12:30:14 PM] [hotto] YHOO then beat ests.. and Guided higher... sparking a Big Pos reversal rally on 4/10.

[7/5/2003 12:30:46 PM] [hotto] BUt.. YHOO was "only" \$23 per Share then...

[7/5/2003 12:31:28 PM] [hotto] Thurs.. 7/3.. YHOO touched \$35. and is well extended after a 3 month Rally.

[7/5/2003 12:32:16 PM] [hotto] Noting what happened in the big homebuilders.. BZH KBH ... big PT "on the news"... after Blow-out EArns..

[7/5/2003 12:32:57 PM] [hotto] beware of a possible Sell-off in YHOO after really good Earns this time..

[7/5/2003 12:33:25 PM] [hotto] Anyway.. that is what I am "alert to"... Not "betting on"...

[7/5/2003 12:33:53 PM] [hotto] But.. we have had a Great IT Rally.. one of the greatest in History.

[7/5/2003 12:34:36 PM] [hotto] So... we could run into some serious PT "on the news" of "already expected" good Earns. reports.

[7/5/2003 12:34:54 PM] [hotto] as usual.. we will take it one day at a time.

[7/5/2003 12:35:38 PM] [hotto] But.. my thought is.. the Arch Crawford Big Selloff on 7/7... may have to wait a few days..

[7/5/2003 12:36:05 PM] [hotto] the BEST Earns reports are usually in the week beginning with YHOO..

[7/5/2003 12:36:43 PM] [hotto] and Investors / Traders may not want to sell out

since March/ April...

[7/5/2003 12:49:28 PM] [hotto] I refer you back to the Saturday Chat Logs of 4/17/03... on the NHB..

[7/5/2003 12:49:57 PM] [hotto] It helped make the decision that the IT RALLY would continue higher..

[7/5/2003 12:50:38 PM] [hotto] Note how NHB topped out ON 6/17.. exactly in agreement with T2118... the McClellan Summation Index.

[7/5/2003 12:51:42 PM] [hotto] Also.. NHB then declined - straight line.. for 4 more days.. dropping below ma10 LR30 ma20..

[7/5/2003 12:52:02 PM] [hotto] even Closing below ma20 on 6/23.

[7/5/2003 12:52:36 PM] [hotto] NHB then had a holding pattern for 5 days.. just Volatile... until..

[7/5/2003 12:53:05 PM] [hotto] on Tues. 7/1.. dipped mid-day to tag Lwr BB..

[7/5/2003 12:54:56 PM] [hotto] NHB then Reversed Pos..and went back over that 5day consolidation area.. closed just over ma20 again on 7/2. at HOD.. on the day with the Monster + tick.

[7/5/2003 12:55:44 PM] [hotto] DJ-30..

[7/5/2003 12:56:30 PM] [hotto] DJ-30.. one of the key price levels we looked at in April.. was the January Highs area.. about 8850.

[7/5/2003 12:57:11 PM] [hotto] DJIA.. of course... we exceeded 8850 in June.. by 500 pts..

[7/5/2003 12:57:56 PM] [hotto] 3 weeks ago.. we discussed that 8850 was a logical PB point from the MOMO peak.

[7/5/2003 12:58:42 PM] [hotto] on 7/1.. DJ-30 dipped to 8871 mid-day.. and tagged Lwr BB.. before the big Reversal.. closing up...

[7/5/2003 12:59:12 PM] [hotto] DJ-30... then following through on 7/2.. to close at highs... the Monster + tick day.

[7/5/2003 12:59:54 PM] [hotto] DJ-30.. note that on 7/3.. it sagged.. but held.. right at ma10.

[7/5/2003 1:00:20 PM] [hotto] the Volume / OBV pattern is Positive for the week..

[7/5/2003 1:00:35 PM] [hotto] Allowing the Argument to continue..

[7/5/2003 1:01:26 PM] [hotto] Reminder.. we have discussed the lack of "sky is falling " Bears.. for the last Month... as a source of Volatility for the mkts..

[7/5/2003 1:02:10 PM] [hotto] We expected that the mid-day dips would be deeper.. until hitting good supports... to bounce from...

[7/5/2003 1:02:32 PM] [hotto] Lack of Bears will do that... produce the Whippy days we have seen..

[7/5/2003 1:03:34 PM] [hotto] The market needs to Shake off traders / investors regularly.. to keep loose money nearby.. so when it turns up again.. there will be buyers again to chase...

[7/5/2003 1:03:45 PM] [hotto] Sorry.. but that's how it works.

[7/5/2003 1:05:03 PM] [hotto] Back in April... the DJIA was NOT giving us any help... with the decision on the IT RALLY...

[7/5/2003 1:05:29 PM] [hotto] the NHB struck out to new Rally Highs.. well before the DJIA.

Rally...

[7/5/2003 1:06:56 PM] [hotto] sent the OBV soaring to well over the December highs..

[7/5/2003 1:08:32 PM] [hotto] Since Many medium / large Traders / and Hedge Funds use the SPY as a fast way to commit Many \$\$ to the market .. the OBV has been very reliable for me.. over the last few years..

[7/5/2003 1:09:13 PM] [hotto] the SPY.. OBV in March Really opened my eyes to BIG possibilities.. for after the Iraq war...

[7/5/2003 1:10:03 PM] [hotto] bUt... as with any one Indicator.. we looked at Many others.. in April.. for confirmation... day by day.. of the "health" of our IT RALLY.

[7/5/2003 1:11:03 PM] [hotto] SPY.. note the nice Pos Reversal on 7/1.. like in the other 2 Avgs.. even showed us a nice Bullish Engulfing Candle.

[7/5/2003 1:11:48 PM] [hotto] with Big Volume.. then Followed through on 7/2.. to upside.. and well over the consolidation area of the last week.

[7/5/2003 1:12:29 PM] [hotto] The H/ L on both NYSE and NAz recovered well on 7/2 and 7/3..

[7/5/2003 1:13:01 PM] [hotto] New Highs were lower on 7/3.. but it was a shorter day.. and a down day.

[7/5/2003 1:13:35 PM] [hotto] All in all... we come into the next week with a corrected IT RALLY...

[7/5/2003 1:14:35 PM] [hotto] It corrected from the MOMO peak on 6/17.. for 10 days.. to tag the Lwr BB.. on an ABC type PB.. now.. jumped back Over the B..

[7/5/2003 1:14:59 PM] [hotto] Can it continue higher ? Sure.. maybe.. Not up to me...

[7/5/2003 1:15:21 PM] [hotto] BUT... I have what I want !.. a corrected IT RALLY...

[7/5/2003 1:15:45 PM] [hotto] coming into a week with plenty of Positive Catalysts just ahead...

[7/5/2003 1:16:35 PM] [hotto] so.. I can go back to the SAme old SOng... that got me portfolio gains of nearly 140% since April 1..

[7/5/2003 1:17:06 PM] [hotto] That is... Buy Stocks with good charts.. with Buy Sigs..

[7/5/2003 1:17:34 PM] [hotto] and look to sell them at Targets.. or.. on Stops violations.

[7/5/2003 1:18:16 PM] [hotto] I will play it closer... than I did in May.. and June - before the MOMO peak... 6/17...

[7/5/2003 1:19:06 PM] [hotto] I will be using my stops now.. AND.. As I discussed last Saturday... Watch for Stalling... as defined ...

[7/5/2003 1:19:21 PM] [hotto] to preserve as much Profit as possible.

[7/5/2003 1:20:32 PM] [hotto] NHB.. one last comment.. on the 7/3 action.

[7/5/2003 1:21:24 PM] [hotto] DJ-30.. see how it closed "just over " ma10...and well above the 7/2 Open..

[7/5/2003 1:21:59 PM] [hotto] NHB.. note the Close was very high up the 7/2 Candle...Well over ma10...

[7/5/2003 1:22:18 PM] [hotto] that Really caught my attention Thursday night.

[7/5/2003 1:22:51 PM] [hotto] NHB is Very sensitive to both Ups AND Downs in the market..

[7/5/2003 1:23:35 PM] [hotto] AFter the action on Wed.. I was prepared for NHB to rip out the Lows all by itself... Leading us down into next week...

[7/5/2003 1:24:01 PM] [hotto] Instead... NHB held nearer the Highs than the others !

[7/5/2003 2:35:38 PM] [hotto] ok.. on to PCFs.

[7/5/2003 2:36:31 PM] [hotto] This club started.. back in November.. when I posted the KR63 PCF... See Reports..

[7/5/2003 2:37:57 PM] [hotto] KR63 helped to Signal the bottom last October.. gave a record 114 63day Pos Key Reversals..on 10/10

[7/5/2003 2:47:22 PM] [hotto] so.. we were able to catch the 12/2 top... and trade it ok... not "good".. just "ok"

[7/5/2003 2:47:43 PM] [hotto] KRN63 ' Use after an Intermediate Term Rally (like now).. to Identify potential early Downside Reversal Leaders.

[7/5/2003 2:48:12 PM] [hotto] Will come about from Distribution by Insider Sales or Big Holders Selling. Useful on significant ST

[7/5/2003 2:48:32 PM] [hotto] Market Tops.. like 6/6/03 or 6/17/03..to identify stocks ready for ST declines.

[7/5/2003 2:49:23 PM] [hotto] The market will have to be near ST RALLY Highs.. to produce many KRN63s

[7/5/2003 2:50:04 PM] [hotto] Note.. there is a Paper.. discussing Key Reversals in general... on Hotto Club Discussions

[7/5/2003 2:54:21 PM] [hotto] ok... those are the Intermediate -Term (IT) level PCFs...

[7/5/2003 2:54:46 PM] [hotto] for normal... DAY-to day... Stock finding...

[7/5/2003 2:55:09 PM] [hotto] KR2 ' Use after a dip during the day... followed by a Positive Reversal into the close...

[7/5/2003 2:55:24 PM] [hotto] or sometimes just a Recovery following an earlier dip...will allow Leading Stocks to emerge to upside.

[7/5/2003 2:56:01 PM] [hotto] KR2 will give TOO many candidates every day...

[7/5/2003 2:56:49 PM] [hotto] So... Use the PPC66 Sort PCF.. just as discussed for other PCFs.. (See Bum50b Paper.. for Theory and Strategy)..

[7/5/2003 2:57:38 PM] [hotto] Just pick off the Strongest stocks... with brand new KR2 's .. THE more UPSide MOMO... the better.. anytime you go Long.

[7/5/2003 3:00:13 PM] [hotto] I never did add much theory to KR2 paper... But.. If you read the Other KR... type papers... you will get the Idea.

[7/5/2003 3:01:07 PM] [hotto] KR2.. has been a joy to work with during the "self-correcting" IT Rally...

[7/5/2003 3:02:05 PM] [hotto] Remember.. Every time the prior LOD is taken out... and THEN.. a Pos Reversal to Over yesterday's HOD.. with an Up Close... on good Vol....

[7/5/2003 3:02:35 PM] [hotto] The Rally "clock" has started over...!.. you have a New Buy sig... at least good for a day or 2..

[7/5/2003 3:03:22 PM] [hotto] Using KR2.. during the normal days of the IT Rally... allowed good entries.. good profits

[7/5/2003 3:03:54 PM] [hotto] and.. gave me Rule 1... GET the DIRECTION Right.

[7/5/2003 3:04:21 PM] [hotto] KRN2 came next...

[7/5/2003 3:04:25 PM] [hotto] KRN2 ' Use after a pop during the day... followed by a Negative Reversal into the close...

[7/5/2003 3:04:40 PM] [hotto] or sometimes just a Sag following an earlier pop... will allow Weaker Stocks to emerge to downside.

[7/5/2003 3:05:50 PM] [hotto] click "Clubs / hotto / Reports / KRN2Hotto PCF" ... a short paper...

[7/5/2003 3:07:06 PM] [hotto] I posted it on 5/18... just as I expected a ST PB i markets...

[7/5/2003 3:08:17 PM] [hotto] PPC62 has become PPC66 by today..

[7/5/2003 3:08:29 PM] [hotto] C / (C66 + .0001) ' PPC66 PCF - for sorting... to bring stocks to Top based on

[7/5/2003 3:08:40 PM] [hotto] PPC gains since March 31, 2003.

[7/5/2003 3:08:52 PM] [hotto] PPC = " Price Percent"...

[7/5/2003 3:09:28 PM] [hotto] All these PCFs.. are simple...

[7/5/2003 3:10:10 PM] [hotto] It is the matching them .. correctly to the market we just had today.. or last couple days...

[7/5/2003 3:10:33 PM] [hotto] that allows using them to stay in tune... for ST trades.

[7/5/2003 3:10:54 PM] [hotto] Bum50b PCF ' Use after a ST PB.. like on 6/23 to 6/25.. to pick up IT Rally Strong Stocks.. that had solid ST PBs... 3 to 5 days...

[7/5/2003 3:11:08 PM] [hotto] enough to get down to the ma50. Use in conjunction with PPC66 Sort.. to bring the Stocks with most IT

[7/5/2003 3:11:19 PM] [hotto] momentum to the top of the Watchlist. We had several good bouncers using Bum50b.

[7/5/2003 3:13:02 PM] [hotto] click "Clubs / hotto / Discussions / Bum50b Hotto PCF" ... posted update on 6/28/03..

[7/5/2003 3:13:52 PM] [hotto] the Paper is pretty detailed.. and tells how to use the PPC62 (now PPC66) Sort.. to get the BEST stocks.

[7/5/2003 3:14:42 PM] [hotto] we want a Good snappy Rubber Band.. Pulled Well away from the Normal Position.. for a Good Snap-back

[7/5/2003 3:15:01 PM] [hotto] Bum200 PCF ' Use after a deeper PB.. like on 6/27 to 7/1/03.. Again.. use in conjunction with the PPC66 Sort.

[7/5/2003 3:16:10 PM] [hotto] CAution.. with Bum200... as said on the paper.. By the time a stock sags all the way to ma200.... it may have developed REAL Technical or Fundamental Problems...

[7/5/2003 3:16:57 PM] [hotto] so.. pay attention to OBV.. and Volume... as well as possible Overhead Resistance shelves that may have developed...

[7/5/2003 3:17:15 PM] [hotto] Easy Headroom is key on these Snap-back rallies.

[7/5/2003 3:21:50 PM] [hotto] TraderGeorge wrote : Aren't there stocks making new year highs even in down markets? Plan A1 is useful only in an overall uptrend?

[7/5/2003 3:22:48 PM] [hotto] It is always a matter of matching strategies to market conditions..

[7/5/2003 3:23:40 PM] [hotto] The Targets we discuss for "PlanA"s.. may or may not work... once the IT Rally gives up... and we fall back.

[7/5/2003 9:13:42 PM] [JayW] hey hotto
[7/5/2003 9:13:53 PM] [MarcoPolo] Hotto Sometime when you are up to it would like to hear your thoughts on the prerequisites for transitioning to full time trading. i.e. account size, your thoughts when you made the transition, if you had to do it again what would you differently, ect..
[7/5/2003 9:14:27 PM] [hotto] George - what stock was it that we were going to do OBV on?
[7/5/2003 9:14:41 PM] [TraderGeorge] I believe it was DCLK.

ClubHome

[7/5/2003 9:14:54 PM] [hotto] yes thanks.. DCLK
[7/5/2003 9:17:12 PM] [hotto] DCLK - I used Zoom -2 to get over a year of data.
on daily.. want to see generally how OBV is shaping up with the Rally
[7/5/2003 9:18:40 PM] [hotto] from that long view.. DCLK looks to be under
Accumulation since Last year...
[7/5/2003 9:19:27 PM] [hotto] and the Accum picked up since the March Impulse
Rally in 2003... that kicked off the IT Rally.
[7/5/2003 9:20:27 PM] [hotto] Zoom - 3... OBV had a Low in early October , 2002..
right in tune with the market.
[7/5/2003 9:21:25 PM] [hotto] then.. note the accum in late October... then Flat
OBV during November..even December...
[7/5/2003 9:22:24 PM] [hotto] see how the OBV stayed about flat... right through
the selloff into late DEecember..
[7/5/2003 9:22:54 PM] [hotto] Then.. another clear Accum rally in early January..
[7/5/2003 9:24:09 PM] [hotto] finally, DCLK held in ok... volume slowed int the
Feb.. early Mardh declines.. DCLK did not collapse..
[7/5/2003 9:25:35 PM] [hotto] DCKL rallied with the Mket in March... OBV picked
up.. then Surged in April... when the YHOO earns report came out...and YHOO
gave guidance..indicating that Advertising was picking up...
[7/5/2003 9:26:10 PM] [hotto] DCLK... that was 4/10 and 4/11..
[7/5/2003 9:27:31 PM] [hotto] Note how on 4/14 and 4/15.. some PT came int.. but
buyers supported the stock.. it never dipped below ma20 during April.. after the
YHOO news..
[7/5/2003 9:28:34 PM] [hotto] DCLK continues steady accum right up to the June
peak.. OBV confirmed the Price High on 6/2/03.
[7/5/2003 9:29:35 PM] [hotto] DCLK... so.. we now have that important date to
measure from... for behavior in the Correction.. to follow the big rally.
[7/5/2003 9:30:58 PM] [hotto] DCLK had an ABC PB into 6/17.. a sharp down day
on 6/17.. Heavy Volume.
[7/5/2003 9:32:21 PM] [hotto] since that PB Low in OBV.. DCLK had accum for
about 2 weeks.. OBV got back up to a new High.. even while Price stayed below
ma20...
[7/5/2003 9:33:00 PM] [hotto] that's what I always refer to as "accumulation under
cover".. hiding below ma20.
[7/5/2003 9:34:06 PM] [hotto] then.. note at End -qtr.. DCLK was sold off.. big vol
down day.. but...again OBV held well above the low dips..
[7/5/2003 9:34:38 PM] [hotto] and.. also price held above prior lows.
[7/5/2003 9:35:55 PM] [hotto] now in early July.. accum takes over again.. and
OBV has run back up to the Highs. while the stock price is still well below the
June peak..
[7/5/2003 9:36:40 PM] [hotto] MACD 12.26.9... has now moved above 0... and the
Histogram is Positive.
[7/5/2003 9:37:43 PM] [hotto] my guess. is DCLK Traders and Investors are
looking forward to the YHOO Earns.. on Wed.. remembering what happened back
in April.. last time YHOO reported..
[7/5/2003 9:38:44 PM] [hotto] DCLK has formed that "inside Base" from 6/12 to
now.. High =10.22..
[7/5/2003 9:39:19 PM] [hotto] Thursday.. DCLK just peeked over the 6/12 top.. to
10.24.
[7/5/2003 9:39:42 PM] [hotto] Volume was "slow" 1.2M sh..
[7/5/2003 9:40:26 PM] [hotto] DCLK is now poised.. at the top of the "inside base"
with OBV at Rally Highs.. and Price just under Up BB.

[7/5/2003 9:41:05 PM] [hotto] IF it can get a spark over next few days.. DCLK is ready to make a new leg up.

[7/5/2003 9:41:14 PM] [hotto] The end.

[7/5/2003 9:41:42 PM] [hotto] is everyone asleep ?

[7/5/2003 9:41:53 PM] [TraderGeorge] To the contrary!

[7/5/2003 9:42:04 PM] [JayW] no way, glued to my screen

[7/5/2003 9:42:05 PM] [MarcoPolo] first target 11.00?

[7/5/2003 9:42:06 PM] [Pilot1938] I thought it was a great presentation on the use of OBV

[7/5/2003 9:42:06 PM] [hotto] I warned you.. it would be "agonizing"... LOL

[7/5/2003 9:42:16 PM] [InanOut] Super glued

[7/5/2003 9:42:20 PM] [trading4wealth] Hi hotto! I would also be interested in your response to Marco, now that I took the leap 13 months ago. I would also be interested in how you manage your risk in relation to the % of capital in day trading vs. swing trades or other longer term periods that may have IRA funds.

[7/5/2003 9:42:21 PM] [Dennis4Cash] not in your life Hotto, good to review

[7/5/2003 9:42:24 PM] [TraderGeorge] Not agonizing, spellbinding.

[7/5/2003 9:42:29 PM] [Iars] TY. Are you using moving average to smooth out the OBV?

[7/5/2003 9:42:36 PM] [LeelaHula] no ... just mesmerized. I never think to notice so many things on one chart ... great

[7/5/2003 9:42:54 PM] [CDYTrader] Great example. Answered a lot of questions for me!

[7/5/2003 9:43:16 PM] [InanOut] That is teaching at it's best, ST.Hotto

[7/5/2003 9:43:18 PM] [PJG4TH] great stuff

[7/5/2003 9:43:21 PM] [charlesd] Hotto I too like DCLK, but would like to know why you picked this stock.

[7/5/2003 9:43:22 PM] [hotto] NO I NEVER "smoooth" OBV..! I am looking right at Buyers and Sellers.. I don't want them smoothed..

[7/5/2003 9:43:29 PM] [andromoda54] Thx Hotto for a great presentation.You are great.

[7/5/2003 9:43:53 PM] [Athen] ty Hotto!

[7/5/2003 9:43:56 PM] [JayW] do you use OBV on intraday charts?

[7/5/2003 9:44:16 PM] [hotto] TraderGeorge asked a specific question about the DCLK OBV vs Price.

[7/5/2003 9:45:22 PM] [hotto] I thought... everyone should get to think along with me.. for a whole study... While we followed the Buyers and Sellers... through Rallies and Pullbacks.

[7/5/2003 9:45:53 PM] [CDYTrader] Why do you use a moving average on OBV on your chart?

[7/5/2003 9:46:00 PM] [hotto] AND .. esp... for how the "accum under cover" during a basing period..

[7/5/2003 9:46:19 PM] [hotto] Hi CDY.. nice to see you.

[7/5/2003 9:46:24 PM] [CDYTrader] ty

[7/5/2003 9:46:35 PM] [Dennis4Cash] Hotto, the more I see of OBV, the more I like it!

[7/5/2003 9:46:44 PM] [MasterC] evening hotto if u have time could you please teach us also on how to do foldover targets please

[7/5/2003 9:47:17 PM] [MarcoPolo] Yes learning how you organize and your methodology is extremely helpful.

[7/5/2003 9:47:31 PM] [hotto] I put ma6 on the OBV.. after a discussion with another Experienced Trader.. who insisted that I would find value in the ma6 on

ClubHome

OBV..

[7/5/2003 9:47:35 PM] [InanOut] Extremely!

[7/5/2003 9:48:08 PM] [hotto] so far.. it has not added to my analysis... but.. I will continue to watch..

[7/5/2003 9:48:50 PM] [hotto] I studied TSV for over 2 years .. and BOP... and MS...

[7/5/2003 9:49:37 PM] [hotto] MS is good... but... since it is proprietary... and not supported in PCF formulas anyway... there is no benefit to me..

[7/5/2003 9:49:53 PM] [Dennis4Cash] Hotto, how much value do you place on positive divergence in OBV as we have right now in DCLK?

[7/5/2003 9:49:53 PM] [Dennis4Cash] Hotto, how much value do you place on positive divergence in OBV as we have right now in DCLK?

[7/5/2003 9:49:53 PM] [Tarpon] hotto, do you find BOP to be a useful indicator? thanks

[7/5/2003 9:50:16 PM] [hotto] 4 other services that I am aware of support Scanning for OBV..

[7/5/2003 9:50:38 PM] [hotto] I subscribe to 3 of those services..

[7/5/2003 9:51:01 PM] [hotto] Stockcharts.com is the one connected to John Murphy..

[7/5/2003 9:51:03 PM] [InanOut] Would you mind sharing those other 4? or 3?

[7/5/2003 9:51:40 PM] [hotto] IQCHARTS.. is my "other" RT data service.. I always need a backup..

[7/5/2003 9:52:12 PM] [hotto] IQCHARTS supports. EOD scans.. (Incl.. OBV and some others)

[7/5/2003 9:52:30 PM] [Jean16] Hotto, are you using a simple ma6 for OBV?

[7/5/2003 9:52:34 PM] [hotto] TC-Companion recently added OBV support..

[7/5/2003 9:52:56 PM] [hotto] I am currently testing TC-Companion.. looks good so far

[7/5/2003 9:53:28 PM] [hotto] sorry.. I can't remember the 4th service... It did not come close to Stockcharts.com..

[7/5/2003 9:53:38 PM] [InanOut] Thanks

[7/5/2003 9:53:50 PM] [Traderabe] For those interested in Hotto's chart settings please copy his chart and click edit...you'll see it all

[7/5/2003 9:53:56 PM] [hotto] Stockcharts.com has by Far.. the widest array of Scanning support.

[7/5/2003 9:54:13 PM] [JayW] is anybody using Ameritrade's Advanced Analyzer?

[7/5/2003 9:54:16 PM] [hotto] Jean... hi.. yes... sma6 on OBV

[7/5/2003 9:54:27 PM] [jump85ft] TEST

[7/5/2003 9:55:16 PM] [hotto] Dennis... I place value int the Pos OBV divergence...

[7/5/2003 9:55:20 PM] [Jean16] thank you Hotto-thought I could use it for intraday entry to show above average OBV

[7/5/2003 9:55:27 PM] [Jean16] thanks for your help!

[7/5/2003 9:56:15 PM] [hotto] But.. remember.. my theory. on OBV.. It is never a Buy Sig... just a Supporting Background condition..

[7/5/2003 9:56:24 PM] [MarcoPolo] In setting up your OBV scans do you have a favorite look back period?

[7/5/2003 9:56:53 PM] [Jean16] yes thanks again :)

[7/5/2003 9:56:57 PM] [hotto] Big buyers have been sniffing around DCLK for months.. buying the dips... expecting good things to come.

[7/5/2003 9:57:27 PM] [hotto] Now.. All I need is a Price Trigger.. for a Buy Sig...

[7/5/2003 9:58:06 PM] [Dennis4Cash] 10.25 Hotto?

ClubHome

[7/5/2003 9:58:09 PM] [hotto] A clear BO over that Inside base.. say 10.27 +... will have me taking a starting posn..

[7/5/2003 9:58:29 PM] [hotto] 10.25 may be ok.. from the 6/12 HOD

[7/5/2003 9:58:36 PM] [JayW] will volume influence your buy sig?

[7/5/2003 9:59:21 PM] [hotto] 10.25 + will put us over the Upr BB.. and in line to try the 6/2 High.

[7/5/2003 10:00:05 PM] [Dennis4Cash] not much headroom Hotto

[7/5/2003 10:00:37 PM] [hotto] Jean.. yw.. not sure how to use it..as yet.. the ma6...I am still studying it.

[7/5/2003 10:01:05 PM] [Jean16] yea i was looking for one more indicator and this looks promising

[7/5/2003 10:01:11 PM] [MWid] Evening Hotto, just back from Home Depot...playing catchup.. you mentioned above that you liked MS but it wasn't supported in PCF's. I believe it is supported, but not in the function list. It is listed in the TCNet.htm help files under Personal Criteria\Function list... Great OBV presentation!

[7/5/2003 10:02:18 PM] [hotto] Marco.. I always customize my OBV Scans.... to Line up with Swing Highs or Swing Lows on the Stock Price.. or the SPY Price Swings..

[7/5/2003 10:03:08 PM] [hotto] The Positive OBV Divergence Lists that i posted back in April... were based on SPY Swing Price points...

[7/5/2003 10:03:37 PM] [MarcoPolo] Your discussions today re your PCF's help me understand how you customize your scan thabk you!!

[7/5/2003 10:03:56 PM] [Tarpon] hotto, I tried to find a discussion of BOP in the club logs, but without success. Has there been any? thx

[7/5/2003 10:04:20 PM] [hotto] so.. the general answer is.. NO.. favorite Look-back period.. I just Read the charts.. They tell me how many days to use.

[7/5/2003 10:05:46 PM] [hotto] JayW... YES Volume.. Is very important to me !.. I can show you many studies... of how.. Price usually moves higher one more day...after An Increasing Vol Up day.. in the Stock...

[7/5/2003 10:07:23 PM] [hotto] NOte on the charts I went over today.. the ones I highlighted.. All had Incr Volume.. on Thurs... OR.. VERY close to Wed Vol... but .. then I am nervous... allowing the vol to be lower due to short mkt day..

[7/5/2003 10:08:07 PM] [hotto] Refer back to my logic earlier.. today.. answering that Short -day question.. for someone... Best to NOT make excuses...

[7/5/2003 10:08:41 PM] [hotto] There are PLenty of stocks.. that had True.. Incr Vol Up days on Thursday.. NO excuses..

[7/5/2003 10:09:53 PM] [hotto] MWid.. MS is usable.. to support a SORT in TCNet.. THAT is NOT Adequate... to do what is necessary!!!

[7/5/2003 10:10:48 PM] [MasterC] How should the next move be interpreted in the case of NITE based on OBV and Volume studies please Hotto?

[7/5/2003 10:11:13 PM] [hotto] Tarpon... hi... BOP is pretty much Random... It sometimes confirms // sometimes does not... I don't find it helpful.

[7/5/2003 10:12:33 PM] [hotto] NITE had a Clear HI-Vol BO on Thursday. NO doubt about it !

[7/5/2003 10:12:39 PM] [MWid] Hotto, on the MS issue, I'll look further and get back to you as I am under the impression that "MSx.x" can be used in PCF's. ;)

[7/5/2003 10:12:45 PM] [Jean16] APPX entry 7/3/03 10:00 am time frame using OBV crossing above ma6 and other indicators

[7/5/2003 10:13:01 PM] [hotto] well you will find it cannot.

[7/5/2003 10:13:05 PM] [Jean16] good for 2.5 pts

[7/5/2003 10:13:36 PM] [Jean16] no 1.5 pts sorry

[7/5/2003 10:13:40 PM] [hotto] I studied it.. I Pay the Wordens good \$\$ every Month for last 10+ years..

[7/5/2003 10:14:11 PM] [hotto] I have only asked them for 1 thing.. in all that time... OBV support in PCFs...

[7/5/2003 10:14:43 PM] [hotto] Now.. I am finding a way around them. Will let you know..

[7/5/2003 10:16:06 PM] [hotto] Several "Gurus" have attempted to improve on Joe Granville's OBV work.. over the years.. All have good points and bad points..

[7/5/2003 10:16:21 PM] [hotto] I have tried them all..

[7/5/2003 10:16:46 PM] [Zathrus] Hotto - do they ever answer your request for OBV?

[7/5/2003 10:16:46 PM] [Jean16] here's the simplest chart ever :D

[7/5/2003 10:17:15 PM] [Tarpon] I look at it from a distance. When it turns green or red suddenly, I pay attention, am just a little bit more careful

[7/5/2003 10:18:05 PM] [hotto] In the case of the Marc Chaikin attempt.. and the Larry Williams.. . at least they are not proprietary... We can understand the construction... and why they give different results..

[7/5/2003 10:18:22 PM] [hotto] NOT Better... Just Different.. same as MS..

[7/5/2003 10:18:50 PM] [hotto] enough.. I have been over and over this before..

[7/5/2003 10:19:06 PM] [WileyOne] Still curious about the value of MS vs OBV... on DCLK, MS is neg diverg and OBV is pos diverg ... comment?

[7/5/2003 10:19:39 PM] [hotto] The Wordens have the proprietary Indicators.. and want to support them... fine..

[7/5/2003 10:20:14 PM] [hotto] Peter Worden said once .. they will "probably" add OBV sometime..

[7/5/2003 10:20:23 PM] [Tarpon] the Williams %R?

[7/5/2003 10:20:41 PM] [hotto] every so often... I encourage Club members to ask for OBV in the PCFs..

[7/5/2003 10:20:41 PM] [Zathrus] Fact is hotto, you used to be just one user - now you are effectively 1000 or more users. We really ought to organize this and demand this feature

[7/5/2003 10:21:08 PM] [Dennis4Cash] I agree with Zath

[7/5/2003 10:21:16 PM] [hotto] Zath.. must be a lot of ego at stake.. We need TCNet.. at least...Now..

[7/5/2003 10:21:41 PM] [LeelaHula] me too ... sign me up

[7/5/2003 10:22:05 PM] [Zathrus] Egos the only thing that makes sense - otherwise it's a pretty bone-headed move

[7/5/2003 10:22:32 PM] [hotto] but.. if everyone.. can take the time.. send a message to Tech support... or Email.. POLitely... ask for OBV in PCF support...

[7/5/2003 10:22:46 PM] [hotto] I would appreciate it..

[7/5/2003 10:22:56 PM] [Dennis4Cash] it's done!

[7/5/2003 10:22:59 PM] [JayW] consider it done

[7/5/2003 10:23:08 PM] [tenc] I will send a note !!

[7/5/2003 10:23:12 PM] [TraderGeorge] Agree... politely. The Wordens have produced a great product. We should not ruffle any feathers.

[7/5/2003 10:23:21 PM] [MarcoPolo] Hotto Maybe not tonight but sometime when you are up to it would like to hear your thoughts on the prerequisites for transitioning to full time trading. i.e. account size, your thoughts when you made the transition, if you had to do it again what would you differently, ect..

[7/5/2003 10:23:26 PM] [stockseddie] Will do it!

[7/5/2003 10:23:35 PM] [MWid] I'm starting to get your drift on this one, Hotto. And I agree that the "open" indicators are much more useful to those that like to think

[7/5/2003 10:23:39 PM] [tenct] Yes Politely but we should all request

[7/5/2003 10:23:48 PM] [Zathrus] Ruffle feathers! They are CHARGING US FOR THIS SERVICE!

[7/5/2003 10:24:03 PM] [hotto] thank you... Remember.. OBV helped ME.. to Help many.. in April.. to go Long the IT Rally...

[7/5/2003 10:24:25 PM] [hotto] I had to use Stockcharts.com to do the Research..

[7/5/2003 10:24:40 PM] [hotto] It is such a simple thing..

[7/5/2003 10:24:57 PM] [hotto] enough... Back to NITE....

[7/5/2003 10:26:37 PM] [hotto] ok..NITE is now working back up the down slope from Jan - Feb 2002..

[7/5/2003 10:28:18 PM] [hotto] targets at 9.20...10.05 - 10.50...11.25..12.00...13.65..

[7/5/2003 10:28:47 PM] [hotto] NITE will be a fun... and profitable play.. now that Traders are Back..

[7/5/2003 10:28:48 PM] [Jean16] NITE smart scan and how about the volume surge thursday--earnings/growth

[7/5/2003 10:28:55 PM] [Zathrus] Hotto - on a stock like this do you use the top of the gap as a stop?

[7/5/2003 10:30:11 PM] [hotto] I would buy at the top lip... about 7.50.. then.. use half-way down as a stop

[7/5/2003 10:30:40 PM] [Zathrus] thnx - always tricky business buying one of these

[7/5/2003 10:31:07 PM] [hotto] Actually... If I buy this... It will be hard to shake me off..

[7/5/2003 10:31:41 PM] [hotto] that 12 M sh Breakaway gap... is Unmistakeable...

[7/5/2003 10:31:50 PM] [MarcoPolo] Hotto the investor..

[7/5/2003 10:32:06 PM] [hotto] the only thing tricky about NITE.. to me... is buying it well..

[7/5/2003 10:32:19 PM] [Zathrus] Hey - that 12M share buy was me - just a typo - pay it no mind :)

[7/5/2003 10:32:29 PM] [Jean16] 10-15c versus 4c =D

[7/5/2003 10:32:47 PM] [Jean16] ride this thing like man o war

[7/5/2003 10:32:55 PM] [JayW] avg 1.3M

[7/5/2003 10:33:16 PM] [hotto] my 1st buy will be about 2/3 normal size.. then... carry with stop at bottom of gap -.05

[7/5/2003 10:33:34 PM] [hotto] Not recommending it for everyone..

[7/5/2003 10:33:47 PM] [hotto] Just telling you what I will do.

[7/5/2003 10:34:28 PM] [Zathrus] On a stock like this, if it doesn't pull back to the lip, do you just forget it, or try to find a different strategy?

[7/5/2003 10:34:31 PM] [hotto] NITE will be at 13.65 by December.. I think.. may be a rough ride.

[7/5/2003 10:35:03 PM] [hotto] I will look for some entry.. to get a toehold..

[7/5/2003 10:35:24 PM] [hotto] Monday.. may depend on the market.

- [7/5/2003 11:04:57 PM] [Zathrus] might still be handy to display it all the time though LOL
- [7/5/2003 11:05:17 PM] [InanOut] The question is can we have the zoom spelled out on our non-shared charts, say right behind daily?
- [7/5/2003 11:05:26 PM] [TeachMe] maybe..but on the other hand it wud be convenient when u r scanning charts to have it on imo
- [7/5/2003 11:06:00 PM] [Zathrus] I'd like it if the darned PCFs would adapt based on the setting - make it easy to do weekly stuff
- [7/5/2003 11:06:54 PM] [TeachMe] i'd like a date parameter for pcfs ..have been asking for one almost 2 years ..for convenient backtesting
- [7/5/2003 11:08:34 PM] [Zathrus] Now teachme, what does that have to do with TSV or MS? :)
- [7/5/2003 11:08:37 PM] [CDYTrader] For anyone who wants to search the hotto chat logs, Monkeycat has put together a zip file of the hotto chat logs from 12/1/2002 to 4/27? (not sure of April date). It makes it a lot easier to search. You can go to his club "Setups and Early Warnings" and go to "Links"...last item on the page.
- [7/5/2003 11:10:02 PM] [TeachMe] Zath..I just cam on ..so must read up on the thread re TSV/MS discussion..but it is generic to all pcf backtesting
- [7/5/2003 11:10:02 PM] [InanOut] Thanks CDY, for the info, big help, and thanks

[7/5/2003 11:10:30 PM] [TraderGeorge] Teach, if you want the Zoom setting to show up as part of the title of the chart you must type it in after the word "Name" in the window Editing Chart Template, which you get to by typng the letter "I" with the chart in front of you.

[7/5/2003 11:10:54 PM] [Zathrus] sorry teach - we were just grousing earlier about why the wordens don't do a lot of things - no real useful discussion...sorry

[7/6/2003 12:21:21 AM] [TCNut] win 98 is a nightmare.....only benefit of it was learning.....sooo much bec always corrupt....somehow

[7/6/2003 12:21:28 AM] [ken2k] but absolutely correct.. must be careful about what you turn off

[7/6/2003 12:31:03 AM] [ken2k] you like xp over 2k?

[7/6/2003 12:33:24 AM] [TCNut] and don't upgrade.....you will just bring all the nightmares right along with you.....Win98....was intended to be used on smaller hard drives of the past...(FAT32 file system)....XPness used FAT32....however, NTFS file structure is much more stable...XP....is the best of win98 and win2000...combined...with all the problems left behind

[7/6/2003 12:33:24 AM] [really] Has anyone run the c3/(c63+.0001). If you do it for the stock ONT, you ge 7.89. When I caculate 6/30 close divided by 4/3 close (1.25/.38 = 3.29) I get 3.29, not the 7.89 I see in the Anyone understand what I am doing wrong? I have tried c/c1 and the PCF and calculator answers are eq

[7/6/2003 12:33:31 AM] [MaxSteel] Anyone else suffering from withdrawl ... when the markets are closed f than 2 days ... I need to trade ...!!!

[7/6/2003 12:35:25 AM] [MaxSteel] Do they have special help for us ... maybe an online psychologist as p support???

ClubHome

[7/6/2003 12:36:05 AM] [TCNut] by the way....XPness...is the feelings of joy when you never have to worry about the nightmares of Win98 ever again

[7/6/2003 12:36:56 AM] [InanOut] :D:D max

[7/6/2003 12:37:11 AM] [MaxSteel] I've got win98 ...xP

[7/6/2003 12:37:25 AM] [TCNut] they should.....luckily Hotto allows me to stay in here and vent...:)

[7/6/2003 12:38:11 AM] [MaxSteel] Interesting ... the little face with the tongue hanging out ... the text symbol is a little spooky

[7/6/2003 12:38:46 AM] [MaxSteel] I just came back from the movies ... terminator 3 ... rise of the machine: the machine

[7/6/2003 12:38:48 AM] [InanOut] when you say get XP PRO and don't upgrade, what do you mean? If I have Win98 and I'm replacing it with Pro an uprgade?

[7/6/2003 12:39:59 AM] [TCNut] no....you can buy the upgrade....and it transforms your old system into winXP

[7/6/2003 12:40:08 AM] [TCNut] not true XPness

[7/6/2003 12:40:25 AM] [MaxSteel] how much for xp ???

[7/6/2003 12:41:05 AM] [MaxSteel] Will it work on a PII 450 ???

[7/6/2003 12:41:16 AM] [TCNut] feelings of XPness can only be achieved by buying a new hard drive....that's about a buck a gigabyte nowadays

[7/6/2003 12:41:41 AM] [MaxSteel] How much disk space is required?

[7/6/2003 12:41:47 AM] [InanOut] Ok, don't buy the upgrade, just buy XP pro and replace the 98, right?

[7/6/2003 12:42:38 AM] [TCNut] then install fresh XP.....and then pull off all the important data from your old hard drive.....then format it and use it for storage and backups

[7/6/2003 12:42:45 AM] [MaxSteel] Can I install over 98 ... or is it complete back/rebuild ... I don't want to lose anything?

[7/6/2003 12:43:23 AM] [TCNut] if you still have win98...your old hard drive is probably a tiny little fossil already

[7/6/2003 12:45:18 AM] [TCNut] I used partition magic...to make a 7 gigabyte partition...on my new hard drive...and I made one the exact same size on my old hard drive....

[7/6/2003 12:45:56 AM] [InanOut] Hey are you talking about my tiny little fossilized hard drive?

[7/6/2003 12:46:04 AM] [TCNut] so now...about once a month....i can use partition magic to create an exact copy of my XP Operating system

[7/6/2003 12:46:12 AM] [TCNut] for backup

[7/6/2003 12:47:30 AM] [TCNut] then I have my program files...on another partition....games on another....my favorites on another..ect....the operating system is isolated so if it gets corrupt....

[7/6/2003 12:48:07 AM] [TCNut] i just format that partition....and then copy....my backup right back onto my old hard drive

[7/6/2003 12:49:22 AM] [HOTTO] really has replied to: OBV discussions from Nov 2002

[7/6/2003 12:49:44 AM] [TCNut] Max...you have more of a chance losing things if you try to install over your old win98 system....just buy a new hard drive....and you can actually just leave your old hard drive unchanged

[7/6/2003 12:49:56 AM] [ken2k] partitioning also makes backups easier.. i have 3 partitions.. one for operating system.. one for programs.. one for data

[7/6/2003 12:50:21 AM] [TCNut] XP allows use of multiple operating systems....so just keep your old system untouched...and use it whenever you want

[7/6/2003 12:50:47 AM] [TCNut] you can choose which one to boot up from....any time

[7/6/2003 12:51:01 AM] [MaxSteel] thanks tc ... sounds like a plan ... I had not thought of that

[7/6/2003 12:51:28 AM] [InanOut] Wow, you are a genius.

[7/6/2003 12:52:03 AM] [TCNut] in maximum pc magazine.....they had a guy that configured his computer to have 15 different operating systems....all on separate partitions

[7/6/2003 12:53:38 AM] [TCNut] he could choose whatever one to boot up from....just after the bios posts. the next screen will come up...if you choose.....and go

[7/6/2003 1:16:26 AM] [TCNut] Heard rumors Condi Rice may run too
[7/6/2003 1:16:43 AM] [InanOut] Hotto that is,
[7/6/2003 1:17:16 AM] [MaxSteel] I actually don't follow the politics ... just happened to see the article from
[7/6/2003 1:17:52 AM] [MaxSteel] Hotto for govenor ... if I get a green card ... can I vote?
[7/6/2003 1:18:30 AM] [InanOut] You will fit right in
[7/6/2003 1:19:50 AM] [MaxSteel] I'm partial to the sun and the time difference ... anyone want an options
housemate ???

[7/6/2003 1:20:42 AM] [MaxSteel] Anyone here trade the QQQ
[7/6/2003 1:20:55 AM] [TCNut] some amazing computers...@ that gallery link i posted...looking at one right castle!....another one...is made out of that expanding weatherproofing foam....:D...looks like a big pile of cash
[7/6/2003 1:22:07 AM] [MaxSteel] TC ... if I give you my IP address ... can you login from there and fix my Firefox sounds like you know what you are doing ???
[7/6/2003 1:22:12 AM] [TCNut] been following the QQQ...not convinced it has been the one to play as of late
[7/6/2003 1:22:44 AM] [MaxSteel] I'm thinking QQQ range for the next few weeks ... 29-32
[7/6/2003 1:23:10 AM] [TCNut] just go buy a new hard drive and install XP on it....all your problems will be solved
[7/6/2003 1:23:19 AM] [MaxSteel] if so, I can get 10% in about 2 weeks ... 30% in 6 weeks with a little IV boost
[7/6/2003 1:24:03 AM] [MaxSteel] 100 % if we get a big IV boost ...
[7/6/2003 1:24:27 AM] [TCNut] you can keep your old system....but once you realize.....you will pull off all you want to save and want to format it and move on to a whole new world of computer enjoyment with no hassles
[7/6/2003 1:25:43 AM] [MaxSteel] Sound like that is what I should do ... I am sold on the idea ... I have a Dell R450 ... what size and model drive would you recommend ... I should probably bump the memory also
[7/6/2003 1:26:15 AM] [TCNut] all my virtual QQQ plays....have been flat....dilly dally around....not moving in either direction
[7/6/2003 1:26:25 AM] [MaxSteel] I once heard scuzzy and seagate were good models?
[7/6/2003 1:27:12 AM] [MaxSteel] flat QQQ ... sound great for short straddles, strangle or calendar spreads
condors
[7/6/2003 1:27:27 AM] [TCNut] they are a lot more cheap...since last time I looked in early June
[7/6/2003 1:27:54 AM] [MaxSteel] what kind of trade?
[7/6/2003 1:28:54 AM] [TCNut] think I was doing straddles.....that was probably the problem....need to just buy
[7/6/2003 1:29:07 AM] [TCNut] straddles and strangles
[7/6/2003 1:29:29 AM] [TCNut] it did not move enough to gain either way
[7/6/2003 1:29:40 AM] [MaxSteel] long straddles ... hard to make money unless you get a good move, or hedge
time decay until it makes the move
[7/6/2003 1:30:01 AM] [TCNut] need really volatile stocks for those
[7/6/2003 1:30:42 AM] [TCNut] been loving CHINA 7.50 June calls!
[7/6/2003 1:30:58 AM] [MaxSteel] I'm thinking QQQ ... 32/28 calendar spreads ... could do a 50lot for about
expected profit in 3-6 weeks from 10-30%
[7/6/2003 1:31:31 AM] [TCNut] thanks to hotto's recommendation....CHINA made up for all my initial mistakes
UNTD....last month
[7/6/2003 1:31:42 AM] [MaxSteel] if QQQ stays in the range ... if not ... cover and move on ...
[7/6/2003 1:32:52 AM] [MaxSteel] I hate it when that happens ... not so much the cash ... but the time ... I
always be moving forward ... hate that 1 step back part
[7/6/2003 1:33:09 AM] [TCNut] hoping ASIA 10\$ calls will pan out this week.....got 10 contracts for 300 buy
a week and a half ago
[7/6/2003 1:33:50 AM] [TCNut] have 2 weeks left....with little downside
[7/6/2003 1:35:09 AM] [MaxSteel] here's a suggestion ... sell the August 7.5 calls, and use the cash to buy
calls ...
[7/6/2003 1:36:24 AM] [TCNut] KKD July 45s....for .55...on 7-2-03....probably should have just sold them for
a quick 400 bucks profit....but got greedy....hope for one more spike next week
[7/6/2003 1:37:07 AM] [MaxSteel] You could ratio it at about 1:3 ... using someone's money
[7/6/2003 1:37:38 AM] [TCNut] vertical call spread....or back ratio?
[7/6/2003 1:38:39 AM] [MaxSteel] When ever I trade long ... I always find a way to sell some to hedge time
is the difference between 1 in 4 and 8 in 10 winners!!!
[7/6/2003 1:38:40 AM] [TCNut] well vertical would be opposite...right
[7/6/2003 1:39:21 AM] [TCNut] yeah...I have not done that yet.....am considering it on XING
[7/6/2003 1:39:41 AM] [TCNut] what play do you recommend for XING?
[7/6/2003 1:39:41 AM] [MaxSteel] call ratio back spread ... sell the 7.5 ... buy 2 or 3 10 calls ... usually work
with 1:6 or 1:10 as the ratio ... big dollars when they hit
[7/6/2003 1:41:18 AM] [MaxSteel] What is your price target ?

ClubHome

[7/6/2003 1:41:21 AM] [TCNut] also....I wanted to get in earlier....on XING....but open interest last week was zero...throughout...what do you do then....if you have hotto boosting confidence....and nobody else has a
[7/6/2003 1:42:00 AM] [TCNut] just put in order and hope someone bitesi guess..
[7/6/2003 1:42:13 AM] [MaxSteel] if open interest and volume is low ... you pay through the nose ... can eat away 30% on the bid ask
[7/6/2003 1:42:38 AM] [MaxSteel] I generally only look for high volatility
[7/6/2003 1:43:18 AM] [MaxSteel] I use tight limit orders ... sometimes I get market fills at great prices ... but only partial fills
[7/6/2003 1:43:54 AM] [TCNut] how many 7.50s do you sell
[7/6/2003 1:44:08 AM] [TCNut] only one...
[7/6/2003 1:44:29 AM] [TCNut] well....just example to show ratio....right
[7/6/2003 1:45:29 AM] [MaxSteel] If I thought xiong would xing to past 13, I would likely sell the 10, and buy August, but prefer Sept ... but that is a bad month, also you are correct bid/ask sucks
[7/6/2003 1:45:56 AM] [TCNut] yes....I only use really lowball limit orders....unless I get greedy....and things moving fast
[7/6/2003 1:46:01 AM] [MaxSteel] I control the size of my trade by risk ...
[7/6/2003 1:47:00 AM] [MaxSteel] I also use limit exits ... which I set immediately after I place the trade ... so intraday I get filled faster than I could act
[7/6/2003 1:47:09 AM] [TCNut] I have a lot to learn....but, options excite me very much....way less risk...as tell
[7/6/2003 1:48:09 AM] [MaxSteel] When I place a trade ... base capital is as required, but risk is 3% of my that is when I say "Hasta la Vista" ... at least when I am disciplined
[7/6/2003 1:48:31 AM] [MaxSteel] Options can generate 20
[7/6/2003 1:48:56 AM] [TCNut] good point.....last week my hesitation screwed up my SINA profits.....only lost 300 dollars...and should have made 1000...at least....then could not get back in or would have had to chase
[7/6/2003 1:49:15 AM] [MaxSteel] Options can generate 20% per month 8 out of 10 times ... then only need losses
[7/6/2003 1:49:40 AM] [MaxSteel] I like small runs batted in ...
[7/6/2003 1:50:43 AM] [MaxSteel] I think that the odds of getting the grand slam are 1 in 100 ... the odds of 20% base hit are more like 90% ... 9 20% vs 1 500% ... works for me
[7/6/2003 1:51:13 AM] [MaxSteel] This is a probability game ... even if all is perfect ... it can still fail
[7/6/2003 1:52:41 AM] [TCNut] need to go return some videos to avoid late fees...would you be willing to do presentation of some sort in Options 101?....perhaps on the greeks?
[7/6/2003 1:52:56 AM] [MaxSteel] I could never trade stock again ... options are more fun, less risk, more control and you can do things you could never do with stock
[7/6/2003 1:53:23 AM] [TCNut] or even here....not sure of hotto's opinion on options...though
[7/6/2003 1:54:23 AM] [MaxSteel] I would be happy to discuss the greeks or any other items of interest ... but option stuff is fun
[7/6/2003 1:54:51 AM] [TCNut] think about it :)....probably should have kept that as a PM....will be back in mins.
[7/6/2003 1:55:06 AM] [MaxSteel] I watched Hotto in action this week for the first time ... impressive ...
[7/6/2003 1:55:25 AM] [MaxSteel] later dudeB)
[7/6/2003 1:56:13 AM] [MaxSteel] If I could do what Hotto does ... I would not need options ... !!!
[7/6/2003 1:56:55 AM] [ken2k] how long have you been doing options?
[7/6/2003 1:57:18 AM] [HOTTO] bmweyrauch has replied to: OBV discussions from Nov 2002
[7/6/2003 1:58:36 AM] [MaxSteel] seriously for the past 2 years ... but I have now hit a wall ... I can't find any sources of options info ... it is all the same only slightly different form
[7/6/2003 1:58:48 AM] [Noname] max-have got any books you recommend on options?
[7/6/2003 1:59:39 AM] [MaxSteel] I have created a recommended book list in options 101 ... and the order of execution to read
[7/6/2003 1:59:59 AM] [Noname] thanx
[7/6/2003 2:00:10 AM] [MaxSteel] The first book is McMillan on Options ... every sentence has so much detail

need to understand it

[7/6/2003 2:00:16 AM] [TCNUT] i can give you the number to Charles Cottle's Desk.....maybe he can turn y some new sources....be back in a bit....video return run....

[7/6/2003 2:00:53 AM] [MaxSteel] alsocheck out optionsxpress ... education potion ... very well layed out s and primer .. a great place to start

[7/6/2003 2:02:12 AM] [MaxSteel] I got his e-mail and contact information ... we chatted ... but did not sugg anything new

[7/6/2003 2:03:19 AM] [InanOut] Max do you use Optionsxpress as a platform?

[7/6/2003 2:03:44 AM] [MaxSteel] If you have covered McMillan's stuff ... the rest is the same only worded ... sometimes a different or simpler way of thinking of it is what emerges for me now ...

[7/6/2003 2:05:02 AM] [MaxSteel] Yes onlytrade through Optionsxpress ... I think it is a great site ... works have tried other Cdn brokers ... but CDN options industry sucks big time ... they are way behind

[7/6/2003 2:05:49 AM] [InanOut] Thanks alot, I really needed to hear that.

[7/6/2003 2:06:27 AM] [InanOut] have got an account all ready to open just have to transfer funds in

[7/6/2003 2:06:51 AM] [ken2k] what is advantage of optionexpress?

[7/6/2003 2:07:04 AM] [MaxSteel] If you plan to go to Optionsxpress ... you will not be disapointed ... many resources, education, they understand margin ... etc

[7/6/2003 2:07:13 AM] [InanOut] never traded options before, so really didn't know but it seemed the best

[7/6/2003 2:07:26 AM] [MaxSteel] I have stillnot explored the entire site in as much depth as I would like

[7/6/2003 2:07:40 AM] [InanOut] have oco oders

[7/6/2003 2:08:04 AM] [InanOut] OCO orders

[7/6/2003 2:08:16 AM] [ken2k] oco ??

[7/6/2003 2:08:20 AM] [MaxSteel] They also have great order entry option ... contingent, one triggers othe ... etc

[7/6/2003 2:08:56 AM] [MaxSteel] they also have a paper trading section ... so you can practice without ge ... when comfortable do it with real money

[7/6/2003 2:09:20 AM] [InanOut] One cancels other

[7/6/2003 2:09:21 AM] [MaxSteel] one cancels other

[7/6/2003 2:09:30 AM] [ken2k] ty

[7/6/2003 2:09:38 AM] [MaxSteel] example ...

[7/6/2003 2:10:28 AM] [InanOut] like one triggers other

[7/6/2003 2:10:40 AM] [MaxSteel] fixed cash ... there are 2 plays you want to try ... but only on a breakout breakout, cancel the other

[7/6/2003 2:10:57 AM] [InanOut] yes

[7/6/2003 2:11:08 AM] [MaxSteel] They seem also to be advancing with respect to these items at the requ traders

[7/6/2003 2:11:56 AM] [ken2k] what are costs / commissions?

[7/6/2003 2:14:01 AM] [MaxSteel] If you are not familiar with options ... suggest the learning centre in optic make a list of the topics covered ... then go to McMillan on Options next ... practice with paper trading ... I about 50 trades per month for the past 2 years ... some real and some on paper ... I am now at the point w not think about the money ... just mechanically execute ... it gives me an edge ...

[7/6/2003 2:14:30 AM] [MaxSteel] when I think about the money ... I usually regret my decision

[7/6/2003 2:15:23 AM] [MaxSteel] no costs ... no minimum deposit to open, min 2k to trade ... comissions . per leg

[7/6/2003 2:15:52 AM] [MaxSteel] 1.5 per contract after that

[7/6/2003 2:16:05 AM] [InanOut] I will follow in your footsteps, thanks,

[7/6/2003 2:16:33 AM] [InanOut] might have to consult from time to time

[7/6/2003 2:16:51 AM] [MaxSteel] the best rate available is Interactive brokers for \$1 per contract ... the di IMO is insignificant

[7/6/2003 2:17:01 AM] [InanOut] is that a reasonable price for the commissions?

[7/6/2003 2:17:23 AM] [MaxSteel] they also have volatility tools and charting there ... it is crude but it is the

[7/6/2003 2:41:16 AM] [MaxSteel] Maybe that is why they use Greeks to describe options risk ???

[7/6/2003 2:53:02 AM] [TCNut] you can easily save your data.....just direct it to a different place in your M: folder for instance

[7/6/2003 2:53:11 AM] [TCNut] then import it when done

[7/6/2003 2:53:20 AM] [ChartMonkey] the thing is - once i let the new cd update my files and apparently in files instead of tcnet files, i could no longer start tcnet - it just gave me a run time error

[7/6/2003 2:53:39 AM] [TCNut] File Menu....backup restore ...option

[7/6/2003 2:53:51 AM] [MaxSteel] Gamma ... is the rate of change of delta with respect to the underlying p ... or the second partial derivative ... or the rate of change of the rate of change

ClubHome

[7/6/2003 2:53:53 AM] [ChartMonkey] been there done that - don't think that's the problem
[7/6/2003 2:54:38 AM] [ChartMonkey] beginning to think the programming talent at tc is the problem actual rather they focus on bulletproofing installs and reliability vs. piling more features on
[7/6/2003 2:55:20 AM] [MaxSteel] maybe bulletproofing could be a new feature?
[7/6/2003 2:55:24 AM] [ChartMonkey] heh.
[7/6/2003 2:56:18 AM] [MaxSteel] Theta ... rate of change of the option price with respect to time ... more | derivatives
[7/6/2003 2:56:27 AM] [TCNut] pke aroun...chartmonkey...and copy your backups folder...and paste it som safe before you do anything else!....i will give you the map to the folder....if you can not find it
[7/6/2003 2:56:41 AM] [joseph1] cm i agree..have several problems which they shrug off and don't want to
[7/6/2003 2:56:41 AM] [MaxSteel] Vega ... rate of change of option price with respect to a change in volatili
[7/6/2003 2:57:09 AM] [ChartMonkey] oh i have been burned before TCNut - copying my backups folder a away my tc2000 folder was going to be my next step.
[7/6/2003 2:57:11 AM] [TCNut] then you can uninstall it and reboot...defrag....then install fresh...
[7/6/2003 2:57:32 AM] [MaxSteel] Rho ... rate of change of option price with respect to interest rates
[7/6/2003 2:57:51 AM] [TCNut] it worked great with my new laptop....identical to my desktop now
[7/6/2003 2:58:17 AM] [ChartMonkey] so tcnet have you installed the latest update cd w/out a hitch and if are you running
[7/6/2003 2:58:19 AM] [MaxSteel] Once you have all the greeks ... you can build a position and clearly unc your risk if any or all variables change
[7/6/2003 2:58:21 AM] [ChartMonkey] er, tcnut
[7/6/2003 2:58:31 AM] [TCNut] bummed I am missing Max's Show...if you need help PM me
[7/6/2003 2:58:42 AM] [InanOut] Max your just like the terminator, you just keep on going, no matter what's around you :)
[7/6/2003 2:58:59 AM] [MaxSteel] Did you say something ???
[7/6/2003 2:59:29 AM] [MaxSteel] B)
[7/6/2003 2:59:34 AM] [InanOut] no i 'm just reading
[7/6/2003 2:59:42 AM] [TCNut] he is busy kicking down some good stuff....probably staring at the keyboar
[7/6/2003 3:00:14 AM] [InanOut] systems are crashing all around :)
[7/6/2003 3:00:47 AM] [TCNut] no worries....ChartMonkey...glad to help....just PM me...so I don't have to v
MaxSteels Comments
[7/6/2003 3:00:52 AM] [MaxSteel] there goes that machine take-over thing again !!! ... T3 it is happening i
[7/6/2003 3:01:23 AM] [InanOut] proceed on options trader
[7/6/2003 3:01:44 AM] [MaxSteel] Now the purpose of the Greeks ... besides phylosophy ...
[7/6/2003 3:02:23 AM] [MaxSteel] Any position you build with options and stock ... can be understood usin greeks ...
[7/6/2003 3:03:07 AM] [MaxSteel] You calculate each greek for each option, then total them all up ... and y your exposure to any possible event
[7/6/2003 3:03:55 AM] [MaxSteel] event as in price, rate of change of price, time, volatility and interest rate
[7/6/2003 3:04:22 AM] [MaxSteel] Once you understand this key concept ... the greeks are easy
[7/6/2003 3:05:09 AM] [MaxSteel] We can now set up a trade to have exposure to all or just some of the e based on our projections for price, time IV and interest rates
[7/6/2003 3:05:43 AM] [MaxSteel] we can even hedge ouselves out of the market at key points, without liq position
[7/6/2003 3:07:16 AM] [MaxSteel] example ... the threat of weapons of mass destruction are evident ... you 500,000,000 shares of MSFT at \$50
[7/6/2003 3:07:17 AM] [TCNut] ChartMonkey had disconnected his internet connection.....it defaults to re if you are not connected before initializing the program
[7/6/2003 3:08:00 AM] [MaxSteel] if you liquidate ... big tax problems ... so just buy a short synthetic ... the almost no cost ... only slippage
[7/6/2003 3:08:34 AM] [MaxSteel] 1 month later all things are less unclear ... except the whereabouts of we mass destruction

ClubHome

[7/6/2003 3:08:50 AM] [MaxSteel] close out the hedge ... for a minor cost
[7/6/2003 3:09:21 AM] [MaxSteel] or ... earnings report ... p[hase 5 bio approvals .. etc
[7/6/2003 3:09:37 AM] [MaxSteel] in this case you hedge price, the shot synthetic
[7/6/2003 3:09:41 AM] [MaxSteel] short
[7/6/2003 3:10:29 AM] [MaxSteel] you also hedge time ... the short synthetic is a long put and a short call
call sale covers the put time cost
[7/6/2003 3:10:51 AM] [MaxSteel] also vega ... short call/long put should have vega about zero ... etc
[7/6/2003 3:11:14 AM] [MaxSteel] now we can take a complicated trade and clearly understand our risk
[7/6/2003 3:11:37 AM] [MaxSteel] We can also build a trade and expose it to only wehat we want
[7/6/2003 3:12:59 AM] [MaxSteel] It is possible during pure volatility trading ... we can hedge time price an
change of price ... and coinstruct a trade that is delta, gamma and theta neutral
[7/6/2003 3:13:20 AM] [MaxSteel] only has exposure to vega (Implied Volatility)
[7/6/2003 3:14:16 AM] [MaxSteel] This trade is unaffected by price over about +/- 50% from the current ur
price ... now we just wait for an IV spike usually at a big sell-off / market bottom
[7/6/2003 3:15:16 AM] [MaxSteel] the only risk is vega and rho ... usually rho is not an issue unless you ha
position (so size does matter):)
[7/6/2003 3:15:59 AM] [ken2k] g'nite guys
[7/6/2003 3:16:22 AM] [MaxSteel] so main position exposure is vega ... if IV goes down that is bad ... (unle
short vega) ... if it goes up you want to be long vega
[7/6/2003 3:16:41 AM] [MaxSteel] GN Ken
[7/6/2003 3:17:01 AM] [TCNut] everyone wants a long vega!...
[7/6/2003 3:17:43 AM] [MaxSteel] If IV is high ... and you expect it to trend lower ... make sure you are sho
[7/6/2003 3:18:31 AM] [MaxSteel] If IV is low ... and you expect it to increase ... make sure you are long ve
[7/6/2003 3:19:29 AM] [TCNut] so when your IV is low....then the nurse comes....and you go long vega?...
[7/6/2003 3:19:39 AM] [MaxSteel] problem now is you need to project targets for vega ... which generally s
easier, and little worry about price
[7/6/2003 3:20:30 AM] [MaxSteel] Right ... but if she is cute ... the IV rises usually quite dramatically ...
[7/6/2003 3:20:49 AM] [MaxSteel] :D
[7/6/2003 3:21:19 AM] [TCNut] :8....visual associations...help me to learn.....sorry
[7/6/2003 3:21:28 AM] [MaxSteel] That's about all the greeks and volatility trading rapped up ... questions'
[7/6/2003 3:22:29 AM] [TCNut] I missed it all trying to figure out chartmokeys...problems...now that I think ;
was he chatting to us...anyways...must have been on a diff computer
[7/6/2003 3:22:31 AM] [MaxSteel] Hope it works for all ... but I'm afraid theymay take it the wrong way ... th
thinking of something else now rather than IV ... but as long as they are happy :D
[7/6/2003 3:23:04 AM] [TCNut] I will copy your greek goods and study...will let you know if I have any que
[7/6/2003 3:23:18 AM] [MaxSteel] possibly ... different PC
[7/6/2003 3:23:31 AM] [MaxSteel] Sorry you missed it ... I was great ...
[7/6/2003 3:23:37 AM] [MaxSteel] :D
[7/6/2003 3:23:41 AM] [TCNut] :D
[7/6/2003 3:23:59 AM] [TCNut] I won't miss it.....will copy and study hard
[7/6/2003 3:24:03 AM] [MaxSteel] You know ... my wife does that to me ... maybe it is me:(
[7/6/2003 3:24:38 AM] [TCNut] and then nag you to do it again in Options 101
[7/6/2003 3:24:54 AM] [MaxSteel] Bottomline ... with options you decide what you will expose yourself to ..
you will protect yourself from
[7/6/2003 3:25:29 AM] [MaxSteel] Can't do that with stock ... only long, short and out ... but if it works ... dc
just improve on it
[7/6/2003 3:25:30 AM] [TCNut] we need to get that club rollin.....Buyright an MojoRisin....have been doing
[7/6/2003 3:25:49 AM] [MaxSteel] options 101?
[7/6/2003 3:26:04 AM] [TCNut] but OEX options are outta my league...till I build up some more steam
[7/6/2003 3:26:20 AM] [TCNut] they are pretty pricey
[7/6/2003 3:26:34 AM] [MaxSteel] but ... there are many markets move the same for less
[7/6/2003 3:26:46 AM] [MaxSteel] SPY, DIA for an example

ClubHome

[7/6/2003 3:27:22 AM] [TCNut] yeah....mojo....has been testing his new Freedom system on OEX....seems had a lot of success

[7/6/2003 3:27:51 AM] [TCNut] you might want to check out the Freedom Club....if you have not...yet

[7/6/2003 3:27:53 AM] [MaxSteel] mojo ? ... Freedom system?

[7/6/2003 3:28:03 AM] [TCNut] McDermojo

[7/6/2003 3:29:00 AM] [TCNut] i want to study it....but OEX kinda...bums me out.....10 contracts...round 4 (

[7/6/2003 3:30:09 AM] [MaxSteel] Need to practice risk management ... even a great play can go wrong ... I about 3% max pain

[7/6/2003 3:30:14 AM] [TCNut] guess the apparent predicability of chart flow has lead him to focus on it

[7/6/2003 3:30:45 AM] [MaxSteel] the interesting thing about trading ... as many ways as there are traders

[7/6/2003 3:31:35 AM] [MaxSteel] different markets, plus options, futures and combinations across differer months,timeframes at the money in the money or out of the money

[7/6/2003 3:32:04 AM] [MaxSteel] keepsitinteresting

[7/6/2003 3:32:08 AM] [TCNut] Max Payne.....one of my favortite all time video games

[7/6/2003 3:33:45 AM] [TCNut] other favs....Jedi Knight2.....awesome online sabre fighting

[7/6/2003 3:33:54 AM] [MaxSteel] the best part was when you got the other guy ... he new it you new it an nothing he could do about it

[7/6/2003 3:34:07 AM] [TCNut] favorite flying game....Fighter Ace

[7/6/2003 3:34:31 AM] [TCNut] but they ruined it by making the flight model too real...IMO

[7/6/2003 3:34:37 AM] [MaxSteel] never really tried much else ... other thing in life got in the way ... like a overseas assignment

[7/6/2003 3:34:55 AM] [MaxSteel] really messes up the social life/family life etc

[7/6/2003 3:35:13 AM] [TCNut] yes...:)

[7/6/2003 3:35:24 AM] [TCNut] as does TCNet!

[7/6/2003 3:35:25 AM] [MaxSteel] the earlier version ... D2 ... was well balanced

[7/6/2003 3:35:52 AM] [TCNut] Mafia....really good game too

[7/6/2003 3:35:58 AM] [MaxSteel] nice thing about it ... it actually came down to skill and strategy ... kind c markets

[7/6/2003 3:36:36 AM] [TCNut] Splinter Cell!....latest and greatest

[7/6/2003 3:37:09 AM] [MaxSteel] I'msuprised the MSFT hasn't come-up with a realtime market simulator c game ... it would sell ... particularly if it had all the bells and whistles

[7/6/2003 3:37:49 AM] [TCNut] Splinter Cell latest Tom Clancey First Person Shooter

[7/6/2003 3:37:49 AM] [MaxSteel] Wow .. I have been out of the loop to long ... I used to read the occasior PCGamer

[7/6/2003 3:38:20 AM] [TCNut] with a unique stealthy strategy sense

[7/6/2003 3:38:25 AM] [MaxSteel] I remeber Tom Clancy ... change the FPS forever ... now stealth matters

[7/6/2003 3:38:42 AM] [MaxSteel] 1 shot kills

[7/6/2003 3:39:21 AM] [TCNut] yeah....splinter cell is much better than rainbow 6 or ghost recon

[7/6/2003 3:39:35 AM] [TCNut] but no online action

[7/6/2003 3:39:37 AM] [MaxSteel] We used toplay a little at work during lunch ... then they banned it ... coi

[7/6/2003 3:40:09 AM] [TCNut] Meadal of Honor Allied Assault.....great! WW2 game

[7/6/2003 3:40:40 AM] [MaxSteel] I have tied a few RTS games ... but the markets are my favourites ...

[7/6/2003 3:41:10 AM] [TCNut] it has some saving private ryan situations in the game that are unbelievabl

[7/6/2003 3:42:00 AM] [MaxSteel] It is real, RT and exilurating ... never get that feeling in the pit of my stor I die in a game ... only in an overleveraged trade that gaps the wrong way on the open

[7/6/2003 3:42:48 AM] [TCNut] yeah.....TCNet is my new game:)...have drastically reduced my eyecandy' ventures into cyber world

[7/6/2003 3:46:10 AM] [MaxSteel] This means I will need a new computer ...
[7/6/2003 3:46:50 AM] [MaxSteel] hence the reduced risk of options !!!
[7/6/2003 3:47:52 AM] [MaxSteel] But the experience was a lesson ... that feeling in the pit of your stomach ... now I recognize it when it occurs to others and I can capitalize on it ...
[7/6/2003 3:48:14 AM] [MaxSteel] particularly with options
[7/6/2003 3:48:22 AM] [TCNut] they are getting cheap.....laptops are on the verge...of making it feasible to instead of a desktop....graphics wise....for full blown eyecandy....not quite there yet....very soon though

[7/6/2003 11:30:44 AM] [kmack] so the idea is to see if these stocks that were bought on that day will appreciate price...

[7/6/2003 11:31:11 AM] [kmack] yes, definitely

[7/6/2003 11:31:32 AM] [kmack] and use the ppc and the number of days since the purchase date for the :

[7/6/2003 7:12:00 PM] [cpratsch] hotto, a good treat of OBV is in Weinstein;s book

[7/6/2003 7:12:10 PM] [hotto] thanks cpr
[7/6/2003 7:12:41 PM] [hotto] I tried to figure out... "duties"... I gave up...
[7/6/2003 7:13:06 PM] [hotto] Traders.. all of us.. are so Independent minded...
[7/6/2003 7:13:38 PM] [hotto] so.. to keep it "cheerful"... it will have to be like it is ...
[7/6/2003 7:13:46 PM] [hotto] spirit of sharing...
[7/6/2003 7:14:03 PM] [hotto] so.. here is what i have for now..
[7/6/2003 7:14:36 PM] [hotto] Briefing.com... gives me the final Mkt numbers... A/D...etc... about 4:30pm E
[7/6/2003 7:15:17 PM] [hotto] So.. when I get those numbers.. I will assess what we have... from MY point
[7/6/2003 7:15:47 PM] [hotto] then... I will suggest which of the PCFs.. that we discussed...
[7/6/2003 7:16:18 PM] [hotto] that I think... are likely to yield some good candidates.. for Longs / Shorts.. fr day..
[7/6/2003 7:17:01 PM] [hotto] then... when Wordens have the updates ready... I expect many of you will dk

ClubHome

updates.. and run the PCFs...

[7/6/2003 7:17:55 PM] [hotto] My request.. is... look at the Stocks... best you can.... pick out 5 or 6 that you be good Longs. / Shorts.. for the next day..

[7/6/2003 7:18:53 PM] [hotto] We can re-group... about ??? 9pm ET to review some Charts.

[7/6/2003 7:19:57 PM] [hotto] from that.. we can come up with a list of Longs / Shorts.. and post to Discus:

[7/6/2003 7:20:26 PM] [LeelaHula] Should we ... maybe ... post those 5 or 6 stocks somewhere on the club prior evening?

[7/6/2003 7:20:44 PM] [hotto] The next morning.. We will have candidates to fit with whatever the mkt give

[7/6/2003 7:21:57 PM] [hotto] Leela... I was thinking.. of just the chat stream.. to avoid having too many posts each day.. could get messy..

[7/6/2003 7:22:35 PM] [hotto] The earliest time.. is limited by the Update availability from the Wordens.

[7/6/2003 7:22:46 PM] [LeelaHula] I agree ... with so many "helpers" ...

[7/6/2003 7:23:56 PM] [hotto] I expect to make my suggestions.. by 5pmET.. maybe as early as 445pmET

[7/6/2003 7:24:04 PM] [frank54] Hotto, why doesn't everyone simply post their 5 or 6 in the chat with a flag PICKS for Hotto. We can then scroll back at our leisure?

[7/6/2003 7:24:32 PM] [tinaSDtrader] Like idea of having them in chat, keeps discussions are from getting

[7/6/2003 7:24:44 PM] [hotto] frank... sounds good.. we can use Chat Logs... to search.. if desired.

[7/6/2003 7:24:53 PM] [LeelaHula] With a flag???

[7/6/2003 7:25:22 PM] [frank54] Count me in for 5 or 6. A flag is just a name so we can find them easily in log.

[7/6/2003 7:25:46 PM] [hotto] start the Line with... PICKS.

[7/6/2003 7:26:04 PM] [hotto] just the word... "PICKS"

[7/6/2003 7:26:29 PM] [StockStalker] the "chart review" session seems to be the most valuable part of the And since it is done later at nite it will be concentrated with the ideas and easy to find right?

[7/6/2003 7:26:30 PM] [hotto] that would give us a Search word to look for.. in the Logs..

[7/6/2003 7:27:10 PM] [hotto] yes Stalker.. it is always easy to find in the Chat Logs.

[7/6/2003 7:27:23 PM] [LeelaHula] great idea ...

[7/6/2003 7:27:40 PM] [MarcoPolo] Any thing we can do to lighten the intraday workload for you? i.e if someone notices the time is 5 min after the hour and no one else has posted the market internals put them up, intra News/ Fudy pertaining to club stock in play.. Every one would know what the list is ?.No one is assigned to ever is free at the moment just do it..

[7/6/2003 7:27:46 PM] [tinaSDtrader] the more structured the better so we all stay on same page

[7/6/2003 7:27:48 PM] [hotto] I will do my thing between 8pmET and 9pm ET... Starting

[7/6/2003 7:28:23 PM] [GoldMiner] Hotto, maybe it would be helpful to flag items like "PICKS" with a special Like @PICKS. I can see a flag coding system that could be developed with that approach

[7/6/2003 7:28:51 PM] [hotto] ok... "@PICKS"... it is... 6 chars..

[7/6/2003 7:29:07 PM] [hotto] I see your point... for future

[7/6/2003 7:29:21 PM] [hotto] Marco... thanks... here goes...

[7/6/2003 7:29:29 PM] [StockStalker] exactly. I rather focus the filtered picks than have already been reviewed opposed to hundred of "picks" so I like the idea of the picks being reviewed later

[7/6/2003 7:29:55 PM] [hotto] the things I rarely get covered... The Way I would Like...

[7/6/2003 7:30:20 PM] [hotto] Keep checking Briefing.com... or other sources... for

[7/6/2003 7:30:42 PM] [hotto] 1. Guidance updates from companies... either Upward... or Downward..

[7/6/2003 7:31:08 PM] [tinaSDtrader] those downward guidance make good shorts a lot of the time!

[7/6/2003 7:31:15 PM] [hotto] If you take action first... fine... but.. then Report here...

[7/6/2003 7:31:45 PM] [hotto] yes tina... Up or Down... right now... will be explosive... I expect...

[7/6/2003 7:31:56 PM] [hotto] look at DCTM the other day..

[7/6/2003 7:32:07 PM] [frank54] Sorry to interrupt, but on @picks should we also note Long or Short to avoid unnecessary questions?

[7/6/2003 7:32:08 PM] [tinaSDtrader] but lots of people day trading those news bits, so profit taking comes and can be quick

[7/6/2003 7:32:56 PM] [ibuckskin] Why not assign several teams of two to four to study different PCFs and

ClubHome

two stocks that fit that particular PCF. Also list the pcf items derived from.

[7/6/2003 7:33:05 PM] [LeelaHula] good point frank ... could be @SHORTPICKS ... @LONGPICKS ????

[7/6/2003 7:33:18 PM] [MarcoPolo] WoW!! DCTM

[7/6/2003 7:33:23 PM] [hotto] 2. Analyst upgrades and downgrades.. During the day... can be helpful...

[7/6/2003 7:34:07 PM] [hotto] good idea... then we have the Lead in idea...

[7/6/2003 7:34:17 PM] [BaronDriver] Can Music's read 'em be programed for this?

[7/6/2003 7:34:51 PM] [hotto] Be careful...that can take over !

[7/6/2003 7:35:38 PM] [hotto] @PICKSLONG @PICKSSHORT

[7/6/2003 7:36:06 PM] [MarcoPolo] Or.... long = + and short = -

[7/6/2003 7:36:25 PM] [hotto] @PICKS+ @PICKS-

[7/6/2003 7:36:34 PM] [MarcoPolo] @PICKS- @PICKS+

[7/6/2003 7:36:43 PM] [hotto] works for me

[7/6/2003 7:36:49 PM] [cpratsch] DCTM shows clearly negative divergence with RSI9.3 before it dippes

[7/6/2003 7:36:59 PM] [cpratsch] dipped

[7/6/2003 7:37:28 PM] [hotto] I missed that... until after the news... I then went short.

[7/6/2003 7:38:39 PM] [hotto] I expect... that the "teams" will come about naturally... like this...

[7/6/2003 7:38:57 PM] [tinaSDtrader] hotto - how can we get more acronyms added to glossary? i.e. sma, etc.

[7/6/2003 7:39:22 PM] [hotto] If I am working on KR2 PCF.... I will SAY that...

[7/6/2003 7:39:57 PM] [tinaSDtrader] Be nice to add patterns: AT = Asc Triangle, CT = Conv Triangle, FV Wedge, RW = Rising Wedge, and more

[7/6/2003 7:40:06 PM] [starrbucks] yea...let's not get too cody...okay

[7/6/2003 7:40:12 PM] [HOTTO] Bonefish has joined the club. Please welcome your new member.

[7/6/2003 7:40:50 PM] [tinaSDtrader] can I get in the original document - or just add as comment below it?

[7/6/2003 7:41:03 PM] [hotto] If you would like me to see them first ... fine... But... can always be updated.

[7/6/2003 7:41:17 PM] [tinaSDtrader] I can update your original doc?

[7/6/2003 7:41:27 PM] [hotto] I am not sure... I think you can update it..

[7/6/2003 7:41:38 PM] [tinaSDtrader] I'll give it a whirl...

[7/6/2003 7:41:41 PM] [hotto] Click on Edit... and see.

[7/6/2003 7:45:56 PM] [hotto] ;)

[7/6/2003 7:48:24 PM] [hotto] I will just use words for now.. Could say "DCTM guides lower"

[7/6/2003 7:50:04 PM] [hotto] so... If you are reviewing stocks from KRN2... and you come up with 5 Short like... report...

[7/6/2003 7:50:20 PM] [StockStalker] or DCTM very weak when markget is in strong IT up rally. Dont reall indicators to see that.

[7/6/2003 8:03:07 PM] [hotto] wow.. SP +3.00 Naz +8.50

[7/6/2003 8:04:41 PM] [Candlestick1] Good evening everybody, hope you had a safe and enjoyable fourth weekend. What a great country we live in

[7/6/2003 8:05:23 PM] [Candlestick1] Using candlestick logic, an investor can get a better feel for what the direction will do.

[7/6/2003 8:05:46 PM] [Candlestick1] Keep in mind, a candlestick formation is produced by the accumulated knowledge of all investors buying and selling a given entity during a particular time frame.

[7/6/2003 8:06:07 PM] [Candlestick1] The viewing of those formations provides some advantageous aspects

[7/6/2003 8:06:46 PM] [Candlestick1] As seen in the DOW chart, a Doji formed on June 17, 2003. Rule number 1: Buy Candlesticks, sell a doji at the top. But notice what had been the overriding factor for the previous eight weeks

[7/6/2003 8:07:07 PM] [Candlestick1] The trend lines appeared to have more influence on the direction of the market than the signals themselves.

[7/6/2003 8:07:25 PM] [Candlestick1] Notice that there were a few candlestick reversal patterns in the DOW during that eight week uptrend. So what makes those signals NOT the ones to be affecting position changes?

[7/6/2003 8:07:43 PM] [Candlestick1] They should be always be heeded, but also evaluated as to the current market environment. When trying to project the direction of the market in general, more than the DOW can be used obviously.

[7/6/2003 8:08:01 PM] [Candlestick1] First consideration is what is the rest of the market doing. The NASDAQ index is a good index to look at.

[7/6/2003 8:08:22 PM] [Candlestick1] Running through that an analysis of the NASDAQ will give you more insight into what the overall investor sentiment appears to be.

[7/6/2003 8:08:46 PM] [Candlestick1] It can be assumed that if the NASDAQ is showing buying on days that the market is showing weakness, that the investor sentiment is not that of a major selling attitude,

[7/6/2003 8:09:03 PM] [Candlestick1] just shifting of funds from one area to another. And that is the crux of the market: money in the markets.

[7/6/2003 8:09:23 PM] [Candlestick1] Not buying the recommendations of the highly paid analysts of Wall Street seem to have a grave conflict of whether you make money or they make money.

[7/6/2003 8:09:46 PM] [Candlestick1] Or diversifying your account so that you are not going to be hurt if one of your investing gets clobbered.

[7/6/2003 8:10:07 PM] [Candlestick1] The bottom line reason for investing is to make money. To make money you want to be where the buying is occurring. Simple logic.

[7/6/2003 8:10:30 PM] [Candlestick1] How often we hear advice from the so called professional advisors that your money should be diversified, to protect your overall returns.

[7/6/2003 8:10:49 PM] [Candlestick1] Does that not say that when something is going bad, you have other investments that will offset it?

[7/6/2003 8:11:07 PM] [Candlestick1] The question should be, if something is going bad, why do you still invest in it. The major advantage of Candlestick signals is that it is telling you what is going on in investors minds NOW.

[7/6/2003 8:11:25 PM] [Candlestick1] Why would you want to own an investment that is going down?

[7/6/2003 8:11:46 PM] [Candlestick1] Oops, I have started to rant here but that leads us to the topic for today

[7/6/2003 8:12:04 PM] [Candlestick1] When is it time to sell a stock if it is going down after you bought it? What are the best we set stops in candlestick trading that are most effective?

[7/6/2003 8:12:34 PM] [Candlestick1] Continuing with the analysis of the market, take into account what the market is doing in general. If the DOW and the S&P are selling off but the NASDAQ and the Russell 2000 is acting strong

[7/6/2003 8:12:55 PM] [Candlestick1] it can be assumed that the smaller cap stocks are receiving interest in the market logic.

[7/6/2003 8:13:48 PM] [Candlestick1] For those that have access to commodity and futures charts, you can use them as an additional input to the market direction. If it has been witnessed for the past six months that when bond prices

[7/6/2003 8:14:07 PM] [Candlestick1] then stock prices go up, the Candlestick charts can be utilized to view the way the bonds are trending.

[7/6/2003 8:14:50 PM] [Candlestick1] If the market is not getting wholesale selling, then where is the buying happening? That can be easily seen by doing the simple scans on the sectors.

ClubHome

[7/6/2003 8:15:11 PM] [Candlestick1] Again simple logic steps in, if you see that the semiconductor or the trucking, etc. are producing excellent buy signals then you can pinpoint stocks in those sectors that also have excellent buy signals.

[7/6/2003 8:15:17 PM] [HOTTO] Electra has joined the club. Please welcome your new member.

[7/6/2003 8:15:30 PM] [Candlestick1] This gives double confirmation that you are in a good position. The show money coming into that area and you have a stock that shows buying coming into it.

[7/6/2003 8:16:00 PM] [Candlestick1] Back to the DOW chart. The doji told us the top was in. Was it going once again at the bottom of the trend channel? That was what needed to be seen.

[7/6/2003 8:16:21 PM] [Candlestick1] However, the other indexes were not selling off, individual stock charts holding their own.

[7/6/2003 8:16:40 PM] [Candlestick1] It did come down through the trendline a few days later. Buy again, and the Russell 2000 seemed to hold up well.

[7/6/2003 8:16:59 PM] [Candlestick1] With the confirmation of the other indexes not selling off,

[7/6/2003 8:17:22 PM] [Candlestick1] the next sign was the manner that the DOW was selling off. Down on the following day, down again the next. This was not the sign of investors evacuating the market.

[7/6/2003 8:18:17 PM] [Candlestick1] Usually a day where we see some capitulation. Tuesday had that feeling opening bell. They took it down hard and fast, in an oversold area. That should be a tell tale signal.

[7/6/2003 8:18:46 PM] [Candlestick1] (even though I had to leave the office for most of the day because I was stand sitting here wondering if they were going to bring it back up by the end of the day, like I had expected)

[7/6/2003 8:19:03 PM] [Candlestick1] But I had the confidence to remain long in most positions that day.

[7/6/2003 8:19:24 PM] [Candlestick1] So what is a way to resolve whether to hold longs when the pullback is inevitable, you ask? That is where the money management kicks in.

[7/6/2003 8:19:45 PM] [Candlestick1] The doji at the top tells us to sell? Will it hold at the trendline again? I don't know.

[7/6/2003 8:20:03 PM] [Candlestick1] The candlestick signals are telling the probability of which way the trend direction is going.

[7/6/2003 8:20:21 PM] [Candlestick1] The one fact we do know when we see the Doji at the top is that the probabilities of the market pulling back is extremely high. Will it be a quick or long pullback.

[7/6/2003 8:20:44 PM] [Candlestick1] We have already established that it could bounce another time off the trend line. What is the best trade strategy here? That is why 8 to 10 positions should always be in place

[7/6/2003 8:21:08 PM] [Candlestick1] A doji at the top would have given cause to check to see which positions be showing weakness at those particular levels. Not sure if the market is going to pullback slightly or pullback

[7/6/2003 8:21:25 PM] [Candlestick1] So adding a few short positions to the portfolio would have been prudent

[7/6/2003 8:22:03 PM] [Candlestick1] If the trend is supported at the lower trend line, then the shorts may be very short term trades.

[7/6/2003 8:22:18 PM] [Candlestick1] If the lower trend line is broken, a little more reversing of positions could be in place, closing a few more longs and adding a few more shorts.

[7/6/2003 8:22:37 PM] [Candlestick1] Do you want to be whipsawing back and forth? Not really. Candlestick trading is set up to be a relaxing method to trade.

[7/6/2003 8:22:56 PM] [Candlestick1] Knowing that the probabilities are in your favor everytime you put on or use candlestick signals should provide a calming effect to your investment psyche.

[7/6/2003 8:23:15 PM] [Candlestick1] So where do we know when to get out of a trade, especially one that you just put on? I do not like to use stops at all, other than when a stock is over bought and want to protect price

[7/6/2003 8:23:34 PM] [Candlestick1] But there are cases where the basic rules need to be modified. Basic rule is closing a new position if the price closes more than half way down the candle that created the buy signal

[7/6/2003 8:23:56 PM] [Candlestick1] If it doesn't stand to be a hard and fast rule, that obviously means there is some subjectivity to where to get out.

[7/6/2003 8:24:18 PM] [Candlestick1] Next week we will get into deep specifics of where and how to establish a position both for a new position and a profit taking situation.

[7/6/2003 8:24:39 PM] [Candlestick1] For now, we will explain what to do and when off of the general rule: establish a position. ISPH is a good example. The recommendation to buy came out on June 25, 2003.

[7/6/2003 8:24:59 PM] [Candlestick1] It had formed a nice Morning Star pattern on the June 23,24, and 25

about. But may want to get out the next day if it exhibits more weakness, and depending upon how weak c

[7/6/2003 8:26:00 PM] [Candlestick1] The next day, now June 27, 2003, it produces a long legged doji. M

[7/6/2003 8:28:33 PM] [Candlestick1] There is absolutely nothing wrong with buying a position, selling it w

[7/6/2003 8:29:18 PM] [Candlestick1] That acts as insurance that you are buying into positions when they
right and being out of them when they are acting poorly

[7/6/2003 8:29:40 PM] [Candlestick1] The major problem most of us have with doing that is ego. How stup
look if we bought a stock at \$10, SOLD IT AT \$9.40, bought it back at \$10.25.

[7/6/2003 8:30:00 PM] [Candlestick1] How stupid we would look if we had to sell it again at \$9.70. The qu
should be, look stupid to who? 99.99% of the time,

[7/6/2003 8:30:22 PM] [Candlestick1] you are the only person that knows, and more importantly, cares wh
you are trading.

[7/6/2003 8:30:40 PM] [Candlestick1] There is nothing wrong with taking a few small losses to eventually
gain, eliminating major downside risk.

[7/6/2003 8:30:57 PM] [Candlestick1] Quickly will do some stop loss game plans, but as I am writing this I
more I can go into.

[7/6/2003 8:31:18 PM] [Candlestick1] To reiterate, I do not like to use stops. Too many disadvantages. Bu
to watch stocks most of the day.

[7/6/2003 8:31:37 PM] [Candlestick1] For those that are not able to do so, we are still in the process of cre
universal approach for where to set stops

[7/6/2003 8:31:54 PM] [Candlestick1] The concept is that if a buy signal appears, then the probabilities ar
stock should be heading up. Clever reasoning you say?

[7/6/2003 8:32:17 PM] [Candlestick1] If that is the case, then a point where the selling has moved prices b
to where the buy signal is negated, is a logical spot to place a sell stop.

[7/6/2003 8:32:38 PM] [Candlestick1] However, that process should be set up for the first couple days of t
buy signal says we should see buying

[7/6/2003 8:32:48 PM] [Candlestick1] If the next few days do not show the results looked for, a positive m
move the money somewhere else.

[7/6/2003 8:33:09 PM] [Candlestick1] What makes this different from the ISPH chart? The selling should n
incorporate buy signals

[7/6/2003 8:33:27 PM] [Candlestick1] If a buy signals shows a pop up in price, then we witness a dark clo
or other sell indications, then get out.

[7/6/2003 8:33:46 PM] [Candlestick1] If the pullback is a series of buy signals, stay the course and add to

a stop during the day is not in the plan.

[7/6/2003 8:34:26 PM] [Candlestick1] Again, when the buy signal appears, that tells you that buyers are in and the probabilities of a bullish move is in favor.

[7/6/2003 8:34:44 PM] [Candlestick1] Too not get started on going into stops more now, we will do a whole lot on stops this coming week. That way illustrations can be attached to the descriptions.

[7/6/2003 8:35:00 PM] [Candlestick1] Although I am not an advocate of stops, I am aware of the need that investors require utilizing stops.

[7/6/2003 8:35:16 PM] [Candlestick1] So if you can be patient, we will have a full fledged STOP LOSS procedure published in the next few weeks.

[7/6/2003 8:35:35 PM] [Candlestick1] To continue that train of thought, the service for the longer term investments currently being prepared for the site. Mr. Value is ready to put new picks on the site.

[7/6/2003 8:35:53 PM] [Candlestick1] An example that he conveyed to Daryl, who put it out on our Forum 12 months back, was USNA at the \$19 range. Louis Navelliar just recommended it at \$44 last week.

[7/6/2003 8:37:02 PM] [Candlestick1] For those that don't want to be trading every few days, our long term service will be provided by Mr. Value and we will be providing a timing service for the recommended stocks from IBD's major investment news letters.

[7/6/2003 8:37:41 PM] [Candlestick1] This will mean we will be developing more recommendations for investments looking for a slightly longer holding period. Speaking of which, please keep in mind that AVII is a long term investment.

[7/6/2003 8:38:10 PM] [Candlestick1] The definition of long term could be two more weeks or two more months. Please please notice that there is a definite support level being developed. Also note that we have just formed a candlestick pattern.

[7/6/2003 8:38:42 PM] [Candlestick1] A doji at the bottom. A positive open tomorrow could make AVII a strong RUNNER.

[7/6/2003 8:39:27 PM] [Candlestick1] Others we have liked but been sluggish, HGS1, but note the number of Hammers occurring at the bottom.

[7/6/2003 8:39:46 PM] [Candlestick1] We will also be putting out more trade recommendations on the large capitalization stocks. Stock picks that have been going exclusively to our mutual fund and hedge fund accounts.

[7/6/2003 8:40:03 PM] [Candlestick1] The commodity recommendations will be cranked up this coming week. The CPAP machine is allowing me to get a good night's sleep, my energy level has increased dramatically.

[7/6/2003 8:40:23 PM] [Candlestick1] The e-books that have been promised for the past few months, including candlesticks, candlestick trading rules, high profit candlestick patterns and a fully explained entry strategies will be on the site very soon.

[7/6/2003 8:40:48 PM] [Candlestick1] This next week's chat on stop loss remedies will be the start of the stop loss e-book.

[7/6/2003 8:41:11 PM] [Candlestick1] To summarize the markets this week, the charts appear to be heading up but expect a slow uptrend like we saw in the two week downtrend.

[7/7/2003 12:03:18 AM] [texasquire] hello guys, i'm new; are we swing trading or daytrading here?

[7/7/2003 12:07:26 AM] [really] both swing and daytrading

[7/7/2003 12:07:31 AM] [cyberact] both....

[7/7/2003 12:08:30 AM] [StockStalker] Swing is not really a measure of time as it is a term to describe a realtivley direct price thruist usually from support and thn to resistnce

[7/7/2003 12:09:24 AM] [StockStalker] Hotto trade relatively early swing entrances off the daily chart and gets out when targets are met. SOMETimes those are day trades

[7/7/2003 12:10:29 AM] [texasquire] Ty stockstalker, i appreciate your response.

[7/7/2003 12:53:45 AM] [StockStalker] but wait for a pullback for sure

[7/7/2003 12:55:11 AM] [arch] really those look good for the longer run. as buy and hold a few months

[7/7/2003 12:56:38 AM] [ChartMonkey] KNSY another interesting looking consolidation w/volume thinned out lately

[7/7/2003 12:58:05 AM] [arch] knsy the obv is indicating caution

[7/7/2003 12:58:27 AM] [StockStalker] I dont chase stcoks. But I will sell them to you!!!! Long term perhaps but always good to buy the dip instead of the 5 day rally

[7/7/2003 12:58:35 AM] [ChartMonkey] thanks arch

[7/7/2003 12:59:14 AM] [StockStalker] but nice to put on the radar since they are so strong

[7/7/2003 3:03:53 AM] [Mike] Hotto - a couple of Q's regarding one of your weekly picks - VTIV: any concern about longer-term OBV divergence with price (i.e. - from June 2002); also - what would your basis for targets for this BO?

[7/7/2003 3:06:56 AM] [hotto] Targets 5.20 - 5.30 , then 6.70 - 7.35..

[7/7/2003 3:09:19 AM] [hotto] VTIV.. since last June 02.. VTIV came through the Jul -Oct pit... then.. note esp. the OBV surge in March 03.. new accum

[7/7/2003 3:10:30 AM] [hotto] 4/17/03.. moved above the June 02 highs.. then dropped in late April to test those levels..

[7/7/2003 3:11:19 AM] [hotto] note.. on that opp.. no aggressive selling .. and.. accu continued.. right up to now.

[7/7/2003 3:13:08 AM] [hotto] so.. to me.. the Distributional selling last June - Aug.. was part of the Bear mkt.. distrib ended in late Sept. 02.

[7/7/2003 3:13:30 AM] [hotto] The story since then.. has been Accum.

[7/7/2003 3:13:57 AM] [Mike] Okay, thank you. So your perspective on OBV is shorter term and more in relation to more recent developments in overall market dynamics?

[7/7/2003 3:14:38 AM] [hotto] Yes.. Go back and read the LONG arguments I put forth in the 1/4/03 Sat Chat..

[7/7/2003 3:15:26 AM] [hotto] had to do Exactly with this case... Bear mkt selling / distribution.. distortions.. Near ENd of the Bear... ..

[7/7/2003 3:15:46 AM] [Mike] Will do. I need to block out about a week to go over all the Saturday chats!

[7/7/2003 3:16:25 AM] [hotto] Because of the nature of "capitulation"... unlikely to see the equal-and- opposite buying... Until well into the new "bull"... maybe near the end of it.

[7/7/2003 3:17:21 AM] [hotto] 1/4/03 was a long day. Lots of close questioning... like you are getting to now.

[7/7/2003 3:17:47 AM] [hotto] But..Good questions.. need to be answered.

[7/7/2003 3:18:44 AM] [hotto] You may be interested in a detail.. on VTIV OBV..

[7/7/2003 3:20:16 AM] [hotto] Note.. the 6/28/02.. Big Down Volume day. was not a true down day.. LOD was higher than the prior day's LOD.

[7/7/2003 3:21:03 AM] [hotto] the 8/14/02 Big down Vol day... was a true down day..

[7/7/2003 3:21:56 AM] [hotto] BUT.. despite the heavy selling... did not take out the prior Swing Low.. on 8/9/02.

[7/7/2003 3:23:01 AM] [hotto] Those are pretty technical things.. the stock was clearly declining to important Lows in that period.. NOT establishing the Lows..

[7/7/2003 3:25:36 AM] [AlanD] Hello Hotto. Its bedtime.

[7/7/2003 3:25:55 AM] [hotto] hahaha.. so it is.. hi Alan

[7/7/2003 3:27:26 AM] [AlanD] Hi. Just passing through. Kids have made a full night sleep impossible. Spend this evening still unpacking. Getting ready to go to bed now though. Just listening to KFI 640 about unemployment reaching "mass critical". Hhmmm

[7/7/2003 3:28:19 AM] [hotto] on VTIV..I just went back to old chart points.. on a stock like this... there is usually so much doubt about Valuation... that Traders will grab ANY "port"...

[7/7/2003 3:28:37 AM] [hotto] so... Old Chart Points usually work.

[7/7/2003 3:29:15 AM] [hotto] Alan...yeah.. terrible employment numbers... much worse than the 6.4% Unemp.. implies.

[7/7/2003 3:29:56 AM] [Mike] thanks again...GN

[7/7/2003 3:30:05 AM] [hotto] another year of graduates.. entering "underemployment"

[7/7/2003 3:30:11 AM] [hotto] GN Mike.

[7/7/2003 3:30:27 AM] [AlanD] I agree. Fed numbers are a joke. Always have been. Other countries show higher unemployment because they more accurately account for the numbers.

[7/7/2003 3:31:37 AM] [hotto] that's right... unfortunately.. Stop counting them...If they are smart enough to stop looking --- just because there are no jobs..

[7/7/2003 3:31:59 AM] [AlanD] True, unless you want to pick lettuce.

[7/7/2003 3:32:22 AM] [AlanD] Well off to bed. Have to earn the regular wage in the morning.

[7/7/2003 3:32:26 AM] [hotto] yeah.. there is always...Lettuce picking....)

[7/7/2003 3:32:35 AM] [hotto] GN..

[7/7/2003 3:32:39 AM] [IanB] Alan, we in the UK also fiddle the unemployment numbers. After 6m, people fall off the register if they have]\$12k in savings

[7/7/2003 3:32:40 AM] [AlanD] See ya

[7/7/2003 3:33:21 AM] [AlanD] IanB, sounds like your GOVT has it's issues too.

[7/7/2003 3:33:54 AM] [IanB] Oh yes! We fiddle hospital waiting lists as well

[7/7/2003 3:34:30 AM] [AlanD] Yes, I hear you guys have problems with the Socialized medicine "good deal".

[7/7/2003 3:34:36 AM] [hotto] If you don't like the Result... change the counting method... makes sense to me.

[7/7/2003 3:35:14 AM] [IanB] I agree. We also fiddle school exam results, by not letting the not so good students sit the exams

[7/7/2003 3:35:35 AM] [hotto] they have to be out learning to pick lettuce.

[7/7/2003 3:36:34 AM] [AlanD] IanB, well at least we don't have that problem. Perhaps that why the U.S. shows such low results in College entrance exams. Because everyone looking to go to college is allowed to take entrance exams. Just a thought. Well time to hit the rack, have a good one.

[7/7/2003 3:36:47 AM] [hotto] GN.. good trading tomorrow.. say XING.

[7/7/2003 3:36:58 AM] [IanB] gn

[7/7/2003 3:37:04 AM] [AlanD] LOL..... XING!

[7/7/2003 6:02:12 PM] [rockin] how long do you think this can move at this rate
[7/7/2003 6:02:14 PM] [hotto] now.. back up... for a re-test of Highs... BUT...

[7/7/2003 6:03:16 PM] [hotto] means... we had enough correction... probably get 10 days of sideways to up...now.
[7/7/2003 6:03:30 PM] [rockin] T2118 - yes, back up but from a lower low. Is there anything to the lower low in T2118

[7/7/2003 6:06:25 PM] [hotto] Let T2118 turn back up... and see how high it can go... It is not predictive like that...
[7/7/2003 6:07:01 PM] [hotto] Read your Price charts... to find Supports / Resist... T2118 will follow along
[7/7/2003 6:07:17 PM] [hotto] Wow Kaait !
[7/7/2003 6:08:37 PM] [hotto] If you see bad things.. or are too nervous... just pass..this can only go on for another couple weeks... i think.

[7/7/2003 6:40:11 PM] [Sully] Good night to all and thanks hotto and everybody else for your input
[7/7/2003 6:40:14 PM] [hotto] could be interpreted as "less insider sales than expected"... and prompt Buying.
[7/7/2003 6:40:32 PM] [RMRtrader] CHINA had very big volume today - 3 times normal
[7/7/2003 6:40:37 PM] [hotto] gn Sully..

[7/7/2003 6:42:16 PM] [wildbill] dips will be bought untiil they are not..... and when they are not..... WE will not see it coming imo - thankfully hotto will!:)
[7/7/2003 6:42:47 PM] [StockStalker] it is a fine line between buying the dip and being it
[7/7/2003 6:42:59 PM] [Groundog] :D
[7/7/2003 6:43:02 PM] [kangacay] good night all and thank ypou Hotto

[7/7/2003 6:43:48 PM] [hotto] gn kangacay
[7/7/2003 6:43:52 PM] [dns1] Hotto, how do you play stocks like Redf when they get close to BO point (7.92 high from 5/6)? Do you hold to see if they go right through that point?
[7/7/2003 6:44:04 PM] [wildbill] yep! hey hot you about time to throw in your "market has slapped me around plenty" spiel:)
[7/7/2003 6:44:20 PM] [hotto] hahahaaha....D:D
[7/7/2003 6:44:45 PM] [hotto] falling on the floor....D
[7/7/2003 6:45:34 PM] [MWid] hotto, could we set up one or more additional "clubs", to be used exclusively for posting information ("hotpicks" "hotnew"), so that they could be color coded and easy to find/search, etc.?
[7/7/2003 6:48:40 PM] [MWid] I guess you weren't kidding about falling on the floor, huh?:D

[7/7/2003 6:49:17 PM] [hotto] correct... wb really got me... :D
[7/7/2003 6:49:33 PM] [hotto] best laugh in 2 weeks..
[7/7/2003 6:51:01 PM] [hotto] additional clubs.. hmmm. Let's see how this new thing goes.. over next few days.
[7/7/2003 6:52:43 PM] [dns1] market slapped Hotto around? Must be something that only happened in the past.
[7/7/2003 6:52:51 PM] [wildbill] t-storms knocked me out early today- not my kind of day today anyway - had to amuse myself somehow:)
[7/7/2003 6:53:25 PM] [wildbill] there is your intro hot!- here it comes
[7/7/2003 6:53:40 PM] [hotto] hahahaah.....:D
[7/7/2003 6:54:26 PM] [hotto] before I fall on the floor again.....
[7/7/2003 6:55:07 PM] [dns1] I can relate to T-storms slapping you around! They get me at least once a year.
[7/7/2003 6:55:30 PM] [hotto] They're gonna get me again sometime.. only question. is when? and how fast can I recover?
[7/7/2003 6:56:27 PM] [dns1] Last one in May did 6K in damage.
[7/7/2003 6:57:27 PM] [wildbill] hotto has a tremendous "respect" for Mr Market- and he knows he can only play the "hand" that is dealt him- he KNOWS he must be quick to react when something doesn't "feel" right and is wht he tries to impart to us all the "big " blow that the market inevitably will give us - can be managed if prepared and hotto is BEST at preparation imo- why - because of all those "slaps"
[7/7/2003 6:58:21 PM] [hotto] The worst damage I had in May... was when I became convinced the correction would go on longer.. and I let go many good Swing Trades.. just before the mkt turned UP again..
[7/7/2003 6:59:30 PM] [hotto] So.. THEN.. was faced with that terrible choice... 1. Sit out.. and Wait for it to come back to me... or 2. Chase... and catch up... risking getting Slapped again...
[7/7/2003 7:01:02 PM] [hotto] So.. for the Swing trade portion of the account... it ends up .. do I try to jump out early... and avoid pain..? or just keep buying the dips.. until... the Lat Bad loss.?
[7/7/2003 7:01:40 PM] [hotto] IN June... we had a couple happy moments... Caught some ST Tops perfectly...
[7/7/2003 7:02:48 PM] [hotto] Hopefully... that beefed up my account... so that when they finally Slap me hard 1 time... I will have the "extra" assets to be fine.
[7/7/2003 7:03:00 PM] [dns1] yes WB, he does seem quick to respond, but also not stubborn on a decision of what direction things are going in.
[7/7/2003 7:03:51 PM] [hotto] And.. IF I should be so forutnate.. as to DAnce with this mkt... nearly IN RHYTHM... I will just be THAnkful..
[7/7/2003 7:04:09 PM] [wildbill] for "traders" direction does not matteer!
[7/7/2003 7:04:11 PM] [rockin] hotto - T2118 did NOT turn up today it was down -4.81
[7/7/2003 7:04:16 PM] [dns1] sounds like a good way to put it.. dancing in rythm
[7/7/2003 7:05:00 PM] [wildbill] gratitude is the key to all good things in life!
[7/7/2003 7:05:43 PM] [StockStalker] RBAK slapped me ahrd early today but my cushiion softened the blow
[7/7/2003 7:05:45 PM] [hotto] interesting.. was an update.. thanks... STill that is lagging.. As I said earlier.. look for it to Follow the Leading Avgs...
[7/7/2003 7:06:44 PM] [hotto] true wb.. appreciate.. the good things.. as giftts.. .. blessings.. feels ok.
[7/7/2003 7:07:34 PM] [StockStalker] sometime we have to feed mr markt et some chum
[7/7/2003 7:07:58 PM] [hotto] also true..

[7/7/2003 7:11:02 PM] [wildbill] and where did the word "present" come from in respect to time - ie:today

[7/7/2003 7:13:03 PM] [wildbill] every day - every moment is indeed a "gift" or "present" to be appreciated by the recipient!

[7/7/2003 7:14:35 PM] [dns1] agree WB

[7/7/2003 7:15:02 PM] [dns1] it only takes the prospect of not having that to see it more!

[7/7/2003 7:19:05 PM] [swan] .

[7/7/2003 7:40:14 PM] [payck] hi bmw, missed you

[7/7/2003 7:41:25 PM] [bmwrider] Thanks y'all. Played SCUR today and made some money from Thursday. Incredible day for the market

[7/7/2003 7:42:07 PM] [bmwrider] Day job getting busy, couldn't follow the chat as much as I wanted.

[7/7/2003 7:42:11 PM] [hotto] good for you.

[7/7/2003 7:42:51 PM] [bmwrider] made \$\$\$ on SCSS, PKTR, before it cratered, XING and closed out ASYT

[7/7/2003 7:43:38 PM] [bmwrider] Also closed AMTD for a nice profit. Got caught with IACI, but didn't hit my stop

[7/7/2003 7:43:48 PM] [bmwrider] IACI short that is

[7/7/2003 7:44:52 PM] [bmwrider] Closed REDF in the money and bought SEBL

[7/7/2003 7:44:58 PM] [hotto] ah..BVSN.. long late in the day.

[7/7/2003 7:45:56 PM] [bmwrider] This market was incredible today, didn't see the volume though, was it up?

[7/7/2003 7:46:34 PM] [bmwrider] Or was this alot of short covering?

[7/7/2003 7:46:38 PM] [hotto] not great.. depended on the sector... just play Stock by stock...

[7/7/2003 7:47:03 PM] [hotto] nope... Buying... maybe aslo some SCov.

[7/7/2003 7:47:11 PM] [bmwrider] Havn't seen a 50 point Nasdaq day in awhile.

[7/7/2003 7:47:36 PM] [bmwrider] I get nervous if the volume isn't huge

[7/7/2003 7:47:51 PM] [hotto] Naz at new High..

[7/7/2003 7:48:14 PM] [hotto] QQQ vol was good enough

[7/7/2003 7:48:34 PM] [bmwrider] So maybe an up morning tommorrow

[7/7/2003 7:48:57 PM] [hotto] The Impulse was in March.. this is just continuation.. doing fine

[7/7/2003 7:49:02 PM] [bmwrider] Those "genius" fund managers have to keep their jobs, right?

[7/7/2003 7:49:35 PM] [hotto] My guess.. Up all day.. tomorrow... pointed at the YHOO Earns Wed AH... that's when I breathe.

[7/7/2003 7:49:46 PM] [bmwrider] Probably going to be a pretty good earnings season, not alot of downside warnings.

[7/7/2003 7:50:11 PM] [bmwrider] Good point, those YHOO earnings do tend to move things, especially if the ad revenue is up

[7/7/2003 7:50:18 PM] [Xanadu] bmwrider SEBL shooting star is this a bearish signal. Stock sale 25000 shares should there be concern?

[7/7/2003 7:50:57 PM] [hotto] we'll see... The "Implied expectations" by the Stock prices.. is pretty big.. Will be easy to disappoint..

[7/7/2003 7:51:14 PM] [bmwrider] Probably watch SEBL closely if it's down on an up morning market. PM can tell you also

ClubHome

[7/7/2003 7:51:43 PM] [hotto] are you long SEBL ?
[7/7/2003 7:51:50 PM] [bmwrider] yea

[7/7/2003 7:52:16 PM] [hotto] I think it will be ok... may shake you first
[7/7/2003 7:52:58 PM] [bmwrider] Only took a small position, keeping alot of cash right now in case of some earnings surprises or if the volume doesn't pickup
[7/7/2003 7:53:31 PM] [bmwrider] Like you Hotto, have already paid the July bills, don't want to give any back
[7/7/2003 7:53:42 PM] [bmwrider] yw
[7/7/2003 7:54:09 PM] [hotto] SEBL corrected pretty deep after the ORCL / PSFT mess... so.. has some little resistance pts. to chew through
[7/7/2003 7:54:55 PM] [bmwrider] I saw that before I got in. Still only counting on it as a scalp.
[7/7/2003 7:55:00 PM] [hotto] today.. ran up.. slammed into LR30.. then PT.. I think it goes through tomorrow
[7/7/2003 7:55:25 PM] [bmwrider] Saw EP moved nicely today. You still "investing" in that one Hotto?

[7/7/2003 7:55:58 PM] [hotto] yes.. I have a bunch.. I researched it a lot last Fall.
[7/7/2003 7:57:21 PM] [Osc] Hotto what's your long term target for EP?
[7/7/2003 7:58:40 PM] [bmwrider] Pretty good volume for EP today, could run to 9.50 next
[7/7/2003 7:59:04 PM] [hotto] I think EP will be back in the 40s before Pres. election..
[7/7/2003 7:59:15 PM] [Groundog] OXM +4.02
[7/7/2003 7:59:53 PM] [hotto] I will probable be out before 30.
[7/7/2003 8:00:26 PM] [bmwrider] The natural gas shortage is real
[7/7/2003 8:00:35 PM] [Moron] Hotto, an interesting OBV pattern on KOSN
[7/7/2003 8:00:56 PM] [bmwrider] Just don't fight the market
[7/7/2003 8:01:27 PM] [syatt] hey guys - back online...listening to Gary Kaltbaum's radio show and the tilt is caution...I have been hoodwinked soooo many times with the doubters that I have felt mentally handcuffed in the last 2-3 months,,what is nice, is that this club deals with what is happening now trading wise, and that's all that matters...thanks for the adjustment to that, etc...I'm not bashing Kaltbaum, I respect his "watching" abilities, but I appreciate the focusing on what matters now, keeping your eye on the ball, and all...this club keeps giving & giving thanks...to hotto, bmw, and all of the GREAT mems...
[7/7/2003 8:01:39 PM] [hotto] EP .. 9.60 sounds good.. near term

[7/7/2003 8:02:53 PM] [Osc] That would be a good gain, but not as good as the advance you will get from the publisher of your book! ;)

[7/7/2003 8:03:28 PM] [smithda9] bmw - I still have my jump button after upgradeing.

[7/7/2003 9:26:04 PM] [Micheltrader] 13.35 and 11.14

 [7/8/2003 12:05:17 AM] [StockStalker] Leveda: It is basically a term coined by Toby Crabel in regards to a security putting in the narrowest range bar in 7 bars. Usually occurs at tops and bottoms of swing. I will be doing a class here on range contraction in the very near future and covering that and more in the very near future and Hotto will announce soon as well. It is cheaper (free) than buying Crabels 1200.00 book
 [7/8/2003 12:06:12 AM] [Caegan] Thank you for caring enough to share this info w/ us, SS
 [7/8/2003 12:06:18 AM] [LevedaJoe] SS: Thanks will try to be on hand

The recent push through resistance in the 1730 area developed little follow through with a minor pullback noted. However, a continued posture above intraday supports at 1724 and 1720 leaves the door open for another rally attempt. Next resistances beyond the midday high (1734) are at 1741 and 1751.

Breadth figures are slightly positive as advancers are outpacing decliners by a slight degree on both exchanges... Up volume is slightly outpacing down volume on the Big Board, but on the Nasdaq up volume is more than doubling down volume... The number of new 52-week highs versus new low maintains its bullish stance as 281 and 324 new highs on the NYSE and the Nasdaq, respectively, are juxtaposed with 8 and 3 new lows...

For example, sources indicate that all of AT&T Wireless' (AWE) GoPhone program, Sprint PCS' Virgin Mobile joint venture, Cingular's pre-paid offering and AllTel's (AT) product being distributed at WalMart were very strong in Q2. According to the firm, the Cingular and Alltel results are indicators that Boston Communications Group (BCGI 18.99 +1.59) may have had a stronger than expected Q2, as both are major customers.

[7/8/2003 3:11:50 PM] [Groundog] 15:10 ET Bond Market Summary : Another up-and-down day in the Treasury market, as an early morning half-point gain succumbed to yet another round of profit-taking. The ten-year Treasury note is wrapping up the day flat, yielding 3.73%. Since backing up sixty-five basis points from its cyclical yield-low on June 13, the Treasury market has drawn a fair number of comparisons to the 2000 stock market bubble. Investors are now just beginning to accept the idea that short-term interest rates probably won't be cut any further, and that economic growth (and the resulting inflationary pressures) is poised to rebound appreciably during the second half of the year. Under that scenario, 3 ?% doesn't exactly look "cheap" to many account managers.

[7/8/2003 4:12:25 PM] [DataMiner] I like to look back at the 5-min. charts of BO stocks to see if I could have predicted the BO. Some stocks gap up, some BO early then go sideways, some BO early and keep going and some go sideways early then BO late. It's that last group that I'm curious about how to find them. Anyone have a scan for intraday price acceleration?

I'm impressed/I'm in.

[7/8/2003 4:50:05 PM] [sggin1] nice monitor the sony trin
[7/8/2003 4:50:26 PM] [StockStalker] since i have 700 music cd's i probably like the guy
[7/8/2003 4:50:48 PM] [hotto] thanks guys.. Lots of good advice.. !:)
[7/8/2003 4:50:48 PM] [Groundog] Like the ViewSonic
[7/8/2003 4:51:04 PM] [sggin1] i bought a 21" on ebay 4 \$200, came in yesterday
[7/8/2003 4:51:05 PM] [MWid] I
[7/8/2003 4:51:37 PM] [hotto] sggin.. what brand? dot pitch ?
[7/8/2003 4:51:45 PM] [dpg45] flat panel
[7/8/2003 4:52:18 PM] [MWid] 've got a ViewSonic 21" , .25 dpi and run it at 1024 x 768 and it's fairly easy on the eyes.
[7/8/2003 4:52:20 PM] [sggin1] its a trinitron rebuild, it looks nice, well worth it
[7/8/2003 4:52:22 PM] [Groundog] yea the ViewSonic is Flat and 19"
[7/8/2003 4:52:48 PM] [StockStalker] ilovemusic --- is that the correct spelling
[7/8/2003 4:53:00 PM] [hotto] trinitron is the best.. for CRTs..
[7/8/2003 4:53:04 PM] [sggin1] cant remember the dot pitch
[7/8/2003 4:53:14 PM] [sggin1] yes they r sharp
[7/8/2003 4:53:51 PM] [dpg45] trinton dot pitch .28
[7/8/2003 4:54:20 PM] [sggin1] i think it might be .26
[7/8/2003 4:55:47 PM] [atraveler] may I comment here?
[7/8/2003 4:55:57 PM] [hotto] of course
[7/8/2003 4:56:03 PM] [MWid] someone should;))
[7/8/2003 4:56:22 PM] [hotto] I am just studying the mkt...
[7/8/2003 4:56:26 PM] [atraveler] For TCNet display, I strongly recoment 17" LCD...2nd generation
[7/8/2003 4:56:36 PM] [atraveler] recommend
[7/8/2003 4:57:06 PM] [atraveler] very high contrast ratio, takes up less desk space
[7/8/2003 4:57:29 PM] [atraveler] colors seem to 3 dimensional w/r background
[7/8/2003 4:57:52 PM] [MWid] How would you characterize "2nd generation"?
[7/8/2003 4:57:56 PM] [atraveler] 17" typically support 1280 x 1025 resolution
[7/8/2003 4:58:02 PM] [sggin1] plasma is the best, also u can use a apple mac monitor which absolutely kicks ass, keep in mind u need a digital output
[7/8/2003 4:58:32 PM] [atraveler] 2nd generation has higher contrast ratio than 1st...400:1 or better
[7/8/2003 4:58:40 PM] [atraveler] also much thinner
[7/8/2003 4:58:54 PM] [atraveler] I have 17" NEC...fabulous
[7/8/2003 4:59:05 PM] [sggin1] nvid or ati has a dig out
[7/8/2003 4:59:38 PM] [RussH] Is there a way to search the chat logs???)
[7/8/2003 4:59:42 PM] [atraveler] plasma is definite overkill for TCNet
[7/8/2003 5:00:08 PM] [StockStalker] there is more run on the puter than tcnet
[7/8/2003 5:00:28 PM] [atraveler] sure

[7/8/2003 5:00:37 PM] [sggin1] once i have the \$\$ the mac monitor is remarkable, just look at one at a local mac sealer or best buy, they come in wide screen too, which is perfect for stocks

[7/8/2003 5:01:16 PM] [MWid] How much are the plasmas? 17" or so?

[7/8/2003 5:01:22 PM] [atraveler] I thot we were talking TCNet, sorry

[7/8/2003 5:01:32 PM] [tiga] Russ, once in the chat log hit ctrl F.

[7/8/2003 5:02:01 PM] [RussH] Great....ty

[7/8/2003 5:02:04 PM] [sggin1] not sure

[7/8/2003 5:02:28 PM] [sggin1] but not cheap

[7/8/2003 5:03:29 PM] [sggin1] mac flat screen will blow away any lcd, while they r flat too

[7/8/2003 5:03:46 PM] [MWid] bought a cheap 17", Sceptre X7S Naga, 1028x1024, pixel pitch .264 (\$389 less rebate, expired). Seems OK, use as second monitor.

[7/8/2003 5:03:51 PM] [atraveler] yeah, but how good does it have to be?

[7/8/2003 5:04:55 PM] [MWid] From someone who has been using computers for a while, the better the quality of the image, the longer your eyes will last. No light matter.

[7/8/2003 5:05:08 PM] [sggin1] i use big fat ulgy monitors causethe quality is good along with price

[7/8/2003 5:05:10 PM] [atraveler] I use my LCD for photo editing, too. Very nice

[7/8/2003 5:05:45 PM] [sirlosealot] For what it's worth I have Samsung's SyncMaster191T, it's analog or digital, I saw them now at about 7.99, very thin outer frames.

[7/8/2003 5:05:54 PM] [atraveler] Have either of you folks actually tried a newer LCD?

[7/8/2003 5:06:10 PM] [sirlosealot] Sorry 799.

[7/8/2003 5:06:15 PM] [StockStalker] the LCDs are much easier on the eyes

[7/8/2003 5:06:21 PM] [MWid] I went real cheap for my cat's computer, cuz they just like to work the keyboard mostly, but sometime watch the cursor too. LOL

[7/8/2003 5:06:27 PM] [atraveler] how do you like it, sirlosealot

[7/8/2003 5:06:42 PM] [StockStalker] sirelosealot LOL nice one

[7/8/2003 5:06:58 PM] [root] hotto--are you going to give a little talk now:)

[7/8/2003 5:07:16 PM] [sggin1] the best thing to do is go down to compusa or wherever and compare, i find that the larger sony trintrons are a great choice if you have the space

[7/8/2003 5:07:19 PM] [sirlosealot] I love them, I have 4 of them, 2 on top of the other 2

[7/8/2003 5:07:25 PM] [hotto] root... in 10 min... not quite ready..

[7/8/2003 5:07:46 PM] [w2jc] i'm using a 19" ViewSonic LCD here and i just luuuuuuv it !!

[7/8/2003 5:07:54 PM] [atraveler] Best Buy, Fry's, etc...30 return policy

[7/8/2003 5:08:08 PM] [atraveler] 30 day

[7/8/2003 5:08:17 PM] [w2jc] bought mine on eBay !!

[7/8/2003 5:08:33 PM] [sirlosealot] Best buy, CompUSA and Office Depot have them

[7/8/2003 5:08:34 PM] [BoutTime] Where can I find the setup for a SOAP BUY or a SOAP SELL?

[7/8/2003 5:08:47 PM] [sggin1] multiple monitor setups are v easy if you havw win xp, do bother getting a custom built system

[7/8/2003 5:09:10 PM] [sggin1] if anyone is looking to do that

[7/8/2003 5:09:30 PM] [MWid] Agree on the ease of XP, it set up correctly despite

[7/8/2003 5:10:39 PM] [Jms] how do you spell redundant

[7/8/2003 5:10:44 PM] [sggin1] u can have 5 or more on 1 computer with xp

[7/8/2003 5:10:52 PM] [MWid] Not like that LOL

[7/8/2003 5:11:03 PM] [Jms] :D

[7/8/2003 5:11:20 PM] [MWid] "a" at the end instead of "e"

[7/8/2003 5:11:26 PM] [Jms] np

[7/8/2003 5:11:45 PM] [MWid] redundant redundant redundant red....

[7/8/2003 5:12:51 PM] [MWid] But then around here, spelling and typing are too different matters.=D

[7/8/2003 5:13:02 PM] [atraveler] MSFT came back to earth

[7/8/2003 5:13:55 PM] [micky] well i go to spell shirt and get it wrong:o

[7/8/2003 5:14:36 PM] [sirlosealot] Carefull Micky :D

[7/8/2003 5:14:39 PM] [StockStalker] Hotto I wil lgo and get some beers and be back later with some thoughts and ears.

[7/8/2003 5:14:41 PM] [atraveler] biggest problem seems to be "your" instead of "you're" :D

[7/8/2003 5:14:48 PM] [TeachMe] like i lost my shirt on AVII

[7/8/2003 5:14:51 PM] [StockStalker] see ya later

[7/8/2003 5:15:07 PM] [sggin1] i run 3 now, but if you have 3 cards , each with 2 outs, then u can run 6

[7/8/2003 5:18:30 PM] [JayW] he's workin hard for us. will be along in a few

[7/8/2003 5:18:40 PM] [MadameButterfly] Does anybody know how to make the chart float, so I can put that on my second monitor?

[7/8/2003 5:18:52 PM] [sggin1] most common vid cards with support 2 monitors, u can have 2 monitors per pci slot and 2 for agp

[7/8/2003 5:19:11 PM] [Groundog] under layout

[7/8/2003 5:19:52 PM] [micky] dtas ep sir loud that`s all i can think of

[7/8/2003 5:22:49 PM] [hotto] It was a very good day in the Life of our IT Rally..!
[7/8/2003 5:23:03 PM] [syatt] yep, good job boss.
[7/8/2003 5:23:04 PM] [hotto] yeah.. babue...:D
[7/8/2003 5:23:46 PM] [hotto] Opened with a nice Gap Down.. allowing entry into "Stocks with Good Charts" ...
[7/8/2003 5:24:46 PM] [hotto] The worst A/D readings of the day occurred in the first hour... then improved all day... with a Rush of Buying in last hour... JUST the way we like it!
[7/8/2003 5:25:13 PM] [imjim] Atraveler Win2K supports up to ten monitors
[7/8/2003 5:25:16 PM] [hotto] A/D Improved BEFORE the AVgs.. another good sign...
[7/8/2003 5:25:42 PM] [ataveler] imjim, yes, but no two on same adapter...
[7/8/2003 5:25:45 PM] [hotto] No Big + Ticks during the day... just steady buying throughout...
[7/8/2003 5:26:19 PM] [hotto] Really... then kind of day.. when our Strategy.. just like in April and May...
[7/8/2003 5:26:34 PM] [hotto] will make solid Profits each day..
[7/8/2003 5:26:56 PM] [hotto] without needing a big +150 pt Rally.. very nice !
[7/8/2003 5:27:14 PM] [ataveler] Hotto, how to differentiate short covering from new money?
[7/8/2003 5:27:40 PM] [hotto] QQQ and COMPQX.. led the way again... both making NH52..
[7/8/2003 5:28:14 PM] [hotto] ALSO.. I noticed.. QQQ has now.. gotten up into the May 2002 IT Rally Highs...
[7/8/2003 5:28:39 PM] [hotto] Remember... NHB was the first to do that.. back in Early June..
[7/8/2003 5:28:52 PM] [jump85ft] does anyone know why linteractive brokers does not have alot of short shares available ?? ...
[7/8/2003 5:29:07 PM] [hotto] SO.. now we have a 2nd mkt segment moving to that important level..
[7/8/2003 5:29:32 PM] [hotto] IF DJIA moves into that zone... It will be at 10300 !
[7/8/2003 5:30:02 PM] [hotto] give you an idea.. how important that 5/2002 IT level was..
[7/8/2003 5:30:14 PM] [sggin1] hotto, is a big + tic a gap up?, not like today which was a healthy climb?
[7/8/2003 5:30:50 PM] [hotto] Also.. NH on NYSE was over 350 again.. very good.. NOT as much as the Peak in early June... but Good...
[7/8/2003 5:31:15 PM] [hotto] and... NH on Naz.. was over 400... in keeping with the QQQ leading..
[7/8/2003 5:32:33 PM] [hotto] yes sggin1.. we like the steady climbs.. the charts stay good... nothing gets too far from supports.. easy to catch support if things slip...
[7/8/2003 5:33:13 PM] [hotto] The worry.. always.. is the Big + tick at the close... implying a Buying Panic...
[7/8/2003 5:33:50 PM] [hotto] at those times... buyers always bid prices up... far above trendlines... and supports...
[7/8/2003 5:34:19 PM] [hotto] then.. when PT comes in... things. can Break... on charts..
[7/8/2003 5:34:36 PM] [hotto] anyway.. we are safe.. for another day...
[7/8/2003 5:35:04 PM] [hotto] we get to make \$\$\$ again tomorrow... all is well with our IT Rally...:)
[7/8/2003 5:35:17 PM] [hotto] now.. some detail..

[7/8/2003 5:35:52 PM] [hotto] with the Early morning dip.. and the late day rally...
[7/8/2003 5:36:17 PM] [hotto] it is likely there will be many good BOs.. on the KR2 PCFs..
[7/8/2003 5:36:56 PM] [hotto] Please .. several of you... look at the KR2 PCF.. it will give good charts..
[7/8/2003 5:37:17 PM] [hotto] Sort with PPC66.. best to top..
[7/8/2003 5:37:36 PM] [hotto] look at top 25 or so... pick a few..
[7/8/2003 5:37:52 PM] [hotto] Then.. change the Sort to Price...
[7/8/2003 5:38:17 PM] [hotto] and look for stocks in the 15 - 25 price range..
[7/8/2003 5:38:45 PM] [hotto] by today.. that should finde some new.. interesting ones..
[7/8/2003 5:39:30 PM] [hotto] also.. set a Volume slider in the Scan... to min = 250K shares today...
[7/8/2003 5:39:59 PM] [hotto] no need looking at stuff with too small volume.
[7/8/2003 5:40:05 PM] [hotto] ...
[7/8/2003 5:40:21 PM] [hotto] Also... since Plenty of NH52s..
[7/8/2003 5:40:57 PM] [hotto] LOok at PlanA1 PCF... pick a few.
[7/8/2003 5:41:27 PM] [MadameButterfly] What does NH on NYSE was over 350 refer to?
[7/8/2003 5:41:41 PM] [Cartman] hotto, is that the KRN2 scan?
[7/8/2003 5:41:55 PM] [ItsShowtime] Guessing: New Highs on New York Stock Exchange
[7/8/2003 5:41:57 PM] [hotto] AdvStx2Vol will give good stocks as well.. use PPC66. to sort.
[7/8/2003 5:42:19 PM] [hotto] yes.. that is 350 New Highs today on NYSE
[7/8/2003 5:42:37 PM] [hotto] that is a good number.. high enough..
[7/8/2003 5:42:58 PM] [MadameButterfly] Thanks, hotto.
[7/8/2003 5:43:11 PM] [hotto] no.. not the KRN2 PCF... that looks for Shorts..
[7/8/2003 5:43:27 PM] [Cartman] KR2?
[7/8/2003 5:43:29 PM] [Pops] Must be unusually high considering Dow only up 6
[7/8/2003 5:43:33 PM] [hotto] the KR2 PCF ... looks for Longs..
[7/8/2003 5:44:06 PM] [hotto] No.. that is how it was all during MAy.. the Beauty of the IT RALLY stucture..
[7/8/2003 5:44:36 PM] [hotto] the DJIA went kind of sideways in April and early May...
[7/8/2003 5:44:38 PM] [Pops] It's a beautiful thing, thats for sure
[7/8/2003 5:44:58 PM] [hotto] While "real buying" came in.. to the whole market..
[7/8/2003 5:45:42 PM] [hotto] It is what I have studied in the markets for 23 years.. to get an understanding of the whole process
[7/8/2003 5:45:48 PM] [Pops] I see. It's great to be beating the indexes day after day
[7/8/2003 5:46:00 PM] [hotto] Yes..
[7/8/2003 5:46:18 PM] [babue] Not good at scans but here is my KR2 DLTR IMCLE LNCR MOGN KVHI AMLN CETV TTEK REGN CASY MLNM price \$35 to \$15

[7/8/2003 5:49:33 PM] [hotto] no... not avg

[7/8/2003 5:49:33 PM] [babue] I am not good at building scans so I am not sure if
these are good but I used your KR2

[7/8/2003 5:49:54 PM] [hotto] just the Last day .. so..

[7/8/2003 5:50:09 PM] [sirlosealot] where is thr KR2 ?

[7/8/2003 5:50:27 PM] [syatt] ur name is toooo funny, sir...:D

[7/8/2003 5:50:36 PM] [hotto] Since we are looking for a Positive Key Reversal...
then... we want plenty of Volume

[7/8/2003 5:51:20 PM] [hotto] I am tempted to use a stronger Volume
requirement... but... not really necessary..

[7/8/2003 5:51:41 PM] [hotto] KR2... 1 min.

[7/8/2003 5:51:48 PM] [zenvestor] test

[7/8/2003 5:51:54 PM] [StockStalker] the reason i ask is that I acatually lowered
mine yesterday to find the next tiier of no exploited stocks

[7/8/2003 5:52:08 PM] [StockStalker] such as eweb and such

[7/8/2003 5:52:24 PM] [sggin1] is the kr2 the krn2hotto?

[7/8/2003 5:52:40 PM] [hotto] no.. KR2 or KR2hotto

[7/8/2003 5:52:41 PM] [StockStalker] so we were thinking the same thing but wen
different directions and I find that interesting

[7/8/2003 5:52:51 PM] [syatt] no the krn is for shorts

[7/8/2003 5:53:00 PM] [hotto] the "n" is the Negative... that looks for shorts.

[7/8/2003 5:53:15 PM] [hotto] ok... found it...

[7/8/2003 5:53:31 PM] [hotto] click "Clubs / hotto / Discussions "

[7/9/2003 9:51:39 AM] [Groundog] Dow -50, Nasdaq -7, S&P -3.89 :

[BRIEFING.COM] The cash market started the session with losses across the board and after a brief peek into positive territory continues to extend its losses... Today's weakness is comes on the back of the gains accomplished over the last two sessions... The Dow is underperforming the S&P 500 and the Nasdaq on a relative basis, pressured by the losses in Alcoa (AA 25.68 -0.13) and Eastman Kodak (EK 26.85 -0.49)... AA is down following a downgrade by Morgan Stanley based on, among other factors, spending on low return projects over the next 3-4 years... EK is on the defensive after Goldman Sachs cut its FY03 estimates to \$1.45 from \$1.75 (consensus of \$1.53) due to U.S. retail industry unit film sales declines...

It's true: the ten-year note now is down 1/32nd to yield 3.72%, after being up close to half a point earlier. This most recent reversal follows reports that the Bush Administration later today will formally announce the resignation of Treasury Undersecretary Fisher at the end of the year; this development might prove to be significant going forward, if the Treasury eventually should decide to bring back the thirty year bond auction that Fisher successfully abolished a couple years ago.

[7/9/2003 12:42:43 PM] [hotto] FW.. I have a LOT of respect for your methods...As you know.. My earlier comments were not meant to question your fine work...
[7/9/2003 12:43:12 PM] [FirstWave] just following you tech lead.
[7/9/2003 12:43:13 PM] [Jean16] When a new deck of cards is being dealt, as is the case now, every once in a while a WILDCARD shows up. Any WILDCARD that shows up can more than double the value of your hand.
[7/9/2003 12:43:32 PM] [Jean16] WINNING MUOS CONTRACT -- in six months time, the military may well give Raytheon the MUOS \$6 billion contract, in which LOR is a major participant -- it is worth more than LOR?s total present market capitalization.
[7/9/2003 12:43:33 PM] [Mwid] Okay FW, now can you make IJL go UP? =D
[7/9/2003 12:43:35 PM] [jump85ft] JEAN :)
[7/9/2003 12:43:43 PM] [DataMiner] ty Noname. I've seen stocks like IFLO go both ways, continued up, or sudden fall-off. Have often made wrong decision.
[7/9/2003 12:43:45 PM] [FirstWave] your are my tech encyclopedial
[7/9/2003 12:43:53 PM] [Jean16] hi jump!
[7/9/2003 12:44:17 PM] [jump85ft] i have to go to work
[7/9/2003 12:44:19 PM] [Groundog] 12:43 ET SEI Investments upgraded at ThinkEquity (SEIC) 34.57 -0.38: ThinkEquity upgrades to Overweight from Equal-Weight, saying the co's recent trust processing win along with the recent large deal announced with Citizens Bank represent the beginning of the conversion of SEIC's new business pipeline into rev in its Private Banking & Trust segment; in addition, recent business momentum in this segment, coupled with financial mkt strength, leads firm to raise their FY04 est to \$1.48 from \$1.40; raises target to \$43 from \$35.
[7/9/2003 12:44:26 PM] [Jean16] RECAPITALIZATION -- the LOR debt chews up 60% of the cash flow. Any significant recapitalization also significantly reduces LOR?s financial risk --also allowing the stock to take off.
[7/9/2003 12:44:38 PM] [jump85ft] bye Hotto FW and jean

[7/9/2003 12:45:20 PM] [Jean16] ACQUISITION OF LOR -- others might want to enter the sat manufacturing business, like Raytheon, CISCO, Q and a host of others -- more than a triple.

[7/9/2003 12:46:00 PM] [NumberWhiz] jean, then buy RTN
[7/9/2003 12:46:05 PM] [Jean16] SAT ORDERS START FLOWING -- sooner or later, the sat orders have to start flowing -- a double once it starts, and from there on it depends on the volume of orders and LOR's market share.

[7/9/2003 12:50:13 PM] [Jean16] In my view, there is just no justification for LOR selling at such a low price, because the value is there and will be unleashed in one of these ways. And soon.
[7/9/2003 12:50:22 PM] [McDermojo] Lui you in SOHU?

[7/9/2003 5:37:52 PM] [ilovemusicCOM] New version of MagicLog is available. You can download it from www.ilovemusic.com ... click on stocktrading in left column. Then look for MagicLog link

[7/9/2003 5:40:42 PM] [ilovemusicCOM] kmack, you there?
[7/9/2003 5:43:53 PM] [Llw] ILM, what is MagicLog?
[7/9/2003 5:45:28 PM] [ilovemusicCOM] MagicLog formats logs to make them easy to read. It removes the time and date stamp and collates all statement by the same person when that person makes multiple posts in a row on different lines.
[7/9/2003 5:46:00 PM] [ilovemusicCOM] It also reads the log aloud to you if you want at least the first part of it.
[7/9/2003 5:46:35 PM] [StockStalker] Nice Work
[7/9/2003 5:47:15 PM] [ilovemusicCOM] You can save logs to your hard disk and then search for logs by key words in the log titles.
[7/9/2003 5:47:28 PM] [Llw] ILM, very nice. Does it do this on its own, after being loaded?
[7/9/2003 5:47:53 PM] [ilovemusicCOM] Almost. :) You have to copy the log to the Windows clipboard yourself.
[7/9/2003 5:48:43 PM] [ilovemusicCOM] Future version will translate hotto JARGON or give you a JARGON look up. :)
[7/9/2003 5:50:20 PM] [Llw] ILM, good work, very helpful. After you copy the log to the clipboard, you run ML over it?
[7/9/2003 5:50:53 PM] [StockStalker] will u have a scanning package available that does not require cybertader to run it
[7/9/2003 5:51:12 PM] [StockStalker] maybe esignal or tcnet
[7/9/2003 5:51:17 PM] [ilovemusicCOM] yes, just click a button and ML will grab log from clipboard, process it and load it into notepad for you.
[7/9/2003 5:51:42 PM] [ilovemusicCOM] MagicBriefing works with Etrade, Cybertrader or Briefing.

[7/9/2003 7:12:41 PM] [Nomeite] B)

[7/9/2003 7:22:31 PM] [really] GD I assume there must be system problems. I see little discussion in the logs and next to nothing in the live chat. Is that correct?

[7/9/2003 7:22:58 PM] [dpg45] yes

[7/9/2003 7:23:02 PM] [wildbill] really? lol

[7/9/2003 7:23:51 PM] [ChuckR] :D

[7/9/2003 7:23:59 PM] [really] No lightning storms today wildbill? Except in the market

[7/9/2003 7:24:40 PM] [wildbill] yep had them again this afternoon - now supposed to last until Friday:(

[7/9/2003 7:25:31 PM] [ChuckR] my favorite type of weather

[7/9/2003 7:26:55 PM] [Nomeite] lightning & thunder so rare up here that 10 or so years everyone staqyed up all nite to watch :)

[7/9/2003 7:27:12 PM] [Nomeite] 10 or so years ago

[7/9/2003 7:28:35 PM] [skimmer] Need help opening or downloading files from the CLUBS. Are any special permissions needed to open them? Unable to open PDF files from Freedom club. TIA

[7/9/2003 7:29:33 PM] [ChuckR] skimmer...probably like others...skewed up

[7/9/2003 7:30:46 PM] [really] skimmer - exactly what are you trying to open up . I'll see if I can open.

[7/9/2003 7:33:01 PM] [skimmer] I'm trying to open some PDF files but nothing happens when I click or doubleclick on them. Usually something tells you that the files is being open or saved to yor PC.

[7/9/2003 7:33:15 PM] [Nomeite] spent over 2 years coming up with a system I really liked, then I ran into Hotto club and gotta start all over again! :(

[7/9/2003 7:33:38 PM] [Nomeite] thanks much though Hotto

[7/9/2003 7:34:04 PM] [Barnabus] I just opened the overview file...it worked fine

[7/9/2003 7:35:29 PM] [really] skimmer I just tried opening Freedom system

overview, PDF file. Had no problem. If you have one or two I could open them and email to you if you wish?

[7/9/2003 7:36:58 PM] [skimmer] I think is related to my secondary computer on the network. I usually have a hard time opening windows on it. Will try main PC. Thanks..

[7/9/2003 7:47:04 PM] [hotto] Look for both Longs .. with KR2 and Shorts with KRN2... had good Volatility swings in mkt.. today.. Both Pos and Neg Reversals will be there...

[7/9/2003 7:48:15 PM] [Zathrus] Hi Hotto and all

[7/9/2003 7:48:27 PM] [hotto] In case of a Short candidate.. BEST.. if the Close is below yesterday's LOD.. can't always get that..

[7/9/2003 7:48:28 PM] [Zathrus] REDF sure did a job today!

[7/9/2003 7:48:41 PM] [hotto] WHat a Beauty !

[7/9/2003 7:49:05 PM] [hotto] We told it the Targets... It Went there....LOL

[7/9/2003 7:49:13 PM] [Prospect88] I have the KRN2 PCF but where can I find the KR2 one? Thank you!

[7/9/2003 7:49:40 PM] [hotto] It is in "Clubs / hotto / Discussions"....

[7/9/2003 7:49:43 PM] [hotto] but

[7/9/2003 7:49:45 PM] [lumpsum] Does REDF have more legs?

[7/9/2003 7:50:02 PM] [hotto] click "Next 20" at bottom... Lots of papers..

[7/9/2003 7:50:17 PM] [hotto] then KR2 hotto PCF is near bottom..

[7/9/2003 7:50:37 PM] [Prospect88] ahh!! thank you, I guess I was only on the first page! I am learning lots from you. It is much appreciated.

[7/9/2003 7:50:43 PM] [cyberact] hotto...what's your take on the market's health today?

[7/9/2003 7:50:58 PM] [ChuckR] KR2..L [= L1 AND H] H1 AND C] C1 AND H1] H2 AND V] V1

[7/9/2003 7:51:17 PM] [hotto] Health.. just.. ok... Mkt was in "Fear of the YHOO earns"..

[7/9/2003 7:51:18 PM] [cyberact] nasdaq over 400 new highs

[7/9/2003 7:51:42 PM] [Zathrus] Also the Chambers 2 step didnt help....

[7/9/2003 7:51:46 PM] [cyberact] redf got to 9x920 ah

[7/9/2003 7:52:00 PM] [hotto] I heard 3 analysts with the same Idea that you heard from me.. last week...

[7/9/2003 7:52:22 PM] [hotto] that.. the YHOO earns... and others... may bring on more selling.

[7/9/2003 7:53:11 PM] [cyberact] yeah..more selling is what i've been hearing but those new highs in the compq and nyse seem to say something else

[7/9/2003 7:53:13 PM] [hotto] So.. the avgs just marked time.. and.. no late buying surge today..

[7/9/2003 7:53:23 PM] [hotto] good point...

[7/9/2003 7:53:51 PM] [cyberact] seems to me we are still under accumulation

[7/9/2003 7:54:00 PM] [hotto] just taked the Stock chart Opps.. where you find them... don't try to anticipate..

[7/9/2003 7:54:30 PM] [hotto] Just look for Setups... and Signals... and act.

[7/9/2003 7:54:32 PM] [SeattleSteve] I wonder if tomorrow morning might be more filled with "crosscurrents" than usual. Big players with "agendas" may be able to whip the market around tomorrow with the YHOO earnings out

[7/9/2003 7:54:54 PM] [hotto] take profits a bit early..

[7/9/2003 7:55:13 PM] [hotto] Good point.. Steve.. I think so.. too...

[7/9/2003 7:55:22 PM] [cyberact] yed... i've been trying to do that exactly..

[7/9/2003 7:55:28 PM] [cyberact] yes

[7/9/2003 7:55:33 PM] [SeattleSteve] Hotto, I am looking forward to trading REDF again tomorrow. I got in at an average price of 9.16 in after hours trading.

[7/9/2003 7:55:50 PM] [hotto] so.. take it easy..and.. let it come to us...

[7/9/2003 7:56:10 PM] [SeattleSteve] But PCNTF at 14.63 may take me a while to "digest"

[7/9/2003 7:56:25 PM] [hotto] I suggested using both KR2 and KRN2... to get both Longs and Shorts...

[7/9/2003 7:56:41 PM] [Zathrus] Say - is anyone looking at RNBO - laying on the 200, OBV tells a different story though....

[7/9/2003 7:56:44 PM] [hotto] I won't do chart review tonight.. Worn out...

[7/9/2003 7:57:11 PM] [hotto] wildbill may want to review the charts..

[7/9/2003 7:57:13 PM] [SeattleSteve] Yes, I am seeing that patience -- to wait for the stock price to come to you, on both buying and selling -- really helps. Not as easy to do in real time as it is to say, though.

[7/9/2003 7:57:16 PM] [hotto] :)

[7/9/2003 7:57:34 PM] [hotto] wb says... no... lol

[7/9/2003 7:57:46 PM] [cyberact] went thru 50 charts of krn2 already...couldn't find but one short...and it's borderline CKFR

[7/9/2003 7:58:09 PM] [SeattleSteve] I had my best day in three years today. Thanks for some great ideas, hotto. -- REDF, XING, others

[7/9/2003 7:58:12 PM] [hotto] wow...

[7/9/2003 7:58:23 PM] [hotto] nice Steve!

[7/9/2003 7:58:35 PM] [wildbill] yep you are losin it LOL - takes me all night to go through my charts!

[7/9/2003 7:58:41 PM] [hotto] good work.. took lots of execution..

[7/9/2003 7:58:43 PM] [Zathrus] Yep Steve - just goes to show that old "Sell in May and go away" is still accurate as ever :)

[7/9/2003 7:58:50 PM] [SeattleSteve] LOL

[7/9/2003 7:59:01 PM] [BaronDriver] How abt ARO and AHG for short prospects?

[7/9/2003 8:01:29 PM] [Groundog] :8

[7/9/2003 8:01:48 PM] [afsceo] AVII is a soap buy. We'll see if it can break out tomorrow.... One of many daily AVII comments ;)

[7/9/2003 8:02:30 PM] [cyberact] but obv is tanking

[7/9/2003 8:06:27 PM] [hotto] CKFR.. only trouble is.. declined for 4 days.. May be ready for a bounce..

[7/9/2003 8:06:29 PM] [cyberact] seems like lower prices are coming ...is that what you are saying hotto?

[7/9/2003 8:06:48 PM] [hotto] In CKFR... it looks that way...

been showing off a daily / 60' H&S top in the S&P, and we shorted the SPYs
yesterday and today
[7/9/2003 8:15:19 PM] [hotto] ok thanks

[7/9/2003 8:15:20 PM] [guzman] check out this chart .. also take a good look at the OBV .. doesn't tell a pretty story ...

[7/9/2003 8:15:31 PM] [Nomeite] hotto must be real skinny, always work work work...i'll send some of my kielbasa and sweet and sour red cabbage

[7/9/2003 8:15:50 PM] [turningpoint] JNJ, FPL, INTU, AVY possible shorts I am short now

[7/9/2003 8:16:17 PM] [guzman] the "frc1" and "frc2" stand for Fib Resistance Confluence .. an abbreviation we use in the fib club

[7/9/2003 8:16:31 PM] [Zathrus] Nice chart guz - I see what you mean about OBV....

[7/9/2003 8:17:03 PM] [hotto] yes.. Hourly tells a story...

[7/9/2003 8:17:59 PM] [hotto] thanks guz

[7/9/2003 8:18:18 PM] [guzman] frc1 is a major monthly fib resistance... frc2 is a weekly fib resistance - not as strong as the frc1, but will do the trick if most of the selling occurred at frc1

[7/9/2003 8:19:44 PM] [guzman] I have posted the longer term charts for the S&P and for INTC if anyone wishes to review them in the fib club. Otherwise, just know that INTC has major resistance at 24.02... reached 23.99 today.

[7/9/2003 8:20:12 PM] [hotto] great.. thanks

[7/9/2003 8:23:27 PM] [guzman] if the daily H&S holds up, we should have a reasonable retracement ... remember, we never reached the minor fib of 948 - 950 I had out there last week... this bounce came at the expense of fragile footings

[7/9/2003 8:23:52 PM] [hotto] SPY.. had similar.. Down day.. INcr Volume..

Bank of England cuts rates 25 bps to 3.50% - lowest level since 1954. Focus might be starting to shift a bit toward Greenspan's Humphrey-Hawkins testimony before Congress next week - hopes beginning to stir that Greenspan might try to comfort the markets a bit after forceful correction since FOMC meeting June 25 (ten-year yields up half a percentage or so point since then).

[7/10/2003 9:23:52 AM] [Grounddog] 09:22 ET Microsoft decision to restate earnings rather atypical -- WSJ (MSFT) 27.47: The Wall Street Journal's "Heard on the Street" column suggests Microsoft's decision to restate all of its earnings is rather "unusual". This is due to its decision to replace stock options with stock grants as its favored method of equity based employee pay. The co has decided to voluntarily restate all of its prior years financial results to reflect stock options compensation as an expense on the income statement. Most companies loathe the possibility of having to take such actions, however, MSFT is doing so to ensure its year-over-year earnings are presented on an "apples-to-apples" basis. However, an even further benefit could be lowering past years earnings to make it easier to show year-over-year earnings growth in future periods.

[BRIEFING.COM] A nasty start for the market as the indices have been hit by broad-based selling from a market-cap and industry perspective... Leaders in the recent rally - such as technology, financial, and biotech - have felt the brunt of the selling interest as underlying concerns surrounding the stocks' inflated valuations have pushed the groups lower... Genentech (DNA 77.90 +0.50), however, is one issue that has bucked the downward trend in biotech due, in part, to its better than expected Q2 (June) report... Elsewhere, treasuries have lured some buyers into its market following its sharp pullback this week, and today's weaker than expected jobless claims report...

[7/10/2003 12:14:21 PM] [tinaSDtrader] yes, I see on BBH. I've been taught not a dbl top until breaks btm in btn the tops, but looks like it may be setting up for one now. Or are you calling tops 6/6 and 6/17?

[7/10/2003 12:15:03 PM] [hotto] 6/6/03.. was the MOMO Peak.. of mkt.. check T2118 and H/L...

[7/10/2003 12:15:22 PM] [hotto] We have just been "unwinding the MOMO".. since then...

[7/10/2003 12:15:43 PM] [TeeltUp] Hotto: Look at SMH. Double top and look at OBV!!

[7/10/2003 12:16:02 PM] [ladytrader] are you looking for another double top on the T2118?

[7/10/2003 12:16:06 PM] [kmack] PEP Breaking out today...

[7/10/2003 12:16:08 PM] [hotto] About 5 weeks.. Pk - pk.. a nice top...

[7/10/2003 12:16:11 PM] [texesquire] looks like an asia bottom.

[7/10/2003 12:16:59 PM] [hotto] No.. not on T2118.. no need for dble top HERE.. Just look for another BIG T2118 top... in the Santa RALLY.. Oct-Jan... or March...

[7/10/2003 12:18:03 PM] [texesquire] looks like IJJI bottom in place.

[7/10/2003 12:18:43 PM] [hotto] Review My last 5 Saturday Chat Classes.. for Details on The Mkt Top...Has Played out.. almost Perfectly !

[7/10/2003 12:18:51 PM] [SeattleSteve] Asian internets have been going up for 20 minutes now. Is this a reversal, or is it setting up another move down?

[7/10/2003 12:18:55 PM] [TeeltUp] SMH daily

[7/10/2003 12:19:09 PM] [hotto] SMH

[7/10/2003 12:19:24 PM] [tinaSDtrader] BBH also in a horiz channel while making these tops, break of btm line around 120-121 will confirm the dbl top

[7/10/2003 12:19:44 PM] [hotto] tina.. true...

[7/10/2003 12:19:45 PM] [WealthTrader] SMH looks bad?

[7/10/2003 12:20:15 PM] [hotto] SMH.. bad enough

[7/10/2003 12:20:39 PM] [WealthTrader] I agree

[7/10/2003 12:20:56 PM] [TrendFriend] ASIA turning in 11.02

[7/10/2003 12:20:59 PM] [tinaSDtrader] so BBH must get momentum and break upside or prob pull back to btm of channel, breaks it then had a dbl top

[BRIEFING.COM] Market is trading at its lows of the day as a pick-up in selling activity coincides with further erosion in the influential semiconductor group... The SOX has dived lower in the past half hour and is now showing losses on the order of 2.9%... The unnerving performance of the semiconductor sector has prompted additional selling in financial, retail, biotech, and drug... The large pharmaceutical group, in particular, has declined precipitously following yesterday's late-day news that AstraZeneca's (AZN 41.97 -0.59) cholesterol-inhibiting drug, Crestor, was approved by the FDA in dosages of 5 to 40 milligrams... Pfizer's (PFE 33.42 -0.80) blockbuster Lipitor drug will compete directly against the generic drug, and thus the world's largest drug company has slumped in today's action...

[7/10/2003 1:15:02 PM] [ChuckR] Personal Criteria Formula
[7/10/2003 1:15:04 PM] [hotto] PCF.. a TCNet PCF...Personal Criteria Formula
[7/10/2003 1:15:12 PM] [swan] hotto, could you discuss, whether you're still using 66 days for the PCF or now 70?
[7/10/2003 1:15:28 PM] [hotto] PCF.. what I discussed for 3 hours last Saturday..
[7/10/2003 1:15:58 PM] [tinaSDtrader] hotto - that falling tide deal is so right. I had some screaming buys picked that just got dragged down, so didn't get to buy. =o

[7/10/2003 1:16:45 PM] [hotto] yeah .. tina.. as you know.. After a Dble top... Forget words like "Support"...or "Buy sig"..
[7/10/2003 1:17:03 PM] [hotto] "Buy sig" ususally means.. "Bull Trap"
[7/10/2003 1:17:07 PM] [tinaSDtrader] yes - I have rule price must pull me in, volume must confirm in my direction, no such deal today
[7/10/2003 1:17:17 PM] [swan] hotto, do you expect that NGAS plays will also drop with "the tide", or are they counter to the froth?
[7/10/2003 1:17:24 PM] [tinaSDtrader] more like, support being broken, sell signal!

[7/10/2003 1:20:31 PM] [tinaSDtrader] one of my biggest money-losing tactics early on - run in the market just "to be" in the mkt. Got spanked.
[7/10/2003 1:20:37 PM] [hotto] what is meant by "safe short"?
[7/10/2003 1:21:16 PM] [hotto] to me.. as a Trader.. means.. I have A Stop-loss Cover point Very near by..
[7/10/2003 1:21:22 PM] [mac27] me too...think that is soooo common when we start. It's hard to sit on the sidelines when you miss the beginning of a big run
[7/10/2003 1:21:44 PM] [WealthTrader] definately
[7/10/2003 1:21:56 PM] [tinaSDtrader] yes, like a top (peak) just above, or a gap open, or a 20ema - those mean a lot to me for safe shorts
[7/10/2003 1:22:36 PM] [tinaSDtrader] other common thing when starting - chase your stops downhill! Done that one too. Got spanked.
[7/10/2003 1:22:55 PM] [hotto] Remember.. Down goes about 7 times faster than UP... so.. I am willing to have several small losses on Trial Shorts...

[7/10/2003 1:24:58 PM] [tinaSDtrader] here's another common error - stock drops hard at open (or intraday), but not so hard hits stop, sell in panic, end up selling low of day.

[7/10/2003 1:26:11 PM] [tinaSDtrader] But if it hits stop, you're out.

[7/10/2003 1:29:47 PM] [syatt] Nance - looks like a short covering rally - ?
[7/10/2003 1:30:48 PM] [tinaSDtrader] These islands been under way since open, keep that in mind - they gapped up sometime within last 9 days, then gapped down at open today, leaving an island top
[7/10/2003 1:30:55 PM] [mac27] IB has a RT alert that is helpful

[7/10/2003 1:34:50 PM] [tinaSDtrader] Several of you private msging me about technical analysis - the patterns, support/resist, etc. I will put a discussion up on hotto club today recommending several books and resources for learning this stuff. If interested, especially for those who are new to trading, go to discussions for that info later today.
[7/10/2003 1:35:05 PM] [MadameButterfly] tina.. What is an island top?
[7/10/2003 1:35:09 PM] [StockStalker] tight stop about 15 cents away on this entry
[7/10/2003 1:36:57 PM] [tinaSDtrader] An island top: A stock gaps up, leaves one or more bars, then gaps down. Not a good sign for a stock. Especially if it's at the top of an uptrend, or inside another pattern. Like if you have a rising wedge, and the last top on the wedge is an island - better get out of the way or short because that's very high probability to downside.
[7/10/2003 1:37:33 PM] [tinaSDtrader] Example: E-Trade, gapped up 7/7, gapped down today. That is an island.
[7/10/2003 1:37:36 PM] [syatt] Island top example - look at a daily chart on AWE - last December 2nd - a gap up and a gap down creates an "island" up there
[7/10/2003 1:38:00 PM] [mac27] 3 ma trying to cross up on comp, DJ-30, SMH

[7/10/2003 1:40:02 PM] [tinaSDtrader] For new traders: a gap up means the high of yesterday's bar was lower than the low of today's bar. Gap down: The low of yest bar higher than the high of today's bar.

[7/10/2003 1:40:15 PM] [ChuckR] INVN...hmmm...up on a down day...accumulation??

[7/10/2003 1:40:21 PM] [hotto] USH.. had that Extra Characteristic that we like to have...

[7/10/2003 1:40:33 PM] [tinaSDtrader] Leaves a space on the chart where no price action took place. Often gaps get filled, but not always. The gap open then acts as support/resistance depending on long/short.

[7/10/2003 1:43:19 PM] [tinaSDtrader] Island tops - I don't short them if the bar does not remain bearish during the day (I use candlesticks so it's a white or hollow bar). I'm rarely in them more than 1-2 days because often get a pullback or at least a bullish day after a few down days.

[7/10/2003 1:44:38 PM] [StockStalker] a gap is a gap. based on it being up from the close

[7/10/2003 1:45:34 PM] [tinaSDtrader] yes - it can fill during the day. If it fills, it will not remain an island. But by about 15mins before close, if the day's bar is still bearish, I'll short the close and prob. get out next day. Can also scalp intraday first day it gaps down if it is charging downhill, just know if it recovers and fills gap it's no longer an island.

[7/10/2003 1:47:11 PM] [tinaSDtrader] Islands not for the faint of heart! In and of themselves, they're not as high prob. as other patterns. BUt with confirmations, down day like today, high volume on the short, inside another shorting pattern, etc. they can be quite good.

[7/10/2003 1:48:11 PM] [tinaSDtrader] I also am careful shorting a gappy stock that does an island. Gappy stocks, many foreign stocks are gappy, can do gap up and down a lot, get false signals.

[7/10/2003 1:48:24 PM] [Johnster] hotto, what about ESPR for a short, now that it's hit that \$20 target...?

[7/10/2003 1:48:58 PM] [tinaSDtrader] SNE did island top today - It's foreign and a bit gappy, but not bad.

[7/10/2003 1:49:10 PM] [hotto] STX.. note how it made a price rally last 2 weeks.. but OBV is flat..

[7/10/2003 1:49:47 PM] [hotto] another point to help me with my Short..

[7/10/2003 1:50:05 PM] [tinaSDtrader] ANZ is example of a gappy stock. Those I don't usually short, they gap all over the place.

[7/10/2003 1:53:22 PM] [hotto] ESPR.. see ... they are not done with it YET.. holding over LR30... I use that as a decision poin a lot..

[7/10/2003 1:53:58 PM] [DataMiner] Good move, Luigi, but keep watch--I notice it's curling down on the 5-minute...

[7/10/2003 1:54:03 PM] [hotto] ESPR.. as long as they hold it over LR30.. no way to fight it.. AND.. note...

[7/10/2003 1:54:13 PM] [tinaSDtrader] Last comment on island tops - I don't trade them much in a strong uptrend - like we've had since March. If market corrects, I'll be back on them a lot during the downsiwng.

[BRIEFING.COM] Sellers have taken control of the market action and have not looked back yet... Technology, biotech, and homebuilding have taken the market steadily lower, with other influential areas such as transportation, basic material, and retail contributing to the retreat as well... The latter has stumbled following a slew of somewhat disappointing June same store sales results... Specifically, Target (TGT 37.45 -1.50) has pulled the group lower in light of its below consensus gain of 0.7%, and Kohl's (KSS 53.00 -1.00) has also weighed heavily given its 2.4% decline and Q2 (July) earnings warning...

ClubHome

20ema are - 10-period exponential moving average and 20-period exponential moving avg. I put these up over my price bars on ALL time frames from daily to 1-minute. 10 gets above 20 when stock is uptrend, 10 below 20 when stock is downtrend. Moving Averages are lagging indicators, so they'll always be late if you rely on them to cross to get you in. But if you want to trade cautious, buy when 10above 20. You won't be nailing the btm but the trend will have proved it is under way.

[7/10/2003 3:05:58 PM] [hotto] Johnster.. Will answer that in 10 min.. need to see some numbers..

[7/10/2003 3:06:16 PM] [rockin] hotto - "AVII explodes to 5.97 !" you should be writing for the nightly news.:D

[7/10/2003 3:06:36 PM] [hotto] hahaah.:D

[7/10/2003 3:07:33 PM] [Miss_B] thanks tina

[7/10/2003 3:08:21 PM] [syatt] hotto - been away - r u flat the SMH?

[7/10/2003 3:08:33 PM] [NewKid] FW, CMVT SOAP buy?

[7/10/2003 3:08:52 PM] [JayW] can't short SINA or SOHU :(

[7/10/2003 3:10:40 PM] [tinaSDtrader] new traders - one of the best things I ever learned - exit voluntarily, not involuntarily - meaning: if I exit at a high point, I'm in control; if my stop gets hit, the market is in control of my trade. I always make more when I exit at a target then when my stop gets hit. Pay attn to hotto's targets, these are points he can tax max profit instead of bailing as a stock starts dropping.

[7/10/2003 3:11:20 PM] [Mickaz] New Kid You should be thinking short now not long

[7/10/2003 3:12:00 PM] [StockStalker] I agree with that one totally Tina... Make them jump up and take my offer

[7/10/2003 3:12:24 PM] [traderbigmc] don't be fueled by this pull back

[7/10/2003 3:12:47 PM] [mace] todays log will be one to print, thanks for all the ed. Hotto and Tina

[7/10/2003 3:12:56 PM] [syatt] hey anyone - the only thing hotto covered was the Q's, right? he's still short the SMH?

[7/10/2003 3:13:08 PM] [dns1] i think it is fueling some of my sell orders Bigmc! lol

[7/10/2003 3:13:10 PM] [tinaSDtrader] yes stalker - make them come up to you using a limit order to sell - but also, before you get in a trade, know the target so can exit voluntarily. Many make mistake of letting it pull back and using stop as exit. Stops are protection, not an exit strategy.

[7/10/2003 3:13:11 PM] [hotto] hey bigmc... welcome back.. Weren't you our Bear in April ?

[7/10/2003 3:15:27 PM] [tinaSDtrader] I don't trade much illiquid - I want volume on a daily basis so can get out when I need.

[7/10/2003 3:16:52 PM] [tinaSDtrader] grant - the zoom doesn't matter really, the 20ema doesn't change w/the zoom. That's a glitch on the 200ema.

[7/10/2003 3:17:01 PM] [Johnster] Yeh, I thought tbm was long, too, from his comment about not being fooled by this PB? Go figure.

One describes the action as "buy on the sizzle sell on the steak" and believes the momentum crowd will be a little more cautious about carrying 'hot' stocks into their earnings reports. Also mounting concerns that analysts will be looking for minor cracks in earnings reports as an opportunity to issue downgrades on stocks. Concerned about possibly stepping in front of a momentum train, many analysts have been raising targets on stocks but not downgrading. Earnings season is seen by many as the first time analysts will feel safe "locking in" profits on their own calls.

(GE) 28.08 -0.30: General Electric reports Q2 results tomorrow morning before the open, with consensus ests standing at \$0.38 in EPS and \$32.2 bln in sales. Bernstein believes that the co will report \$0.37, which will leave a backend-weighted second half to get to their full-year est of \$1.59; firm expects poor performances in Plastics and Consumer Products to be offset by strength in GE Capital and NBC, and expects the co to narrow its EPS guidance range fairly substantially, from \$1.55-\$1.70 to a range more like \$1.56-\$1.62. Banc of America says that Q2 appears to have come in on plan, with NBC and Power slightly better than expected and Plastics and Equipment Mgmt slightly worse.

[7/10/2003 3:42:55 PM] [tinaSDtrader] If swing trading, holding day or more, these drops don't mean so much. But if trading 5- or 15- or other intraday, that's when I want the stock closing above the 20ema for long and below it for short. All depends on what strategy you're trading and what time frame.

[7/10/2003 3:43:28 PM] [MoneyJohn] PCNTF...very painful..stopped out of half ..need it to go to 14.73 now to be flat.:(

[7/10/2003 3:54:34 PM] [dns1] Hotto, what do you think PCNTF is going to do?
[7/10/2003 3:54:39 PM] [hotto] :D
[7/10/2003 3:55:09 PM] [tinaSDtrader] Example: SWKS strong breakout 7/2, but by 7/7-7/8 it's really run, I don't hold o/n now because it's due a pullback. P/back started 7/9 and accelerated today. Often these pullbacks come back to a support point, a bottom, moving average, gap opening, etc. If you're bought on 7/9 and held o/n, you bought the hi of this swing it is in and now get to hold thru the p/back. Summary: I hold when I'm just catching the bounce up hi vol, I scalp when it's 2-3 bars up.
[7/10/2003 3:55:14 PM] [smithda9] If anyone interested - TRAC seems to be doing well.
[7/10/2003 3:56:17 PM] [turningpoint] groovy ur thought on BEAV with that in mind?

[7/10/2003 3:57:58 PM] [CDYTrader] hotto, are you holding SINA short overnight?

[7/10/2003 3:58:03 PM] [tinaSDtrader] two to three up closes - bull bars - that run up and the low of those bars gets far away from the 20eam.

[7/10/2003 3:58:14 PM] [Majtrader] Come on LOR! Its screamin' now!!

[7/10/2003 3:58:24 PM] [tinaSDtrader] sorry - ema = exponential moving avg - a very common and strong mov avg used by many traders

[7/10/2003 3:59:04 PM] [InanOut] Hotto, do you think REDF will follow PCNTF's lead?

[7/10/2003 4:00:23 PM] [tinaSDtrader] I always use exponential for my 10/20 Mov Avgs, but I use simple for 50, 100, 200. Some traders use exp. for those. The big money watches the long term MAs so be aware of them.

[7/10/2003 4:00:50 PM] [HowNow] .

[7/10/2003 4:00:58 PM] [syatt] After the close, watch for earnings reports from JNPR, SONS, PWAV, and PLUM. Tomorrow morning, look for results from GE and SGR.

[7/10/2003 4:01:18 PM] [tinaSDtrader] They act as support if a stock is falling, as resistance if a stock is rising. Stock's that clear those MAs often run but may have trouble clearing those points.

[7/10/2003 6:01:05 PM] [hotto] market acted more like a lot of Profit-taking than any extreme new selling.
[7/10/2003 6:01:39 PM] [hotto] There were several stocks that found excuses to stay green today...
[7/10/2003 6:02:38 PM] [hotto] Nothing here.. to suggest anything like a new Bear Leg.. Just part of Profit-taking to a Correction to a Big IT Rally..

[7/10/2003 11:13:07 PM] [hotto] When I see a chart with big down volume like this... One "excuse" I have learned to accept... is REFINANCING.

[7/10/2003 11:13:51 PM] [hotto] the time to buy is AFTER the refinancing is Completed... and then.. after the stock turns back up...

[7/10/2003 11:14:44 PM] [hotto] It will often.. return to "cover the close" on the day before the gap -down.. associated with the Refinancing announcement.

[7/10/2003 11:53:05 PM] [TCNut] also.....the note will not show up.....if you enter tooo much text....it may overload it....if this happens...and you have show own user notes turned on.....you put too much text in....press the n key again....and adjust the amount of text....until when you save it, the headline appears...with Hotto's targets in view...without even opening the note....if you edited it without

[7/11/2003 12:54:02 AM] [JayW] Nut, you're absolutely right about saving Hotto time and heartache whenever we can. we need to organize this and take the load off him.
[7/11/2003 12:54:42 AM] [ChartMonkey] a few others had similar problems but hard to say if their systems were set up the same etc
[7/11/2003 12:55:35 AM] [ChartMonkey] once tech support explained to me some things that were going on under the hood it made more sense to me but still think it could & should be made more bulletproof
[7/11/2003 12:56:36 AM] [ChartMonkey] at least now i have hope that next update cd won't shut be down b/c tech support told me about a few tricks
[7/11/2003 12:57:05 AM] [TCNut] yeah.....he needs a break! We are very lucky he puts up with us....so if you have any ideas....do a post....or chat around with fellow members...via Private Message....so he doesn't have to even be distracted by the ideas...until they are a valid....cohesive plan of action

[7/11/2003 12:58:29 AM] [ChartMonkey] (don't get me wrong - i wuv hotto as much as anybody)

[7/11/2003 12:58:50 AM] [TCNut] share!!?!??......I have not even gotten around to it....and others will probably benefit too

[7/11/2003 12:59:13 AM] [TCNut] what the hell is that?

[7/11/2003 12:59:24 AM] [JayW] agreed. we should tell everyone to private message others with general questions instead of asking him the same questions over and over. or organize discussions and reports more so it's straight forward.

[7/11/2003 12:59:46 AM] [TCNut] the periods.....I have always done that.

[7/11/2003 1:00:26 AM] [ChartMonkey] sorry i just think of captain kirk from the old star trek w/all the ellipses

[7/11/2003 1:00:30 AM] [FirstWave] check and see if itis a SOAP signal first, will cut down a lot .

[7/11/2003 1:01:04 AM] [TCNut] and clean it up too at the same time!

[7/11/2003 1:01:13 AM] [FirstWave] :D

[7/11/2003 1:02:03 AM] [FirstWave] Hotto's pivit reversal points are very often 5 min SOAP reversals

[7/11/2003 1:02:04 AM] [TCNut] speaking of soap signals.....I'm gettin pretty ripe:D

[7/11/2003 1:03:01 AM] [FirstWave] only one signal vs two for a "SOAP"

[7/11/2003 1:03:09 AM] [ChartMonkey] thanks for sharing tcnut :)

[7/11/2003 1:03:18 AM] [TCNut] stinky market action.....musta rubbed off on me today

[7/11/2003 1:04:16 AM] [TCNut] you can't have my soap! ChartMonkey~!

[7/11/2003 1:04:54 AM] [JayW] maybe we should elect a hotto VP, secretary and deputy defense minister :)

[7/11/2003 1:04:55 AM] [ChartMonkey] futures down - perhaps you need to switch to some shorts; might help the smell too :)

[7/11/2003 1:05:31 AM] [ChartMonkey] i recommend ISPH short - it just has that look

[7/11/2003 1:05:44 AM] [ChartMonkey] plus, i'm already short :)

[7/11/2003 1:06:02 AM] [ChartMonkey] (not that i swing enough money to move that or any other market)

[7/11/2003 1:06:11 AM] [TCNut] speaking of monkeys.....have you seen the thirsty monkey, and the stinky fingered monkey videos floating around on the net?!?!?:D

[7/11/2003 1:06:24 AM] [TCNut] hilarious

[7/11/2003 1:06:26 AM] [ChartMonkey] uh, no.

[7/11/2003 1:06:47 AM] [ChartMonkey] tcmail me w/the urls? (can't copy & paste from chat)

[7/11/2003 1:08:50 AM] [TCNut] one....the monkey is soo thirsty he drinks his own whiz.....other one....a mokey is up in a tree....and picks his booty.....then smells his finger....and it reeks so bad it startles him!....and he falls out of the tree...:8

[7/11/2003 1:09:19 AM] [ChartMonkey] i think i have seen the latter on some bloopers/funniest videos commercial

[7/11/2003 1:09:32 AM] [InanOut] Hi. Nut I read your hotto post. If I post to a chart, is that for everyone to see, or is it a private note? If it's every one I have to be super careful that it is clear and notreworthy

[7/11/2003 1:10:13 AM] [TCNut] I will have to find um.....been awhile since I have been on a video joke binge

[7/11/2003 1:10:29 AM] [ChartMonkey] i often find it helpful to be clear and

ClubHome

noteworthy for even private notes, since otherwise i'll never have a clue what i was thinking when i wrote the note... :)

[7/11/2003 1:11:55 AM] [TCNut] you can have attached notes.....as many as you want.....later....if you choose to share them.....that is a whole other process....one of the links...to the right of the headline...next to edit....it share note of choice option

[7/11/2003 1:12:58 AM] [TCNut] then you choose what clubs can see your shared chart....ect.

[7/11/2003 1:13:19 AM] [TCNut] personal notes...are just for your daily stock tracking

[7/11/2003 1:15:33 AM] [TCNut] if you use the peiod key.....instead of double spacesbar taps between sentences.....and you are a good editor of your notes...you can read a lot in the headline....without ever needing to open it

[7/11/2003 1:16:16 AM] [TCNut] paragraphs....will make the headline really short and you can't hardly read anything

[7/11/2003 1:16:25 AM] [InanOut] Thanks TCN, and CM you're absolutely right, I just feel so inadequate and slow, and relatively new to the whole TC experience, when comparing to all of the knowledge and experience floating around here

[7/11/2003 1:16:53 AM] [ChartMonkey] InanOut i was just joshin' with ya ya know :)

[7/11/2003 1:17:03 AM] [ChartMonkey] we're a good natured bunch

[7/11/2003 1:17:09 AM] [TCNut] any more questions.....just private message me...any time.....glad to help

[7/11/2003 1:17:13 AM] [InanOut] Am deeply appreciate of all the contributions, i.e. what TC is doing right now

[7/11/2003 1:17:35 AM] [Newkid49] hey folks, how about a looky at SATH.....sure looks BO'ing 2me....just htinking

[7/11/2003 1:17:40 AM] [InanOut] oh for surB)

[7/11/2003 1:18:03 AM] [ChartMonkey] what is the origin of your profile name, InanOut?

[7/11/2003 1:18:51 AM] [ChartMonkey] SATH interesting - unusually heavy volume last two days

[7/11/2003 1:18:52 AM] [InanOut] Just made it up, wanting to be in and out of trades.

[7/11/2003 1:19:10 AM] [TCNut] another tip....get into the habit of tapping the spacebar a time or two...before smilies....then it won't print over last letter...you typedB)

[7/11/2003 1:19:36 AM] [Newkid49] I thought so, ran Hotto's KRN2 & it was near the top of the unproven....

[7/11/2003 1:20:32 AM] [Newkid49] SATH may be making a true J such as i've heard CS1 talk of...

[7/11/2003 1:21:13 AM] [InanOut] Later I remembered IN an Out burgers in Calif. But I don't own any :(and also thought of sexual connotations, but won't go there ;)

[7/11/2003 1:21:33 AM] [InanOut] Sleep well FW, thanks

[7/11/2003 1:22:07 AM] [ChartMonkey] was just wondering if you were a Van Halen fan - they have a song by that name

[7/11/2003 1:22:15 AM] [Newkid49] yeah, restaurants....not sure how the Italian restaurants are doing.....lol

[7/11/2003 1:22:23 AM] [ChartMonkey] but it's not a sexual song - it's about money actually

[7/11/2003 1:22:27 AM] [InanOut] Never heard of it

[BRIEFING.COM] The market is forging on, with current gains ranging 0.7-0.9%...

The Nasdaq is outperforming its blue-chip counterparts on a relative basis due to the resilience of the semiconductor, computer, and biotech sectors... Supporting the advance are gains in the financial, retail, defense, utility, paper, and housing sectors... Currently in positive territory, but on the defensive, are the drug, networking, and software groups... The only laggards of note are the gold, oil services, disk drive, and airline sectors...

[BRIEFING.COM] Following yesterday's session of broad-based consolidation, the market is back with a vengeance... On a course of new session highs and managing gains of 1.1-1.2%, the major averages are resilient, supported by gains in the vast majority of influential sectors such as semiconductor, biotech, financial, drug, retail, defense, and paper... As a matter of fact, the only laggards of note are the disk drive and airline sectors... The latter is weak following UBS's downgrade of discounter sweethearts, Southwest (LUV 17.26 -0.77) to Reduce from Neutral and AirTran (AAI 10.99 -1.06) to Neutral from Buy saying valuations are getting stretched despite the fact that the discounters continue to gain share aggressively... According to UBS, no evidence of broader-based recovery has surfaced as of yet and full-year industry profits remain unlikely until 2005... The Nasdaq is slightly outperforming its blue-chip counterparts on a relative basis, but

[7/11/2003 1:10:07 PM] [StockStalker] when u are looking to buy long. Declining vol on the preceeding selloff is what u want

[7/11/2003 1:10:31 PM] [StockStalker] u want the stock to show u that interest is waning in that direction

[7/11/2003 1:11:04 PM] [StockStalker] the process of price discovery is really a process about volume discovery

[7/11/2003 1:11:22 PM] [TraderGeorge] SS, but the volume with the bullish engulfing pattern seems puny

[7/11/2003 1:11:37 PM] [StockStalker] u mean todays vol?

[7/11/2003 1:11:57 PM] [StockStalker] seems to me that the day is not over yer

[7/11/2003 1:12:01 PM] [StockStalker] yet

[7/11/2003 1:15:47 PM] [Mickaz] OBV on UNTD seems useless. It doesn't change much. Is that due to strong support by the big funds?
[7/11/2003 1:18:51 PM] [bwanag] Some general questions on stops:
[7/11/2003 1:19:19 PM] [bwanag] I quit using stop orders about a year ago and now use "mental stops"
[7/11/2003 1:19:26 PM] [Luigistock] Hotto being very quiet - either scalping his mind out or analyzing deeply ..could be sleeping on the kitchen table :)
[7/11/2003 1:19:52 PM] [payck] he took an hour off, said he'd be back
[7/11/2003 1:19:58 PM] [Luigistock] oh
[7/11/2003 1:19:58 PM] [Mickaz] Luigi. he left for an hour
[7/11/2003 1:20:00 PM] [bwanag] some folks in another TCnet club convinced me that the MMs could see my stop orders and use them to their advantage and my disadvantage - tru?
[7/11/2003 1:20:07 PM] [Barnabus] could be counting on way to bank
[7/11/2003 1:20:12 PM] [bwanag] TCnet club
[7/11/2003 1:20:19 PM] [Luigistock] i miss the fella

[7/11/2003 1:21:09 PM] [Luigistock] Ggt - yeah really
[7/11/2003 1:21:11 PM] [TCNut] ok Luigistock.....I give up....plug your ears...xP....going to have to bust out with some Billy Idol....Rebel Yell. Getting desperate....downloaded last night.
[7/11/2003 1:21:22 PM] [dawnraider] Barn this depends upon your broker. You must call them and ask if they advertise your stop in the market or does it sit internally and turn in to a market order when the price hits it.
[7/11/2003 1:21:22 PM] [Luigistock] whatever works Nutt
[7/11/2003 1:22:01 PM] [TCNut] man that is a burnt out song!

[7/11/2003 1:23:07 PM] [bwanag] thanks dawnraider - that is interesting - so it is possibly true, depending on broker policy
[7/11/2003 1:24:03 PM] [LtMash1A] I'm starting to learn my lesson about those stops. They have their place, but don,t just use them automatically
[7/11/2003 1:24:26 PM] [mango] meaning what LtM?

[7/11/2003 1:25:03 PM] [kmgreen] A broker said that he could "see" up to seven levels, don't know what that means, but that is what he said
[7/11/2003 1:25:10 PM] [bwanag] so, I guess if I can stay by my PC, I will continue

forward for each day as a ready reference ..and cut down on pressure on hottos attention bandwidth?

[7/11/2003 2:09:37 PM] [payck] I did that teach, I also started posting it daily to my profile

[7/11/2003 2:10:14 PM] [Luigistock] pet

[7/11/2003 2:10:20 PM] [payck] but I change it each day, to keep down the size.

With a word doc you have a long back record

[7/11/2003 2:10:26 PM] [TeachMe] thanks payck..wud luv to see it again..and again..since you already do it for yourself..wud that be possible?

[7/11/2003 2:11:13 PM] [payck] I will mail it to whoever wants it, it started Mon 7/7

[7/11/2003 2:11:51 PM] [kmgreen] On MIK, I and probably lots of others are in MIK at around 40 quite a while back. IMO we have to get rid of those ribbon clerks before we can go on to Hottos 44 targetB)

[7/11/2003 2:12:31 PM] [odysseytrader] anyone feel that PCNTF has a chance to come back to life today?

[7/11/2003 2:12:33 PM] [payck] lots of responses, let me know how you want it, tcnet or e-mail

[7/11/2003 2:13:12 PM] [TCNut] we need to do something fast....or.....the days we are fortunate enough to have Hotto holding all our hands....through thick n thin...may dwindle....faster then XING fell yesterday

[7/11/2003 2:15:29 PM] [TeachMe] payck..thank you ..I already sent you a PM on the matter with my email address..thx for your confirmation

[7/11/2003 2:15:36 PM] [TCNut] bye bye MSFT.....27.50 calls are a tease

[7/11/2003 2:16:25 PM] [odysseytrader] PCNTF a sell? it is below 11

[7/11/2003 2:16:42 PM] [swan] NI toying with BO higher.

[7/11/2003 2:17:19 PM] [rockin] I'm holding PCNTF as long as it stays above 10.80

[7/11/2003 2:17:49 PM] [Eagerbeaver] PCNTF....OUT

[7/11/2003 2:17:54 PM] [mace] in pcntf at 10.85 and have sl at 10.79

[7/11/2003 2:18:04 PM] [Caegan] I had to miss the organization session, but I sure seems to me that there has to be a way we could divide some of the labor. I know one person going through the chat log is not enough people --- but if say 5 people each devoted an hour to editing, getting together to agree on format, etc (and too bad we can't use bolding and underlining in TCNet word processing), then it would be manageable and if editted and posted to Discussions, would be readable to all. Or do an email tree and send out as Word doc, where bolding and underlining makes it easy to skim and find things. Just putting it out there.

[7/11/2003 2:18:12 PM] [RMRtrader] PCNTF a buy below 11 - stop at 10.75

[7/11/2003 2:18:16 PM] [TCNut] SONS in tight 5min BB squeeze

[7/11/2003 2:20:28 PM] [NewKid] QLGC is PB

[7/11/2003 2:20:28 PM] [TeachMe] if there is a way in WORD to find words that are all caps., all letters we could hone in on mentions of tickers and cut down some of the searching around in the chit chat

[7/11/2003 2:20:37 PM] [TeachMe] hopefully..

[7/11/2003 2:21:01 PM] [cyberact] For market tell...look at GE.....daily candle now real bearish....

[7/11/2003 2:22:55 PM] [Caegan] in Word or TCNet log, you can use Ctrl-F to find any word or letter group you want to search so when we wonder about a position ... can go to logs and do that to avoid asking hotto to repeat himself.

[7/11/2003 2:23:12 PM] [payck] I'm getting errors on TCNet about message being truncated when I try to send tmail, so, I will post it to the club site and everyone can get it there.

[7/11/2003 2:23:44 PM] [TCNut] I need to install and learn....music's...magic log soon.....do you use that Caegan?

[7/11/2003 2:23:53 PM] [rockin] thx payck

[7/11/2003 2:23:54 PM] [rambo] someone's pulling our sox down

[7/11/2003 2:24:03 PM] [Caegan] I would think we could do this w/ more than the chat log. Just as Priscilla did w/ the OBV discussions, there are a number of such topics that could be organized.

[7/11/2003 2:24:05 PM] [HOTTO] payck has posted a New Discussion: Notes beginning july 7

[7/11/2003 2:24:18 PM] [cyberact] Mer likely to follow GE..

[7/11/2003 2:24:32 PM] [payck] Will that work for everyone or do some of you still want e-mail?

[7/11/2003 2:24:49 PM] [rockin] works for me payck

[7/11/2003 2:25:12 PM] [payck] great, that is lots easier for me

[7/11/2003 2:25:20 PM] [TeachMe] on the club site is just fine payck..thanks..hopefully before market opne that is:)

[7/11/2003 2:25:36 PM] [cft26] To ALL... Missed all morning! Anything look good to scalp this afternoon? Please!

[7/11/2003 2:25:57 PM] [Flent] thx payck

[7/11/2003 2:26:05 PM] [Grinder] Post to site is fine!

[7/11/2003 2:26:09 PM] [rockin] cft - 26 just the grass - we've been watching it grow all day

[7/11/2003 2:26:11 PM] [Caegan] I use Magic Log some it's a great start. Often, I don't use it, as I want to leave some time marker for a reason. Also, it still clops things together. And doesn't leave two spaces between sentences. For me, skimming is easier w/ more spacing, but that might just be me.

[7/11/2003 2:26:11 PM] [TCNut] we sure have enough members.....1,350....er so.....if one person did on day of logs each.....!.....there would not be enough days in the logs for everyone to do!

[7/11/2003 2:26:15 PM] [Sully] I'm back and things are much better

[7/11/2003 2:26:26 PM] [Sully] My longs are looking up

[7/11/2003 2:26:49 PM] [Sully] Sometimes just need to walk away

[7/11/2003 2:27:25 PM] [Caegan] great idea, Nut. From there, we could screen for topic and compile by topic, if a core group wanted to take it on.

[7/11/2003 2:27:31 PM] [TCNut] maybe we need another club.....Hotto study club or somethingto post all the goods

[7/11/2003 3:23:50 PM] [payck] hush micky
[7/11/2003 3:24:08 PM] [HerbS] Market internals: through the day, a/d ratios have mildly trended down, numbers are still good (3:00 DJ = 1.86, NAS = 1.56) high/low have been trending up all day (3:00 dj=155/1, NAS = 227/4) ... Moneyflow has trended more positive through the day, and all averages and QQQ are looking really good. So, even though DJIA and NASDQ have trended down since 12:00, internals are stronger than averages, in my opinion
[7/11/2003 3:24:08 PM] [micky] :)

[7/11/2003 4:33:57 PM] [Harley] thanks GD

[7/11/2003 4:34:17 PM] [kmgreen] exit plans are very important, but they can be anything, quick, late, but take big ones once in a while, etc., but they need to fit your psyche. Mine is to bail when done and I can't be back in the market for a day or two, otherwise, I hold and may take a bigger loss, but they usually come back if the market is up. If the market is going down, out quicker.

[7/11/2003 4:34:18 PM] [Grounddog] I will watch that

[7/11/2003 4:34:24 PM] [Grounddog] yw

[7/11/2003 4:34:39 PM] [Flent] long UNTD 28.95 if they'll take my order, better late than never :)

[7/11/2003 4:40:18 PM] [hotto] UNTD buy at 28.95 is not late..

[7/11/2003 4:40:38 PM] [hotto] Different system.. is all.

[7/11/2003 4:41:21 PM] [hotto] I usually require a "dailyBO" now.. as a buy sig..

[7/11/2003 4:42:00 PM] [hotto] Can often get by without... but.. it is a bit more "safe"..

[7/11/2003 4:42:55 PM] [StockStalker] agree. still very early and room to get in. Just thought it sounded like a good new saying... hedging out.. see ya later or tomorrow

[7/11/2003 8:18:38 PM] [swan] .

[7/11/2003 8:18:51 PM] [hotto] QQQ was the strongest Index last week.. New Rally Highs.. so.. I looked for 1st possible "support" on charts.. It got within about .06.. then stalled... then upticked... I covered..

[7/11/2003 8:19:48 PM] [hotto] Stalling to downside.. is just as important as stalling to the upside.. when Long..

[7/11/2003 8:19:50 PM] [cyberact] i opted to stay short the q's even though i saw your post....ty...now i know..ty

[7/11/2003 8:20:22 PM] [cyberact] yeaph..i also saw the stalling...it even came back to test it...then took off....

[7/11/2003 8:20:46 PM] [cyberact] live and learn...LOL...D

[7/11/2003 8:20:57 PM] [hotto] I just figured on a bounce.. BUt ..saw a possibility.. of a strong day today.. within yesterday's Range.

[7/11/2003 8:21:46 PM] [hotto] This thing continues very strong.!.. Just look at the stocks we discussed...tonight...

[7/11/2003 8:22:06 PM] [cyberact] you were right on your assumptions...most indexes were within yesterday's range,,,eexcept the COMPQ

[7/11/2003 8:22:49 PM] [hotto] For me... the warning... came on the 6/30 market...

[7/11/2003 8:22:54 PM] [cyberact] yes..i have written them down and will study them...ty

[7/11/2003 8:23:31 PM] [hotto] when I expected DeclStox2Vol PCF to be Big.. and AdvSto2Vol PCF to have few hits..

[7/11/2003 8:24:01 PM] [hotto] when Both had 800 hits... I had a FEELING

[7/11/2003 8:24:40 PM] [wildbill] hey hot - guess us lowly scaplers are on the pay no mind list LOL- UNTD was on my final cut last night - can't remember why i didn't go with it!

[7/11/2003 8:24:44 PM] [cyberact] yes i remember....that day and your comments that night on the over 800 hits for both

[7/11/2003 8:25:10 PM] [cyberact] where you felt there was rotation

[7/11/2003 8:25:36 PM] [hotto] Big money never had a Better excuse for hitting the PT button... and ignoring.. the Buy side for a while...17 Weeks of IT Rally... biggest in history.

[7/11/2003 8:27:26 PM] [hotto] I will be going back over that Rotate TO watchlist from 6/30.. to see progress..

[7/11/2003 8:27:37 PM] [hotto] Rotate to.

[7/11/2003 8:27:38 PM] [cyberact] not the 800 hits of course but rotation to new sectors/stocks

[7/11/2003 10:17:56 PM] [hart] everyone's burned out after a frenetic week, having a few corona lights

[7/11/2003 10:18:18 PM] [hart] can't say i blame them

[7/12/2003 1:06:42 AM] [TCNut] Trader Tunes Tip--- If you like Blues Music.....the Hotto-est new girl on the scene is Shamikia Copeland! The daughter of the late blues guitar great, Johnny Copeland, nicknamed the "Texas Twister", and a Grammy Award winner. I saw her in concert in Aspen last month....andvjust got done downloading her songs....(sorry girl....hadda do it:)).....and glad I did.....the range of her voice is....well...it is so unbelievable....she threw down her microphone in the middle of the live concert to prove she could still pierce our ears with pleasure, emotion, and absolutely mind bending vocal range. Joe Cocker put on a great show too! Even so, Shamikia's Voice!.....was still reverberating throughout my head.:8

[7/12/2003 1:08:44 AM] [philbr1] but how do you really feel about her ?

[7/12/2003 1:09:20 AM] [philbr1] :)

[7/12/2003 1:10:11 AM] [TCNut] duh it's Shemekia Copeland

[7/12/2003 1:10:49 AM] [TCNut] <http://www.shemekiapeland.com/>

[7/12/2003 1:11:02 AM] [philbr1] haha, I know how you feel..I love the blues!

[7/12/2003 1:11:45 AM] [TCNut] if you do.....get aq load of her! She can rattle the house down!

[7/12/2003 1:12:16 AM] [philbr1] I'll check it out..Thanks

[7/12/2003 1:13:37 AM] [TCNut] her vocal cordws have no boundaries

[7/12/2003 1:17:11 AM] [TCNut] <http://k-lite.tk/>.....finds music....and gets rid of popups.....read carefully....

[7/12/2003 1:19:00 AM] [philbr1] oh yeah she is good

[7/12/2003 1:20:21 AM] [TCNut] If you love theblues.....she will definitely make your rig hum!....the groceries may not make it through it though :)

[7/12/2003 1:21:19 AM] [philbr1] hahaha

[7/12/2003 1:22:09 AM] [philbr1] yeah I listen to a lot of stuff while I'm driving

[7/12/2003 1:22:11 AM] [TCNut] very few vocalists....are actually better live than....the studio\album version/.....she is one!

[7/12/2003 1:23:11 AM] [philbr1] how do you down load the albums?

[7/12/2003 1:24:14 AM] [TCNut] Hang out more frequently in Hottoville!....You will soon be able to tell your boss....to Take this job and Shove IT!

[7/12/2003 1:25:00 AM] [TCNut] you have to learn.....how to be a bad boy on the net

[7/12/2003 1:27:14 AM] [TCNut] 1:17am....I left a good link....to Kazaa Lite.....the lite means it is stripped of all the adware and spyware.....regular Kazaa comes with.....read lots though...;before instqalling....

[7/12/2003 1:28:55 AM] [TCNut] I am downloading\craking tunes right now....on my desktop....so forgive typos....lil keyboard on laptop....will never get uswed to

[7/12/2003 1:29:38 AM] [TCNut] wish they would just make really big laptops with

ClubHome

21" screens...and full sized keyboards!

[7/12/2003 1:30:17 AM] [TCNut] who caresw if it's heavier.....kick down on the extreme laptops!

[7/12/2003 1:31:23 AM] [philbr1] thanks for the tips.. gotta go..work tomorrow xP

[7/12/2003 1:36:49 AM] [TCNut] yw....! come back...when you don't have to work.....so you don't have to work for swomeone else much longer.....Hotto willl teach you more in a month than you can learn from reading boooks and seminars for years

[7/12/2003 1:40:22 AM] [TCNut] regarding....adware and spyware....will be a post on itin a week or two

[7/12/2003 1:40:53 AM] [philbr1] think I screwed up the PM.. tried to say I print logs to read later etc

[7/12/2003 1:41:27 AM] [TCNut] max....pm me if anxious

[7/12/2003 1:49:45 AM] [TCNut] <http://k-lite.tk/> = free trader tunes....but need to read into it and decide if you are willing to peek over the fence of the underground net scene.....Kazaa (LITE!) is like just peeking over the fence....just the beginning....to being a bad boy\girl....on the net....news groups next.l.....totally leaving all the hacker sites aside.

[7/12/2003 1:57:13 AM] [TCNut] print away.....I am bouncing against the fence of TCWorlds sense of "benevolent correctness" as it is.....probably not suitable.....for any of you to ever pay attention to me again.....as if you ever did=D

[7/12/2003 2:09:20 AM] [TCNut] Hardware firewallls and Opera Browser is a great tool to peek over the fence....though, if you are intrigued.....and Kazaa Lite.....after intensive exploration of the web swite mentioned.....willl lead to...your ncomputer pumping out your favorite tunes.....even when your harts have formed in to a 5 min. nose dive pattern....

[7/12/2003 2:10:14 AM] [TCNut] er charts and hearts...

[7/12/2003 2:15:32 AM] [really] Having nothing better to do on a Friday night, I did a study of my AdvStks2xVol@6_30_03 list.

[7/12/2003 2:15:57 AM] [TCNut] and for your Rig.....phil.....lots of mp3 players that will connect to your computer...and load up all kindsa goodies

[7/12/2003 2:16:16 AM] [really] The list has 414 stocks. Of that list the following gains have been made from 6_30 thru today, 7_11, listed by % gain then # of stocks: 50% +8, 30% +24, 20% +59, 10% 127 .In other words of the 414 stocks there were 8 that rose 50%+ . If I compare how many stocks rose 50%, 30% etc to the universe of 6826 stocks I find the following shown as AdvStks2xVol_vs_ All stocks: 50% gain 1.9%_vs_1.1%; 30% gain 5.8%_vs_3.2%; 20% gain 14.3%_vs_7.3%; 10% gain 30.7%_vs_20.1%. In other words for a 10% gain, 30.7 % of AdvStks were on the list vs 20.1% for the total stock universe.

[7/12/2003 2:16:38 AM] [really] Clearly the numbers of stocks making sizable gains found in the AdvStks list bettered the overall market by roughly 75%.

[7/12/2003 2:17:00 AM] [really] The top 10 stocks in the AdvStks list and their increases are: IPA 192% HOMS 73% VRSO 62% CHINA 60% FTUS 59% STEL 53% HAKI 50% INTV 50% MAPS 41% OPSW 39%. The sectors represented were 4 ? Internet (HOMS CHINA STEL OPSW), 2 Computer software and services (VSRO MAPS), 2 ? Telecom (HAKI INTV), 1- Retail (FTUS) 1- Wholesale Computers (IPA).

[7/12/2003 2:17:21 AM] [really] Interestingly ASIA was not on the list. It had made its big volume increase prior to 6_30.

[7/12/2003 2:17:24 AM] [TCNut] or just pay for lots of shares of SIRI ...so my january 2.50 calls will not be stomped by XMSR any more!

[7/12/2003 2:17:40 AM] [really] There were 3 stocks not on the list that did better

ClubHome

than the best stock (IPA) on the AdvStks list. They were IAO up 270%, VRYA up 215% and CWCI up 214%. They were all in the same sectors as the top 10 AdvStks, namely Internet, Computer Software and Services, and Telecom. Notice no biotechs.

[7/12/2003 12:05:33 PM] [StockStalker] murphys law

[7/12/2003 12:05:56 PM] [StockStalker] I would like to first of all, thank Hotto for giving me the opportunity to address you guys on the topic of trading range and volatility contraction as well as get to know you better and where you stand in your trading journey

[7/12/2003 12:06:35 PM] [StockStalker] My name is Trader Oz (Oswald) and I am a full time trader and recently ventured into the area of trader training and education under the website and alias TheStockStalker. I will continue to do both as long as it is fun to do so and for as long as it does not affect my trading in an adverse way. It has actually helped it in ways could have never even of imagined.

[7/12/2003 12:07:13 PM] [StockStalker] Trading is my main objective, so lets be

ClubHome

clear about that. For more information, see my profile. Feel free to call me Oz during the chat sessions. SS looks to much like Sell Short!!!!

[7/12/2003 12:07:34 PM] [StockStalker] Ok, enough of the blah blah blah and lets talk bout trading.

[7/12/2003 12:08:05 PM] [StockStalker] Today I would like to talk about the way a stock breathes and exhales during its life cycle and how we as traders can take advantage of this continual and predictable process

[7/12/2003 12:08:28 PM] [StockStalker] I will show you how we can position ourselves early and in front of the crowd, in the very best seats and while also being the ones closest to the fire exit at the same time.

[7/12/2003 12:08:50 PM] [StockStalker] When a stock is breathing it is basically sucking in all the buyers and interest in it. Conversely, when it is exhaling, it is blowing out all of the buyers and interest

[7/12/2003 12:09:11 PM] [StockStalker] On a short setup, it is breathing when we are selling it and exhaling as we cover. It can also be considered expansion and contraction or movement and consolidation

[7/12/2003 12:09:32 PM] [StockStalker] It is the moment of silence, in between these cycles, that we seek out to capitalize on.

[7/12/2003 12:09:50 PM] [StockStalker] The quiet moment that follows after you exhale and before you take your next breath. This moment of silence is where we as technical traders are lurking and in my case Stock Stalking for opportunity.

[7/12/2003 12:10:19 PM] [StockStalker] What are the specific the things on a chart that show us we are at this juncture?

[7/12/2003 12:10:34 PM] [StockStalker] It really is quite easy to discern from the price and volume chart. The range of the bars leading into this point tend to become smaller and smaller.

[7/12/2003 12:10:55 PM] [StockStalker] The volume begins to diminish or contract as well

[7/12/2003 12:11:12 PM] [StockStalker] The interest in the immediate preceding direction is beginning to wane as this group of interest and agreement begin to change their bias and interest in the current direction of the equity and they close their positions.

[7/12/2003 12:11:40 PM] [StockStalker] Fortunately this leaves a highly distinguishable and findable pattern on our Price and Volume Chart and a pattern that we can find again and again

[7/12/2003 12:12:00 PM] [StockStalker] I mean, how hard can it be to find a narrow range bar on a price chat? And how hard is it to find shrinking volume bars?

[7/12/2003 12:13:56 PM] [StockStalker] The following chart illustrates what kind of opportunities there are available each and every day utilizing the principles of trading range contraction

[7/12/2003 12:14:08 PM] [StockStalker] U should be seeing PCLND

[7/12/2003 12:14:50 PM] [StockStalker] The vertical lines are separating the zones in which the stock price was contracting or expanding.

[7/12/2003 12:15:22 PM] [StockStalker] . Notice that the zones labeled "contraction" have very low and diminishing volume.

[7/12/2003 12:15:43 PM] [StockStalker] We will cover the meaning of the labels soon

[7/12/2003 12:16:03 PM] [StockStalker] Conversely, notice that the periods of "expansion" are characterized with not just price breakouts but volume breakouts as well.

[7/12/2003 12:16:36 PM] [StockStalker] If you look towards the right of the chart

ClubHome

you will see that is labeled declining volume on only that particular upswing.

[7/12/2003 12:17:02 PM] [StockStalker] This is the first occurrence of it in the uptrend and gave major warning signs that the trend was going to experience FIRST FAILURE or a lower high.

[7/12/2003 12:17:43 PM] [StockStalker] We were long it there and were able to get out near the top tick on that failed swing with the obvious contraction in volume that was not otherwise matching the perfect looking price action.

[7/12/2003 12:18:12 PM] [StockStalker] Volume is a serious piece of the puzzle involved in the precise entry and exit strategies utilized by the professional trader.

[7/12/2003 12:18:32 PM] [StockStalker] It is a major edge that you need make available to yourself since it is already there and all you need to do is interpret it.

[7/12/2003 12:18:52 PM] [StockStalker] Do not ignore this feedback the mkt give you about itself

[7/12/2003 12:19:12 PM] [StockStalker] Now lets talk about talk about the price action and trading entries base on that. This is the most obvious piece of the puzzle to the technical analyst and one that is well studied by many.

[7/12/2003 12:20:02 PM] [StockStalker] In 1980 Toby Crabel came out with his prolific piece of work "Day Trading With Short Term Price Patterns and Opening Range Breakout."

[7/12/2003 12:21:08 PM] [StockStalker] This wonderful work distilled and put into simple terms the basic components of trading range contraction and made it accessible to many.

[7/12/2003 12:21:31 PM] [StockStalker] Fortunately, it is out of print and not available to the masses!!!!

[7/12/2003 12:22:11 PM] [StockStalker] It is currently available on Amazon.Com and used for \$690.00 and up to \$2500.00 !!!! Go see for yourself?.

[7/12/2003 12:22:58 PM] [StockStalker] And he will not reprint it.... He makes too much money trading the system

[7/12/2003 12:23:47 PM] [StockStalker] The charts I am sharing here are labeled with much of his terminology and derivatives of it.

[7/12/2003 12:24:08 PM] [StockStalker] We as traders, do well by taking what we learn from innovators and then innovate further from our new knowledge base.

[7/12/2003 12:24:32 PM] [StockStalker] We are in effect "standing on the shoulders of giants". Don't be a piker and use someone else's knowledge as a "black box" trading method.

[7/12/2003 12:24:52 PM] [StockStalker] Learn it, Know it, Expand on it.

[7/12/2003 12:25:09 PM] [StockStalker] The terms I am using on the chart are as follows.

[7/12/2003 12:25:30 PM] [StockStalker] :o NRD: Narrow Range Day. This is a relative and subjective term and measure against previous bars.

[7/12/2003 12:26:01 PM] [StockStalker] :o NR5: This is the narrowest range price bar measured from high to low of the last 5 price bars including the current bar.

NR5's are not really considered to important unless very narrow.

[7/12/2003 12:27:10 PM] [StockStalker] :o INR5: This is the same price bar as an NR5 but it is an inside price bar. It's high and low are at or inside the price bar of the previous bar. It is more contracted since it is inside the previous bar. An Inside NR5 is very significant.

[7/12/2003 12:27:43 PM] [hotto] Excuse me... some have asked.. about copying Graphs...

[7/12/2003 12:27:54 PM] [hotto] To Copy the Shared Chart... Open a Window with Microsoft "Paint". Then.. In the TCNet Window... hit "Print Screen"... to copy the Graph into the Window's buffer.. Then Switch to the Paint Window... and hit

ClubHome

Ctrl-V... to copy the Picture in.. Then you can save the Picture to Disk.

[7/12/2003 12:28:50 PM] [hotto] thank you... back to StockStalker..)

[7/12/2003 12:29:05 PM] [StockStalker] :o NR7: This is the narrowest range price bar measured from high to low of the last 7 price bars including the current bar.

This is extremely significant and quite often marks the swing highs and lows of a given price chart.

[7/12/2003 12:29:43 PM] [StockStalker] :o INR7: This is the same price bar as an NR5 but it is an inside price bar. It's high and low This is the same price bar as an NR5 but it is an inside price bar. It's high and low are at or inside the price bar of the previous bar. It is more contracted since it is inside the previous bar. An Inside NR5 is very significant at or inside the price bar of the previous bar. It is more contracted since it is inside the previous bar. An Inside NR7 is extremely significant and the "crown jewel" of all the labels I am talking about today.

[7/12/2003 12:30:54 PM] [StockStalker] Correction on last definition. there are some errors in it

[7/12/2003 12:31:50 PM] [StockStalker] :o INR7: This is the same price bar as an NR7 but it is an inside price bar. It's high and low are at or inside the price bar of the previous bar. It is more contracted since it is inside the previous bar.. An Inside NR7 is extremely significant and the "crown jewel" of all the labels I am talking about today.

[7/12/2003 12:32:28 PM] [StockStalker] These can be used in any and all time frames. Know where you are at in all time frames. This 3 dimensional charting approach will do wonders for your trading.

[7/12/2003 12:33:50 PM] [StockStalker] Happiness is an inside 5 minute NR7 that is also inside of a 60 min NR7 that is also inside of an inside daily NR7 that is in an inside week that is in an inside month!!!!!!!

[7/12/2003 12:34:16 PM] [StockStalker] The smaller domino tipping the bigger domino, which in turn tips the even bigger domino and all caused by a series of buy stops being triggered in each new time frame as it bring in all the new participants from the amoeba to the whale.

[7/12/2003 12:34:45 PM] [StockStalker] A virtual profitable chain reaction.

[7/12/2003 12:35:39 PM] [StockStalker] before I take any questions I am about to correct a technical issue here. It may cause a crash. If so, i will be right back. I currently cannot see questions and comments. BRB

[7/12/2003 1:07:06 PM] [StockStalker] This locks in a profit and gives me a relatively "free" trade on the balance. Got lucky and top ticked the last tier!!!!

[7/12/2003 1:07:23 PM] [StockStalker] I despise selling into weakness and want to make them jump like a dog to take the stock from my hand. This mentality is critical to a trader.

[7/12/2003 1:07:46 PM] [StockStalker] We take the money of those that are scared when we bid in at support and then we sell to the greedy at price extremes that they should never be paying for a stock and they do so out of greed.

[7/12/2003 1:08:07 PM] [StockStalker] I do realize that when scaling out though, it is very common to sell the last piece on weakness. This is just natural when trying to find a top. Just don't try to find a top with the whole lot. It is a loser's game that only works when the market is in temporary agreement.

[7/12/2003 3:41:05 PM] [hotto] Lots of new members -- some general information. We have had special Saturday Chat sessions for the last 35 weeks. Each week, beginning at 12Noon ET. The main topic for the 1st 2 weeks(11/16/02 and 11/23/02) was --- using OBV to help Trading decisions. Buying, Selling, Shorting, Divergences, Confirmations. There have been many other topics, including use of LR30, BTBO trading approach, etc.. To review those Chat Logs, proceed as follows: 1. Click "Clubs" at top center of Screen. 2. Click "hotto" to top left of Screen 3. Click "Chat Logs" near center of Screen. 4. Set Date, and click "Show Logs"

[7/12/2003 3:41:36 PM] [hotto] Check out the new things (and old things) available in Hotto Club. Click "Clubs / hotto"... click on any of the items. Snoop around. Many have been updated since the original posting date. eg. "Saturday Topics" is up to date through 7/05/03.

[7/12/2003 3:42:41 PM] [REB2186] What is PPC36?

[7/12/2003 3:42:51 PM] [StockStalker] if u sign up for the two u will get it all

[7/12/2003 3:43:33 PM] [hotto] There are several PCFs available free on Hotto Club. Some were written by Hotto to take advantage of specific market opportunities, and to match up with the specific Market Patterns we see every day. Just look around in Discussions and Reports to find the PCFs and Papers. There is also a whole paper.. with about 50 Candlestick PCFs.

[7/12/2003 3:43:33 PM] [invest4eternity] hotto...are your 1 min chart settings proprietary? I don't remember seeing a shared chart with them. ty

[7/12/2003 3:44:43 PM] [hotto] invest4.. NO.. I use 1 min charts only early in the day or late.. .. or special Panic moves..

[7/12/2003 3:45:36 PM] [hotto] PPC36... a "Price Percent Change" Sort.. for watchlist Sort in TCNet..

[7/12/2003 3:45:55 PM] [really] PPC36 = C/(C36+.001). It is a PCF that you would use to sort an easyscan or watchlist. The stocks that have risen the most since 36 trading days ago will be at the top of the sort.

[7/12/2003 3:45:59 PM] [hotto] see the Bum50b PCF Paper... for more discussion...

[7/12/2003 3:46:09 PM] [jimjim] can some one tell me what the differenc is between avgv20 and avgv19.1

[7/12/2003 3:46:28 PM] [StockStalker] Ok this is the last reminder. I for got to do it during the class so i am trying to do it now. For a copy of the lesson of today in pdf format and better charting as well as more info.. Please send an eamill to stockstalker@knovamind.com Sorry for the interupt

[7/12/2003 3:46:53 PM] [really] avgv20 is for 20 days including today, avgv19.1 is 19 days stopping yesterday

[7/12/2003 3:47:16 PM] [jimjim] ty really

[7/12/2003 3:47:55 PM] [hotto] I often use avg20.1 like Oz... suggests.. since.. Today's Volume may be Special..

[7/12/2003 3:48:25 PM] [hotto] Suppose today's Vol is 10 * normal.. on a BO..

[7/12/2003 3:48:49 PM] [jimjim] Yes. Thats why I was asking. I'm still learning to speek PCF.

[7/12/2003 3:49:11 PM] [hotto] If I include today's vol in the test... like avg20 ... it

ClubHome

will make my BO Vol test a problem..

[7/12/2003 3:49:48 PM] [hotto] There are 5 Links posted on "Clubs / hotto / LINKs". They are all very useful to Traders... and all are FREE. Check them out.

[7/12/2003 3:50:10 PM] [hotto] Hotto GLOSSARY -posted in Discussions - explains many Acronyms used in Hotto Club. (BTBO, PT, UBBCSS, etc..).. Click "Clubs / hotto / Discussions / Hotto GLOSSARY"

[7/12/2003 3:50:16 PM] [really] Hotto - you are supposed to be at beach with a cool one right now. come back at 4pm PDT

[7/12/2003 3:50:33 PM] [hotto] oh,, Really !..

[7/12/2003 3:50:37 PM] [hotto] :D

[7/12/2003 3:50:52 PM] [hotto] see you later..:D

[7/12/2003 3:52:15 PM] [imjim] Hotto - One of the things that I noticed from Oz's presentation is that hisperfect charts look very much like some of your picks. The NR7 PCF really seems to help find some good ones. It will be fun to olay with.

[7/12/2003 3:52:29 PM] [imjim] play

[7/12/2003 3:52:46 PM] [hotto] Holy Cow ! 1357 members in Hotto Club..!

[7/12/2003 3:53:10 PM] [hotto] hey, kmack... look what we did !!!

[7/12/2003 3:54:22 PM] [TCNut] post your analysis on the active symbols chats.....and it will be 5,000 members in no time! ::D

[7/12/2003 3:54:48 PM] [hotto] TCNut... too many !...:D

[7/12/2003 3:56:03 PM] [hotto] imjim... comments on your comments later.. note comments on "Coils" and "Bases within bases"... and... Short Bar... prior to Buy-sig... like in XING last week...

[7/12/2003 3:56:42 PM] [TCNut] imagine you are being bombarded by Private Messages....OZ.....but hoping you can cover my BRKS question

[7/12/2003 3:57:14 PM] [Grounddog] yea 1357 of them

[7/12/2003 3:57:43 PM] [hotto] Oz.. has an improved.. structured approach.. with the NR7. Will help Hotto Club to do even better.. I think..

[7/12/2003 3:58:20 PM] [imjim] That was my thought. It's great.

[7/12/2003 3:58:20 PM] [hotto] If we can remember to use all the tools.. at the right times... REMEMBER..

[7/12/2003 3:59:20 PM] [hotto] Much of the success of any of the detailed Strategies... depends on the overall "health" of our IT Rally.

[7/12/2003 3:59:56 PM] [really] Well put Hotto. In 2001 we would be creamed

[7/12/2003 4:00:06 PM] [cyberact] hotto..how many hits do you get for NR7+ppc36?

[7/12/2003 4:00:22 PM] [imjim] I used to be an IT consultant and thought it had a steep learning curve. But the learning curve here puts everything else to shame.

[7/12/2003 4:00:22 PM] [TCNut] Health Test at 7pm? hotto?

[7/12/2003 4:00:39 PM] [hotto] Review.. the April Saturday. chats.. If you went with the Hotto Plan... back then...

[7/12/2003 4:00:58 PM] [hotto] You are well ahead now..

[7/12/2003 4:01:49 PM] [hotto] I believe the NR7 would have helped produce even larger gains...

[7/12/2003 4:02:11 PM] [cyberact] i get 15...does that agree with yours?

[7/12/2003 4:02:48 PM] [hotto] I can hardly wait to try it out.. esp in Combo with other strategies...

[7/12/2003 4:03:02 PM] [cyberact] without ppc36 i get 1688

[7/12/2003 4:03:39 PM] [cyberact] no filters

[7/12/2003 4:03:47 PM] [Dennis4Cash] i got 339 using all stocks and ppc66

[7/12/2003 4:04:05 PM] [Dennis4Cash] and vol over 200k

[7/12/2003 4:04:14 PM] [Swoop7] NR7: it looks as if things are hotting up.

[7/12/2003 4:32:34 PM] [MarcoPolo] SEBL
[7/12/2003 4:32:47 PM] [hotto] with Vol set to 271... Hits = 752
[7/12/2003 4:33:13 PM] [hotto] SEBL.. nice OBV over last 2 wks !
[7/12/2003 4:33:20 PM] [Kermitp] I got 1905 with the NR7 pcf and then I filter with 90VMA of 500K and 100% of 63VMA got 32 hits but only like 3 of them. I need to review today's lesson to see what this is suppose to be doing for us.
[7/12/2003 4:33:49 PM] [gary12] try Stochastics below 30

[7/12/2003 4:35:10 PM] [hotto] yw
[7/12/2003 4:35:57 PM] [hotto] Like SEBL.. note.. Friday was the lowest Vol for 2 wks.
[7/12/2003 4:35:59 PM] [Kermitp] I missed a good portion of the session so I better go do my homework before I comment anymore
[7/12/2003 4:37:12 PM] [MarcoPolo] Hummmm.....
[7/12/2003 4:37:33 PM] [hotto] good Kermit... worth doing... imo.. good show today..
[7/12/2003 4:38:35 PM] [Nitabug] Hotto,
[7/12/2003 4:38:51 PM] [LeelaHula] I see sooo many ... I am sure not all are "good setups" ... what other criteria to use??? OBV?
[7/12/2003 4:39:22 PM] [hotto] You know me... OBV is one of my best friends...
[7/12/2003 4:39:58 PM] [hotto] And.. with a nice Base setup... I will look for a Price Buy-sig...
[7/12/2003 4:40:08 PM] [Grounddog] AKAM
[7/12/2003 4:40:17 PM] [hotto] like "dailyBO" over yesterday's HOD... or...
[7/12/2003 4:40:39 PM] [hotto] if a long flat base... I may want BTBO.
[7/12/2003 4:40:45 PM] [Fibotrader] Suggestion for all: After you make all your Hotto pcf's, NR7, INR7, etc -- set them all up on a watchlist tab. Then the whole picture is in front of you. An additional pcf I have on my tab is %20DVol. This really saves alot of time looking for prospects.
[7/12/2003 4:40:53 PM] [Nitabug] i found Three, (ASCLD), VDAC), and (ARTNA) with good OBV
[7/12/2003 4:41:57 PM] [hotto] Hard for me to abandon my old Rules about "Buy-sig" Price triggers..
[7/12/2003 4:42:09 PM] [LeelaHula] Anyone ... MXT?
[7/12/2003 4:44:34 PM] [hotto] MXT.. I would like to see more consolidation.
[7/12/2003 4:45:06 PM] [MarcoPolo] MXT .. note what time the news came out and look at te 5 min chart
[7/12/2003 4:45:12 PM] [LeelaHula] New price level ... yes ... thanks
[7/12/2003 4:45:27 PM] [texasquire] CERN?
[7/12/2003 4:46:40 PM] [MarcoPolo] MXT.. Vol too lite for my taste
[7/12/2003 4:47:14 PM] [hotto] Nitabug... VDAC... bad Ticker ?
[7/12/2003 4:47:35 PM] [Grounddog] LNY
[7/12/2003 4:49:45 PM] [Nitabug] What Frame are you viewing Hotto?
[7/12/2003 4:49:51 PM] [hotto] CERN.. are we down.. headed up.? or Up... headed down ?
[7/12/2003 4:50:37 PM] [hotto] Nitabug.. TCNet gives me "Symbol Not Found" on VDAC daily
[7/12/2003 4:51:01 PM] [gary12] vdac
[7/12/2003 4:51:06 PM] [Nitabug] Thanks, Hotto
[7/12/2003 4:51:21 PM] [houndog] vdac
[7/12/2003 4:51:29 PM] [hotto] yw.. just wondering if you made a typo..
[7/12/2003 4:52:00 PM] [LeelaHula] I get the same ... not found message
[7/12/2003 4:52:34 PM] [Nitabug] Hotto, My error should read (VDADC)
[7/12/2003 4:52:57 PM] [hotto] got it.... thanks
[7/12/2003 4:53:41 PM] [LeelaHula] Not really a NR7 ... OR ... what am I missing?
[7/12/2003 4:53:46 PM] [TCNut] just created a pcf....with the StockStalker pcf arrows reversed....and created an easy scan with It, the new BUM50, and Optionable Stocks....wow....some sweet looking charts on that too!
[7/12/2003 4:55:16 PM] [StockStalker] arrows reversed???

[7/12/2003 4:57:25 PM] [Groundog] :8

[7/12/2003 4:57:29 PM] [StockStalker] I sometimes trade staning on my head

[7/12/2003 4:57:30 PM] [TCNut] got the idea....from copying pcf....from the logs....you have to replace all the brackets with greater than....less than signs

[7/12/2003 4:57:47 PM] [hotto] LOL

[7/12/2003 4:57:48 PM] [houndog] B)

[7/12/2003 4:58:35 PM] [TCNut] Oz....can you go over my BRKS questionit was lost in chat crash....then reentered it too late

[7/12/2003 4:59:38 PM] [StockStalker] i remember it confuced me at the time is all I remember about it

[7/12/2003 4:59:54 PM] [TCNut] nevermind

[7/12/2003 5:00:05 PM] [StockStalker] Oh come on

[7/12/2003 5:00:11 PM] [MarcoPolo] DROOY... interesting pattern

[7/12/2003 5:00:11 PM] [StockStalker] post it again

[7/12/2003 5:02:12 PM] [TCNut] On your inhale\exhale analogy.....The BRKS chart seemed like a perfect example.....Verify if I am seeing this correctly...please....on BRKS...it seems when it contracts into a consolidation pattern....with steady up volume = eventual decline while gasping for more air..... and consolidation pattern on steady down volume = eventual ascent in price and volume...after taking in a huge breath of fresh air...and resting in consolidation....BRKS is now ready to run another money marathon :)? (Was just referring to prior trends....not talking about current conditions)

[7/12/2003 5:03:39 PM] [TCNut] consolidation....with declining volume most likely a BO to the upside

[7/12/2003 5:04:10 PM] [StockStalker] one sec let me chew it up

[7/12/2003 5:04:12 PM] [TCNut] consolidation with increasing volume.....most likely a short

[7/12/2003 5:05:45 PM] [TCNut] just observation with the patterns....if you snapped a trend line on the volume bars....as the stock consolidates....

[7/12/2003 5:06:01 PM] [StockStalker] TcNut answer this for me

[7/12/2003 5:06:37 PM] [Duffer] StockStalker: will NR7 work with a runup then a J-hook pullback like with WDC?

[7/12/2003 5:07:12 PM] [StockStalker] .where is it going into a consolidation patter ...with study up volume at???? this is where u lose me

[7/12/2003 5:08:16 PM] [TCNut] january...penant formation

[7/12/2003 5:08:20 PM] [StockStalker] I seel declining vol in consolidations

[7/12/2003 5:09:15 PM] [TCNut] again mid january

[7/12/2003 5:10:21 PM] [StockStalker] there tend to be a different dynamic on each side of the 123 tho

[7/12/2003 5:10:49 PM] [StockStalker] on the way down in the downtrend the bigger vol is on the selloff

[7/12/2003 5:11:11 PM] [StockStalker] opposite on the other side of the 1 break

[7/12/2003 5:11:56 PM] [StockStalker] but in a horizontal price consolidation... then vol will die and then start to rise as it nears the resollution

[7/12/2003 5:13:25 PM] [StockStalker] some times a 2 day chart takes some of the noise away

[7/12/2003 5:13:47 PM] [StockStalker] and of course there are 2 day chart NR7's as well

[7/12/2003 5:13:55 PM] [StockStalker] as well as weekly ones

[7/12/2003 5:14:53 PM] [StockStalker] ignoring the holiday trading vol of christmas I see those days in jan as flat on the vol

[7/12/2003 5:15:07 PM] [StockStalker] and then increasing on the break

[7/12/2003 5:15:19 PM] [Brokenbob] anyone written a weekly NR7 PDF?

[7/12/2003 5:15:26 PM] [Dewey] Oz, would it make sense to write in 'declining volume' or 'below avg volume' into the NR7 PCF?

[7/12/2003 5:15:36 PM] [Brokenbob] PCF

[7/12/2003 5:15:49 PM] [TCNut] thanks...

[7/12/2003 5:15:52 PM] [imjim] I just tried to write a PCF to sort NR7 on declining volume for the last 7 days. Found some interesting charts but the sort didnt seem consistant.

[7/12/2003 5:16:10 PM] [Dewey] 'great minds'

[7/12/2003 5:16:18 PM] [StockStalker] in the june cosolidation the vol waned as well

[7/12/2003 5:16:22 PM] [Dewey] was trying to do that as well! :)

[7/12/2003 5:16:28 PM] [StockStalker] and the range narrowed

[7/12/2003 5:16:57 PM] [StockStalker] and then the vol started tickinp up after an nr7 and the move started u again

[7/12/2003 5:17:06 PM] [StockStalker] where my pointer is

[7/12/2003 5:17:35 PM] [MarcoPolo] don't see your pointer

[7/12/2003 5:18:08 PM] [StockStalker] this is an open forum now right?

[7/12/2003 5:18:23 PM] [StockStalker] oops

[7/12/2003 5:18:46 PM] [imjim] This is whar I tried. It didn't sort reliably. $V [= V1$
 $AND V1 [= V2 AND V2 [= V3 AND V3 [= V4 AND V4 [= V5 AND V5 [= V6 AND V6$
 $[/math>$

[7/12/2003 5:19:01 PM] [MarcoPolo] Its all good

[7/12/2003 5:20:00 PM] [Dewey] I don't think that each day's volumne needs to be less -- just 'below average' volume indicating the 'correction over time' that Oz talked about. Am I right OZ?

[7/12/2003 5:20:05 PM] [TCNut] the verticle date marker does not show up on shared charts, unfortunately

[7/12/2003 5:21:01 PM] [MarcoPolo] Vertical lines worked well

[7/12/2003 5:21:17 PM] [StockStalker] yes true... a waning of interest and movement

[7/12/2003 5:21:42 PM] [StockStalker] u can usa a moving average of vol to see it too

[7/12/2003 5:22:03 PM] [TCNut] just add a few more + and - signs....and reverse a few arrows too....imjim...that ought to do the job :D

[7/12/2003 5:22:32 PM] [StockStalker] i wish this darn program let me draw line on the vol chart

[7/12/2003 5:22:40 PM] [Dewey] see where you get the second half of your name, TC (nut!) :)

[7/12/2003 5:24:38 PM] [StockStalker] very nice idea bac

[7/12/2003 5:24:43 PM] [Dewey] OZ is FAST! he's already put in the LR on his shared chart!

[7/12/2003 5:25:05 PM] [StockStalker] I love this

[7/12/2003 5:25:12 PM] [bac] thx...back to the charts now :)

[7/12/2003 5:25:43 PM] [TCNut] sweet

[7/12/2003 5:42:53 PM] [Nitabug] Someone said it earlier Oz, this Hotel California...B)

[7/12/2003 5:43:44 PM] [BaronDriver] When I ran NR7 with a price and vol filter I came up with 252. Most are short canidates but finally on # 97 I have a good buy chart---LSS.

[7/12/2003 5:45:50 PM] [BaronDriver] I sould say it has possibilities

[7/12/2003 5:56:59 PM] [dns1] I think that many of the NR7 ones we look may be things you wouldn't have entered into before because they have not yet broken a trend, like VPHM.

[7/12/2003 6:00:40 PM] [TCNut] you still there Dewey?

[7/12/2003 6:01:05 PM] [BaronDriver] True, it's catching them early.

[7/12/2003 6:12:20 PM] [Fibotrader] Re: the earlier posts about NR7 and declining volume: One simple way to see what is happening on vol is to run your NR7 scan, then sort by Volume Surge 5-Day-H (a built in pcf)

[7/12/2003 6:16:16 PM] [swan] Fibo, where can we get the NR7 scan?

[7/12/2003 6:20:43 PM] [dns1] Swan, clubs, hotto, recent discussions

[7/12/2003 6:22:40 PM] [Fibotrader] swan -- had stepped away from computer

[7/12/2003 6:26:42 PM] [Fibotrader] Here is a pcf for INR7, and NR7 with inside day: (H [H1 AND L1 [L) AND (H - L) [(H1 - L1) AND (H - L) [(H2 - L2) AND (H - L) [(H3 - L3) AND (H - L) [(H4 - L4) AND (H - L) [(H5 - L5) AND (H - L) [(H6 - L6)

[7/12/2003 6:27:00 PM] [swan] ty

[7/12/2003 6:32:27 PM] [Fibotrader] WDC, an INR7 with vol declining in the pullback

[7/12/2003 6:36:49 PM] [StockStalker] U still ther Fibo

[7/12/2003 6:37:30 PM] [Talisman] Hi all

[7/12/2003 6:37:33 PM] [StockStalker] I prefer to us [= to find inside days than just [

[7/12/2003 6:37:34 PM] [Fibotrader] y

[7/12/2003 6:37:56 PM] [StockStalker] the price is still contained

[7/12/2003 6:38:29 PM] [Talisman] Fibo & Stock is that NR7 from some work done by Alan Farley by any chance?

[7/12/2003 6:38:55 PM] [StockStalker] ALan just got if off of Toby Crabel

[7/12/2003 6:39:06 PM] [Fibotrader] i saw that in the pcf posted to the club page... makes sense to use [=, I just have always used the other. still get too many to look evaluate :)

[7/12/2003 6:39:20 PM] [StockStalker] I am sure he gives him the credit tho

[7/12/2003 6:39:36 PM] [Brokenbob] PLMD came up on a INR7 scan; it seems to have not only daily INR7, but also weekly, which SS recommended. Any comments?

[7/12/2003 6:39:43 PM] [Talisman] thanks I'm not familiar with T. Crabel

[7/12/2003 6:39:55 PM] [StockStalker] from 1990

[7/12/2003 6:40:01 PM] [StockStalker] read the class log

[7/12/2003 6:40:24 PM] [StockStalker] WDC is perfect

[7/12/2003 6:41:01 PM] [Fibotrader] wdc looks tempting for sure

[7/12/2003 6:41:23 PM] [StockStalker] Crabel is more of a trader than an Author

[7/12/2003 6:42:00 PM] [Talisman] Any place to read more about Crabel?

[7/12/2003 6:42:20 PM] [StockStalker] book is over 1000 bux cuz out of print

[7/12/2003 6:42:46 PM] [StockStalker] so the class log is the best way to read about what matters in the book

[7/12/2003 6:42:50 PM] [Talisman] Wow, must be pretty good

[7/12/2003 6:43:02 PM] [Talisman] Great thanks

[7/12/2003 6:43:08 PM] [StockStalker] simple and good but rare

[7/12/2003 6:44:04 PM] [Nitabug] Ox, Your observation on (FRED).... Thx
[7/12/2003 6:44:05 PM] [StockStalker] LGTO nice
[7/12/2003 6:44:09 PM] [Fibotrader] Oz -- it looks like the best way to get a true INR7 is to not use [= in the pcf
[7/12/2003 6:44:26 PM] [StockStalker] why is that fib
[7/12/2003 6:45:38 PM] [Fibotrader] just thinking outloud :) but by definition an NR7 in most cases will be an inside bar
[7/12/2003 6:46:29 PM] [StockStalker] dont make a scan, just a pcf of it. Then run your ordinary scans for what u normalldy do. Set a column on the watchlist that has INR7 and find where there is confluence with ur existing setup
[7/12/2003 6:46:39 PM] [StockStalker] most nr7's are NOT inside
[7/12/2003 6:47:22 PM] [StockStalker] I do not even use an inr7 scan or sort
[7/12/2003 6:47:27 PM] [StockStalker] just nr7
[7/12/2003 6:47:37 PM] [StockStalker] and look at all of the
[7/12/2003 6:48:11 PM] [Fibotrader] that is what I have set up... a tab with NR7's, %20DayVol, all my NR7's and INR7 are the same symbols..as u say, NR7 is all that is needed
[7/12/2003 6:48:34 PM] [StockStalker] i rather under filter than over filter
[7/12/2003 6:49:08 PM] [StockStalker] tcnet is fast a flipping and i can know if i like it or not within 3 seconds
[7/12/2003 6:49:18 PM] [StockStalker] i can tell i do not like it in about 1 second
[7/12/2003 6:49:37 PM] [StockStalker] but to be sure i like it takes 3-10 seconds
[7/12/2003 6:50:39 PM] [StockStalker] make multiple colums of parameters that are high probablilty and then sort them all from left to right... where u see a confluence of TRUES you have a stronger trade
[7/12/2003 6:51:11 PM] [StockStalker] Inside day should be written as a seperate pcf and sorted independently
[7/12/2003 6:51:56 PM] [StockStalker] os a TRUE NR7 sort next to a TRUE inside day sort equols a INR7
[7/12/2003 6:52:05 PM] [Fibotrader] using a tag setup instead of scans is a great time saver
[7/12/2003 6:52:12 PM] [StockStalker] totally
[7/12/2003 6:52:39 PM] [StockStalker] i dont even use scans except for updating imy universe
[7/12/2003 6:52:52 PM] [Fibotrader] dinner break... really appreciate your presentation today! back shortly

[7/12/2003 7:05:25 PM] [dns1] PQUE looks like a good NR7 (and INR7) candidate

[7/12/2003 7:11:15 PM] [hotto] @MKT
[7/12/2003 7:11:32 PM] [hotto] Official start of quick mkt review.
[7/12/2003 7:12:38 PM] [hotto] NHB bounced off of LR30.. but only about half way back up Thursday's candle... weak showing.. by our original Leader.
[7/12/2003 7:13:32 PM] [hotto] NHB.. so.. we have the 3-week wide dble top in place.. for now..
[7/12/2003 7:14:07 PM] [hotto] COMPQX... our new Leader.. since early July.
[7/12/2003 7:14:20 PM] [hotto] at least.. to the upside.
[7/12/2003 7:15:12 PM] [hotto] COMPQX.. held Thursday... above all ma's adn LR30... good price strength.. rel to others..
[7/12/2003 7:15:53 PM] [hotto] Then Friday.. bounced back up.. making HOD over Thurs.. again.. good price strength...
[7/12/2003 7:16:20 PM] [hotto] Only the Summer Friday problem.. of low Volume.. clouds the picture for Naz.
[7/12/2003 7:16:54 PM] [hotto] QQQ.. matching picture.. for the derivative.
[7/12/2003 7:18:33 PM] [hotto] SP-500 shows up a bit weaker over last several days than NHB.. and more vs Naz.
[7/12/2003 7:20:02 PM] [HOTTO] BobMc has joined the club. Please welcome your new member.
[7/12/2003 7:20:04 PM] [hotto] SPY bounced back Friday.. the big gap down Thurs.. allowed Friday HOD to exceed Thurs.. HOD.. but.. no big strength.. closed below Wed. close..
[7/12/2003 7:21:06 PM] [hotto] I note again the weakness in the SPY OBV.. but.. not disastrous.. just consolidative.
[7/12/2003 7:22:09 PM] [hotto] DJ-30.. Interesting... now showing a Pos OBV divergence... very slight.. in 1st week of July..
[7/12/2003 7:23:12 PM] [hotto] ie.. OBV vs Price.. hints.. DJ-30.. may remember that "solitary walk" idea..
[7/12/2003 7:24:32 PM] [hotto] T2100... Breadth not falling apart here.. plenty here to keep our IT Rally going..
[7/12/2003 7:25:43 PM] [hotto] T2106.. McClellan Osc. acting ok.. not as strong as in May and early June.. but.. still near 0..
[7/12/2003 7:26:39 PM] [hotto] T2118... but... the total.. Breadth Momentum pic... McClellan Summation Index... still slipping.. down from the MOMO peak.. on 6/17.
[7/12/2003 7:27:54 PM] [hotto] After that little Flat last week.. slipping again.. the Momentum is not resuming as strong as before..
[7/12/2003 7:28:57 PM] [hotto] All works hand - in hand.. with the Bull / Bear picture.. a more volatile / sloppy time...
[7/12/2003 7:29:38 PM] [hotto] TOO many BULLS... NOT ENOUGH BEARS...
[7/12/2003 7:30:34 PM] [hotto] So.. we have to have sharp Price declines.. like Thursday.. to shake out some holders.. and provide some bounce energy.
[7/12/2003 7:31:18 PM] [hotto] STill from what we hear on Mutual Fund Flows.. new money continues to flow in...
[7/12/2003 7:32:01 PM] [hotto] the question is whether it is enough to offset the Insider Sales.. and all the New Stock Offerings... and Convertible offerings.
[7/12/2003 7:32:52 PM] [hotto] Soon... we will be faced with another capital demand... US Treasury auction.. August.. I think... and now that we are running Big deficits again..
[7/12/2003 7:33:52 PM] [hotto] The US Bonds and Notes.. will Be....MUST SELLS.. just when we are hearing... from every corner... to Get OUT..of Treasury Bonds..

[7/12/2003 7:35:24 PM] [TPO63] ty
[7/12/2003 7:35:59 PM] [hotto] It is just a MUST... demand on the capital markets.. AND.. IF nobody wants any...
[7/12/2003 7:36:18 PM] [hotto] could be a great big OOPS... in the Bond mkts..
[7/12/2003 7:36:41 PM] [hotto] We can worry about that in August.
[7/12/2003 7:37:05 PM] [hotto] For now.. be happy... more good earnings reports.. to come... for a week or 2..
[7/12/2003 7:37:48 PM] [hotto] so... the Argument can go on.. for now.. Bulls vs Bears..
[7/12/2003 7:38:42 PM] [hotto] We should be able to find stocks with good charts.. and buy sigs.. to trade Long on.. and Sells. to trade short on...
[7/12/2003 7:39:18 PM] [hotto] for now.. I am mostly using SMH SPY maybe BBH.. to short.
[7/12/2003 7:40:06 PM] [hotto] Not getting comfortable with the shorts.. as yet...
[7/12/2003 7:40:42 PM] [hotto] I got Stopped out of STX yesterday.. on a little short
[7/12/2003 7:41:22 PM] [pope39c] LCUT low volume breakout and MAPS breakout Friday both with large short positions
[7/12/2003 7:41:28 PM] [hotto] Thursday.. I took a small profit in a QQQ short.. lucky...
[7/12/2003 7:42:04 PM] [hotto] it reversed.. and would have been a loser by yesterday.
[7/12/2003 7:42:55 PM] [StockStalker] we did a close 123 study of that reversal thursday
[7/12/2003 7:43:29 PM] [hotto] which one , Oz ?
[7/12/2003 7:44:15 PM] [hotto] Looking through the Sectors..
[7/12/2003 7:44:45 PM] [hotto] since the May 20 Swing Low in mkts..
[7/12/2003 7:44:48 PM] [StockStalker] when the q's were trading at there lows I put up a 5 min chart here in hotto and narrated in real time the 123 vic reversal of the bottom and said that short is not where to be anymore
[7/12/2003 7:44:59 PM] [hotto] XBD--X.. is still #1.
[7/12/2003 7:46:19 PM] [hotto] thank you Oz.. I missed the lows by .06... maybe could have done better..
[7/12/2003 7:46:33 PM] [dns1] hahaha
[7/12/2003 7:46:53 PM] [StockStalker] u used ur own method two arrive at the same conclusion which was nice
[7/12/2003 7:47:06 PM] [StockStalker] confluence of stategy is good
[7/12/2003 7:47:18 PM] [StockStalker] if joined
[7/12/2003 7:47:34 PM] [hotto] yes.. I agree... I like it when various strategies arrive at same conclusions..
[7/12/2003 7:47:47 PM] [hotto] generally adds strength..
[7/12/2003 7:48:46 PM] [hotto] XBD--X is still in #1 posn... ie.. the Broker/Dealer sector has gained most since May 20 low.. and still holding #1 posn..
[7/12/2003 7:49:09 PM] [hotto] Broker /Dealer on top.. is generally good .. for the IT RALLY...
[7/12/2003 7:49:42 PM] [hotto] Also.. note.. XBC--X... made a new Rally High.. this

week... Over the June Highs..

[7/12/2003 7:50:34 PM] [hotto] and... Thursday and Friday... held above LR30... and all ma's..

[7/12/2003 7:51:11 PM] [hotto] interesting... can easily move sideways to up now...

[7/12/2003 7:51:42 PM] [PAL2] .

[7/12/2003 7:52:26 PM] [hotto] the small up on Friday.. suggests we can dip below Thursday Low this next week.. have some ma's to help hold us... just below..

[7/12/2003 7:53:07 PM] [hotto] XBD--X Broker -Dealer Index

[7/12/2003 7:53:44 PM] [hotto] DOT--X.. Internet Index.. is #2.. also made a new Rally high on Wed.. before YHOO earns.

[7/12/2003 7:54:06 PM] [hotto] but.. after the YHOO drop... and other Internets...

[7/12/2003 7:54:39 PM] [hotto] DOT--X.. still held above LR30 and ma10.. not falling apart...

[7/12/2003 7:54:57 PM] [hotto] Friday.. nice bounce in DOT--X

[7/12/2003 7:55:58 PM] [hotto] SOX--X.. Semiconductor Index... is #3.. after that big surge on 7/7... went up to retest the Highs in June.

[7/12/2003 7:56:38 PM] [hotto] SOX Thurs.. fell back.. from the dble top... and had a weak bounce Friday.

[7/12/2003 7:58:29 PM] [hotto] for SOX--X.. I use the SMH.. Holdrs.. to trade.. AND.. SMH has Volume... and thuy's.. OBV to make a better judgement of Accum /Distribution..

[7/12/2003 7:58:34 PM] [starrbucks] thx...good info

[7/12/2003 7:59:13 PM] [hotto] SMH continues to have that big OBV negative.. developed by the selling in June..

[7/12/2003 7:59:51 PM] [hotto] Still too soon to give up on the Semis.. with SMH holding near the Rally highs.

[7/12/2003 8:00:47 PM] [hotto] For now.. I will continue to use the SMH.. to Short.. on bounces.. so long as it holds in the Range..

[7/12/2003 8:01:29 PM] [hotto] That is... When I Want to be Short something... which is not all the time..

[7/12/2003 8:02:09 PM] [hotto] BKX--X.. Bank Index is #4 in the Sectors.. another Good sign...

[7/12/2003 8:02:46 PM] [hotto] We have the Brokers... and now the Banks.. near Rally Highs.. good sign for our IT Rally..

[7/12/2003 8:03:38 PM] [hotto] BKX--X... just retested the June Highs.. and

Thursday... dropped.. looking like something may get going to downside.. BUT

[7/12/2003 8:03:38 PM] [StockStalker] appears that SMH and imprev'd spy could move thing upward

[7/12/2003 8:04:55 PM] [hotto] I will be done here... soon..

[7/12/2003 8:06:02 PM] [hotto] anyway... BKX moved smartly higher again Friday.. holding most of gains..

[7/12/2003 8:06:14 PM] [hotto] a good sign..

[7/12/2003 8:07:13 PM] [hotto] GSO--X... Software INdex.. #5.. near highs..

[7/12/2003 8:07:49 PM] [hotto] RLX--X... Retail INdex.. #6... made New Rally Highs... !!! I was NOT expecting that !

[7/12/2003 8:08:16 PM] [hotto] This thing is NOT over.

[7/12/2003 8:08:58 PM] [hotto] It is Rotation.. yes.. but.. when Brokers / Banks// Retailers make new RALLY Highs...

[7/12/2003 8:09:24 PM] [hotto] We just get to keep on with our Usual.. Profitable practice..

[7/12/2003 8:09:41 PM] [hotto] Buy Stocks with Good Charts..

[7/12/2003 8:13:50 PM] [hotto] XTC--X.. ironically... now is the one to fall below LR30 , ma10 , ma20..on Thursday..

[7/12/2003 8:14:16 PM] [hotto] then bounce back Friday.. and hold below all those.. keep watch..

[7/12/2003 8:15:06 PM] [hotto] DJIA.. #11.. still with that Pos OBV.. could turn up sharply.. at any time... hmmm

[7/12/2003 8:22:38 PM] [hotto] OIH.. shows a Pos OBV divergence.. since 6/17.. when OBV made a low.. since then... has been choppy... ups and downs...

[7/12/2003 8:23:11 PM] [hotto] OBV actually edging higher.. while price declined..

[7/12/2003 8:23:39 PM] [hotto] We will soon know the anser to OIH.. and OSX--X..

[7/12/2003 8:24:19 PM] [hotto] a close over 60.60.. will turn OIH back up.. with a Pos OBV.. so watch..

[7/12/2003 8:35:05 PM] [hotto] We got the answer to the YHOO earns question.. we posed a few weeks ago...

[7/12/2003 8:35:48 PM] [hotto] Considering the Big runup in YHOO.. since April.. would we see "selling on the news"... even if

[7/12/2003 8:36:27 PM] [hotto] YHOO reported earnings above ests.. and Guided higher..

[7/12/2003 8:36:39 PM] [hotto] the answer was Yes.. PT..

[7/12/2003 8:37:01 PM] [hotto] then.. came JNPR and SONS... an up close view..

[7/12/2003 8:37:18 PM] [hotto] both beat ests.. an d guided higher...

[7/12/2003 8:37:42 PM] [hotto] JNPR dropped over a dollar.. after the report... BUT...

[7/12/2003 8:37:54 PM] [hotto] SONS Rallied over a point...

[7/12/2003 8:38:22 PM] [hotto] The market is not as blind as in the 1995 - 2000 period...

[7/12/2003 8:39:00 PM] [hotto] during that time... Beat ests.. and guide higher ...Stock would go higher... NO matter What price it started at...

[7/12/2003 8:39:15 PM] [hotto] JNPR got to over \$300.. that way...

[7/12/2003 8:39:43 PM] [hotto] NOw.. mkt took a look at JNPR.. and said.. OOPS too far .. too fast...

[7/12/2003 8:40:06 PM] [hotto] JNPR has competition.. CSCO FDRY. CIEN.. etc...

[7/12/2003 8:41:09 PM] [hotto] SONS.. is in a leadership posn.. in VOIT... has used the last few years

[7/12/2003 8:41:31 PM] [hotto] to strengthen its posn.. for when business woud resume..

[7/12/2003 8:41:55 PM] [hotto] SONS stock was about \$6 going into the Earns report...

[7/12/2003 8:42:18 PM] [hotto] the mkt moved SONS up.. and JNPR down..

[7/12/2003 8:47:00 PM] [hotto] the apostrophe... was meant to signify... the following was a Comment.. not part of the Program..
[7/12/2003 8:48:01 PM] [cyberact] ohhh.ok..ty...what about the .0001 or .001 ?
[7/12/2003 8:48:29 PM] [hotto] cyber.. the .001 or .0001.. is there just to prevent a "divide by zero" error... in case C62 comes back as 0...
[7/12/2003 8:48:56 PM] [hotto] that could happen in case of an IPO last week..or 2

[7/12/2003 8:51:35 PM] [starrbucks] thx.hotto for the review of the market...it was well worth the wait.....
[7/12/2003 8:53:15 PM] [FreeSpirit] Hotto, you mentioned a possible double-bottom in DRG--X. Would you use PPH Holdrs as a trading vehicle... I see there is a positive OBV divergence on that, or do you consider the average volume too low?
[7/12/2003 8:54:29 PM] [hotto] yw Stitch.. complex market.. but.. still enough strength to say we can trade our IT Rally on the Long side.. in Stocks with good Charts...
[7/12/2003 8:55:53 PM] [hotto] FreeSpirit.. YES]. PPH is the Tradeable Holdrs version... AND...
[7/12/2003 8:56:37 PM] [hotto] yes.. OBV Is very good.. Volume is good enough on daily.. to say... Stong...
[7/12/2003 8:57:19 PM] [hotto] and..PPH.. 1. Made dble -bottom.. like DRG--X... AND 2. gave a minimum "daily BO" on Friday...
[7/12/2003 8:57:37 PM] [hotto] PPH.. buy on an up open..
[7/12/2003 8:58:42 PM] [FreeSpirit] Thanks Hotto!
[7/12/2003 8:59:43 PM] [hotto] yw.. and thanks FS.. for asking. I forgot.
[7/12/2003 9:00:42 PM] [Stitch] Hotto, since volume proceeds price, and huge Red volume 5/19, is that day irrelevant now since stock went up after?
[7/12/2003 9:01:14 PM] [Stitch] I don't know haw far back to look at volume for big picture
[7/12/2003 9:01:18 PM] [Stitch] how
[7/12/2003 9:01:46 PM] [hotto] yeah.. one of those "events" I have gone over several times since last November..

[7/12/2003 9:03:27 PM] [hotto] I cannot remember any events that far back... but.. if you check news.. I bet.. there is a New event to account for it..
[7/12/2003 9:16:15 PM] [StockStalker] PPH nice
[7/12/2003 9:18:03 PM] [hotto] ..;)
[7/12/2003 9:18:48 PM] [Stitch] Hotto, for NVAX large red volume on 6/26, would that still be a concern now?
[7/12/2003 9:20:51 PM] [Stitch] since OBV is still down?
[7/12/2003 9:23:02 PM] [hotto] I would want to know what that was about.. but if a news thing..
[7/12/2003 9:23:56 PM] [hotto] then... the early July testing action would allow me to go long on a BO over that little base..
[7/12/2003 9:24:13 PM] [Stitch] possible FDA review delay was news on 6/26
[7/12/2003 9:24:28 PM] [StockStalker] what was that bio u asked me about today hotto in the class
[7/12/2003 9:24:56 PM] [Stitch] I see, thanks hotto, that volume issue trips me up I think.
[7/12/2003 9:25:52 PM] [hotto] the thing I look for is.. does the Selling persist...??? Note.. recently..
[7/12/2003 9:26:18 PM] [hotto] many companies have used the strong mkt to do ReFinancing..
[7/12/2003 9:26:50 PM] [hotto] and... every time we hear of one of those... the stock gets HIT for a day or 2...
[7/12/2003 9:27:22 PM] [hotto] BUT... that re-fi... will strengthen the co... in future..
[7/12/2003 9:28:18 PM] [hotto] so.. it is an "event" to be figured in
[7/12/2003 9:29:55 PM] [Stitch] re: refinancing, is announcing a convertible notes offering, an example of that?
[7/12/2003 9:30:41 PM] [hotto] yes.. most always causes Selling .. usuallly 1 day..

[7/12/2003 9:31:36 PM] [hotto] If I can get the details.. I will often Buy into the dip... if a reasonable support appears to be holding... on a dble bottom in Hourly...
[7/12/2003 9:32:14 PM] [Stitch] CCI - Crown Castle had Conv. notes offering 6/26, I bought the next day, my only decent profitable trade in a long time.....
[7/12/2003 9:32:38 PM] [hotto] There ya go..;)
[7/12/2003 9:33:04 PM] [hotto] have to be careful.... make sure the offering is well accepted by the markets..
[7/12/2003 9:33:20 PM] [hotto] and.. wait for the chart to clear up... selling over..
[7/12/2003 9:33:39 PM] [Stitch] I don't know the language though, yes, I went by the chart break out
[7/12/2003 9:33:49 PM] [hotto] then you have an "event dip" in the charts and the OBV
[7/12/2003 9:34:58 PM] [Stitch] IMNR completes 9.4 mil voluntary warrant Exercise, I'm clueless what that means..
[7/12/2003 9:35:30 PM] [Stitch] IMNR had three down days after that announcement
[7/12/2003 9:35:41 PM] [hotto] MY point on it is.. IF you can truly get your arms around an "event" news related... it is ok to trade.. after it is over... imo...
[7/12/2003 9:36:04 PM] [Stitch] Oh, I see... thanks
[7/12/2003 9:36:08 PM] [hotto] AND.. a Re-Fi event is one that poor Traders like us...can understand..

"HAS BEEN DONE"... and went ok...

[7/12/2003 9:37:32 PM] [Stitch] I wonder why refinance causes the initial selling?

[7/12/2003 9:37:34 PM] [hotto] then.. just go by your chart sigs.. and Candle sigs.. or SOAPs.. and.. expect that the Dip may be erased.

[7/12/2003 9:38:00 PM] [hotto] Re-Fi.. often means "dilution of ownership"... in shares..

[7/12/2003 9:39:36 PM] [hotto] Over the last months.. I have gone into several Re-Fi deals.. in detail...

[7/12/2003 9:39:54 PM] [Stitch] I wonder if anyone ever backtested playing the Refi news....

[7/12/2003 9:40:23 PM] [hotto] looking at the # shares.... % dilution.. implied...

[7/12/2003 9:41:56 PM] [dpg45] You mean as it happened in SIRI ICOS etc.

[7/12/2003 9:42:19 PM] [hotto] From that %dilution.. we can compute... "worst case" dip...

[7/12/2003 9:42:32 PM] [hotto] yes dpg45...

[7/12/2003 9:42:52 PM] [dpg45] Thx

[7/12/2003 9:43:05 PM] [hotto] now.. "worst case" will rarely occur.. usually only dip about half way down...

[7/12/2003 9:43:36 PM] [hotto] gives an idea of where to look for the selling to slow... and the dbl-bottom to show up...

[7/12/2003 9:44:56 PM] [hotto] So.. if a co. has 20 M shares of stock outstanding... and announces a Sale of new stock of 2M shares..

[7/12/2003 9:45:45 PM] [hotto] that will be a 10% dilution... All current owners.. Shares will be worth 10% LEss of the co... than before...

[7/12/2003 9:46:17 PM] [hotto] BUT... the New \$\$\$ raised will become cash on the balance sheet... and add to Book Value...

[7/12/2003 9:46:48 PM] [hotto] And the new \$\$ will allow co to continue growing....

[7/12/2003 9:47:14 PM] [hotto] so.. the conflicting ideas.. result in the stock selling off...

[7/12/2003 9:47:42 PM] [hotto] not usually to the -10% point... THEN... comes the announcement of the Offering price...

[7/12/2003 9:48:10 PM] [hotto] that will usually establish a ST floor...

[7/12/2003 9:48:47 PM] [hotto] the ALL Clear... comes.. of course... after the deal is done..

[7/12/2003 9:49:17 PM] [hotto] IN the case of Convertible Notes... it is often a Private placement...

[7/12/2003 9:49:56 PM] [hotto] so.. the Dip.. comes immediately... and is often over with very quickly...

[7/12/2003 9:49:59 PM] [Stitch] Offering price is a set price that the company sells the shares to a brokerage firm?

[7/12/2003 9:50:14 PM] [hotto] the dilution is only Implied.. for the future.

[7/12/2003 9:50:47 PM] [Stitch] hmmm what a racket....seems like that to me....

[7/12/2003 9:50:50 PM] [hotto] sort of.. the "PRice" will be the Offering to the Public... the dealer gets a discount

[7/12/2003 9:51:26 PM] [hotto] all part of the game... gotta be something in it for all of us... to keep it interesting..

[7/12/2003 9:51:37 PM] [Stitch] oh, I thought I am the public, I can only buy current price.

[7/12/2003 9:51:56 PM] [Stitch] You mean special customers of dealer?

[7/12/2003 9:52:24 PM] [HowNow] Are special placements sometimes rewards to

keep faithful execs going at expense of public investors?

[7/12/2003 9:53:17 PM] [Stitch] Interesting.....thanks so much for explaining that, hotto.

[7/12/2003 9:53:22 PM] [StockStalker] ;) good cuz I like it here. Actually learning stuff too. Following PDLI

[7/12/2003 9:54:09 PM] [Stitch] wow, a current example, thanks Oz

[7/12/2003 9:57:59 PM] [hotto] SONS.. is up in the 12/7/01 Spike .. that was a Swiing High..

[7/12/2003 9:58:18 PM] [hotto] traded 39M shares that day.

[7/12/2003 9:58:39 PM] [hotto] HOD was 8.37.. fwiw

[7/12/2003 9:59:01 PM] [Stitch] PDLI, first mention of Conv. Notes I see was 7/7, plenty of time to sell..

[7/12/2003 9:59:51 PM] [hotto] yes... PDLI.. a few interesting things about it...

[7/12/2003 10:00:04 PM] [hotto] connection to IMCL..

[7/12/2003 10:00:15 PM] [StockStalker] chat is a beauty but the vol is distorted

[7/12/2003 10:00:19 PM] [hotto] the VERY short Candle Friday.

[7/12/2003 10:00:56 PM] [hotto] Vol has to do with the Converts.. I will take a new "Buy sig"

[7/12/2003 10:01:13 PM] [hotto] Earnings are due.. 7/29..

[7/12/2003 10:02:26 PM] [hotto] SONS... If it can get up near the 8.. price before PB...

[7/12/2003 10:03:25 PM] [hotto] then.. after next PB.. and base.. SONS will be ready to march up the 2001 Hill toward 16+...

[7/12/2003 10:04:41 PM] [Stitch] where can I find teachings on "Buy Sig"?

[7/12/2003 10:05:25 PM] [Duffer] Hotto and SS just realized COMPQX is NR7. Is this correct?

[7/12/2003 10:06:27 PM] [StockStalker] Y

[7/12/2003 10:07:32 PM] [Duffer] Does it make a difference or mean anything?

[7/12/2003 10:07:49 PM] [hotto] the "simplest" buy - sig is just the "daily BO'... over prior day's HOD.. not Great.. but.. something to show buyers overcoming sellers.. at least at ONE decision point

[7/12/2003 10:08:21 PM] [Duffer] tks

[7/12/2003 10:08:42 PM] [hotto] my comment was about PDLI...

[7/12/2003 10:10:13 PM] [hotto] THE Big Vol down days.. are related to the Note offering.. AND.. a Positive way to think of it... is.. PDLI was able to absorb all that selling... Without dropping below prior Swing Low... or ma50..

[7/12/2003 10:10:55 PM] [hotto] now... we need an UP .. move... to prove that the Selling is Really behind us..

[7/12/2003 10:11:20 PM] [Stitch] What is the abbreviation "sig" short for?

[7/12/2003 10:11:44 PM] [hotto] so.. I don't want to buy... until I get some kind of Buy-sig (signal)

[7/12/2003 10:12:01 PM] [Stitch] Oh, da

[7/12/2003 10:12:27 PM] [StockStalker] so is the actual convertible price a place of resistance on the chart in the future with the dilution that can occur there

[7/12/2003 10:12:29 PM] [hotto] A close over the 7/9 HOD.. would help me believe..

[7/12/2003 10:13:03 PM] [Stitch] I thought it was some complicated Signiture formula... =D

[7/12/2003 10:13:23 PM] [hotto] Yes.. the Price at which it Will be convertible... the Markets will remember..

[7/12/2003 10:14:07 PM] [hotto] so.. going in.. to the Convertible announcement... there are 2 Prices to consider...

ClubHome

[7/12/2003 10:14:49 PM] [hotto] 1. the Price... adjusted for the implied dilution... if all notes are converted sometime..

[7/12/2003 10:15:13 PM] [hotto] 2. the Conversion price... (may be at \$25 or ???)

[7/12/2003 10:15:27 PM] [hotto] sorry... I have forgotten on PDLI..

[7/12/2003 10:15:44 PM] [Stitch] 20.14

[7/12/2003 10:15:46 PM] [StockStalker] 20.14

[7/12/2003 10:16:02 PM] [hotto] ok.. there is our Resistance..

[7/12/2003 10:16:16 PM] [hotto] just about the High on 6/6..

[7/12/2003 10:16:25 PM] [StockStalker] coincide with dbl top

[7/12/2003 10:16:40 PM] [hotto] Nice work they did...)

[7/12/2003 10:16:48 PM] [StockStalker] they did it for a reason!!!!!!

[7/12/2003 10:17:15 PM] [StockStalker] I will be armed with bullets and ready to shoot it there:P

[7/12/2003 10:17:24 PM] [Stitch] So did the dilution already occur or will it occur when the conversion takes place?

[7/12/2003 10:17:30 PM] [hotto] yep... Now... dropped to 14.25.. Almost a 50% gain available...

[7/12/2003 10:17:42 PM] [hotto] no dilution now...

[7/12/2003 10:18:20 PM] [hotto] so... the Drop in price.... was just to account for the Theoretical Dilution... Implied by the Notes..

[7/12/2003 10:19:02 PM] [Stitch] oh, that's what you referred to earlier, implied dilution... I get it.

[7/12/2003 10:19:06 PM] [hotto] My favorite.. is buying on the DIP of a Convert Note offering announcement..

[7/12/2003 10:19:34 PM] [hotto] yeah.. Often.. the company buys back the Notes.. they never actually get converted...

[7/12/2003 10:19:50 PM] [StockStalker] I was well out on my way to finally leave this computer today Hotto to have a beer but you trapped me again with this great information

[7/12/2003 10:19:51 PM] [hotto] so... the Dilution.. never really occurs..

[7/12/2003 10:20:03 PM] [hotto] hahahaha...D

[7/12/2003 10:20:20 PM] [hotto] Hey.. Let's both go get a beer now...!

[7/13/2003 3:18:29 PM] [bmweyrauch] re: OBV it's doggone aggregating that the OBV values are calculate available...the code is already in the system...and they won't give us access to it via PCFs.....OK...soap away...sorry....but keep those cards and letters and emails coming in folks...maybe someday

[7/13/2003 3:18:43 PM] [hotto] AND.. I can usually pick out points.. like "Refinancing".. that can be explain

[7/13/2003 3:19:06 PM] [hotto] I can't Unravel that... in a Black Box Indicator...

[7/13/2003 3:19:29 PM] [hotto] I wrote about "discontinuities" in November.. and other times...

[7/13/2003 3:19:37 PM] [cft26] WOW. You are going! :o

[7/13/2003 3:19:54 PM] [hotto] NOw.. I, too ... will put away MY soapbox... for today..:)

[7/13/2003 3:20:09 PM] [cft26] Whew!!!

[7/13/2003 3:20:16 PM] [hotto] :D

[7/13/2003 3:20:43 PM] [wildbill] somebody here lookin for a lost soapbox..... i believe i have one around somewhere!

[7/13/2003 3:20:44 PM] [hotto] dangerous.. to allow me too much sleep.. over 5 hours.. never know..

[7/13/2003 3:21:04 PM] [AstuteWins] You've been asking for OBV for quite a while, hotto. Hopefully, some listening and they're working on it.

[7/13/2003 3:21:40 PM] [hotto] Over 3 years.. Begging for about a year...

[7/13/2003 3:22:18 PM] [hotto] April.. Stockcharts.com helped get me by...

[7/13/2003 3:23:14 PM] [hotto] Now.. testing TC-Companion.. any day..

[7/13/2003 3:25:00 PM] [acmetrader] tc has obv, you don't trust it?

[7/13/2003 3:25:09 PM] [cft26] Speaking of DCLK ... Daily NR7 & 7-NR7's on 15min chart on Friday! Have with it on Tradestation which allows for back testing and Alerts intra-day!

[7/13/2003 3:25:53 PM] [cft26] check that ... 6 NR7's 15min!

[7/13/2003 3:26:40 PM] [hotto] cft.. yes.. DCLK is in the List... for the coming week.. still working on it..

[7/13/2003 3:27:02 PM] [hotto] acme.. looks good.. so far.

[7/13/2003 3:30:55 PM] [Tradermurph] is there any consensus on a good EDAT Brocker ? Anyone ?

[7/13/2003 3:31:02 PM] [hotto] TrendFriend...ty..:)

[7/13/2003 3:32:37 PM] [hotto] BAKR ?

[7/13/2003 3:34:14 PM] [TrendFriend] BRKA

[7/13/2003 3:35:02 PM] [TrendFriend] dyslexic BRKR

[7/13/2003 3:36:07 PM] [TrendFriend] also IGLD

[7/13/2003 3:36:43 PM] [hotto] most of those will be in the list.

[7/13/2003 3:37:35 PM] [bmweyrauch] TrendFriend - what group did you start with, All Stock?

[7/13/2003 3:38:47 PM] [hotto] That was my 1st move... to convolving with PlanA1..

[7/13/2003 3:39:29 PM] [hotto] since.. at the latter stage of the IT Rally... PlanA.. has been the last group t over the years..

[7/13/2003 3:40:29 PM] [hotto] I have worked on Consolidation / correction patterns over the years.. to fin what I had..

[7/13/2003 3:41:18 PM] [hotto] maybe NR7 .. or INR5.. will help.. I plan to try some \$\$ on it..

[7/13/2003 3:42:15 PM] [hotto] In another month.. I will know a lot more... but.. the Theory looks good..

[7/13/2003 3:42:43 PM] [hotto] If you have the Farley book.. read over the NR7 refs.. useful..

[7/13/2003 3:44:10 PM] [arch] I think if you will look at the nr7 and jhook patterns they will usually look sim in a running market

[7/13/2003 4:00:28 PM] [Harley] I think it just needs a little time
[7/13/2003 4:00:56 PM] [texasquire] Hotto, I believe it would be useful to pay attention to the narrowing of bands as well when prospecting for breakout candidates. Lack of volatility implies the "calm before the storm" agree?
[7/13/2003 4:01:12 PM] [Dennis4Cash] how much time will it need? I am getting old=o

[7/13/2003 4:12:04 PM] [bmweyrauch] Trendfriend - really like your idea for set-up on tabs discussed above found 58 on INR7 and BUM50....thanks
[7/13/2003 4:30:49 PM] [really] I am still having difficulty understanding NR7. Seems to me something is not decent looking charts and some not so decent looking. For instance SRCL passes the test. But it hardly looks like a coiled spring. More like a spring that has already uncoiled. Seems to me we need either narrow BB or something regarding the absolute Highs and Lows, not just the difference between the highs and lows.
[7/13/2003 4:34:32 PM] [sear] Is there a candlestick1 show this evening?
[7/13/2003 4:37:59 PM] [hotto] really.. by itself.. not enough.. but.. convolved with other factors.. this "concept" can help find those "coiled springs" with energy... But .. you are right.. many are just "dead dogs".. and will die there..;)

[7/13/2003 4:41:26 PM] [cyberact] really...hey i am not a PCF wizzaed but sort of agree with you...somethi missing...looked at a lot of charts...on the inr5/nr7 nd no cigar...but take a look at CYTC...it looks kike it sh either of these but it in not in either of them....
[7/13/2003 4:41:46 PM] [sear] ok ty everyone
[7/13/2003 4:42:32 PM] [really] Hotto - look at SRCL. It has moved from \$42 to \$46 while still passing the l not a dead dog. I understand that a NR7 may stay as an NR7 for years just bouncing around the base.
[7/13/2003 4:47:06 PM] [really] cyberact - CYTC does pass the the NR7 test. On my search it is #1193 .
[7/13/2003 4:47:18 PM] [hotto] I see.. you are on the opposite end.. after a big run. Maybe the contraction warning.. I will need a lot of experience / testing.. to understand these cases.. Meanwhile.. I think I can use PlanA1.. or Bum50b or others.. to help find some new Long candidates with "coiled energy".. we will see.
[7/13/2003 4:47:26 PM] [Noname] you'll find that using a 3DMA with an 8DMA or a 3 DMA and an 15 DMA promotes and uses will show you just about the same thing as a NR7
[7/13/2003 4:47:48 PM] [Noname] no magic here

[7/13/2003 4:56:42 PM] [really] you aren't doing anything wrong
[7/13/2003 4:57:33 PM] [really] your are taking all stocks and then sorting them by today's close divided b: days ago
[7/13/2003 4:57:52 PM] [gordo] Hotto, Pls tell my wife that, she thinks I should be as smart as Hotto.
[7/13/2003 4:57:58 PM] [really] just look at the top ones. you want the ones that are rising
[7/13/2003 4:59:07 PM] [gordo] Tks Really too.
[7/13/2003 4:59:53 PM] [really] in the sort window you will see numbers like 3.98 1.7 down to 1.0 and ther the % they have risen if you subtract 1 from that number.
[7/13/2003 5:01:51 PM] [gordo] Really, tks. that does it.
[7/13/2003 5:05:18 PM] [really] cyderact - If you are having trouble with a PCF, and I seem to have trouble sign out of TCNet and then back in again. Many times that will clean it up. Also for the PCF, do the test on are familiar with and see if you get the correct numbers. I typed in H 2-L2 the other day, instead of H2-L2. at test I saw that the equation had 5.23 2 - 4.35 . I have no idea what the answer to it is, but I could see it took the space out between the H and 2 and corrected the problem. The spaces are very hard to see just equation, but the test shows it up in spades.

Trader Pro, please send me a TCMAIL (not a pm!). I have been complaining, and I have the opportunity to talk with their principals for ATP - I would love to have other user's complaints to accompany my own. Who knows might even listen

[7/13/2003 6:54:52 PM] [sear] djcd have you closed and restarted TcNet after installation ?

[7/13/2003 6:55:30 PM] [Tradeboy] Got my TCnet new versions on Friday-is there anything i could do to prevent some of the glitches reported here over the last 6 wks. before i install??

[7/13/2003 6:55:39 PM] [sisterpractical] I updated, closed all, did the install, opened TCNet, closed it, and I always do that on software upgrades of any sort.

[7/13/2003 6:56:24 PM] [Tradeboy] thnx sister,I will try that.

[7/13/2003 6:56:30 PM] [sisterpractical] on my laptop there was some attempted grinding of the CDRom or something close - like it was moving stuff to the hard drive or something. I used the 3-fingered salute to close it, and it was fine.

[7/13/2003 6:56:52 PM] [sear] Tradeboy -you could also pray

[7/13/2003 7:46:21 PM] [djcd] hotto what do u think about INTU is it true for NR7 condition?

[7/13/2003 7:46:41 PM] [Tradermurph] is esignal tradestation and tcnet the same stuff ?? anyone ?

[7/13/2003 7:47:34 PM] [Saroj] what do you mean "same stuff"?

[7/13/2003 7:48:02 PM] [Tradermurph] same platforms charts etc

[7/13/2003 7:48:40 PM] [Tradermurph] im looking for a good edat broker !

[7/13/2003 7:49:11 PM] [Saroj] I use tradestation (TS) and tcnet (TC) - they are VERY different - each has strengths and weaknesses. don't know anything about esignal.

[7/13/2003 7:49:26 PM] [Saroj] don't know what "edat" is.

[7/13/2003 7:49:48 PM] [Tradermurph] direct access trades

[7/13/2003 7:50:05 PM] [Tradermurph] im using scottrade now

[7/13/2003 7:50:46 PM] [Tradermurph] looking at mb trad, whatley, rushtrade etc

[7/13/2003 7:52:25 PM] [Saroj] TS is a true direct access broker. fills are great. support and staff are great. very flexible. great flexibility and capabilities. Also check out Cybertrader. Lots of folks here use Interactive Brokers. I tried them and couldn't stand them. hotto uses a new direct access broker, but don't know the name.

[7/13/2003 7:52:54 PM] [wildbill] some of the better ones in no particular order IB - thinkorswim- tradestation- cybertrader- and my own personal favorite tradeportal - fwiw

[7/13/2003 7:52:54 PM] [Hawk21] i use both tcnet and esignal. both have strengths. i like the chat in tcnet. the experience of this club. esignal has some different charting tools.

[7/13/2003 7:53:29 PM] [Saroj] tradeportal may be what hotto is using now. rings a bell (however faint).

[7/13/2003 7:53:40 PM] [Tradermurph] thks all

[7/13/2003 9:28:16 PM] [really] Stalker - did you see the ad in the IBD monday July, 7 2003 page A16. Title make up to 17 profitable trades every single day the market is open. Even if you are now working a full-time page ad. What is that all about.
[7/13/2003 9:28:59 PM] [FirstWave] Wade doing a come back ?
[7/13/2003 9:31:08 PM] [really] FW - you referring to the ad? If so, who is Wade?
[7/13/2003 9:31:51 PM] [wildbill] that same gentleman sent me a first class personalized invitation to use but I don't remember his name though - hallburg or something like that - I think I have no idea where he got my address
[7/13/2003 9:34:16 PM] [JayW] anyone know of some good portfolio management/tracking software?
[7/13/2003 9:35:04 PM] [Zathrus] I'm using Medved Quotetracker coupled with Quicken....
[7/13/2003 9:36:07 PM] [JayW] yeah just started using quotetracker... but it doesn't seem to have tools like history and reporting
[7/13/2003 9:36:49 PM] [Zathrus] right - that's what I use Quicken for - the longer term stuff - but I'd like to find something better for that...

[7/13/2003 10:00:18 PM] [dpg45] They sent a CD to my friend
[7/13/2003 10:01:44 PM] [dpg45] But I learned more in few months than Hotto club
[7/13/2003 10:04:02 PM] [jasp] I went to several of Wade's classes. Got sick and tired of listening to him waste my time
[7/13/2003 10:04:38 PM] [jasp] His instructors were good when they weren't selling more classes and books
[7/13/2003 10:04:53 PM] [dpg45] That's right
[7/13/2003 10:05:53 PM] [jasp] Making more money since I got TCNET. Have learned the program and learned a lot from Hotto, McD and many others.

[7/13/2003 10:07:16 PM] [jasp] I missed McD's demo on his Freedom software. Had other stuff that was too busy to get done.

[7/13/2003 10:19:11 PM] [ChuckR] I did
[7/13/2003 10:19:42 PM] [Zathrus] one thing that confuses me is the conflict between candlestick method
method - candlestick - only real body matters
[7/13/2003 10:20:01 PM] [Zathrus] your method - wicks matter
[7/13/2003 10:20:05 PM] [StockStalker] still working on it. It is more detailed and broader
[7/13/2003 10:20:19 PM] [Zathrus] so doji is very significant in CS - maybe not in yours
[7/13/2003 10:21:03 PM] [Zathrus] Also ignoring gaps up or down bothers me a bit...
[7/13/2003 10:21:03 PM] [Zathrus] Also ignoring gaps up or down bothers me a bit...
[7/13/2003 10:21:03 PM] [StockStalker] there is not candlstic method really. Candlesticks are a visual tool
we create methods to trade with
[7/13/2003 10:21:11 PM] [StockStalker] Doji very significant
[7/13/2003 10:21:17 PM] [StockStalker] one of the most
[7/13/2003 10:21:34 PM] [StockStalker] I dont know who ignores those... do I
[7/13/2003 10:21:38 PM] [Zathrus] but a doji with long wicks would not fit in an NRX sort of screen -
[7/13/2003 10:21:47 PM] [StockStalker] dojis tent to be narrow range days

[7/13/2003 10:22:32 PM] [StockStalker] the methods Nr7 and the long legged doje are not mutually exclus
terms of validity
[7/13/2003 10:22:57 PM] [StockStalker] they are both individaul pieces of an an overall pattern that can be
succesfully
[7/13/2003 10:23:04 PM] [StockStalker] there is no one right way
[7/13/2003 10:23:30 PM] [wildbill] if it is any consolation wicks are extremely significant if you want to "cat

[7/13/2003 10:24:13 PM] [StockStalker] why does the existence of a profitable NR7 trade negate any thin concepts of a long legged doji

[7/13/2003 10:24:49 PM] [Zathrus] if one considers the legs, it would be very difficult to trigger the Nr7 on true?

[7/13/2003 10:24:51 PM] [StockStalker] the whole concept of buying a breakout above a previous days hi on that days closing price but based on the high (wick) of the day

[7/13/2003 10:25:12 PM] [StockStalker] so to say only the close matters is not a good thing

[7/13/2003 10:25:20 PM] [StockStalker] but is is important to be sure

[7/13/2003 10:25:36 PM] [Grinder] Hi OZ! Received your e-mail response but no PDF file. Did I misunders

[7/13/2003 10:25:45 PM] [StockStalker] it is not ready yet

[7/13/2003 10:25:52 PM] [StockStalker] will take a few days

[7/13/2003 10:25:58 PM] [Zathrus] but that is one of the biggest concepts of candlestick trading methods - understanding the opening and the closing, and what they mean....

[7/13/2003 10:26:01 PM] [StockStalker] it is much more than what we did on Saturday

[7/13/2003 10:26:18 PM] [StockStalker] well then why show the wicks at all then?

[7/13/2003 10:26:28 PM] [Grinder] Ok anything worth while is worth waiting for. Not too original!

[7/13/2003 10:26:33 PM] [StockStalker] they obviously have value

[7/13/2003 10:26:47 PM] [Zathrus] they do have significance , but less than the O and C -

[7/13/2003 10:27:05 PM] [jasp] If you are bridge players, these rules kind of remind me of the Rabbi rule th King is singleton lead your ace. Rule doesn't tell you how you know the king is singleton. Rules won't tell everything we need to know but they can serve as guides.

[7/13/2003 10:27:35 PM] [StockStalker] but I never even gave rules

[7/13/2003 10:27:50 PM] [sggin1] StockStalker, I read the chat log from Sat, v nice , TY for the great info

[7/13/2003 10:27:55 PM] [StockStalker] I showed that volatility follows range contraction

[7/13/2003 10:27:55 PM] [jasp] Get enough guides pointing in the same direction and we probably want to same direction.

[7/13/2003 10:28:02 PM] [StockStalker] yes

[7/13/2003 10:28:21 PM] [StockStalker] the truth is i love a doji nr7 the most

[7/13/2003 10:29:35 PM] [jasp] Would you please share a chart showing a doji nr7 so we can follow you?

[7/13/2003 10:29:44 PM] [Zathrus] agreed - if one considers the body only, the doji is the absolute best th have there....

[7/13/2003 10:30:39 PM] [Miss_B] sstalker could you please tell me where i can find the nr7 & nr5 scans t

[7/13/2003 10:30:50 PM] [Zathrus] ZBRA - is this a short via Nr7?

[7/13/2003 10:31:04 PM] [StockStalker] r u explaining theoretical concepts to me that u have been though you telling me of things that have already actually made you a consistent and profitable trader Zat?

[7/13/2003 10:31:39 PM] [Zathrus] I've been digesting the work Candlestick1 has been working on - making it so far....

[7/13/2003 10:31:59 PM] [Zathrus] but basically because I understand WHY it works

[7/13/2003 10:32:39 PM] [Zathrus] I'm not refuting what you're saying - just trying to fit it into my world view what I mean

[7/13/2003 10:32:58 PM] [StockStalker] Imagine this....(give me a sec to type it out) and listen

[7/13/2003 10:33:13 PM] [djcd] INTU is breaking out NR7?

[7/13/2003 10:33:41 PM] [StockStalker] a price bar on a chart is a representation of price and time.... the mo price during that time. soooo

[7/13/2003 10:34:19 PM] [StockStalker] if I thru a ball straight up in the air and the trip to the apex took 3 s

[7/13/2003 10:35:05 PM] [StockStalker] and I made a "1/2 second chart" of the distance moved in each h

[7/13/2003 10:35:29 PM] [StockStalker] the first "bar" may be 2 feet

[7/13/2003 10:35:38 PM] [StockStalker] the second 1-9

[7/13/2003 10:35:54 PM] [StockStalker] the 3rd 1-4

[7/13/2003 10:36:09 PM] [StockStalker] the 4th 9"

[7/13/2003 10:36:26 PM] [StockStalker] the fifth would be 5"

[7/13/2003 10:36:50 PM] [StockStalker] and the last one 2" as it hit the apex and stalled

[7/13/2003 10:38:20 PM] [StockStalker] a doji would happen if the time parameter caught it exactly correct
[7/13/2003 10:38:45 PM] [Zathrus] I have no issue with that - just whether the H&L should be used rather
[7/13/2003 10:38:46 PM] [StockStalker] but even a 2 inch move in the last bar is enuff to tell u you are ab

[7/13/2003 10:40:32 PM] [Zathrus] Did I understand from the Sat session....
[7/13/2003 10:40:46 PM] [enzo] good evening all
[7/13/2003 10:40:52 PM] [cft26] Is the NR& ie: 2"move common at reversal or end of current dip or top?
[7/13/2003 10:40:55 PM] [Zathrus] that an day to day jump (like a gap up), could be ignored?
[7/13/2003 10:41:11 PM] [Zathrus] when considering an Nr7?
[7/13/2003 10:41:45 PM] [dRb] Miss, as I understand it, NR7 is ((H - L) [= (H1 - L1)) and ((H - L) [= (H2 - L) [= (H3 - L3)) and ((H - L) [= (H4 - L4)) and ((H - L) [= (H5 - L5)) and ((H - L) [= (H6 - L6)) .. hope I got al correct.:8
[7/13/2003 10:41:59 PM] [Zathrus] or is the bottom of the gap to be considered as part of the price move f
[7/13/2003 10:43:24 PM] [StockStalker] I am not sure what i said about gaps and do not remember even t
word. But gaps are very important and that each side of the gap is support and resistance when revisited
[7/13/2003 10:44:27 PM] [Zathrus] At any rate - I think I have a better picture of what you're going for now
[7/13/2003 10:44:42 PM] [Zathrus] So - tell me what you think about ZBRA -

[7/13/2003 10:45:17 PM] [StockStalker] agreed
[7/13/2003 10:46:33 PM] [hNovice] Hi OZ, is this a NR7 on DND
[7/13/2003 10:46:35 PM] [Zathrus] So I guess the fine point I was driving at earlier was this - if the doji wa

[7/13/2003 10:46:57 PM] [StockStalker] a long legged doji is a sign of a "tie" with the bulls and bears. An
the same thing

[7/13/2003 10:47:17 PM] [StockStalker] no it would not

touch lower in early trading, anxiously awaiting tomorrow's testimony by Greenspan before the House. Ten-year note down an eighth of a point to yield 3.64%. Despite all the recent pessimism, the market actually has been able to eke out the smallest of gains in each of the past four days; this should be seen as a positive development since the market has been trying really hard to trade lower. The Fed Chairman's testimony tomorrow should determine which side of that range we break out of. Nothing of note on today's economic calendar, ahead of retail sales and the Empire State Index tomorrow.

The card produces on average 2.6% in fees per transaction. The article points to the strength in the franchise being somewhat obscured by the weak performance in its financial advisory business. It is now poised to shatter its 2000 earnings record with analysts expecting the co to earn \$3 bln or \$2.26 per share in 2003 and \$2.54 per share in 2004. In addition, the credit card litigation with Visa USA and Mastercard International could also provide further upside if they lose a court appeal to bar member banks from issuing competing brands.

[7/14/2003 8:38:07 AM] [Grounddog] 08:37 ET Chip makers might be gearing up for semi demand -- WSJ : The Wall Street Journal article suggests customer cautiousness in ordering new equipment to expand capacity might be coming to an end soon. The article points to one piece of evidence being factories filling up with TSMC recently reporting its factories operating at 86% capacity in the second quarter, up from 67% in the first quarter. In addition, market research firm Gartner estimates plant utilization at 81% for the entire industry. However, Intel plans to spend between \$3.5 bln and \$3.9 bln in 2003, which is down as much as 25% from last year. The article also suggests excess optimism is possible with last year being used as an example due to TSMC and other co's placing orders in Spring 2002 only to cancel them by Semicon due chip demand being illusory.

[7/14/2003 8:42:06 AM] [Grounddog] Page One - Ahead of the Open: Enthusiasm is back. Earnings season is off to a great start, and stock futures are indicated sharply higher. Frankly, our recent short-term cautious stance is giving way to the optimism. The upcoming news could be bullish.

[7/14/2003 8:42:09 AM] [kmack] VION 2.33

[7/14/2003 8:42:47 AM] [Grounddog] Bank of America (BAC 82.88) was the first stock listed in our Selected Stocks Brief of June 26. This morning, they reported blowout numbers. Profits were \$1.80 per share, way above the average forecast of \$1.57, and up 29% from the year ago \$1.40 per share. Management is obviously very confident, as they recently raised the dividend 25%.

[7/14/2003 8:43:08 AM] [hotto] ESPR.. note.. the dilution is 15.6%.. 4M sh + 600K sh "overallotment"...

[7/14/2003 8:43:15 AM] [Grounddog] Dow 30 component Citigroup (C 46.15) posted second quarter profits of \$0.83 per share, 3 cents ahead of expectations

ClubHome

and up from \$0.78 last year. Revenue rose 7.5%. Good enough to support the positive tone in the market and maybe give the stock a boost.

[7/14/2003 8:43:31 AM] [Grounddog] Other earnings reports come from mortgage insurance company MGIC Investments (MTG 50.47), which beat earnings expectations by 8 cents at \$1.46 a share, on a revenue gain of 19.7%. M&T Bank (MTB 85.23) reported earnings of \$1.38 per share, which appears to beat earnings estimates by 14 cents, but it is not clear if the report is directly comparable to estimates. In any case, these reports from financial companies are very strong.

[7/14/2003 8:43:44 AM] [Grounddog] Another boost to the market is a Merrill Lynch upgrade to Intel (INTC 23.34) to "buy". Merrill says gross margins should improve over the next two years. Perhaps. Or maybe Merrill doesn't want to miss out if INTC provides upbeat guidance with their earnings report Tuesday afternoon. Smith Barney Citigroup downgraded semiconductor stocks Altera (ALTR 19.13) and Xilinx (XLNX 27.62), both to "in-line", but that won't offset the bullish tech sentiment.

[7/14/2003 8:43:58 AM] [Grounddog] Another piece of good news drawing less attention is that Wal-Mart (WMT 56.53) sees July sales at the high end of their 2% to 4% guidance for same store sales. Wal-Mart is so big that this suggests retail sales may actually be firming.

[7/14/2003 8:44:14 AM] [TCNut] goodmorning.....hope everyone had a refreshing weekend.....;)

[7/14/2003 8:44:14 AM] [Grounddog] It will be a very strong open. We are backing off our cautious near-term stance. The upcoming earnings reports may surprise solidly on the up side, and enhance the underlying long-term bullish sentiment. Stocks remain the preferred investment vehicle long-term, particularly when there are opportunities such as Bank of America, with a 4% dividend, reasonable valuation, and strong growth. There is a lot more to come on the Earnings Calendar, but as this morning's Stock Brief explains, more good news could be coming. - Dick Green, Briefing.com

[7/14/2003 11:31:40 AM] [hotto] TRAC.. note the pattern we see often.. They used the Very stong mkt.. to BO over 2.90... "early"... SO... now THAT job is done... time to PB.. and back -and-fill... set up the base...just below 3.00... from which the Next Leg can be launched.. To make this base solid enough to go to 6 +... TRAC needs to test the 2.50 area first.. imo... So... I said.. look to buy back in 2.55 -

2.65... May have to pay more... later.. but.. no hurry now.. assuming they are going to set up a solid base.

[7/14/2003 12:54:24 PM] [hotto] for the last 25 years.. it has been the CEs.. that have signaled more rapid growth...

[7/14/2003 7:31:51 PM] [shadow] TCNut, have you tried viewing the PDF file? Many of the lines blur into the background. This could be an artifact of JPEG compression or it could involve errors introduced by expansion or contraction of the image. JPEG is a poor choice; it produces bigger files and it loses image quality.

[7/14/2003 8:20:26 PM] [Luigistock] Hey Alan
[7/14/2003 8:21:36 PM] [AlanD] Hello Luigi, Micky. Haven't really reviewed previous discussions but NDX--X is looking bearish too me. Possible reversal forming.
[7/14/2003 8:22:30 PM] [HOTTO] Boulder has joined the club. Please welcome your new member.
[7/14/2003 8:23:32 PM] [Cag] hi Aland. I agree on NDX, I see 1 more subwave 5up and that is it.
[7/14/2003 8:23:38 PM] [Luigistock] Yeah Alan did close right on my trendline
[7/14/2003 8:23:44 PM] [TCNut] did you move to Coronado Island yet, Alan?
[7/14/2003 8:24:57 PM] [AlanD] Well I'm setup up to the short side in the IRA. Regular shorts to follow soon. Coronado TCNut? No, too overpriced for match box homes IMO. I live off I-15.
[7/14/2003 8:25:58 PM] [TCNut] Hottoland?
[7/14/2003 8:26:03 PM] [Luigistock] ALan just a matter of time imo - havnt been very active on the long side since last WED
[7/14/2003 8:26:13 PM] [TCNut] Rancho Hotto
[7/14/2003 8:26:25 PM] [Saroj] Alan, did you decide to buy afterall? I know at one time you were concerned that homes were over-valued in S.D. and thought you might rent for a while. Are you down near Chula Vista?
[7/14/2003 8:26:40 PM] [TCNut] er Rancho Hottonardo
[7/14/2003 8:27:59 PM] [AlanD] Didn't buy Saroj. Decide to take Navy senior officer housing. Once mortgage rates start heading back up, which I think will happen over the next year along in sync with the bearish move in the bond markets, I think some new home owners in S.D. will have a rude awakening.
[7/14/2003 8:29:04 PM] [Saroj] That's what you indicated a while ago. Wasn't sure

if you had discovered something different after completing your research. Are you all settled?

[7/14/2003 8:29:39 PM] [TCNut] especially in Tijuana

[7/14/2003 8:29:47 PM] [AlanD] I live near QCOM stadium. Hey wife is calling. Need to put on that "Dad" hat. Settled? Yes just little stuff around the house. I'll be around later.

[7/14/2003 8:30:33 PM] [Saroj] QCOM stadium?? Ha ha! I have no idea where that is. How things change.

[7/14/2003 8:30:57 PM] [Saroj] Hoping to go out there for my high school reunion in September.

[7/14/2003 8:31:40 PM] [TCNut] that is where the S.D. Chargers play.....used to be called Jack Murphy...QCom....= more money

[7/14/2003 8:32:20 PM] [Saroj] Is it anywhere near the gaslamp district?

[7/14/2003 8:33:06 PM] [TraderMom] Mission Valley, where I-15 and I-8 meet

[7/14/2003 8:33:54 PM] [TCNut] abandoned by the Lambs.....GOoooo Bolts!

[7/14/2003 8:34:03 PM] [Saroj] Actually those highway numbers mean zilch to me. Haven't lived there for decades and when I visit I'm usually around Mission Bay or north around Encinitas.

[7/14/2003 8:34:36 PM] [Saroj] I do know Mission Valley tho (I think). Isn't that where Padres stadium used to be (is??).

[7/14/2003 8:34:54 PM] [TraderMom] Qcom is Padres stadium

[7/14/2003 8:34:57 PM] [TCNut] same....same

[7/14/2003 8:35:38 PM] [Saroj] Oh, my god. It's ancient then. Did they upgrade it when they renamed it?

[7/14/2003 8:35:49 PM] [TCNut] are they ever going to finish the new one? Mom?

[7/14/2003 8:36:25 PM] [TraderMom] close, they start playing their next season

[7/14/2003 8:36:36 PM] [Saroj] My son is flying out there later this week to look for a restaurant site in the gas lamp district. He said it was near some stadium or other.

[7/14/2003 8:36:46 PM] [TraderMom] new Padres stadium

[7/14/2003 8:37:48 PM] [Saroj] Is the new Padres stadium the one Julian is referring to then - close to downtown and gas lamp?

[7/14/2003 8:37:59 PM] [TraderMom] yes

[7/14/2003 8:38:23 PM] [TCNut] have enough trouble with your own children.....i'm sure:)

[7/16/2003 12:36:45 AM] [StockStalker] Here is my inside day scan
[7/16/2003 12:36:50 AM] [StockStalker] (H [= H1) AND (L]= L1)
[7/16/2003 12:37:04 AM] [really] TCNUT - that will work but the first and last (and) are not needed.
[7/16/2003 12:37:05 AM] [StockStalker] simple but good
[7/16/2003 12:38:15 AM] [Dennis4Cash] simple is good Stalker
[7/16/2003 12:38:39 AM] [arch] stalker look at SOI

[7/16/2003 12:39:12 AM] [StockStalker] what do u think bout it
[7/16/2003 12:40:09 AM] [arch] stretched tight and ready for a big bounce
[7/16/2003 12:40:15 AM] [StockStalker] looks like u ran an nr7
[7/16/2003 12:40:53 AM] [StockStalker] yes probably right and with tight stop too... but not normally my kind of trade
[7/16/2003 12:41:00 AM] [arch] didn't run it just saw it on the harami scan
[7/16/2003 12:41:44 AM] [StockStalker] I am willing to take many diff kind of trades when the stop is that tight
[7/16/2003 12:42:42 AM] [StockStalker] was hotto on tonight
[7/16/2003 12:43:29 AM] [really] gn everyone

[7/16/2003 12:54:41 AM] [StockStalker] almost looks like gravestone doji
[7/16/2003 12:58:42 AM] [StockStalker] but many must be to thin to trade with that many
[7/16/2003 12:59:50 AM] [arch] ok

ClubHome

[7/16/2003 1:00:07 AM] [StockStalker] oops
[7/16/2003 1:00:24 AM] [StockStalker] but many stocks must be too thin to trade with that many
[7/16/2003 1:01:10 AM] [arch] that is true. I usually volume and price filter them in my other scans.
[7/16/2003 1:01:32 AM] [StockStalker] it is best to make a universe with that already done
[7/16/2003 1:02:30 AM] [StockStalker] today was almost an inside day on the naz so there are many that have nr's
[7/16/2003 1:02:46 AM] [arch] I'll go back and edit it. I set it up a long time ago and had little experience at the time
[7/16/2003 1:02:54 AM] [StockStalker] and eliminate nyse stocks that are thin
[7/16/2003 1:03:41 AM] [arch] I own some virl and mentioned it to hotto last nite as a nr7 but never did get the scan small enough to use
[7/16/2003 1:03:58 AM] [StockStalker] I get 125 out of 1251
[7/16/2003 1:04:22 AM] [StockStalker] and that is easier to deal with
[7/16/2003 1:05:05 AM] [arch] I believe that i just don't want to cut it too small and miss some good things
[7/16/2003 1:05:31 AM] [StockStalker] u miss more by having too many to look at and diagnose properly
[7/16/2003 1:05:54 AM] [StockStalker] use a 50 cent and up scan with 200lk vol and that will be big enuff
[7/16/2003 1:06:17 AM] [arch] that is probably true. I'll adjust the numbers now
[7/16/2003 1:06:53 AM] [StockStalker] and then shoot those to a folder or hard drive charts folder
[7/16/2003 1:08:16 AM] [arch] I haven't figured out how to get them on the hard drive yet. I get the latest data but not the history.
[7/16/2003 1:09:04 AM] [StockStalker] do a copy to watchlist and then there is one called HARD D CH
[7/16/2003 1:09:12 AM] [StockStalker] easy
[7/16/2003 1:09:42 AM] [StockStalker] and the charts will flip faster too
[7/16/2003 1:11:33 AM] [StockStalker] u will need to move over any indexes or things like that u like to look at too
[7/16/2003 1:11:51 AM] [StockStalker] and then only update that folder from now on... much faster
[7/16/2003 1:23:10 AM] [StockStalker] how many stocks u get
[7/16/2003 1:24:27 AM] [arch] I hate to admit this but I can't remember how to get them sorted down. I know it is simple but i need to get into help and read a little bit
[7/16/2003 1:24:48 AM] [StockStalker] sorted in what way
[7/16/2003 1:25:36 AM] [arch] get the price and volume screens to set them
[7/16/2003 1:26:40 AM] [StockStalker] use the easy scan and set the price to "value" and then use volume and just scroll it up to when it say u ahve enuff stocks
[7/16/2003 1:31:12 AM] [marketroque] .
[7/16/2003 1:32:36 AM] [arch] down to 1600 stocks now
[7/16/2003 1:33:30 AM] [StockStalker] that is a good start
[7/16/2003 1:33:42 AM] [StockStalker] now run ur scan and get bout 160
[7/16/2003 3:07:17 AM] [rockin] PCNTF - should get a bounce to the 12 area this week
[7/16/2003 3:07:27 AM] [rockin] gn
[7/16/2003 3:07:52 AM] [ilovemusicCOM] anyone here have Yhoo Messenger?
[7/16/2003 3:08:39 AM] [traderguy] not here

[7/16/2003 3:47:19 AM] [ilovemusicCOM] I'm stoked about being able to broadcast screencams. Now trying to think what I can use it for :)

[7/16/2003 3:47:22 AM] [SeattleSteve] Hotto, do you think EGLS can make a run here?

[7/16/2003 3:47:25 AM] [hotto] 2 coming events.. to keep from the Bull-trap Sell-off..

[7/16/2003 3:47:42 AM] [hotto] 1. MSFT Earns due.. Thurs AH..

[7/16/2003 3:47:51 AM] [SeattleSteve] :)

[7/16/2003 3:47:53 AM] [hotto] 2. Options Exp Friday..

[7/16/2003 3:48:11 AM] [ilovemusicCOM] Reaction INTC was quite positive

[7/16/2003 3:48:12 AM] [SeattleSteve] Options Wednesdays can be really volatile, right?

[7/16/2003 3:48:25 AM] [hotto] So.. unlikely.. that we get a Real Big-dump tomorrow..

[7/16/2003 3:48:32 AM] [ilovemusicCOM] usually market will follow AH reaction to big names.

[7/16/2003 3:49:06 AM] [hotto] But.. With SEMIcon West ending tomorrow.. and the INTC.. Froth upon us..

[7/16/2003 3:49:50 AM] [hotto] likely to Hype up the whole world... esp. the InTC guidance... of "Incr. Margins".. to records..

[7/16/2003 3:50:25 AM] [hotto] I will be looking to get rid of all my "dogs" tomorrow morning..

[7/16/2003 3:50:28 AM] [ilovemusicCOM] I hope it lights a fire under MTON

[7/16/2003 3:50:48 AM] [hotto] Have a bunch of INTC.. plan to work it hard.. next 2 days..

[7/16/2003 3:51:13 AM] [ilovemusicCOM] Did you buy in AH, Hotto?

[7/16/2003 3:51:19 AM] [SeattleSteve] Do you think the top on INTC will come tomorrow?

[7/16/2003 3:51:19 AM] [hotto] INTC.. and MSFT.. back to darling status... both in

DJA..

[7/16/2003 3:51:36 AM] [hotto] no.. INTC.. goes until Friday.. i think.

[7/16/2003 3:51:54 AM] [SeattleSteve] OK

[7/16/2003 3:52:01 AM] [hotto] the INTC earns is real.. and the guidance is super.

[7/16/2003 3:52:25 AM] [hotto] at least... Solid... and Real \$\$

[7/16/2003 3:52:51 AM] [ilovemusicCOM] INTC has a good OPS rating, so that fits.

[7/16/2003 3:53:19 AM] [hotto] new thing music..? I saw your report.

[7/16/2003 3:53:35 AM] [ilovemusicCOM] new to me and relatively new, I think.

[7/16/2003 3:54:00 AM] [ilovemusicCOM] I'm looking at shorting the kindling wood stocks

[7/16/2003 3:54:15 AM] [ilovemusicCOM] those about to burn and go to zero.

[7/16/2003 3:54:29 AM] [ilovemusicCOM] but must be patient. Takes 12 months. :)

[7/16/2003 3:54:52 AM] [hotto] I am so glad that I went through the Sectors in detail last Saturday... (late afternoon).. with some Members.

[7/16/2003 3:55:00 AM] [SeattleSteve] LWSN might break out this week, hotto

[7/16/2003 3:55:45 AM] [hotto] I went into Saturday.. with one sense of the markets... and after that hour. of review.. came out with a different perspective..

[7/16/2003 3:56:07 AM] [hotto] helped make solid gains both yesterday.. and today..

[7/16/2003 3:56:32 AM] [hotto] a case where I benefitted most.. by the "teaching"..

[7/16/2003 3:56:48 AM] [hotto] LWSN.. ok... looks good

[7/16/2003 3:56:59 AM] [SeattleSteve] Good for you to get benefits from all the work you put into this club

[7/16/2003 3:57:29 AM] [hotto] thanks.. yes.. But in this case.. it was a real surprise.

[7/16/2003 3:57:48 AM] [ilovemusicCOM] LWSN has positive cash flow and an OPS rating of 2

[7/16/2003 3:57:58 AM] [ilovemusicCOM] 1 is best.

[7/16/2003 3:58:24 AM] [hotto] The old formula.. still works.. Sick Stomach + Good Numbers.. == Go Long

[7/16/2003 3:58:38 AM] [SeattleSteve] LOL

[7/16/2003 3:58:42 AM] [hotto] LOL

[7/16/2003 3:59:22 AM] [ilovemusicCOM] Does that suggest you are already in the stock and you are averaging down?

[7/16/2003 3:59:59 AM] [hotto] no

[7/16/2003 4:00:22 AM] [ilovemusicCOM] so where does the sick stomach come from?

[7/16/2003 4:00:53 AM] [hotto] just thinking that my gravy train.. the IT Rally may be over.. and I have to go back to scalping for scraps.. all day.

[7/16/2003 4:01:19 AM] [SeattleSteve] Hotto, is there much chance that we will see the biotechs in another nice rally?

[7/16/2003 4:02:07 AM] [hotto] I doubt it... but..BBH.. still pushing up.

[7/16/2003 4:02:27 AM] [hotto] AMGN

[7/16/2003 4:02:40 AM] [hotto] DNA

[7/16/2003 4:02:49 AM] [hotto] GILD

[7/16/2003 4:03:04 AM] [hotto] numbers say... Yes..

[7/16/2003 4:03:24 AM] [hotto] just Don't fight the tape...

[7/16/2003 4:03:28 AM] [SeattleSteve] GILD has been very impressive

[7/16/2003 4:03:49 AM] [ilovemusicCOM] sick stomach and good numbers...that fit well for AZO.. it sank to 6 something then up to 80

[7/16/2003 4:03:54 AM] [hotto] Look for good leaders in the group... and so long

[7/16/2003 4:04:09 AM] [hotto] It is not over.

[7/16/2003 4:04:23 AM] [ilovemusicCOM] APPX made a nice high twice and both time sank like a rock

[7/16/2003 4:04:37 AM] [hotto] GOsh... Look at SMH !

[7/16/2003 4:04:49 AM] [hotto] KR2 today.. to a New Rally High..

[7/16/2003 4:05:03 AM] [SeattleSteve] SMH should break out nicely at the opening

[7/16/2003 4:05:16 AM] [hotto] and.. with INTC.. who knows HOW high SMH can go ?

[7/16/2003 4:05:22 AM] [ilovemusicCOM] What is KR2?

[7/16/2003 4:05:27 AM] [SeattleSteve] Cup and handle

[7/16/2003 4:05:48 AM] [hotto] Just keep playing the charts.. forget the "common sense"

[7/16/2003 4:06:06 AM] [ilovemusicCOM] hey, playing the chart without common sense doesn't work for me.

[7/16/2003 4:06:14 AM] [ilovemusicCOM] Need "insight"

[7/16/2003 4:06:16 AM] [SeattleSteve] Yes, "fear of heights" has not helped my results at all this month

[7/16/2003 4:06:21 AM] [ilovemusicCOM] charts don't work.

[7/16/2003 4:06:37 AM] [ilovemusicCOM] charts only give you an excuse

[7/16/2003 4:06:42 AM] [ilovemusicCOM] to make a trade

[7/16/2003 4:06:55 AM] [ilovemusicCOM] but without insight I am lost

[7/16/2003 4:07:15 AM] [hotto] and.. in CEs... AMAT reports.. in August ...8/12... so.. CEs.. won't give up until then...

[7/16/2003 4:07:56 AM] [SeattleSteve] Good -- there are some good plays in CE stocks. Our KLIC looks really good here, for instance.

[7/16/2003 4:08:00 AM] [hotto] Expect a PB after this week.. but.. another rally of sorts.. into the AMAT earns

[7/16/2003 4:08:14 AM] [hotto] oh yeah! KLIC ...nice

[7/16/2003 4:08:14 AM] [ilovemusicCOM] Hotto, a lot of what you do seems to be based on insight, not chart reading ... in my opinion.

[7/16/2003 4:08:27 AM] [ilovemusicCOM] I mean not strictly chart reading

[7/16/2003 4:08:32 AM] [hotto] music... always a balance.

[7/16/2003 4:08:44 AM] [ilovemusicCOM] yep, balance is good.

[7/16/2003 4:09:04 AM] [hotto] Last week.. I let my "common sense" get too far out front...

[7/16/2003 4:09:25 AM] [hotto] Chart reading on Saturday... brought me back...

[7/16/2003 4:09:32 AM] [hotto] whew!

[7/16/2003 4:09:36 AM] [ilovemusicCOM] maybe common sense is not the word.

[7/16/2003 4:09:50 AM] [ilovemusicCOM] but deeper insight into the market

[7/16/2003 4:10:05 AM] [hotto] tempting to join the analysts... in "OPINIONS"...

[7/16/2003 4:10:23 AM] [hotto] attempting to say "downgrade on Valuation"

[7/16/2003 4:10:26 AM] [ilovemusicCOM] we must be beyond the analysts

[7/16/2003 4:10:50 AM] [hotto] The Markets... decide the prices...

[7/16/2003 4:11:06 AM] [hotto] "Price discovery"... that is ALL!

[7/16/2003 4:11:54 AM] [hotto] CMOS MKSI LRCX.. others... also good

Firm notes that it is surprised by the cheap valuation assigned to the biz of 1.5x CY03 sales (notes that last yr RFMD purchased Resonext at 5-8x CY03 sales). [7/16/2003 12:22:33 PM] [hotto] The simple MOMO phase ended on 6/17... since then.. mkt has been working to Rationalize both Valuations.. and Charts..
[7/16/2003 12:22:45 PM] [tinaSDtrader] PCNTF 5min resist 10.33-10.36, needs to clear that next
[7/16/2003 12:22:50 PM] [rockin] PCNTF - BO would be 10.35

[7/16/2003 12:23:45 PM] [hotto] We can still extract some daily profits.. purely from scalping charts..
[7/16/2003 12:24:40 PM] [hotto] But... the separation is beginning again.. separating the good / from bad.
[7/16/2003 12:24:41 PM] [syatt] Luigi - holding LRLSQ?

[7/16/2003 12:28:26 PM] [Sully] So you feel (hotto) that stocks like EELN MFA will start going down
[7/16/2003 12:28:45 PM] [hotto] BEAS.. looks nice on chart.. works in with the idea of Rotation toward Software stocks... (MSFT Earns THurs AH).

[7/16/2003 1:14:02 PM] [tinaSDtrader] interesting - often these set-ups are also in high probability patterns. For instance, a lot of hotto's picks are breaking out of triangles, wedges, etc. I'm trained in patterns and charting, so I tend to see those and it confirms a lot of hotto picks for me.

[7/16/2003 1:14:52 PM] [SeattleSteve] Keep us posted on some of the key stocks today and tomorrow, Tina

[7/16/2003 1:15:41 PM] [tinaSDtrader] I try to put up a note when I see something - like AMR today trying to stay above top trendline of a conv triangle on daily - news pushed it just above, see if holds.

[7/16/2003 1:15:46 PM] [Sully] yes barely

[7/16/2003 1:15:59 PM] [ws128] thanks in advance for confirming info Tina

[7/16/2003 1:20:35 PM] [cft26] Oz .. why short on QQQ?
[7/16/2003 1:22:16 PM] [kmgreen] thanks Hotto
[7/16/2003 1:22:18 PM] [StockStalker] I am short Q's
[7/16/2003 1:23:32 PM] [FireFox] check STKL
[7/16/2003 1:24:32 PM] [tinaSDtrader] Trendline for AMR: tops 6/30, 7/9, 7/14 bottoms: 6/23, 7/3 - One line dropping, one rising - coming together at an apex. Because stock was previously in an uptrend (daily), tends to favor that direction if breaks upside. However, these are neutral patterns, can also go down and be shorted. Thus safe to let it break out, then pull back a bit, then buy if resumes uptrend.
[7/16/2003 1:24:55 PM] [Fitball] GENZ engulfing daily candle.
[7/16/2003 1:26:19 PM] [tinaSDtrader] AMR then pulled back intraday, 15s, bonced off the top trendline that I'd drawn up on daily. Keeps me watching it.
[7/16/2003 1:27:56 PM] [tinaSDtrader] I also have BTO on my watchlist, daily, ascending triangle from 6/6 to present, leaves strong ceiling, want it to break that. Asc Triangle is flat top, rising bottoms.
[7/16/2003 1:28:21 PM] [TeachMe] .
[7/16/2003 1:28:49 PM] [StockStalker] nice entry so far on Q's
[7/16/2003 1:30:18 PM] [Johnster] What's your target for Q's today, Oz?
[7/16/2003 1:30:57 PM] [StockStalker] Been so glued to entry and stiopts that I have not made them yet
[7/16/2003 1:33:15 PM] [tinaSDtrader] GTCB also an asc triangle daily.
[7/16/2003 1:35:26 PM] [StockStalker] ONT in the green again
[7/16/2003 1:36:26 PM] [Newkid49] so is OSUR

[7/16/2003 1:37:42 PM] [rockin] PCNTF - going to be a battle here for a while as we work thru resistance - and already up 10%+ for the day
[7/16/2003 1:38:20 PM] [tinaSDtrader] SIPX also asc triangle daily. These don't always follow thru, but when they do, they are very hi probability. Meaning - good chance they'll make, or come near, target. Target is the depth of the triangle projected up from the breakout point (top trendline). Best to wait for a close above that top line plus at least a few cents. Beware getting caught in a bull trap - don't

want the exact break or can pull back inside pattern.
[7/16/2003 1:38:31 PM] [ws128] DSLN has been on a tear - 4x normal volume - does anybody know what is causing this move?
[7/16/2003 1:39:53 PM] [rockin] ws128 does it matter ?
[7/16/2003 1:40:27 PM] [ws128] yes - 've holding since .55 and I need to understand for profit taking
[7/16/2003 1:40:32 PM] [StockStalker] some times
[7/16/2003 1:40:47 PM] [SellRight] DSLN - this is very interesting to me..... I just spent 2 weeks on a boat in the PacificNorthWest and would have liked to be in contact.
[7/16/2003 1:40:54 PM] [rockin] ws128 - use chart targets
[7/16/2003 1:41:31 PM] [ws128] chart target is not meaningful if some unusual event is up
[7/16/2003 1:41:58 PM] [StockStalker] somtimes it is
[7/16/2003 1:42:07 PM] [tinaSDtrader] can always sell half at target and use a b/even stop or better on remaining shares
[7/16/2003 1:42:24 PM] [StockStalker] the chart had the even in it many times and target is based on such a resolution
[7/16/2003 1:42:37 PM] [ws128] yes I know - thanks - just wondered if anyone had any info
[7/16/2003 1:42:43 PM] [tinaSDtrader] Asc Triangles are very bullish, but if the market starts screaming downhill they'll often get dragged down with it.
[7/16/2003 1:43:04 PM] [tinaSDtrader] Thus waiting for a clean break above top t/line versus buying still inside pattern.
[7/16/2003 1:43:48 PM] [rockin] ws128 - you will be the last to know - after move is made - I put in a special phone for advance info calls and never got any - use the force (charts)
[7/16/2003 1:44:04 PM] [Mickaz] No idea, ws128, but the same thing hapened to DSLN on June 3 at 4.4X vol.
[7/16/2003 1:44:12 PM] [Sully] go PCNTF
[7/16/2003 1:44:40 PM] [StockStalker] it is nice to know that there is no news out on a stock when u are in it and it is running. That means u dont have to sell into it yet
[7/16/2003 1:44:49 PM] [StockStalker] so it does matter at times
[7/16/2003 1:45:10 PM] [StockStalker] as for the news itself.... not really a big deal
[7/16/2003 1:45:19 PM] [syatt] great advice rockin..too true
[7/16/2003 1:45:27 PM] [ws128] I'm already in rockin - but if I look at monthly chart there is a tremendous range - something is moving this stock and that is what I am trying to figure out - for the moment I am holding - thanks to all

[7/16/2003 2:36:31 PM] [FireFox] STKL a good runner today !!

[7/16/2003 2:38:12 PM] [ws128] sorry you think i am a grouch TC - I called out DSLN before .80 thia a.m. and TLL at around 1.25 - thought I was being nice!:)

[7/16/2003 2:39:19 PM] [Mikon] ALthough many stocks down, used covered calls to neutralize and profit (up \$2300 today).

[7/16/2003 2:39:35 PM] [Sully] This is turning out to be a nice dayB)

[7/16/2003 2:39:56 PM] [Mikon] Writing GE calls very profitable

[7/16/2003 2:41:05 PM] [rockin] Mikon - I write covered calls also - great day today - congrats

[7/16/2003 2:41:10 PM] [Sully] Would like to see a little run on LOOK

[7/16/2003 2:43:12 PM] [CashMan] RGEN starting to take off

[7/16/2003 2:44:35 PM] [Mikon] Thnx, rockin

[7/16/2003 2:44:38 PM] [StockStalker] covered the QQQ when I saw that they did not want to break down over and over

[7/16/2003 2:47:16 PM] [guzman] The golds are great swing shorts at the moment. GLG has held up reasonably to this point, but is getting ready to crumble.

[7/16/2003 2:47:54 PM] [rockin] listen to CashMan - RGEN - take a look 5' BTBO in progress

[7/16/2003 2:48:00 PM] [tinaSDtrader] KLIC trying to break 5-min ceiling around 8.54-8.55

[7/16/2003 2:48:05 PM] [Majtrader] Mikon, how deep in the money do you go with those calls?

[7/16/2003 2:48:14 PM] [Grinder] SOI keeps trucking now +.22 @ 1.58.7

[7/16/2003 2:48:20 PM] [guzman] MDG is another gold stock to take a serious look at

[7/16/2003 2:48:24 PM] [tinaSDtrader] I'm only scalping KLIC, not holding o/n per my system.

[7/16/2003 2:48:40 PM] [Eagerbeaver]KLIC...8.57

[7/16/2003 2:48:49 PM] [Mikon] Wrote GE July 25 calls at 3.30

[7/16/2003 2:49:47 PM] [syatt] before today Mikon?

[7/16/2003 2:50:26 PM] [Mikon] Covered LLTC July 35 (today) for a buck over long cost on 4k shares

[7/16/2003 2:50:34 PM] [Eagerbeaver] Anybody see ...INTC...running up into the close

[7/16/2003 2:50:50 PM] [OldSeaDog] Tina would you scalp KLIC before it crosses yesterdays close?

[7/16/2003 2:50:55 PM] [guzman] a lot of distribution in INTC today

[7/16/2003 2:51:22 PM] [Mikon] Yes, before today. Wrote 7/11/03 based on the chart I just shared

[7/16/2003 2:51:24 PM] [guzman] ... huge volume, yet it is at the same price as the open

[7/16/2003 2:51:53 PM] [guzman] .. that volume should have sent it through the roof

ClubHome

[7/16/2003 2:52:00 PM] [tinaSDtrader] I'm trading KLIC on 5-min swings up, I'll only be in for yest close if it goes up that hi this swing. It's just too far away from the 10 and 20emas on daily for me to hold o/n. That's my system, others have different systems.

[7/16/2003 2:52:19 PM] [OldSeaDog] Tina ty

[7/16/2003 2:52:41 PM] [tinaSDtrader] yw

[7/16/2003 2:53:09 PM] [rockin] RGEN - daily - look at the volume spikes on the rally in July

[7/16/2003 2:53:17 PM] [Coral] Guz you think INTC is topping here?

[7/16/2003 2:53:56 PM] [tinaSDtrader] I'm a strong advocate of a system. Need to have some rules or mkt w/take your money. One of my very strict rules: do not hold o/night when the low of today's bar is far away from the 10/20emas. If you have logarithmic setting, you'll see the % btwn gridlines.

[7/16/2003 2:54:36 PM] [Mikon] Expectations on MSFT for Friday's close?

[7/16/2003 2:54:39 PM] [mace] ainn up 57%, 2nd half to be much better

[7/16/2003 2:54:52 PM] [mace] 47% sorry

[7/16/2003 2:54:56 PM] [tinaSDtrader] Notice KLIC is about 4.7% per gridline. For the price to pull back to even the 10ema means about an 8% drop, MUCH more if it pulls back to the 20ema. Too much risk for me. But I'll scalp in intraday.

[7/16/2003 2:55:27 PM] [guzman] Coral --- it may take a run to the fib resistance at 26.32 to close the gap from a few months back. But, the risk in trying for that extra point is high, as it looks like all the big boys are dumping.

[7/16/2003 2:55:38 PM] [OldSeaDog] Thanx Tina

[7/16/2003 2:55:47 PM] [Fibotrader] tina - would you be willing to post a list of your rules ? I think reading something like that from a real pro would be very beneficial to all of us

[7/16/2003 2:56:16 PM] [tinaSDtrader] For those int'd in patterns: KLIC was a falling wedge from 6/6-6/26, broke out 6/27, pulled back couple of days, met target on 7/9.

[7/16/2003 2:56:26 PM] [Coral] Thanks Guz!

[7/16/2003 2:56:34 PM] [guzman] yw

[7/16/2003 2:56:52 PM] [zenvestor] Mikon, are you looking to be called out or considering buying them back and selling out to August?

[7/16/2003 2:56:55 PM] [MadameButterfly] tina, I agree with Fibotrader - your rules would be a huge help. Thanks.

[7/16/2003 2:58:00 PM] [tinaSDtrader] Thx, sure wish I was a pro! Many smart minds on Wall St., always trying to dodge them. I can post a few of my key rules in a discussion. Will do that later today so check discussions.

[7/16/2003 2:58:01 PM] [Eagerbeaver] Tina, as do I, Pleezeeeeeeee =D

[7/16/2003 2:58:26 PM] [Fibotrader] that will be great THX!

[7/16/2003 2:58:26 PM] [Jjm] Tina, could you share a chart of KLIC. Thank you, in advance

[7/16/2003 2:58:26 PM] [Sully] Yes that would be nice tina;)

[7/16/2003 2:58:36 PM] [Mikon] zen, they are naked and I'll probably buy them back tomorrow or early Friday. I believe GE has more downside to go as it shows lowest OBV and momentum since March

[7/16/2003 2:58:41 PM] [tinaSDtrader] I use white background so my t/lines don't show up if I share.

[7/16/2003 2:58:54 PM] [OldSeaDog] sorry Tina I didn't mean to start something

[7/16/2003 2:58:58 PM] [zenvestor] Great idea !

[7/16/2003 2:59:41 PM] [tinaSDtrader] If you go to tools, chart display options, click white background, you can see it. Sharing now.

[7/16/2003 3:01:52 PM] [tinaSDtrader] If you're not seeing a % in lower right corner of the chart (top) window, go to chart template (on the menu) and select logarithmic.
[7/16/2003 3:02:37 PM] [ws128] DSLN - re-entry for those interested
[7/16/2003 3:03:16 PM] [StockStalker] nice one
[7/16/2003 3:05:16 PM] [syatt] Mikon - I thought you said the GE was a covered call?
[7/16/2003 3:05:32 PM] [syatt] probably misunderstood...
[7/16/2003 3:05:49 PM] [EasyTrade] thnx Tina.
[7/16/2003 3:06:01 PM] [Jjm] Thank you very much, Tina
[7/16/2003 3:06:16 PM] [tinaSDtrader] yw very much - off to trade, I'll put up a discussion later today
[7/16/2003 3:08:06 PM] [atraveler] If you think GE is header lower wouldn't you be better off selling?
[7/16/2003 3:08:29 PM] [Mikon] No, syatt, sorry if I implied that. I have many covered calls on other stocks, but just wrote GE's naked
[7/16/2003 3:09:15 PM] [syatt] isn't it a monster requirement to go naked? other than having a nice bod?
[7/16/2003 3:09:23 PM] [Grinder] MMs Took out some stops on INTC
[7/16/2003 3:09:27 PM] [Erik] Must feel pretty good to sit around and trade naked, eh???
[7/16/2003 3:09:46 PM] [root] that's point five tenths percent tina.
[7/16/2003 3:09:50 PM] [Pilot1938] Mikon, just for my option education.....if you let the naked calls expire, you'd be short GE.....wouldn't that fall right in with your expectation for GE to continue down?
[7/16/2003 3:09:52 PM] [atraveler] HTRN out nice day
[7/16/2003 3:09:54 PM] [Mikon] atraveler, the GE calls are dropping in lock-step (dime for dime) with the price which has been falling daily
[7/16/2003 3:10:45 PM] [atraveler] Mikon, makes sense if you're day trading the call
[7/16/2003 3:11:25 PM] [Mikon] Pilot, yes, but I would have to deliver the stock to the caller. So best to buy it back and perhaps sell August in-the-money calls.
[7/16/2003 3:11:57 PM] [atraveler] ok, thx
[7/16/2003 3:12:00 PM] [Pilot1938] Ok, thanks..

[7/16/2003 3:26:07 PM] [Mikon] EagerBeaver, assuming you are long INTC, why don't you consider selling July 25 calls at 0.45?

[7/16/2003 4:23:02 PM] [SeattleSteve] Hard to say. Weak dollar is a fact of life this year. Certainly built in to the expectations. "Constant" dollars are just an analytical tool.

[7/16/2003 6:00:09 PM] [InanOut] trade station allows you to trade the eminis, can you do that with cyber I wonder, different accouts of course

[7/16/2003 6:00:24 PM] [InanOut] oops privsate

[7/16/2003 6:01:23 PM] [Tarpon] IB has AH shorting

[7/16/2003 6:01:38 PM] [Fibotrader] BCGI May low = 14.11

[7/16/2003 6:02:00 PM] [Johnster] Will BCGI EVER bounce, THAT is the question...

[7/16/2003 6:02:59 PM] [Fibotrader] 13.53 = btbo level (Feb High)

[7/16/2003 6:03:05 PM] [cyberact] OBV on BCGI will be dessimated in tomorrow's charts...lots of damage here imo

[7/16/2003 6:04:09 PM] [Redzone] On this last swing, Q's failed to make contact with upper BB on closing basis, and today, price undercut yesterday low on increasing volume. Last time that happened in mid-June, Q's pullback to almost 50 sma. 50 sma now just above \$30.

[7/16/2003 6:05:20 PM] [cyberact] ty..redzone...good to know

[7/16/2003 6:06:15 PM] [cyberact] BCGI has traded over 4 million shares...4 X Daily volume so far

[7/16/2003 6:07:31 PM] [Tarpon] would be really interesting to see the chart patterns of AH trades, probably quite different from the intraday charts, a very different crowd trading...

[7/16/2003 6:08:50 PM] [hotto] Phone call here brb

[7/16/2003 6:08:59 PM] [Redzone] yw cyber, actually, I just looked up 50 sma for QQQ, stands at 29.98, but is sloping up.

[7/16/2003 6:12:09 PM] [wvu1158] BCGI- reported good earnings but getting killed???

ClubHome

[7/16/2003 6:12:48 PM] [InanOut] What other news on BCGI, what'd I miss?

[7/16/2003 6:14:52 PM] [Redzone] Not that important, but technical correction for QQQ. \$ 29.98 = 50 ema, \$29.92 = 50 sma.

[7/16/2003 6:15:06 PM] [jynkin] apparently Verizon is reevaluating some of BCGI's services to them,...selling likely based on speculation of losing VZ as a client.

[7/16/2003 6:15:16 PM] [wvu1158] something is pulling the broad market down-my INTC-- NTAP-- MSFT and others down - does anyone know why?

[7/16/2003 6:15:34 PM] [alatar] re BCGI, news @ TCNET = BCGI also provides an update on contract renewal negotiations with Verizon Wireless. Co says Verizon has requested that bcgi provide support services to assist Verizon Wireless in testing its own internal prepaid platform in 2004 "which could potentially displace prepay services currently being provided by bcgi."

[7/16/2003 6:16:14 PM] [cyberact] I think (This is my humble opinion) that Intel's news TOPPED the IT Rally....but like i noted here last night ..it was my take that it was company specific and not general market trend confirmed today by IBM earnings...now i am thinking Pletcher'S and Hochberg's wave three down to test the OCT lows may be today's business....meaning wave two top is in and wave 3 down started 6/17/03...

[7/16/2003 6:16:57 PM] [cyberact] just some thoughts to share

[7/16/2003 6:19:02 PM] [wvu1158] thanks for the info rmation and opinions-- puzzling -

[7/16/2003 6:19:50 PM] [hotto] cyber.. You think it is already time for voodoo again?

[7/16/2003 6:19:52 PM] [Redzone] My gut sense is you are right cyber. Probably means "bigs" have sold longs, entered shorts, and are positioned to take markets down into fall. But as always, have to trade charts, not my opinion.

[7/16/2003 6:21:03 PM] [cyberact] confirmation of wave three down...would be...1. Mer closing under46.25...Compqx closing under 1888...NDX 100 cash closing under 1235..

[7/16/2003 6:21:18 PM] [hotto] We had "top on 6/23"... then "top on 7/7".. then?? If we all keep naming dates.. sooner or later... someone will be right

[7/16/2003 6:21:46 PM] [hotto] My Top is 7/18

[7/16/2003 6:21:56 PM] [cyberact] until then ...we can travel up towards the highs and the swing lows.....

[7/16/2003 6:22:51 PM] [cyberact] your top is 7/18 hotto?

[7/16/2003 6:23:01 PM] [Johnster] Compqx closing under 1888??

[7/16/2003 6:23:39 PM] [TPO63] Hotto and everyone...just stopped by to check the chat stream and I and continually amazed at the excellent expertise shown here...you guys and gals are great

[7/16/2003 6:23:40 PM] [cyberact] Fat fingers again...sorry...1660

[7/16/2003 6:24:11 PM] [Johnster] OK, that's better. Thnaks.

[7/16/2003 6:25:56 PM] [FreeSpirit] per Reuters story at Yahoo Finance: Verizon represented 51 percent of Boston Communications' revenue in the first quarter this year."

[7/16/2003 6:26:14 PM] [Jms] ISSX,QLGC serious hit after earnings,not bad news

[7/16/2003 6:26:29 PM] [Johnster] BCGI back testing 14-ish. Time to load up...?

[7/16/2003 6:27:37 PM] [cyberact] that's friday....you think we go higher on the compqx ?...i was refering to the DOW and S&P 500 on that 6/17 hig

[7/16/2003 6:27:51 PM] [cyberact] high

[7/16/2003 6:27:54 PM] [Grinder] Johnster you are the expert on BCGI we are lookin for you to call the shots.

[7/16/2003 6:28:53 PM] [hotto] we are all trying..)

[7/16/2003 6:29:30 PM] [Fibotrader] this extreme over reaction to bcgi news shows how panicky the market is right now imo. kind of like last year, it things arent perfect you get creamed. i.e. ADTN ystdy and MERQ today

[7/16/2003 6:30:25 PM] [gino] sorry on more VZ mention --- a point n' figure chart shows VZ a buy at may low

[7/16/2003 6:31:16 PM] [Johnster] Headline at 6:28: "BCGI says it could lose its biggest customer"...maybe I'll hold off till AM (VZ is 51% of revs.)...

[7/16/2003 6:31:18 PM] [gino] one

[7/16/2003 6:31:31 PM] [hotto] yeah...BCGI.. beat earns by .03.. Revs by a bunch.. Guided higher for the Year... cited Many new customers signed up... the VZ.. is a Trial.. for Next Year.. and.. Stock drops 35%...wow

[7/16/2003 6:31:43 PM] [frank54] Boy, trying to work with SSPros charts sure increases my appreciation of the Wordens.

[7/16/2003 6:32:42 PM] [TPO63] keep losing my ISP and i misspelled expertise....such and intellegent bunch will fit also....thanks...later

[7/16/2003 6:33:27 PM] [hotto] Back to my Consulting Presentation.. bye.. c ya Friday.. good luck.

[7/16/2003 6:33:43 PM] [cyberact] Yeahp Frank 54 ...those streetsmart pro charts are worthless...LOL

[7/16/2003 6:34:09 PM] [frank54] Cyber, the only good thing is I can see something AH.

[7/16/2003 6:35:59 PM] [really] bye hotto - remember PowerPoint slides, not overheads like the old days

[7/16/2003 6:36:45 PM] [Johnster] See ya', hotto...good luck with it.

[7/16/2003 6:38:18 PM] [Redzone] Light bulb just went on. 51.4% of BCGI float is short. Wonder what those people knew ? Guess its what we all know now. Bye Hotto.

[7/16/2003 6:39:44 PM] [cyberact] redzone...where do you find that information on the shorts?

[7/16/2003 6:39:46 PM] [tiga] Could make for a heck of a short squeeze once it starts to move back up.

[7/16/2003 6:40:10 PM] [Redzone] Cyber, Hotto mentioned it and I just went to Yahoo Finance under profile.

[7/16/2003 6:40:39 PM] [JayW] you can also go to the nasdaq website

[7/16/2003 6:41:40 PM] [cyberact] TY..redzone

ClubHome

[7/16/2003 6:42:06 PM] [Redzone] yw.
[7/16/2003 6:44:41 PM] [Redzone] Yeah tiga, once the short crowd covers then gets long, we'll get the news about a new customer or VZ sticking with BCGI. Just being cynical again, but will be interesting to watch, even if I lose some money.
[7/16/2003 6:45:12 PM] [Tarpon] BCGI, hard to visualize without a chart, but the worst seems to be over
[7/16/2003 6:48:25 PM] [ws128] pretty large spread right now
[7/16/2003 6:48:55 PM] [jynkin] with the .500 fib of 14.45 right in the middle.
[7/16/2003 6:52:19 PM] [jynkin] the .618 retrace fib. is 12.61....using the low of 6.66 in 7/02 and the high of 22.24 today.
[7/16/2003 6:57:52 PM] [isay] the BCGI volume traded n 14.2-15.0 is much lower than traded between 15-16
[7/16/2003 6:58:05 PM] [isay] AH today I mean
[7/16/2003 6:58:23 PM] [isay] by eyeball
[7/16/2003 7:02:12 PM] [HowNow] Big Charts has BCGI at 14.22 - 6.94
[7/16/2003 7:24:54 PM] [hart] BCGI after hours - that's an honest to goodness u-shaped dropoff - must have been some 5:00 conference call
[7/16/2003 7:28:00 PM] [HowNow] .
[7/16/2003 7:54:35 PM] [Zathrus] .
[7/16/2003 7:59:03 PM] [Fibotrader] .
[7/16/2003 7:59:18 PM] [Zathrus] Hi Fib...
[7/16/2003 7:59:28 PM] [Fibotrader] howdy
[7/16/2003 7:59:48 PM] [Zathrus] how'd Mr Market treat ya today?
[7/16/2003 8:01:17 PM] [Fibotrader] made a tad. But missed a huge winner. Had order in to short MERQ. Moved up to within .03 cents of my order and then tanked. take a looked at 5' chart this morning. enuf to make a grown man cry
[7/16/2003 8:02:08 PM] [Zathrus] Oh man - that's rough....
[7/16/2003 8:02:34 PM] [Zathrus] Love that short covering at the close
[7/16/2003 8:02:43 PM] [Fibotrader] .03 cents between catching a trophy fish ... thats part of the game
[7/16/2003 8:03:23 PM] [Zathrus] and all the way down your telling yourself 'don't chase'
[7/16/2003 8:03:40 PM] [Fibotrader] yes, and I was short at the close. added some shares when it appeared to stall out and then it just blew straight up. Covered in AH for .05 loss
[7/16/2003 8:04:08 PM] [Zathrus] ARGHHH
[7/16/2003 8:04:19 PM] [Fibotrader] thats right about dont chase. but there were very few upticks in that selloff. wud have taken a miracle to get a short fill
[7/16/2003 8:04:21 PM] [Zathrus] Sounds like something I'd do :D
[7/16/2003 8:04:46 PM] [Priscilla] Put a TSV 17 in price window, use on intraday and esp on the 5 min...just watch it
[7/16/2003 8:05:32 PM] [Fibotrader] i was fishing in the right pond this morning...just didnt get the hook baited fast enuf :)

[7/16/2003 8:07:21 PM] [TCNut] Mr. Market gave me a nice spanking today....hope he thinks I've had enough!:D....for a couple days at least
[7/16/2003 8:07:56 PM] [Zathrus] Yeah - I think he had a hankering for a spanking today....
[7/16/2003 8:07:58 PM] [Steven57] So what creamed BCGI?

[7/16/2003 8:08:42 PM] [Steven57] Wonder how bad it would have been on bad earnings

[7/16/2003 8:09:32 PM] [Priscilla] yeah they hit the wrong button again! lol!

[7/16/2003 8:09:37 PM] [TCNut] er tried

[7/16/2003 8:09:48 PM] [hart] BCGI - must have been the interpretation of VZ "which could potentially displace prepay services currently being provided by bcgi." in conference call

[7/16/2003 8:09:53 PM] [wildbill] hahahaha!

[7/16/2003 8:10:05 PM] [wildbill] greed -kills

[7/16/2003 8:11:20 PM] [Steven57] wonder how many will freak in the morning on BCGI

[7/16/2003 8:11:21 PM] [Osc] I'm having trouble with the difference of targets and greed,,I would not mind seeing a target hit

[7/16/2003 8:11:39 PM] [Steven57] just put it on the side of a barn

[7/16/2003 8:11:41 PM] [TCNut] should be grateful for how well I am doing....as it is

[7/16/2003 8:11:47 PM] [Osc] More to learn :o

[7/16/2003 8:12:02 PM] [wildbill] today's early morning commentary - which unfortunately i could NOT send out - **SERVER DOWN** "Good morning, to be honest expected a more severe sell off then we got yesterday. Also expected it to continue on thru the close. So much for expectations. Internals were extremely negative throughout most of the day before our late day rally made them seem healthier than they actually were. Intel earnings gave a boost to after hours prices that has caused and upward bias in the futures prices as I write this. The pattern continues, dip, then buy, or so it appears. Sticking to the opinion that the opposite is occurring, the spikes are being sold, and the market being allowed to drift until another spike allows for more selling." :)

[7/16/2003 8:12:54 PM] [Zathrus] Gee Bill - that's a cheery bit of prose :)

[7/16/2003 8:13:53 PM] [wildbill] not so much cheery just my opinion of what has been going on of late- and of course i could be wrong as AlanD would say! LOL

[7/16/2003 8:13:59 PM] [VJnet] good comments wb

[7/16/2003 8:14:19 PM] [Zathrus] Yep - it unfortunately makes a lot of sense.

[7/16/2003 8:24:16 PM] [really] I had my best trade ever today. In ROBV last night AH at \$0.78 . sold at \$1.17, back in at \$1.28 sold at \$1.40. Missed the high but I am learning. Helps with the bleeding everywhere else.

[7/16/2003 8:24:24 PM] [wildbill] server for site and email program!

[7/16/2003 8:24:35 PM] [Zathrus] Nice job really!

[7/16/2003 8:26:48 PM] [TCNut] so mad at my dad.....he had 5000 shares of ROBV....for a couple months....I told him about good news and newfound AH attention....and really strong looking charts...it spiked up...a little bit....then he got anxious and sold....the other day @ .61....he was in from .37....but today...he would have been stylin!

[7/16/2003 8:29:12 PM] [wildbill] MRVL looks like it was a good one - no takers though?

[7/16/2003 8:29:31 PM] [TCNut] he was convinced it was a dog...for those two months...i guess and didn't trust enough...throught it would fall back down into the swamps

[7/16/2003 8:30:01 PM] [TCNut] which may happen again....very soon

[7/16/2003 8:30:58 PM] [really] Wildbill - you must live in the worst place there is for connectivity and lightning storms.

[7/16/2003 8:31:19 PM] [wildbill] MRVL - gap up - SHORT - 38.22 to 38.73 - stop @39.07 ----- gap down - LONG - 37.30 to 36.87 - stop@36.48 -- recap -- MRVL -- gap up opening @37.97, up to a high of 38.46, by 09:33, reaction straight down to a low of 37.42, @09:53, a pause then fell off the table to a low of 36.41, by 10:14 - not bad for forty minutes

[7/16/2003 11:19:20 PM] [really] FW - What does the chart say? seems like it is stuck in its base.

[7/16/2003 11:21:41 PM] [FirstWave] yes, and athe 50 avg.

[7/16/2003 11:27:26 PM] [really] Can anyone explain the neg divergence Don Worden is talking about - The TSV is in positive territory, but it is nevertheless negatively divergent with the July price rally. Overall, a good pattern suffering some loss of momentum. -DW Is he comparing the price lows in May and the end of June to a TSV that just barely stays positive on the zero line. I guess I don't see a negative diverengce

[7/16/2003 11:28:36 PM] [really] Don Worden is addressing the Nasdaq in his nightly notes

[7/16/2003 11:29:01 PM] [TCNut] like tony's books....one of the first ones i read

[7/16/2003 11:30:15 PM] [Saroj] really - look at my shared chart. You will see the price increasing while the peaks of the TSV (green in window 2) are getting lower.

[7/16/2003 11:30:40 PM] [Saroj] I'm not sure that Don W. uses the same TSV setting I am showing, but his should look similar.

[7/16/2003 11:32:27 PM] [really] Hls is posted with the comment. How do I see your chart? I don't see the view click here ? comment

[7/16/2003 11:33:14 PM] [TCNut] float a chart.....and try clicking on the faces icon.....near edit

[7/16/2003 11:33:50 PM] [TCNut] then it shows a list of all people sharing charts

[7/16/2003 11:34:26 PM] [Saroj] I shared it to alltc net.

[7/16/2003 11:35:09 PM] [TCNut] better to trywhat i said....it is the most reliable method

[7/16/2003 11:35:44 PM] [Saroj] Or go to "Shared" in the icon bar and click on "by another user" - then click on my hanle.

[7/16/2003 11:37:02 PM] [TCNut] click on your handle?:8

[7/16/2003 11:37:20 PM] [really] JBHT vs NDX ? Is that the chart?

[7/16/2003 11:37:53 PM] [TCNut] now were talkin:P=D

[7/16/2003 11:38:15 PM] [Saroj] right - "Saroj"

[7/16/2003 11:38:41 PM] [Miss_B] ..,

ClubHome

[7/16/2003 11:38:45 PM] [TCNut] sorry....feelin a bit frisky
[7/16/2003 11:38:46 PM] [Saroj] well, now it is. I'm going thru my watchlists. Just a sec. I'll go back to NDX--X
[7/16/2003 11:38:57 PM] [really] ok
[7/16/2003 11:39:07 PM] [Miss_B] .
[7/16/2003 11:40:38 PM] [Saroj] really - ok - look quick -- Nasdaq showing TSV16 in window 2
[7/16/2003 11:40:55 PM] [TCNut] didn't know Miss_B was around to give me a scolding=o
[7/16/2003 11:41:37 PM] [Saroj] Miss B? She was just making a point.:D
[7/16/2003 11:42:18 PM] [TCNut] thought she was spanking me....incognito
[7/16/2003 11:42:21 PM] [Saroj] really - did you see it?
[7/16/2003 11:42:28 PM] [Saroj] you wish!
[7/16/2003 11:42:53 PM] [really] I think so . Do you have enough lines and colors? -lol
[7/16/2003 11:43:44 PM] [TCNut] so....are we in trouble tomorrow...er what?
[7/16/2003 11:44:40 PM] [Saroj] LOL - don't want to miss anything. And this is just one of the charts I use!!:D
[7/16/2003 11:45:01 PM] [TCNut] it's called....eye candy..
[7/16/2003 11:45:15 PM] [really] If I look at your white OBV it seems to be going up with the price chart, although not by much. But it is not going down. Is it neg div if the slope of one is less than the other. I thought the direction had to be different, not the slope of a line draw between the two lows.
[7/16/2003 11:45:32 PM] [TCNut] for some sweet.....and others bitter sweet
[7/16/2003 11:46:54 PM] [Saroj] I thot you were talking about TSV earlier., but the OBV is a negative divergence too as I look at it. Both are. Look at the height of each of the peaks.
[7/16/2003 11:47:04 PM] [Miss_B] ..
[7/16/2003 11:47:14 PM] [Miss_B] ..
[7/16/2003 11:47:34 PM] [Miss_B] ..
[7/16/2003 11:47:49 PM] [Saroj] Miss_B - you having problems???:D:D
[7/16/2003 11:47:54 PM] [really] I was talking about TSV but I don't see TSV on your chart, only many many many ma's and MACD and STO's.
[7/16/2003 11:48:27 PM] [Miss_B] yes and getting mad
[7/16/2003 11:48:51 PM] [Miss_B] ..
[7/16/2003 11:49:00 PM] [Saroj] TSV is the green line in the middle window.
[7/16/2003 11:49:14 PM] [Saroj] I just can't understand why you couldn't find it! LOL
[7/16/2003 11:49:22 PM] [really] So you look at the peaks of the OBV to the peaks ?? of the price, not the lows of the OBV to the lows of the price?
[7/16/2003 11:49:31 PM] [Saroj] Miss_B - press the Escape key first.
[7/16/2003 11:50:00 PM] [Saroj] That's my understanding.
[7/16/2003 11:50:19 PM] [TCNut] sweet IO....really!:D...was that there before....thought i checked few nights ago....and wasn't much there
[7/16/2003 11:50:29 PM] [TCNut] er BIO
[7/16/2003 11:50:30 PM] [really] ok I see it now. sorry. got out my telescope. put the magnifying glass away
[7/16/2003 11:51:11 PM] [TCNut] enjoyed stories about watching dad
[7/16/2003 11:52:03 PM] [TCNut] and Home Depot!
[7/16/2003 11:52:26 PM] [Miss_B] thanks
[7/16/2003 11:52:35 PM] [really] Saroj - It is becoming a beautiful thing. even I can see it now. -lol

ClubHome

[7/16/2003 11:52:49 PM] [Saroj] I thot you'd like that better.
[7/16/2003 11:53:47 PM] [Saroj] I'm so used to it as it was that I just filter out different parts of it as needed.
[7/16/2003 11:53:53 PM] [really] But I still do not see a neg div. Can you tell me which peak /valley you are looking at.
[7/16/2003 11:54:43 PM] [Saroj] Ok, see the vertical lines?
[7/16/2003 11:55:10 PM] [really] yes
[7/16/2003 11:55:31 PM] [really] so you pick the peaks of TSV , not peaks of price.
[7/16/2003 11:55:38 PM] [Saroj] On 6/11 the price is lower than on 7/15 whereas the TSV16 is higher on 6/11. Ditto the OBV.
[7/16/2003 11:56:19 PM] [Saroj] Actually I think 6/8 is a better date for the peak on the price.
[7/16/2003 11:56:26 PM] [really] ok thanks bunches.
[7/16/2003 11:56:31 PM] [Saroj] You may be trying to make this too precise.
[7/16/2003 11:57:27 PM] [TCNut] saroj.....in the bottom window.....if you put the 4macd in first...then the stochs and macd lines.....they will project on top of the histogram.....instead of behind....will make template much more beneficial!;))
[7/16/2003 11:57:30 PM] [really] I was looking at the low of June 30 or thereabouts to today's prices
[7/16/2003 11:58:23 PM] [TCNut] or....the eye candy...much sweeter!

[7/17/2003 1:04:43 AM] [AlanD] Hi Saroj, its not a big deal. Just a question about my "periods"
[7/17/2003 1:05:26 AM] [StockStalker] ur profile says you are male? How is that possible
[7/17/2003 1:05:45 AM] [Saroj] LOL - Is he ragging you about your periods?? We had a long conversation
it.
[7/17/2003 1:05:53 AM] [TCNut] oh...sorry Alan....was distracted by a barrage of PMs...
[7/17/2003 1:06:12 AM] [InanOut] Alan are your periods not coming regularly? LOL
[7/17/2003 1:06:23 AM] [Saroj] I tried to avoid explaining to him that it happens with more frequency as one
away from age 40. Towards the up side.
[7/17/2003 1:07:15 AM] [StockStalker] DLIA has been great so far... Looks like more room to upside for the
yet
[7/17/2003 1:07:40 AM] [AlanD] LOL, You kill me Saroj. Ok, ok. I transmit a "perod" just as a systems check
leave TCNet on for a considerable amount of time, my systems seems to disconnect from the chat server
Its just a quick way of checking to see if I'm still seeing realtime chat as well as being connected before a
typing something out that would otherwise not get transmitted. Not a big deal really.
[7/17/2003 1:08:44 AM] [Saroj] Oh my gawd. You mean it isn't just that you forget to hit "Escape" first when
focused on "chat"?
[7/17/2003 1:08:44 AM] [AlanD] Oh BTW, I'm still male as last time I checked.
[7/17/2003 1:09:43 AM] [InanOut] what's the 3rd and 4th one, I have only FW. and HOTTO up right now, r
missing AlanD usually have 3 with alltcnet
[7/17/2003 1:09:55 AM] [AlanD] LOL, sorry no "Escapes" here. My extravert personality prefers periods. L
[7/17/2003 1:10:02 AM] [TCNut] sweet!....Alan...but, do you think you could be a little more clear? Saroj at
discussing the matter earlier
[7/17/2003 1:10:12 AM] [TCNut] :D
[7/17/2003 1:10:18 AM] [StockStalker] [norrineil@comcast.net] Permanent Failure: 522_mailbox_full; YOU

[7/17/2003 1:16:00 AM] [ChartMonkey] i have a palm vx - it's all about the form factor
[7/17/2003 1:16:15 AM] [AlanD] Most of my primary counts are showing the NDX in zone for a wave 5 complete minor count has wave c of Y but I'm not putting much weight into it.
[7/17/2003 1:16:51 AM] [AlanD] I have the 400mhz version and think its just great! I don't even pull out my axim anymore.

[7/17/2003 1:17:05 AM] [ChartMonkey] i searched the main page at www.financialsense.com for "prechter" find it...
[7/17/2003 1:18:03 AM] [FirstWave] a gap down would set me up for a buy tomorrow
[7/17/2003 1:18:09 AM] [Saroj] StockStalker - your chart is posted to the Trading Resources club here under the heading of "Ends". Folks can download it from there. If this isn't o.k. I can delete it.
[7/17/2003 1:18:14 AM] [AlanD] There are numerous interesting audio interviews on financialsense.com. Jim Leutchik has a weekly radio show and has a guest speaker each week.
[7/17/2003 1:18:21 AM] [ChartMonkey] if they can get the latest/greatest functions squeezed back down into the Vx/M500 form factor, i'm there.
[7/17/2003 1:18:46 AM] [Saroj] Mr. Bean is on the Daily Show for anyone who is interested.
[7/17/2003 1:19:47 AM] [AlanD] A really good one to listen to is the one on June 28th. He had a two hour interview with IMO some of the best analysts all talking together in a forum. Richard Russell, Kennedy Gammage, Peter E. Tim Wood
[7/17/2003 1:19:49 AM] [ChartMonkey] is puplava a buy gold and run for the hills kind of guy?
[7/17/2003 1:20:52 AM] [AlanD] The Dell Axim is a nice PDA. Much cheaper than a COMPAQ IPAQ with pretty much the same features. Color screen is very bright and clear.
[7/17/2003 1:22:09 AM] [AlanD] He does endorse the metals and has done a lot of research but its only on his position on where the markets are heading. Its basically bearish. Perhaps thats why I listen to him but his speaker line up is usually pretty good.
[7/17/2003 1:22:56 AM] [AlanD] He thinks we could be going into a severe recession/depression. I tend to agree with him there although I don't agree with everything he does.
[7/17/2003 1:24:05 AM] [ChartMonkey] well beyond all the nut jobs who want the apocalypse to come so that their favorite religious prophecy come true, there are also some fairly articulate and sharp folks like Tice, C. Fleckenstein etc who see lower lows in the future
[7/17/2003 1:24:20 AM] [StockStalker] It can stay in Trading Resources if the Password is removed
[7/17/2003 1:25:29 AM] [AlanD] Roach and Fleckenstein are pretty respected and well established in their areas of expertise. They are definitely bears.
[7/17/2003 1:26:29 AM] [ChartMonkey] i'd really love to know what Fleck's long term returns in his hedge fund are though - he seems very normal and balanced on tv but in his written columns he comes off as someone who is a bit of a nut.
[7/17/2003 1:26:35 AM] [SeattleSteve] Alan, the weekly leading indicator index (which has a truly excellent track record of 50 years or so) is showing that the economy is finally out of the woods now -- for the first time since 9.11.02
[7/17/2003 1:27:26 AM] [SeattleSteve] Certainly argues against getting all excited about an impending recession/depression
[7/17/2003 1:27:49 AM] [SeattleSteve] At least in the next six months
[7/17/2003 1:28:45 AM] [ChartMonkey] prechter interview in sfomag.com was non-committal on predicting bear market bottom - said could be years out
[7/17/2003 1:29:57 AM] [AlanD] Well I won't dispute any indicator but you could probably find an indicator in the Japanese market that showed something similar and you know where that went. Yes, yes, I know the U.S. market but nothing can convince me that the markets won't at least correct with the current PE ratio for the SP500

[7/17/2003 9:25:00 AM] [VJnet] Morning tina... great article

[7/17/2003 9:25:40 AM] [mullet] GM Tina, Thanks for the two articles- good stuff

[7/17/2003 9:25:59 AM] [Sabrewolf] Thanks tina; very good stuff

[7/17/2003 9:26:09 AM] [Saroj] Good morning. I've never seen a sorry-er bunch of indicators in my life. Not many indicators that I watch are down except DJ-20. And even the positive ones look about to roll-over.

[7/17/2003 9:26:13 AM] [tinaSDtrader] Keep an eye on the COMPQX today. Futures way down, if the com down it will leave a dreaded island top. Last time that happened we got a correction. Stay on your toes in overbought market.

[7/17/2003 9:26:20 AM] [tinaSDtrader] You're all welcome

[7/17/2003 9:27:03 AM] [Dennis4Cash] GM everyone, thx Tina for the great article

[7/17/2003 9:27:40 AM] [rockin] We have been in a turning point and there will be downward pressure - I'm cash and what positions I have are hedged - I have my chicken stance on now. By Friday I'll be 100% cash covered calls close. I'm seeking shorts now

[7/17/2003 9:27:59 AM] [guzman] gm ... tina, you'll also find many 3 Gap Plays which would be another confirmation of your Island Top prognosis

[7/17/2003 9:29:20 AM] [rwfett] Sure looks like a Batman sell signal on Dow weekly!

[7/17/2003 9:29:23 AM] [kmack] 11.50 CHINA

[7/17/2003 9:29:30 AM] [Nance] hi guzman - I'm familiar with Island Top, but 3 gap play - could you expound

[7/17/2003 9:30:35 AM] [guzman] Hi Nance --- its a trend having 3 gaps .. with the last gap being an exhaust (twice the size of the previous two). The typical move on a 3 Gap play is for the stock to trade back and fill followed by a rally back up to the prior high

[7/17/2003 9:30:55 AM] [guzman] INTC and SMH are two to look at

[7/17/2003 9:33:45 AM] [tinaSDtrader] There's that gap down on the COMPQX - it could fill intraday - if no island top.

[7/17/2003 9:35:47 AM] [Eagerbeaver] I cannot begin to tell you how glad i am to be out of ..PCNTF :D

[7/17/2003 10:39:38 AM] [tinaSDtrader] For those of you not on very early this a.m. - I am closely (very) w/ COMPQX today. It gapped up on 7/14 and gapped down at the open today. If the gap does not fill by EOE an island top. This will bode bearish for the Nasdaq and my shorting hat will be close at hand if this happe top is a strong bearish signal - to see what happened to the COMPQX last time it happened, check out in

ClubHome

gapped up, 4/22/02 gapped down. The composite dropped over 12% off that island top. With the market as it is, it pays to really be alert. The big IF here is whether the Nasd will turn around today and fill that gap.

[7/17/2003 10:40:07 AM] [mace] sndk a short now with 500 mil offering outstanding?

[7/17/2003 10:48:22 AM] [tinaSDtrader] I'd also offer caution shorting SNDK - it's a bull day on heavy volu also 10ema above 20ema, especially on the 5s it's sitting on the 10ema. Of course, if you have a tested sy shows this as a hi probability short perhaps it is OK.

[7/17/2003 11:06:32 AM] [tinaSDtrader] OK - Time for another Tina Rule - take it for what it's worth, beca have a tested system that proves otherwise of course trade it. Key word there is TESTED and profitable s [7/17/2003 11:06:44 AM] [tinaSDtrader] Here's the Rule - I do not go long stocks in a downtrend.

[7/17/2003 11:07:33 AM] [InanOut] smart safe rule Tina

[7/17/2003 11:07:35 AM] [tinaSDtrader] I do not attempt to nail bottoms. Instead I find stocks in an uptrend is above the 20ema). I then trade pull backs to a support, as discussed in my post yesterday - see discuss

[7/17/2003 11:07:44 AM] [kellam] Tina do you go short in a sideways market without confirming distributio indexes

[7/17/2003 11:08:00 AM] [isay] define "trend" pls?

[7/17/2003 11:08:15 AM] [Stitch] tina- lots of these stocks are in daily uptrend, hard to find entry for swing

[7/17/2003 11:08:34 AM] [IanB] TS, what period is your trend? Nasdaq up trend since March still in place

ClubHome

[7/17/2003 11:08:35 AM] [tinaSDtrader] I only short hi probability. Meaning, I find stocks in a downtrend ar swings. Or I short hi prob shorting patterns, like rising wedges and descending triangles.

[7/17/2003 11:08:50 AM] [Stitch] so i enter on pullback, but during day is in a downtrend intraday

[7/17/2003 11:09:02 AM] [Fieldcrestcf] Interesting Technical commentary on AVII, currently a narrow daily times BB were approx this narrow: May 2000 avii ran up from around 9 to 13 ... April 2001 ... ran up from u oct 2001 went from 7 to 10 ...Jul 2002 ...

[7/17/2003 11:09:51 AM] [ws128] sticking with hotto on TRAC - think we base here

[7/17/2003 11:09:55 AM] [tinaSDtrader] Even if a stock is looking like it is going up during the day, if the st closed below the 20ema on whatever time frame I'm trading, I consider the risk too hi. But again, these are if you have a system that does otherwise that's okay.

[7/17/2003 11:10:27 AM] [tinaSDtrader] I'm a VERY strong advocate of having a tested system with rules. meaning you can prove the theory you're trading is profitable.

[7/17/2003 11:10:39 AM] [kellam] thx Tina:)

[7/17/2003 11:11:03 AM] [tinaSDtrader] Some people are successful nailing bottoms - I'm not coordinated it so I stick with safer stuff.

[7/17/2003 11:11:21 AM] [IanB] Thx Tina, I also think 20ema is as good as any trend measure

[7/17/2003 11:11:48 AM] [Stitch] agree tina, stock must be above MAs to go long.....

[7/17/2003 11:11:54 AM] [Traderabe] Hi, Tina

[7/17/2003 11:12:07 AM] [tinaSDtrader] The 20ema is pivotal. It is very recognized and is a good minimal i imho

[7/17/2003 11:12:09 AM] [isay] tks Tima, great answer.

[7/17/2003 11:12:48 AM] [Newkid49] GENR=ALICE, RNDC...turning?...just htinking

[7/17/2003 11:12:58 AM] [Stitch] TRAC is way above 10, 20, 50 MA, but struggling todayB)

[7/17/2003 11:14:11 AM] [tinaSDtrader] Example COGN - today the 10ema is trying to cross below the 20 gapped down, and if it doesn't come back up and fill that gap today, it will close below the 20ema. I do not stocks that do this as I consider them more likely to go down then up. I wait for the 10ema to get back abo 20ema, want the stock closing above the 20ema, then I buy a pullback.

[7/17/2003 11:14:33 AM] [kellam] Tina Have a small position in PRCP, right on 20MA daily,Macd looking t LR30,opinion please

[7/17/2003 11:14:35 AM] [root] Stitch--which time period--daily?--weekly??

[7/17/2003 11:14:51 AM] [tinaSDtrader] I don't care if the first swing up gets away from me. If the uptrend i should pull back giving me a new buy position on a dip.

[7/17/2003 11:14:54 AM] [Stitch] daily

[7/17/2003 11:15:10 AM] [ChuckR] 11am ET..DJ..-18.56..787/2179..29/9..T=1.21..NAZ..603/2135..62/5

[7/17/2003 11:15:22 AM] [cyberact] Tomorrow is expiration friday....lots of undercurrents in the DOW....

[7/17/2003 11:16:06 AM] [tinaSDtrader] PRCP has support at the 20ema, a close below that would concei what stops are for. But I don't set stops right at the 20ema, I always shave a few cents off that because so pierce the 20ema, like PRCP did on 6/25/03

[7/17/2003 11:16:31 AM] [Erik] Tina, does the placement of the bid/ask blue lines contribute anything to th Some charts show them way below the MAs, and some charts show them even.

[7/17/2003 11:17:09 AM] [InanOut] Tina can you share a chart please

[7/17/2003 11:17:43 AM] [Stitch] I am watching TRAC on My-Trac software,:) I send them money every mc

[7/17/2003 11:17:58 AM] [Stitch] Maybe i'm their only customer?

[7/17/2003 11:18:56 AM] [JAHman] TRAC 1.94

[7/17/2003 11:18:56 AM] [tinaSDtrader] In my experience, I've noticed if the bid-ask bars stay below the c the bar will eventually fill down to them. Vice versa if they are above the current price.

[7/17/2003 11:19:27 AM] [marketrogue] Tina- the bid/ask IS the market- the price follows

[7/17/2003 11:19:38 AM] [tinaSDtrader] trying to share PRCP but doesn't seem to be working

[7/17/2003 11:19:48 AM] [kellam] tina much help on PRCP thanks, I alwys use stops :)

[7/17/2003 11:20:14 AM] [tinaSDtrader] Yes - bid-ask is where it is going, indicates buying/selling pressur matter of time til it gets pulled up or down with that pressure.

[7/17/2003 11:20:58 AM] [Stitch] so much for my tight stop

ClubHome

[7/17/2003 11:21:04 AM] [tinaSDtrader] For day traders, many use level II data or time/sales - helps deterr price is moving

[7/17/2003 11:21:30 AM] [marketroque] Tina- if a market trades at 60 and the bid moves to 63, that super transaction- the last price is old news

[7/17/2003 11:21:40 AM] [Stitch] guess i shouldn't have it mental, should have entered it in system

[7/17/2003 11:22:05 AM] [Rjw] how is trac for trading

[7/17/2003 11:22:16 AM] [tinaSDtrader] About stops - the tighter you place it the more likely it is to get hit. range of the daily movement can hit it if close. If you want to be in you'll need to loosen it up. Means giving

[7/17/2003 11:23:03 AM] [Stitch] Out TRAC 1.89,,live and learn

[7/17/2003 11:23:10 AM] [rockin] CHINA - short buy with close stop - be nibble and out at eod

[7/17/2003 11:23:32 AM] [tinaSDtrader] yes - the current price will be old news once the market pulls it up when looking at it, the current price is what's showing on TC Net for the bar. To see the bid-ask, need RT columns in your watchlist window.

[7/17/2003 11:23:42 AM] [Jazzy] Tina, I wanted to add a kernal to your remarks re Island top in the COMP

[7/17/2003 11:23:53 AM] [tinaSDtrader] do tell

[7/17/2003 11:23:58 AM] [Jazzy] big difference between then and now though April '02 the daily and week in downtrends

[7/17/2003 11:24:16 AM] [Eagerbeaver] ...TRAC...good to just watch for now, IMHO

[7/17/2003 11:24:33 AM] [tinaSDtrader] this is true - I'm not predicting what will happen, just saying what I technically. Sure wish I had a crystal ball.

[7/17/2003 11:24:49 AM] [cyberact] watching COMPQX 1707....break of march up-trendline stands there

[7/17/2003 11:24:59 AM] [tinaSDtrader] But stocks go down about 3x as fast as they go up (this has been per Moe Ansari)

[7/17/2003 11:25:13 AM] [Jazzy] they are not now

[7/17/2003 11:25:20 AM] [Newkid49] EAG@.6

[7/17/2003 11:25:24 AM] [StockStalker] A copy of the BRKS chart that I mailed out is now uploaded in Th Stalker Zone and the Password has been removed. I put some other stuff up there as well

[7/17/2003 11:25:28 AM] [tinaSDtrader] My goal is to protect against losses first and foremost.

[7/17/2003 11:25:29 AM] [Jazzy] equally likely that it fills today's gap next week

[7/17/2003 11:25:35 AM] [ws128] think stops were just getting tagged on TRAC

[7/17/2003 11:25:39 AM] [dRb] nice idea on crystal ball.:8

[7/17/2003 11:25:40 AM] [Jazzy] fitty/fitty

[7/17/2003 11:25:54 AM] [tinaSDtrader] that is possible that it will fill the gap, stocks often do.

[7/17/2003 11:26:12 AM] [cyberact] S & P 500 march uptrend line at 900 akready broken...now resistance

[7/17/2003 11:26:17 AM] [Jazzy] that's all...just noticed the difference

[7/17/2003 11:26:37 AM] [Stitch] What did I do wrong? Feedback with setting my stop at 1.99 on TRAC?

[7/17/2003 11:26:41 AM] [tinaSDtrader] what I'm looking at jazzy is that the composite could close today b 20ema. If it does, I'll look for the next support.

[7/17/2003 11:26:48 AM] [Stitch] Was it just a bad technical stop?

[7/17/2003 11:26:58 AM] [Jazzy] OK.

[7/17/2003 11:27:00 AM] [Stitch] 1.89/1.79 better support?

[7/17/2003 11:27:23 AM] [Stitch] I'd be happy if I got out at 1.99, but dropped right past that

[7/17/2003 11:27:31 AM] [tinaSDtrader] If the COMP closes today below 1707, it will have broken the 7/10 meaning next support is the 20ema.

[7/17/2003 11:27:54 AM] [Stitch] so then I'm sitting there going "will it drop lower? I better get out down he

[7/17/2003 11:27:54 AM] [ws128] you didn't do anything wrong stitch - you are trading your plan - I am pla aggressively and taking a higher risk - we'll see what happens

[7/17/2003 11:28:10 AM] [Llw] Looking back; yesterday I commented the NAS may hit the 1700 level by Fi support at that level. Today I would like to add - the support at that level may not hold. If not, I see support

[7/17/2003 11:28:39 AM] [Jazzy] Do you see a little pattern in APWRE? In a trading range on the weekly.

[7/17/2003 11:30:12 AM] [tinaSDtrader] I agree on the 1680-1700 support. 1680 is about where it will hit the up-trendline. Supports are: bottoms, recognized moving averages (10-, 20-, 40-, 50-, 100-, 200- are strong gap openings, strong floors.

[7/17/2003 11:30:14 AM] [Stitch] as TRAC went down part of me was saying "play it cool, set your limit at come back up and take me out"

[7/17/2003 11:30:51 AM] [tinaSDtrader] I'm not trying to be chicken little - I'm just saying trade smart in an market.

[7/17/2003 11:30:54 AM] [ws128] my strategy is being influenced by 2 things: 1. FW calling for market up : has a great track record day to day and 2. Hotto re-entered TRAC as well - he also has great instinct. BU could still go south. I sold my position at 1.40 on the open and re-entered at 2.05

[7/17/2003 11:34:28 AM] [Luigistock] exactly stitch on to the next trade

[7/17/2003 11:34:30 AM] [tinaSDtrader] It is tough to be disciplined but a must. Stops take the decision away from you if the stock goes bad. However, they also get manipulated. I've had my stop hit by a penny just to recover. Always use the Alerts feature on TC Net for where you'd have your stop. But takes iron discipline to pull the trigger when the stop is automatic. Tough call.

[7/17/2003 11:34:38 AM] [root] the way gold is acting, it looks like further deflation is predicted.

[7/17/2003 11:37:43 AM] [hotto] TRAC..FIB numbers.. were Fib.382=2.29... and Fib.500=2.01.. I miscalculated 2.04...oops.. Stop should have been 1.99...oops

[7/17/2003 11:38:23 AM] [Stitch] and you set a hard stop, not a mental stop? Do you do that even when you're sitting in front of computer, hotto?

[7/17/2003 5:37:51 PM] [kmack] to heck with two monitors...I just have a dart board...my kids think it is gre

[7/17/2003 5:38:11 PM] [CDYTrader] Probably works better than MY picks!

[7/17/2003 5:38:23 PM] [kmack] lol

[7/17/2003 5:38:30 PM] [mac27] there you go kmack; sometimes I think the trades would go as well:)

[7/17/2003 5:54:23 PM] [wirenut] can someone tell me what time after hours trading stops??

[7/17/2003 6:06:24 PM] [tinaSDtrader] different market centers have different hours, some trade up to abc 4:15-5:00pm ET - you can find a list of hours at: www.interactivebrokers.com, in search type after hours a risks of after hours trading. Scroll to btm of that screen and there is an underlined word that says somethir trading hours.

[7/17/2003 6:07:19 PM] [wirenut] Thanks

[7/17/2003 6:08:04 PM] [mac27] I can trade on IB up to 8 ET

[7/17/2003 6:11:00 PM] [tinaSDtrader] yes - depending on volume in the stock you're trading - I've been al trade around 5pm Pacific Time - 8pm ET. Careful putting in market orders in after hours, I personally will r use limits after hours - but that's just my rule. Bid-ask spread can really widen and volume uncertain in ma Scary!

[7/17/2003 6:14:08 PM] [mac27] i rarely trade then either; mainly to close out a position

[7/17/2003 6:14:55 PM] [mac27] i just limit orders only, too. Also stop orders don't work after hours or pren

[7/17/2003 6:15:41 PM] [tinaSDtrader] sometimes get a nice gift, like the other day I sold a stock pre-mark 12.95/sh, it gapped up open only to 11.70 then filled the gap. I got a price that was 1.25 above what even the day. Some poor trader probably paid me with a market order and they got filled at that hi price. This is use market orders after hours, and rarely ever at all actually.

[7/17/2003 6:16:23 PM] [tinaSDtrader] Prefer buy/sell limits and buy/sell stops.

[7/17/2003 6:16:52 PM] [mace] anyone watch lexr yest and today?

[7/17/2003 6:17:32 PM] [mac27] ouch; one day a friend of mine got filled at a price double the last price. L but somebody had put in 36 in at the ask! Luckily IB "busted" the trade

[7/17/2003 6:18:21 PM] [tinaSDtrader] easy to manipulate in after hours - let the trader beware. I NEVER i order - can end up at the extremer of the spread and that can be way away from the close.

[7/17/2003 6:19:18 PM] [tinaSDtrader] besides - I'm obsessed enough - I have to draw the line somewhere

[7/17/2003 6:19:24 PM] [Johnster] Schwab, for one, will only allow limit orders AHs and PM...no market or

[7/17/2003 6:19:42 PM] [mac27] know what you mean tina :)

[7/17/2003 6:20:44 PM] [tinaSDtrader] listening to one of my fav talk show hosts, Moe Ansari - he's talking dreaded island tops that occurred on several stocks today. And technically occurred on the COMPQX tod;

[7/17/2003 6:20:47 PM] [mac27] that's good on Schwab's part Johnster; not sure if IB does as I've never tr order ah

[7/17/2003 6:21:46 PM] [FirstWave] Thought that was 'Yo, I'm sorry'...

[7/17/2003 6:21:49 PM] [tinaSDtrader] I trade IB too, never tried a market order but I did get that hi fill on a Can't imagine someone put in a buy limit so far above current price. If so, won't be a trader long unfortuna

[7/17/2003 6:23:12 PM] [tinaSDtrader] IB strongly warns about market orders in AH, but I don't believe the

[7/17/2003 6:23:37 PM] [mac27] that is strange, can't imagine it being to their benefit in any way unless th whole lot of \$ that year & needed some deductions!

[7/17/2003 6:24:14 PM] [tinaSDtrader] the market preys on unskilled traders - one of the biggest "school c knocks" there is.

[7/17/2003 6:25:38 PM] [tinaSDtrader] a friend of mine today put in a market sell on a fairly hi vol stock an higher fill on a short. Really shocked him, but it happens.

[7/17/2003 6:25:50 PM] [tinaSDtrader] and that was during regular trading horus

[7/17/2003 6:26:41 PM] [tinaSDtrader] NOK - man do gaps happen - sure wish I was short that yesterday. wish I'd win the lottery too.

[7/17/2003 6:30:29 PM] [mac27] that would have been nice! I have to take my daughter to a volunteer job;

[7/17/2003 8:53:32 PM] [AlanD] Shorted CCMP yesterday. Nice fall with the market.

[7/17/2003 8:59:21 PM] [AlanD] Looks like the 1227 area on the NDX--X is the next descent area of supp

[7/17/2003 9:12:37 PM] [kmack] 940? not 740?
[7/17/2003 9:12:50 PM] [sisterpractical] not me, but it is interesting that the same line could almost be use
lower neckline from historic runup and the neckline of recent reversal
[7/17/2003 9:13:50 PM] [sisterpractical] the upper one runs 940-960 range - one can always quibble about
where it belongs.
[7/17/2003 9:14:01 PM] [kmack] what I have just found...that I like is the horizontal that runs through the in
the Andrews median line of this trend and the upper channel line...falls exactly on that 940ish neckline
[7/17/2003 9:14:16 PM] [wildbill] and i can not emphasize this enough on a closing basis ONLY

[7/17/2003 9:16:44 PM] [sisterpractical] the '98 to '00 run has a fib near that 940 level also
[7/17/2003 9:17:16 PM] [atraveler] y'all are saying 940 is support in this dip?
[7/17/2003 9:18:10 PM] [sisterpractical] i think it is where the weekly cycle will find its bottom (I hope) - if it
there on this daily cycle, then the weekly will go below that probably
[7/17/2003 9:18:19 PM] [kmack] looks like that is the 98 low
[7/17/2003 9:19:33 PM] [sisterpractical] '98 low is 923

[7/17/2003 9:20:41 PM] [atraveler] the high, week of 11/25/02 was 937
[7/17/2003 9:21:09 PM] [atraveler] resistance is support
[7/17/2003 9:22:27 PM] [atraveler] 11/16/03 peaked at 935
[7/17/2003 9:24:06 PM] [kmack] we might also watch the top of the channel
[7/17/2003 9:25:39 PM] [wildbill] high of 08/02 was broken on its 3rd attempt in this current rally 965 then
after testing the 959 level last week in May is CURRENT support until broken imo
[7/17/2003 9:26:12 PM] [wildbill] again on a CLOSING basis ONLY
[7/17/2003 9:27:20 PM] [Cartman] good observation wb
[7/17/2003 9:29:02 PM] [wildbill] has fallen below 965 intraday once since with a violent reversal through

[7/17/2003 9:30:23 PM] [Cartman] failing the 965 would suggest a run to kmacks 940-950 area, and if bro
descent to 928-934
[7/17/2003 9:31:12 PM] [wildbill] yep - first things first!
[7/17/2003 9:31:26 PM] [Cartman] the bearish of scenarios would suggest the weekly target of 875
[7/17/2003 9:32:00 PM] [Cartman] sorry...getting ahead of myself...reminds me of the froth we saw to the

[7/18/2003 12:25:17 AM] [StockStalker] Once again: I have loaded up the file of chart for the BRKS presentation on my TcNet Club - The Stock Stocker Zone - . It also has some other files loaded up which may be of help. This is the same file I sent out in an email last night (for those of you that did not get it). There is other stuff there for you to see as well if u go to that club. The password has been removed. This may be the final destination for the lesson as well when it is done on Saturday. Email is STOCKSTALKER@knovamind.com

[7/18/2003 12:25:59 AM] [StockStalker] it is in the log for last Saturdays presentation.... beware of the ONE that is spelled incorrectly

[7/18/2003 12:26:12 AM] [trdr] who cares

[7/18/2003 12:27:24 AM] [trdr] dont need anymore attitudes

[7/18/2003 12:27:37 AM] [StockStalker] well then contain it

[7/18/2003 12:27:41 AM] [happy2be] reading material gets me away from the bube tube

[7/18/2003 12:28:01 AM] [StockStalker] I am just trying to save some time and allow me more time to find me a plays list for tomorrow

[7/18/2003 12:28:35 AM] [happy2be] im looking for good plays also, team work is my motto

[7/18/2003 12:29:23 AM] [happy2be] i led my sons basketball and soccer teams to undefeated seasons through team work, now im trying it in stocks

[7/18/2003 12:29:53 AM] [safoocat] what's the hotto club take on INTC?

[7/18/2003 12:30:47 AM] [trdr] let me pack your chute..

[7/18/2003 12:30:50 AM] [ilovemusicCOM] Got an OPS alert today for WebX and Raindance

[7/18/2003 12:31:16 AM] [happy2be] i did some para. dive for a year, but i ran out of money, paying for kids soccer club

[7/18/2003 12:31:20 AM] [ilovemusicCOM] RainDance RNDC = Raindance

[7/18/2003 12:31:30 AM] [ilovemusicCOM] These kinds of alerts tend to me more long term.

[7/18/2003 12:31:32 AM] [StockStalker] Nah i think I will continue to do my own....

[7/18/2003 12:31:54 AM] [StockStalker] goes hand in hand with certain trading issues

[7/18/2003 12:32:34 AM] [happy2be] yea fear of hitting the bottom

[7/18/2003 12:33:06 AM] [ilovemusicCOM] happy2be, instead of reading news/logs, etc. try having it read to you for a change of pace.

[7/18/2003 12:33:17 AM] [StockStalker] I Love, have u tried doing the text entry for chat in your PM add on yet... sure is easier to type in that

[7/18/2003 12:33:49 AM] [happy2be] ilove explain

[7/18/2003 12:34:05 AM] [ilovemusicCOM] StockStalker, don't understand your question.

[7/18/2003 12:34:09 AM] [StockStalker] during the day the characters seem to stick in the buffer and lag the typing....

[7/18/2003 12:34:28 AM] [ilovemusicCOM] You can use ReadPlease to have just about anything read to you.

[7/18/2003 12:34:58 AM] [StockStalker] u had mentioned possibly modifying that

ClubHome

software module to allow text entry externally to tcnet to be sent into the chat room
[7/18/2003 12:35:00 AM] [ilovemusicCOM] MagicBriefing works with ReadPlease and reads Briefing headlines aloud with a few seconds after they come out.
[7/18/2003 12:35:12 AM] [happy2be] ok how do i install it
[7/18/2003 12:35:25 AM] [ilovemusicCOM] Some lke to use REadPlease to have news articles read
[7/18/2003 12:35:51 AM] [ilovemusicCOM] You can get readplease from www.readplease.com
[7/18/2003 12:36:04 AM] [ilovemusicCOM] the price is right -- they have nice free one.
[7/18/2003 12:36:14 AM] [ilovemusicCOM] and for a few bucks you can get a prof. version
[7/18/2003 12:36:33 AM] [ilovemusicCOM] You can get MagicBriefing from my website.
[7/18/2003 12:36:39 AM] [StockStalker] yes it is great and already used it... but since the text entry line on tcnet is not able to have the font size increased (but the chat dailogue is) it is hard to see what u ttype in hi rez....
[7/18/2003 12:37:11 AM] [StockStalker] so another form of text enty would be nice (like ur pm'ing softwatre)
[7/18/2003 12:38:04 AM] [ilovemusicCOM] so you think I should have an option for sending text to all in the chatroom?
[7/18/2003 12:38:33 AM] [StockStalker] YES YES Please Please Please Yes yes I do;);)
[7/18/2003 12:38:55 AM] [ilovemusicCOM] OK, will add it to my MagicNotes :)
[7/18/2003 12:39:14 AM] [StockStalker] it is silly that the chat dialogue font can be increased but not the text entry..... why would one need one of the letters to be one size and not the other
[7/18/2003 12:39:21 AM] [ilovemusicCOM] I have a new program that I use to take notes of things to do, schedules, etc.
[7/18/2003 12:39:47 AM] [ilovemusicCOM] I'm sure they will fix it in time.
[7/18/2003 12:40:14 AM] [ilovemusicCOM] I made a slide show for TC2000 and very shortly after that they added a slideshow feature.
[7/18/2003 12:40:42 AM] [ilovemusicCOM] anyone here using Cybertrader?
[7/18/2003 12:40:53 AM] [StockStalker] the other issue is that when the merket is busy, tcnet pulls many resources from the machine and the text gets delayed in the typing buffer and I cannot see what I am typing until it catches up
[7/18/2003 12:41:22 AM] [happy2be] down loading it now, will ck it out later, still scanning stocks, need to make a 2 way tomorrow, no \$ all week
[7/18/2003 12:41:38 AM] [StockStalker] they are based in Austin where I used to use Protader stuff (Gr8Trade)
[7/18/2003 12:42:13 AM] [happy2be] no cyber, scottrade here
[7/18/2003 12:42:34 AM] [StockStalker] well cyber is a full direct access package happy
[7/18/2003 12:42:46 AM] [ilovemusicCOM] Cybertrader just made some really nice enhancements
[7/18/2003 12:50:43 AM] [happy2be] lost chat

[7/18/2003 12:52:23 AM] [happy2be] talking about cybertrader, is it that good?
[7/18/2003 12:52:36 AM] [arch] looks like you missed all of us getting booted out

"Avoid at all costs!"

[7/18/2003 1:10:26 AM] [ilovemusicCOM] that is, avoid long

[7/18/2003 1:12:34 AM] [StockStalker] ahhh, did an update again and it worked fine... gracias

[7/18/2003 1:12:47 AM] [happy2be] low volume for me anyway

[7/18/2003 1:13:02 AM] [happy2be] great ss

[7/18/2003 1:13:32 AM] [ilovemusicCOM] I've been trying some low volume plays lately.

[7/18/2003 1:13:43 AM] [ilovemusicCOM] Have to be more patient and go in with fewer shares.

[7/18/2003 1:14:14 AM] [StockStalker] yes fewer shares is key on some since the r/r is better usually

[7/18/2003 1:14:35 AM] [happy2be] got burned in a couple low volume picks last month

[7/18/2003 1:14:57 AM] [StockStalker] i got smashed in BEV

[7/18/2003 1:15:24 AM] [StockStalker] the specialist had his way with me,,,, i was in far too much of it

[7/18/2003 1:16:14 AM] [ilovemusicCOM] position size is very important -- takes a while to learn that.

[7/18/2003 1:16:16 AM] [happy2be] asyt for me, got in at 7 went down to 6.85 out then it went to 10.50 ouch

[7/18/2003 1:17:47 AM] [happy2be] any good looking charts you found tonight

[7/18/2003 1:17:53 AM] [ilovemusicCOM] For me it is Important to pick a support resistance line on daily and then make sure I can take a move to slightly beyond that level.

[7/18/2003 1:18:56 AM] [ilovemusicCOM] actually, need to update!

[7/18/2003 1:19:13 AM] [happy2be] ilove, that is what i do also, but i get out every day, the war scared me

[7/18/2003 1:33:57 AM] [LuKiTrader] ok, re WEBX, are you aware of what happened to it today?

[7/18/2003 1:34:45 AM] [StockStalker] that looks good jerry

[7/18/2003 1:34:45 AM] [ilovemusicCOM] just looking at the chart, it doesn't look good, but I haven't seen extended hours.

[7/18/2003 1:35:23 AM] [LuKiTrader] well, it fell 7% during the day but somehow in AH it is up to 17.50!!!

[7/18/2003 1:35:43 AM] [ilovemusicCOM] it beat by 3 cents

[7/18/2003 1:36:02 AM] [ilovemusicCOM] that's probably what prompted the OPS alert

[7/18/2003 1:36:36 AM] [StockStalker] Glad u are able to see the pattern now Jerry

[7/18/2003 1:38:28 AM] [StockStalker] smsi is gapping up it appears as well

[7/18/2003 1:51:29 AM] [Stitch] worked that time.....
[7/18/2003 1:51:42 AM] [StockStalker] "get it right the last time"
[7/18/2003 1:53:31 AM] [Stitch] Oz, should your inside day PCF have as many as 1400 in watch list before filters?
[7/18/2003 1:54:21 AM] [StockStalker] I am getting 140 out of 1253 on inside day
[7/18/2003 1:54:34 AM] [Stitch] wow, lots of inside days today.....
[7/18/2003 1:55:11 AM] [Stitch] you mean your regular watchlist has 1253 and then out of them 140 are inside days?
[7/18/2003 1:55:20 AM] [StockStalker] y
[7/18/2003 1:55:32 AM] [StockStalker] inside or equal
[7/18/2003 1:55:48 AM] [Stitch] Do you have a min or max price filter? and volume filter?
[7/18/2003 1:56:20 AM] [StockStalker] i did at first and sometimes add stocks manually
[7/18/2003 1:56:25 AM] [StockStalker] 50 cents
[7/18/2003 1:56:38 AM] [Flent] Oz, are those at the top of the chart or at the bottom?
[7/18/2003 1:57:14 AM] [StockStalker] ?
[7/18/2003 1:57:15 AM] [Stitch] what is your min Volume number?
[7/18/2003 1:57:32 AM] [Flent] Bullish or Bearish
[7/18/2003 1:57:48 AM] [Flent] inside days?
[7/18/2003 1:58:00 AM] [StockStalker] neither....
[7/18/2003 1:58:27 AM] [StockStalker] just means that volatility is decreasing and should resume soon
[7/18/2003 1:59:29 AM] [Stitch] oz, if you look at chart like ADF, strong down candles, then
[7/18/2003 1:59:58 AM] [Stitch] with decrease in volatility, couldn't that mean sellers drying up, would reverse direction?
[7/18/2003 1:59:59 AM] [Flent] that would be nice, i guess resume means you anticipate up?
[7/18/2003 2:00:26 AM] [Stitch] why do you assume trend will continue in current direction?
[7/18/2003 2:01:00 AM] [StockStalker] yes sellers are tring up and it appears that a bounce is ready
[7/18/2003 2:01:16 AM] [StockStalker] the move in the immediate preceding diriction is waning
[7/18/2003 2:01:24 AM] [StockStalker] drying up
[7/18/2003 2:01:25 AM] [Stitch] So the trend continues when you have a consolidation sideways?
[7/18/2003 2:01:47 AM] [StockStalker] the previous trend yes
[7/18/2003 2:02:13 AM] [StockStalker] the trend before the consol
[7/18/2003 2:02:46 AM] [Stitch] so each chart has it's own story, could go either way, depending.....
[7/18/2003 2:03:17 AM] [StockStalker] exactly
[7/18/2003 2:03:25 AM] [Stitch] thanks:)
[7/18/2003 2:03:39 AM] [StockStalker] it is an inflection point that needs to be taken into context with the overall price patter
[7/18/2003 2:03:48 AM] [StockStalker] not a magic signal on its own
[7/18/2003 2:03:59 AM] [StockStalker] i piece of the bigger puzzle
[7/18/2003 2:04:36 AM] [Stitch] I wonder if there is a PCF for high beta stocks or a way to filter them in
[7/18/2003 2:04:37 AM] [StockStalker] I think many in here pay way too much for

ClubHome

stocks at times and I am already way them beucase of the piece of the puzzle
[7/18/2003 2:04:47 AM] [Stitch] besides using just nasdaq
[7/18/2003 2:05:11 AM] [StockStalker] u can run it any way you want.....
[7/18/2003 2:05:16 AM] [StockStalker] they all work
[7/18/2003 2:05:46 AM] [Stitch] ?
[7/18/2003 2:05:51 AM] [Stitch] lost me
[7/18/2003 2:05:57 AM] [StockStalker] u lost me too
[7/18/2003 2:06:09 AM] [StockStalker] why couldnt u run it agains high beta
[7/18/2003 2:06:14 AM] [Stitch] lol, it's late
[7/18/2003 2:06:21 AM] [StockStalker] i said u can run it any way u want
[7/18/2003 2:06:30 AM] [StockStalker] what does beta have to do with it
[7/18/2003 2:06:34 AM] [Stitch] I don't know how to set up PCFs, I just copy every
one elses
[7/18/2003 2:06:44 AM] [StockStalker] well get to work!!!!
[7/18/2003 2:06:56 AM] [Stitch] I don't want to waste time waiting for a stock to
move .10 cents
[7/18/2003 2:06:58 AM] [StockStalker] weekend is near and lots of time to learn
[7/18/2003 2:07:09 AM] [Stitch] so high beta, stocks have bigger moves
[7/18/2003 2:07:27 AM] [StockStalker] no my low beta has bigger moves
[7/18/2003 2:07:42 AM] [StockStalker] just moves independently form the rest of
the market
[7/18/2003 2:07:55 AM] [StockStalker] msft is hight beta, DLIA is not
[7/18/2003 2:08:10 AM] [Noname] there is a canned BETA under all under system
sorts-use a BETA scan with it all the time-you can select how high to how
low-stitch
[7/18/2003 2:10:05 AM] [Stitch] I see it, thanks noname
[7/18/2003 2:10:50 AM] [Stitch] Oz, you are trading low beta stocks on days that
exceed their normal ave. daily range, right?
[7/18/2003 2:11:11 AM] [Stitch] because you search for breakouts/breakdowns?
[7/18/2003 2:11:39 AM] [Stitch] amazing that will work with the narrow daily range
set up.....
[7/18/2003 2:12:16 AM] [StockStalker] I trade any stock on any day that has a
price pattern I like and I particualarly like to enter stock when the current pricing is
trading in low historical volatility ranges
[7/18/2003 2:12:58 AM] [Stitch] alrighty then
[7/18/2003 2:13:12 AM] [StockStalker] it is easier to break out of something that is
narrow than something that is waide
[7/18/2003 2:13:26 AM] [Noname] Stitch-when you look at the high Beta stocks
look at the price patterns as opposed to the low Beta stocks-see if you can tell a
difference
[7/18/2003 2:14:32 AM] [Stitch] RBAK came up.....is that low beta? nice doji, 0.40
cents though
[7/18/2003 2:15:04 AM] [Noname] you can also check Beta by clicking on chart
template to bring up the data sheet
[7/18/2003 2:17:52 AM] [Stitch] RBAK high beta, let me hit the sort arrow, reverse
[7/18/2003 2:18:45 AM] [Noname] C U guys tommorrow-good trading
[7/18/2003 2:19:01 AM] [Stitch] see ya No
[7/18/2003 2:19:22 AM] [AlanD] .
[7/18/2003 2:19:44 AM] [Stitch] Hi Alan
[7/18/2003 2:20:11 AM] [AlanD] hello Stitch. Another late nighter.
[7/18/2003 2:20:52 AM] [Stitch] yes, so much to learn
[7/18/2003 2:21:35 AM] [StockStalker] yes every day

[7/18/2003 2:21:40 AM] [AlanD] Always much to learn. Are you new to TCNet?
[7/18/2003 2:22:10 AM] [AlanD] Nevermind, just noticed your acct started last October.
[7/18/2003 2:22:37 AM] [Stitch] No, but learning StockStalkers new Narrow Range system,
[7/18/2003 2:23:00 AM] [Stitch] it's called something else, but is new to me
[7/18/2003 2:23:29 AM] [StockStalker] i always hesitate to use the word system due to the fact I am such a discretionary trader
[7/18/2003 2:23:32 AM] [Stitch] He gave a great teaching in hotto club last Sat.
[7/18/2003 2:23:41 AM] [AlanD] Ok, sounds similar to tight bollinger bands or patterns looking for breakouts one way or the other.
[7/18/2003 2:24:07 AM] [Stitch] did I say system, oops, what do you all it?
[7/18/2003 2:24:13 AM] [StockStalker] I only trade them in the direction I want them to go
[7/18/2003 2:24:39 AM] [StockStalker] just another tool or weapon that is part of another disciplined strategy
[7/18/2003 2:24:40 AM] [AlanD] I always want them to go my way. LOL
[7/18/2003 2:24:50 AM] [Stitch] Call it a pattern recognition tool...
[7/18/2003 2:24:53 AM] [StockStalker] but i wont trade them either way
[7/18/2003 2:25:05 AM] [StockStalker] the pattern is already there without it
[7/18/2003 2:25:09 AM] [AlanD] Yep, I do alot of pattern trading myself.
[7/18/2003 2:25:22 AM] [StockStalker] it just helps predict when the resolution will occur
[7/18/2003 2:25:36 AM] [Stitch] which way do you want them to go, OZ?
[7/18/2003 2:26:01 AM] [StockStalker] whichever way the pattern tells me it is likely to go
[7/18/2003 2:26:19 AM] [StockStalker] like ENMD up
[7/18/2003 2:26:21 AM] [Stitch] so if you buy it long, and then it goes down, you get out
[7/18/2003 2:26:40 AM] [Stitch] and if you short it, and it goes up, you get out?
[7/18/2003 2:27:00 AM] [StockStalker] I always get out of losers
[7/18/2003 2:28:42 AM] [Stitch] .
[7/18/2003 2:29:32 AM] [StockStalker] got the boot again
[7/18/2003 2:29:51 AM] [StockStalker] yes always get out of losers
[7/18/2003 2:29:58 AM] [StockStalker] you are what u hold
[7/18/2003 2:30:16 AM] [Stitch] I'm still working on that, how much wiggle room to give a stock
[7/18/2003 2:33:36 AM] [StockStalker] takes a while to learn how to do that
[7/18/2003 2:34:10 AM] [Stitch] ENMD nice chart
[7/18/2003 2:36:46 AM] [Stitch] looks like INR4
[7/18/2003 2:37:49 AM] [StockStalker] inr7
[7/18/2003 2:38:03 AM] [StockStalker] tho barely
[7/18/2003 2:38:13 AM] [Stitch] less than or equal, yes
[7/18/2003 2:38:24 AM] [StockStalker] it is "tied" with the other one of 5 days ago
[7/18/2003 2:39:59 AM] [Stitch] Oz, have you heard of TradingWindow Strategy by Larry Connors?
[7/18/2003 2:41:05 AM] [StockStalker] I have his and Rashke's book next to me lol
[7/18/2003 2:41:12 AM] [StockStalker] but it is not in it
[7/18/2003 2:41:37 AM] [Stitch] you mean the price of the book? \$50
[7/18/2003 2:41:52 AM] [StockStalker] ?
[7/18/2003 2:42:03 AM] [StockStalker] i never said anything bout price
[7/18/2003 2:42:15 AM] [Stitch] not worth it? worth what?

ClubHome

[7/18/2003 2:42:24 AM] [Stitch] sorry
[7/18/2003 2:42:33 AM] [Stitch] not in it.....my mistake
[7/18/2003 2:42:41 AM] [StockStalker] I paid 120 for this book
[7/18/2003 2:42:48 AM] [StockStalker] and the cooper books
[7/18/2003 2:42:56 AM] [Stitch] New strategy, he uses 4 day Moving ave.
[7/18/2003 2:43:58 AM] [Stitch] If stock is in an uptrend, and price high of day is below the 4ma, is a window
[7/18/2003 2:44:17 AM] [Stitch] he buys next morning
[7/18/2003 2:45:07 AM] [StockStalker] too mechanical for my taste. but probably works
[7/18/2003 2:45:20 AM] [StockStalker] maybe I can incorpaorte into an exit strategy one day
[7/18/2003 2:45:20 AM] [Stitch] If in downtrend, and candle's low of day is above 4ma, window there, he shorts next day
[7/18/2003 2:45:39 AM] [Stitch] anyway, ENMD fits very close
[7/18/2003 2:46:07 AM] [Stitch] he would call ENMD a double window, very bullish

[7/18/2003 2:46:25 AM] [StockStalker] The Stalker call it bullish too!!!!
[7/18/2003 2:46:33 AM] [Stitch] if you add a 4ma to chart, you'll see past 2 candles just below ma
[7/18/2003 2:46:36 AM] [StockStalker] why a 2x window?
[7/18/2003 2:46:47 AM] [StockStalker] sma or ema
[7/18/2003 2:46:54 AM] [Stitch] 2 candles below 4ma in a row, SMA
[7/18/2003 2:47:29 AM] [Stitch] they will tend to migrate back towards 4ma
[7/18/2003 2:47:49 AM] [StockStalker] hmmm. actually seems nice and simple
[7/18/2003 2:48:00 AM] [StockStalker] all the best stuff always is
[7/18/2003 2:48:13 AM] [Stitch] so in the next day or two, minimum up move would be 4.44
[7/18/2003 2:48:41 AM] [Stitch] only 4 cents above where it closed, but still, up
[7/18/2003 2:49:10 AM] [StockStalker] u mean to enter
[7/18/2003 2:49:12 AM] [Stitch] it's very simple, but hard to find the stocks, since I dont' know PCF language
[7/18/2003 2:49:30 AM] [Stitch] no, he'd enter right here
[7/18/2003 2:49:46 AM] [StockStalker] so what do u mean minimum up
[7/18/2003 2:50:12 AM] [Stitch] I mean price should at least go up to 4ma at 4.44, could keep going higher, though
[7/18/2003 2:51:02 AM] [Stitch] He defines the a trending stock using ADX greater than 30, TCNET doesn't have ADX
[7/18/2003 2:51:30 AM] [StockStalker] there are many ways to do that without adx
[7/18/2003 2:51:44 AM] [Stitch] then for up trend +DI] -DI and vise versa for down trend
[7/18/2003 2:52:16 AM] [Stitch] I have other software with ADX, no problem
[7/18/2003 2:53:20 AM] [Stitch] do you know how to make PCF for stock that was above 4ma then drops with high of day below 4ma?
[7/18/2003 2:53:53 AM] [StockStalker] when did it need to be above the 4 sma last
[7/18/2003 2:54:44 AM] [Stitch] as long as it's trending up, can be yestarday or 2-3 days back, no more than 3 days
[7/18/2003 2:55:14 AM] [Stitch] if it drops below, should only stay below for 2-3 days too
[7/18/2003 2:55:56 AM] [Stitch] perfect example was ENMD on 7/11
[7/18/2003 2:56:30 AM] [Stitch] 7/9 and 7/10 were above 4ma
[7/18/2003 2:56:47 AM] [Stitch] then 7/11 dropped below, and high was below

4ma

[7/18/2003 2:57:17 AM] [Stitch] then had nice move back above 4ma on 7/14 :)
[7/18/2003 2:58:15 AM] [StockStalker] enmd hod was higher than the 4 sma today
[7/18/2003 2:58:23 AM] [StockStalker] and yesterday
[7/18/2003 2:58:38 AM] [Stitch] yes, by a penny, so is not perfect
[7/18/2003 2:59:36 AM] [Stitch] before 7/9 the 4ma line literally went right thru candle real bodys
[7/18/2003 3:00:33 AM] [Stitch] so that's not as good risk reward as when the whole candle dropped below the 4ma temporarily
[7/18/2003 3:01:21 AM] [StockStalker] i am testing some now
[7/18/2003 3:01:24 AM] [Stitch] and with the 50ma as support ENMD good RR to go up
[7/18/2003 3:01:45 AM] [Stitch] sorry i mean 20ma
[7/18/2003 3:02:59 AM] [StockStalker] AVGC4] H
[7/18/2003 3:03:28 AM] [Stitch] what's that mean in words?
[7/18/2003 3:03:40 AM] [Stitch] 4ma is greater than high of day?
[7/18/2003 3:03:47 AM] [StockStalker] 4sma bigger than the hod
[7/18/2003 3:04:04 AM] [Stitch] ok, now how do we add the uptrend?
[7/18/2003 3:04:27 AM] [StockStalker] just create an uptrend universe
[7/18/2003 3:04:48 AM] [Stitch] like price above 10, 20, 50 ma?
[7/18/2003 3:04:56 AM] [Stitch] or something like that?
[7/18/2003 3:05:06 AM] [Optimus] (AVGC4.1 [= C1] AND (H [AVGC4) closed below or equal to 4 sma yesterday and high [4 sma today.
[7/18/2003 3:05:11 AM] [StockStalker] yes
[7/18/2003 3:05:32 AM] [Stitch] like hotto's plan A?
[7/18/2003 3:06:05 AM] [Stitch] ok optimus, now what about the overall trend?
[7/18/2003 3:06:29 AM] [Stitch] I'll take uptrend pcf, give me one?
[7/18/2003 3:06:54 AM] [StockStalker] use adx in ur other package and make on
[7/18/2003 3:08:35 AM] [Stitch] I can do that, but I like TCNETs charts much better, would have to use both.
[7/18/2003 3:09:02 AM] [StockStalker] no exprt the list and load it
[7/18/2003 3:09:45 AM] [Stitch] oh, let me see if there is export function, it's Ameritrade Advanced Analyzer
[7/18/2003 3:09:52 AM] [Stitch] have you tried it?
[7/18/2003 3:10:08 AM] [StockStalker] just go in there and try
[7/18/2003 3:10:34 AM] [StockStalker] we ahve to bang our heads some times
[7/18/2003 3:11:21 AM] [Stitch] "save as type .pfo "
[7/18/2003 3:13:05 AM] [StockStalker] i forget the tc2k file spec
[7/18/2003 3:13:18 AM] [StockStalker] go check
[7/18/2003 3:13:21 AM] [Optimus] (AVGC10.10] AVGC20.10) AND (AVGC10] AVGC20) means 10 sma] than 20 sma both 10 days ago and today. Stock in general uptrend.
[7/18/2003 3:13:39 AM] [Stitch] TCNET doesn't recognize it, only takes txt. or metastock
[7/18/2003 3:14:01 AM] [StockStalker] then rename it as txt
[7/18/2003 3:14:16 AM] [StockStalker] export to ascii file and name it .txt
[7/18/2003 3:16:03 AM] [Stitch] did that, tcnet says "no symbols found"
[7/18/2003 3:16:19 AM] [Stitch] thanks OPTIMUS, good service for 3am!
[7/18/2003 3:17:07 AM] [Optimus] your welcome.
[7/18/2003 3:17:42 AM] [StockStalker] Optimus, what is the best way to describe a MA crossing another in pdf
[7/18/2003 3:17:48 AM] [StockStalker] pcf

[7/18/2003 3:18:37 AM] [StockStalker] jsut to state that it opened on one side and is currently on other?

[7/18/2003 3:18:39 AM] [Stitch] I'd like PCF for MA3 crossing up above MA15

[7/18/2003 3:19:17 AM] [StockStalker] Stitch u seem creative enuff but u seem afraid of your computer!!!!!!

[7/18/2003 3:19:53 AM] [Optimus] AVGC3.1 [= AVGC15.1 AND AVGC3] AVGC15 means 3 sma less than 15 sma yesterday and crossing above today.

[7/18/2003 3:20:31 AM] [Stitch] Not at all OZ, i'm a computer wiz, i'll figure out the export no problem

[7/18/2003 3:20:57 AM] [Stitch] if i took the time to digest the PCFs, there'd be no stopping me

[7/18/2003 3:21:11 AM] [StockStalker] that is my point

[7/18/2003 3:21:27 AM] [Stitch] I never really wanted different criteria from other peoples

[7/18/2003 3:21:31 AM] [StockStalker] but u ask before u try so I thought maybe u afraid to try

[7/18/2003 3:21:47 AM] [Stitch] I guess i'm lazy because i'm using everyone elses pre-fabbed

[7/18/2003 3:22:41 AM] [Stitch] well these few that Optimus did are straight forward.I'll have to study them.

[7/18/2003 3:22:54 AM] [StockStalker] this is easier than esl

[7/18/2003 3:23:01 AM] [StockStalker] easy lang

[7/18/2003 3:23:21 AM] [Stitch] ok, 3.1ma is less than or equal to 15.1ma

[7/18/2003 3:23:32 AM] [StockStalker] optimus, do u have code for exponential ma's

[7/18/2003 3:24:00 AM] [Stitch] and 3ma is greater than 15 ma

[7/18/2003 3:24:42 AM] [Stitch] where do the yestarday and today come in?

[7/18/2003 3:24:48 AM] [Optimus] Stalker, not sure if I do. I will check.

[7/18/2003 3:25:23 AM] [StockStalker] 3.1 would be yesterday and 3 would be today

[7/18/2003 3:25:30 AM] [Stitch] Does the .1 in 3.1 mean 1 day ago?

[7/18/2003 3:25:37 AM] [StockStalker] y

[7/18/2003 3:25:41 AM] [Stitch] lol, you answered my question

[7/18/2003 3:25:43 AM] [StockStalker] see there ya go

[7/18/2003 3:26:01 AM] [StockStalker] once u start it is addictive and embarassingly easy

[7/18/2003 3:26:10 AM] [Stitch] I'm on my way, thanks OZ, don't you sleep?

[7/18/2003 3:26:28 AM] [Stitch] Texas is 2:30 or 1:30 now?

[7/18/2003 3:26:30 AM] [StockStalker] not when i get around other eager traders

[7/18/2003 3:26:34 AM] [StockStalker] 2:3

[7/18/2003 3:27:21 AM] [Stitch] sometimes I get carried away and I regret in in the morning, but not often am I up past 2 am

[7/18/2003 3:28:40 AM] [Stitch] I don't know, maybe 1 day ago is not long enough, i'll put the two pcfs together

[7/18/2003 3:28:58 AM] [Stitch] 3, 15, 20, 50

[7/18/2003 3:32:41 AM] [Optimus] Stalker, I don't have any ema examples but you might check <http://www.tradeon.com/tradeon/>. It has some good PCF stuff.

[7/18/2003 3:32:41 AM] [StockStalker] good nite... If u get that info Opti, tcmail it to me ... i think it is out there on the web... ust need to find it again

[7/18/2003 3:40:01 AM] [Stitch] that's funny, I think ENMD fits all the uptrend criteria, coming up false for 3 crossing 15
[7/18/2003 3:40:38 AM] [Stitch] oh, didn't cross today
[7/18/2003 3:50:25 AM] [jump85ft] anyone have an opinion on when CHINA will go back up??
[7/18/2003 3:54:51 AM] [Stitch] well there's a slight buy flat on China, tsv2, and stocks 3,11. want me to share?
[7/18/2003 3:55:30 AM] [Stitch] could be pushing it though, and if market is up tomorrow, why not china too?
[7/18/2003 3:58:45 AM] [jump85ft] stitch?
[7/18/2003 3:59:06 AM] [Stitch] hi
[7/18/2003 3:59:15 AM] [jump85ft] how much of a possibility is there for CHINA to go back to \$2?
[7/18/2003 4:00:05 AM] [Stitch] depends on your time frame
[7/18/2003 4:00:13 AM] [Stitch] see my chart, jump?
[7/18/2003 4:00:18 AM] [jump85ft] ok what do you mean ...yes i see
[7/18/2003 4:00:34 AM] [Stitch] mean about what? the chart or the time frame?
[7/18/2003 4:00:53 AM] [jump85ft] you said depends up on the time frame ..
[7/18/2003 4:00:53 AM] [Stitch] I mean in 6 months to a year, could go to \$2
[7/18/2003 4:01:06 AM] [jump85ft] wow ...
[7/18/2003 4:01:12 AM] [Stitch] but I doubt will go there in 2 weeks to 2 months
[7/18/2003 4:01:25 AM] [Stitch] who knows about the future?
[7/18/2003 4:01:26 AM] [jump85ft] what would you do if you owned 2500 shares at 14.65?
[7/18/2003 4:01:57 AM] [Stitch] well, I wouldn't sell it all at once for a loss
[7/18/2003 4:02:10 AM] [jump85ft] how would you play it?
[7/18/2003 4:02:41 AM] [Stitch] I'd have a max pain price below and start unloading it if it got hit.
[7/18/2003 4:02:57 AM] [jump85ft] ok but im already down 10k
[7/18/2003 4:02:58 AM] [Stitch] And if it goes up, i'd trail the stop
[7/18/2003 4:03:20 AM] [jump85ft] i only have 18k left in my account
[7/18/2003 4:03:25 AM] [Stitch] I never lost \$10,000 on one trade, so don't listen to me
[7/18/2003 4:03:43 AM] [Stitch] I lost \$10,000 on several trades combined, though
[7/18/2003 4:03:44 AM] [jump85ft] ok take a zero off then ...:)
[7/18/2003 4:04:18 AM] [Stitch] ok, 1000 lost, could be worse, i've lost \$3000 on one stupid play
[7/18/2003 4:04:29 AM] [jump85ft] sorry ...
[7/18/2003 4:04:33 AM] [Stitch] and I had a chance to get out and held too long
[7/18/2003 4:04:40 AM] [jump85ft] yep same here
[7/18/2003 4:04:54 AM] [Stitch] So China can always go lower if you wait too long
[7/18/2003 4:05:02 AM] [jump85ft] hmmm
[7/18/2003 4:05:44 AM] [jump85ft] what would you do sell half ?
[7/18/2003 4:05:57 AM] [Stitch] I think you will at least get a bounce tomorrow
[7/18/2003 4:06:19 AM] [jump85ft] ya but it will still noly bounce 2 points
[7/18/2003 4:06:24 AM] [Stitch] if it hit my max pain, i'd sell a third
[7/18/2003 4:06:36 AM] [jump85ft] ok ...
[7/18/2003 4:07:20 AM] [Stitch] should bounce to 12.95 ish at least
[7/18/2003 4:07:28 AM] [jump85ft] i wish i knew how to read FW charts
[7/18/2003 4:07:46 AM] [jump85ft] wow that would be ok ...then i would only be

5,000 down ...

[7/18/2003 4:07:46 AM] [Stitch] but then max pain wouldn't be max pain if I only sold 1/3

[7/18/2003 4:08:16 AM] [Stitch] so i'd have to have 3 prices below to scale out, 3rd being max pin

[7/18/2003 4:08:24 AM] [Stitch] see bottom window?

[7/18/2003 4:08:31 AM] [jump85ft] yes ...bad news

[7/18/2003 4:10:18 AM] [Stitch] FW's charts have volume accounted for

[7/18/2003 4:10:28 AM] [Stitch] yes, yellow line in bottom window

[7/18/2003 4:10:37 AM] [jump85ft] i see 3 red volume bars the last 3 days

[7/18/2003 4:10:43 AM] [Stitch] he calls that a chevron

[7/18/2003 4:10:59 AM] [Stitch] because it's almost flat, a military term.....

[7/18/2003 4:16:13 AM] [jump85ft] yes
[7/18/2003 4:16:15 AM] [Stitch] that is a SELL flat, i'll mark it with vertical line
[7/18/2003 4:16:30 AM] [jump85ft] that must be the sell flat FW is always talking about
[7/18/2003 4:16:45 AM] [Stitch] one of them
[7/18/2003 4:17:15 AM] [jump85ft] which TSV chart is this 1,2,or 3?
[7/18/2003 4:17:17 AM] [Stitch] see here on 7/11 red line going up nice means price going up
[7/18/2003 4:17:57 AM] [Stitch] I don't have my templates labeled that way, i'll show you them in a minute
[7/18/2003 4:18:07 AM] [jump85ft] ok ...
[7/18/2003 4:18:12 AM] [Stitch] this one is his ROC template for rate of change

[7/18/2003 4:19:28 AM] [jump85ft] ok i see that
[7/18/2003 4:19:40 AM] [Stitch] i don't know if calling it a buy flat is appropriate, but it's a flat that says price is going up
[7/18/2003 4:19:57 AM] [jump85ft] i agree
[7/18/2003 4:20:34 AM] [Stitch] because the day before the tsv2 was going down. so then it went flat before it would go up
[7/18/2003 4:20:35 AM] [jump85ft] im kinda sad because i help people all day at work ...to try and get their health better an no one wants to help me ...kinda weird
[7/18/2003 4:20:55 AM] [Stitch] I'm helping you
[7/18/2003 4:21:19 AM] [Stitch] are you a doctor?
[7/18/2003 4:21:23 AM] [jump85ft] i see the flat on TSV1 before it went down
[7/18/2003 4:21:27 AM] [jump85ft] ya
[7/18/2003 4:22:12 AM] [jump85ft] doesnt really matter though ...everyone just looks out for themselves ...

[7/18/2003 4:22:27 AM] [Stitch] what am I chopped liver?
[7/18/2003 4:22:28 AM] [jump85ft] yes the TSV blue #1
[7/18/2003 4:23:10 AM] [Stitch] ok, so looking at the chart, when I advance one day, price should go up, right?
[7/18/2003 4:23:19 AM] [jump85ft] no its not you ...if i would have had simple explanations ...and a little direction ..i wouldnt be here
[7/18/2003 4:23:30 AM] [jump85ft] or in this mess so its frustrating
[7/18/2003 4:23:46 AM] [jump85ft] ok ...im off my soapbox
[7/18/2003 4:23:51 AM] [Stitch] that's not true, i'm sure you were told or read to trade small amounts in the beginning?
[7/18/2003 4:24:20 AM] [Stitch] like 200 or 400 shares until you made consistant profit
[7/18/2003 4:24:49 AM] [jump85ft] yep
[7/18/2003 4:24:52 AM] [Stitch] if no one told you that, i'll tell you now, trade small until you are consistant, then increase gradually
[7/18/2003 4:25:18 AM] [jump85ft] i was up 8,000 the first week of the month
[7/18/2003 4:25:25 AM] [Stitch] that's why it took me at least 6 months to loose my first \$10,000! LOL
[7/18/2003 4:25:38 AM] [jump85ft] sorry to hear Stitch ...
[7/18/2003 4:25:45 AM] [Stitch] oh, well are you up from when you started trading?

[7/18/2003 4:29:27 AM] [Stitch] yes, should see 7/14 price 14.46?
[7/18/2003 4:29:54 AM] [jump85ft] ok i have to count back on the candles ..i cant uose the virtical marker ..since im viewing
[7/18/2003 4:30:10 AM] [Stitch] your chart should move with mine
[7/18/2003 4:30:16 AM] [jump85ft] i see the sell flats on the middle window as well as the lower window
[7/18/2003 4:30:30 AM] [Stitch] see now i'm back to 7/10

[7/18/2003 4:31:08 AM] [Stitch] ok so we're looking at the current day on the right

[7/18/2003 4:32:33 AM] [jump85ft] ok thankyou
[7/18/2003 4:32:41 AM] [Stitch] I bet this is the day you bought it, right?
[7/18/2003 4:33:14 AM] [jump85ft] i bought it on 7/14 in the pre market looking for a gap up and a quick 1,000 dollars
[7/18/2003 4:33:35 AM] [Stitch] you might not have seen it until the end of day though.
[7/18/2003 4:33:52 AM] [jump85ft] ok ...maybe on the 10' chart
[7/18/2003 4:33:53 AM] [Stitch] did you have a mental stop when you entered the trade?
[7/18/2003 4:34:15 AM] [jump85ft] by 9:40 i was down 1,200
[7/18/2003 4:34:46 AM] [Stitch] Yes, i see that, happens to me all the time. Only in smaller # of shares
[7/18/2003 4:35:01 AM] [jump85ft] then it channeled sideways and dropped again
[7/18/2003 4:35:12 AM] [Stitch] what price did you pay?

[7/18/2003 4:35:16 AM] [jump85ft] and kept stairstepping down
[7/18/2003 4:35:25 AM] [jump85ft] 14.65
[7/18/2003 4:35:54 AM] [jump85ft] i was up .22 cents .. i was looking for a bit more
[7/18/2003 4:36:53 AM] [jump85ft] is this the same chart as earlier??
[7/18/2003 4:36:58 AM] [Stitch] yuk, you had less than 5 min to decide. I hate when that happens
[7/18/2003 4:37:11 AM] [Stitch] this is 5 min chart from 7/14
[7/18/2003 4:37:11 AM] [jump85ft] that sounds about right
[7/18/2003 4:37:30 AM] [Stitch] there is 10min, can see it better
[7/18/2003 4:37:47 AM] [Stitch] huge gap up on the open then sideways rest of day
[7/18/2003 4:37:53 AM] [jump85ft] it cratered like a rock
[7/18/2003 4:38:20 AM] [Stitch] so it closed at 14.46, did you have a stop loss?
[7/18/2003 4:38:30 AM] [jump85ft] no i dont use them
[7/18/2003 4:38:46 AM] [jump85ft] the MM's will take you out if they see it
[7/18/2003 4:38:48 AM] [Stitch] Do you know how to determine them?
[7/18/2003 4:39:01 AM] [Stitch] I mean a mental stop or an end of day stop
[7/18/2003 4:39:06 AM] [jump85ft] is it 8.5 %?
[7/18/2003 4:39:10 AM] [Stitch] not one that you enter into the computer
[7/18/2003 4:39:25 AM] [jump85ft] no ...i didnt have one
[7/18/2003 4:39:26 AM] [Stitch] well there are lots of diff. methods
[7/18/2003 4:39:59 AM] [Stitch] can be a % like you said, can use a support line from chart, or fibanocci line
[7/18/2003 4:40:35 AM] [Stitch] I was told to have a stop in mind before I enter any trade, to limit my losses
[7/18/2003 4:40:45 AM] [jump85ft] im not sure how to calculate the Fib linesi think they are graded into 3 levels ...62% 50% and 32%
[7/18/2003 4:41:10 AM] [Stitch] you draw it on the chart, see the pencil at top of chart next to zoom?
[7/18/2003 4:41:15 AM] [HOTTO] Ngurumo has replied to: TINA'S TRADING TIP#1 - PAUSES AND PULLBACKS
[7/18/2003 4:41:24 AM] [jump85ft] ok ...mental stop ..has been added to my repertoire
[7/18/2003 4:42:34 AM] [Stitch] i just drew from bottom of chart to top, and can eyeball, on this chart looks like 14.10 there is a fib line that held support
[7/18/2003 4:42:59 AM] [Stitch] ready to go back to daily chart?
[7/18/2003 4:43:48 AM] [jump85ft] ok

[7/18/2003 4:45:24 AM] [Stitch] ok, back to 14th, with the sell flats
[7/18/2003 4:45:30 AM] [jump85ft] ok
[7/18/2003 4:46:12 AM] [Stitch] so it would take discipline, but in after hours, i'd see this awful sell flats and get out at 14.46
[7/18/2003 4:46:23 AM] [Stitch] but hind site is always 20/20
[7/18/2003 4:46:27 AM] [jump85ft] ok ..i see your point
[7/18/2003 4:46:45 AM] [Stitch] ok, now i'll advance and stock price should go down right?

[7/18/2003 4:52:01 AM] [Stitch] almost every line pointing down, yes, i'm thinking short too
[7/18/2003 4:52:18 AM] [Stitch] so when i advance, should go down again, here goes
[7/18/2003 4:52:25 AM] [Stitch] ouch
[7/18/2003 4:52:31 AM] [jump85ft] you have more flats on that day than i highway full of nails
[7/18/2003 4:52:46 AM] [jump85ft] a
[7/18/2003 4:53:10 AM] [Stitch] yes, CHINA is backtesting good for tsv1 and ROC (rate of change) 1
[7/18/2003 4:53:29 AM] [Stitch] I had to go through several templates to find one that fit
[7/18/2003 4:53:39 AM] [jump85ft] why is that stitch
[7/18/2003 4:53:52 AM] [Stitch] not all FW's templates will work for all stocks,
[7/18/2003 4:54:06 AM] [CashMan] The candles also saying the same thing also correct
[7/18/2003 4:54:07 AM] [jump85ft] what the hell? why not
[7/18/2003 4:54:11 AM] [Stitch] that's why you have to take a template and look back
[7/18/2003 4:54:37 AM] [Stitch] if it were that easy, there would be no work, we'd all be rich
[7/18/2003 4:54:52 AM] [jump85ft] im suppose to pick up FW at the airport tomorrow ...lol
[7/18/2003 4:55:00 AM] [Stitch] that's why FW spends hours and hours coming up with the diff. templates
[7/18/2003 4:55:09 AM] [Stitch] seriously?

[7/18/2003 4:55:21 AM] [jump85ft] ya i set up the Seattle seminar for him

[7/18/2003 4:55:46 AM] [jump85ft] i wanted to learn more
[7/18/2003 4:56:00 AM] [Stitch] are you the one who asked him earlier this week?
[7/18/2003 4:56:13 AM] [jump85ft] i will tell him i learned more from stitch in 10 minutes than from FW ...lol
[7/18/2003 4:56:24 AM] [Stitch] "I am taking your seminar and I need to learn this quick!"
[7/18/2003 4:56:33 AM] [jump85ft] hes coming over to my moms for dinner on saturday

[7/18/2003 4:57:10 AM] [jump85ft] sorry stitch ..youre good at what you do
[7/18/2003 4:57:11 AM] [Stitch] Very cool, you can get the background from me, then he can give you way more than I ever could!
[7/18/2003 4:57:31 AM] [jump85ft] you know the diff between FW and you ?
[7/18/2003 4:57:41 AM] [jump85ft] you have patience
[7/18/2003 4:57:43 AM] [Stitch] He used to do what I'm doing for all of us on Pal-talk, with his nice calm voice
[7/18/2003 4:58:07 AM] [Stitch] Pal-talk only held 25 people, so as he got more popular he switch to yahoo chat
[7/18/2003 4:58:27 AM] [Stitch] and neither of my two computers worked with that chat, so i missed alot
[7/18/2003 4:58:28 AM] [jump85ft] im sure the yahoo chats fizzled when he became busier
[7/18/2003 4:58:57 AM] [Stitch] I think many people felt left out, so now he chats here for an even playing field
[7/18/2003 4:59:09 AM] [jump85ft] back to your comment on different templates for diff stocks ...how do you know which one to use
[7/18/2003 4:59:37 AM] [Stitch] ok, lets finish this template, then i'll show you how i picked it
[7/18/2003 4:59:49 AM] [jump85ft] ok
[7/18/2003 5:00:01 AM] [Stitch] if i had to guess, i'd say the next day would be either down on sideways,
[7/18/2003 5:00:21 AM] [Stitch] actually, i'd definitely go to a diff. template now
[7/18/2003 5:00:30 AM] [Stitch] wow, way down
[7/18/2003 5:00:40 AM] [jump85ft] yep ..
[7/18/2003 5:00:55 AM] [Stitch] you want to copy this template before i change it?
[7/18/2003 5:01:03 AM] [jump85ft] already did ...thankyou
[7/18/2003 5:01:10 AM] [Stitch] I label them all FW_then whatever
[7/18/2003 5:01:21 AM] [Stitch] this one for me is FW_ROC1
[7/18/2003 5:01:29 AM] [jump85ft] i started with Stich FW 717 ROC
[7/18/2003 5:01:40 AM] [Stitch] 717?
[7/18/2003 5:01:51 AM] [Stitch] date?
[7/18/2003 5:02:03 AM] [jump85ft] i date everything
[7/18/2003 5:02:10 AM] [Stitch] ok, you know this is the SOAP template, right?
[7/18/2003 5:02:13 AM] [jump85ft] just a habit

[7/18/2003 5:04:11 AM] [Stitch] do all stocks work? FW would say yes, but i've seen SOAP buys fail
[7/18/2003 5:04:18 AM] [Stitch] not very often though
[7/18/2003 5:04:26 AM] [jump85ft] ok ...thats good to know
[7/18/2003 5:04:58 AM] [Stitch] Batman has a flat line in between the two tops
[7/18/2003 5:05:11 AM] [jump85ft] whats that mean??
[7/18/2003 5:05:30 AM] [Stitch] see the TSV2 green in middle window back here on ROC template?
[7/18/2003 5:05:42 AM] [jump85ft] yep
[7/18/2003 5:05:45 AM] [Stitch] that's a batman sell
[7/18/2003 5:06:04 AM] [Stitch] it's a true M, with little flat line in middle
[7/18/2003 5:06:12 AM] [jump85ft] ok ...the soap had a batman ...then the ROC had a sell flat??
[7/18/2003 5:06:22 AM] [Stitch] and an upside down batman is a buy W
[7/18/2003 5:06:28 AM] [jump85ft] wheres the M?
[7/18/2003 5:06:36 AM] [jump85ft] on the ROC chart?

[7/18/2003 5:07:13 AM] [jump85ft] ok i dont see the batman
[7/18/2003 5:07:14 AM] [Stitch] doesn't the batman look like a big M to you M for murder

[7/18/2003 5:08:43 AM] [Stitch] ok, now back to SOAP
[7/18/2003 5:08:45 AM] [jump85ft] the green TSV and the ROC were both M's
[7/18/2003 5:08:48 AM] [jump85ft] ok
[7/18/2003 5:09:05 AM] [jump85ft] you are clever
[7/18/2003 5:09:24 AM] [Stitch] interesting how the tips of tsv3 in middle window are same as the other template
[7/18/2003 5:09:32 AM] [jump85ft] yes amazing
[7/18/2003 5:09:40 AM] [Stitch] but it's not a Batman

[7/18/2003 1:36:38 PM] [hotto] CWCI.. I keep an eye on CWCI.. since it was the FIRST to bounce off FIB.618 yesterday.. while the Other Asians were still dropping... 2nd was CHRB... NOTE:... CWCI did the Whole trip... from FIB.618 to FIB.382.. (7.00 to 9.88.. slightly exceeding FIB.282=9.70)... So... I am watching CWCI for "guidance" on the bounces.

[7/18/2003 1:40:27 PM] [FreeSpirit] .

[7/18/2003 1:42:55 PM] [hotto] CHRB had an aggressive bounce from slightly below FIB.618=7.90... First run to 9.65 late yesterday.. took out FIB.500. BUT.. today.. when the Asians were running.. CHRB stalled at 10.00 3 times.. chart shows it could go either way now.. Up or Down.. BUT.. has been disappointing.. in not having used the opp. to surge to 11.24.. its FIB.382 level.. beware.. CWCI not helping anymore

[7/18/2003 1:43:23 PM] [hotto] RGEN... Lost my comments to the Server Take-down... will re-do

[7/18/2003 1:46:39 PM] [ibuckskin] .

[7/18/2003 1:47:08 PM] [hotto] RGEN..popped to NH52 yesterday... attracted only moderate PT.. No follow-through selling... RGEN remains in an uptrend...with OBV confirming each step.. Looks fine to hold.. Could use a Stop-Loss at 5.88.

[7/18/2003 1:47:40 PM] [CashMan] Thanks hotto

[7/18/2003 1:50:10 PM] [hotto] TRAC 2.04. +.19.. Held the FIB.618=1.73 level very well.. for a first bounce.. Now has popped through FIB.500=2.01.. and held.. so far.. Look for a further pop to 2.29.. by Monday.. if mkt holds together...more to follow on that.

[7/18/2003 1:51:53 PM] [Mickaz] Hotto, I'm getting confused between my investments and trades. With this rotation into oil serv. what time frame are we looking at to target for these trades? Its not a hours like our China stocks. Is it a few days, or Columbus day? Of course targets, stops and everything considered.

[7/18/2003 1:59:37 PM] [hotto] Oil Service.. This is a Major Rotation.. IT duration.. imo... We KNEW this was coming.. IF the Economy is to actually Improve.. and provide for the Re-election of "W"... then the US.. and the World is going to need a LOT of Energy!.. But.. In all Big IT Rallies... Tech and Finance led.. they hold back the Oils and Heavy Construction til last.. Note the terriffic last buying surges in the Techs. Rotation was overdue. Then .. wieh recent Interest-rate upticks.. and FED comments... economic growth is happening. So.. time for the Capital Eqpt groups to get some play... incl.. Oil drilling & Svc.. So.. here we are!... Perfect setup... I have listened to Analysts talking down the Oil Svc group for the last 2 weeks... Finally... drove OIH and the Individual Stocks to sma200 last 2 days.. Then.. like magic... Big-Volume Pos KR's... They did a great job!..Now.. I look for IT moves.. Incl.. Shake-outs.. next week.

[7/18/2003 2:12:30 PM] [hotto] Note ..yesterday.. the Rotation came.. as it usually does... Selling off the Winning Group 1st (the Techs and Financials)... with all the attention on the Negatives in the market... Then.. later.. we saw CAT.. and other heavy-const. stocks.. AND Oil Svc.. begin to show strong Pos Reversals... THAT was the clue.. that The FIB.. snap-back plays would work today...The First fear.. was the "end of the IT Rally. Double-top is in."... Could have been... BUT.. oops ... this Play... had One more Act left in it... the Rotation into the "Heavies"... other clues were.. The big gain in the IPO.. and the Big rewards given to some deserving Earnings plays... The IT Rally was not quite Dead yet.. Just another Rotation... AND - in that case.. the FIB Snap-back plays... Would work out today.. And .. here we are.. Many % richer... By Paying attention to the Market.. and NOT panicking out... same old... "one day at a time"...

When it is realized.. that it is just a "snap-back play" the Techs will likely resume their correction.. could get ugly. Thre will be special cases.. SINA for example.. with catalyts ahead.. Earnings due next week.. Remember.. to take homje.. the New Uptrend stocks.. at least some.. Imagine the Talk this weekend.. of the "cyclicals".. etc. By Monday.. I suspect many new investors will see the Wisdom of the "heavies".. like Oil Drilling and Service.

[7/18/2003 4:38:16 PM] [Eagerbeaver] OZ, where can i after hours trade??

[7/18/2003 4:38:34 PM] [kmack] cybertrader

[7/18/2003 4:39:24 PM] [Eagerbeaver] Thanks, K ;)

[7/18/2003 4:39:37 PM] [kmack] yw...others also I'm sure

[7/18/2003 4:40:49 PM] [happy2be] hotto, whats the topic for sat. (treat yourself to chin. dinner)

[7/18/2003 4:43:13 PM] [StockStalker] AH trading is something that should be done by traders once they become profitable if at all. It is a very exaggerated mkt but can be used for emergencies at times (if ur fast) and for special situations

[7/18/2003 4:43:54 PM] [happy2be] why is that stock

[7/18/2003 4:44:16 PM] [StockStalker] After Hours trades cannot be broke as "clearly erroneous" and u assume all risk. U can short on a downtick and anything goes after hours

[7/18/2003 4:44:16 PM] [hotto] happy2be.. have not picked a topic yet.. will be a short one.. After MKt review.

[7/18/2003 4:44:47 PM] [tinaSDtrader] I agree 100% stockstalker about AH trading - as I mentioned yesterday, I will NOT use market orders AH, I find them risky

[7/18/2003 4:45:17 PM] [StockStalker] I dont even use them in reg hours unless i am just getting smashed

[7/18/2003 4:45:47 PM] [StockStalker] I use a marketable limit most the time

[7/18/2003 4:46:03 PM] [happy2be] ah stands for what

[7/18/2003 4:46:14 PM] [StockStalker] How to use Fib ratios and price projection is a good topic

[7/18/2003 4:46:19 PM] [tinaSDtrader] Again agree - and even then expect a lousy fill. My #1 preference is a buy/sell limit, also use buy stops for chart patterns or break of a ceiling, but even then they sometimes reach up and trigger you just to pull it back.

[7/18/2003 4:46:42 PM] [StockStalker] after hours

[7/18/2003 4:46:42 PM] [tinaSDtrader] AH = after hours trading

[7/18/2003 4:47:05 PM] [happy2be] thats what i thought, thought we had a new term

[7/18/2003 4:47:10 PM] [StockStalker] a marketable limit is only a limit that is instantly trasactable

[7/18/2003 4:47:29 PM] [tinaSDtrader] how is that different from a buy limit?

[7/18/2003 4:47:39 PM] [StockStalker] same thing...

[7/18/2003 4:47:50 PM] [tinaSDtrader] sounded like it

[7/18/2003 4:48:02 PM] [StockStalker] but it implies that the limit is above the currnt price

[7/18/2003 4:48:16 PM] [Eagerbeaver] Thanks, SS, Tina, for your comments, my interest is for emergency, special, situations only

[7/18/2003 4:48:21 PM] [StockStalker] so in essence it is a mkt order with a limit

[7/18/2003 4:48:32 PM] [tinaSDtrader] the buy stop becomes a market order when hit, so still some risk, but can't watch everything I like so have to use alerts and/or buy stops

[7/18/2003 4:48:52 PM] [StockStalker] they have buy stop limit as well

[7/18/2003 4:49:41 PM] [tiga] But you run the risk of not getting filled at all with a stop limit.

[7/18/2003 4:49:49 PM] [tinaSDtrader] yes - I'm beginning to experiment w/those. Problem w/limit is may not get filled - like if gaps even a few cents over your price.

[7/18/2003 4:49:51 PM] [StockStalker] for overnight I like to do a sell stop limit

[7/18/2003 4:50:07 PM] [StockStalker] and set the limit 10 to 15 % away

[7/18/2003 4:50:12 PM] [tinaSDtrader] I'm with Interactive Brokers, they have a

ClubHome

discretionary limit I'm dabbling w/now.

[7/18/2003 4:50:34 PM] [StockStalker] so if i have a news shocker and gap down 30% I do not execute immediately but go into emergency procedure

[7/18/2003 4:50:45 PM] [tinaSDtrader] Allows you to specify "x" cents you're willing to take it above/below the limit.

[7/18/2003 4:50:46 PM] [StockStalker] dont panic sell

[7/18/2003 4:51:06 PM] [StockStalker] wait for consolidation and then a rally

[7/18/2003 4:51:19 PM] [HOTTO] Stephen has joined the club. Please welcome your new member.

[7/18/2003 4:51:32 PM] [tinaSDtrader] after hours can be very deceiving - bid/ask spread gets way off, comes back into normal range in pre-market or at the open, unless some news or something

[7/18/2003 4:51:37 PM] [StockStalker] but if dont use a stop with deep limit then u are sold out immediately for a 30% loser

[7/18/2003 4:51:40 PM] [hotto] hello Stephen... Welcome to Hotto Club

[7/18/2003 4:51:51 PM] [invest4eternity] Welcome Stephen

[7/18/2003 4:52:13 PM] [StockStalker] but yes tina, intraday for stop losses it is just better to go with stop

[7/18/2003 4:52:14 PM] [tinaSDtrader] I think the discretionary for me would be within a dime or so, just so a slight gap up doesn't keep me out of a buy I want to be in

[7/18/2003 4:52:29 PM] [Eagerbeaver] Stephen, Hi, Welcome aboard ;)

[7/18/2003 4:52:46 PM] [tinaSDtrader] I don't use limits for stop losses, if it's time for me to be out, I get out.

[7/18/2003 4:52:52 PM] [happy2be] welcome stephen

[7/18/2003 4:53:06 PM] [StockStalker] that is what i said.. i agree 100%

[7/18/2003 4:53:14 PM] [tinaSDtrader] I use sell limits if I am selling at my chosen point, my target. I use stop losses only as a protective mechanism.

[7/18/2003 4:53:17 PM] [StockStalker] but not on overnights, i do the other day

[7/18/2003 4:53:50 PM] [StockStalker] stop losses and limit profits is the term to help people remember when to use which

[7/18/2003 4:53:56 PM] [tinaSDtrader] Are you saying you use stops intraday, but don't keep them on overnight?

[7/18/2003 4:54:39 PM] [RMRtrader] hotto - thanks for another great week !! Greatly appreciated.

[7/18/2003 4:54:43 PM] [StockStalker] regular stops intraday yes..... overnight stop limit, with the limit set 10 to 15% below the stop

[7/18/2003 4:55:08 PM] [StockStalker] if stock gaps down 35% I want to wait a sec and manually execute my exit

[7/18/2003 4:55:09 PM] [tinaSDtrader] Yes - to avoid that dip at the open then have it recover!

[7/18/2003 4:55:14 PM] [StockStalker] yes

[7/18/2003 4:55:16 PM] [StockStalker] TY

[7/18/2003 4:55:38 PM] [StockStalker] so the stop with deep limit is key for overnight

[7/18/2003 4:56:36 PM] [tinaSDtrader] If I use too tight a stop on an intraday play, I'm destined to get stopped out - so I use alerts then I can pull the trigger on the sell myself. Avoids those crazy spikes that come down and hit me just to have that be the low of the day or swing. But if not disciplined enough to pull sell trigger, hard stops.

[7/18/2003 4:57:30 PM] [StockStalker] yes me too except when I am in way too much stuff

ClubHome

[7/18/2003 4:57:51 PM] [tinaSDtrader] Moves are exaggerated on intraday time frames - on 5 mins looks like it's tanking, but if go up to hourly its just a little pullback.

[7/18/2003 4:57:55 PM] [StockStalker] a mental stop warning mechanism of sorts

[7/18/2003 4:58:20 PM] [tinaSDtrader] I actually use the Alerts feature on TC Net - and my broker has a flashing alert I can put in as well.

[7/18/2003 4:58:44 PM] [hotto] RMR.. yw.. up and doen.. overall a good week..

[7/18/2003 4:58:55 PM] [tinaSDtrader] But very easy to get on the slippery slope of hope - thinking it'll stop at the next support.

[7/18/2003 4:59:01 PM] [hotto] down

[7/18/2003 4:59:51 PM] [StockStalker] does tcnet alert only work by eamil

[7/18/2003 4:59:54 PM] [StockStalker] email

[7/18/2003 5:00:44 PM] [tinaSDtrader] No, click the box for pop up

[7/18/2003 5:01:36 PM] [tinaSDtrader] Have your sound way up so can hear from other room! And also the box pops up on your screen.

[7/18/2003 5:03:22 PM] [tinaSDtrader] I use alerts to warn me time to get out, but if I have to be away from home during the day I'll use hard stops.

[7/18/2003 5:04:35 PM] [tinaSDtrader] I also use alerts to tell me something is going up - we talk about so many stocks then forget to go look at one and it breaks out and leaves without me. I have in many alerts now on favorites, just waiting for the dinggggg-a-ling that says a trade may be in the making.

[7/18/2003 5:08:06 PM] [Flent] i receive my tc alert emails on my cell phone

[7/18/2003 5:08:20 PM] [kmack] how do you do that?

[7/18/2003 5:09:23 PM] [root] --tina, do you have some rules about where to set the stop like on the break oooooof a trend, etc???

[7/18/2003 5:09:55 PM] [root] of

[7/18/2003 5:10:09 PM] [Flent] most cell phones will receive text email, can't explain how i did it, had to call customer service to set it up

[7/18/2003 5:10:15 PM] [tiga] Have the TcNet alerts been dependable lately. I went through a stretch where there were many times alerts didn't fire. Stopped using them.

[7/18/2003 5:10:51 PM] [kmack] ok thx

[7/18/2003 5:11:07 PM] [tinaSDtrader] I use a recent support - like the last bottom or the 20-period exp moving avg. I shave a few cents off those supports because often a stock dips just below the last support. I use at least 6cents below that support, sometimes more if the stock has a lot of volatility.

[7/18/2003 5:11:57 PM] [tinaSDtrader] Other points I've used for stops are a gap opening, or a 50- or 200- moving avg.

[7/18/2003 5:11:57 PM] [hotto] .

[7/18/2003 5:12:01 PM] [hotto] EWEB big ABC correction over last 8-days. Closed right on sma20 yesterday. Today.. dipped below sma20.. then Pos KR. FIB.618 =4.36. So EWEB tested that level.. and today. closed back over FIB.618... on Incr. Volume. Targets are FIB.500=5.12 (7/9 LOD=5.11)...and.. FIB.382=5.87.(7/14 LOD = 5.90... the Highest Low of the Rally.).

[7/18/2003 5:12:05 PM] [hotto] .

[7/18/2003 5:12:23 PM] [hotto] EWEB comments just above.

[7/18/2003 5:12:37 PM] [StockStalker] So u like it aye Hotto!!!! I got a .45 fill ah!!!

[7/18/2003 5:12:42 PM] [tinaSDtrader] I do not use arbitrary numbers - like .50 cents away or 5% away. I may have those in mind for my maximum loss, but I then look for a technical support near that point.

[7/18/2003 5:13:39 PM] [hotto] EWEB.. Yes.. I like it. Room for "easy move" to about 5.80.. Great % profit..

ClubHome

[7/18/2003 5:14:04 PM] [tinaSDtrader] Problem with an arbitrary number is that the market doesn't recognize it - the market recognizes things like Fib retracements, moving averages, etc. But if you just pick some random number, like say 10.50, then if there is a support at 10.40 you'll get stopped out and the stock will probably then bounce off that support.

[7/18/2003 5:14:14 PM] [root] that's helpful tina, thanks

[7/18/2003 5:14:36 PM] [tinaSDtrader] yw

[7/18/2003 5:15:26 PM] [StockStalker] but it is nice to hide the stop below the liquidity levels of whole numbers. So if support is at .52 u can hide ur order at .48 and make em have to chew through that liquidity to get u

[7/18/2003 5:15:45 PM] [tinaSDtrader] yes - a friend of mine does that using level II

[7/18/2003 5:16:48 PM] [root] stalker--what does a liquidity level look like on a chart???

[7/18/2003 5:16:59 PM] [tinaSDtrader] but even so, I avoid arbitrary # whenever possible

[7/18/2003 5:17:33 PM] [StockStalker] conversely do not use a target of .52 if u think that is where it can go, set it at .48(9) or so and then it wont have to chew through all those amateurs orders that are set at .50 and risk not getting out for a penny

[7/18/2003 5:17:42 PM] [tinaSDtrader] If a support is too far away for my risk tolerance, at a minimum I'll use the low of the day, less a few cents. But that's not my first choice.

[7/18/2003 5:18:04 PM] [hotto] EWEB comments... Note .. I found Chart rationale... near FIB levels.. I always attempt to do that.. convolve FIBs with CHart Points...

[7/18/2003 5:18:45 PM] [tinaSDtrader] it's very frustrating to get stopped out by a penny - been there done that - even more frustrating when it turns out to be the low of day and you sold there!!!!

[7/18/2003 5:18:52 PM] [StockStalker] it did violate the .62 today for a bit tho right hotto

[7/18/2003 5:19:05 PM] [happy2be] hotto do you use tc fibs?

[7/18/2003 5:44:34 PM] [StockStalker] by Douglas

[7/18/2003 5:44:38 PM] [hotto] EWEB.. yes . it dipped below FIB.618.. then came back and closed over.. I like that.. shakes out more traders... then.. when it comes back.. holders are more firm... for a few days.. at least.

[7/18/2003 5:46:45 PM] [happy2be] thanks

[7/18/2003 5:46:56 PM] [StockStalker] we have another abc correction to almost fib 62 on NWRE

[7/18/2003 5:47:00 PM] [hotto] happy.. I use tc fibs sometimes.. to get an Idea of the layout... where there are nearby chart points.. but.. for the Numerical work.. I have to use a calculator.. TCNet has that glaring Hole... No Numeric Output.. on FIBs..

[7/18/2003 5:48:23 PM] [StockStalker] some times price is lost in space until u put a fib on it

[7/18/2003 5:48:35 PM] [happy2be] i did the same with calc. but trashed it for my ma tsv and macd, wish i found a better one

[7/18/2003 5:49:28 PM] [StockStalker] did u see the Douglas Happy????

[7/18/2003 5:50:49 PM] [hotto] ;)

[7/18/2003 5:52:44 PM] [StockStalker] ok Hotto next.... thought on NWRE i posted the chart with fib and gann

[7/18/2003 5:53:30 PM] [StockStalker] nice bounce at the confluende of 20 ema, fib 61.8 and gann speed line

[7/18/2003 5:54:55 PM] [Mikon] Hi, all. Just got to looking at TCNet. Been busy all day.

[7/18/2003 5:55:13 PM] [hotto] NWRE.. ok I am caught up... looking at chart now.

[7/18/2003 5:56:05 PM] [Mikon] Mstcnuser, I agree on GE. Bought back my call for 1.5K profit but expect to short GE monday if it looks right.

[7/18/2003 5:56:08 PM] [StockStalker] up on yesterday was key with such a selloff. That allows flexibility in other areas

[7/18/2003 5:59:34 PM] [hotto] Don't you wish there were a less disgusting name for that formation.. (other than "abandoned baby").?

[7/18/2003 6:00:15 PM] [StockStalker] lol for some reason I never bothered to even see what that formation name looked like!!!! sounded to stupid

[7/18/2003 6:01:21 PM] [hotto] Among thousands of bright Traders.. I woud have thought that someone with a "baby" of his own.. might have spoken up ... and said "Let's call that something else... guys"...

[7/18/2003 6:01:56 PM] [StockStalker] yes like abanoned short below

[7/18/2003 6:02:06 PM] [StockStalker] or abandoned shorts

[7/18/2003 6:02:16 PM] [hotto] yeah.. like that..)

[7/18/2003 6:03:30 PM] [hotto] I thought when we finished off WW2..and Forced a change of government on them... we also earned the right to re-name a few Stupid old things... LOL

[7/18/2003 6:03:57 PM] [StockStalker] but an abandoned baby is an islan reversal pretty much right

[7/18/2003 6:04:58 PM] [hotto] but then... some "bright American guys.." dug back through some ancient papers.. to impress modern traders with "real methods" like... "abandoned babys".. LOL

[7/18/2003 6:05:55 PM] [hotto] back to NWRE.. sorry for the digression.;

[7/18/2003 6:09:44 PM] [Mikon] NWRE, today's data looks much like the turn upwards of June 25-26, only better

[7/18/2003 6:11:00 PM] [Mikon] Borankin, do you use stochastics? I find them indispensable.

[7/18/2003 6:11:46 PM] [StockStalker] Hotoo u bout to say something bout it.... I already did and am waiting for ur hotto confirm

[7/18/2003 6:11:56 PM] [StockStalker] before we go to VRSO!!!!!!

[7/18/2003 6:12:09 PM] [Mikon] Re: Options, I have countered my negative longs over the last 5 weeks with +15K using covered calls

[7/18/2003 6:13:03 PM] [Mikon] Good approach. Which chart? How far back in time on the log?

[7/18/2003 6:13:09 PM] [cyberact] Borankin...can you give an example on thw q"s?

[7/18/2003 6:15:13 PM] [Mikon] I usually bail before any substantial losses using covered calls. I use an account where I bail out of the long stock and let the call value diminish before buying back

[7/18/2003 6:18:57 PM] [cyberact] BOR...by shorting your puts...do you mean that you sold puts short against your long shorts?

ClubHome

[7/18/2003 6:19:39 PM] [cyberact] yue 4500 shares you are short on?

[7/18/2003 6:20:34 PM] [cyberact] ok...i got it...i usuallu sell short on my long put options...my capital is limited....

[7/18/2003 6:23:11 PM] [cyberact] say i bought the DEC 04, 32 puts...long/ then o would sell the August 03..32 puts...short/ thus i am covered by mu long puts

[7/18/2003 6:23:32 PM] [cyberact] Fat fingers

[7/18/2003 6:23:39 PM] [hotto] NWRE dipped to 16.56 on Wed...below FIB.500.. and holding well above FIB.618.. Then bounced back.. all the way to 18.30.. by Thursday. held back by LR30. At 18.30, NWRE had exceed FIB.382=17.78.. and was just short of FIB.236=18.69.. So.. in my view.. NWRE has already made the complete FIB bounce. The next Buy Sig.. would be a close over 18.30.. which would set up NWRE for the Retest of the Rally Closing High.. about 20. Note.. since that Close was well above Upr BB.. (very overbot).. I expect NWRE to retest that high.. probably tagging Upr BB. That may set up a potential UBBCSS. completing the Top.

[7/18/2003 6:24:48 PM] [cyberact] right ...that's a spread...the only thing i don't like is the time erosion on my long puts...so i sell short againstthose when i think market will be in an up turn

[7/18/2003 6:28:03 PM] [cyberact] BOR..I am studying real hard the OEX calls/puts...there is a lot of time value in them...yje last week of options expiration they take out much of those time premiums...a spread out of the money the week prior to expiration yields great profits...just on the time value....

[7/18/2003 6:28:47 PM] [Chapmaster] Hi Hotto ... still looking for a biotech bounce?

[7/18/2003 6:28:47 PM] [Chapmaster] Hi Hotto ... still looking for a biotech bounce?

[7/18/2003 6:28:47 PM] [cyberact] been keeping records on my paper trades....

[7/18/2003 6:29:12 PM] [hotto] NWRE .. sNWRE.. today.. was an Inside up day on Low Volume.. that is ok for a Hesitation day. I will want to Buy-Stop NWRE at 18.33..joining the move to 20. But.. I would not want to buy now.. since the snap-back to 18.30 yesterday.. hitting LR30.. May be enough to finish off the Top. ie.. nothing in my "rulebook" gives me a good chance that NWRE will actually get back over 18.30 before a larger correction. I need the BO over 18.30 to go Long.

[7/18/2003 6:31:24 PM] [hotto] No Chap.. just watching now.. Have our New Rotation.. In force now... into the "heavies" .. I am happy with that.. Plenty of stocks to play in Mfg.. Oil svc.. etc...

[7/18/2003 6:31:57 PM] [Chapmaster] thx ... played the oil services and IJJI today

[7/18/2003 7:20:43 PM] [Sully] test

[7/18/2003 7:36:12 PM] [jump85ft] does anyone know why CHINA went up today???

[7/18/2003 7:41:11 PM] [timco] .

[7/18/2003 7:49:19 PM] [StockStalker] We bot the NWRE at 17.30 at the very bottom of the ascending triangle on the "worthless" moving sma on the 5 min chart today

[7/18/2003 7:50:02 PM] [StockStalker] using intraday range contraction theories to make a low risk entry (12 cents)

[7/18/2003 7:51:58 PM] [hotto] lol

[7/18/2003 7:54:59 PM] [StockStalker] I now call that my worthless moving average!!!!!!

[7/18/2003 7:57:00 PM] [hotto] I understand.

[7/19/2003 11:05:41 AM] [imjim] Mango - Is this what you are using? ((H - L) [= (H1 - L1)) AND ((H - L) [= (H2 - L2)) AND ((H - L) [= (H3 - L3)) AND ((H - L) [= (H4 - L4)) AND ((H - L) [= (H5 - L5)) AND ((H - L) [= (H6 - L6))

[7/19/2003 11:07:40 AM] [mango] imjim looks like it - is this a modification of the one hotto listed?

[7/19/2003 11:12:12 AM] [jasp] Make sure that the [has not been changed to a [symbol

[7/19/2003 11:13:29 AM] [jasp] The other thing I do is put in one expression at a time then test before adding the next. Easier to debug.

[7/19/2003 11:14:37 AM] [mango] How do you test-am new to putting in pcf's

[7/19/2003 11:15:21 AM] [jasp] There is a "Test" button at the bottom left of the PCF window.

[7/19/2003 11:16:13 AM] [jasp] Doesn't tell you what is wrong, just that there is something wrong.

[7/19/2003 11:16:19 AM] [mango] jasp do you have the correct NR 7 pcf going?

[7/19/2003 11:16:27 AM] [jasp] Yes.

[7/19/2003 11:17:11 AM] [jasp] ((H - L) [= (H1 - L1)) AND ((H - L) [= (H2 - L2)) AND ((H - L) [= (H3 - L3)) AND ((H - L) [= (H4 - L4)) AND ((H - L) [= (H5 - L5)) AND ((H - L) [= (H6 - L6))

[7/19/2003 11:17:30 AM] [mango] let me go to the log and copy it if you dont mind

[7/19/2003 11:18:03 AM] [jasp] Go for it. Make sure that you check the symbols - they change on me every time I copy.

[7/19/2003 12:05:27 PM] [hotto] then.. Tues - Thurs.. acted like the big break-down was here...

[7/19/2003 12:06:06 PM] [hotto] NHB.. remember.. we had the PB low to Lwr BB on 7/1/03.. LOD=1713.

[7/19/2003 12:07:10 PM] [hotto] Thurs. LOD = 1761.. so.. as yet.. no challenge of the Low of the consolidation band.. - no matter HOW fearful.. it felt this last week..

[7/19/2003 12:08:12 PM] [hotto] NHB.. now has some room below.. to ma50.. at 1742.. and closed up Friday at ma20.. =1782

[7/19/2003 12:09:13 PM] [hotto] So... the Upward leadership that NHB gave us in March.. April...May...June.. has gone... but.. Downside-leadership.. has not yet shown up..

[7/19/2003 12:09:52 PM] [hotto] NHB.. remember.. how decisively.. it showed Upside back in April... when everything else was in doubt...

[7/19/2003 12:10:59 PM] [hotto] I have no doubt.. having watched NHB over the years.. that when the time comes.. NHB Will point the way lower.. no matter what the DJIA.. and others are thinking about...

[7/19/2003 12:11:22 PM] [hotto] SPY next..

[7/19/2003 12:12:05 PM] [hotto] use Zoom- 4 to get the picture.. back to the March Lows...

[7/19/2003 12:13:00 PM] [hotto] SPY.. if I zoom in too tight.. can lose sight of what

the OBV tells us about the Buyers.. from March.. and the May-June surge..
[7/19/2003 12:14:02 PM] [hotto] SPY.. lost some supporters.. after the MOMO peak... June 17.. to 6/30.. but.. not disastrous..
[7/19/2003 12:14:41 PM] [hotto] more like rotation.. more high level consolidation so far.. BUT..with a warning from OBV last week..
[7/19/2003 12:15:25 PM] [hotto] Still - price is holding above ma50 .. and well above the 7/1 PB lows..
[7/19/2003 12:16:08 PM] [hotto] Remember.. I have been constantly on the lookout for the old Granville "solitary walk" of the DJIA..
[7/19/2003 12:16:24 PM] [hotto] DJ-30
[7/19/2003 12:17:07 PM] [hotto] over the last 2 days.. we finally got a hint.. of how that DJIA.. Takeover.. of leadership.. will develop..
[7/19/2003 12:17:41 PM] [hotto] DJIA has a large proportion of old Cyclical stocks..
[7/19/2003 12:18:19 PM] [hotto] moreso.. than SP-500... and way more than the Naz (COMPQX).. QQQ..
[7/19/2003 12:19:42 PM] [hotto] so.. now that the FED... has covered the streets with \$\$\$.. and the new Tax cuts are just showing up...
[7/19/2003 12:20:34 PM] [hotto] and Greenspan.. told us that.. the FED no longer thinks.. it is likely... they will need to use "Extraordinary means".. to boost the economy...
[7/19/2003 12:21:22 PM] [hotto] and.. Earnings reports are coming in ahead of expectations.. and... Many other Upticks.. are showing up in economic data...
[7/19/2003 12:21:58 PM] [hotto] and.. the Bond mkt is saying..."look out - growth is upon us"..
[7/19/2003 12:22:33 PM] [hotto] NOW.. it is finally time.. for the Cyclicals.. and Deep-Cyclicals.. to get their turn..
[7/19/2003 12:23:43 PM] [hotto] Deep-Cyclicals.. = Oil Service & Drilling.. Heavy Eqpt... other Capital Goods.. sectors..
[7/19/2003 12:24:27 PM] [hotto] all showed Positive KRs. on Thursday....off ma200.. AND.. follow-through Rallies on Friday...
[7/19/2003 12:24:54 PM] [hotto] We had a Classic.. Rotation sequence.. the last few days...
[7/19/2003 12:25:33 PM] [hotto] First the scary Sell-off in the Techs.. the "High-Beta" stocks.. which have led the IT Rally since March..
[7/19/2003 12:26:16 PM] [hotto] Then.. at the pit .. on Thursday.. when it felt like "give-up" time... we saw the OSX--X.. etc turn Up...
[7/19/2003 12:27:12 PM] [hotto] So.. lots of big profit \$\$ came out of the High-Betas.. and was available.. for re-deployment..
[7/19/2003 12:28:02 PM] [hotto] then.. along came the Oil Svc... Oversold down to ma200... and... a New Heat wave in the Western US..
[7/19/2003 12:28:23 PM] [hotto] Oil prices still over \$30 / bbl...
[7/19/2003 12:28:46 PM] [hotto] NatGas Inventories. building.. Not as fast as had been expected...
[7/19/2003 12:29:10 PM] [hotto] Economists saying.. The one thing wrong right now.. is Oil prices too high...
[7/19/2003 12:29:29 PM] [hotto] What will fix it ?? Pumping... Drilling...
[7/19/2003 12:30:28 PM] [hotto] If we Drill... OPec may increase production.. to stop the Drilling... they know where the Oil price has to be... about \$25..
[7/19/2003 12:30:52 PM] [hotto] But.. for a while.. we need to do some more drilling..
[7/19/2003 12:31:29 PM] [hotto] Time for the OSX--X... (OIH surrogate).. to

rally... with the freed up Trading \$\$.

[7/19/2003 12:32:25 PM] [hotto] The DJIA.. benefitted Friday.. disproportionately.. from the Cyclical.. Oils... Chems... Papers...

[7/19/2003 12:32:52 PM] [hotto] So.. for the first time in a while.. the DJIA. was the Only major Index to gain on the week...

[7/19/2003 12:33:43 PM] [hotto] Will it follow through next week?.. I don't know.. Volume was slow on Friday..

[7/19/2003 12:34:23 PM] [hotto] But.. DJIA crossed back up and closed over all the ma's... taking out the HOD of Thurs and Wed...

[7/19/2003 12:34:55 PM] [hotto] Also.. the A/D finished the day over 2/1 ..

[7/19/2003 12:35:36 PM] [hotto] H/L.. now badly lagging.. as Always happens at this stage of the IT Rallies.. when the Generals start to move ..

[7/19/2003 12:36:23 PM] [hotto] Rotation... still the main theme here..

[7/19/2003 12:36:58 PM] [hotto] We played the Asian Internet FIB bounces last 2 days...

[7/19/2003 12:37:40 PM] [hotto] Thursday.. it was worrisome.. while everything looked very negative in the markets...

[7/19/2003 12:38:07 PM] [hotto] FIB bounces.. Don't work well.. if the market is Crashing..

[7/19/2003 12:38:55 PM] [hotto] So.. with the dble-tops on the charts.. and the QQQ , SPY.. dropping.. it looked bad on Thursday... Until...

[7/19/2003 12:39:10 PM] [hotto] QQQ - the shared chart now...

[7/19/2003 12:39:35 PM] [hotto] Until.. we saw the Rotation. into the Cyclical.. take hold...

[7/19/2003 12:40:22 PM] [hotto] My buy-stop on OIH.. over Wed's HOD.. executed.. the first Real evidence I had.. that it was "taking"...

[7/19/2003 12:40:58 PM] [hotto] then.. an IPO came out Thursday.. and did very well.. showing that there Were Buyers around...

[7/19/2003 12:41:56 PM] [hotto] The enthusiasm for buying.. was still out there... Just waiting for some Evidence... that the IT Rally was not crashing

[7/19/2003 12:42:53 PM] [hotto] To keep an IT Rally alive.. after the "current group" has played out.. you need Rotation.. into a New Leadership group...

[7/19/2003 12:43:31 PM] [hotto] IF you can get a successful Rotation.. to "take".. then the IT Rally "party" can continue...

[7/19/2003 12:44:20 PM] [hotto] once the pieces came together.. showing that "it just may continue.. ". the IPO.. and the Cyclical Rotation...

[7/19/2003 12:44:47 PM] [hotto] THEN.. you could see the "favorite group" perk up again..

[7/19/2003 12:45:04 PM] [hotto] that is the Asian Internets.. of course...

[7/19/2003 12:45:38 PM] [hotto] which had mostly Corrected recent wild rallies.. Back to their FIB.618 levels...

[7/19/2003 12:46:05 PM] [hotto] We started buying them as soon as we had some evidence.. that it was Working...

[7/19/2003 12:46:35 PM] [hotto] That started with CWCI then CHRB.. then... Many others quickly... joined..

[7/19/2003 12:47:10 PM] [hotto] then.. it became clear that the SINA earnings next week.. were an important catalyst...

[7/19/2003 12:47:28 PM] [hotto] and the big 3 .. or 4.. all took off again..

[7/19/2003 12:47:43 PM] [hotto] SINA SOHU NTES UTSI.. all ran hard..

[7/19/2003 12:48:09 PM] [hotto] CHINA.. had some news to help it.. and ASIA XING ran right along...

[7/19/2003 12:48:45 PM] [hotto] IJI.. and others closed well.. and rose even more

in AH.. All ready for next week..

[7/19/2003 12:49:08 PM] [hotto] Back to the Indexes...

[7/19/2003 12:49:21 PM] [hotto] QQQ

[7/19/2003 12:49:56 PM] [hotto] the Naz.. using QQQ.. had that surge to New Rally Highs.. in early July...

[7/19/2003 12:50:40 PM] [hotto] QQQ dropped below ma10 and LR30 on Thurs.. held there on Friday... but stayed over ma20.

[7/19/2003 12:51:13 PM] [hotto] INTC did not run as far as I thought... never got to 26.70... but..

[7/19/2003 12:51:25 PM] [hotto] INTC chart.

[7/19/2003 12:52:21 PM] [hotto] INTC had PB days Thurs and Friday.. still holding well above all MAs.. and Volume not as big as the last 2 up days...

[7/19/2003 12:52:58 PM] [hotto] INTC.. I give special attention here.. because of the relatively good earnings.. and market response after...

[7/19/2003 12:53:44 PM] [hotto] as well as the Good Guidance from INTC.. it is so important in the mkt Avgs.. Naz and DJIA.

[7/19/2003 12:55:17 PM] [hotto] THE INTC chart looks to me.. ready to try for the higher numbers I called for .. 26.70, 27, 28.20... we should see that next week..

Up or Down.... but.. as long as INTC holds over ma10 and LR30.. it is fine..

[7/19/2003 12:55:41 PM] [hotto] T2100.. the A/D line.

[7/19/2003 12:56:18 PM] [hotto] T2100 looks like the avgs.. High Level consolidation.. so far...

[7/19/2003 12:57:35 PM] [hotto] I heard 2 "talking heads" that I pay attention to.. say.. the Correction since 6/16 "may be over"... wow.

[7/19/2003 12:58:12 PM] [hotto] IF that is true... then possibly.. the big up move in A/D on Friday.. T2100..

[7/19/2003 12:58:49 PM] [hotto] may be the start of something big... led by the "heavies" (Cyclical and Deep-Cyclical).

[7/19/2003 12:59:28 PM] [hotto] T2106.. McClellan Oscillator..

[7/19/2003 1:00:48 PM] [hotto] since the 6/17 highs.. T2106 has had a dble bottom.. turned up again Friday.. maybe ??

[7/19/2003 1:01:15 PM] [hotto] T2118... McClellan Summation Index..

[7/19/2003 1:01:55 PM] [hotto] Has been in a steady decline since its peak on 6/17.. another new low on Friday.. since the peak..

[7/19/2003 1:02:09 PM] [hotto] No evidence of an upturn here...

[7/19/2003 1:03:04 PM] [hotto] That says.. that at THIs time.. the Momentum.. is NOT as strong as it was about 28 days ago...

[7/19/2003 1:03:41 PM] [hotto] the 6/17 MOMO peak was 22 days ago..(mkt days).

[7/19/2003 1:04:18 PM] [hotto] so.. will be interesting.. to see if T2118 can turn up over the next week..

[7/19/2003 1:04:30 PM] [hotto] Sectors...

[7/19/2003 1:05:04 PM] [hotto] questions first

[7/19/2003 1:54:21 PM] [hotto] As the JIT Economy was switched OFF.. the demand for electricity went way down...

[7/19/2003 10:00:25 PM] [Fibotrader] Have been experimenting today with TCScan+. Run the Fib Scan against NR7 Scan in TCNet. Gives you stocks that have an NR7 and has pulled back to various fib levels. May have some real potential.
[7/19/2003 10:02:12 PM] [Fibotrader] The following came up on Fridays eod data: ATMI CKR DQE NSM TECD CBB CUM ELON POWI ZMH
[7/19/2003 10:05:12 PM] [Zathrus] Hi Fibo - those are some really interesting pocks.... good stuff...
[7/19/2003 10:05:29 PM] [Zathrus] Ooops - can you find the typo :D
[7/19/2003 10:05:36 PM] [Fibotrader] Hey Z -- did u shave today :)
[7/19/2003 10:06:14 PM] [Zathrus] Just my back
[7/19/2003 10:06:37 PM] [Fibotrader] Real impressed with the results of the scan. First time I have played around with it. I really like ATMI. cud move up if mkt cooperates
[7/19/2003 10:07:07 PM] [StockStalker] Check out VRSO. It is an inside outside NR7
[7/19/2003 10:07:10 PM] [ilovemusicCOM] I posted a very simple bullish kicker scan on CHINA if anyone is intersted.
[7/19/2003 10:07:37 PM] [ilovemusicCOM] I like to make the scans "loose" so that I can review the charts with eyeballs.
[7/19/2003 10:07:40 PM] [Fibotrader] Oz, where d volume
[7/19/2003 10:07:53 PM] [StockStalker] me too
[7/19/2003 10:07:55 PM] [ilovemusicCOM] Sometimes interesting charts come up that would not appear in a "tight" scan
[7/19/2003 10:08:01 PM] [StockStalker] what volume r u looking for
[7/19/2003 10:08:11 PM] [Fibotrader] on fridays bar
[7/19/2003 10:08:15 PM] [StockStalker] that is why it is better to sort and not scan
[7/19/2003 10:08:23 PM] [StockStalker] and match up the TRUES
[7/19/2003 10:08:55 PM] [ilovemusicCOM] sorting is good, too, but a scan is need to limit the universe, IMO
[7/19/2003 10:09:06 PM] [Fibotrader] nice i/o bar but no vol to speak of
[7/19/2003 10:09:18 PM] [StockStalker] right, but we were not taling bout making universes i tot
[7/19/2003 10:09:43 PM] [StockStalker] we were taling about ways to find patterns and not filter out out goo plays

stocks that had done very poorly during the year

[7/19/2003 10:10:11 PM] [ilovemusicCOM] If you went long in those stocks on a kerashi (kicking foot)

[7/19/2003 10:10:15 PM] [StockStalker] Hey Fibo

[7/19/2003 10:10:16 PM] [ilovemusicCOM] you would have done quite well.

[7/19/2003 10:11:04 PM] [StockStalker] u have to look intraday to see that most the volume occurred at the end of the day. It is camouflaged increased volume

[7/19/2003 10:11:04 PM] [ilovemusicCOM] something that fits a pattern is within a certain "universe"

[7/19/2003 10:11:34 PM] [ilovemusicCOM] ah, interesting point stockstalker

[7/19/2003 10:12:02 PM] [StockStalker] that is the importance of 3 dimensional charting

[7/19/2003 10:12:45 PM] [StockStalker] It is not enough for me to know it is a Doji on the daily, I want to know if the doji finished its creation on the up or the down

[7/19/2003 10:12:53 PM] [StockStalker] and things like that

[7/19/2003 10:12:54 PM] [Ngurumo] jump ...you still there? How was the FW seminar? I wanted to go, but couldn't manage it.

[7/19/2003 10:13:56 PM] [ilovemusicCOM] How do you know, StockStalker?

[7/19/2003 10:13:57 PM] [wildbill] is there anything you guys- DON'T know? lol

[7/19/2003 10:14:27 PM] [ilovemusicCOM] Anyone use fuzzy logic?

[7/19/2003 10:14:29 PM] [StockStalker] look at the five minute chart

[7/19/2003 10:15:04 PM] [StockStalker] when I see a daily.... I see the intraday price patterns in my head

[7/19/2003 10:15:17 PM] [Fibotrader] thx Oz, now I see what you mean.. just set my screen up to display daily, 15m, 60m. VRSO shows good up vol last 3 bars. thx for that explanation.

[7/19/2003 10:15:47 PM] [StockStalker] take a hammer for example

[7/19/2003 10:16:33 PM] [StockStalker] but if you go to a 5 min chart or 2 min... you can be in way before the hammer forms on the daily

[7/19/2003 10:17:02 PM] [StockStalker] it is hard to buy after the hammer is formedThe stop is sooooo far below

[7/19/2003 10:17:13 PM] [StockStalker] the stop is so far below

[7/19/2003 10:17:30 PM] [Fibotrader] how do you find the hammer as it is forming? thumbing thru charts intraday ?

[7/19/2003 10:17:35 PM] [StockStalker] instead look for a 123 trend reversal intraday and get in on the bottom of the handle

[7/19/2003 10:17:57 PM] [StockStalker] constantly flipping charts intraday yes

[7/19/2003 10:18:10 PM] [StockStalker] and have used real time scanning too

[7/19/2003 10:18:17 PM] [StockStalker] will go back to that too

[7/19/2003 10:18:27 PM] [Fibotrader] r/t in tcnet or other s/ware

[7/19/2003 10:18:34 PM] [StockStalker] other

[7/19/2003 10:22:10 PM] [Fibotrader] u can adjust the font size
[7/19/2003 10:22:34 PM] [ilovemusicCOM] not for text entry
[7/19/2003 10:22:46 PM] [ilovemusicCOM] only for text displayed
[7/19/2003 10:22:49 PM] [Fibotrader] no, just for display
[7/19/2003 10:24:03 PM] [StockStalker] so if jon doe nees text displayed to be one size to see it why would he be able to see it on the entry size if it is smaller
[7/19/2003 10:25:27 PM] [ilovemusicCOM] I am so happy to be free of spam! Just wrote my own spamacide program. :)
[7/19/2003 10:25:55 PM] [Saroj] Oh, ilove - could I use that!
[7/19/2003 10:26:13 PM] [ilovemusicCOM] It runs continuously look for those evil messages. then deletes them from the server and moves them to a spam folder for later review.
[7/19/2003 10:26:40 PM] [ilovemusicCOM] it uses fuzzy logic to ensure the message is spam
[7/19/2003 10:28:16 PM] [ilovemusicCOM] not ready for distribution yet, but will be soon. Since it actually logs into an email account, it needs id and password, etc. I need to write the configuration module for that.
[7/19/2003 10:28:34 PM] [StockStalker] must be nice to be abel to right ur own stuff

[7/19/2003 11:12:45 PM] [really] stalker - how would you play CORV given that chart, where would you buy and where would you put in stop for failed move
[7/19/2003 11:16:07 PM] [StockStalker] U could try to buy the BO but I am already in now... I set the stop below recent support but cannot give the details of the exact number at this time due to the fact my readers are in it and a failed triangle is not a pretty thing
[7/19/2003 11:23:17 PM] [really] ty
[7/19/2003 11:29:15 PM] [really] stalker - you must pick these up with the NRxx or just flipping charts. seems a difficult to model in a PCF
[7/19/2003 11:30:03 PM] [StockStalker] finding an nr7 with a pcf is easy... finding the right setup is the trick
[7/19/2003 11:30:26 PM] [StockStalker] r u able to find the nr7 at all.... is is mathematical and not subjective
[7/19/2003 11:31:13 PM] [StockStalker] mathematical
[7/19/2003 11:31:18 PM] [really] yes I find many nr7 hundreds of them
[7/19/2003 11:31:28 PM] [StockStalker] these ar typos and not bad spelling lol

[7/19/2003 11:32:12 PM] [StockStalker] yes i flip all the ones i find
[7/19/2003 11:32:39 PM] [really] In all stocks running NR7 against it you get a mere 1660 stocks out of 6822 stocks
[7/19/2003 11:33:13 PM] [StockStalker] that is too big of a universe... most of those are no tradeable at all
[7/19/2003 11:33:26 PM] [StockStalker] toooo thin or other issues
[7/19/2003 11:33:39 PM] [StockStalker] there are bout 1000 really tradeable ones

[7/19/2003 11:34:33 PM] [StockStalker] that is way easy for me to handle
[7/19/2003 11:34:35 PM] [really] what is your universe?

ClubHome

[7/19/2003 11:35:05 PM] [really] oh I see, you track 1254 stocks and have 23 out of those. I that what you mean?

[7/19/2003 11:35:15 PM] [StockStalker] it is a garden that grwos but started at 59 cents and up and eliminated AMEX

[7/19/2003 11:35:19 PM] [StockStalker] yes

[7/19/2003 11:37:42 PM] [w2jc] all the elliott wave analysis chart sets have been updated now at <http://www.elliottwaves.us>

[7/19/2003 11:43:19 PM] [really] stalker - why wouldn't you also have a volume criteria?

[7/19/2003 11:43:40 PM] [StockStalker] I do

[7/19/2003 11:43:48 PM] [StockStalker] it is the main criteria

[7/19/2003 11:43:50 PM] [really] 200,000 ?

[7/19/2003 11:44:24 PM] [StockStalker] I just scroll down teh 90 day vol VALUE until there are about 1250 stocks

[7/19/2003 11:44:41 PM] [StockStalker] that puits it at about 220K

[7/19/2003 11:45:05 PM] [StockStalker] may of which I still will not trade but I can make that call case by case and delete them

[7/19/2003 11:58:59 PM] [Noname] StockStalker-CORV-my read on another program is it has a little more sideways but it's wound tight as a spring on a garage so it could pop to the upside any moment

[7/20/2003 12:02:28 AM] [Noname] CORV-\$1.86 between 7/22 and 8/6

[7/20/2003 12:02:37 AM] [Noname] minimum

[7/20/2003 12:03:25 AM] [Noname] nice BETA

[7/20/2003 12:04:03 AM] [StockStalker] now that is a bit more precise !!!!! I agree. I think it sees two in that time as well

[7/20/2003 12:39:08 AM] [RAMConsult] .

[7/20/2003 12:41:06 AM] [gatolove2] I wrote a PPC41 sort and it will not work against my sector watchlist. C / (C41 + .001). It works in stock wathchlists but not with sectors. What am I doing wrong?

[7/20/2003 12:53:23 AM] [really] gato - what do you have as a watchlist.

[7/20/2003 12:56:12 AM] [really] gato - you should have a watchlist in the watchlist row, and sorted by ppc41. be sure you have run the personal criteria formulas. I had no problems running against a sector.

[7/20/2003 12:58:53 AM] [Newkid49] ditto gato, i ran Hotto's PPC62 on the MG list fine...

[7/20/2003 1:03:45 AM] [gatolove2] I created a Sector Watchlist using Hotto's sectors. I bring that up. And then the PPC41 sort which shows that it has been updated.

[7/20/2003 1:08:45 AM] [Newkid49] ya'll check out TBL...late announcement fryday...2q profit surges after worries, TBL -14.55%

[7/20/2003 1:09:26 AM] [Newkid49] the announcement was 5:47pm fryday..

[7/20/2003 1:11:04 AM] [TCNut] wanted to buy call options for TBL...yesterday...but chickened out...seems loke the earns report should be good for a move up....not sure what inspired friday's selling frenzy....

[7/20/2003 1:12:46 AM] [Newkid49] the news just prior was for a poor outlook..

[7/20/2003 1:14:01 AM] [TCNut] looks like it was triggered by a bunch of insider sales!....

[7/20/2003 1:15:33 AM] [TCNut] thiught it could be a nice gap down then buy ceap rebound play....but still a li'l skeptical

[7/20/2003 1:16:14 AM] [Newkid49] i can't picture insiders waiting till the day of announcements , looks more like skiddish fund managers too me..

[7/20/2003 1:16:53 AM] [TCNut] one of thelatest posts claims "automatic sell point" was triggered

[7/20/2003 1:17:35 AM] [Newkid49] highest vol since it BO'd 4/15....BO, probably from last qtr earnings

[7/20/2003 1:18:34 AM] [TCNut] but i am just a bonehead..;)

[7/20/2003 1:19:28 AM] [Newkid49] massive VOL....interesting

[7/20/2003 1:21:21 AM] [TCNut] definitely one to keep an eye on....Monday

[7/20/2003 1:22:18 AM] [Newkid49] agreed, put on the oversold list.....

[7/20/2003 1:22:31 AM] [TCNut] august 50 calls lost 7.55 on friday!.....bid now 1.65.....ask....1.75

[7/20/2003 1:22:50 AM] [TCNut] august 55 calls....bid .35 and ask . 45

[7/20/2003 1:23:35 AM] [TCNut] maybe a vertical spread....for around 1.30

[7/20/2003 1:23:43 AM] [Newkid49] TC, i am totally ignorant about put/calls.....
[7/20/2003 1:24:32 AM] [TCNut] so am !!...D....still seems like way less risk to me
[7/20/2003 1:25:48 AM] [Newkid49] put/call contracts are 100sh contract?
[7/20/2003 1:27:51 AM] [TCNut] for examples sake....say TBL is at 49\$....100 shares for 4,900\$!
[7/20/2003 1:28:36 AM] [Newkid49] ok.....
[7/20/2003 1:30:32 AM] [TCNut] 100 shares per contract.....10 TBL 50 calls....would most likely get filed @ 1.75.....so 1,750....maximum risk to see where 1,000 shares of TBL will be by the 3rd saturday of august
[7/20/2003 1:30:41 AM] [TCNut] well.....really friday
[7/20/2003 1:32:36 AM] [w2jc] the thing to remembeer about these calls is that if you bought the stock you would still have something valuable on August 16th, but if the price does not go above \$50 you will have NO value for your \$1750 on August 16th... poof, gone !!
[7/20/2003 1:33:26 AM] [TCNut] I think I like some of the cyclical stocks from Hotto's class today...much cheaper and less psychosis involved
[7/20/2003 1:34:22 AM] [TCNut] yeah.....but how much value would you really have?
[7/20/2003 1:34:27 AM] [Newkid49] thanks for the intro.....
[7/20/2003 1:35:17 AM] [w2jc] TCnut -- if you bought the stock at \$49 and it did not move in price you would have \$4900 value; the calls would be \$0 value on 8/16
[7/20/2003 1:35:40 AM] [Newkid49] what's the take if the Aug 50 is over?
[7/20/2003 1:37:06 AM] [w2jc] if the stock goes to \$55 then the calls would be worth at least \$5 each on 8/15 so you would have \$5000 -- if you bought the 100 shares of stock it would be worth \$5500
[7/20/2003 1:37:12 AM] [TCNut] then again....if you bought 100 shares of TBL @ 49\$....and it rose to 50\$....you would make a whoping 100 bucks....with 4,900 at risk!
[7/20/2003 1:37:34 AM] [w2jc] so the calls can give you a lot of leverage, but you need to be very sure the stock price will go the way you think it will go ...
[7/20/2003 1:38:50 AM] [TCNut] options are a cheap way to hold lots of shares....and at the time of purchase...you know the maximum risk
[7/20/2003 1:39:51 AM] [w2jc] that's correct ... as long as the call buyer realizes how many variables can reduce the value of them.
[7/20/2003 1:40:38 AM] [StockStalker] I think the proper way to play the calls is not to do it like a lotto strategy.... That is, Buy the amount of contracts that would equal the amount of shares you would buy if u were going to buy the stock outright. Then treat the cost of the call as a protective stop loss and be ready to lose it all. The wrong way to it is to say "should I buy 50k worth of stock or 50k worth of calls.
[7/20/2003 1:41:00 AM] [StockStalker] or rather to DO IT LIKE THE LOTTERY strategy
[7/20/2003 1:41:29 AM] [w2jc] SS .. your concept is wise :)
[7/20/2003 1:42:20 AM] [StockStalker] so many focus on the upside leverage. but forget that they are probably going to lose 100 percent of their investment in it if they are wrong
[7/20/2003 1:42:22 AM] [w2jc] keep in mind too that something like 90% of all people who BUY calls or puts end up losing most of their money...
[7/20/2003 1:42:23 AM] [TCNut] around these parts it must be referred to as....."Hottery Strategy"...:8
[7/20/2003 1:42:39 AM] [StockStalker] as do 90 of those that trade is stocks

[7/20/2003 1:43:09 AM] [StockStalker] the ratio is the same as at a poker table
[7/20/2003 1:43:34 AM] [StockStalker] the money of the masses goes to the pockets of the few over time... It really si close to zero sum
[7/20/2003 1:44:47 AM] [Newkid49] actually, i like the odds in craps better myself.....
[7/20/2003 1:45:07 AM] [StockStalker] I like the market odds the best for me
[7/20/2003 1:45:36 AM] [Newkid49] your much more knowledgeable than i....
[7/20/2003 1:45:42 AM] [StockStalker] but u do get the free drinks at the vrap's table
[7/20/2003 1:46:02 AM] [StockStalker] grrrr.... craps
[7/20/2003 1:46:08 AM] [Newkid49] i certainly enjoyed your session on vol/pr contraction & expansion...
[7/20/2003 1:46:32 AM] [TeachMe] Speaking of zero sum ..after the market collapse of 2000..some individuals/entities must have become enormously wealthy..this great transfer of wealth that has taken place..
[7/20/2003 1:46:44 AM] [StockStalker] that was my first one ever...felt strange to to know there were so many out there but so quite here
[7/20/2003 1:47:00 AM] [Newkid49] & have run INR5 & NR7, haven't built INR7 yet...
[7/20/2003 1:47:44 AM] [StockStalker] me either.... I just use an inside day pcd and sort by both and if the two both have TRUES on a stock then it is an INR7
[7/20/2003 1:47:48 AM] [Newkid49] u can type too, can't u?...i like to take notes live, sometimes...
[7/20/2003 1:47:59 AM] [TCNut] hey, every time I go off on one of my options spiels....i make sure that I include that.....I am a bonehead....or similiar...comment!:P=D
[7/20/2003 1:49:17 AM] [Newkid49] well, it's late & my head is saturated....thanx TC, OZ...
[7/20/2003 1:50:56 AM] [StockStalker] bye
[7/20/2003 1:53:08 AM] [TCNut] RDC to 25 crap shoot seems like a better play.....august 25 calls @ around .35
[7/20/2003 1:54:07 AM] [TCNut] still can't hurt to play around with virtual options....@ http://www.optionsxpress.com/quote_option_chain.asp
[7/20/2003 2:03:21 AM] [TCNut] besides, who really knows what all those freebie vegas tonics really consist off?
[7/20/2003 2:07:32 AM] [TCNut] theta value for late saturday chat is sure low!
[7/20/2003 2:08:50 AM] [TCNut] my rickety old soap box has crumbled

[7/20/2003 2:14:50 AM] [Nomeite] Just came in from working outside and I often wonder why Noah, when he was loading the Ark, just didn't swat the 2 darned mosquitoes???? =o
[7/20/2003 2:15:31 AM] [w2jc] hah hah , that's a good one Nomeite !! did you see my reply to you in all-chat ??

[7/20/2003 2:18:46 AM] [Nomeite] one of the few things that irritates me about this country is this time of year we have 'squittoes 24 hours a day!!!!

[7/20/2003 2:18:55 AM] [w2jc] ok ... it can be daunting the first time, since all the charts stop with the recent data ... but once you know about it, it only takes a couple of mins to blast the old Hard Drive watchlist and make it over again.

[7/20/2003 2:19:10 AM] [w2jc] i presume you are up in Alaska ??

[7/20/2003 2:19:34 AM] [Nomeite] yeah....Nome, thus NOMITE

[7/20/2003 2:20:19 AM] [w2jc] duh... that's what i figured... also explains why you can come in from working outside at this time of the day/night !! the skeeters up there have 24 hour daylight to see you !!

[7/20/2003 2:22:09 AM] [Nomeite] Yeah! and just a thought to pass along, we build and have lot's of birdhouses, them lovable little boogers eat a heck of a lot of 'squittoes!

[7/20/2003 2:23:35 AM] [w2jc] how about bats (in the belfry) ?? they are supposed to be great for that ...

[7/20/2003 2:26:00 AM] [Nomeite] Bats are rare around here, but birds of every type come up north to do their spring time breeding thing and again you make 'em comfortable they go about feeding their young...'squittoes

[7/20/2003 2:32:52 AM] [w2jc] *

[7/20/2003 2:33:29 AM] [w2jc] fell off the chat server for a while there ... Nomeite - from your original post, i presume that Omnitrader can work from the TCnet watchlists ??

[7/20/2003 2:35:59 AM] [Nomeite] not exactly. you set up a comparable "focus list and then go in and download from any watchlist in TCnet and it'll work it. you can just also type in a stock at a time

[7/20/2003 2:38:16 AM] [w2jc] ic ... the elliottwave analyzer i use works right off the TC watchlists, which makes it very convenient (they just added that a while ago) ... but for individual tickers, i wish i could just type it in ... have to go thru pulldown menus ... first the first letter, then scroll to the ticker, then click it, then click Add ...

[7/20/2003 2:40:06 AM] [Nomeite] didn't explain that well...you instruct that you are using tc data and it knows where to go to get the data. you can do this one stock at a time or you can instruct to got to tcnet, it then brings up all watch lists. you can then swipe and copy nthe names from individual lists which will then ap-pear in your omni focus list, same as a wtchlist.

[7/20/2003 2:41:34 AM] [Nomeite] understand, only difference is that i can just type in one symbol at a time and it knows where to get the data

[7/20/2003 2:42:01 AM] [w2jc] that still sounds quite convenient ... ok ... it's soming up on 3 a.m. here so think i better get some shuteye or i will waste a beautiful sunday sleeping all day !!

[7/20/2003 2:42:19 AM] [Nomeite] you in Jersey???

[7/20/2003 2:43:14 AM] [Nomeite] take care and sleep well :)

[7/20/2003 2:44:19 AM] [w2jc] yeah, north jersey ... ok L8r

[7/20/2003 2:45:38 AM] [Nomeite] if you are still there, i'm an old Brookly

[7/20/2003 2:45:53 AM] [Nomeite] Brooklyn kid

[7/20/2003 2:46:27 AM] [w2jc] ah ... i hardly ever have been to Brooklyn, but i know where it is ;) what sent you to Alaska ??

[7/20/2003 2:46:29 AM] [Nomeite] get some sleep see you!

[7/20/2003 2:47:25 AM] [Nomeite] that's a very long story, another time, get some sleep...:)

[7/20/2003 2:49:13 AM] [w2jc] ok bye !!

[7/20/2003 2:50:38 AM] [Nomeite] besides I just cracked open a bottle of wine...at

[7/20/2003 11:27:45 AM] [kellam] Gm Hotto just need to know how to change title of discussion post rather then posting a new one
[7/20/2003 11:28:24 AM] [kellam] then I will post in new Top 100 data and my picks
[7/20/2003 11:30:52 AM] [hotto] We can't change it... Please create One new File.."IBD 100 Weekly" with no date.. and proceed as we discussed last week..
[7/20/2003 11:31:37 AM] [hotto] If you are able to keep it up each week.. it will become a resource that we all use.
[7/20/2003 11:32:12 AM] [kellam] Got it, thats what I thought but wanted to check, creating now:)
[7/20/2003 11:32:26 AM] [hotto] thanks.:)
[7/20/2003 11:37:24 AM] [alatar] kellam -- fwiw, i post ibd100 data every week in a-lists club; may be some re-use of data or synergies available
[7/20/2003 11:37:35 AM] [lars] Hotto Thanks for your session yesterday. You did not mention EP in regards to Nat Gas
[7/20/2003 11:38:56 AM] [lars] I retired from Coastal when EP took it over.We are sorry that happened
[7/20/2003 11:38:56 AM] [hotto] yw... EP is in a different segment from the focus.. over last few days... EP is more of a Utility.. even though they have some production..
[7/20/2003 11:39:47 AM] [hotto] EP - I am Long the stock.. expect it to move to about 9.50 in near term.
[7/20/2003 11:40:31 AM] [lars] Thank you
[7/20/2003 11:40:41 AM] [hotto] yw
[7/20/2003 11:44:49 AM] [bobv] lars - the natl gas part of EP used to be EPN, independent of EP now and called Gulterra (GTM).
[7/20/2003 11:47:35 AM] [lars] Does not EP still have the pipeline system which most of the nat gas is transported in US?
[7/20/2003 11:51:22 AM] [ChuckR] lars..yes
[7/20/2003 11:56:10 AM] [kellam] alatar,helpful to get your picks from list;maybe could add as comment in my post.Do you have picks for thisweek from list thx
[7/20/2003 11:59:22 AM] [alatar] kellam -- i've not been picking, just listing changes (additions, deletions, etc) in listings; picks are so subjective, depending on trading time frames, acceptable risk, good patterns vs bad; i figured just to offer data on creating watchlist that others could use to pick their own based on their own preferences
[7/20/2003 12:02:48 PM] [kellam] alatar agree on picks, iwill identify mine as stocks of interest for 2 to 3 day gains thx
[7/20/2003 12:04:06 PM] [mango] could someone help with the symbol PCLND-Stockstalker mentioned it in his lecture and I cant get a chart-is there a mistake in the letters? thx
[7/20/2003 12:06:30 PM] [alatar] kellam, hotto -- as info, i posted ibd100 data in

[7/20/2003 12:41:06 PM] [mango] kellam-thanks for doing the IBD listis-great help-one question-is there an easy way to put it into a watchlist-or just do it manually?

[7/20/2003 12:46:03 PM] [kmack] wonder if the list could be uploaded as a .txt file...then we could save it and import it into a WL....?

[7/20/2003 12:46:17 PM] [kmack] in the future?

[7/20/2003 12:46:55 PM] [alatar] text files of IBD100 symbols are available in shared files of A-Lists club

[7/20/2003 12:47:52 PM] [kmack] ok...thanks

[7/20/2003 12:48:29 PM] [silverdolr] the import has to be single line for each stock.....have done it for other programs

[7/20/2003 12:50:26 PM] [alatar] the text files of IBD100 symbols that are available in the shared files of the A-Lists club re structured such that there is a single symbol per line

[7/20/2003 12:57:45 PM] [StockStalker] Sent out an email last night with the completed lesson attached. Many of the "Free" email accounts rejected it becuae they were full (as expected). Will sne out another email with a note only like this one to let those people know who they are

[7/20/2003 1:07:07 PM] [StockStalker] on the cleaned up Hotto class log, what was it supposed to say everytime it did say ""current group","

[7/20/2003 1:07:10 PM] [mango] kmack you are

[7/20/2003 1:07:17 PM] [kmack] save the file and remember where it is...

[7/20/2003 1:07:32 PM] [kmack] then click new...to get a new WL

[7/20/2003 1:07:48 PM] [kmack] then check the bottom circle..."import from File"

[7/20/2003 1:08:35 PM] [kmack] then in the pop up box bring up your file...and click import

[7/20/2003 1:08:53 PM] [kmack] the hardest part is if you can't remember where it is saved...lol

[7/20/2003 1:09:17 PM] [mango] thanks so much- where is the txt file that one saves?

[7/20/2003 1:09:39 PM] [Ngurumo] Oz ...I used NotePad to work on it and then imported to Discussions. Tech Support says TCNet speak does not use the same formatting. Quote marks come out as " and ampersands come out as &.: I am still trying to get an answer from Tech Support on how to fix it.

[7/20/2003 1:09:42 PM] [kmack] in the A1 Lists club....under "files" at the bottom of the IBD list

[7/20/2003 1:10:15 PM] [kmack] dated 7 21...but not the one with ex

[7/20/2003 1:10:21 PM] [Ngurumo] altar ...still there?

[7/20/2003 1:10:30 PM] [kmack] I had to reboot after joining the club

[7/20/2003 1:10:40 PM] [kmack] to get into the files

[7/20/2003 1:10:45 PM] [StockStalker] k thanks, sorry if had to repeat the to me

[7/20/2003 1:10:57 PM] [StockStalker] I know the feeling

[7/20/2003 1:11:13 PM] [kmack] lol...no problem...

[7/20/2003 1:11:42 PM] [Ngurumo] Oz ...thats ok. Sorry it happened. Very frustrating for the time involved. At least I know now ...for the next time. :D

[7/20/2003 1:11:42 PM] [alatar] yes, i'm here

[7/20/2003 1:12:35 PM] [Ngurumo] altar, just imported your list. Have you found a way to preserve the original IBD order in the WL?

[7/20/2003 1:13:26 PM] [alatar] i have not -- great frustration -- would love to be able to assign my own sorts

[7/20/2003 1:13:54 PM] [kmack] maybe we could request a "nonsort" option...

[7/20/2003 1:14:13 PM] [Ngurumo] xP ...kinda figured that was the answer.

[7/20/2003 1:14:52 PM] [mango] kmack last question I hope-found the alatar list in A Lists club but cant find file-help?

[7/20/2003 1:14:58 PM] [kmack] I am going through a WL of stocks with vol pops June 31...WLM comes up...consistent with the cyclical plays....good chart...OBV points higher

[7/20/2003 1:15:45 PM] [kmack] mango...there should be a tab at the top that says files...you may have to restart TCNet for the program to recognize that you are a club member...

[7/20/2003 1:15:52 PM] [alatar] mango -- go to shared files, IBD100 folder, bottom of list for this week's files

[7/20/2003 1:16:10 PM] [kmack] in order to access the files

[7/20/2003 1:17:03 PM] [Ngurumo] kmack, I may be wrong ...but I think all you have to do is exit the clubs window and reopen it rather than exiting and restarting TCNet ...at least it works for me.

[7/20/2003 1:17:15 PM] [kmack] ok...thx

[7/20/2003 1:17:43 PM] [mango] got it thanks alot Alatar and Kmack

[7/20/2003 2:23:19 PM] [StockStalker] NUVO appears to be selling stock in a shelf offering. That may be what the volumes is from
[7/20/2003 2:23:33 PM] [wildbill] EXLT - wasn't this one of hotto's original "picks" to fly a month or so back?

[7/20/2003 3:22:58 PM] [StockStalker] where do I find a list that telss me the individaul stocks in the MGxxx (Media General) stocks
[7/20/2003 3:26:35 PM] [Bebee] Stockstalker, pull down the sub name under the main title to components at the very top of chart
[7/20/2003 3:26:59 PM] [cyberact] SS...all media general groups stocks are in the watch lists set up already ny TC2000...for example go to the energy sector to find energ media group MG125
[7/20/2003 3:27:46 PM] [cyberact] oil & gas eqpt stocks
[7/20/2003 3:28:54 PM] [StockStalker] but there is no watchlist for MG125 specificaly that has the exact stocks in it right
[7/20/2003 3:29:35 PM] [cyberact] the stocks that comprise MG125 are those in that list
[7/20/2003 3:29:45 PM] [Grounddog] PECS
[7/20/2003 3:30:43 PM] [cyberact] if you scroll on that watch list you will also see MG125
[7/20/2003 3:31:30 PM] [cyberact] this is the Media group no for all of those stocks...44 items
[7/20/2003 3:32:10 PM] [StockStalker] You realize Media Group is a company that creates this private index right?
[7/20/2003 3:32:26 PM] [StockStalker] like S&P
[7/20/2003 3:32:54 PM] [StockStalker] so it would seem to me that there would be a watchlist named MG125 with those specific stocks in it
[7/20/2003 3:33:03 PM] [cyberact] well maybe i am wrong...but that was may understanding
[7/20/2003 3:33:33 PM] [StockStalker] <http://www.mgfs.com>
[7/20/2003 3:34:48 PM] [cyberact] if you go to the TC2000 watch list for "Independent Oil and Gas" mote how the Media general group number changes to MG 122
[7/20/2003 3:35:00 PM] [cyberact] note
[7/20/2003 3:35:13 PM] [StockStalker] let me see

[7/20/2003 11:18:34 PM] [w2jc] Zathrus - i noticed earlier that the elliott wave forecast for the MG group "staffing and outsourcing" shows a big positive move

ahead ... i guess there is a lot of outsourcing now that so many people have been
laid off ...

[7/20/2003 11:19:52 PM] [bmweyrauch] management will also be slow to rehire for
positions they can outsource

[7/20/2003 11:21:42 PM] [w2jc] i created a 'buy' list this weekend and narrowed it
down to 6 stocks ... guess i might as well go public and offer it here !!

[7/20/2003 11:22:05 PM] [w2jc] here's my 'buy' list for this week - probably more
for 'swing' than daytrading - might want to watch for initial pullback, or enter now
and accept a bit of pullback... list results from starting with Elliott Wave forecast,
then screening with three successive templates on daily plus the last one on
weekly... APD DE DOV IGEN LYO SHPGY

[7/21/2003 12:06:25 AM] [arch] Jump is too new a trader. he should be walking but he is trying to run. real money in the education process. I don't envy him
[7/21/2003 12:07:12 AM] [bmweyrauch] I understand from another TCNetter who has known FW for years that he is quite a fellow. I am glad you got to go...but a little jealous :)
[7/21/2003 12:07:41 AM] [bmweyrauch] Wife was very happy with the Lipperzanners though :8
[7/21/2003 12:07:51 AM] [arch] i think you were obligated to keep your promises

[7/21/2003 12:08:43 AM] [bmweyrauch] remarkable show...catch it if you can....rather different and quite entertaining

[7/21/2003 12:10:12 AM] [bmweyrauch] thanks arch for the heads up...will keep eye out for them
[7/21/2003 12:16:45 AM] [tsweet] did anyone go to the FW seminar in Seattle??
[7/21/2003 12:18:06 AM] [tsweet] arch how was the Seattle seminar?
[7/21/2003 12:18:34 AM] [arch] I thought it was very good.
[7/21/2003 12:19:40 AM] [arch] It gave me some insight when to add to positions and when to take cover. I do well on lthe buy side but sometimes miss a good place to sell
[7/21/2003 12:19:43 AM] [tsweet] sounds good ..did you meet anyone from the area?
[7/21/2003 12:20:39 AM] [arch] sure but some late cancellations. there were only 5 of us there.

[7/21/2003 12:28:16 AM] [tsweet] hello? ...

[7/21/2003 12:28:26 AM] [JerryA] anyone know if the NR7 works on 2day charts. AVII has a doji NR7 with less than usual volume on 2day chart...ready to explode to the upside here? :)

[7/21/2003 12:29:05 AM] [Traderabe] Yes Jerry we are all waiting ...lol

[7/21/2003 12:29:33 AM] [JerryA] Abe...you already in those positions or are those for Monday?

[7/21/2003 12:29:37 AM] [fran] Think Oz has said it does

[7/21/2003 12:29:41 AM] [JerryA] Oil sector stuff

[7/21/2003 12:31:30 AM] [JerryA] nice positions ABE...you should do great on those!

[7/21/2003 12:54:29 AM] [JerryA] Gn Abe

[7/21/2003 1:09:28 AM] [AlanD] .

[7/21/2003 1:10:11 AM] [ChartMonkey] hey alan - thoughts on mkt direction for this week?

[7/21/2003 1:11:14 AM] [ChartMonkey] and more specifically does FCN look less promising as a short to you after friday's action

[7/21/2003 1:12:38 AM] [AlanD] Up early in the week with weakness prevailing and a downward bias into the end of the week. Flat at best. This is in general on the markets. Particular sectors such as oils and may Internets at first will show some strength. My two cents anyway

[7/21/2003 1:13:47 AM] [AlanD] FCN has a descent pattern but you'll have to look at the sector performance into the week to see how it fairs out. Volume is ok but not great.

[7/21/2003 1:15:49 AM] [ChartMonkey] yeah volume was up friday in FCN vs. down on indices, and it did gap up, but yeah not a powerful move - just makes it a little more ambiguous as a short than it was on thursday to my eyeballs

[7/21/2003 1:16:21 AM] [w2jc] wow... the short interest on REV is listed as 156.85 !!!! should fly like a rocket on a short squeeze :)

[7/21/2003 1:16:39 AM] [AlanD] Quite a few stocks coming up as CMO buys. CMO for me as the greatest reliabiity for finding short to intermediate lows on specific stocks. Funny but the list consists of alot of utility and energy stocks.

[7/21/2003 1:17:25 AM] [ChartMonkey] CMO = ?

[7/21/2003 1:17:30 AM] [AlanD] REV? I don't do makeup. LOL

[7/21/2003 1:17:45 AM] [AlanD] CMO = Chaiking Momentum Oscillator.

[7/21/2003 1:17:51 AM] [ChartMonkey] thanks

[7/21/2003 1:18:05 AM] [AlanD] I have a scan in WLD that has a really good track record.

[7/21/2003 1:18:39 AM] [ChartMonkey] WLD scan is for CMO buys?

[7/21/2003 1:19:37 AM] [AlanD] Here's a list of CMO buys for tomorrow; XEL WMB TRLY SO SGP RD PGN IVX GP GE FWC FRX XOM EXC ETR DUK DTE ED CAG AFCEE

[7/21/2003 1:20:26 AM] [AlanD] These are not absolutes as nothing is. Just add them to your watchlist. A week or two from now look at the performance and you'll see what I mean.

[7/21/2003 1:20:51 AM] [AlanD] Some will still go down but short term bounces should prevail.

[7/21/2003 1:21:37 AM] [AlanD] Oh, that's Chaikin, not Chaiking.

[7/21/2003 1:22:14 AM] [ChartMonkey] it seems to me that these oil an energy stocks don't move very fast most of the time, but occassionally have very good runs. does this scan (or any other side criteria you may add) try to highlight picks w/high % reward potential?

ClubHome

[7/21/2003 1:23:33 AM] [ChartMonkey] similarly w/bank/REIT/mortgage stocks - a snore most of the time, though some of them, e.g. DRL are just a long steady chug upwards

[7/21/2003 1:23:52 AM] [AlanD] If you are referring to beta, it does not scan for high beta stocks, I have to do that on my own as an additional scan. The tickers I just gave were not filtered for beta.

[7/21/2003 1:24:35 AM] [Stitch] hi Alan

[7/21/2003 1:25:13 AM] [AlanD] Hello Stitch. CM add OSIS to that list.

[7/21/2003 1:26:20 AM] [ChartMonkey] well - that's the thing though ... many of these cyclicals may be low beta (actually i'm not sure what the "standard" time period is for computing beta)

[7/21/2003 1:26:45 AM] [ChartMonkey] ... but, they occassionally have a very good run, then go right back to sleep

[7/21/2003 1:27:10 AM] [AlanD] Well its possible that if the market heads south that it could take many on those list through support to a lower level. Just the way things are sometimes.

[7/21/2003 1:27:29 AM] [Stitch] Alan, do you think there is a macroeconomic reason for the sector rotation to cyclicals/energy or just technical bounce?

[7/21/2003 1:28:06 AM] [Stitch] cat de

[7/21/2003 1:28:52 AM] [AlanD] I haven't studied the sector movement recently so I don't know why we are starting to see a rotation now. I'm sure the talking heads will put some spin on it to get money piling in. I'm sure techicals have something to do with it though.

[7/21/2003 1:29:45 AM] [AlanD] .

[7/21/2003 1:30:34 AM] [Stitch] amazing, it's the first time I really see the money flow clearly

[7/21/2003 1:30:59 AM] [AlanD] Really, what is it thats making you see it?

[7/21/2003 1:31:00 AM] [Stitch] I used to hear sector rotation mentioned, but was over my head

[7/21/2003 1:31:32 AM] [Stitch] well, hotto pointed it out technically on Sat. class, but he didn't give a reason

[7/21/2003 1:31:46 AM] [AlanD] If you can catch the sector rotations just right, you can do pretty well with it.

[7/21/2003 1:32:46 AM] [Stitch] he just pointed out the rotation out of tech into chemicals, oil service, and heavy equipment machinery

[7/21/2003 1:34:22 AM] [AlanD] Easiest way to find out where the money is going in terms of specific sectors is just to look at sector charts and analyze those. From there you can decide if you want to go long or short on specific stocks within those sectors. Technical analysis tends to be a little more reliable when analyzing the sector first then the individual stock.

[7/21/2003 1:35:01 AM] [Stitch] some of DOW stocks like CAT, IP, XOM, hon

[7/21/2003 1:35:31 AM] [Stitch] definitely

[7/21/2003 1:38:01 AM] [AlanD] Well time for me to run. Happy hunting in the morning.

[7/21/2003 1:39:49 AM] [AlanD] Oh, keep an eye on FMX. Sitting on 38.2% retracement from March low.

[7/21/2003 1:40:54 AM] [ChartMonkey] you think recent higher volume is a purge that will be retraced or a breakdown that will lead to more weakness ?

[7/21/2003 1:43:08 AM] [AlanD] The millionaire dollar question. Thats where other things must come into play, ADV/DEC lines, Elliottwave and so forth. Insider selling has been heavy the last few weeks. EWA is saying a wave 5 was recently completed with a retracement now due. Guess we'll have to just take a swag with

[7/21/2003 3:29:36 PM] [Thecook] This goes against the rotation to cyclicals, but many semi's pulling back on consistent lower volume to breakout support points.

[7/21/2003 3:47:10 PM] [Sully] :D
[7/21/2003 3:48:39 PM] [cpratsch] Sully, ASKJ was at 17.85, so pick this as "target".If it goes through, we call it "break out". If it stops before, we define resistance levels. Frankly, nobody knows
[7/21/2003 3:48:56 PM] [Sully] Thx

[7/21/2003 4:13:50 PM] [hotto] thanks Chuck

[7/21/2003 4:17:49 PM] [mace] hotto, you just add at 9.57 or holding from prior buy on Friday? thanks

[7/21/2003 4:23:22 PM] [Rjl] Gold Index,HUI, up 3.65% on the day.

[7/21/2003 4:32:45 PM] [really] hotto -Earlier I asked if you got out of REDF at the pop-up at the beginning of the day. You replied "still long reasons later". Would be interested in your reasoning. thanks

[7/21/2003 4:38:52 PM] [josiel] .

[7/21/2003 4:44:16 PM] [josiel] Hi Hotto also like to hear your reasoning, thanks

[7/21/2003 4:46:45 PM] [Sully] test

[7/21/2003 4:47:03 PM] [hotto] REDF.. 1. I did Not Sell early.. I kept my posn all day...

[7/21/2003 4:48:40 PM] [hotto] REDF.. Friday was an Inside day.. closed just Over the Fib.500 line.. so.. Was poised to move higher today..

ClubHome

[7/21/2003 4:48:44 PM] [Sully] Hotto if you have a minute your take on ASKJ, I am holding o/n your comments please

[7/21/2003 4:49:05 PM] [Grinder] Really & Josiel re REDF check chat log @ 12:29 re FIB success then later @ 1:11 re REDF FIB target of 7.74. However I may be wrong and if so Hotto will set you straight.

[7/21/2003 4:51:03 PM] [Sully] The reason I'm asking is that I have to go out of town tomorrow, and will only have about 2 hrs. to trade in the morning and will not be able to trade rest of week

[7/21/2003 4:51:07 PM] [hotto] REDF.. since Friday was an Inside day... And.. moved Over Friday's HOD.. today.. then today was "First day up"... in harmony with the 2 Internet catalysts later this week.. SINA earns Wed. EBAY earns Thursday.

[7/21/2003 4:53:36 PM] [hotto] REDF.. I expect it to go to 7.74.. or Fib.236=8.82.. as others have done..

[7/21/2003 4:57:00 PM] [Sully] test

[7/21/2003 4:57:06 PM] [hotto] ASKJ.. Sully.. I think you will get a chance to sell tomorrow near today's HOD=15.60.. up to the 16.19 level. My guess is . you will get your opp. in 1st hour tomorrow. maybe in 1st 15 min.

[7/21/2003 4:57:54 PM] [Sully] GREAT Thanks a million hotto

[7/21/2003 4:57:57 PM] [hotto] ASKJ.. today.. volume was fair.. for another Summer Monday..

[7/21/2003 4:58:00 PM] [odysseytrader] Hotto, what were your targets on IJJI for the week?

[7/21/2003 4:58:51 PM] [hotto] ASKJ.. AND.. it closed UP.. and over ma20.. and over Friday's HOD]. pretty strong... for such a weak overall day..

[7/21/2003 4:59:26 PM] [hotto] Sellers should hesitate tomorrow morning.. giving stock a chance to pop up...

[7/21/2003 5:00:15 PM] [hotto] IF you see it moving up.. I recommend.. you sell at the 10 -12 minute point.. into the Rally.. (assuming 1st hour)

[7/21/2003 5:00:55 PM] [hotto] I would take what the mkt bids.. at that point.

[7/21/2003 5:01:05 PM] [Sully] Thanks hotto owe you one

[7/21/2003 5:01:21 PM] [hotto] only if it works out..)

[7/21/2003 5:01:28 PM] [really] Hotto - regarding REDF, So you didn't consider \$7.45 at 9:55am as close enough regarding hitting the FIB .5 target of \$7.74 ? thanks for your help.

[7/21/2003 5:01:30 PM] [hotto] good luck..

[7/21/2003 5:01:41 PM] [Sully] I really appreciate your help;)

[7/21/2003 5:02:28 PM] [hotto] REDF.. correct.. .29.. was NOT close enough.. I think it will do better.. Note how IJJI.. has "worked the FIB levels"..

[7/21/2003 5:02:48 PM] [hotto] Don HAYes... on CNBC... a Good one..

[7/21/2003 5:06:24 PM] [hotto] and.. good charts...

[7/21/2003 5:06:58 PM] [hotto] Another NatGas story.. coming up on CNBC

[7/21/2003 5:07:17 PM] [really] The difference between REDF and IJJI , to me is that the up volume on IJJI was much more powerful on Friday compared to the previous down days therefore I interrupted that as IJJI having more momentum today than REDF when comparing the volume on Friday

[7/21/2003 5:08:01 PM] [Nance] was he just on? or is he in next segment?

[7/21/2003 5:08:59 PM] [hotto] I agree with that.. not everything is perfect.. but.. it rarely is.. REDF volume was ok today.. and.. stock did not yet hit any targets.. (go with inertia...when I can..)

[7/21/2003 5:11:24 PM] [MasterC] Hi Hotto, Good earnings momentum and good charts! says CNBC. I remember hotto saying it as well in the chats before CNBC

ClubHome

said it. :)

[7/21/2003 5:12:14 PM] [hotto] REDF .. since it closed Over 7. and GReen.. it is now in position.. to move to 7.60 tomorrow early.. We get a chance to see how well it does it .. before Noon ET tomorrow... no need counting myself out of a stock that is doing what I want. So.. I stay long.. overnight.

[7/21/2003 5:12:26 PM] [MasterC] Now Natural gas demand/supply discussion on CNBC as hotto predicted.

[7/21/2003 5:13:29 PM] [hotto] ty MasterC.. Don Hayes.. also puts on us.. the responsibility.. of looking at "valuations".. and earnings momo.. Lots of work ahead..

[7/21/2003 5:13:41 PM] [MasterC] "more drilling" " foreign source for energy"

[7/21/2003 5:14:32 PM] [hotto] yes.. the NatGas.. Stories... That will keep our Oil & Gas stocks.. "in play"... at least until Thursday..

[7/21/2003 5:15:43 PM] [Sully] test

[7/21/2003 5:16:48 PM] [MasterC] Thanks for keeping us ahead of the game hotto. Yes, to earn same \$\$\$ we need to work harder next few days looks like.

[7/21/2003 5:17:26 PM] [Sully] Good night, hotto and everybody

[7/21/2003 5:17:55 PM] [Sully] and thanks for everything

[7/21/2003 5:19:02 PM] [hotto] AAC.. nice % play.. yes... looks like it will hit LR30.. about at .95 ... which is the same as 7/07 HOD = .95.. May take some news to push it through .95

[7/21/2003 5:19:19 PM] [cyberact] Techs are flying after hores...nvls/altr/txn/q's

[7/21/2003 5:19:34 PM] [cyberact] hours

[7/21/2003 5:23:17 PM] [hotto] Joe.. LR30 seems to work on some stocks.. and not others.. I noticed.. on AAC.. it appears LR30 acted as support on 7/1 and 7/3.... so.. Traders may use it again here.. at .95.. AAC will already have a nice % gain.

[7/21/2003 5:25:48 PM] [hotto] OIH.. SII..etc.. note.. again.. how similarly these move.. to the CEs.. in April.. In the deep-cycals.. you see these moves again and again.. over the years... look at the charts...

[7/21/2003 5:27:00 PM] [root] was thinking these pullback as a buying opportunity.

[7/21/2003 5:27:17 PM] [hotto] ie.. When they Rally off IT Lows.. (like ma200).. after a big decline.. then you get a big advance day. on big volume... followed by a dip next day (today).. on lower vol...

[7/21/2003 5:27:22 PM] [hotto] :)

[7/21/2003 5:29:04 PM] [hotto] THen.. I look for a down day.. (today.) followed by a slightly lower price.. early tomorro.. (of course.. it could drop to the Open of the big candle).. but.. often.. ma10 or ema200 or.. LR30.. will provide the Bounce point..

[7/21/2003 5:30:13 PM] [hotto] so.. for me.. I will be "camped out".. early tomorrow.. (we get BJS Earns in am.).. for an early dip in OIH.. or others.. then.. Dive in.. (me..that is..)

[7/21/2003 5:31:24 PM] [hotto] I will pay attn to the BJS earns.. and comments.. of course.. If some surprise comes out... Then.. I will try to adjust my plan.

[7/21/2003 5:34:02 PM] [hotto] 17:10 ET INTL Inter-Tel beats by \$0.07; increases Quarterly Dividend (22.05 -0.25)

[7/21/2003 5:34:11 PM] [hotto] wow! INTL

[7/21/2003 5:34:41 PM] [Chapmaster] INTL still has a pretty big short interest

[7/21/2003 5:38:30 PM] [kmack] APA chart seems to have MA band support on daily...down .03 wasn't too bad today IMO

[7/21/2003 5:40:42 PM] [hotto] APA.. I agree.. gave up almost nothing.. after a strong Friday..

[7/21/2003 5:43:01 PM] [hotto] INTL.. I wrote some of the November 2002 OBV chats.. around some INTL trades from last year.. It was such a great Trader in 2002..

[7/21/2003 5:45:19 PM] [Oregongeordie] j

[7/21/2003 5:45:37 PM] [Oregongeordie] Oops. sorry

[7/21/2003 5:50:51 PM] [hotto] INTL - Long.. should be a monster open tomorrow.

[7/21/2003 5:51:24 PM] [hotto] SPY SMH - still short.. both

[7/21/2003 5:53:38 PM] [IanH] Hotto what level do you see SMH falling to the 200 ma?

[7/21/2003 5:54:18 PM] [hotto] CHINA 13.08 -.32.. could not stay green..

[7/21/2003 5:56:03 PM] [hotto] SMH.. see 30.20.. then.. watch Volume// OBV.. ma50 may bounce it next..

[7/21/2003 5:56:21 PM] [IanH] Thank you

[7/21/2003 5:56:53 PM] [odysseytrader] hotto, did you just buy INTL now? thanks

[7/21/2003 5:57:40 PM] [hotto] SMH.. may drop harder ... but.. it seems like it wants to hold on.. Even Today.. did not drop down to test ma20..

[7/21/2003 5:59:09 PM] [ws128] hotto - do you reco buying INTL now? I am not clear - current price approx. \$24

[7/21/2003 6:01:26 PM] [hotto] Yes.. I paid about 24 for INTL.. terrific Earnings report.

[7/21/2003 6:04:35 PM] [hotto] INTL.. that report.. seems worthy of a test of NH52 for INTL.. about 29.. may take a few days..fine.

[7/21/2003 6:05:50 PM] [w2jc] hotto - fair warning, i just bought some INTL, which may totally screw up your plans :o

[7/21/2003 6:05:57 PM] [hotto] IJJI 8.80 +.25 from close.. ok so far..

[7/21/2003 6:06:18 PM] [hotto] w2.. thanks for the warning.. Guess I better sell...

[7/21/2003 6:06:25 PM] [hotto] :D:D

[7/21/2003 6:06:53 PM] [w2jc] you'll see ... i warned you ;)

[7/21/2003 6:07:20 PM] [hotto] it will be fine..;)

[7/21/2003 6:07:34 PM] [w2jc] of course, now you can put in a buy at 19 !!

[7/21/2003 6:08:30 PM] [hotto] hahaha. that would be a waste.

[7/21/2003 6:09:05 PM] [hotto] SINA.. What a Great Day for Hotto Club... in SINA..;)

[7/21/2003 6:09:51 PM] [hotto] We got our Opening dip.. Because of early panic.. then.. a beautiful 2 pt + rally...

[7/21/2003 6:10:02 PM] [wildbill] i see the "hotto club" is still going STRONG!!!!!!- how is everyone?

[7/21/2003 6:10:09 PM] [hotto] Then another dip.. and.. another Rally... Wow!

[7/21/2003 6:10:33 PM] [hotto] hi wb!..long time !

[7/21/2003 6:12:05 PM] [ErikHoyer] Hope you realize that Intel is INTC, not INTL.

[7/21/2003 6:12:11 PM] [hotto] SINA.. we may get another dip entry tomorrow mornig..

[7/21/2003 6:12:12 PM] [wildbill] wanted to paly all the asian internets today but their Swings just toooo wide for R/R not good i think 4 of them came up on my initial plays last night:(

[7/21/2003 6:12:27 PM] [hotto] I am using INTL..= "Inter-Tel"

[7/21/2003 6:12:58 PM] [ErikHoyer] O.K...just checking.

[7/21/2003 6:13:33 PM] [hotto] INTL.. is one of my "super-stocks" from 2002.. many trades. ALL profitable.. what a Horse.

[7/21/2003 6:13:47 PM] [ErikHoyer] INTL closed at near 22, not 24 (INTC).

[7/21/2003 6:14:27 PM] [w2jc] erik - intl is selling for 24 in after market tonight

[7/21/2003 6:15:08 PM] [hotto] INTL closed near 22.. then Reported EArns Beat

ClubHome

by .07 and Big Revs.. AND doubled Dividend..

[7/21/2003 6:16:01 PM] [tinaSDtrader] hotto - did you hold SINA all day or trade in/out on intraday time frame? Did you own it from Friday?

[7/21/2003 6:16:02 PM] [ErikHoyer] Thanks for clarification!

[7/21/2003 6:16:07 PM] [hotto] I bot INTL after the report about 24.. I was a Seller last November at 28.75

[7/21/2003 6:16:58 PM] [wildbill] i believe it was "daer" and his bones that initially "alerted " us to INTL LOL

[7/21/2003 6:17:01 PM] [hotto] SINA.. came into today flat.. Went Long on the early dip... about 28.. Sold about 29.60.. Bot back on 2nd dip to re-test lows..

[7/21/2003 6:17:15 PM] [tinaSDtrader] on 5-mins?

[7/21/2003 6:17:27 PM] [hotto] sold again.. on late bounce... since it was closing Red...

[7/21/2003 6:17:34 PM] [Chapmaster] hi Hotto ... ALKS NR7 on decreasing vol

[7/21/2003 6:17:59 PM] [hotto] I can make a case for a down morning.. .so will be waiting.

[7/21/2003 6:18:25 PM] [tinaSDtrader] I didn't hold SINA o/n, figured w/Barrons touting it in a bubble and earnings due Wed, I'd stick w/intraday trades on it.

[7/21/2003 6:18:53 PM] [hotto] I read the Barrons story 2 times... I got it Correct.

[7/21/2003 6:19:23 PM] [tinaSDtrader] then briefing mentioned it - figured the dip today was from Barrons, maybe another dip tomorrow from late briefing readers - we'll see

[7/21/2003 6:19:35 PM] [ErikHoyer] Tina, Hotto had to be swing trading SINA. Stock too illiquid to day trade...only 150,000 shares and spreads would be too wide...look at 5 min. chart.

[7/21/2003 6:19:38 PM] [hotto] AND... the "overvaluation" in SOHU.. and SINA... were already discounted in the charts.. last 2 weeks... From THESE levels..

[7/21/2003 6:20:17 PM] [hotto] So.. today.. was just a "re-run" even though Barrons.. Briefing... CNBC.. and Several TCNet traders.. were All nervous

[7/21/2003 6:20:48 PM] [tinaSDtrader] Erikh - not sure what you're saying, I believe SINA traded over 11million shares today.

[7/21/2003 6:20:52 PM] [wildbill] tina here does not know the power of the "bones" -- whole different T/A game than she is used to imo

[7/21/2003 6:20:52 PM] [hotto] It was just the SAME news as last week.. with 1 caveat..

[7/21/2003 6:21:23 PM] [hotto] Barrons cited 1 anaylst...the ONLY one who has been Long since last winter... in the Asians...

[7/21/2003 6:21:54 PM] [hotto] THat analyst said.. they are NOT yet Ovrpriced.. considering the Growth "PEG" ratio

[7/21/2003 6:22:18 PM] [wildbill] agree with Erik ... is why I did not use the aians today- "they" can swing these so wildly that an entry at the open would be a "crapshoot" form my perspective

[7/21/2003 6:22:19 PM] [hotto] AND... the PEG... valuation is only 1/3 as High as AMZN

[7/21/2003 6:22:53 PM] [tinaSDtrader] but I don't see a liquidity issue with SINA, CHINA etc.

[7/21/2003 6:23:04 PM] [hotto] ANd I am the Old one.. here.. goodness..

[7/21/2003 6:23:09 PM] [ErikHoyer] Tina, Go to the Daily chart and add 2 zeros and you get 145,800 shares traded today.

[7/21/2003 6:23:11 PM] [hotto] THINK

[7/21/2003 6:23:35 PM] [tinaSDtrader] also, not referring to an entry right at the open - referring to letting the open play out and catching a pullback after

[7/21/2003 6:23:56 PM] [wildbill] not liquidity - just "nionsensical" stop running for the most part - fun to watch- dangerous to play imo

[7/21/2003 6:24:10 PM] [tinaSDtrader] ErikH - I am adding two zeros to the daily on SINA and I get 11million, many times traded 150k during a 5-min period - hotto - am I wrong on this?

[7/21/2003 6:24:23 PM] [ken2k] SINA looks like 11 mil on my chart

[7/21/2003 6:24:39 PM] [tinaSDtrader] yes - 11 million - far cry from 150k on the day

[7/21/2003 6:25:10 PM] [wildbill] yes I know tina was just referring to the asians coming up on my initial research last night for MY plays at the open

[7/21/2003 6:25:38 PM] [hotto] We had Hourly charts form last week.. AND FIB numbers...

[7/21/2003 6:25:48 PM] [tinaSDtrader] I rarely chase something right at the open, let the first 10-15 shake out.

[7/21/2003 6:26:05 PM] [hotto] AND.. history of Last Reaction to Analyst "sells"

[7/21/2003 6:26:17 PM] [wildbill] chase????? ----- you are joking right LOL

[7/21/2003 6:26:29 PM] [ErikHoyer] The bar volume on my daily chart for INTL is 1458...now 1460 = 146,000 Shares. Where do you get 11 Million???

[7/21/2003 6:26:44 PM] [kmack] SINA

[7/21/2003 6:26:48 PM] [tinaSDtrader] We're not talking about INTL, thought you said SINA??

[7/21/2003 6:27:15 PM] [hotto] I am Now talking to tina about SINA..

[7/21/2003 6:27:26 PM] [tinaSDtrader] Look back on your note Erik, you typed SINA not INTL

[7/21/2003 6:28:11 PM] [ErikHoyer] Sorry...thought you were talking about INTL....SINA is 11,042,800.

[7/21/2003 6:28:43 PM] [hotto] INTL 24.60..)

[7/21/2003 6:29:00 PM] [tinaSDtrader] go INTL go - I'm in with ya hotto!

[7/21/2003 6:30:37 PM] [hotto] that was taken.. Now... 24.50 x 24.90..

[7/21/2003 6:30:38 PM] [ErikHoyer] My goof!! INTL, not SINA was in reference to my comments. Time to go...see you later.

[7/21/2003 6:30:51 PM] [hotto] bye Erik...

[7/21/2003 6:31:09 PM] [tinaSDtrader] no prob - just thought I was going crazy - not a long way to go

[7/21/2003 6:35:16 PM] [hotto] BRL 64.00 +4.70..nice bonus.. for just "stopping talks" on merger..

[7/21/2003 6:36:19 PM] [hotto] GALN 37 - 8.63.. (the other guy..)

[7/21/2003 6:38:38 PM] [kmack] nice island reversal on GALN

[7/21/2003 6:38:41 PM] [hotto] which thing ?

[7/21/2003 6:38:57 PM] [kmack] what is your review approach?

[7/21/2003 6:39:02 PM] [kmack] AH?

[7/21/2003 6:39:07 PM] [hotto] just a Merger story last week.. Ended today.. for GALN

[7/21/2003 6:41:02 PM] [hotto] the GALN short.. I should have caught some of that today..
[7/21/2003 6:41:10 PM] [kmack] you know your OBV sure signaled the path for QCOM
[7/21/2003 6:41:39 PM] [hotto] yeah.. OBV has helped on several recently...
[7/21/2003 6:43:09 PM] [hotto] OBV helped my with my SPY shorts recently..
[7/21/2003 6:43:09 PM] [kmack] have you looked at the manufacturing/Industrial Electrical Equipment WL?
[7/21/2003 6:44:01 PM] [hotto] yes.. looked at way too many stocks over the weekend..

[7/21/2003 6:55:33 PM] [tinaSDtrader] hotto - I know you put out many picks each day/week - but do you just watch a few key ones each day, or do you set alerts or scan watchlists of all your picks daily?
[7/21/2003 6:57:12 PM] [hotto] I only watch some of them during the day..
[7/21/2003 6:57:37 PM] [hotto] TThen.. look again.. when asked.

[7/21/2003 7:00:23 PM] [hotto] yes..

[7/21/2003 7:01:02 PM] [tinaSDtrader] Sometimes hard to narrow down if lots of good ones - what a terrible problem to have.

[7/21/2003 7:01:38 PM] [hotto] I decided to play the Oils / Svc... like a new IT Rally in the group...

[7/21/2003 7:02:13 PM] [hotto] so.. I now have some new Swing Trades.. I don't watch them too closely...

[7/21/2003 7:02:14 PM] [SeattleSteve] Interesting analogy. What are the implications?

[7/21/2003 7:02:44 PM] [hotto] hi Steve.. on the Oils ? thing ?

[7/21/2003 7:02:50 PM] [tinaSDtrader] do you use hard stops, alerts, or just keep an eye on them?

[7/21/2003 7:02:58 PM] [tinaSDtrader] your swings that is

[7/21/2003 7:03:48 PM] [hotto] seldom use hard stops on Swing trades.. like these.. I will know soon enough.. if my Theory is wrong.

[7/21/2003 7:03:54 PM] [SeattleSteve] Yes, and you answered the question -- just as I was asking it. Makes a lot of sense to me.

[7/21/2003 7:04:20 PM] [SeattleSteve] Yes, we will know soon enough if it is not a rally in oil/gas stocks

[7/21/2003 7:04:30 PM] [tinaSDtrader] do you have a % or \$ amt you won't let it go, or a technical pt - then pull the sell trigger?

[7/21/2003 7:04:37 PM] [hotto] Whenever I can commit to a swing Trade within.. a new IT Rally...

[7/21/2003 7:04:55 PM] [hotto] It multiplies my results / effort.

[7/21/2003 7:05:12 PM] [tinaSDtrader] I see why - IT you mean intermed term

[7/21/2003 7:05:32 PM] [hotto] yes..)

[7/21/2003 7:05:49 PM] [hotto] I know it bothers you.. sorry.

[7/21/2003 7:05:52 PM] [SeattleSteve] Well, trying to scalp the oil and gas stocks today would have been difficult. We should see tomorrow whether they really are rallying

[7/21/2003 7:06:46 PM] [tinaSDtrader] not at all - used to think you were referring to "the IT rally" but now realize you may be referring to inter term:8

[7/21/2003 7:07:38 PM] [hotto] The PBs. today.. were... in line with norms.. Esp.. OIH.. note how high up Friday's candle.. today's PB halted...

[7/21/2003 7:08:20 PM] [hotto] "the IT Rally".. == " the Intermediate Term Rally" ...:8

[7/21/2003 7:08:22 PM] [tinaSDtrader] nice bounce of bottom BB on OIH

[7/21/2003 7:09:03 PM] [hotto] As I ground into everyone back in April.

[7/21/2003 7:09:34 PM] [tinaSDtrader] Originally thought you meant Internet Technology - go figure

[7/21/2003 7:09:51 PM] [cpratsch] short stochastics turn down on OIH, bad sign for me

[7/21/2003 7:10:22 PM] [tinaSDtrader] been so enjoying those internet stocks - mind got clouded!!

[7/21/2003 7:10:31 PM] [hotto] oh.. i see.. I expected IT would mean "Information Tech" to many.. like I was in for years...

[7/21/2003 7:11:21 PM] [tinaSDtrader] yes - Info Technology, or Internet - mostly Info Tech I've heard people refer to as IT

[7/21/2003 7:11:22 PM] [SeattleSteve] OSX--X turned back right at its 200 MA on the hourly chart this morning.

[7/21/2003 7:11:24 PM] [hotto] STOCHs.. may be right or wrong... at IT Turns.. they will be "wrong" for a while...

[7/21/2003 7:12:04 PM] [tinaSDtrader] scratch - what's your short stochastics setting? I use 12-3-3 or 5-3-3

[7/21/2003 7:12:16 PM] [SeattleSteve] OSX--X is still above its 15 day MA, and like OIH, is still way up Friday's candlestick

[7/21/2003 7:12:29 PM] [tinaSDtrader] Sometimes a 14-5-5, but been favoring the others lately

[7/21/2003 7:13:07 PM] [hotto] just have to decide what to depend on... and go with it...

[7/21/2003 7:13:14 PM] [cpratsch] well now, stochs are never wrong, sometimes price goes up inspite of stoch going down. When you use stochastics 2.2 they go with candles, and candles dip in all oil stocks I can see tonight

[7/21/2003 7:13:46 PM] [hotto] good for you cpr.

[7/21/2003 7:14:05 PM] [cpratsch] right, thanx

[7/21/2003 7:16:36 PM] [tinaSDtrader] women are never wrong either - nice we have that in common with stochasticsB)

[7/21/2003 7:17:40 PM] [cpratsch] well what I meant was the term. The stochastic value is always right since it is a mathematical formula. Its relation to price move is not always straight in line with price

[7/21/2003 7:18:47 PM] [cpratsch] tocheck stochastics meaning I plot 6 different values from 2 to 5,14,21,30, 41 in one window. This will teach you!

[7/21/2003 7:19:41 PM] [tinaSDtrader] different color each line I presume

[7/21/2003 7:20:08 PM] [cpratsch] yes, with the moving average (third number) in black, so it is gone

[7/21/2003 7:20:51 PM] [cpratsch] want to see it?

[7/21/2003 7:20:57 PM] [tinaSDtrader] sure

[7/21/2003 7:21:52 PM] [tinaSDtrader] WOW. that is a rainbow if ever saw one.

[7/21/2003 7:22:12 PM] [cpratsch] XOM is typical for oil stocks. Short turn-down, middle rising, long still down but ready to rise in ??2-3 days

[7/21/2003 7:22:40 PM] [hotto] re.. OIH.. I gave this on Friday..

[7/21/2003 7:22:54 PM] [hotto] [7/18/2003 9:54:53 AM] [hotto] OIH rec'd Long yesterday.. at "daily BO".. 57.58... Targets 60.50.. and 6

[7/21/2003 7:23:09 PM] [cpratsch] the long (blue, stoc30.4) is what hotto means with rally. The short (yellow) is the short that turns down tomorrow

[7/21/2003 7:23:22 PM] [tinaSDtrader] scratch - how do you read your MACD histogram? Crossing midline, rising?

[7/21/2003 7:23:40 PM] [tinaSDtrader] I also prefer the histogram

[7/21/2003 7:23:43 PM] [hotto] this morning.. I sold when it crossed 60.20... and stalled... then reported Immedieately.

[7/21/2003 7:24:11 PM] [cpratsch] as long as MACD is over mid-line hold. When below mid-line long-term danger

[7/21/2003 7:24:52 PM] [tinaSDtrader] Depending on the setting, the dips coincide w/the pullbacks

[7/21/2003 7:25:06 PM] [cpratsch] so XOM looks weak long-term, and stoc30.4 (blue) is on bottom

[7/21/2003 7:25:19 PM] [tinaSDtrader] sometimes bars even dip below the midline a bit if a deep pullback

[7/21/2003 7:26:12 PM] [cpratsch] I live with theories of www.clearstation.com

[7/21/2003 7:26:39 PM] [cpratsch] they are good. He uses stoch 5.3.3 and MAZCd 12-26-8

[7/21/2003 7:26:49 PM] [cpratsch] MACD

[7/21/2003 7:27:11 PM] [cpratsch] my middle window has clearstation set-up
[7/21/2003 7:27:29 PM] [tinaSDtrader] When I test I experiment w/diff settings, find out which ones seem to be most robust
[7/21/2003 7:27:37 PM] [cpratsch] You see MACd for XOM is below mid-line, danger
[7/21/2003 7:28:11 PM] [tinaSDtrader] Ever use Wilder's Relative Strength Index (RSI)
[7/21/2003 7:28:25 PM] [cpratsch] XOI is in long-term danger too.MAs dip, MACd below mid-line
[7/21/2003 7:28:58 PM] [cpratsch] RSI is great too, I use 9.3 and check position to 50 (mid-line)
[7/21/2003 7:29:57 PM] [cpratsch] TC2000 had RSI screw up lately, PCFs in simpe, chart in exponential. I argued often, they seemed to have corrected
[7/21/2003 7:30:23 PM] [tinaSDtrader] I use a 14.1 and also observe midline - but have to put up TSV and make it invisible to leave a midline behind. Otherwise only obought/osold lines.
[7/21/2003 7:30:43 PM] [tinaSDtrader] unless have MACD same window - it has midline
[7/21/2003 7:31:01 PM] [cpratsch] RSI is too long for me. I use 9.3 and 5.3
[7/21/2003 7:32:15 PM] [tinaSDtrader] Tough call - faster is more likely to curve fit, slower is often late - meet somewhere in the middle
[7/21/2003 7:33:04 PM] [cpratsch] checked this for years, also with funds. RSI 9.3 is ideal for me, 5.3 better when market is holrizontal.5.3 is fast
[7/21/2003 7:34:01 PM] [tinaSDtrader] The .3 will smooth it out more -it's my understanding the RSI plot is actually a moving average of RSI - so .3 is a 3-per MA of RSI. Choosing 1-per is same as actually seeing the first # - if that makes sense
[7/21/2003 7:35:14 PM] [tinaSDtrader] Fun experiment - try putting up a 9.1 and a 9.3 in same window - 9.3 should be a smother line.
[7/21/2003 7:35:55 PM] [tinaSDtrader] So if want to incorporate more of the ebbs & flows, the .1 will do it - .3 takes out more of the noise
[7/21/2003 7:36:02 PM] [cpratsch] yes, the irst number is the time segemnt checked, the second number is an interior moving average, the third is my moving average of the RSi signal.9.3.3=9 bars, 3 interior smoothing MA, 3 Ma of signal 9.3
[7/21/2003 7:37:16 PM] [tinaSDtrader] I don't see option in TC for 3 settings - do you use another software for that?
[7/21/2003 7:38:51 PM] [cpratsch] no.the two first numbers9 and 3 are the TC2000 signal. the third number (3) is the moving average of the signal, the second line one plots
[7/21/2003 7:39:22 PM] [cpratsch] RSI 9.3.3=RSi signal 9.3 with MA3
[7/21/2003 7:39:27 PM] [tinaSDtrader] got it
[7/21/2003 7:40:11 PM] [tinaSDtrader] haven't seen too many hotto-ans referring to MACD or RSI - love them both but apparently not as common as others
[7/21/2003 7:40:31 PM] [cpratsch] when you develop a new PCF the program asks for tow numbers- 9 and 3-as time segemnt checked and as interior MA. The third number one adds when one plots the thing
[7/21/2003 7:41:20 PM] [tinaSDtrader] yeah - have to make sure with RSI put both numbers in the code, i.e. 9.3, and then if mean yesterday, 9.3.1
[7/21/2003 7:41:22 PM] [cpratsch] hooto-ans seem to work on predicted price levels, not with indicators.Chacun a son gout.
[7/21/2003 7:42:06 PM] [tinaSDtrader] I like price levels too - use them along with

[7/21/2003 9:14:08 PM] [AlanD] Seeing the break below yesterday's low invalidated to pattern based on my style of trading. Not to say that it can't rebound especially if there is a broader rebound tomorrow but looks like it wants to break support. If so, it could make a good short.

[7/21/2003 10:29:44 PM] [StopUser] Hey, dRb...notice your question re: JILL. Coincidentally, I have a freebee email that I get from Pristine.com - the have JILL as their chart of the week. They say it's a buy just above 14.75...good for a \$1 to \$2.25 move and they rank it as a HIGH RISK play.

[7/21/2003 10:30:31 PM] [StopUser] Pristine.com sends out a free "chart of the week" every Monday.

[7/22/2003 8:46:24 AM] [Mickaz] Hotto, Ashland Inc ASH (Oil and gas refining) came in with earnings 1.03 vs consensus 1.15. Is this a minor player with little or no effect, or can it effect the entire group?
[7/22/2003 8:47:43 AM] [Intuitive] Good Morning Abe
[7/22/2003 8:47:55 AM] [hotto] Refining.. is a separate Group .. Entirely...
[7/22/2003 8:48:08 AM] [Mickaz] Good, thanks
[7/22/2003 8:48:56 AM] [hotto] 2 years ago.. I played the Refiners.. specifically... with Oil prices Low.. and Refining capacity low.. so.. Gas prices in upper midwest were unusually high...
[7/22/2003 8:49:12 AM] [hotto] 2 of the Refiners.. had Very large Margins..
[7/22/2003 8:49:52 AM] [hotto] For Refiners.. the cost of Crude oil.. is an Input Expense...
[7/22/2003 8:50:21 AM] [hotto] so.. current High oil prices.. put a Margin squeeze on the Refiners.. and marketers..
[7/22/2003 8:50:24 AM] [kmack] AMTD beats, guides higher

[7/22/2003 12:57:13 PM] [guzman] Hi Hotto. Just want to call your attention to LLL. The fib club started shorting it in the last hour. Its up against major .382 fib resistance and confluence from 45.97 - 47.14. The downside fib target is 32.42 - 33.44. You'll find a big ole gap from '01 at 31.50 as well. Could provide many intraday shorts over the next several months.

[7/22/2003 12:57:25 PM] [MadameButterfly] hotto, are considering Asian internets later in the day?

[7/22/2003 4:11:17 PM] [hotto] SINA... The Uncertainty of the Release time.. Is ONE of the reasons I avoided SINA today...

[7/22/2003 4:12:21 PM] [hotto] the Earns may be AVAILABLE.. in Chinese.. any time tomorrow.. I got Burned on one of those 2 years ago...

[7/22/2003 4:12:22 PM] [honus99] hotto, any thoughts on UTSI? running out of steam maybe?

[7/22/2003 4:12:51 PM] [tinaSDtrader] when SINA gets going it can really moved - helps on way up, sure hurts on way down

[7/22/2003 4:12:53 PM] [hotto] UTSI.. just lump it in with the "big 3" SINA SOHU NTES...

[7/22/2003 4:13:23 PM] [hotto] UTSI had good earns.. but.. now has run up.. so.. should be ready for PB...

[7/22/2003 4:13:49 PM] [hotto] Short NTES. and maybe UTSI.. is my play for after SINA earns..

[7/22/2003 4:14:36 PM] [tinaSDtrader] how great can the earnings be on internets - if anything like ours here in US

[7/22/2003 4:14:39 PM] [honus99] thx, everytime those look done, they tack on a few more points.

[7/22/2003 4:14:47 PM] [hotto] NTES has an Extra-rich P/S valuation... due to product mix...

[7/22/2003 4:15:33 PM] [hotto] BUT... both SINA and SOHU.. have new on-line games to compete with NTES...

[7/22/2003 4:16:10 PM] [KidsandLearning] Thanks, Hotto.

[7/22/2003 4:16:28 PM] [hotto] so... as the pie gets sliced up... NTES Valuation will come down.. to SOHU...

[7/22/2003 4:16:48 PM] [hotto] that will be a 33% Stock haircut for NTES..

[7/22/2003 4:17:18 PM] [TeachMe] hotto..earlier you commented about being glad that you did not play the asian internets..I was wondering if you wud like to elaborate why

[7/22/2003 4:17:25 PM] [hotto] Besides the fact that currently they are all priced "for perfection" for about 3 years..

[7/22/2003 4:18:18 PM] [TeachMe] i think you are doing that right now?

[7/22/2003 4:18:20 PM] [hotto] Teach... 2 reasons.. 1. The FIB-Bounce rallies.. (that we played) are all used up now...

[7/22/2003 10:01:57 PM] [sisterpractical] yw

[7/22/2003 10:02:40 PM] [sisterpractical] lots of charts look really bullish tonight - until you pull back/zoom out and notice they have run up into stiff resistance and stopped there. lots of work to continue up.

[7/22/2003 10:02:40 PM] [RMRtrader] How does OBV look to you on SMH ?

[7/22/2003 10:04:02 PM] [sisterpractical] guilty of not paying much attention to OBV.

[7/22/2003 10:06:13 PM] [sisterpractical] SMH staying in a strong up channel, has just gotten its moving averages lined up correctly - rainbow is correct, pb was to

[7/22/2003 10:08:03 PM] [sisterpractical] finally found some settings where I have OBV -= was tracking until the june pb, when it fell further, but tracking up again now.
[7/22/2003 10:08:49 PM] [arch] smh looks like it will take out the high of 4 days ago. IMHO
[7/22/2003 10:12:24 PM] [sisterpractical] agree - it can do that and stay in channel
[7/22/2003 10:14:44 PM] [husker] .

[7/22/2003 10:39:41 PM] [cyberact] Just a Thought...Jack Welch announced his successor for GE at the Top of the Bull Market....he was the best indicator in retrospect that the market had top IMO...he is a ver smart man....Now we got WEIL at Citigroup announcing his successor....Sandi is just as astute a CEO as Jack Welch was....now do I think WEIL would be stepping down at the beginning of a new Bull Market ?...Not IMO
[7/22/2003 11:04:43 PM] [Groundog] HRH looks like it's turned around and headed back up
[7/22/2003 11:07:07 PM] [AlanD] .
[7/22/2003 11:08:23 PM] [AlanD] Well how about that. My bearish call on AVII came to fruition today.
[7/22/2003 11:09:10 PM] [ChartMonkey] just curious what caused your bearish call on AVII alan
[7/22/2003 11:11:37 PM] [AlanD] CM, it was an EWA call plus some of the candles were exhibiting bearish signals over the past two weeks since I first made the call. Hope Runner got out.
[7/22/2003 11:12:03 PM] [ChartMonkey] i was in but suspicious of it; got stopped out today
[7/22/2003 11:12:27 PM] [AlanD] Well as you know, there will always be others.
[7/22/2003 11:13:08 PM] [ChartMonkey] as of 7/18 it looked not quite right but not about to crack open either. that long consolidation w/little price movement was nothing but poker face.
[7/22/2003 11:13:13 PM] [AlanD] AVII is a good example of where OBV doesn't always tell what the real story is.
[7/22/2003 11:13:33 PM] [AlanD] Yes, it was quite a poker face.
[7/22/2003 11:13:38 PM] [ChartMonkey] :) as far as i'm concerned no indicator can always tell what the real story is ... :)
[7/22/2003 11:14:01 PM] [ChartMonkey] but i am personally fond of price and volume as my favorite indicators

ClubHome

[7/22/2003 11:15:47 PM] [AlanD] This is true. Price and volume is two of my favorite pieces of information also.

[7/22/2003 11:17:20 PM] [AlanD] I'm getting a high probability short signal on ADBE. Just something to keep in mind.

[7/22/2003 11:18:28 PM] [ChartMonkey] just curious if you have time to run your analyses on ISPH whether it is a decent short

[7/22/2003 11:18:42 PM] [ChartMonkey] (i am already profitably short ISPH)

[7/22/2003 11:19:10 PM] [ChartMonkey] but trying to decide whether to cover here at congestion levels or hold for a longer pull

[7/22/2003 11:19:23 PM] [AlanD] I'm sitting on a nice 15% short gain on DAL.

[7/22/2003 11:19:42 PM] [ChartMonkey] i see room down to 8 on ISPH if current consolidation levels crack

[7/22/2003 11:20:05 PM] [ChartMonkey] perhaps with a respite around 9.50 or so

[7/22/2003 11:20:55 PM] [AlanD] I'm not sure what the consensus is for today's rally but I think it was a sympathy move. Maybe up tomorrow but then more downside ahead.

[7/22/2003 11:20:55 PM] [ChartMonkey] DAL, nice quick gain on short position - you think it is done moving down in the short term though?

[7/22/2003 11:21:06 PM] [zenvestor] Monkey: Seems everyone "sees" something (has an affinity) in their favorite patterns. We live and die by trusting MACD, and stoch. Keeps things simple.

[7/22/2003 11:21:30 PM] [ChartMonkey] zenvestor - agreed ...

[7/22/2003 11:21:58 PM] [AlanD] There's a possibility. I hope to see DAL breakdown but will cover pretty quickly should it start heading up.

[7/22/2003 11:22:12 PM] [ChartMonkey] (but who are "we" - i thought there was only the tao ... ?) :)

[7/22/2003 11:22:55 PM] [ChartMonkey] any EWA observations re ISPH, Alan?

[7/22/2003 11:23:01 PM] [ChartMonkey] it's a nice wavy chart :)

[7/22/2003 11:23:17 PM] [AlanD] Went short today on PFE and TXN. Looking for some follow through soon.

[7/22/2003 11:24:12 PM] [ChartMonkey] TXN chart looks schizo to me

[7/22/2003 11:25:24 PM] [zenvestor] CM we are ONE

[7/22/2003 11:26:56 PM] [ChartMonkey] how do you get TXN as a short

[7/22/2003 11:27:06 PM] [ChartMonkey] (or a long for that matter)?

[7/22/2003 11:27:18 PM] [AlanD] Its a signal from another program.

[7/22/2003 11:27:37 PM] [AlanD] Same one that is giving me ADBE as a possible short.

[7/22/2003 11:28:07 PM] [ChartMonkey] does the program rate the reliability of

ClubHome

the signal? (e.g. as does omnitrader "advisor rating")?

[7/22/2003 11:28:41 PM] [AlanD] Yes, current settings giving me a robust 73% reliability signal.

[7/22/2003 11:29:32 PM] [AlanD] So there is always that margin for giving a bad signal. Has done well for me so far.

[7/22/2003 11:30:06 PM] [ChartMonkey] would be interested in ISPH assessment if you have time/cpu bandwidth.

[7/22/2003 11:31:01 PM] [AlanD] Provides mostly intermediate signals. For example, doesn't mean ADBE will go down right away. Could take a day or several. Could also be wrong just like anything else.

[7/22/2003 11:31:11 PM] [wildbill] sneak preview for tomorrow -- in honor of AlanD being in the house! -- TLAB----- SHORT ----- 7. 17 to 7.35 - stop @7.62 ----- LONG ----- 6.76 to 6.59 - stop @6.40:)

[7/22/2003 11:32:15 PM] [AlanD] ISPH coming up in zone for a probable long in it's current price range but trigger hasn't gone off yet.

[7/22/2003 11:32:44 PM] [AlanD] Hey Bill, I feel so honored!!!

[7/22/2003 11:33:09 PM] [wildbill] miss u Al

[7/22/2003 11:33:10 PM] [babue] Thanks WB usually your picks are to expensive for me but this one I can try. =D

[7/22/2003 11:33:21 PM] [AlanD] LOL, I miss me too.

[7/22/2003 11:33:40 PM] [wildbill] been very busy with the little ones lately!

[7/22/2003 11:34:04 PM] [wildbill] and how are those wonderful twins anywaY?

[7/22/2003 11:35:11 PM] [AlanD] Took my son to T-ball today. The father of one of my son's team mates is currently serving in Bagdad.

[7/22/2003 11:35:19 PM] [AlanD] Twins doing great thanks.

[7/22/2003 11:35:29 PM] [Saroj] How about QTRN for a short tomorrow?

[7/22/2003 11:35:52 PM] [AlanD] QTRN looks interesting.

[7/22/2003 11:36:30 PM] [Voltmus] anyone still in Lyo

[7/22/2003 11:36:33 PM] [AlanD] CM, same system gave me IBM as a short for today. I didn't take it but it would have worked out ok despite the rally.

[7/22/2003 11:36:46 PM] [Saroj] Alan - did I see you comment about being cautions about shorting today or was that someone else?

[7/22/2003 11:38:43 PM] [AlanD] Yes that was me. I said be careful about going short. Reasoning was because the broader market was a little exhausted and due for a short term rebound. Yes I did take a couple shorts but they were high prob. shorts IMO.

[7/22/2003 11:39:09 PM] [Saroj] oh, thanks for the clarification.

[7/22/2003 11:39:15 PM] [AlanD] Also went long on CSCO and ended with a

2.43% gain so far.

[7/22/2003 11:40:47 PM] [AlanD] I try to take my positions in the same direction as the broader market but I also realize that many stocks have an inverse correlation to the index and will do what they want.

[7/22/2003 11:43:08 PM] [Saroj] I think BEAS is going to come down. Got some off of it day before yesterday but it got a boost yesterday so I covered.

[7/22/2003 11:43:28 PM] [Saroj] Also SWFT

[7/22/2003 11:44:03 PM] [AlanD] A see a reversal candle in store for BEAS soon.

[7/22/2003 11:44:53 PM] [AlanD] The pattern on SWFT on the other hand looks a little bullish despite the fact that both have similar patterns.

[7/22/2003 11:45:23 PM] [Saroj] Reversal? You mean to come down? Like the doji and hanging man pair of two days ago?

[7/22/2003 11:45:41 PM] [Saroj] SWFT - bullish?

[7/22/2003 11:46:15 PM] [Saroj] because they just hang there and last two days are open candles?

[7/22/2003 11:46:18 PM] [AlanD] I've seen too many "good looking" patterns fail because the broader market took them with it. That's why IMO there can be no perfect pattern that works all the time. Other factors will always come into play.

[7/22/2003 11:46:34 PM] [Saroj] good point/

[7/22/2003 11:46:57 PM] [AlanD] Yes to a degree, plus the volume pattern and angle of the candles with respect to themselves.

[7/22/2003 11:48:28 PM] [ChartMonkey] short candidates - EELN INSU MTH STJ BER USNA LNY PMI

[7/22/2003 11:49:19 PM] [Saroj] Alan, my son is flying out to S.D. tomorrow to check out restaurant sites. He's planning to open up something there in the Gas Lamp district.

[7/22/2003 11:49:34 PM] [Saroj] thx, cm, I'll have a look-see.

[7/22/2003 11:49:47 PM] [AlanD] I like EELN as a long with a break above 6.10 or short with a break below 5.70.

[7/22/2003 11:49:50 PM] [Saroj] I like to have some on a list in case the market turns.

[7/22/2003 11:50:18 PM] [AlanD] Gas Lamp is an established inner city area. Use to be cheap. Not anymore.

[7/22/2003 11:51:19 PM] [Saroj] Apparently college kids flock there now. How they can afford it I have no idea. From S.D. State, UCSD, Mercy.

[7/22/2003 11:51:53 PM] [ChartMonkey] saroj i usually like to have a list of long candidates & a list of short candidates for each day - hopefully ready to follow path of least resistance whenever it reveals itself

[7/22/2003 11:53:03 PM] [Saroj] cm, were these chosen from the charts out of a generic scan or do you have a good short scan?
[7/22/2003 11:53:14 PM] [AlanD] They go into hock or have mom and dad putting them through college. I put myself through college.
[7/22/2003 11:53:22 PM] [honus99] Saroj, college kids flock their cause they are spending their parents money
[7/22/2003 11:53:49 PM] [ChartMonkey] saroj those were from my 7/17/03 list of short candidates which i put together from a variety of sources including a scan for shorts
[7/22/2003 11:53:53 PM] [Saroj] right, guess so. I didn't and my son didn't so don't "think" that way.
[7/22/2003 11:54:03 PM] [StockStalker] sure would be harder to find these tickers without tc2k
[7/22/2003 11:54:22 PM] [StockStalker] or TcNet
[7/22/2003 11:55:44 PM] [AlanD] If you son has the capital I think he is looking in the right place to start a business.

[7/22/2003 11:57:48 PM] [Saroj] CM - what do you mean "no earnings" - how do you scan for that in TC?
[7/22/2003 11:57:49 PM] [honus99] all this talk of San Diego makes me want a Rubio's fish taco.
[7/22/2003 11:58:22 PM] [Saroj] you can get rubios in AZ. Where are you?
[7/22/2003 11:58:48 PM] [honus99] yeah, they have them here in the Bay area, but not near me.
[7/22/2003 11:59:44 PM] [ChartMonkey] saroj - just make earnings part of your easyscan criteria - earnings [0 (sort by value not rank obviously)
[7/23/2003 12:00:24 AM] [AlanD] Saroj, is he in the restaurant business/
[7/23/2003 12:00:33 AM] [Saroj] oh, you meant literally NO earnings. hmmm.
[7/23/2003 12:00:45 AM] [ChartMonkey] yes

[7/23/2003 12:01:51 AM] [ChartMonkey] scan is flagging e.g MLNM this evening although looking at the chart it looks short term oversold.

[7/23/2003 12:02:27 AM] [ChartMonkey] the price down/volume up criteria tends to find charts like that - not a good entry points but possibly setting up for a good entry point

[7/23/2003 12:02:49 AM] [Saroj] I'm even wondering about INTC as a short, but seems risky if techs are on the rise tomorrow.

[7/23/2003 12:05:18 AM] [ChartMonkey] stalker i find that in general i have better luck looking for setups w/easy scans and putting the results into daily watchlists to review for entry triggers - but maybe i'm just too lazy when it comes to trying to write perfect scans that will dish me "right now" high probability entries

[7/23/2003 12:14:23 AM] [really] Has anyone done any research of looking at afterhours trading for what could pop tomorrow. Island.com has great list of stocks that have had after hours activity. One stock I am in, CRIO has traded within pennies of what looks like a 2 year high on decent after hours volume

[7/23/2003 12:15:15 AM] [ChartMonkey] CRIO up on earnings news, no?

[7/23/2003 12:15:24 AM] [really] yes

[7/23/2003 12:16:07 AM] [ChartMonkey] likely to gap up then - can't profit on that w/out being lucky or having insider info generally i'd think

[7/23/2003 12:16:37 AM] [StockStalker] hotto basically did that with INTL yester

[7/23/2003 12:16:51 AM] [ChartMonkey] seems like earnings are "surprising" to the upside more than to the downside this season

[7/23/2003 12:17:11 AM] [ChartMonkey] so holding through earnings may be a decent gamble this quarter

[7/23/2003 12:17:17 AM] [StockStalker] sometimes works and u look smart and sometimes doesnt and it is forgotten

[7/23/2003 12:17:31 AM] [really] yes normally I get out of a stock before earnings cause I never know which way they will go

[7/23/2003 12:17:46 AM] [ChartMonkey] :) yup - most important piece of data in my trading is my equity curve ... :)

[7/23/2003 12:18:18 AM] [really] equity curve ? meaning preserving capital?

[7/23/2003 12:19:14 AM] [really] you mean how long you sit in them before they move?

[7/23/2003 12:19:32 AM] [ChartMonkey] no, i mean how much \$\$\$ do i have today compared to yesterday

[7/23/2003 12:20:50 AM] [ChartMonkey] if my equity curve goes up, down, and sideways, and ends up in the same place it was last year, then i can achieve the same result financially by just not trading at all. :)

[7/23/2003 12:21:01 AM] [really] Chartmonkey - you are much better than I am. I certainly don't go up and to the right every day. It is good you have system to be able to do that

[7/23/2003 12:21:03 AM] [ChartMonkey] and perhaps going outside and feeling the grass between my toes.

[7/23/2003 12:21:12 AM] [ChartMonkey] ha!

[7/23/2003 12:21:21 AM] [ChartMonkey] i don't mean that i go up and to the right every single day!! :)

[7/23/2003 12:21:37 AM] [ChartMonkey] yes, stalker is right.

[7/23/2003 12:21:48 AM] [StockStalker] it is the regression of the curve that matters

[7/23/2003 12:22:00 AM] [StockStalker] u can even put a moving average on it

[7/23/2003 12:22:03 AM] [ChartMonkey] but a plot of my equity curve viewed from across the room should have that up and to the right kind of shape to it... :)

[7/23/2003 12:22:11 AM] [really] I understand. that is reason I haven't been in market since 2001 until about 2 months ago

[7/23/2003 12:22:45 AM] [StockStalker] well only trading an up market creates bad habits

[7/23/2003 12:23:07 AM] [really] that is reason I am here. trying to learn

[7/23/2003 12:23:38 AM] [really] but up market is certainly more forgiving for LONGS.

[7/23/2003 12:23:41 AM] [ChartMonkey] and bad habits, once created, will return again and again unless they are actively beaten into submission, early and often. hence the need to look at the truth, in the form of your equity curve.

[7/25/2003 1:59:02 PM] [AllegroBob] Exactly -- I'm making notes for the wall
[7/25/2003 1:59:04 PM] [Quintus] hotto, talking about hourly turning points?
[7/25/2003 1:59:18 PM] [AllegroBob] Thx Hotto - I will
[7/25/2003 1:59:21 PM] [OmahaJim] AVAN moving up
[7/25/2003 1:59:53 PM] [tinaSDtrader] I have a wall too - papered with all my mistakes so I learn from them :o
[7/25/2003 2:00:12 PM] [SeattleSteve] Good idea, Tina
[7/25/2003 2:00:30 PM] [hotto] NOTHING "ALWAYS" works.. BUt.. knowing when to buy BOs.. and when to pass.. because a later dip is expected..... all helps...
[7/25/2003 2:00:36 PM] [tinaSDtrader] it's a very full wall!!!
[7/25/2003 2:00:51 PM] [ChuckR] my wall is not big enough....:D
[7/25/2003 2:00:52 PM] [Sherm] I need a bigger wall
[7/25/2003 2:01:00 PM] [tinaSDtrader] that would be a great Sat. discussion hotto???
[7/25/2003 2:01:34 PM] [AllegroBob] Sometime - when I have a min - I need to compile a HOTTO index of logs
[7/25/2003 2:01:34 PM] [tinaSDtrader] always the ceiling - so when you throw head back in frustration see even more
[7/25/2003 2:01:57 PM] [hotto] AND.. I always think early... about.. the likelihood of "MY stock" to be involved in a "daytrader sellout dip" at 1540pmET...
[7/25/2003 2:02:08 PM] [Luigistock] Bob you would be revered for that one
[7/25/2003 2:02:17 PM] [OmahaJim] LWSN possibly breaking out to the upside
[7/25/2003 2:02:28 PM] [tinaSDtrader] new traders - now go look at SINA - no guarantee it'll hold here, but many sold that 5-min scary dip - sellers exhausted buyers step in
[7/25/2003 2:03:01 PM] [Pookie] hotto ty will study scalping this week end..ty
[7/25/2003 2:03:04 PM] [AllegroBob] And shoot it to \$37 Tina?
[7/25/2003 2:03:20 PM] [hotto] No need to Pay up for Mid-day prices.. at rally highs.. IF it is likely that we will get 1 or 2 good dips later... 2pm dip and 1540 dip..
[7/25/2003 2:03:28 PM] [turningpoint] UNTD holds during net dip
[7/25/2003 2:03:30 PM] [Zathrus] Hi Gang - AVII looks like its just about to...oh, never mind :)

[7/25/2003 2:06:08 PM] [tinaSDtrader] How you play it depends on your trading strategy;)
[7/25/2003 2:07:00 PM] [hotto] SINA... SUre.. It may go lower.. 33.55 seems possible.. BUT.. I am happy being Long SINA over weekend..

[7/25/2003 2:08:26 PM] [hotto] SINA.. I said.. yes.. IF it holds above 32.50 into close.. -- It DID.. And.. we got what was expected.. a Gap-up... and Run-to-NH52 this morning..

[7/25/2003 3:17:08 PM] [Luigistock] A U.S. Army general said today that American forces believe they have captured several of Saddam Hussein's personal bodyguards in Iraq. The announcement follows the release of pictures and videotape of two bodies coalition authorities say are Hussein's dead sons. CNN

[7/25/2003 3:17:26 PM] [alatar] i belieev what cnbc had was comment from trader that death of sons MAy mean saddam will soon be cornered

[7/25/2003 3:17:44 PM] [hotto] did you say they have Sadam trapped in the Pits in Chicago???.:o

[7/25/2003 3:17:55 PM] [alatar] that's an awful lot of what ifs, speculation, bs

[7/25/2003 3:17:57 PM] [josiel] lol

[7/25/2003 3:18:09 PM] [Luigistock] "Based on the informant south of Tikrit, we detained 13 individuals. Somewhere between five to 10 of those, we are still sorting through it, are believed to be Saddam Hussein's personal security detachment."

24.20.. Plenty of candlestick watchers will worry about that ugly candle yesterday..

[7/25/2003 3:25:10 PM] [Saroj] SINA - can't short it or any of the other China stocks w/o calling the broker due to "hard to borrow" designations.

[7/25/2003 3:25:58 PM] [tinaSDtrader] can't borrow any at my broker either Saroj

[7/25/2003 3:26:07 PM] [StockStalker] part of the "affirmative determination" clause of borrowing stocks that bd's must follow

[7/25/2003 3:26:18 PM] [hotto] SINA.. thanks tina.. indicates a lot of "sharp" daytraders in and out of SINA.. I like to see that..

[7/25/2003 3:26:24 PM] [Saroj] tina - so you only make the long plays?

[7/25/2003 3:27:44 PM] [jrixey] Can always try options Saroj

[7/25/2003 3:27:52 PM] [Nance] no prob shorting SOHU at e-trade

[7/25/2003 3:27:57 PM] [hotto] INTL.. 25.83 +.43.. my guess is.. down is done.. Looking for 26.50.. if that is true.. (glad i had my buy-stop in.. 25.45).

[7/25/2003 3:28:07 PM] [ButterflySpread] Tina and Saroj CAN borrow at Cybertrader for Sina

[7/25/2003 3:28:16 PM] [tinaSDtrader] Yes - on SINA, SOHU, CHINA etc, tried many times to short never able to borrow - but I do short other stocks

[7/25/2003 3:28:37 PM] [tinaSDtrader] Yeah - but I have sweet commissions and amazing order types at Interactive Brokers - not budging

[7/25/2003 3:29:23 PM] [Yogi] fwiw, that is why it is helpful to have more than one broker. MB Trading very good with shorts. TerraNova as well.

[7/25/2003 3:29:40 PM] [hotto] NTES.. 3rd bar 15min..at 41.65.. BO should be decisive.

[7/25/2003 3:29:44 PM] [tinaSDtrader] hotto - thoughts on holding SINA now o/n?

[7/25/2003 3:29:54 PM] [ButterflySpread] wasn't selling just letting you know that there are shares to borrow some places

[7/25/2003 3:29:58 PM] [StockStalker] seems like IB uses fancy names for normal orders

[7/25/2003 3:30:17 PM] [Nance] just opened an acct at IB - glad you like it - have heard real good things from other traders too

[7/25/2003 3:30:42 PM] [hotto] INTL 25.97 HOD.. morning High..

[7/25/2003 3:30:44 PM] [StockStalker] be carerul with futures on IB tho since they used broker held stops and not globex held stops

[7/25/2003 3:30:59 PM] [tinaSDtrader] IB has great orders - can put a target limit above and also a protective stop below, trailing stops, discretionary limits - love it

[7/25/2003 3:31:32 PM] [josiel] Scott puts high at 26.50

[7/25/2003 4:47:46 PM] [StockStalker] The trendline is a basic charting tool many traders have experimented with and modified over the years. In his book Trader Vic, Victor Sperandeo reveals a simple but effective trading strategy he calls 1-2-3. The strategy's three elements for a long trade are: 1) a penetration of a bearish trendline in a downtrend; 2) a test of the downtrend's low; and 3) a breakout above the swing high between the trendline break and the test of the low (see Figures 1 [above] and 2 [below]).
[7/25/2003 4:49:35 PM] [husker] Thanks Oz-
[7/25/2003 4:49:57 PM] [StockStalker] The requirements for a short position are: 1) a penetration of a bullish trendline in an uptrend; 2) a test of the uptrend's high; and 3) a breakout below the swing low between the trendline break and the test of the high.

[7/25/2003 4:53:15 PM] [StockStalker] Osc that is a glitch and is based on the fact that the chart can not see the candle that are off the chart. SO a 200 period average needs to be showing at least 200 bars on the chart for it to be correct

[7/25/2003 4:54:39 PM] [Osc] I'd call that a glitch alright,,so for a 200 ma need 200 candles,,thanks Stoch

[7/25/2003 11:30:26 PM] [tsweet] thankyou but the wardon bros are busily writing the worden report so we can read such prolific and usefull material when we turn on tcnet everyday

[7/25/2003 11:31:27 PM] [tsweet] saroj are you a day traxder?

[7/25/2003 11:31:36 PM] [tsweet] trader?

[7/25/2003 11:32:45 PM] [tsweet] does anyone know alot about entering trades and timing here?

[7/25/2003 11:32:48 PM] [Saroj] tsweet - I'm just learning. There are major pros here like FirstWave, hotto, tinaSDtrader - many others. They are the ones to talk to.

[7/25/2003 11:33:25 PM] [tsweet] ok but they are busy usually, i will try again

[7/25/2003 11:34:46 PM] [Saroj] I'd suggest you read through FirstWave and hotto club material. Read Elder, Tharp, Farley, Steve Bigalow, Murphy others - watch and listen and then when you are educated some ask questions. They trade too and really have to balance their time. Not really set up to bring someone along from rank beginner.

[7/25/2003 11:35:39 PM] [tsweet] ok that makes sense

[7/25/2003 11:35:55 PM] [Saroj] If you are especially concerned about the timing of entering and exiting - learn about SOAP and Buy/Sell flats fin the First Wave club and his yahoo and seb site.

[7/25/2003 11:36:44 PM] [tsweet] ok its mostly entry that im looking for im good at exiting at the right time just getting off the ground

[7/25/2003 11:37:51 PM] [Saroj] Well if you are good at exiting, you have more than half the battle won. That seems to be the hardest for most people. So what are your exit criteria?

[7/25/2003 11:39:41 PM] [tsweet] my exiting criteria are candle suck as the duo, stochastics,tsv and how they relate to the simple moving averages and where the parent indicators are in relation to the bolinger bands

[7/25/2003 11:39:49 PM] [tsweet] such

[7/25/2003 11:40:38 PM] [tsweet] you can tell when the trade is slowing down by diminishing candles and lower volume and possibley price

[7/25/2003 11:40:51 PM] [Saroj] Are you using your elbows to type with ? :) (just kidding). You have a certain slant to your typos though. You're killing me! :D

[7/25/2003 11:41:19 PM] [tsweet] oh

[7/25/2003 11:42:21 PM] [Saroj] diminishing candles. How do you distinguish

ClubHome

between that representation of beginning to turn and the NR7 situation preceding a jump up?

[7/25/2003 11:42:29 PM] [tsweet] the problem is im jumping in on bull candles but the next candle seems to be a bearish engulfing

[7/25/2003 11:43:32 PM] [Saroj] engulfing? If there was a bearish engulfing - I would get out too. Do you mean a bearish Harami (body is inside the prior candle)?

[7/25/2003 11:43:41 PM] [tsweet] i havent read the toby crabel format so nr7 and nr4 is foreign to me but i do know about the wedging and looking at the point

[7/25/2003 11:44:25 PM] [tsweet] no more like a bear piercing candle that cost me 50 to \$100 dollars to get out usually a loss of .10 cents per 1,000 shares

[7/25/2003 11:44:58 PM] [tsweet] i trade at the open because of the higher volume than the afternoon

[7/25/2003 11:45:14 PM] [tsweet] as we all know volume precedes price

[7/25/2003 11:45:40 PM] [Saroj] What about always entering as the price is bouncing off a support given other positive indicators? or always entering at a SOAP buy (for long)? With volume of course.

[7/25/2003 11:45:57 PM] [tsweet] i also keep away from gap ups more than a \$1.00

[7/25/2003 11:46:44 PM] [Saroj] You trade mostly at the open? I wonder if that is part of the problem. The market is so volatile then. Unless you are purposely trying to trade intraday these gaps and volatile moves.

[7/25/2003 11:46:46 PM] [tsweet] soap buys are ok but i tend to find the delayed soap buys so im usually on to the next stock , but trying not to chase a trade

[7/25/2003 11:47:19 PM] [tsweet] i stop trading around noon EST

[7/25/2003 11:48:02 PM] [tsweet] unless the volume is greater than 300,000 per day for say 250 days,

[7/25/2003 11:49:02 PM] [tsweet] maybe tina has the answers im looking for, i need a system of criteria to look for

[7/25/2003 11:49:29 PM] [tsweet] soap is good but sometimes its difficult to distinguish template buys from soap buys

[7/25/2003 11:50:15 PM] [tsweet] and other times the dow isnt cooperating with the stock, this markets been choppy and can be difficult to read for longs on a down market

[7/25/2003 11:51:31 PM] [Saroj] Tina is very good, very disciplined and has clear criteria. I would definitely encourage you to check with her.

[7/25/2003 11:51:56 PM] [tsweet] ok i will check Tina out

[7/25/2003 11:52:51 PM] [Saroj] She has a strong background with Chris Manning

[7/25/2003 11:53:06 PM] [tsweet] ok

[7/25/2003 11:55:06 PM] [Duffer] ts - we have all made the mistakes you are talking about. Slow down and review your trades and mistakes. First learn to evaluate market and then trade stocks. In line with market. Look at 1 hr and 1/2 hr chart before entering a trade. If it is over 80 for a long you will usually buy at high of the day(FW). Wait for a pull back.

[7/26/2003 9:52:16 AM] [AlanD] .
[7/26/2003 9:55:19 AM] [JerryA] hi AlanD
[7/26/2003 9:56:34 AM] [AlanD] Hey Jerry. Just dropping in?
[7/26/2003 9:57:12 AM] [JerryA] Yea...missed most of the action Friday except the close...trying to see what happened. Looks like an impressive rally...sorry I missed it
[7/26/2003 9:58:04 AM] [JerryA] Big Q: is it another 1 day wonder
[7/26/2003 10:02:51 AM] [AlanD] Yes but I am not convinced that it is a sign that the indexes will be breaking to a new high. I could always be wrong but feel confident in my assignment.
[7/26/2003 10:07:39 AM] [AlanD] sorry, meant assessment.
[7/26/2003 10:07:46 AM] [JerryA] There seems to be no "clear" direction for me except sideways....some patterns creating nice short rolling patterns, others longer rolling patterns...the indexes all look "Tippy" or poised. It defies me.
[7/26/2003 10:07:56 AM] [JerryA] Yes...I understood what you meant
[7/26/2003 10:09:21 AM] [JerryA] Nice SOAP buy on SOI, hammer bottom at April's support area...sure wish Chemicals would start to move up...OMG is "stuck" sideways for a long time now
[7/26/2003 10:11:02 AM] [AlanD] Well I am a believer in market psychology and manipulation. If you look at the "real" numbers for earnings and the variety of reports that comes out from the Feds, it is just amazing that the market is still up. I think there is alot of intervention that goes on.
[7/26/2003 10:11:51 AM] [JerryA] agreed
[7/26/2003 10:12:20 AM] [JerryA] so...what's the incentive for them to bring the market down hard "now".
[7/26/2003 10:13:39 AM] [AlanD] Yesterday was a good example of manipulation with the rally later in the day. Indexes were starting to breakdown and technically should have, interesting how a couple mediocre reports can be used to move the futures in a particular direction.
[7/26/2003 10:15:00 AM] [JerryA] they're better off just rotating stocks and sectors at this level with mild corrections so they have a platform built at this level with

ClubHome

modest % increases over the next year+. No huge swings overall, just a gentle increase with mild swings

[7/26/2003 10:16:41 AM] [AlanD] Wish I could answer that Jerry. I don't see any thing other than the problems with FRE and FNM or AOL that could be a catalyst to start pushing it over. But quite often, its usually something. Then the "big money" loads up on their short positions and in a manipulating manner, starts releasing predetermined bad news to help their short positions along.

[7/26/2003 10:17:12 AM] [JerryA] creates an impression of stability, hope, confidence, gets reinvestment going so the "Bigs" have more power to manipulate again...possibly.

[7/26/2003 10:18:51 AM] [AlanD] The metals had a big breakout this week. Not something that would happen if things were getting better in the economy. Personally I think its a "head's up".

[7/26/2003 10:19:21 AM] [JerryA] You may very well be right Alan...that's the tough part of trading...the Bigs can do whatever they want to take the market where they are positioned. You/Bill/Hotto/FW/Candle and others are good at getting a feel for those directions...I admire that.

[7/26/2003 10:20:04 AM] [JerryA] Bac too. I haven't heard from her in a long while. Wonder what she's been saying?

[7/26/2003 10:22:20 AM] [AlanD] I'm not sure. Vacation maybe? Regarding market or stock direction, looking at multiple timeframes really helps to get an idea of what is overbought or oversold.

[7/26/2003 12:03:19 PM] [hotto] The next day.. July 1, many avgs tested ma50 and / or Lwr BB..

[7/26/2003 12:03:54 PM] [hotto] at least.. made important Swing Lows.. on 7/1.. then closed Up on the day..

[7/26/2003 12:04:19 PM] [hotto] Background information now is..

[7/26/2003 12:04:42 PM] [hotto] We had a big IT Rally.. MOMO peak on 6/17..

[7/26/2003 12:05:08 PM] [hotto] 1st PB.. to ma50.. ended on 7/1.. Swing Low..

[7/26/2003 12:05:48 PM] [hotto] Several mkt sectors have made new Rally Highs since then.. keep ing the overall IT RALLY alive..

[7/26/2003 12:06:33 PM] [hotto] DJ-65 now

[7/26/2003 12:07:09 PM] [hotto] It shows clearly.. the March low..the IT Rally peaking MOMO.. in mid - June..

[7/26/2003 12:07:58 PM] [hotto] then the PB to Lwr BB on 7/1.. back up to retest highs a couple times.. in early July..

[7/26/2003 12:08:32 PM] [hotto] THen.. another attempt to downside ended on 7/17.. turning back up...

[7/26/2003 12:08:58 PM] [hotto] DJ-65.. now back at the highs again.. after Friday's big rally.

[7/26/2003 12:09:43 PM] [hotto] SP-500... is close.. but behind a bit.

[7/26/2003 12:10:28 PM] [hotto] DJ-30.. is back near the June Highs again.. looking like it wants to go higher...

[7/26/2003 12:10:50 PM] [hotto] and.. note...Several DJIA stocks report Earnings next week..

[7/26/2003 12:11:13 PM] [hotto] recent reports have been better than expected...

[7/26/2003 12:11:51 PM] [hotto] and.. Economic data .. is now indicating Cap-x spending picking up...

[7/26/2003 12:12:05 PM] [hotto] Money is cheap and plentiful...

[7/26/2003 12:12:29 PM] [hotto] INterest rates.. have backed up some.. but still historically low...

[7/26/2003 12:12:56 PM] [hotto] XAU index..

[7/26/2003 12:13:10 PM] [hotto] Gold tells us some things..

[7/26/2003 12:13:26 PM] [hotto] 1. Money is plentiful..

[7/26/2003 12:13:48 PM] [hotto] 2. Interest Rates are below expected Inflation rate..

[7/26/2003 12:13:59 PM] [hotto] 3. US Dollar is weak...

[7/26/2003 12:14:26 PM] [hotto] Note.. Gold going up does NOT predict the end of the World.. or much else....

[7/26/2003 12:14:48 PM] [hotto] Just tells us those 3 things... and helped along by

[7/26/2003 12:15:26 PM] [hotto] 4. The FED had declared that they are on the Side of Growth.. and Against Deflation..;

[7/26/2003 12:16:13 PM] [hotto] most recent comment.. The Fed stands ready to lower Interest Rates all the way to ZERO.. if necessary... to head off deflation.

[7/26/2003 12:16:57 PM] [hotto] Just after that statement.. Dollar dropped.. Bonds dropped.. Gold Started next leg of rally..

[7/26/2003 12:17:25 PM] [hotto] That led to the Cyclical finally getting a boost..

[7/26/2003 12:17:39 PM] [hotto] DJ-20

[7/26/2003 12:18:11 PM] [hotto] has moved to a New Rally High.. (within the DJ-65).. the leader now.

[7/26/2003 12:19:04 PM] [hotto] DJ-20 Breaking out over June highs... tends to lead DJ-30... old "Dow Theory".. now..

[7/26/2003 12:19:27 PM] [hotto] DJ-15 Utils

[7/26/2003 12:19:53 PM] [hotto] Here are the folks paying the price... recently.. Utilities..

[7/26/2003 12:20:43 PM] [hotto] Sorted for PPC18..

[7/26/2003 12:20:56 PM] [hotto] XBD--X #1.. Brokers

[7/26/2003 12:21:16 PM] [hotto] SOX--X #2 Semis..

[7/26/2003 12:22:12 PM] [hotto] note.. Semis.. are still in the consol pattern... so the position.. (#2)...has a lot to do with the Low set on 6/30... close

[7/26/2003 12:22:30 PM] [hotto] DJ-20 #3 Transports.. New Rally High.

[7/26/2003 12:22:57 PM] [hotto] CYC--X #4 Cyclical... New Rally High.. big!

[7/26/2003 12:25:12 PM] [hotto] BKX--X #7.. Banks... still hanging in there...

[7/26/2003 12:25:47 PM] [hotto] RLX--X #8 Retail.. looking good

[7/26/2003 12:26:24 PM] [hotto] NHB #9 Betas... holding up ok..

[7/26/2003 12:27:05 PM] [hotto] DJ-30.. #10 threatening to BO.. next week is their chance...

[7/26/2003 12:27:39 PM] [hotto] Could be sort of the "DJIA Solitary walk" we have discussed many times.

[7/26/2003 12:28:34 PM] [hotto] DOT--X #11 Internet.. Resting now..under ma20.. after the YHOO and EBAY earns..

[7/26/2003 12:29:12 PM] [hotto] But.. bouncing off ma50.. could get hot again.. if mkt gets hot next week..

[7/26/2003 12:29:38 PM] [hotto] NYSE #12.. right behind the DJIA
[7/26/2003 12:30:49 PM] [hotto] GSO--X #13.. Software.. under ma50.. BUT.. If MSFT gets hot.. GSO--X.. goes along
[7/26/2003 12:31:32 PM] [hotto] CMR--X #14 Consumer Indes.. holding up ok.. Tax rebate checks coming soon.
[7/26/2003 12:32:25 PM] [hotto] XTC--X #15.. Telecomm.. Bouncing off lwr BB.. made new RAlly High.. 1st week July.
[7/26/2003 12:33:43 PM] [hotto] DRG--X.. #16 Drugs.. just above ema200.. could have trouble next week.. after the House bill on importing drugs...
[7/26/2003 12:34:19 PM] [hotto] But.. not expected to pass Senate.. so.. probably will produce a Fear bottom of some kind..
[7/26/2003 12:34:54 PM] [hotto] XNG--X #17 Natural Gas INdex.. (I added this this week)...
[7/26/2003 12:35:48 PM] [hotto] XNG--X.. is such a special component of the Energy sector.. you all know.. so..Let's track it..
[7/26/2003 12:36:37 PM] [hotto] XNG--X.. may have made a dble bottom on LR30. Friday.. need upside above Recent Base.. to prove it..
[7/26/2003 12:37:23 PM] [hotto] OSX--X #18 .. Oil Service .. still trying to put in a bottom..
[7/26/2003 12:37:58 PM] [hotto] The NatGas segment may recover.. and.. the Oil drilling & service lag... OR ????
[7/26/2003 12:38:49 PM] [hotto] Just watch the charts.. events in Iraq.. seem to have big impact on oil.. esp. emotional swings..
[7/26/2003 12:40:22 PM] [hotto] T2100.. A/D line.. moving up again.. next week will be important.
[7/26/2003 12:41:07 PM] [hotto] T2100 made a dbl bottom Base... or Flag.. since the 6/17 MOMO peak.. still ok..
[7/26/2003 12:41:56 PM] [hotto] T2106.. McClellan Oscillator.. moving up again.. still neg..
[7/26/2003 12:42:29 PM] [hotto] means.. the current Momentum is still less than it was 28 days ago..
[7/26/2003 12:43:03 PM] [hotto] but.. we are getting close now.. to moving beyond the "window" of the 6/17 MOMO peak..
[7/26/2003 12:43:23 PM] [hotto] then we will be able to really "measure" things again...
[7/26/2003 12:44:13 PM] [hotto] The IT RAlly Moved us from such an "Undervalued" level.. in March.. to the Highs.. in June.. and lifted most stocks..
[7/26/2003 12:44:29 PM] [hotto] T2118

[7/26/2003 12:44:55 PM] [hotto] McClellan Summation Index.. still moving lower..
[7/26/2003 12:45:34 PM] [hotto] But.. again.. nearing the end of the "window"
which includes the MOMO mkt prior to 6/17..
[7/26/2003 12:46:35 PM] [hotto] From an historical perspective.. the IT Rally from
March to June.. was the Biggest MOMO rally on record.. in charts.. at least.. since
mid - 1980s..
[7/26/2003 12:47:29 PM] [hotto] So.. this consolidation phase.. can be expected to
show.. a lowering of Momentum.. from that activity..
[7/26/2003 12:48:19 PM] [hotto] Importantly.. Many significant NH52s have been
put in.. daily.. over last few weeks..
[7/26/2003 12:48:54 PM] [hotto] and now.. New Sector Leadership.. in CYC--X..
and DJ-20.. BOs..
[7/26/2003 12:49:14 PM] [hotto] so.. we continue.. in the same mode as before..
[7/26/2003 12:49:58 PM] [hotto] Buy stocks with good chart setups.. for short

[7/26/2003 12:50:55 PM] [StockStalker] Is there a Media General version of the
CYC--X where I can see the stocks in it
[7/26/2003 12:51:00 PM] [hotto] It amounts to very complex Rotation.. for now.
[7/26/2003 12:53:11 PM] [hotto] No direct version of CYC--X.. in MG lists.. but..
similar..
[7/26/2003 12:54:23 PM] [hotto] Manufacturing.. groups..

[7/26/2003 1:38:05 PM] [hotto] Some asked yesterday for how I came up with the 1st scalping entry point on NTES..

[7/26/2003 1:39:00 PM] [hotto] First method.. middle of Thursday's Candle-body..

[7/26/2003 1:39:52 PM] [hotto] Open = 37.75... Close = 40.75.. Mid-point is 39.25.. That was 1st approach

[7/26/2003 1:40:38 PM] [hotto] Note yesterday's LOD was 39.10.. so.. 39.25 was a good enough entry price.. for such a volatile stock..

[7/26/2003 1:41:39 PM] [hotto] Recent Chart points... 7/18... HOD = 38.96.. near 39.. will give some support..

[7/26/2003 1:42:17 PM] [hotto] 7/21 Open = 38.90 ... again. near 39.. some support..

[7/26/2003 1:43:15 PM] [hotto] 7/22.. Open=38.93.... HOD=39.22... more support around my 29.25 price..

[7/26/2003 1:44:22 PM] [hotto] Note.. these prices are all in the "B" wave.. in ABC PB from the July Highs..

[7/26/2003 1:45:45 PM] [hotto] NTES gave us a fair dbl-bottom.. lately.. Confirmed by the Big Vol Rally on Thursday.. BO over the 7/18 - 7/22 Swing-Highs..

[7/26/2003 1:46:28 PM] [hotto] That gave credibility to the idea of Support.. at those several Chart points.. near 39.

asked that I re-ask today...regarding one of the NTES scalps. I asked if you used the 50ma on the 5 minute chart to determine the scalp point. I think your scalp point was 40.25 and it hit 40.28 in the 11:20 bar. Thanks...trying to learn from you.

[7/26/2003 1:54:28 PM] [hotto] now you are down into the Intraday 5 minute chart stuff..

[7/26/2003 1:56:55 PM] [hotto] from 7/25.. 10:05:00.. 5 min candle.. was an up candle..

[7/26/2003 1:58:45 PM] [hotto] I decided.. after the dbl-bottom in 5min.. ending at 11:10:00.. the first rally would be stopped by that 40.24 Candle high.. or the 40.22 candle close..

[7/26/2003 2:00:04 PM] [hotto] then.. I expected a short PB.. to the base-tops of the base.. in the 5min... from 10:40:00 to 11:10:00..

[7/26/2003 2:02:04 PM] [hotto] That worked out ok.. the Rally went to 40.28.. Telling me.. that After the next PB.. NTES would rally OVER the 40.24.. point.. and.. MY next target.. was the Next Up-candle top.. the 9:55 candle.. High=40.86..

[7/26/2003 2:02:29 PM] [hotto] That 9:55 candle Close=40.77...

[7/26/2003 2:03:06 PM] [hotto] note. then next Rally.. after the Base-top retest.. went to 40.79.. at 12:00..

[7/28/2003 3:50:14 PM] [hotto] OPSW.. I am ready to buy on next "dailyBO"
[7/28/2003 3:51:25 PM] [luk122] any ideas what will happen with NTES after earnings rep?
[7/28/2003 3:51:57 PM] [josiel] ty and SOI
[7/28/2003 3:51:56 PM] [Pookie] hotto ..targets forCWCI...
[7/28/2003 3:53:25 PM] [josiel] BOT OPSW 5.27 SOI 1.37
[7/28/2003 3:54:32 PM] [hotto] CWCI.. targets.. 9.85... then.. 12.25... for Earns.. (8/12)
[7/28/2003 3:55:54 PM] [hotto] SMMX 22.50)
[7/28/2003 3:55:58 PM] [Intuitive] FONR - yes
[7/28/2003 3:56:02 PM] [Rhino] I am in OPSW now. This is the first time I have traded it. A warning for those that are considering a position: I have found that it has wider spreads and more erratic intraday action than I suspected when I went in. Just a heads up, so nobody is surprised by the ten cent spreads that are often present.
[7/28/2003 3:56:42 PM] [Pookie] hotto..ty...have tooth pulled...root canal leaves continious infection in body

[7/28/2003 3:57:18 PM] [ajay] pookie you don't know what you are talking about, root canal is best choice
[7/28/2003 3:57:21 PM] [Sully] Any targets or comments on OXGN tomorrow
[7/28/2003 3:57:36 PM] [nemsca] i have had succesful root canal
[7/28/2003 3:58:09 PM] [Pookie] nemsca...none are successful.....
[7/28/2003 3:58:13 PM] [syatt] I've had good and bad...
[7/28/2003 3:58:48 PM] [nemsca] i have saved 3 teeth this way, get a dgood dentist.
[7/28/2003 3:59:59 PM] [Pookie] do you have mercury fillings
[7/28/2003 4:00:00 PM] [luk122] Own teeth, even dead, are better than implants.
[7/28/2003 4:00:08 PM] [really] Hotto - It looks like CWCI is an NR7-1U. Is that how it came on your radar screen?
[7/28/2003 4:00:11 PM] [Erik] Hotto, did you know that 8 out of 10 people prefer giving their opinions?
[7/28/2003 4:00:12 PM] [hotto] SMMX 22.65.. 1st target = 24.30
[7/28/2003 4:00:12 PM] [TraderGeorge] The purpose of the root canal is to drain the abcess at the apex of the tooth and save it. Never pull a tooth unless no other choice (repeated roof canal failures) then go to an implant.
[7/28/2003 4:00:15 PM] [Intuitive] Why is it if you buy a lot of a stock, the stock does poorly; an if you buy very little it rockets!=o
[7/28/2003 4:00:19 PM] [luk122] dump mercury fillings

[7/29/2003 11:09:11 AM] [SailorBoy] Hotto - do u think that IJJI has started its leg up yet or is this move a fake?
[7/29/2003 11:09:48 AM] [josiel] OPSW target 6.26?
[7/29/2003 11:09:59 AM] [StockStalker] well it is what i hope for in a situation like this. it does not always work this way. But if you trade 2nd tier names based on individual charts u do have some protection
[7/29/2003 11:10:26 AM] [StockStalker] IJJI move is real IMO
[7/29/2003 11:10:30 AM] [tinaSDtrader] IJJI is a wild one - one gridline move is a large % - have to be careful on these what looks like a small move on the chart can be big on the \$\$
[7/29/2003 11:10:48 AM] [tinaSDtrader] those volatile ones are great on the way up, painful on the way down
[7/29/2003 11:11:20 AM] [josiel] anyone have a target for OPSW
[7/29/2003 11:12:05 AM] [StockStalker] IJJI was a perfectly range contracted breakout and now the move with the volume has arrived and removed the "boring" factor out of the contraction
[7/29/2003 11:12:58 AM] [syatt] anything specifically gap IJJI up this am?

[7/29/2003 11:19:10 AM] [Physician] Long IJJI at 9.30
[7/29/2003 11:19:19 AM] [tinaSDtrader] If trading IJJI on 5-min swings today, notice it goes up then pulls back to the 10ema - see my post on pauses and pullbacks this is an example of that occurrence on 5-min
[7/29/2003 11:20:22 AM] [Newkid49] OZ, i htink this is an INR7 on the 15' EELN...
[7/29/2003 11:20:24 AM] [tinaSDtrader] If trading 5min, I wait for it to prove it's going back up - that means price starts rising and volume comes in - otherwise, I have no reason to believe it won't go down further - if the 10ema doesn't hold, may try for the 20ema so I play it safe
[7/29/2003 11:20:32 AM] [MarcoPolo] IJJI is piched between the 10 & 20 ma .. target 10.00 & 12
[7/29/2003 11:20:35 AM] [StockStalker] Buying TGEN below .94 based on range contraction and relative strenth. A bit thin so may consider going easy
[7/29/2003 11:20:36 AM] [tinaSDtrader] In fact - I do this for any time frame
[7/29/2003 11:21:19 AM] [micky] yes i do to tina
[7/29/2003 11:22:00 AM] [micky] only i use the 20 bar
[7/29/2003 11:22:50 AM] [tinaSDtrader] I like buying stocks that are going up, even if it means missing the first part of the move, rather than hoping a falling stock will stop falling. But everyone has their own strategy - have to do what works for you but prove it works with testing vs. just assuming it works
[7/29/2003 11:23:26 AM] [Groundog] THC going back up

[7/29/2003 11:23:48 AM] [tinaSDtrader] I just don't go long a bear bar, period. One of my strict rules - but others see that as a chance to buy at a lower price. Many strategies.
[7/29/2003 11:24:36 AM] [tinaSDtrader] no kidding magnet - catching a falling knife can quickly reduce hand to nubs!!!

[7/29/2003 11:26:56 AM] [tinaSDtrader] I was asked if I hold o/n or trade intraday - answer is I do both - if something is just getting going on daily, early in a new breakout, I'll hold o/n if no earnings due - but if it's already been running up a few bars on daily, I'll scalp it intraday because I expect it to pull back to support and don't want to be in o/n if/when it does - see my discussion on Pauses and Pullbacks.

[7/29/2003 11:26:56 AM] [kellam] Tina comments on SEM please, too extended?, gap up on erns

[7/29/2003 11:27:07 AM] [TeachMe] thx wb

[7/29/2003 11:28:06 AM] [tinaSDtrader] SEM - see my discussion on Pauses and Pullbacks - it's far away from the 20ema - those are the ones I'll scalp intraday but prefer not to hold o/n - but that's my strategy you may find something different works for you.

[7/29/2003 11:28:27 AM] [tinaSDtrader] Sure hope you were in for the gap up SEM!!!

[7/29/2003 11:29:07 AM] [wildbill] and u cannot fo wrong listening to tina's guidance as well imo!!

[7/29/2003 11:29:30 AM] [tinaSDtrader] SEM - I would have been willing to hold o/n from Friday because it was holding near support - today jumped way off support so risk factor goes up.

[7/29/2003 11:30:48 AM] [tinaSDtrader] I try not to give too much specific on one stock - but rather point out things that happen over and over again on the market that if you pay attn to can improve trading

[7/29/2003 11:31:53 AM] [tinaSDtrader] In the P&P discussion I refer to the 10 and 20 exp mov avgs, those are on my screen for ALL time frames. The 20ema is very strong, and lots of traders also follow the 10ema, so I use them both on price. I use other indicators, but too indepth to discuss on chat.

[7/29/2003 11:32:32 AM] [wildbill] yes was "specifically" speaking of T/A guidance-well tested and grounded in time tested techniqe's with stops of course!)

[7/29/2003 11:33:25 AM] [tinaSDtrader] Newer traders - also note that there are certain times of day market trades differently - like hotto mentions, beware the day trader dip last half hour or so of day, lots of profit taking and closing of accounts can drag market down there. Also, from about 11:30am ET to about 1:00pm ish - called mid-day doldrums - Wall Street goes to lunch so to speak.

[7/29/2003 11:33:28 AM] [swan] Tina, how about a Hotto Sat-caht session for you?

[7/29/2003 11:33:48 AM] [tinaSDtrader] Volume can drop out of a lot of stocks during the mid-day, and many stocks also tend to chop sideways during that time.

[7/29/2003 1:18:52 PM] [really] OZ, why did you get out of 1/3 of CORV several days ago at \$1.69 but stay in it when it dropped below \$1.60 which looks to me to be a base?
[7/29/2003 1:19:52 PM] [StockStalker] I have mixed feeling about that one. But basically once I enter a stock and then sell my first 1./3... I move the stop to break even on the remainder.
[7/29/2003 1:19:59 PM] [StockStalker] therefore I am still in

[7/29/2003 1:21:45 PM] [DataMiner] Sounds like a good strategy overall
[7/29/2003 1:22:31 PM] [StockStalker] becuase i can look at a chart and set a target on the fly, i dont concern myself with them when still trading close to my stop, People in here need to be thinking about stops more and targets less
[7/29/2003 1:23:06 PM] [StockStalker] first target needs to be a miniumum 2/1 risk reward ratio or I do not take the trade
[7/29/2003 1:24:18 PM] [DataMiner] How close do you set your stops?
[7/29/2003 1:24:49 PM] [Grinder] DCLK - GreenB)
[7/29/2003 1:25:17 PM] [StockStalker] the better I get the closer.... since i trade so much range contraction, it is very close. If to close then my first target needs to be 3/1 or more r/r
[7/29/2003 1:25:29 PM] [StockStalker] had a 30 cent stop on WFMI
[7/29/2003 1:25:45 PM] [StockStalker] 50 dollar stock

[7/29/2003 4:22:26 PM] [hotto] If you like different numbers... go for it..

[7/29/2003 4:24:37 PM] [kmgreen] Hotto, you use etrade as I do; I found today that etrade does not hold stops but sends them to the specialist (if there is one) immediately. Do you use hard stops or mental stops?
[7/29/2003 4:24:59 PM] [Steven57] CyberTrader holds them
[7/29/2003 4:25:45 PM] [hotto] mostly mental Stops
[7/29/2003 4:25:49 PM] [JerryA] anyone know when OMG announces earnings?

[7/29/2003 4:28:29 PM] [StockStalker] most of what we are doing herre is nasdaq and I am relativly sure that etrade is using broker held orders on those issues... nite is the only mm that will accept a stop order on the naz so the broker usually holds them for u
[7/29/2003 4:28:38 PM] [kmgreen] I have been burned, but with 3 letter stocks
[7/29/2003 4:29:10 PM] [Steven57] Cyber holds in the software and doesn't send till stop hit

[7/29/2003 5:22:09 PM] [Mariobozu] anyone going to the TCNet seminar in Scottsdale this weekend?

[7/29/2003 5:23:32 PM] [ChuckR] too far for me

[7/29/2003 5:24:09 PM] [Mikon] Two best books on which I base my trades are J. Bernstein's Momentum Stock Selection and S.Nison's Japanese Candlestick Charting Techniques

[7/29/2003 5:24:49 PM] [Mariobozu] I like the Candlestick Charting Techniques

[7/29/2003 5:25:17 PM] [Steven57] Nison has two good books and Stephen Bigalow's as well

[7/29/2003 5:25:53 PM] [rockin] hotto - INGN - any thoughts?

[7/29/2003 5:26:10 PM] [Mikon] Combining the candlestick analysis with the momentum techniques plus stochastics and moneyflow has raised my hit ratio above 80%

[7/29/2003 5:26:44 PM] [Mikon] I have Nison's second book, but haven't started it yet

[7/29/2003 5:26:57 PM] [Mikon] "Beyond Candlesticks"

[7/29/2003 5:28:14 PM] [Mikon] Mario, I found the candlesticks really helped me. I try to start with candles to spot possible trades.

[7/29/2003 5:28:16 PM] [ilovemusicCOM] MSTR seems to have had a delayed reaction. MagicBriefing reported MSTR beat handily and there was no movement. It was at 39/39.50. Now approaching 44.

ClubHome

[7/29/2003 5:28:40 PM] [ilovemusicCOM] It was not halted. A case where Briefing was ahead of the stock movement.

[7/29/2003 5:28:56 PM] [Steven57] did you get it?

[7/29/2003 5:29:06 PM] [Mikon] Hope you jumped on it, ilove

[7/29/2003 5:29:18 PM] [Marioboza] Oh that is interesting, Mikon. I follow candlestick patterns.ty

[7/29/2003 5:29:19 PM] [ilovemusicCOM] I got bored with it because it was just sitting there

[7/29/2003 5:29:43 PM] [Steven57] emotion gets another one

[7/29/2003 5:29:49 PM] [ilovemusicCOM] and I have other things to do besides staring at the screen.

[7/29/2003 5:30:23 PM] [ilovemusicCOM] next time will put an alert on such a stock.

[7/29/2003 5:31:20 PM] [Mikon] Mario, with all the stocks out there, I look for candles that emphasize the classic bullish (or bearish) patterns, then apply the other techniques for predictions of the moves. (Candles don't predict the range of moves)

[7/29/2003 5:32:58 PM] [Marioboza] That is a good place to start. Begin with set up patterns - that gives me an idea for a scan. Thanks

[7/29/2003 5:34:49 PM] [Mikon] Mario, test your scans versus historical data to refine. That's how I got comfortable with the momentum selection technique.

[7/29/2003 5:36:05 PM] [ilovemusicCOM] The challenge is TCnet has no way to test against historical data/

[7/29/2003 5:36:47 PM] [Marioboza] They dont? How far back do you mean?

[7/29/2003 5:37:10 PM] [ilovemusicCOM] There is no convenient way to backtest.

[7/29/2003 5:37:48 PM] [hotto] MSTR.. They sucked me in.. Long at 41.20

[7/29/2003 5:39:11 PM] [ilovemusicCOM] looks like good entry, Hotto

[7/29/2003 5:39:23 PM] [honus99] hotto, any thoughts on GSOF?

[7/29/2003 5:39:39 PM] [hotto] will know later.. thanks music..

[7/29/2003 5:40:12 PM] [Mikon] ilove, I was referring to the historical candle patterns. I simply bracket time frames and see if the bullish/bearish patterns come to fruition

[7/29/2003 5:40:19 PM] [honus99] MSTR, looks good right now hotto, look at that spread and price is climbing.

[7/29/2003 5:40:31 PM] [honus99] now

[7/29/2003 5:41:01 PM] [ilovemusicCOM] right Mikon, but there is no easy way to do that.

[7/29/2003 5:41:32 PM] [Mikon] Per multiple requests, I'll put some info in my

ClubHome

profile.

[7/29/2003 5:41:46 PM] [ilovemusicCOM] We should be able to systematically test the historical candle patterns to see how well they really work, not how well they seem to work just eyeballing a few stocks

[7/29/2003 5:43:04 PM] [Mikon] Ilove, I'll see if I can find a chart that illustrates my point. That's probably easier than typing words.

[7/29/2003 5:44:05 PM] [ilovemusicCOM] My point, is we need to do better than just find a chart or two, but look at hundreds, 1000's of charts and a computer system should do that for us.

[7/29/2003 5:45:26 PM] [ilovemusicCOM] Metastock has a fairly good backtesting system, but still difficult to use.

[7/29/2003 5:45:56 PM] [honus99] hotto, did you notice the short interest on MSTR? about 47% as of July 8.

[7/29/2003 5:46:03 PM] [Mikon] Understand. Haven't written any PCFs to do that as I have found more than enough plays to tie up my available money by screening familiar stocks by eyeballing.

[7/29/2003 5:49:50 PM] [Mikon] As time permits, I hope to generate some PCFs for my techniques. The visual input to the brain seems to be working good for the moment, but we all know how fast that can change

[7/29/2003 5:50:06 PM] [albertd] Hotto what,s your opinion for iiji ? thnks

[7/29/2003 6:32:30 PM] [HOTTO] Sailer has replied to: TINA'S TRADING TIP#1 - PAUSES AND PULLBACKS

[7/29/2003 6:32:53 PM] [Mikon] Ilove, nice find on UNA. I missed it (perhaps by not having a screen). If you are interested, I'll oost a chart that illustrates my charting parameters and comment on it.

[7/29/2003 6:33:30 PM] [tinaSDtrader] sorry to add to your workload hotto! - hoping I can throw you something worthwhile now and then since you are always tossing us goodies.

[7/29/2003 6:35:03 PM] [happy2be] just got back from my 22 aniv. with the wife, how was the last 4 days?

ClubHome

[7/29/2003 6:35:34 PM] [hotto] thanks tina.. nice ..it is nice to have something "pre-screened" to work on..:)

[7/29/2003 6:35:57 PM] [tinaSDtrader] Happy to - in fact - I'll give you a list of my top few mouth-watering b/out's in few mins.

[7/29/2003 6:36:13 PM] [hotto] ok.:)

[7/29/2003 6:36:47 PM] [happy2be] left last thursday, spent all my extra stock earnings now its time to earn the next years anniversary money

[7/29/2003 6:37:33 PM] [hotto] back in a while...

[7/29/2003 6:37:47 PM] [happy2be] TINA, at least i have 2 charts to look at lol

[7/29/2003 6:39:56 PM] [tinaSDtrader] if only there were only 2 - biggest problem each day is way too many things to buy and have to narrow down to less than a dozen:(

[7/29/2003 6:40:19 PM] [tinaSDtrader] a dozen to keep an eye on - I don't trade that many at once

[7/29/2003 6:41:01 PM] [happy2be] so true, try being gone for 6 days, it will take me 4 hours to scan and check out my stuff

[7/29/2003 6:41:44 PM] [tinaSDtrader] bums me out when something I had my eye on goes and I was too busy watching other stuff - need about two more hands and four more eyeballs

[7/29/2003 6:43:41 PM] [tinaSDtrader] actually - I need an assistant!!!

[7/29/2003 6:43:57 PM] [happy2be] i see china stocks are down, yes more eyes, i had a friend and we voice chatted as we traded, his wife got in a car accident, in wheel chair, now our chat and team work is on hold

[7/29/2003 6:44:40 PM] [tinaSDtrader] that's too bad - well at least you can come to hotto club - always someone willing and able to chat

[7/29/2003 6:45:12 PM] [happy2be] it was pretty cool, he had 5 charts, i had 5 charts, we would always have something popping

[7/29/2003 6:45:39 PM] [Mikon] So true Tina. I'm juggling 14 stocks during the day and find little time to chat. The hotto club may be your "virtual assistant."

[7/29/2003 6:45:40 PM] [happy2be] i miss the voice chat, i hate to stop and type

[7/29/2003 6:46:27 PM] [happy2be] hotto needs to open a voice chat so we don't have to type

[7/29/2003 6:46:27 PM] [tinaSDtrader] I use alerts on my broker now because it's too easy to miss things. Not foolproof, but keeps me from getting distracted and forgetting to go back and look at the hot ones.

[7/29/2003 6:47:02 PM] [happy2be] yea but you have to set the alerts each morning

[7/29/2003 6:47:42 PM] [tinaSDtrader] yes - but worth it if there are \$\$\$ to be

ClubHome

made when those bells start ringing and flashing

[7/29/2003 6:48:10 PM] [tinaSDtrader] trading is a business - I have work to do every day - that's part of my work - daily rituals

[7/29/2003 6:48:16 PM] [LazyKD] there is an advantage to setting alerts each morning - it forces you to really focus on the best setups

[7/29/2003 6:48:59 PM] [happy2be] yea, your right, might have to go their now, sure was fun to have someone alert me by voice, im spoiled

[7/29/2003 6:49:10 PM] [tinaSDtrader] yes - too easy to fumble around all day and good stuff gets away

[7/29/2003 6:49:55 PM] [LazyKD] i changed the sound of my broker's realtime alerts to the sound of a cash register. it always gets my attention

[7/29/2003 6:50:50 PM] [happy2be] i use tcnet alerts, takes alot of time to type them in

[7/29/2003 6:51:11 PM] [happy2be] cash sound good call

[7/29/2003 6:53:24 PM] [bmwrider] Tina, did you share that BO list? I might have missed it.

[7/29/2003 6:54:25 PM] [tinaSDtrader] caution on those TC Net alerts - I have had many instances where they did not trigger until waaaay late. I was making lunch one day, came back 10mins later, my stock was down 40cents lower than where the alert was set. It then dinged a few minutes later, about 15mins and 50cents later than it should have. Have had several instances where the alerts failed me. My broker's alerts are very timely.

[7/29/2003 6:54:40 PM] [tinaSDtrader] still working on it - soon

[7/29/2003 6:55:38 PM] [tiga] I've had the same alert problems. Using other software for alerts now.

[7/29/2003 6:56:06 PM] [tinaSDtrader] yes - love TC Net - but too expensive to rely solely on their alerts

[7/29/2003 6:57:49 PM] [happy2be] might have to check out my broker alerts, never used them much, now i might have to

[7/29/2003 6:59:16 PM] [happy2be] like i said, i would voice chat, not only alert each other, had someone to laugh at my jokes

[7/29/2003 6:59:51 PM] [tinaSDtrader] I have to laugh at my own jokes, pathetic but true

[7/29/2003 7:01:59 PM] [happy2be] my be some day you can hook up to voice chat, my jokes will bring tears to your eyes, they are so bad

[7/29/2003 7:02:21 PM] [Jazzy] Tina!

[7/29/2003 7:02:33 PM] [Jazzy] can you take a triangle Q?

[7/29/2003 7:03:06 PM] [skimmer] For alerts you can use QuoteTracker. They

ClubHome

even have trendline alerts and the program is free.s

[7/29/2003 7:03:34 PM] [Jazzy] Fidelity Active Trader Pro has an efficient and fast alert

[7/29/2003 7:04:13 PM] [bmwrider] Thanks Tina

[7/29/2003 7:04:51 PM] [happy2be] thanks, hey check out EMC, my scan just brought it up, not to bad, ms needs a move up

[7/29/2003 7:07:26 PM] [Sully] Anybody have AH price for GAIA

[7/29/2003 7:08:19 PM] [tinaSDtrader] I have no AH for GAIA, sorry

[7/29/2003 7:08:37 PM] [Sully] Thx anyway tina

[7/29/2003 7:08:57 PM] [skimmer] Last price on Island was 5.90

[7/29/2003 7:09:23 PM] [Sully] Thx skimmer

[7/29/2003 7:09:33 PM] [Jazzy] T ... Edwards/Magee say it is essential on a b/o of a converging triangle for vol to increase...is this a criteria you agree with?

[7/29/2003 7:10:09 PM] [Sully] Good night to all and happy trading tomorrow

[7/29/2003 7:10:26 PM] [skimmer] GN Sully

[7/29/2003 7:10:40 PM] [happy2be] gn sully

[7/29/2003 7:11:56 PM] [tinaSDtrader] ideally, yes, hi volume is important to me on a breakout. But if it isn't fairly hi b/o day, I'd want to see volume come in the following days or probably will fizzle out

[7/29/2003 7:13:04 PM] [tinaSDtrader] When I have many breakouts to choose from, all else being equal, hi vol would help me decide between them. But I scan for hi volume anyway, so that's not something I have to deal with.

[7/29/2003 7:13:06 PM] [Jazzy] these triangles have a way of hanging around the breakout point...takes patience...2-3 days

[7/29/2003 7:13:52 PM] [tinaSDtrader] yes - can always put in an alert for a hair above the close or high of those "hanging out" bars to be notified if they go

[7/29/2003 7:14:01 PM] [Jazzy] JHF is a nice pattern that is stalled or digesting the bo...

[7/29/2003 7:14:14 PM] [tinaSDtrader] sometimes that 2-3 days is the pullback to the trendline

[7/29/2003 7:14:28 PM] [happy2be] TINA, what are some of you pcf's you like the best?

[7/29/2003 7:15:17 PM] [tinaSDtrader] OK - here goes my list with full disclaimer: 1) enter at your own risk; 2) do your own homework/analysis on any picks anyone gives you; 3) apply your own trading rules to ensure good entry, stops, exit, etc.

[7/29/2003 7:16:13 PM] [FreeSpirit] bravo!

[7/29/2003 7:16:32 PM] [tinaSDtrader] Here are a few that cleared ceilings today: AAI, BEV, DSCO, KEA, SEM, WNC

ClubHome

[7/29/2003 7:18:05 PM] [tinaSDtrader] Here are a few that are approaching ceilings, may find resistance there and hope to get above that: BMRN, HILL, INVX, NTPA, OSUR, PTEK, SBAC, UNA,

[7/29/2003 7:18:40 PM] [tinaSDtrader] And a few others that caught my eye: JNPR, MCD, PMTI, TALK

[7/29/2003 7:18:44 PM] [happy2be] ok tina, will do the home work, still looking through my scans, thanks, maybe one will make a mill. tomorrow

[7/29/2003 7:19:29 PM] [tinaSDtrader] Any picks I put up are no guarantee, and I'm not advising to buy/sell them - just sharing

[7/29/2003 7:20:24 PM] [Dennis4Cash] thank you Tina for sharing!! Your're the best.....

[7/29/2003 7:20:28 PM] [tinaSDtrader] TALX at a ceiling too, but earnings 7/30 so I'm a no-go til see how it shakes out

[7/29/2003 7:20:39 PM] [tinaSDtrader] yw

[7/29/2003 7:22:38 PM] [happy2be] in and out of talk 2 years ago, that is a blast from the past

[7/29/2003 7:23:27 PM] [kellam] thanks for your ideas Tina, appreciat all your help

[7/29/2003 7:23:39 PM] [kellam] appreciate

[7/29/2003 7:23:44 PM] [dns1] llovemusic, I don't know if you are here, but I appreciate your listing of companies to report earnings tonight! Was looking at CREE, but forgot their earnings were released tonight. What a drop after they released them! Thanks again for the heads up!

[7/29/2003 7:25:33 PM] [happy2be] just finished building a new computer, time to see if it works, by all

[7/29/2003 7:32:22 PM] [ilovemusicCOM] welcome, dns1. I make more money playing earnings reports after hours than anything! So I like to watch to see what is on my plate.

[7/29/2003 7:33:48 PM] [ilovemusicCOM] So busy writing a new MagicSPAM program, I couldn't focus too well tonight on earnings, though.

[7/29/2003 7:34:32 PM] [skimmer] ILM do you wait to see what is the market's reaction to the report or you anticipate and buy or sell prior to the report..

[7/29/2003 7:35:28 PM] [ilovemusicCOM] So far, I try to anticipate, but do not enter a position until after I've judged the market reaction to the news.

[7/29/2003 7:36:40 PM] [ilovemusicCOM] For example, if I have some data that suggests AMZN will issue a good report, I get my finger ready to press Ctrl-E, which sends a quasi-market order to buy.

[7/29/2003 7:37:10 PM] [ilovemusicCOM] But am also willing to press Chtrl-H, which will send a simulated market short

ClubHome

[7/29/2003 7:37:36 PM] [ilovemusicCOM] We can't send market orders in extended hours, so I use some tricks to essentially do the same thing.

[7/29/2003 7:38:00 PM] [ilovemusicCOM] I don't have to set a limit price -- just press the appropriate hot key.

[7/29/2003 7:38:04 PM] [skimmer] N owadays is so hard to figure out a reaction. Sometimes a good report has negative reactions and sometimes it doesn't. The same for negative reports.

[7/29/2003 7:38:36 PM] [ilovemusicCOM] right

[7/29/2003 7:38:59 PM] [ilovemusicCOM] But when market reaction fits the news, results are usually good.

[7/29/2003 7:39:20 PM] [ilovemusicCOM] When market reaction goes against the news, it is dangerous, IMO.

[7/29/2003 7:40:36 PM] [ilovemusicCOM] I go in with a fairly heavy share size, but only when I'm confident (which is not too often)

[7/29/2003 7:40:53 PM] [ilovemusicCOM] So I don't tradae that often in AH, but when I do, the results are usually good.

[7/29/2003 7:41:18 PM] [skimmer] Sometimes the reaction is one way and anfer a few minutes it goes the opposite way. I guess you stay in for short periods, then

[7/29/2003 7:42:08 PM] [ilovemusicCOM] Yes, sometimes the first reaction is wrong.

[7/29/2003 7:42:55 PM] [skimmer] How do you guess if is right or wrong?.

[7/29/2003 7:42:56 PM] [ilovemusicCOM] Like with MSFT.. the first reaction was "ho-hum" ... no reaction.

[7/29/2003 7:43:04 PM] [ilovemusicCOM] sorry not MSFT

[7/29/2003 7:43:14 PM] [ilovemusicCOM] MSTR

[7/29/2003 7:43:24 PM] [albertd] []

[7/29/2003 7:43:50 PM] [ilovemusicCOM] If both guidance and earnings are good, I go with the initial reaction.

[7/29/2003 7:43:57 PM] [ilovemusicCOM] if it is up.

[7/29/2003 7:44:41 PM] [skimmer] Sometimes the projected sales seem to have more weight than earnings

[7/29/2003 7:45:17 PM] [ilovemusicCOM] It seems I've missed out on a lot of good plays by being too conservative and not jumping in.

[7/29/2003 7:45:50 PM] [ilovemusicCOM] We get paid for taking risks.

[7/29/2003 7:46:17 PM] [ilovemusicCOM] It is important not to chase, if one is late.

[7/29/2003 7:46:22 PM] [dns1] seems hard to figure, but I know from Hotto, Tina, and others to be careful holding into the earnings reports. And you helped remind me of the on CREE, so tx!

ClubHome

[7/29/2003 7:46:41 PM] [ilovemusicCOM] But often, I've elected not to chase a stock and then watch in go up two more points.

[7/29/2003 7:47:08 PM] [skimmer] You are right. Me too I guess that is why we have stop orders to protect position....

[7/29/2003 7:47:12 PM] [ilovemusicCOM] Yes, holding into earnings is quite a risk I think.

[7/29/2003 7:47:30 PM] [dns1] are you talking strictly in after hours trading? Otherwise you could use a trailing stop?

[7/29/2003 7:47:53 PM] [ilovemusicCOM] yes, talking after hour trading

[7/29/2003 7:49:45 PM] [skimmer] If it goes your way do you recommend holding overnite?

[7/29/2003 7:50:21 PM] [ilovemusicCOM] yes, if it goes your way, I think it is best to hold.

[7/29/2003 7:50:25 PM] [dns1] Do you listen to the individual conference calls on the earnings? I don't know what they said on CREE, but it seems to be recovering some.

[7/29/2003 7:51:31 PM] [ilovemusicCOM] I often do listen to the call to try to get a feeling for how the market will react. However, this doesn't always work.

[7/29/2003 7:52:06 PM] [ilovemusicCOM] I listened to the recent AMZN call and those guys didn't sound very good too me, yet, AMZN skyrocketed the next day.

[7/29/2003 7:53:02 PM] [ilovemusicCOM] That looks like a very weak recover on CREE on my AH chart.

[7/29/2003 7:53:33 PM] [dns1] you must chart that in something else than tcnet?

[7/29/2003 7:54:08 PM] [ilovemusicCOM] Yes Cybertrader offers a cool way to flip instantly to extended hours charting.

[7/29/2003 7:55:04 PM] [dns1] I'm sure you are using Cybertrader pro. I need to get that instead of the X2 software. Almost there on trade numbers.

[7/29/2003 7:55:22 PM] [ilovemusicCOM] I have a movie of it on my website (alas, my website will be gone soon :) :()

[7/29/2003 7:55:48 PM] [dns1] why's that? Enjoyed all the resources you put on there.

[7/29/2003 7:55:59 PM] [ilovemusicCOM] both happy and sad that my website may be sold soon.

[7/29/2003 7:56:26 PM] [ilovemusicCOM] I'm working on a link now that will say "This used to be Phil Seyer Website..."

[7/29/2003 7:56:46 PM] [dns1] Of course, I also wondered how you mainted it with everything else you do.

[7/29/2003 7:56:58 PM] [skimmer] Can't you open another one?

[7/29/2003 7:58:10 PM] [ilovemusicCOM] Yes all the same stuff, just a different URL.

[7/29/2003 7:58:25 PM] [ilovemusicCOM] but I love that name ilovemusic

[7/29/2003 7:58:37 PM] [skimmer] Great...

[7/29/2003 7:58:50 PM] [ilovemusicCOM] apparently so does some big music company in England.

[7/29/2003 7:59:21 PM] [dns1] well, that doesn't sound all bad!

[7/29/2003 7:59:31 PM] [skimmer] They buying it for the domain I guess...

[7/29/2003 8:03:49 PM] [dns1] there seems to be a real art to picking those names!

[7/29/2003 8:04:22 PM] [skimmer] Thanks guys. have to run some errands. back later...

[7/29/2003 8:04:24 PM] [ilovemusicCOM] yes, but most are gone now.

[7/29/2003 8:28:34 PM] [really] Can anyone explain the ABC on IJJI. A can't be 7/17 @ \$8.00. Must be A 7/23 Close=\$8.58 (low) , B 7/24 Close - \$8.75 (high), C 7/28 Close =\$8.37 (lower low). Is that correct. If not like to know the correct days and prices. thanks

[7/29/2003 9:31:15 PM] [StockStalker] today kind of wore me out... just woke up from nap.

ClubHome

[7/29/2003 9:32:33 PM] [dns1] OMG, kind of hard to figure, with the unit they are selling. They have a conference call tomorrow that may be more important.

[7/29/2003 9:33:17 PM] [dns1] Sounds like you need a rest with all those stocks you are following OZ, lol.

[7/29/2003 9:33:44 PM] [StockStalker] well it was a bit tough to stomach when mkt was making lows after the "bad" number

[7/29/2003 9:34:13 PM] [dns1] yes, wondered at the time, but turned out to be a good buying opp.

[7/29/2003 9:37:26 PM] [StockStalker] when one is in the strongest stocks, it gives an indicator that is not available to those that are not

[7/29/2003 9:38:57 PM] [StockStalker] If you are going to trade tech stock with the futures though, trade it with the NQ's instead. But remember this, when an index or derivative of an index (spoons, nq's) starts to go up, it means that most of the individual issues in that index have already made there move up and the the lesser movers in that index are just starting to follow them (opposite when short).

[7/29/2003 9:39:24 PM] [StockStalker] The best thing to do is to have a board view (updating table view) of the stock in an index sorted by percentage gain/loss. The up ones should show green and the down ones should show red.

[7/29/2003 9:39:35 PM] [Mmb] SANG

[7/29/2003 9:39:47 PM] [StockStalker] This way you will get an internal "feel" of an index "making the turn". And you can establish a positions in the leaders only first and the 2nd tier later.

[7/29/2003 9:40:11 PM] [StockStalker] It will also show you what sectors within the index are holding things form moving and then you can go to those individual issues in that particular sector and use this same analysis to determine when that sector will join the party or if a reversal of the index is imminent.

[7/29/2003 9:40:11 PM] [swan] good point, SS. where does one find a list of components?

[7/29/2003 9:40:34 PM] [StockStalker] This way you have a Zen like feel of the internals and can execute a futures trade or equity trades within that index on a much earlier and knowledgeable basis.

[7/29/2003 9:40:52 PM] [StockStalker] I used to trade baskets and did much research on index internals and micro analysis that really gave me a good feel on why the market is where it is at any given time.

[7/29/2003 9:41:13 PM] [StockStalker] It was not unusaul for me to be in 50 to 100 positons at one time and day trade them.

[7/29/2003 9:41:48 PM] [StockStalker] Many asked "why not just trade the SPY. Q's, or Futures and buy the whole index"??????

ClubHome

[7/29/2003 9:42:16 PM] [StockStalker] "since you are buying the index anyway and cannot beat it"??????

[7/29/2003 9:42:30 PM] [StockStalker] that is an incorrect assumption I have to say

[7/29/2003 9:43:08 PM] [StockStalker] The reason is, if I am only in all the stocks in the index that are going up and not in the losers of the index, I am effectively outperforming the overall index

[7/29/2003 9:43:51 PM] [StockStalker] a kind of synthetic index trading but without the losers

[7/29/2003 9:44:55 PM] [StockStalker] I am not currently set up to handle that many stocks at the time and am trading much less at one time. But I am more or a stock picker now than a daytrader as I was at the time

[7/29/2003 9:48:15 PM] [StockStalker] the list of components is widely available.... it is on tcnet in fact.... u just need to make urself available to all the info that is around you here and on the web

[7/29/2003 9:56:43 PM] [StockStalker] did I put y'all to sleep

[7/29/2003 9:57:36 PM] [wildbill] i was already asleep zzzzzzzzzz's- nothing to do with you:)

[7/29/2003 9:58:04 PM] [arch] just looking for trades and watching chat. what you say makes a lot of sense and I appreciate it

[7/29/2003 9:59:09 PM] [StockStalker] lol

[7/29/2003 9:59:34 PM] [StockStalker] i just overwrote my whole new chart layout on esig

[7/29/2003 9:59:38 PM] [StockStalker] not good

[7/29/2003 10:02:03 PM] [luk122] I'm not a sleep but trying to get the picture. I'm a noob so all this stuff gives me a headache.:o

[7/29/2003 10:03:40 PM] [StockStalker] well all u need to focus on at first is how to trade one or two stocks and learn to break even.... then tweak that into making money cuz then ur close

[7/29/2003 10:04:19 PM] [arch] just pulled up MSSN is this a beauty or what?

[7/29/2003 10:05:01 PM] [StockStalker] not bad at all

[7/29/2003 10:06:54 PM] [Richc] Oz, you are so right.....when you can first reverse the "eat like a bird, poop like an elephant" scenario, that is when you have just learned the start of "viable" trading.

[7/29/2003 10:07:21 PM] [GeezerKid] ..not asleep at all, OZ. Appreciate your thoughts .. especially about focusing on the up stocks in the indexes .. etc.

[7/29/2003 10:07:38 PM] [luk122] Breaking even is still a challenge. I make comebacks but then just make dumb mistakes like not enforcing my mental stops

ClubHome

and my losers manage to get big sometimes. Lots to learn. I'm still amazed how some of you(hotto, Oz, Tina, wildbill) can call out stocks and then they do what you said.

[7/29/2003 10:13:11 PM] [GeezerKid] While OZ was making his observations I was setting up TCNet with Dragon Voice Commands .. can now voice command the Jump command and symbols, zoom, templates, time frames, watchlist functions .. also lets me go back and forth between Qcharts and TcNet with voice commands .. setting up QCharts next with voice commands ..

[7/29/2003 10:14:16 PM] [Chapmaster] Geezer ... can you use it to set up Alerts?

[7/29/2003 10:14:44 PM] [GeezerKid] .. good idea .. don't see why not ..

[7/29/2003 10:15:15 PM] [StockStalker] Geezer.... I JUST DROPPED Q CHARTS for Esignal!!!!!!

[7/29/2003 10:15:22 PM] [Chapmaster] that would be great ... its so cumbersome in TCNet ... should be a simple mouse click feature

[7/29/2003 10:15:42 PM] [StockStalker] charts very much aloke (some of the same programmers).... but soooo much better performance

[7/29/2003 10:16:41 PM] [GeezerKid] .. looked at esignal last night after you mentioned it .. need to hash it out some more yet ..

[7/29/2003 10:17:11 PM] [StockStalker] it allows programming so that u can make ur own indicators

[7/29/2003 10:17:30 PM] [StockStalker] and programs that compute pivot points and such right on the chart

[7/29/2003 10:17:37 PM] [StockStalker] it is a progarammers dream

[7/29/2003 10:19:09 PM] [GeezerKid] .. what i really want is something that alerts me to when volume makes an unusual jump or averages cross .. things TCNet should have but doesn't .. but TCNet has good scans

[7/29/2003 10:19:57 PM] [kmack] Cybertrader has RT vol surges

[7/29/2003 10:20:21 PM] [GeezerKid] .. and a good chat community .. as evidenced by you OZ and Kmack ..

[7/29/2003 10:21:11 PM] [GeezerKid] .. Cybertraqder .. I am too lazy to switch .. I manage OK with what I have and meet my basic profile goals ..

[7/29/2003 10:22:14 PM] [StockStalker] signal has crossover programs that users have written

[7/29/2003 10:23:51 PM] [GeezerKid] .. yeah, that's a nice thing about esignal .. there are a lot of programs out there for the grabbing .. like the community of PCF formulas for TCNet .. I just have to sort out the esignal packages .. looks like there is a basic and then you need to do a couple of addons ..

[7/29/2003 10:25:27 PM] [GeezerKid] .. what are you using OZ, the basic and

ClubHome

what else?

[7/29/2003 10:27:49 PM] [StockStalker] sorting out the esignal pricing is very difficult to say the least

[7/29/2003 10:28:09 PM] [StockStalker] and once u enter the program it is very non intuitive as well

[7/29/2003 10:28:11 PM] [StockStalker] BUT

[7/29/2003 10:28:29 PM] [Newkid49] Dragon Voice commands.....hmmm, remembrance of LHSP...hB)

[7/29/2003 10:28:32 PM] [Steven57] I gave up eSig for QC

[7/29/2003 10:28:37 PM] [StockStalker] the reason is becuase is is so wide open and flexible and does not force u into a direction

[7/29/2003 10:28:41 PM] [StockStalker] QC is crap

[7/29/2003 10:28:58 PM] [StockStalker] i can not in good faith trade a hedge fund and use that product

[7/29/2003 10:29:06 PM] [Steven57] it's good crap for me

[7/29/2003 10:29:11 PM] [StockStalker] i used them 4 years ago

[7/29/2003 10:29:17 PM] [StockStalker] and tried again this year

[7/29/2003 10:29:52 PM] [Steven57] took me less than a month to dump eSig, too much for too little, but I don't do funds

[7/29/2003 10:30:08 PM] [StockStalker] too little????

[7/29/2003 10:30:20 PM] [StockStalker] it is overwhelming it seems

[7/29/2003 10:30:30 PM] [StockStalker] for example....

[7/29/2003 10:30:50 PM] [GeezerKid] LHSP bought out Dragon and this is the first edition that lives up to the hype .. have used these preograms since they came out and this is the first time I have stuck with it .. couple other TCNet users use voice programs .. don't remember who ..

[7/29/2003 10:30:56 PM] [StockStalker] i just overwrote all my setup a few minutes ago

[7/29/2003 10:30:59 PM] [Steven57] they nickle and dime (or 50 and 100) for each additional feature, scans etc. QC has all the scans I need included

[7/29/2003 10:31:14 PM] [StockStalker] i was quite pissed and had all my positions and info loaded

[7/29/2003 10:31:25 PM] [StockStalker] I agree on the 50 and 100

[7/29/2003 10:31:50 PM] [StockStalker] I agree on the strange packaging

[7/29/2003 10:31:53 PM] [StockStalker] of the fees

[7/29/2003 10:32:10 PM] [StockStalker] it is what scared me away to begin with

[7/29/2003 10:32:21 PM] [Steven57] if they'd better their price I'd reconsider, but for me QC is champs

ClubHome

[7/29/2003 10:32:24 PM] [StockStalker] but the 50 or 100 means u are VIEWING all of them at one time
[7/29/2003 10:32:44 PM] [StockStalker] which would probably make QC blow up to begin with
[7/29/2003 10:32:56 PM] [StockStalker] specially offer a econ number comes out
[7/29/2003 10:33:02 PM] [Steven57] I usually only follow about 20-40 at a time
[7/29/2003 10:33:11 PM] [StockStalker] so the 50 to 100 is not an issue then
[7/29/2003 10:33:26 PM] [StockStalker] except in theory
[7/29/2003 10:33:47 PM] [StockStalker] 100 bucks a month gives u all the muscle u need
[7/29/2003 10:33:53 PM] [StockStalker] including futures
[7/29/2003 10:34:05 PM] [StockStalker] but is was hard to figure out I have to say
[7/29/2003 10:34:14 PM] [KarenR] do you use their scans?
[7/29/2003 10:34:15 PM] [Steven57] I meant \$50-\$100 or more for certain scans
[7/29/2003 10:34:20 PM] [KarenR] the add ons?
[7/29/2003 10:34:30 PM] [StockStalker] oh like the advanced get and such
[7/29/2003 10:34:35 PM] [KarenR] yes
[7/29/2003 10:34:38 PM] [GeezerKid] Dragon Naturally Speaking 6.0 is what I have ..
[7/29/2003 10:34:39 PM] [Steven57] yes, the additional scan,etc ran the price up
[7/29/2003 10:34:43 PM] [StockStalker] but those add ons are the work of others that are trying to make money on them
[7/29/2003 10:34:54 PM] [StockStalker] u can program anything u want for gree
[7/29/2003 10:34:57 PM] [StockStalker] free
[7/29/2003 10:34:58 PM] [Chapmaster] thx GK
[7/29/2003 10:35:01 PM] [Steven57] I don't begrudge, just don't need at that price
[7/29/2003 10:35:16 PM] [KarenR] i see what you are saying - you can program a similar
[7/29/2003 10:35:18 PM] [StockStalker] i think with qc I was at 80 a minth
[7/29/2003 10:35:20 PM] [KarenR] scan and not pay the add ons
[7/29/2003 10:35:20 PM] [StockStalker] month
[7/29/2003 10:35:29 PM] [StockStalker] with no fewtures and horrible L2
[7/29/2003 10:35:44 PM] [StockStalker] that did not even incorporate Island into the montage
[7/29/2003 10:35:44 PM] [Steven57] I have VT and use it just for alerts mostly, but there is alot of power for the price and QC drives it fine
[7/29/2003 10:36:01 PM] [StockStalker] so I never knew what the price really was
[7/29/2003 10:36:13 PM] [KarenR] esignal is 185 a month

ClubHome

[7/29/2003 10:36:16 PM] [Steven57] have L2 with CT Pro, so not an issue for me
[7/29/2003 10:36:20 PM] [KarenR] which one are you using oz?
[7/29/2003 10:36:25 PM] [Steven57] hey, each his own,eh?
[7/29/2003 10:36:25 PM] [StockStalker] 185???
[7/29/2003 10:36:30 PM] [StockStalker] that has much added to it
[7/29/2003 10:36:36 PM] [StockStalker] I am at 100 for what i need
[7/29/2003 10:36:45 PM] [Steven57] 83
[7/29/2003 10:36:45 PM] [StockStalker] but if i add currency and other exchanges
it goes up
[7/29/2003 10:37:01 PM] [StockStalker] so u have futures added Steven
[7/29/2003 10:37:06 PM] [StockStalker] or not
[7/29/2003 10:37:17 PM] [Steven57] not
[7/29/2003 10:37:20 PM] [atraveler] can I break in with a newbie-type
question?...why do you need qc or esignal in addition to TCNet?
[7/29/2003 10:37:32 PM] [Steven57] more POWER!!!!
[7/29/2003 10:37:43 PM] [StockStalker] better intraday charting
[7/29/2003 10:37:45 PM] [atraveler] such as...?
[7/29/2003 10:37:46 PM] [KarenR] back up incase tcnet goes down
[7/29/2003 10:37:50 PM] [StockStalker] as a newbie tcnet will do the trick
[7/29/2003 10:37:58 PM] [StockStalker] NO TCNET is the backup
[7/29/2003 10:38:05 PM] [StockStalker] esig is the main weapon
[7/29/2003 10:38:11 PM] [Steven57] you always need a backup, because TCNet
will crap at say 9:29:30am M-F
[7/29/2003 10:38:15 PM] [atraveler] programming?
[7/29/2003 10:38:17 PM] [StockStalker] it is severall seconds faster on the chart
[7/29/2003 10:38:36 PM] [KarenR] oz are you using esignal equities
[7/29/2003 10:38:36 PM] [Steven57] real time scans
[7/29/2003 10:38:42 PM] [KarenR] or esignal equities basic
[7/29/2003 10:38:54 PM] [atraveler] thank you
[7/29/2003 10:39:03 PM] [StockStalker] no the BASIC does not have what they
call "advanced chart"
[7/29/2003 10:39:22 PM] [StockStalker] I found out the hard way and that is why i
agree on the difficulty of the packaging
[7/29/2003 10:39:40 PM] [KarenR] its very strange
[7/29/2003 10:40:22 PM] [StockStalker] and the trading community has some of
the best traders around,,, very sophisticated

scans

[7/29/2003 10:41:11 PM] [StockStalker] exactly

[7/29/2003 10:41:18 PM] [Steven57] I feel like a hick

[7/29/2003 10:41:25 PM] [StockStalker] no chart gives me the feel of the daily that the TC chart does

[7/29/2003 10:41:26 PM] [really] ces - thanks for the help on the ABC. Easy to see on 1 hr chart. much appreciated.

[7/29/2003 10:41:28 PM] [GeezerKid] Tks RMM .. i have scans for volume surges .. what I want is RT alerts .. I watch QCharts and can observe when a stock on my watch list takes off .. what I want is an alert signal that fires off when volumes jump x % .. that way when Oz's NR7 does take off .. a signal is alerted .. TCNet only give you a price alert .. that would be a reason to move to esignal .. maybe ..

[7/29/2003 10:41:39 PM] [StockStalker] and the EOD scans are priceless

[7/29/2003 10:42:00 PM] [StockStalker] the kind of real time alerts is First Alert by NeoVest

[7/29/2003 10:42:03 PM] [StockStalker] king

[7/29/2003 10:42:17 PM] [StockStalker] but it cost much more than retail traders are willing to pay

[7/29/2003 10:42:32 PM] [GeezerKid] .. oh, how much?

[7/29/2003 10:42:48 PM] [GeezerKid] .. sorry , I can look it up ..

[7/29/2003 10:42:52 PM] [StockStalker] Q charts does have a very nice intraday percent of normal vol sort that i love

[7/29/2003 10:42:56 PM] [StockStalker] over 500

[7/29/2003 10:43:08 PM] [StockStalker] probably 700 a month

[7/29/2003 10:43:19 PM] [StockStalker] but it will find anything u want

[7/29/2003 10:43:38 PM] [StockStalker] and scan 9000 stocks in real time tic by tic for the setups

[7/29/2003 10:43:56 PM] [StockStalker] mainly used by hedge funds and day trading floors

[7/29/2003 10:43:57 PM] [really] GeezerKid - have you looked into cybertrader or Schwab SSSPro. It has a lot of programming capability for alerts, etc.

[7/29/2003 10:44:51 PM] [GeezerKid] I use the volumes with the Gagnon Indexes .. it's sufficient .. but I am lazy and would like to sit back and wait for the beeps to go off .. will look a First Alert ..

[7/29/2003 10:45:11 PM] [StockStalker] Karen I use Esignal Equities (not basic) and prepay for the year...

[7/29/2003 10:45:25 PM] [StockStalker] First Alert is it

[7/29/2003 10:45:28 PM] [KarenR] ty

[7/29/2003 10:45:45 PM] [GeezerKid] a.. oh, wait ... 700 a month .. hum, may be too expensive to be lazy ..
[7/29/2003 10:45:53 PM] [StockStalker] different animal
[7/29/2003 10:45:54 PM] [KarenR] but if it goes down - I am blind
[7/29/2003 10:46:17 PM] [KarenR] need a back up and have heard good things about esignal
[7/29/2003 10:46:35 PM] [StockStalker] I can trade a few stock fine on TC but once I start loading up in many I need more muscle
[7/29/2003 10:46:40 PM] [GeezerKid] Karen, you can get Qharts little brother, LiveCharts for \$10 month ..
[7/29/2003 10:46:53 PM] [KarenR] thank you geezer
[7/29/2003 10:47:01 PM] [GeezerKid] .. realtime backup for TCNet ..
[7/29/2003 10:47:11 PM] [KarenR] I find it hard to monitor more then a couple of stocks
[7/29/2003 10:47:12 PM] [KarenR] on tc net
[7/29/2003 10:47:16 PM] [KarenR] thought it was just me
[7/29/2003 10:47:44 PM] [Steven57] TCNet can follow 20-30 easy
[7/29/2003 10:47:55 PM] [StockStalker] as I was saying earlier... I lost my layout... But apparently Esig saves all the individual components of a layout as individual windows type files in various folders and I re-built it on the fly in minutes
[7/29/2003 10:48:16 PM] [KarenR] steven you get 20/30 charts up for viewing?
[7/29/2003 10:48:20 PM] [StockStalker] No u need a board veiw that color codes ur winner as green and losers as red when u are in that many stocks
[7/29/2003 10:48:36 PM] [KarenR] ty Oz
[7/29/2003 10:48:38 PM] [StockStalker] otherwise u will not "feel" the shifts in sentiment
[7/29/2003 10:48:44 PM] [Steven57] ;)
[7/29/2003 10:49:02 PM] [StockStalker] it is great for watching lots of stocks for entires tho
[7/29/2003 10:49:10 PM] [KarenR] that's what I am missing
[7/29/2003 10:49:11 PM] [Steven57] Karen yes, easy on a 21" flat screen
[7/29/2003 10:49:23 PM] [StockStalker] but not watching a large portfolio of currently owned stocks
[7/29/2003 10:49:35 PM] [Steven57] actually can squeeze about 40 on the screen
[7/29/2003 10:49:40 PM] [StockStalker] will be nice if one day it scans agains real

[7/29/2003 10:52:48 PM] [Steven57] for charting 2-3 screens plenty

[7/29/2003 10:53:06 PM] [StockStalker] with First alert it used to tell me every stock the second it closed a gap. Time wieghted Vol breakouts. Sudden flurries of prints on individual tickers and many more scans that i wrote for it

[7/29/2003 10:54:14 PM] [houcpl] Are there any detailed instruction on how to use PCG's and Scans and also using them together???

[7/29/2003 10:54:46 PM] [KarenR] does esignal have some packaged scans etc.

[7/29/2003 10:54:51 PM] [KarenR] or do you have to program everything?

[7/29/2003 10:54:56 PM] [Steven57] I watch my % tabs to clue me in to bonuses or problems

[7/29/2003 10:55:44 PM] [KarenR] k

[7/29/2003 10:55:48 PM] [StockStalker] I am still learning exactly how they work... They are more like indicators but I think they can be programmed to True or False.

But they are all posted for free at the site and can be modified to suit

[7/29/2003 10:56:20 PM] [StockStalker] futures traders always know their "pivot points'. PP, RI R2, S1 S2 etc....

[7/29/2003 10:56:30 PM] [StockStalker] they always have to be calculated and put on chart

[7/29/2003 10:56:42 PM] [StockStalker] the floor traders write them on their hands

[7/29/2003 10:56:48 PM] [Luigistock] OZ looking into esignal for a while now - which package are you using - esignal equities?

[7/29/2003 10:56:57 PM] [StockStalker] my esignal program calcualtes them and puts them on the chart for me

[7/29/2003 10:57:02 PM] [StockStalker] yes

[7/29/2003 10:57:17 PM] [StockStalker] bot the year for 1100 with futures

[7/29/2003 10:57:43 PM] [StockStalker] to have automatically calculated pivots on all the stocks i trade is huge

[7/30/2003 10:49:05 AM] [syatt] pretty complex, Tina :)

[7/30/2003 10:49:18 AM] [tinaSDtrader] HILL going for the 17.06 ceiling on 7/14 - gets above that would be nice

[7/30/2003 10:49:43 AM] [tinaSDtrader] yes - my system is very complex!!! - Buy in an uptrend, short in a downtrend - cut losses quickly, let profits run. Very basic!

[7/30/2003 10:51:04 AM] [stan1z] tina, I was watching that 17.06 also, will buy if we break that

[7/30/2003 10:51:17 AM] [atraveler] I like it, Tina...but cut losses how quickly?

[7/30/2003 10:51:52 AM] [tinaSDtrader] When watching something, not bad idea to put in an alert for the breakout price in your broker, then you don't miss it

[7/30/2003 10:52:32 AM] [Coral] Tina, would you buy it @ 17.06

[7/30/2003 10:53:07 AM] [jrixey] The great question - how does one know when the trends begin and end

[7/30/2003 10:53:49 AM] [jrixey] Would love to hear your response

[7/30/2003 10:54:01 AM] [jrixey] Tina

[7/30/2003 10:55:37 AM] [tinaSDtrader] Sorry - I'm in it and was watching. I use the chart to tell me if it's a buy, but likely it will be pushing at that ceiling and then run a bit if it breaks it - but ceilings can act as resistance, so needs to punch thru it with some volume

[7/30/2003 10:56:32 AM] [CodyCare] Tina, about HILL, on the one hand, bo of 17.06 is good, on the other hand, it would then be high above 10 MA and due for a pb, no?

[7/30/2003 10:56:50 AM] [tinaSDtrader] I've already been in HILL for about 20mins - I'm on 5min bars and got a buy signal that's why I'm already in

[7/30/2003 10:58:38 AM] [tinaSDtrader] yes - HILL prob will get hi off the 10ema, so a break of the 17.06 ceiling may give a run and then I watch for a pullback

[7/30/2003 11:12:00 AM] [tinaSDtrader] HILL went down to the 20ema on 5s, my trail was a hair below that and the spike down on the last 5min got me - this happens when we have in hard stops - market manipulation

[7/30/2003 1:16:08 PM] [Cresus] We are getting an Eve & Adam formation on daily CORV - I believe this is very bullish

[7/30/2003 1:16:42 PM] [gjsnappy] what is Eve & Adam formation?

[7/30/2003 1:17:16 PM] [Cresus] When you have an inverted hammer and a hammer

[7/30/2003 1:17:43 PM] [kenard] CORV see briefing.com frontrunner \$150mil. contract

[7/30/2003 1:18:10 PM] [Luigistock] Less common than the A&E is its cousin, the Eve and Adam pattern. Price first develops support near its low on relatively minor volume in the signature rounded Eve curve. The market attempts a rally, which then fails at common retracement levels. Fear ignites the crowd and price action shifts into a higher volatility state. A sharp and violent drop ensues, hurling the stock back toward its lows. A high volume Adam reversal-spike then prints, often with a price extreme just below Eve's bottom. The subsequent uptrend can skyrocket as the crowd sentiment shifts sharply back toward the positive.

[7/30/2003 1:45:06 PM] [StockStalker] how optimiized?

[7/30/2003 1:45:38 PM] [StockStalker] is that PP or R1

[7/30/2003 1:45:46 PM] [HamFon] R1 resistance is $2 * \text{Pivot} - \text{Low}$

[7/30/2003 1:45:55 PM] [HamFon] Pivot = PP

[7/30/2003 1:46:25 PM] [StockStalker] how is that optimized

[7/30/2003 1:47:31 PM] [Sully] I just got back and the markets can move up now;)

[7/30/2003 1:47:56 PM] [HamFon] Actually, it's not - the higher S and R values are - instead of building from lower values. For example, $R2$ is $PP + R1 - S1$... but you can optimize the math so you don't have to calculate $R1$ and $S1$ first.

[7/30/2003 1:48:32 PM] [micky] if that is true i'm glad your back Sully;)

[7/30/2003 1:49:17 PM] [Coral] HamFon, what's the form for $S1$?

[7/30/2003 1:49:40 PM] [HamFon] $S1$ is Pivot - Hgh

[7/30/2003 1:50:09 PM] [HamFon] Whoops...

[7/30/2003 1:50:20 PM] [HamFon] $S1$ is $2 * \text{Pivot} - \text{High}$... sorry!

[7/30/2003 1:50:29 PM] [HamFon] $R1$ is $2 * \text{Pivot} - \text{Low}$

[7/30/2003 1:51:47 PM] [Coral] TY, HamFon

[7/30/2003 1:51:51 PM] [HamFon] $R2 = \text{Pivot} + R1 - S1$, and $S2 = \text{Pivot} + S1 - R1$. Higher values ($R3, S3$, etc.) follow the same pattern

[7/30/2003 2:29:52 PM] [HamFon] Although the user interface is still a bit rough, I'd appreciate any comments or suggestions. Thanks.

[7/30/2003 2:30:43 PM] [HamFon] I don't use or access eSignal, so I don't support it, sorry. And the TC SDK doesn't yet provide RT access.

ClubHome

Barrington Research comments on the 24.3% decline in mortgage applications for the week ended July 25. According to firm, at the current level, the composite index is below the year ago level for the first time in over a year. While Barrington does not see an actual housing bust unless rates rise substantially in the near-term, firm believes that in this age of short investor time horizons, housing-related stocks could come under pressure with further rises in mortgage rates and declines in mortgage activity. Notes that the plunge in refinancing activity is obviously a negative for banks and other financial institutions that have been major beneficiaries of the preceding boom.

[7/30/2003 3:36:42 PM] [Sully] Does that mean that if I buy futures I am a terrorist
[7/30/2003 3:36:52 PM] [Agarita] I think the idea on FuturMap was to identify individuals getting a high put position in a short time frame - inside information on terrorist attack
[7/30/2003 3:37:18 PM] [McDermojo] Sully LOL ... you just woke me up ...

[7/30/2003 7:28:15 PM] [kmack] from May high...
[7/30/2003 7:30:41 PM] [Zathrus] k - yes - I agree with you
[7/30/2003 7:30:49 PM] [cpratsch] TSV much better shows volume-related divergences, like a negative in May and one right now
[7/30/2003 7:31:36 PM] [Zathrus] I've been seeing the same sort of thing (actually worse) in SBUX since April
[7/30/2003 7:31:39 PM] [kmack] thanks guys...which TSV do you use cp?
[7/30/2003 7:32:31 PM] [cpratsch] i use normally TSV 17. Longer ones do not give better signals.i also plot TSV3 as early warning, although it is noisier
[7/30/2003 7:32:50 PM] [kmack] ty
[7/30/2003 7:33:47 PM] [kmack] seems I've been seeing div in TSV while MS has remained high...is TSV earlier..?
[7/30/2003 7:33:54 PM] [Zathrus] even with TSV, there is still a slight divergence between May and July
[7/30/2003 7:34:04 PM] [kmack] SBUX is one ex...seen others
[7/30/2003 7:34:49 PM] [Zathrus] I agree with Hotto on this stuff - if I can't know what the indicator IS, I have a hard time trusting it...
[7/30/2003 7:35:19 PM] [kmack] agree
[7/30/2003 7:36:21 PM] [Zathrus] kmack - do you have any thoughts on AV at this point?
[7/30/2003 7:36:57 PM] [kmack] still a continuation pattern IMO
[7/30/2003 7:37:41 PM] [Zathrus] I hope your right!
[7/30/2003 7:37:55 PM] [kmack] I hope so too if you are in
[7/30/2003 7:38:21 PM] [Zathrus] Yep - I got in before that nice pop the other day...(whoopie!)
[7/30/2003 7:38:47 PM] [cpratsch] kmack-saw ypur question: TSV is the best indicator as price x volume.MS is hopeless and too late
[7/30/2003 7:39:29 PM] [kmack] ok...thanks...so when they do not agree , go with TSV...
[7/30/2003 7:40:28 PM] [cpratsch] well, we do not know the underlying mathematics of either one. i never use MS, too late always, TSV is predictive both in EOD and RT data
[7/30/2003 7:40:38 PM] [turningpoint] Looking for a short or keeping your gains?
[7/30/2003 7:40:44 PM] [turningpoint] K
[7/30/2003 7:44:38 PM] [Tarpon] BOP is another "secret" indicator. I use it as candle color only, very often when it turns red there is a big drop just ahead

[7/30/2003 11:18:19 PM] [Mariobozu] All they did was up sell, it was terrible

[7/30/2003 11:18:58 PM] [Mariobozu] My wife finally got up and said 'are you ever going to show us trading techniques which is what we paid for or do you just keep selling stuff

[7/30/2003 11:19:16 PM] [Mariobozu] They say when George was involved it was better

[7/30/2003 11:19:33 PM] [Mariobozu] George has almost nothing to do with it

[7/30/2003 11:19:50 PM] [Mariobozu] Best to read his book or buy tapes at Ebay for \$200.

[7/30/2003 11:20:18 PM] [Dennis4Cash] I took it with George, not much better, save your money

[7/30/2003 11:22:33 PM] [husker] good to know

[7/30/2003 11:22:53 PM] [Mariobozu] Well, I think it gives a foundation for option plays. It doesnt replace hard work of studying, but you have to know the plays

[7/30/2003 11:25:57 PM] [Mariobozu] For a short, is it better to buy a put or sell a put

[7/30/2003 11:26:10 PM] [Mariobozu] oops,

[7/30/2003 11:36:22 PM] [Dennis4Cash] so what do you like Bor?

[7/30/2003 11:37:47 PM] [Dennis4Cash] I will do that, I'm always looking to add new strategies

[7/30/2003 11:38:09 PM] [Dennis4Cash] how do you define cheap?

[7/30/2003 11:38:37 PM] [Dennis4Cash] I used to use OptionVue but don't have a

[7/30/2003 11:38:52 PM] [Dennis4Cash] I understand

[7/30/2003 11:39:21 PM] [Dennis4Cash] so how far out of the money is too far?
how far out do you like to go

[7/30/2003 11:39:44 PM] [Mariobozu] Everything that the Optionetics touted as

[7/30/2003 11:43:58 PM] [Mariobozu] yes

[7/30/2003 11:44:09 PM] [Mariobozu] Hi BlueCollar!

[7/30/2003 11:44:34 PM] [BlueCollar] How long have you been trading options?

[7/30/2003 11:46:36 PM] [Mariobozu] On my own, only a short time

[7/30/2003 11:47:42 PM] [BlueCollar] So you find you do better with options than
stocks.

[7/30/2003 11:49:26 PM] [Mariobozu] just a different play. I have done pretty well
with stocks, I thought it would give me more leverage. My wife is a futures
daytrader(16 years) and she likes leverage

[7/30/2003 11:50:30 PM] [Mariobozu] I think CTXS is going back to 21.50, should I
buy a call? or just buy the stock?

[7/30/2003 11:50:49 PM] [Mariobozu] If I buy the stock that amount of money is
out of play

[7/30/2003 11:51:24 PM] [BlueCollar] THATS why I like options!

[7/30/2003 11:51:48 PM] [BlueCollar] It keeps alot of capitol free.

[7/30/2003 11:51:51 PM] [Mariobozu] There are only 20 and \$17.50 calls - I dont
like either but I dont fully understand the way to play it

[7/30/2003 11:52:58 PM] [Mariobozu] I could sell a put and if it gets put to me, I
like the stock, then I can sell the call - how does that sound?

[7/30/2003 11:53:07 PM] [BlueCollar] Is there alot of option volume?

[7/30/2003 11:53:25 PM] [Mariobozu] What is a lot?

[7/30/2003 11:53:53 PM] [Mariobozu] it looks liquid

[7/30/2003 11:54:13 PM] [BlueCollar] I like to trade options with alot of interday
volume...

[7/30/2003 11:55:06 PM] [Mariobozu] oh. I can find that out on prophet. I didnt
know intraday is different from just volume?

[7/30/2003 11:57:16 PM] [Marioboazu] sometimes, yes

[7/30/2003 11:57:37 PM] [BlueCollar] I've never sold...always long puts or calls

[7/30/2003 11:57:58 PM] [Marioboazu] He does what I said before - he will sell puts, if it gets put then he sells calls until it is taken

[7/30/2003 11:58:58 PM] [BlueCollar] Do you mean he does that so he wont have to cover?

[7/30/2003 11:59:23 PM] [BlueCollar] Thats what I'm afraid of

[7/30/2003 11:59:32 PM] [Marioboazu] I dont think that is why - it just makes money and saves commissions - sells can just expire

[7/31/2003 12:02:32 AM] [Mariobozu] That works out - he only does it on a good stock that he wont mind holding. Sell a put, say on CTXS, if it gets put then he sells calls til it is taken

[7/31/2003 12:03:14 AM] [Mariobozu] One time he sold puts against NXTL 3X before she owned it, then she already had a lot of profit

[7/31/2003 12:03:25 AM] [Mariobozu] Then he sold calls until it is taken

[7/31/2003 12:03:51 AM] [BlueCollar] I have to study more about the selling side of options. I've read that is where the most money is made...

[7/31/2003 12:03:58 AM] [Mariobozu] Same position right now with INTC,

[7/31/2003 12:04:24 AM] [Mariobozu] It IS where the money is, that is why they make it hard to do

[7/31/2003 12:04:29 AM] [BlueCollar] Sold a put?

[7/31/2003 12:04:53 AM] [Mariobozu] selling, most sites wont even let you sell a nakes put

[7/31/2003 12:04:59 AM] [Mariobozu] naked

[7/31/2003 12:05:32 AM] [Mariobozu] Let me get an example

[7/31/2003 12:06:33 AM] [Mariobozu] Alright CTXS is a good one. the chart pattern looks like it is going to go up Daily has a gap.

[7/31/2003 12:06:51 AM] [Mariobozu] But it could go down a little more (or a lot)

[7/31/2003 12:07:06 AM] [Mariobozu] But I like CTXS, it is a stable company

[7/31/2003 12:07:55 AM] [BlueCollar] I'm back, let me scroll back to catch up with you

[7/31/2003 12:09:10 AM] [Mariobozu] This is the part I dont know (I might call her broker and find out) but if I sell aAug 20 P for 1.75 I collect the money

[7/31/2003 12:09:55 AM] [BlueCollar] So then you buy all to cover?

[7/31/2003 12:09:56 AM] [Mariobozu] If it is put to me, I immediately sell a call, and collect again

[7/31/2003 12:10:09 AM] [Mariobozu] No, I never cover

[7/31/2003 12:10:29 AM] [BlueCollar] Sell a call to cover?
[7/31/2003 12:10:31 AM] [Mariobozu] I let the option run out. You have to cover buys, not sells
[7/31/2003 12:10:51 AM] [Mariobozu] I sell the call to get rid of the stock
[7/31/2003 12:11:34 AM] [Mariobozu] Like when INTC got to 23.00 she sold a 25.00 call. If it gets taken she gets her profit and the premium
[7/31/2003 12:12:00 AM] [Mariobozu] If it never breaks 25.00 and they dont call it, she'll sell another call until they take it, see?
[7/31/2003 12:12:04 AM] [BlueCollar] Hold on, I'm trying to run that one through my thick skull...
[7/31/2003 12:12:26 AM] [Mariobozu] Her broker showed us this one, I didnt understand at first either
[7/31/2003 12:12:53 AM] [Mariobozu] Sell a put if you dont mind owning the stock
[7/31/2003 12:13:07 AM] [BlueCollar] Now, you never actually own the stock. Correct?
[7/31/2003 12:13:08 AM] [Mariobozu] Let the option run out, only one commission
[7/31/2003 12:13:41 AM] [Mariobozu] When I sell the put, it COULD get put to me, then I immediately sell a call until they take it away
[7/31/2003 12:14:33 AM] [BlueCollar] Then you would never have to buy a stock at a higher price, right?
[7/31/2003 12:14:35 AM] [Mariobozu] So there is the money tied up in the stock at some point if it is put and before it gets taken. It works in her acccount, it would tie up money in my account
[7/31/2003 12:15:02 AM] [Mariobozu] But that is right, you wouldnt be buying at a higher price
[7/31/2003 12:15:20 AM] [Mariobozu] If you sell a put and it goes up, you only keep the premium
[7/31/2003 12:15:50 AM] [BlueCollar] Ok, I'll have to read up more on selling.
[7/31/2003 12:16:28 AM] [BlueCollar] Have you been trading the OEX for the last couple of days?
[7/31/2003 12:16:29 AM] [Mariobozu] Most sites, as I said, wont let you sell first. Just like shorting. The big guys only leave us the crumbs
[7/31/2003 12:16:56 AM] [Mariobozu] She only trades NDX, which follows exactly the OEX
[7/31/2003 12:17:23 AM] [BlueCollar] Day trades?
[7/31/2003 12:17:23 AM] [Mariobozu] Did you ever sell options on the OEF?
[7/31/2003 12:17:32 AM] [Mariobozu] She day trades
[7/31/2003 12:17:50 AM] [BlueCollar] No, I've never sold an option in my life.

[7/31/2003 12:19:08 AM] [BlueCollar] I've had my greatest profits trading the OEX.

[7/31/2003 12:24:04 AM] [Mariobozu] did you use to trade stocks? did you ever short?

[7/31/2003 12:24:29 AM] [AlanD] Here's my stock pick for the day. AVA

[7/31/2003 12:24:54 AM] [BlueCollar] Yes...

[7/31/2003 12:25:21 AM] [Mariobozu] Ava for long or short?

[7/31/2003 12:25:49 AM] [Mariobozu] AlanD - AVA for long or short?

[7/31/2003 12:25:51 AM] [AlanD] Absolutely long.

[7/31/2003 12:25:54 AM] [BlueCollar] ...the reason I started trading options was so I could short through my IRA

[7/31/2003 12:26:25 AM] [Mariobozu] you can sell options in the IRA?

[7/31/2003 12:26:42 AM] [Mariobozu] or do you short by buying a put?

[7/31/2003 12:26:52 AM] [AlanD] AVA is exhibiting more bullish characteristics than bearish.

[7/31/2003 12:26:57 AM] [BlueCollar] I short by buying a put.

[7/31/2003 12:27:53 AM] [Mariobozu] AVA could go to 16.70

[7/31/2003 12:28:05 AM] [AlanD] Very possible

[7/31/2003 12:28:30 AM] [Mariobozu] But there is somMACD divergence and the daily 200MA is below 12.00

[7/31/2003 12:29:13 AM] [Mariobozu] stochastic is low

[7/31/2003 12:29:25 AM] [AlanD] I like to breakout on better than avge volume.

[7/31/2003 12:29:48 AM] [AlanD] to = the

[7/31/2003 12:29:56 AM] [Mariobozu] so what I cant figure is why do we buy puts to short, why not sell a put to short and pocket the money. The bigger dollars are always on the short side
